THE CASCADE RECORD

Published in the Interests of the Boundary and Christina Lake Mining Districts

VOL. I. CASCADE, B. C., JULY 22, 1899. No. 37.

C. P. R. OFFICIALS HERE

Whyte, Marpole, Hamilton and Others in the Party.

ARE NOW TAKING IN THE BOUNDARY

Traveled Over the New Line to Rail-Head, and Spent Last Night in Cascade.---Go Out by Way of Penticton.

Last night a number of prominent C. P. R. officials arrived in Cascade on a general tour of inspection, which will extend as far overland as Penticton, and then to the coast. In the party were William Whyte, general manager of all lines west of Ft. William; Robert Marpole, superintendent of the Pacific division; L. A. Hamilton, of Winnipeg, land commissioner; W. F. Tye, chief engineer of the Columbia & Western, and J. G. Sullivan, assistant chief engineer. They were accompanied by C. C. Chipman, commissioner and chief executive officer of the Hudson's Bay Co. in Canada.

The party's trip into the Boundary was over the new railway as far as English Point, where they stopped long enough to see the tracklaying machine at work, when they scrambled down the steep hillside and boarded the steamer Myrtle B. which had been waiting for them for several hours, and then came on to Cascade. They remained here over night, went down and inspected the 1,600-foot bridge, looked at the depot grounds, took in the falls, expressed great admiration for the beautiful townsite of Cascade, and this morning, with the company's own teams started westward, intending to reach Midway tonight, touching briefly at Grand Forks, Columbia and Greenwood.

To a Record representative, all of the gentlemen stated that the visit was of no special import, except that they wished to inspect the new railway work. But, as they go to Penticton, it is believed, that the extension of the line from Midway to that point will be uppermost in their minds. Mr Whyte and Mr. Marpole, veteran railroad men, were more than pleased at the condition of the railway as far as completed, and were not slow to express themselves to that effect. With the exception of Mr. Hamilton and the engineers, it was the first visit of the gentlemen to this place.

Mr. Chipman said that he was looking over this new country and fully expected his company to be found in this field in due course of time. Mr. Hamilton was here last summer, and is financially interested in Cascade. Although a constant reader of the Record, he was surprised to note the growth of the place. He will return here in a short time.

Another prominent party, consisting of Senator Geo. A. Cox, president of the Canadian Bank of Commerce; A. Cox, his brother; Robert Jaffray, president of the Globe Publishing Co., Toronto; Major H. H. Pellatt, financial man, of Toronto, will be here in a few days, coming in the other way, from Penticton.

Recuperating in Spokane.

Alex. McArthur, of the firm of Porter Bros. & McArthur, bridge contractors, who was hurt some days ago at the end of the track, came down from near Gladstone last Sunday, and proceeded to Spokane, where his family resides, to recuperate. The injuries are not as serious as at first reported, and he hopes to be back at his post in a few days.

Ira Black and Mrs. Black made a trip to Greenwood this week.

The new custom house, with its fresh coat of paint and Irish trimmings, looks as pretty as a young woman in an Easter bonnet.

Oscar Stenstrom and Peter Nelson have returned from a trip west, as far as Penticton and Hope. They traveled by stage, steamer, rail and horseback.

THEY ARE A FAST CREW

Built a Bridge and Engine Crossed It in a Few Hours.

WERE AT BAKER CREEK THIS A. M.

Record Man Witnessed Some Quick Work By the Bridge and Track Gangs at English Point.

Yesterday a Record representative took a trip to English Point, to see exactly how far the track had been laid. Going up the several hundred feet almost perpendicularly to the grade, he witnessed a specimen of the speed being used in bridge building and track laying. The rails had been laid to the verge of a bridge in sight of the Lake View hotel, at English Point. The bridge must be 135 feet long and 35 feet high at the highest point. Thursday night not a stick of timber was on the ground, and it all had to come from the framing yards at the summit, perhaps 20 miles away. By noon yesterday, the bridge was on end, the stringers in place and all ready for the ties and rails. At 4 p. m. the bridge was crossed by the engine and was pushing the tracklaying machine to the Baker creek bridge, a quarter of a mile below.

When the difficulties are appreciated, the necessity of hauling timber, ties and rails from far up the road, and some from West Robson, the celerity with which the work is being done may be appreciated, even by the layman.

Among the Miners

The publisher of the Record visited the Victoria group this week, located on Christina lake, about which property so much favorable comment has been heard this spring and summer. He found D. C. Beach, one of the owners, on hand, and of course as enthusiastic as ever over the outlook. The ledge on the Victoria is indeed remarkable. It has been uncovered for a couple of hundred feet in length and has been found to be 30 feet wide at least. Assays have never been less than $7.50, and run up to $40. The ore is copper-gold and is identical with that found in the best Rossland mines. About a hundred feet below the old work, a tunnel has been started.

This is the property that Frank E. Starkey, of Spokane, lately bought a controlling interest in. Mr. Starkey arrived in Cascade last night and proceeded to the mine this morning. A stock company is in process of formation, and a large amount of stock has already been spoken for. Every miner and prospector in the country firmly believes that the Victoria will prove to be a great mine.

J. W. Spaulding, manager of the work on the Cannonball group, another Christina lake bonanza, was in town this week. He has a double shift at work there, and has already sunk a shaft on the lead over 20 feet. This is the property lately taken up by R. Dalby Morkill, Jr., of Rossland, secretary of the British American Corporation. The claims have been surveyed and a crown grant is being applied for.

Some splendid ore has been brought to town from the Iron Mountain claim, near Englgh Point. D. C. Beach, the owner, says he has a mountain of good ore, and that his assessment work, now going on, is proving as favorable as expected.

Wm. Forrest and A. Cameron came down from Gladstone and the John Bull group yesterday. The contract has been completed, and another one for 100 feet of tunnel to the Meikleson Bros. has been let. The tunnel is now in 70 feet, and in a short time it is expected that the ledge will be reached.

Ten men are now working on the Mystery in the Burnt Basin, most of them in the No. 2 tunnel, which is improving constantly.

On the Mother Lode, in the Burnt Basin, seven men are employed in the shaft. The ore encountered continues to be of an exceedingly rich character. Mike Shick stated that on the Base Ore, one of the Mother Lode group, the 1,000 feet of ledge already stripped can be made to furnish thousands of tons of good shipping ore.

Messrs. Cameron and Montgomery are working on the Canyon Creek claim, close to Gladstone, and have pounded gold from all across the ledge. It is said, however, like most of the claims thereabouts, that it is turning to base ore.

H. F. Libby, who has been prospecting the Pride of Cascade claim, on Granville mountain, near Gladstone, reports that he has discovered the Cascade ledge, which extends through it. On the Pride of Cascade an open cut has shown up a five-foot ledge for a distance of 25 feet, being a fine quartz, carrying gold and silver.

The New Bonanza, on Granville mountain, is being worked by Stephen Brailo, and the Granville by E. W. Liljegram.

MINING RECORDS.

From the Books of the Grand Forks Mining Division.

TRANSFERS.

July 10—½ Golden Crown, C. H. Thomas to H. A. Denton.

July 14--1-6 Jenny May, Number 3, Princess, E. Spraggett to G. R. Naden, $232.80; Jenny May, Princess, agreement to sell for $25,000, $30,000 or $40,000.

LOCATIONS.

July 5--Alhambra, G. A. Cameron, G. L. Curtis, Gladstone mountain, on Canyon creek; Red Spruce, Joseph Kerr and James McMunn, head of Canyon creek; Golden Eagle, same location and names, re-location of Lookout; White Cloud, Joseph Kerr, Gladstone mountain; Chance Lode, A. J. Stewart, on Texas creek, 3 miles from Christina lake: Edna B., J. A. Barron, south side Moody creek.

July 7—Lucknow, Evelina Currie, on Gladstone mountain, re-location of Lucknow; Rena, D. C. Beach, east side Christina lake, adjoining Copper Wonder; Lonoon, D. C. Beach, same location.

July 10--Treasury Fraction, A. K. Stewart, Josh creek, Burnt Basin; Mountain View, Ed. Broker, north side McRae creek.

July 14--Ellesland, G. Cameron and G. T. Curtis, on Canyon creek; Lochaber, G. A. Cameron and G. T. Curtis, Spalding creek.

July 18—Ruby, Mrs. Pete Munroe, north west slope St. Thomas mountain, adjoining Bradlaw; Katie May, Mrs. Pete Munroe, west slope of McRae creek, Burnt Basin; St. Thomas, James Dickson, west slope St. Thomas mountain, adjoining Ruby on south east..

Late Metal Quotations

New York, July 19.—Bar silver, 60½c.
Mexican dollars, 48c.
Lake copper—18.50.
Lead—4.40@4.50.
The firm that fixes the selling price for miners and smelters quotes lead $4.35 at the close.

About 30,000 feet of dry lumber have been recently sold from the Redfield & Wilson stock at Christina lake, by agent Simpson.

Rev. J. McCoy goes to Rossland Monday, to attend the first meeting of the newly organized Kootenay presbytery, recently set off from the old Kamaloops presbytery.

IN AND AROUND CASCADE.

Landlord Dorsey, of the Hotel Gladstone, was in town Monday.

T. E. Mahaffy is selling linen coats, and light weight hats, for this hot weather, at reasonable prices.

Pedagogue D. J. Matheson has started on a trip west on his wheel, and may go as far as Lake Okanagan.

Rev. J. D. Wallace, of Grand Forks, and Rev. Jos. McCoy, of Cascade, exchanged pulpits last Sunday.

Those trying it say that the water of either Kettle river or Christina lake is very comfortable to bathe in now.

T. F. Carden, the assayer, has returned from Nelson, Wash., where he examined some properties for Dr. Dutton.

Messrs. Woodruff and Handy have leased the O. K. Livery Stable from C. H. May, and are now successfully rustling for business.

Two shifts of nine hours each, are now working on the railway bridge work. Every minute of daylight is utilized in crowding it as fast as possible.

Frank Hutchinson has been down from the Chamberlain group, on McRae creek, bringing some fine specimens of sylvanite rock, of which there is an eigh inch vein.

Ira Black returned from Republic, and Greenwood, Sunday night, where he accompanied F. W. Peters, of the C. P. R., who was looking for routing orders for mining machinery.

A. D. Lloyd has located the Smuggler claim on Huckleberry mountain, and is now doing assessment work. It is distant about five miles from Cascade and has a fine copper showing.

Col. Ridpath, of Spokane, formerly president of the old International Flyer stage line, and one of the fortunate stockholders in the Le Roi, who sold out to the B. A. C., spent Wednesday on Christina lake, in an effort to coax the finny tride from the depths.

Geo. McL. Brown, of Vancouver, executive agent, F. W. Peters, of Nelson, traffic agent, and E. J. Coyle, of Vancouver, passenger agent of the C. P. R., were in Columbia last Sunday, holding a general pow-wow with Boundary business men.

Saturday smelter men did congregate in Cascade. In addition to D. W. Moore, of the Trail smelter, there were S. H. C. Miner, president of the Granby smelter, J. P. Graves, of Spokane, A. L. White, of Montreal, and Mr. Carroll, of New York, all of whom are interested in the Granby concern. Mrs. Miner, Miss Miner and Mrs. Graves were also in the party.

Columbia's Pride Burned Down.

Sunday night the new Hotel Columbia, at Columbia, burned to the ground, there being a total loss. It had just been completely refurnished by the townsite company, and Messrs. Morgan and Escalet had only opened up Saturday night. It is a severe blow to Columbia, although there is said to have been several thousand dollars insurance on the structure. No one seems to be able to account for the origin of the fire, and some think it was arson. Messrs. Morgan and Escalet were burned out a few weeks ago at the Clarendon at Greenwood.

Kettle River Scared Them.

The little party of three from Cascade, consisting of A. M. Button, Will Button and Ira Isham, who started down Kettle river last week in a boat, intending to go to its mouth, gave it up at Rock Cut, some 10 miles below Cascade. They were satisfied by that time of the dangerous nature of their undertaking, and boarded a freighter at that point. They then concluded that dry land navigation would get them to their destination, Chewelah, safer and quicker, which it did.

Narrowly Escaped Drowning.

Last Sunday T. F. Gaine, J. H. Good, Jack Robinson and George Sharp, went to English Point to enjoy the bathing. Mr. Gaine could not swim and narrowly escaped going to Davy Jones' locker—the bottom of the lake. As it was, Mr. Good, who saw him going down for the second time, came to his assistance in the nick of time, and rescued the drowning man. It was an experience that neither of the party care to go through again.

Forest Fires Started.

Messrs. Hildebrandt and Woodard came down from above Gladstone Tuesday, and report that a fire was started just above the town, which spread up the valley, and destroyed much valuable timber and threatened the 16,000 fence posts they had just gotten out. There is a strict law against setting forest fires, which should be enforced in this dry weather.

B. C. Assay & Chemical Supply Co.

The above named firm has taken over the business formerly conducted by MacFarlane & Co., Vancouver, and as the company is much enlarged is undoubtedly prepared to compete in every way for the connection covered by the class of goods sold. Their card will be found in another column of the Record.

CHOSE DELEGATES TO ROSSLAND.

Cascade Will be Represented at the Board of Trade Meeting.

Thursday evening the Cascade Taxpayers' Association met for the purpose of selecting delegates to attend the gathering of representatives of boards of trade of Kootenay and Yale, to be held in Rossland, Thursday, August 3rd. The delegates chosen were S. Mayall and V. Monnier, with G. K. Stocker and W. B. Willcox, as alternates.

A discussion was had as to the subjects that should be brought up in which this section was interested, and a committee was finally appointed to draft suitable resolutions along this line.

Much interest is being taken in the gathering, and the sessions will doubtless be productive of great good to the district in general. Special rates have been granted on the railways.

Another 1500-Foot Side-Track.

It has become evident to the C. P. R. officials that one 1500-foot sidetrack will not be sufficient to handle the traffic at Cascade when the new branch of the Columbia & Western is built this far. Accordingly, orders were issued to put in another of equal length

J. A. Sandgren, who did several miles of railway grading in this vicinity, will have charge of this work, and has already moved his outfit from Grand Forks and established camp here. As the point where the new sidetrack is to go in is considerable of a cut, close to the depot site, the contractor will probably require the services of 35 or 40 men for seven or eight weeks. He will begin work at once.

IN AND AROUND CASCADE.

Francis & Milne received some choice fruits by express this morning.

Disciples of Isaac Walton are having pretty good luck this week, mostly from above the dam.

The Nelson & Vernon Telephone Co., this week, placed 'phones in the office of P. Burns & Co. and Mann, Foley Bros. & Larson.

Mrs. Peter Larson and Miss Larson, wife and daughter of the well known contractor, arrived in town this week, on a visit to Mrs. Stewart.

W. Fleet Robinson, provincial mineralogist, has been in the Boundary, arranging for an ore exhibit to be sent to the Paris exposition.

Brooklyn has but one hotel left—the International. Mr. Dahl, of the Central, wants to move his hotel to the tunnel, four miles from Brooklyn.

Contractor Ferguson has begun work on T. F. Carden's residence, and is pushing it to be in readiness on the arrival of Mr. Carden's family from England.

When needing anything in the jewelry or optical line, remember A. D. Morrison, at Columbia. He is a graduate optician, and thoroughly understands his business.

WILL JOIN ISSUES.

The idea of holding a joint meeting of representatives of the boards of trade from cities and towns in Kootenay and Yale was a happy one, and should be productive of good to southern British Columbia. The meeting will take place in Rossland, August 3rd, and delegates have been elected from the various boards of trade interested.

Already a number of subjects for discussion have been proposed, among them the following:

More liberal appropriations for wagon roads and trails.

Encouragement of the silver-lead industry by the imposition of increased duties upon lead products imported into Canada.

Direct representation in the Federal parliament of the Boundary and Kootenay countries.

Additional educational facilities generally.

Necessity of a complete set of government officers for the Boundary district, and of having regular sittings of the Supreme court here.

Better postal facilities.

The Greenwood board objects to discussion of the eight-hour law, but Nelson delegates are authorized, if they see fit, to bring the subject up. The Rossland board wants a land registery office for the Kootenays and Southern Yale "established at a central point in West Kootenay district." This latter suggestion will most certainly not meet with the approval of the Boundary delegates.

This list comprises subject matter enough to occupy the time of a long session. It is believed that on some of these points the delegates will agree and will send such a joint memorial as will carry weight when received by Federal and provincial officials. This part of the Dominion is of too much importance to be longer slighted as it has been in the past, both at Victoria and Ottawa.

A coalition government is talked of as a successor of the present ministry. A caucus of government supporters is to be held next Wednesday to find out what is what. And in the meantime Fighting Joe has gone south to recuperate and prepare for the fray. He'll probably bring back a boomshell with him, and if it kills him politically, others will be in the bouillon also.

NOTE AND COMMENT.

Old Sol has been making up for lost time for the last few days.

At the rate at which the present government is repairing roads and trails in this section, the millennium will have arrived before the work is completed.

One more has been added to the constantly increasing list of American trusts. It is called the United American Glue Co., and starts with the modest capital of $35,000,000. It is expected that the promoters will make it stick.

The Nelson Miner says the Slocan has gone to the dogs since the eight-hour law took effect. But the Tribune, of the same live town, asserts that 5,000 men are now employed in the mines and smelters of Kootenay and Yale districts—more than ever before.

A small debts court was asked for in Coscade months ago, and was promised, but the government is probably too busy with troubles of its own to think of little things like that. However, there's another appeal to the people coming fast.

If Hewitt Bostock, our member in the Dominion parliament, wishes to secure the friendship of the people in these parts, here is a pointer. Let him go to the postmaster general and insist that that official pay some little attention to the numerous complaints of indescribably poor mail service in Yale and Kootenay. Seemingly, no other way can relief be had.

Even the calamity howlers should be pleased at the late flotation of a loan of the province of British Columbia in London for $1,700,000, at a fraction over 96. This is more than one per cent higher than the best price obtained for any previous loan. The credit of this province is gilt-edged in the world's greatest money markets.

The Royal Meteorological Society, of London, is trying to devise a more accurate system of measuring the velocity of wind. It will be a difficult job to perfect an anemometer that could measure the wind that comes from some newspaper offices. But possibly they go on the principle that "he who tooteth not his own horn, the same shall not be tooted."

Dividends in Pacific Northwest mining stocks are being declared with pleasing frequency now-a-days. The War Eagle is doing business at the old stand along these lines, and the Republic, Deer Trail and Cariboo are also heard from regularly. The LeRoi is again making big shipments, and one or two Nelson properties are paying regularly. Not so much is heard of the Slocan dividends since the eight-hour law went into effect.

STARTED THE CHURCH BUILDING.

Cascade's New Structure is Now in Course of Construction.

Last Tuesday work was begun upon the foundations of the new Presbyterian church building in Cascade, and the structure is now framed. When completed the estimated cost of the building is $850, of which amount a loan of $400 is to be obtained from the Church and Manse Building Fund. The balance, of which considerable has already been raised through the efforts of the pastor, Rev. J. McCoy, will be paid by those interested in seeing a permanent church building erected in Cascade.

Wednesday evening a meeting of the congregation was held and the following trustees selected: W. B. Willcox, D. McLeod, D. D. Ferguson, the latter also being secretary. A building committee, consisting of the following was chosen: A. Bremner, R. McRae, Geo. K. Stocker, D. J. Matheson, D. D. Ferguson and W. B. Willcox

WON IN TWO SUITS.

Got Judgment Against Hopkins & Poole and A. H. Thompson.

Last winter the B. C. M. & M. Syndicate, Ltd., attached the freighting outfit of Hoskins & Poole for a merchandise account of $600. By mortgaging the outfit the defendants raised the amount and paid it into court. This week Judge Spinks in the county court gave judgment for the full amount and costs, about $700, to the plaintiff. This is the outfit against which another mortgage turned up recently, and was followed from Greenwood down into the Palouse country in Washington. Hoskins & Poole were formerly sub-contractors on the railway work.

The B. C. Store also obtained judgment against A. H. Thompson, in the county court for $140 and costs.

BY THE WAYSIDE

Although $15,000 was appropriated this year by the government for roads and trails in Rossland riding, scarcely any of it has yet been expended. Gold Commissioner Kirkup and Jos. M. Martin. M. P. P., are neither of them pleased at the delays of the officials at Victoria in this matter, as both realize that, to get any benefit this season from the proposed improvements, work must be started at once. The reason given for delay is that the government engineer, Mr. Gamble, must pass upon the proposed work to be done, and he has not yet got around to this riding. In the road and trail list, $300 is to be spent on the wagon road between Cascade and English Point. A trail three or four miles up Baker creek, giving ingress to scores of good claims, is also badly needed.

The provincial secretary kindly suggested that Mr. Kirkup make a trip over the proposed roads and trails in this part of the riding, but this is not practicable for him, and he kindly refers it to Mr. Lambley, gold commissioner, at Fairview. So there we are, just where we started. If ever any section of the province was an orphan, this Boundary district fills the bill to the letter. The Victoria officials should get their heads together; perhaps they could make a wooden pavement then.

Remarkable as it may seem, the Columbia Stage Co. has been delivering the mail with unusual regularity this week. This is certainly an unusual thing and the Record takes pleasure in calling the attention of its constantly widening circle of readers to the fact.

LATER (Saturday)—We take it all back. An important mail sack was not delivered last night.

Extreme heat has prevailed of late, ordinary thermometers climbing upon the roof and their owners to the cellar for relief. It is a source of some satisfaction, however, to know that this is the coolest town in the Boundary country, if travelers are to be believed. In this connection the following, which occurred in a large city, will be appreciated:

A passenger who had observed to the street-car conductor that it was ———hot, suddenly turned and discovered a lady within hearing. "I beg your pardon, madam," he said contritely. "Oh, you needn't, sir," responded madam, fanning herself vigorously; "it is very much warmer than that."

Newspapers, like men and other things, come and go, and of course changes take place. Last week the Midway Advance was sold by W. H. Norris to John Withall, of Montreal, who has extensive holdings in Midway. The Greenwood Miner has also changed hands, having been purchased by R. E Gosnell, late provincial librarian, Mr. Gosnell is a newspaper man of wide experience, and it goes without saying that he will make the Miner bright, newsy and readable. Greenwood is to be congratulated on having two such excellent papers as the Miner and Times.

PASSING THRONG

Prof. Henry Montgomery, of Trinity University, Toronto, was in Cascade Tuesday, on his way to Camp McKinney. He was here three or four months ago, and promised to return and look at some Christina lake properties, which attracted his attention. This he says he expects to do on his way out. Prof. Montgomery is president of the Minnehaha Gold Mining Co. Ltd., which owns one of the best McKinney properties. The management is about to install a 10-stamp mill, and Mr. Montgomery's visit is for the purpose of being present at that time.

—

Prof. Montgomery stands high in the geological and mineral world, and has held some of the best positions in American as well as Canadian institutes. He is conservative to a degree, and yet knows a good thing when he sees it. The work on the Minnehaha, managed by Major Megaw, has been carried on under his advice, and the stockholders are more than satisfied with the outlook. He is also interested in the Sailor in the same camp. It is well for a mining section to have such men interested in it.

—

W. J. Walker, general organizer for Western Labor Union, with headquarters at Butte, was in Cascade Thursday. He had been visiting Republic, where the Miners' Union has 350 members, and also took preliminary steps to organize a union at Greenwood. Mr. Walker has been in this business now for nearly ten years, but says he is getting tired of it, and will soon let others carry on his work. He is bitterly opposed to the Spokesman-Review, claiming it to be owned by the Rockefeller interests, and that it positively refused to publish the laborer's side of the Coeur d'Alene mining troubles.

Big Bridge All on End.

The long railway bridge just east of town is now all on end, and is waiting for the track-layers. This week the false work of the two 150-foot spans was completed by the 18 men at work under Foreman Archie Smith. Next week the force will tackle the 120-foot span over the deep canyon, just west of town, below the Cascade Water Power Co.'s dam.

TRACK IS AT CHRISTINA

Steel Gang Now in Sight of Our Pretty Lake.

BUT THREE MORE BRIDGES TO BUILD

Is Sure to Be in Cascade the First Week in August---Another Long Side Track for the Cascade Yards.

Within a few days after the publication of this issue of the Record, a resident of Cascade, from the hill back of town, with a field glass, will be able to see the tracklaying gang gradually working down the long Christina lake grade. At least, that is what Supt. Jack Stewart says, and if any man knows better the exact condition of the work, he is yet to be discovered.

Although somewhat under the weather, Mr. Stewart made a trip to the end of the track this week, to look over the work of the steel gang. They had reached a point close to where the grade bends around the hill at English Point, and by this time should be within sight from the lake.

From where the tracklayers are now there are but three bridges yet untouched by the bridge builders. Two of these are but small affairs, but the other will require three or four days to construct after the track reaches it. Of course, the top must must be put on the Baker and Sutherland creek bridges, as well as on that over Kettle river, just east of town.

The false work for the two 150 foot-spans for this latter 1,600-foot structure has been going up rapidly for the last two weeks, and will be ready in good time for the tracklaying engine.

Five Gangs at Work.

Five separate gangs of men are now at work, in connection with the track-laying. The first of these, about 75 in number, is working ahead of the track, between Gladstone and Cascade, and is clearing away the small slides or filling the cave-ins that may have occurred since the grading was completed last winter. Then comes the bridge carpenters, just ahead of the steel. This force varies in number, according to the size of the bridge. but the men are working in double shifts, from daylight till dark, and no grass grows under their feet.

Close upon the bridge men—right at their heels, in fact—is the long looked-for steel gang, comprising some 60 hands. With the assistance of the track-laying machine they handle and put down both ties and rails, and are a most lively set of workers. Quickly following this force is the first surfacing gang, including something like 120 men, all told. A few miles behind them come another surfacing force of 90 or 100 men, whose business it is to put on the finishing touches.

Mr. Stewart says that, for a new railway, the road, as far as completed, is in first class condition; and F. W. Peters, the Nelson freight agent of the C. P. R., who went over it last week, corroborates it. Inspector Murray, of the C. P. R., also examined it last week, and bore the same pleasing testimony as to the thoroughness of the work thus far done by the contractors.

Cascade's New Depot.

The contractors have orders to put in an additional—making two—1,500-foot sidetrack in the Cascade yards, in order to handle the big traffic expected at this point. It has been staked out, and the grading will be under way next week.

The plans and specifications of the Cascade depot have been returned from Montreal to Chief Engineen Tye, and a contract has been let for the construction, on which it is expected work will shortly be started. The plans call for the usual conveniences needed in such a depot, and it will be large enough for the immediate requirements of the traffic.

At present, Mann, Foley Bros. & Larson have five locomotives in use on the road, and in a few days will put on another. One of these is a powerful machine with eight drivers, and is used for taking cars over the four per cent grade of the switchback, with its 12 legs. It easily handles five loaded cars at once. Since the tracklaying began, the road is so thoroughly constructed, that little or none of the trouble usually experienced on new railways, has been encountered.

Mr. Stewart now estimates that that the track will reach Cascade on or before August 4th.

Notice of Assignment.

Notice is hereby given that Thomas F. Gaine and M. H. Roy, both of Cascade City, in the province of British Columbia, doing business as wholesale liquor merchants and gent's furnishers, at Cascade City, aforesaid, in the premises known as the "Yukon Store," under the name, style and firm of Gaine & Roy, have by deed bearing date the 15th day of July, A. D., 1899, assigne all their personal estate, credits and effects which may be sold under execution, and all their real estate to the undersigned, James H. Good, of Cascade City aforesaid, Broker, in trust for the general benefit of their creditors.

The said deed was executed by the assignors and assignee on the 15th day of July, A. D., 1899.

All persons, firms, and corporations having claims against the said Gaine & Roy are required to forward to the said assignee full particulars of their claims, duly verified, and the nature of the securities, if any, held by them, on or before the 21st day of August, A. D., 1899.

And notice is hereby given that after the said 21st day of August, A. D., 1899, the assignee will proceed to distribute the assets of the estate among the parties entitled thereto, having regard only to the claims of which the assignee shall then have had notice; and that the said assignee will not be responsible for the assets, or any part thereof, so distributed to any person or persons, firm or corporation of whose debt or claim he shall not then have had notice.

A meeting of the creditors and the said assignors will be held on Friday the fourth (4th) day of August, A. D., 1899, at the hour of 2 o'clock in the afternoon in the said Yukon Store premises at Cascade City in the province of British Columbia.

Dated the 17th day of July, A. D., 1899.

WERE THREE OF A KIND

And the Trio Had Interesting Experiences With Bruin.

TOLD BY A VERACIOUS CHRONICLER

Only One Nimrod Got His Bear, and He Was Sorry He Had Been Successful---Pat Burns Unknowingly Contributed.

Now in this city there dwell many mighty hunters, and Nimrod A. went out into the mountain, yclept Huckleberry and there beheld a great beast, and it waxed exceedingly wroth and did utter many sounds which do not bear repeating; and A. marveled greatly thereat, and, shouldering his gun, did pull the trigger thereof, and he did it yet again. Time being of object he repeated the dose, whereat the noisome beast stood not upon the order of his going, but now straightway went at once. Whereat the hunter girt up his loins, likewise his lower jaw, and delivered himself of many strange oaths and did moreover apostrophise the parentage of both bear and gun right soundly.

Yet once again went he up into that mountain, and his olfactory organ did lead him to a spot whereon lay a great beast, with a carcus like unto that of a prize ox, and swelled abominably, and which, having been dead many days, did stink right vigorously, yea like unto a mephitic cess-pool was its stench, and it did have weevils and maggots and blowflies and creeping things innumerable within and without.

And straightway did the hunter apologise to his gun and take it all back, and the place thereof knew him no more, and of the bear all he did get was the smell thereof.

And Nimrod B. also went out into the hills and whilst yet a great way off did he espy a bear, on a cliff side, and forthwith drew a bead on him and the bear did seem to toboggan to destruction. Whereat the hunter smole and fell straightway to feeding on sardine sandwiches, saying unto himself, "Lo! here can I wait, for if he moveth not he is dead, likewise if he moveth he soon will be," or words to that effect. Wherein the hunter fooled himself greatly for the bear was a beast of much cunning, and did steal noiselessly away leaving not even a smell for the hunter. And on the morrow did he return with two borrowed dogs, and straightway did they show him which way the great black beast had made tracks. Whereat he likewise swore vigorously.

And then it came on to rain, and it rained like unto a second deluge, yea most grievously did it rain until it had soaked that hunter even unto his marrrow bones, and he shivered piteously and likewise he gat what he had sought not—a mighty bad cold.

So also did his borrowed pups, which came suddenly upon a fretful porcupine, and straightway, without thought, waded they into him, and he was a stranger and took them in and did fill their mouths and chests and paws and all else besides with quills, yea hundreds of quills did he fill them with; and one of the dogs being erstwile black did come out of the fray with a snow white beard composed of ninety and nine stiff white bristles in either lip, whereat he 'owled 'orribly and yet again did he howl more horribly when he did have those whiskers drawn—all same dentists "teeth extraction by painless process."

And Nimrod C. also went out hunting on the hills and he likewise did find a bear and fired thereat and it was almost night time and he was sore afraid to get close so returned he home, and next day early did he seek his prey, but found him not. Yea, all he found was his loss of great gouts of blood. Nay, not quite so, for it came to pass on his way back that he did find an illustration of ye saying that "God tempers the wind to the shorn hunter." For it so happened that a king in those parts, whose name was Pat Burns, had sent a messenger into a far land to levy a tribute of sheep and had done so, one hundred and eighty and seven had been levied, and returning by way of Bossburg, eighty-one of these sheep did engage in a 4th of July celebration, and did partake of an intoxicating weed and did straightway die, and of the hundred and six that yet remained, one was wise in his generation and liking not the pen, or the prospect, did flee into the mountains. Now Nimrod C. having promised the sojourners in his tent much meat, did chance upon this sheep and straightway fell to capering, for now saw he, how he and his house had been preserved from starvation—yea, also at a sheep rate. So he shot the sheep, with one blow did he slay it, and did remove its hide and stomach, and did pack the carcase home and with his comrades did wax fat upon the flesh thereof, and to Pat Burns spake they not one word.

ALL OVER THE PROVINCE

Revelstoke is about to try a Sunday closing law.

Kamloops City debentures were sold last week at par.

Towns on the Crow's Nest line now enjoy a daily mail service.

The sockeye salmon fishing season has had a good start on the coast.

The lead on the Base Ore, in the Burnt Basin, has been stripped for 1,000 feet.

Copper City is a new townsite, located at the upper end of Lake Windermere.

Nelson is to have gas works, and a company has a similar end in view at Rossland.

John Jackson, Jr., has been appointed United States consular agent at Rossland.

The contract for the new land registery office in Nelson has been let for about $10,000.

Much attention is being paid by capitalists to the Windermere mining district in East Kootenay.

Rich gold bearing sand has been discovered at Wreck bay on Vancouver Island, and is creating considerable excitement.

The Ymir waterworks are now in full swing and the water is being laid into the business and private houses at a reasonable cost.

Over 1,200 men were in line at Rossland, Monday, in the parade, celebrating the fourth anniversary of the organization of the miners' union.

The National Press Association, which recently met at Portland, Oregon, visited Vancouver and Victoria, and returned east over the C. P. R.

The output of the Rossland mines for the first six months of the present year aggregate 64.929 tons, as against 38,877 for the corresponding period of last year.

Tenders for the North Star branch of the Crow's Nest line were opened at Cranbrook, but the contract has not been awarded. The company may do the work itself.

The Rossland Water and Light Co. has sold its plant and franchises to the West Kootenay Light and Power Co. for $80,000, and the latter has sold the water system to the city for $40,000.

Seven hotels are running at Duncan City, in the Lardo, and three more are building. Both the C. P. R. and the K. & S. are doing force work on their railway grades, and can, therefore, stop at any time.
