VOL. I.

CASCADE, B. C., AUGUST 26, 1899.

No. 42.

WILL START WORK SOON

Cascade Water, Power and Light Co. Asking for Tenders.

TO CLEAR POLE LINE RIGHT OF WAY

Operations on the Dam, Power House, Flume and Pole Line Soon Under Way—Residence for Supt. Anderson.

Word has been received by Superintendent Wm. Anderson, of the Cascade Water Power Co., by cable from the head office in London, to let a contract at once for the clearing of the right of way for the pole line from Phoenix towards Cascade. Accordingly, an advertisement appears in this issue of the Record, calling for tenders to clear the five miles of timber, the rest of the line being mostly open country.

Mr. Anderson states that he expects orders daily to begin work, not only on the partly constructed dam, but on the power house itself, the long flume and the pole line. The latter at first will be about 25 miles long, and will cost \$3,000 per mile. In addition to this Mr. Anderson is now preparing plans for a residence for himself, to be located on the company's property, which will be built at once. All this work is to be undertaken at an early date, will require the expenditure of several hundred thousand dollars, and will give employment to many men. Foreman Simmons, who has been spending his vacation in Ontario, has been wired for, and the company evidently intends to crowd the construction as fast as possible.

IN AND AROUND CASCADE.

J. W. Astley, one of the largest owners of the Snowshoe mine, in Greenwood camp, was in town Tuesday.

The Columbia Stage Co. has discontinued the daylight stage between Cascade and the Forks. As a result our livery men at once began to do a better business.

Work on the new Presbyterian church has been delayed by the non-arrival of the hand-shaved cedar shingles from the lake, which are expected now almost any day.

The Vancouver and Victoria boards of trade are advocating the construction of a road from Hope to Princeton to facilitate transportation into the Similkameen country.

Geo. P. Tunstall, the Hamilton powder man, was in town yesterday. His company has supplied 100 cars of powder, or 40,000 boxes, or 2,000,000 pounds, for use on this railway contract.

Road Superintendent Forrest and his gang of men have been working on the wagon road between here and Grand Forks this week, and while the force is small, a decided improvement is apparent.

Wm. Wolverton has been in Phoenix this week, where he will shortly start a branch.

It is stated that an investigation of the way that stage companies handle the mail sacks in the Boundary creek district has been commenced by Hewitt Bostock, M. P.—Nelson Tribune.

Cascade's new school building is to be 27x33 feet in size inside, besides cloak rooms, etc. Accommodations will be provided for 56 pupils. Contractor Ferguson expects to begin work on it next week.

H. Johns, superintendent of the Sunset mine, in Deadwood camp, was in Cascade yesterday, on his return from a two week's trip to Rossland and Spokane. He was accompanied by Mrs. Johns. While away he forwarded the plans to the manufacturers for the 20-drill compressor, etc., soon to be installed at the Sunset.

Henderson Was Endorsed.

Alexander Henderson, the newly appointed attorney-general of the province, from New Westminster, was returned by acclamation last Tuesday, there being no opposing nominations. It is now claimed by the opposition that the government cannot stand, having only 16 sure votes in the legislature, out of 28.

IS CHARGED WITH ARSON

Robert Cameron Arrested and Lodged in Jail.

FOR BURNING THE HOTEL COLUMBIA

Promised Sensation in Connection With Fire of July 17th May Materialize Soon—Remanded to Kamloops.

Constable Dinsmore, of Grand Forks, came down Thursday, and with Constable Darragh went to Russell, just across the international boundary line, to meet the incoming Bossburg stage. They got aboard and on this side of the line took into custody a man named Robert Cameron, who was taken to the Forks that night and lodged in jail.

The prisoner is charged with setting fire to the Hotel Columbia on July 17th. Travellers who came down from Grand Forks yesterday say it was whispered about that a large sum—some say \$20,000—was offered for the release of the prisoner. The police are still working on the case, and some sensational arrests are expected to be made shortly. The prisoner has been remanded to the Kamloops jail.

At the time of the fire it was hinted that a charge of arson might be brought against certain parties, and the case has been quietly worked upon. Cameron was found down below Spokane by a detective, and consented to return without extradition papers.

WILL CALL IT GRAND FORKS

But the Railway Station Will be in the City of Columbia.

THE THREATENED WAR IS AVERTED

Engineer Tye and Secretary Drinkwater of the C. P. R. Arranged the Matter Yesterday at Mayor Manley's Town.

Grand Forks is jubilant and happy. The railway station, which is located in Columbia was to be called Upper Grand Forks, the center of the siding being exactly 4,500 feet from the river and a mile and three quarters from the Yale hotel in the Forks. But yesterday, after considerable negotiating, it was decided to call the station Grand Forks—pure and simple. The story is interesting.

It seems that the railway people and the city authorities of the Forks clashed somewhat on the location of the right of way, which cut through the upper corner of the townsite and then swung around into Columbia, where the only station was to have been built for the use of both towns. This, of course, highly displeased the Columbia people at the time, but displeased the residents of Mayor Manley's town to a degree.

Got a Clack and Used It.

However, the Forkers had a trump card up their collective sleeve. While the railway company had bought outright the right of way in the small portion of the Grand Forks municipality traversed, and had the grading done, permission to cross the main travelled road or street, and change the grade, had not been secured.

It is also said to be the law, that only by an appeal to the Dominion government direct, in case of a refusal by a municipality to permit a railway to occupy a street, can the matter be adjusted. This meant much delay and red tape, but local courts have no jurisdiction in such matters.

The contractors had cut down the wagon road, near the bridge at Columbia, some two or three feet, to conform to their grade. Last week the city authorities of Grand Forks filled it in. This soon brought Chief Engineer Tye to the scene, and he was told that, if he would give Grand Forks a depot of its own across the river, they would be satisfied; otherwise, it was no go. Engineers at once began surveys to leave Grand Forks out entirely, although it would cost considerable, and entail some delay.

Both Sides Made Concessions.

Yesterday, however, Mr. Tye, accompanied by Chas. Drinkwater, secretary of the railway company, who happened to be in Rossland, came over on a special train, met the Grand Forks authorities, and arranged the above mentioned agreement. The station will re-

main in Columbia, but will be called by the name of the lower town. While Grand Forks does not get the station any nearer, it gets the name, a most valuable consideration. Just how the Columbia people will like this does not yet appear, but unless this arrangement is upset at Montreal, it will be carried out.

And thus the threatened war between Grand Forks and the C. P. R., the talk of injunction, the building around it entirely, and most important of all the delay that might ensue when the track is near there, has all been avoided. Grand Forks has, in a measure, gained its point, and so has the C. P. R. Columbia must make the best of it.

Mr. Tye and Mr. Drinkwater returned to Cascade last night and left at eight o'clock on a special train for Trail.

Eleven passengers came in on the train Thursday evening, arriving here at midnight.

Superintendent Stewart states that no time will be lost at Grand Forks, but that Greenwood should be reached by the end of September, allowing an average of a mile a day for putting down steel, including probable delays.

CROSSED OVER THE GORGE

Track-Layers Are Now About Half Way to Grand Forks.

TO REACH GREENWOOD BY OCTOBER 1

Now Pushing to the Forks, Which Should be Reached Within Two Weeks—Two Bridges Yet to Get Over.

Last Tuesday at 2:30—ten days after crossing the first bridge—the track-laying machine on the Columbia & Western, with George Roberts at the lever and Conductor Haney in charge of the train, crossed the second bridge over Kettle river, just west of town, and the track crew pushed out for Grand Forks, some 18 miles away. They were behind the estimated schedule published recently by the Record, but this was no fault of the bridge carpenters, as they worked early and late to get the 180-foot Howe truss span sufficiently completed to let the train over. That day the crew put down 48 stations or 4,800 feet, and have been crowding the work as fast as possible, as it is the intention to get to Greenwood and Midway at the earliest possible date.

Today the track-layers will finish the side track at Cascade, and will put in a switch at Gilpin's, so that the boarding cars can be moved nearer to the rail-head. Yesterday the surfacer's boarding cars were taken out to near Edwards ferry and put on a temporary spur.

LOCAL AND GENERAL.

A fall race meet is to be held at Vernon this year.

The contract for the new water works system at Vernon have been let for \$32,000.

The Republic Record has entered upon its third year of existence and is as breezy as ever.

Grand Forks is to have a new paper. The outfit is on the road from Montana.—Republic Pioneer.

The Okanagan Flour Mills Co., of Armstrong, has declared a dividend of 8 per cent on its paid up capital.

George K. Stocker made a trip to Gladstone early in the week, and looked over some of the mining bonanzas in that camp.

The recent rains have raised Kettle river so that it has been impossible to resume work on the big dam above the cascades.

Tenders are being called for the erection of a school house, 52x28 feet, two stories high at Columbia. It will be situated on Vancouver street.

Ore has been found in the Old Ironsides mine at a depth of 327 feet. A hoist has been installed capable of being worked to the 1000-foot level.

There is talk of a tramway being constructed between Phoenix and Greenwood, operated by power from Boundary falls, if that power is not otherwise used.

The Greenwood city council has agreed to increase the efficiency of the fire department, and has elected W. E. Henton as chief. A hose cart, hose and other things needful will be supplied.

James Wilkes, organizer of the Western Federation of Miners, was in the Boundary last week, for the purpose of organizing miners' unions. A meeting was held at Phoenix and also at Greenwood.

The Spokane Falls & Northern Telegraph Co., owned by D. C. Corbin, has supplies on the ground for a new telegraph line from Marcus to Cascade, Grand Forks and Greenwood, and expects to have the whole line in operation by October 15th.

J. W. Bengough, known throughout the dominion as a clever cartoonist, has been engaged to give one of his inimitable crayon-lectures at Cascade on Wednesday, November 8th. He will undoubtedly have a big audience, as his fame is world wide.

W. F. Anderson, traveling passenger agent for the C. P. R., was in town today, arranging details for passenger service to the Boundary country over the new road. Mr. Anderson says he thinks they will be carrying passengers not later than September 1.—Trail Creek News.

Ore Output for 1899.

An interesting table is just published by the Nelson Tribune to show that so far this year ore, to the approximate value of \$3,562,000 has been sent to the smelters. Last year West Kootenay produced ore of the market value of \$6,042,976. The present output is of the approximate value of \$150,000 a week, which if continued for the remainder of the year, would make the output for 1899 worth \$6,500,000. This is a fairly good record with all the big producers in the Slovan closed down.

Boundary Ores for Paris.

Harry Sheads, a well known assayer and mining man, has completed the task of preparing, on behalf of the Grand Forks Board of Trade, at the request of the provincial government, a collection of the ores of the Kettle river mining division for the Canadian mining exhibit at the Paris Exposition. Mr. Sheads was successful in securing a collection of splendid specimens, which will be truly representative of the Boundary.

Among the mines which contributed fine samples were the Royal Victoria, Pathfinder, Earthquake, Mammoth and Diamond Hitch, Lillie K., and Twins, Humming Bird, the B. C., R. Bell, Oro Denoro, Morrison, Winnipeg, Rathmullen, Gold Drop, Stemwinder, Brooklyn, Knob Hill, Old Ironsides, Brandon and Golden Crown, City of Paris and Lincoln.

The Record is opening up a constantly improving paystreak of Fine Job Printing. You are cordially invited to assay it.

Rumbles From the Rails.

Mann, Foley Bros. & Larson have discontinued their hospital in Cascade, owing to a scarcity of patients.

J. A. Sandgrin is moving his grading outfit to Ontario, where he expects to work it on the Rainy river railway.

Thursday night's train brought in a carload of horses from Calgary, imported by Al. Traunwiser, of Grand Forks.

Chief Engineer Tye and Assistant Chief Sullivan came down from the Forks Tuesday and took the train back to Trail

On the first of September only 1200 feet of the 3100-foot tunnel will be yet uncompleted. Everything is working smoothly under Olaf Olson.

Contractor Thompson, who was in Cascade last week, stated that the new railway depot here is to be 40x50 feet in size, part of it two stories in height.

Engine 403 was taken to the Trail shops on Tuesday for repairs, and No. 43, another 8-wheeler, was used in pushing the track-laying machine, this week.

The 56-pound steel, in place of 78-pound, begins just after the railway crosses Kettle river the second time, and will continue through the Kettle river valley.

Last night the track was down as far as Gilpin's ranch, or half way to Grand Forks, 82 stations having been laid yesterday, and by next Saturday the rails should be at least to the bridge at the Forks, the third crossing of the Kettle being made at McCool's on piles for the time being.

IN AND AROUND CASCADE.

Francis & Milne received some fine fruits and vegetables yesterday.

John Earl has bought out Mr. Lynch's interest in the Cascade sawmill plant.

T. H. Ingram, manager of the Cascade Produce Co., has opened up opposite the custom house.

A wagon road is badly needed from Gladstone to the Burnt Basin, so that ore shipments could begin.

Paymaster Woodman went from Midway to Robson this week, distributing monthly pay checks. He paid off here yesterday.

Dan Brown has finished the work just west of town, where he had charge of widening the railway grade, to make room for the water power company's flume.

Jay P. Graves, with his son Clyde, and the latter's tutor, Rev. Brian C. Roberts, were in Cascade Wednesday, on a return trip from a visit to the Old Ironsides and Knob Hill mines in Greenwood camp. Mr. Roberts and Clyde sail for Honolulu and a trip around the world on September 12th.

Notice to Contractors.

Tenders will be received by the undersigned till August 31st, for the clearing of about five miles of right of way for pole line, beginning at the town of Phoenix, near N.E. corner of Victoria claim, and running in a straight line through N.E. corner of Winnipeg claim, and continued on same line across 4th of July creek, till clear ground is reached on the east side of said creek. Line is staked out on ground. Lowest or any tender not necessarily accepted. For particulars apply to W. ANDERSON, Engineer in Charge. Cascade Water, Power & Light Co. Cascade City, B. C., August 19, 1899.

Tenders for Stock.

Sealed tenders addressed to the undersigned and marked "Tender," will be received at rate on dollar up to noon, Tuesday, 29th August, 1899, for the stock of Gaine & Roy, insolvents, amounting to about \$3,204.55 as follows:
Ready made clothing..... \$316 98
Shirts, drawers and small wares..... 495 95
Hats and caps..... 188 55
Boots, Shoes and rubbers..... 847 25
Cigars..... 602 96
Liquors..... 96 00
Furniture and fixtures..... 206 25
Tenders to state rate on dollar as per stock list which can be seen at my office, Cascade.
Cash or marked check for one hundred dollars must accompany each tender, which will be returned if tender is not accepted.
The highest or any tender will not necessarily be accepted.
Terms, cash when stock is checked.
G. A. EASTMAN, Trustee.
Cascade, B. C., 17 August, 1899.

A LAND OF MANY TOWNSITES.

To paraphrase a saying of Solomon, "Of the making of townsites, there is no end." Within a radius of perhaps thirty miles from Cascade, the intending investor can have his pick of lots in over a score of townsites—all as it were, destined to be future Rosslands or Johannsburgs.

Beginning on the east, there is Melville, on the Dewdney trail; Gladstone, near the Burnt Basin; English Point, where there is a settlement; Christina City, Minton and Moodyville, near the foot of Christina lake, (the last two in a semi-moribund state); then comes Cascade and Russell. Continuing west, the townsites grow in number. Grand Forks and Columbia, Volcanic City, Niagara, Eholt, Summit, Phoenix, Hartford, New York, Boundary City, Greenwood, Anaconda, Boundary Falls and Midway, follow in rapid succession. There are also Nelson and Carson, to say nothing of a few others.

In case this assortment does not offer variety enough, the searcher after bonanzas in reality will find a fresh crop of townsites springing up on the main Kettle and West Fork, as well as farther on towards Camp McKinney, Penticton and Hope. There seems to be little likelihood of there being a dearth of townsite propositions for some time to come, as in numerous cases not mentioned land has been staked out with this end in view.

The city of Grand Forks raised a great hue and cry last winter, which was heard even in the legislative halls at Ottawa, because as was alleged, that lively burg had been wantonly ignored and side-tracked by the C. P. R. in the survey for the new railway. There are two sides to every story, and this is no exception. Now, that the track-layers are within 15 miles of the town, it is said the city objects because the railway people have arranged to cross a corner of the municipality, and that the objection is in tangible form. To a man up a tree it appears as if the Forkers had changed their minds, and decided that they preferred to have no railway at all, and that they may be accommodated.

NOTE AND COMMENT.

Spokane's Industrial Exposition promises to excell all previous efforts in this line. The best part of it will be the mineral samples, a large share of which will come from British Columbia.

Wet weather in large solid chunks has been with us for some weeks. A brand new weather prophet would find a hearty welcome, if he could distribute the rains a little more evenly.

Another band of eastern Canadian newspaper men is doing Southern British Columbia this week, and it is safe to say they will return home with a better and broader idea of the best and richest province in the Dominion.

Germany is talking of erecting a monument in memory of the heroes who fell on both sides in the Franco-Prussian war. Verily the leavening effect of the deliberations of The Hague peace conference is beginning to be seen.

It is said that the eight-hour war, now quietly being waged in the Slocan, is causing many a bank roll to lose its wonted dimensions. It is interesting to note that Slocan mines have thus far paid dividends estimated at \$2,790,000.

"I believe the first shipment of ore to go from the Boundary country to the smelters over the new railway, will be shipped from Gladstone," said a prominent mining man the other day. There will undoubtedly be many shipments from that point.

The traveling public is wondering when the passenger service on the new railway line will begin. It is safe to say that it will be instituted at the earliest possible moment, as the C. P. R. is more desirous than all others to do business in the Boundary.

Uncle Sam is still full of troubles in the Phillipines. John Bull has a scrap in sight in South Africa, France is all torn up over the Dreyfus affair, and Joe Martin has succeeded in setting the politicians of British Columbia by the ears. Great aches from little toecorns grow.

Some persons assume to know a good deal nowadays, gleaned from so-called inside sources, in regard to the intentions of smelter builders in the Boundary country. All of which brings to mind the laconic but pithy remark of Mark Twain, that some folks know a lot of things that are not so.

Coast opposition papers continue more than confident that the government is doomed, notwithstanding the re-election of Attorney-General Henderson. It is figured out

that, with recent defections from government ranks, Premier Semlin will be in a slight minority when the legislature meets—if the lieutenant-governor does not call for a new election before that date.

Reports from properties in the Burnt Basin tell of continued improvement as development progresses. It is getting to be more and more of a certainty that this will be a permanent camp, from which we will hear of more than one dividend payer in due course. In fact, the mineral belt extending all along the east side of Christina lake is believed by competent judges to have many excellent properties.

The coming of Mr. Edgar P. Rathbone to Cascade, for the express purpose of examining the mining properties in camps contiguous to Cascade, with a view to interesting foreign capital for development purposes, should result most favorably. No one familiar with the country will doubt that our properties will stand the test, and it is equally certain that Mr. Rathbone is in touch with the leading financiers of London. This is a combination hard to beat, if the owners of promising claims are at all reasonable in the prices.

IN AND AROUND CASCADE.

Mrs. W. H. Donnelly left for her home at Port Huron, Mich., last Wednesday.

P. Burns & Co. have let a contract for a \$20,000 building in Nelson, to be completed by October 20.

John Holmder, a railway laborer, who died of pneumonia at the hospital, was buried last Saturday. But little is known of his connections.

The swamp, north of Hall's bridge, on the Bossburg road, is in a fearful condition, and is the bete noire of all teamsters during this rainy spell.

N. Robinson has sold his half interest in the International hotel building to August Reischl, who conducts the Queen restaurant at that location.

Some miscreant recently stole the shimmer heads from the planer in the Cascades sawmill. Mr. Earle can assign no reason for such an act of vandalism.

Miss Louise Cameron, the accommodating post office clerk, who is a professional nurse, has gone to Grand Forks, to help out in a typhoid fever case.

S. C. Chezum, of Cascade, B. C., accompanied by Mr. Denton, arrived in Keller a few days ago and will do some work on claims owned by them in Wilmot camp.—Keller Miner.

The Dakota "zephyr"—a terrible hailstorm—that destroyed several millions of bushels of fine wheat a few days ago, cut down some 1200 acres of grain on the farm of A. Chandler, president of the Cascade Development Co. The farm is located near Gardner, N. D., and the crop is unfortunately a total loss.

At the Cascade Drug Co.

You can get anything and everything you may need in the line of

DRUGS, MEDICINES, Stationery, Wall Paper, Paints, Etc.

BY THE WAYSIDE

In one way the Boundary will shortly have facilities equal to the best of any mining district. Already two well equipped telephone companies—the Nelson & Vernon, and the Columbia—are operating to all points. The C. P. R. Telegraph is now built into Cascade, and in another month will be into Grand Forks. D. C. Corbin says he will have a telegraph line operating into the Boundary by October 15th. In addition to these the Cascade Water, Power & Light Co. expects shortly to begin on its service lines for transmitting electrical energy from Cascade to the big Boundary mines.

In a short time, there will thus be no less than five different electrical lines over the highway between Cascade and Grand Forks—a showing which it is doubtful if any other district in the province can present. Of itself it is a telling testimonial of the importance of the Boundary country in the financial world—whence comes the capital for these electrical undertakings.

The demand for the red-letter issue of the Record—dated August 12—containing the details of the arrival of the first locomotive and railway train in the Boundary country was so great as to completely exhaust the edition in 24 hours. Applications for copies, from town and outside have been coming in steadily, and several hundred additional copies could have been disposed of. The publisher of the Record regrets that he could not have foreseen the unexpected call for the paper. However, he will agree to be loaded for bear when the next railway reaches Cascade. That day may not be so remote, either, as some persons imagine.

The long promised July Annual of the Kootenay Mining Standard, of Rossland, has appeared, and it is a beauty. As a specimen of the art preservative it is a credit to the publisher. As a realistic and faithful representation of many of the famous mines and cities of Kootenay and Yale, it would be difficult to find a more satisfactory publication. Its descriptions of mines are terse and pithy. The Record offers congratulations to D. B. Young, the publisher, and to C. Dell-Smith, the editor, for getting out so complete and creditable a work. It is to be duplicated in London, and will tell its own tale in a most convincing and agreeable manner.

The July annual of the Kootenay Mining Standard says that Cascade "takes its name from the cascades, whose never ceasing music seems to sing of future prosperity." Glance at that sentence again, gentle reader; it is worthy of more than passing thought. A half tone view of the Record office adorns the article referred to.

While no announcement has yet been given out, it is understood that passenger service on the new railway is likely to start in about two weeks. At present, the hitherto primeval stillness of forest and mountain is giving way to the shrill shriek of the iron horse.

SECOND AVE., CASCADE, B. C.

PASSING THROUGH

Perhaps no one man is more in the public eye in the Boundary than Jay P. Graves, the "man behind the guns" in some of the largest undertakings now under way in this section. Mr. Graves was in Cascade Wednesday, and told something of the progress on his big properties, the Old Ironsides and Knob Hill, in Greenwood camp, from which shipments will commence this coming winter. He is undoubtedly one of the most successful operators in the Boundary, and it has all been done within a few years. At the height of the Spokane boom in '92 he was accounted a millionaire from his really holdings alone; but the panic of '98 was no respecter of persons, and he had plenty of company. Then he immediately turned to mining, on which he realized the section was dependent for stability, and became interested in Greenwood camp. It will undoubtedly make him a wealthier man than before, if it is not accomplished already.

Tom Lavery, who has been in Cascade for a couple of weeks, working with Evangelist Dickson, is a man who has seen and experienced every side of life. His autobiography would make interesting reading. Tom has seen ups and downs, for many years—mostly downs; but in the course of his life he has made many warm friends among those whom he has befriended in the course of his work of rescuing fellow men. He is a veteran of the American civil war, but says he is good for many a battle yet, if he does draw a small pension. He always holds his audience, for his fund of anecdote, with which to drive home a point, seems well nigh inexhaustible. The world is the better for his being in it.

The Columbia Review failed to appear as usual last week, and has evidently joined the great majority in the journalistic graveyard. R. M. Nisbet, the publisher, was also responsible for the appearance of the late more-or-less lamented Cascade Maple Leaf, the Slocan Sun and the Kuskonook Searchlight—all of which met untimely deaths. No announcement has been made as to where or when Bob will break out again, but he will doubtless be heard from in due time.

Charles Drinkwater, the secretary of the Canadian Pacific Railway Co., arrived in Cascade on the special train Thursday night, in company with Chief Engineer Tye, of the Columbia & Western. They were bound for Grand Forks, in the effort to straighten out the grade crossing difficulty. Mr. Drinkwater is one of the oldest officials of the C. P. R., and this is his first trip into the Boundary country.

R. Matheson, of Belleville, Ont., arrived in town the other day, on the way to Greenwood, to visit his son, Dr. Mathieson. Mr. Mathieson has charge of the Institution for the Deaf and Dumb at Belleville, which has some 160 inmates, and is one of the most important institutions of its kind in the Dominion.

PIERRE LAKE GROUP SOLD.

Bruce White Buys Promising Properties for \$25,000.

Bruce White, the millionaire mine owner of the Slocan, who recently sold the Slocan Star for \$3,000,000, is becoming interested in the Pierre lake district, about 12 miles from Cascade. A few days ago, through W. R. Ramsdell, of Bossburg, Mr. White purchased from H. C. Gibbons, George Walker, W. H. McKay and J. C. Argall their interests in the First Thought, Annex, Defender and Homestake, near Pierre lake. John Ranahan, one of the owners, still retains his interest in the group. The consideration was \$25,000. Ten per cent was paid down and the balance is to be paid in installments inside of a year.

This property has an immense surface showing, there being a ledge of porphyry from 60 to 90 feet wide, assaying on an average from \$5 to \$10 in gold. There has been comparatively little work done on the property. The new owners have already begun development work. Harry Williams, a competent mine superintendent, has charge.

Owners of properties in Pierre lake section are to be congratulated on getting a man of Mr. White's standing interested there, as he has been a most successful operator. While little work has yet been done on his Pierre lake acquisition,

there is said to be every indication of it proving to be a bonanza with development.

Tuesday's Lawn Social.

After being postponed once, the lawn social which was to have been held at Mrs. Stocker's residence last Tuesday, took place in the annex to the Grand Central hotel. The ladies of the Presbyterian church got up the affair for the benefit of the pastor, Rev. J. McCoy, and were gratified at the successful outcome.

A large audience was present and enjoyed the impromptu music and games which were held. Refreshments, in the shape of ice cream and cake were served, the net proceeds amounting to about \$25.

RESERVATION TO BE OPENED.

Land Close to Cascade Will Soon be Thrown Open to Settlers.

It appears probable that the north half of the Colville Indian reservation will be thrown open to settlement by whites this winter.

The work of allotting the lands to the Indians already on the tract has commenced. Harry Humphries and W. E. Casson, allotting agents, with Major Anderson, the Indian agent at Fort Spokane, are in charge of the work.

There are about 700 Indians altogether on the north half. Each of them will have 80 acres of land,

chosen by the aborigines themselves. Already about 200 have taken farms in allotment, so that only 500 remain to draw their ranches. Thus over the entire north half, amounting to 1,500,000 acres, the natives will retain only about 56,000 acres. The rest will be opened to homestead entry by the whites, and the land to be thrown open includes some of the finest farming and ranching lands in the northwest, while some magnificent timber reserves will also be available.

It is expected that the allotting will be concluded this fall, and that within 90 days after the locations are filed the remaining lands will be thrown open to settlement.

Rich Slocan Ores.

Many have heard of the richness of the silver ores of the Slocan country, but few have an idea of how rich these ores are. By a careful computation it was recently shown that the average assay value of several thousand tons of ore from different mines in the Slocan, which ore was treated at the several smelting plants in and out of Canada, ran about 125 ounces of silver and 45 per cent lead to the ton, which would represent, taking the price of the metals at their present value, some \$113 to the ton.—Nelson Miner.

BOUNDARY MINES

Brief Bits From Many Camps.

The City of Paris Gold Mining Co., White's camp, now has 50 men on the payroll.

Several Rock creek properties are expected to be under development in the near future.

The steam hoist having been installed on the Snowshoe, Greenwood camp, the shaft is being deepened. It is already down 180 feet.

An immense copper ledge, assaying 17 per cent copper has been uncovered in the Mountain View in Summit camp. It is under bond to a Montreal syndicate.

The new miners' union at Phoenix has 54 members and that at Greenwood 44. Organizer Wilkes also expects to form unions at Fairview and Camp McKinney.

Assays of 80 per cent copper have been obtained from the newly discovered 30-foot ledge of chalcopryrite ore, recently discovered on the Oro Denoro, in Summit camp.

On the Maple Leaf, one of the Rathmullen group on the north fork of Kettle river, there is one 70 foot shaft and one 85-foot crosscut. The shaft is being sunk an additional 100 feet.

A. D. Lloyd, who has been working some claims, near the Pontifex group, on Huckleberry mountain, five miles from Cascade, has left for California, where he also has mining interests.

Paul Johnson has not yet decided where the Mother Lode smelter is to be located, according to the latest reports, but is carefully examining the various proposed sites in the Boundary country.

Major Leckie, in charge of the B. C. mine in Summit camp, estimates that the development has exposed 40,000 tons of \$25 ore, averaging 10 per cent copper, 5 ounces silver and \$1 in gold.

The lead has been found on the property of the Norway Mountain Gold Mining Co. The ledge is four feet in width and shows a very fine quality of quartz on a contact between granite and porphyry.

The Bonanza, near Bossburg, now controlled by Canadian capital, has just paid a dividend of a quarter of a cent per share on 1,000,000 shares. The mine paid \$50,000 in dividends last year, and is now shipping a car-load every day.

The tunnel on the Morrison, in Deadwood camp has reached the ledge at about 825 feet in. Where intersected some nice looking copper ore was opened up. Drifting both ways on the footwall is the work now being carried out, to determine the strike of the ledge.

A fissure vein of quartz carrying copper pyrites and gold has been struck on the St. Mary, which adjoins the John Bull group, near Gladstone. A shaft is being sunk on the vein, which is four feet wide and seems to improve as the shaft goes down. The ore assays \$60 to the ton. M. J. O'Hearn and J. B. Singer are the owners.

The London and Canada Syndicate, which holds a controlling interest in the Boundary Creek Mining and Milling Company, Ltd., published in London the following cablegram received July 25th from

the manager at Boundary creek: "Assays of samples from Gold Bug give 545 oz. of silver per ton of 2,000 pounds, 12 oz. of gold per ton of 2,000 pounds; average width is three feet; forward by express still richer samples."

The deepest shaft in the Boundary is on the Old Ironsides in Greenwood camp, and it is down 327 feet. About 150 miners are employed at this property, and the force is being increased each month. The group includes seven claims, all crown granted, and over all of which the owners have acquired surface rights; but they are in no haste to put town lots on the market. A 10-drill air compressor is used for drilling on the Old Ironsides, and is worked to its full capacity.

Job is too Heavy.

The legislature of British Columbia is short of up-to-date business men. It requires men who will thoroughly develop the province without regard to legitimate expenses. The job is too heavy for the present outfit, and the sooner they go off shift the sooner will this glorious province get a chance to swim out of the soup—caused by legislation that was not boiled long enough before serving.—Sandon Paystreak.

Always give a "missed" hole plenty of time, says an exchange. It may go later. Do not try to pick out the powder. Remove most of the tamping and insert another stick of powder, and try to fire it again. A missed hole is often successfully fired in this manner without danger to the miner. No. 1 dynamite requires very little tamping.

You can get breakfast before the early stage starts at the Queen Restaurant.

We do not keep "everything under the sun," but we have in stock just what you want when you start out in the hills or "up the line."

ALL OVER THE PROVINCE

Fire is started in 50 more coke ovens at Fernie, and within a month 200 ovens will be in full blast.

The Rossland miners' union has decided that hereafter miners must work by the day and not take contracts.

A new record for ore shipments from Rossland camp was made last week, when over 5,000 tons was sent to the smelters.

Vernon will probably have a new industry within a few weeks. Jas. Harling is getting up a stock company for the manufacture of cigars.

D. G. Cathcart of Revelstoke was committed for trial at Vancouver for issuing bogus checks on the Revelstoke branch of the Imperial Bank.

The Revelstoke council has decided to investigate the nickel-in-the-slot-machine. A local paper says: "If it is a purely gambling combination it will not be tolerated."

The Kamloops city council has passed by-laws to raise respectively the sums of \$27,000 and \$10,500 to extend and improve the waterworks and electric light plants.

The figures of the Kaslo customs office for July were: Total value of goods imported, \$12,740; duty collected at the port of Kaslo, \$2,951.55; sub-port of Nakusp, \$355.19; free goods, \$2,286.

The Vancouver waterworks now supplies over 4,000 houses and blocks with separate connection from its water mains. When the department was taken over by the city, some six years ago, only 1,400 connections were recorded.

Moyie, in East Kootenay, is putting on all kinds of airs. In addition to having having the only air compressor in the district, operating at the Lake Shore mine, the Leader announces that the first typewriter has been introduced in town.

H. Hegelson, M. P. P. for Cariboo, has publicly announced through the Ashcroft Journal that he can no longer support the present government on account of its ill-advised and unwise legislation. He has just returned from a trip to Atlin.

The provincial police of the city of Victoria had a case in the police court last week against a man named Brash for having in his possession for purposes of exportation raw deer skins to the number of 23,000. Owing to some flaw in the oft-amended Game Act the case was dismissed.
