## IMPORTANT DISCOVERY

**Douville Find High Grade Ore on Claims Staked Recently Close to Town**

William Dann and J. E. Douville have found what appears to be an important mineral showing back of the Bayview, and near the western border of the Prince John.

The samples of ore that they have brought down are of two grades. One shows solid chalcocite and iron sulphides. The other samples are quartz, with a mineralization of chalcopyrite, pyrite, copper and pyrites, while some native and ruby silver are evidence.

The only assays so far obtained were from the first samples brought down, which showed one of the native or ruby. They averaged up 40 cents in gold, 2 oz. silver, and 10.3 per cent copper, giving a total value of \$3.80 per ton. The samples at Douville brought down yesterday look better, showing the native and ruby.

The vein is well defined, being traced on the surface for some distance, and showing a width of about 30 feet. The discovery was made too late in the fall for development to be attempted this season, but as early in the spring as the surface is cleared of snow, the owners figure on getting the property in shape to attract development capital.

Six claims are in the group. Their western boundary is the international boundary line.

### X-Ray Eyes

It is an old saying that no man can look further into the ground than another. But the News shows that some men can look further into rock than others. Harry Thomey, superintendent of the Dunwell, was looking at a piece of Indian ore in the News office the other day. The sample had leaves of native silver showing, and across it ran a small device, with quartz crystals lining the cavity. "Inside that rock," said Harry, "is your native silver." "Twist it off," said the newspaperman, who couldn't see inside the rock. So Harry did, and a nest of silver nuggets and beautiful wire silver was exposed to view. Yes, some men can look further into rock than others.

Dr. Alfred Bayne, the Prince Rupert dentist, arrived Sunday and will remain here for one more week. He has opened an office in the Tourist Rooms.

## INCORPORATING INDEPENDENCE

**Well Known Bear River Property To Be Financed By Company—Will Work This Winter**

Preliminary steps have been taken toward the incorporation of the Independence and there is little doubt that this well known property will be operated throughout the winter. In fact, arrangements are now being made for the construction of camp buildings before winter sets in. The proposition made by the Fitzgerald Bros. to stock this property met with instant local favor, and over \$2000 has already been subscribed—before even the stock books have been printed.

The Independence consists of 12 claims, located on Goose creek on the west side of Bear river and about ten miles from Stewart. A considerable amount of development work has been done, about 250 feet of tunnels, drifts and crosscuts having been driven, and a large number of open cuts made on three of the four ore zones that cross the group. A crosscut at the face of the main tunnel shows 23 feet of ore of good milling grade, five feet of which would pay to ship if adequate transportation facilities were at hand. The claims extend practically from the river to the summit of the mountain and can be developed by tunnels. A tramline about  $\frac{3}{4}$  of a mile long would land the ore on the railway track. Unlimited water power is available, and timber for all purposes.

The company will be incorporated for \$1,500,000, and have its head office in Stewart. There will be no difficulty in financing the proposition. The reputation of Fitzgerald Bros. for square dealing is surety of that.

Joe Sexton, better known throughout the north as Harry Tracey, arrived from Alice Arm on the Cardena and is renewing acquaintances here.

Mrs. J. O. Littlepage and family arrived Sunday from Ketchikan via Rupert, to join Mr. Littlepage, who is superintendent of the Riverside mine.

Last Tuesday morning, while Matt Mizgohr was unhitching a team, one of the horses kicked him, breaking his left leg just below the knee. Though the blow knocked him down, he did not realize that the leg was broken until he tried to rise and stand upon it. He is now doing well in the Stewart hospital.

## ANOTHER MILL AT PREMIER

WHILE nothing authentic has been given out by the company, it is reported on good authority that the Premier Gold Mining Company intend to construct another unit of their mill at Camp 4 with a daily capacity of 150 tons, thus doubling their production of concentrates.

It is understood a crew of men are now employed clearing and leveling the site, which adjoins the present plant on the north, and will be an exact replica of it.

The nature of the ground is such that the work now under way will take some time to complete, therefore it is possible, owing to the heavy fall of snow in the winter months, that the management intend to leave the actual erection of the necessary building until the spring, being content to assemble the materials and machinery during the winter, when the snow roads afford cheaper transportation.

It has been rumored for some time that the company contemplates the erection of a 1000-ton mill at or near 13 Mile, where they are tapping the ore deposits at a depth of 500 feet below the Camp 4 level. Particularly was this the case when it was learned that this lower tunnel was 7x9 in the clear, and that 30-pound steel was used in the track.

Evidently underground exploration on the Premier has been such that the management are warranted in laying plans for a much larger plant than has locally been expected.

## STEWART-HYDER LOCAL NEWS

Fred Nash, P. L. S., has returned from Terrace.

Frank and Mrs. Bowler, who spent the summer here, left Sunday for Rupert.

Ole Hanson came back on the Cardena from Maple Bay where he has been working for several weeks.

Jack Wilson, a professional cook, who has been at Banff all summer, arrived Sunday from Vancouver.

Mr. and Mrs. S. G. (Pat) Benson and son Buster left Sunday for Vancouver. Pat expects to return in a few weeks.

T. H. (Pat) Stewart left Sunday after making an examination of the Prince John. He is operating the Ruth mine at Sandon.

Harry Corkill, one of the oldtimers of the camp, is back from the Outsider mine for medical treatment. He became involved in an accident and smashed a couple of ribs.

Oscar Grey, an oldtimer of Alice Arm, was here with Mrs. Grey while the Cardena was in port Monday night. They are on their way to Seattle for the winter. Oscar and Alex Frazer used to be friends in Nome, and they had a great reunion visit here, not having met since 1905.

Joe Trethewey, one of the Trethewey boys who discovered the Cobalt camp and made a million or so apiece, was here during the stay of the Cardena. He is on his way to Hazelton to look over the Sunrise property which Duke Harris has been developing for the past two years.

Don't forget the benefit dance tonight.

Joe Green of Hyder went out to Rupert on the Cardena to attend one of his law suits.

W. C. H. Wilson of Victoria, accountant in the Provincial Mines Department, visited camp this week.

District Engineer J. A. Stephen and George Young, road superintendent, returned on the Cardena from Alice Arm.

R. E. Moore, northern manager for the P. Burns markets, was in camp during the stay of the Prince Rupert Sunday.

George Clothier, district mining engineer, left on the Cardena for Rupert. He will be here once more before his report is made up on the first of the year.

Jack O'Shea, who fell three weeks ago while working on the Indian wagon road, and wrenched the muscles of his thigh, is able to be up and around, though still in the hospital.

On the 24th of October five years ago the Princess Sophia went down in Lynn Canal, with the loss of every person on board. Hardly a person in the north but lost a relative or friend in this, the worst marine disaster since ships first sailed to northern B. C. and Alaska.

J. H. Peterson of Hyder is in the Stewart hospital with a broken leg. The accident occurred last Monday afternoon while he was loading lumber at the Hyder saw mill, and was caused by his foot slipping on the wagon tire. Mrs. Peterson, with the children, is visiting in Seattle.

## STEWART IS ORDERLY TOWN

**Holds High Place in Province for Observance of Law and Order According to the Records**

A frontier mining camp in any country is supposed, according to ancient traditions, to be sort of tough. Arrivals from the outside say that Stewart has a name of this kind, and some of them are surprised, after floating around our busy but orderly streets for a day or so, to find that everyone here is busy attending to his own business, while the lawlessness that is supposed to run rampant exists only in the imagination of non-resident busy-bodies who report things as they would like to have them, not as they actually exist.

Some of these reports recently reaching camp caused the News to dig into the official court records in an effort to find whether we are as black as outsiders would paint us. The result is a commendium on the town of which all residents may justly be proud.

The records show that from the first of this year to date twenty-seven cases have been disposed of under the summary conviction act. These were for the most part minor infractions of the Government liquor act. There was but one indictable offense brought before the court, and this was later dismissed by the county court in Prince Rupert.

There has never, in the history of the camp been a gun play or a hold-up. There has never been any of the offenses which are supposed, according to dime-novel literature, to be inseparable with the opening up of a new mining district. Humanity is safer here than in the cities. Stewart is the best place on earth—proud of her pretty homes and rugged kiddies.

Charles Traversy, of Traversy Bros., painters and decorators, left Sunday for Portland to consult a throat specialist. His son Dick accompanies him.

Assistant Deputy Minister of Fisheries W. A. Found, accompanied by Major J. A. Motherwell, chief inspector for the department for the Pacific coast, arrived in Stewart on Tuesday last on the H. M. C. S. Givenchy, Captain E. M. Henderson. After spending several hours looking over the situation here they left again for the south, having with this port completed an inspection trip of the coast.

## L & L PROPERTY SHOWS UP WELL

**Development During Present Season Makes Fine Showing and Places Property in Prominence.**

Developments at the L & L this season have produced most satisfactory results, and J. Frank Breeze, who has the property under bond, is satisfied that next season will see it go into the productive class. Albert Peterson and partners, who have been contracting there, have done about 140 feet of development work, consisting of extending the lower tunnel, and driving an upraise and several crosscuts. The reason for not continuing the work through the winter is that camp accommodations are inadequate, and the terms of the bond are such that plenty of time is allowed.

At the face of the tunnel the vein shows eight feet of ore which has been crosscut from wall to wall. Being situated on the north fork of Glacier creek, the L & L presents no particular problems from a transportation standpoint. Present plans are for the development of merchantable ore bodies. Taking care of the ore after it is developed will come as a matter of course.

### Hall--Haddon

A pretty home wedding of particular interest occurred at the home of Mr. and Mrs. J. A. Hall at 9 o'clock last Sunday morning when their elder daughter, Miss Irene, became the bride of Edwin Duder Haddon. The young couple are both well known in Stewart and Hyder, the bride having been cashier of the Salmon River Bank for the past three years, and the groom being for about a year on the staff of the Premier Mining Company. They are among the most popular members of the younger set, and have taken part in many events of a social nature.

The ceremony was performed by Rev. F. E. Reddick, of the Hyder Methodist Church, and was witnessed only by immediate relatives of the bride, and Mr. and Mrs. E. L. Dale. The groom arrived from the south on the Prince Rupert Sunday morning, and the happy couple left at noon on the same ship for Vancouver. After visiting there a few days they will make their home at Britannia Beach, where Mr. Haddon holds a position of trust with the Britannia Mining Co.

## THE VALUE OF A "CONTACT"

THE prospector and miner has long clearly sensed the affinity of igneous intrusions to ore deposits, however much some schools of economic geology have blindfolded themselves to the facts. And the prospector and miner have used these conclusions in their work, with excellent results.

So far, so good; but all good ideas are apt to be ridden to death. The extravagant conclusion has been often reached that all igneous contacts are places where ore should be found; hence igneous contacts as such have often been prospected. This was the practical vagary; the theoretical vagary, believed in, until lately, by many if not by most geologists, was that the ore was pressed out from, or escaped from, the cooling igneous rock. This theoretical extravagance indeed justified the practical vagary noted; the trouble with it is that it is not true. There are many hundreds of thousands of miles of igneous contacts guiltless of even a suspicion of ore. The ore has not escaped from the cooling igneous rock.

When it comes to relatively narrow dikes, which are often associated with

veins and other forms of ore deposit, the old belief becomes so evidently false that it should have disappeared of its own weight long ago; for by this belief there should be a more or less direct ratio between the mass of the parent intrusion and the mass of the expelled ores; but anyone with practical experience, after a moment's reflection, will concede that there is none. The dike cannot have been the source of the associated vein. Indeed, where such an association occurs, the vein usually follows only one wall of the dike; there need be no vein on the other side of the dike, as there would be had the ore emanated from the dike magma.

The reason for the common association of dike and vein, or of intrusive rock in general, and ore deposits, is that both are forms of crystallized magma; both are derived from a common deeper source or locus of magmation. This is the genetic reason: there is in addition the physical or mechanical reason, in that both dikes and veins ascend by preference along cracks or fissures, which always remain lines of weakness. Hence a dike injection along a fissure may be and is often followed by a vein injection along the same place of weakness; and sometimes conversely a vein injection is followed by a dike injection along the same fissure. The former is the usual succession, since rock-magma temperature is higher than ore-magma temperature.

The practical lesson from these facts is that in prospecting and mining one should follow ore, not (primarily) contacts or dikes; the wise, old-fashioned miner's precept holds good—follow your ore. The geologist can help greatly with the study of associated rock formations, but these associations must be given their due weight, and no more.—Engineering and Mining Journal-Press.

Don't hope for the best, but just hop for it.

## SYNOPSIS OF LAND ACT AMENDMENTS

### PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Act, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted without only land suitable for agricultural purposes, and which is not less than 100 feet per acre west of the 120th meridian and 5,000 feet per acre east of that range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Department in Victoria, in which the land applied for is situated, and are made on plain forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be secured by five years and improvements made to value of \$10 per acre, and clearing and cultivating at least 50 acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

### PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being threatened for agricultural purposes, at a minimum price of first-class (arable) lands \$5 per acre, and second-class (pasture) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites in timber land, not exceeding 10 acres, may be purchased or leased, on conditions including payment of stumpage.

### HOMESITE LEASES

Unsurveyed areas, not exceeding 10 acres, may be leased as homesites, conditional upon a dwelling house erected in the first year, the land obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

### LEASES

For grazing and industrial purposes areas not exceeding 500 acres may be leased by one person or company.

### GRAZING

Under the Grazing Act the land is divided into grazing districts and the range administered under a Grazing Commissioner. Grazing permits are issued based on numbers issued, priority being given to established owners. Stock owners may form associations for range management. Free or partially free permits are available for hunters, campers and travellers, subject to head.

## United States Funds

## FEDERAL COMPANY AT OWEN LAKE

The Federal Mining & Smelting Company have taken options on two groups of prospects in the Owen lake district that are owned by Dr. H. C. Wrioch, Hazelton, and Jim Cole of Houston. The deal is only an option and does not need to be exercised until spring, after the snow has gone. The Federal people may then put a number of men to work prospecting and developing. As prospects the groups are very promising and while a great deal of work has not yet been done there are strong indication of large ton-nages. Owen lake is at present reached by road and trail from Houston.

Negotiations are under way for the sale of the Rambler mine at Beaverdell.

The Rossland camp is coming back. Four properties are now working, and the prospects are that three more will be "blown in" about the first of the year.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for wharf extension and repairs, Bella Coola, B. C.", will be received at this office until 12 o'clock, noon, Tuesday, October 30, 1923, for the construction of an extension and repairs to the wharf at Bella Coola, Skeena District, B. C.

Plans and forms of contract can be seen and specification and forms of tender obtained at this Department, at the office of the District Engineer, Post Office, Victoria, B. C., and at the Post Offices, Vancouver, B. C., and Bella Coola, B. C.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 p. c. of the amount of the tender. War Loan Bonds of the Dominion will also be accepted as security, or War Bonds and cheques if required to make up an odd amount.

Note.—Blue prints can be obtained at this Department by depositing an accepted bank cheque for the sum of \$10, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order,  
R. C. DESROCHERS,  
Secretary.

Department of Public Works,  
Ottawa, October 3, 1923.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Office-dwelling and Boat Landing at Schooner Passage, B. C.", will be received at this office until 12 o'clock noon, Friday, November 2, 1923, for the construction of an Office-dwelling and Boat Landing at Schooner Passage, Skeena District, B. C.

Plans and forms of contract can be seen and specification and forms of tender obtained at this Department, at the office of the District Engineer, Post Office Building, Victoria, B. C., and at the Post Offices, Vancouver, B. C., and Schooner Passage, B. C.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 p. c. of the amount of the tender. War Loan Bonds of the Dominion will also be accepted as security, or War Bonds and cheques if required to make up an odd amount.

Note.—Blue prints can be obtained at this Department by depositing an accepted bank cheque for the sum of \$10, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order,  
R. C. DESROCHERS,  
Secretary.

Department of Public Works,  
Ottawa, October 4, 1923.

## STILL SHIPPING RICH GOLD ORE

Another shipment of the sensationally rich gold ore which recently brought the famous old I. X. L. mine at Rossland back into the limelight, will be made in a few days.

Work has been pushed at the mine and the eight leasers state that the rich values have not diminished. The first shipment, sent out to the railway under armed guard and transported to Kellogg, brought each of the eight leasers \$3000.

### Examined Sunrise

Sam Tretheway of Vancouver, and W. S. Harris went up to the Sunrise property, near Hazelton, recently where Mr. Harris has been carrying on development work during the past summer. Mr. Tretheway was well pleased with the results of the season's work, and as soon as his brother Joseph comes from Alice Arm and has a look at it they will decide on a plan for future development which will be on a much larger scale.

Has produced Minerals valued as follows: Placer Gold, \$76,542,203; Lode Gold, \$109,647,661; Silver, \$59,814,266; Lead, \$51,810,891; Copper, \$170,723,242; Zinc, \$24,625,839; Coal and Coke, \$238,289,565; Building Stone, Brick, Cement, \$36,605,942; Miscellaneous minerals, \$1,358,839; making its Mineral Production to the end of 1922 show

### AN AGGREGATE VALUE OF \$734,259,619

The substantial progress of the Mining Industry in this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895, inclusive, \$94,547,241; for five years, 1896-1900, \$57,607,967; for five years, 1901-1905, \$96,509,968; for five years, 1906-1910, \$125,534,474; for five years, 1911-1915, \$142,072,603; for five years, 1915-1920, \$189,922,725; 1921, \$28,066,641; for the year 1922, \$35,158,843.

### PRODUCTION DURING LAST TEN YEARS, \$339,280,940

Lode mining has only been in progress for about 33 years, and not 20 per cent. of the Province has been even prospected; 300,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

## LOCAL NEWS

Morley Shier, representing the Giant Powder Co., is here on one of his periodical visits.

The big freighter Mogul this week loaded a cargo of Premier high-grade ore for the Tacoma smelter.

F. V. Delcourt, representing Malkins of Vancouver, left for the south Sunday after spending the week here.

Dave Brown returned on the Cardena from Rupert where he went as a witness in the James Bowe case.

Dr. H. A. Whillans, physician and surgeon; consultations at office of Stewart General Hospital, 10 to 11 a.m., and by appointment.

D. L. and Mrs. McIntominey of Alice Arm arrived on the Cardena for a visit with Mr. and Mrs. William McIntominey in Stewart.

James Bowe, who was sent from here to Rupert for trial on a charge of stabbing Joe Sequin, was found not guilty by the higher court. His plea was self defense.

### SPECIAL TRIPS AND PARTY TRIPS ARRANGED

FELIX SEPPI & W. E. McDONNELL

Phone 2 Long—2 Short

Dan Brophy and Bill Boddy were down from the Premier over the week end.

The Cardena arrived Monday evening with a fair list of passengers and local freight.

A shipment of live chickens and turkeys will arrive on the next boat for Joe Vincent at the Poodle Dog cafe.

J. Misher and J. E. Falk have completed their new building adjoining the Ocean View hotel in Hyder, B. C., and opened a modern restaurant Wednesday, calling it the Cascade.

The Hyder Commercial Association are planning a masquerade ball for Halloween night in the Pioneer hall. A number of original features will be introduced, and an attractive list of prizes awarded.

John Frame, for upwards of two years United States commissioner in Hyder, has resigned, and it is understood will open a law office in that town. Charles Sandford, editor of the Hyder Weekly Miner, has been offered the position as commissioner, but has not definitely accepted, it is said.
