INDIAN MINE IS EXAMINED

Operatives From the East Look Over Property and Decide On An Extensive Development Program

Owing to the resignitions of G.D.B.Turner and R.L.Clothier from the management of the Indian mine, consequent upon their taking over the Eureka property near Hope, the first lode mine discovered in British Columbia, necessary changes are being made, and for this purpose J. Fred Ritchie of Prince Rupert, president of the company, C. J. Forlong of the financial firm of Stobie & Forlong, Toronto and Hamilton, R. B. Lamb, mining engineer of Toronto and New York, arrived in Stewart last Sunday, accompanied by J. L. McLaren, accountant, of Prince Rupert, who is auditing the books. The party visited the mine early in the week for the purpose of a thorough examination of all phases of the operations; Mr Lamb, who is a well known mining engineer, acting in a techinal capacity, Mr Forlong, representing his firm who have undertaken to do some heavy financing on behalf of the undertaking, and Mr Ritchie as president of the company.

From conversation it would appear that as a result of their observations all three are well satisfied with the property, stating that while it is too early to name the new management, strong eastern financial interests will take hold more firmly than ever, and that a large sum of money will be appropriated for further exploration and development, in the hope of discovering additional substantial ore bodies.

The party expect to leave for the south and east by the Prince George Sunday.

Victoria Day Program

At the International Service Club meeting held last evening the following 24th of May program was confirmed:

Football, Premier vs Stewart, 2.
Tug of war, s.s. Mogul vs " 3:30
Baseball; Premier vs Stewart 4.
Dance, Stewart Hotel, 9 p. m., admission for which will be a flat rate of 75c. for each person with supper extra.

Conservative Meeting

A meeting of the local Liberal Conservaties will be held in Moose Hall on Monday evening May 26, at 8:30. Business, election of officers and appointing delegates.

PORTER IDAHO SACKING ORE

Clay Porter, head of the Porter Idaho Syndicate, was in town Wednesday and stated to the News that he had received assurance from the government that an appropriation has been made for the necessary work on the North Fork Marmot trail, thus assuring him of being able to get out his ore shipments this summer. In speaking of these shipments he also said that he is now completing arrangements for the transportation to tide water and shipment of 360 tons of high grade ore during the coming summer. Between 50 and 60 tons are now sorted and sacked, awaiting the opening of the trail, and with a crew of five men employed, three tons of high-grade ore per day is being extracted from the vein on which the tunnel is driven, running in width from 18 inches to the full face of tunnel. It is estimated that the ore now being taken out will run from $250 to $275 in silver alone, aside entirely from an appreciable lead and small gold content.

Aside from carrying out this shipping program it is Mr Porter's intention to construct winter quarters during the summer, so as to be able to continue work next winter, preparing a large shipment of high-grade for next summer.

BIG MISSOURI REPORTED SOLD

Advices coming from the south on the last mail give credence to the report that the Premier management have taken over the Big Missouri from Trites, Wood & Wilson, themselves large and prominent shareholders in Premier. It is known that these successful B. C. operators obtained excellent results on the Big Missouri last summer, practically assuring its making a very large mine. This being the case it was only to be expected that ultimately it would come under the Premier organization, a report to this effect being published in these columns some months ago.

It is stated that the reason for the Premier not proceeding with the installation of their large mill near the portal of No. 6 tunnel, and construction of the Salmon River Railway was on account of developments on Big Missouri, which, if as expected, will naturally require plant and equipment that will handle ore from both properties.

Get your miner's licence.

STEWART-HYDER LOCAL NEWS

Henry and Mrs Rochfort returned Sunday from Victoria.

L. T. Davis returned on the Cardena from a business trip to Rupert.

Wm Dann, proprietor of the Hotel Stewart, left Sunday night on a business trip to Rupert.

Campbell & Duke have now a car for quick delivery of their bakery and fresh vegetable products.

Mrs H. Comer, who went to Vancouver some time ago for eye treatment, and Miss Lois Comer, who has been visiting in Victoria, returned Sunday.

J. Frank Breeze, who has the L & L property on Glacier creek under bond, and who did considerable exploratory work last summer, arrived from Vancouver Sunday. He will resume work when the trail is passable.

E-J. Conway, field engineer for the Granby Co., accompanied by Steve Morrison, arrived from the Outsider mine this afternoon on the company's launch Azurite for the purpose of arranging for pack horses to be used for taking in equipment for further exploration of other ground than the Outsider at Maple Bay.

The growing strength of Stewart is evidenced in the Court of Revision, held by Registrar John Conway at the court house today when something over 40 applicants presented themselves for registration on the voters' list, of whom 36 qualified. Thus the Stewart list will total 450 names for the forthcoming election, though owing to a number of absentees there will not be that number of votes polled on June 20th, election day.

Bob's Ground Goes In Gold

Bob Martin extends a cordial invitation to all old sourdough prospectors to come up to the Star and Dandy camp any day, have dinner and give the property the acid test. He says he would rather have their opinion of the property than all the mining engineers roaming the hills.

Bob has put in the week prospecting the surface of the big vein upon which he proposes to do the first development. Today he showed two assays of general samples, taken 800 feet apart. One gave $59, with $48.50 in gold, and the other $12.50, with $9.50 in gold. The balance of the values was in silver. The miners are driving a short crosscut tunnel to get under the vein where the big assays were obtained last fall, this tunnel being necessary to avoid a small creek which interferes with surface work at this point.

Charlie Lake is clearing up his bunch of lots on 7th street.

Mrs Wm Hanson returned on the Cardena from a week's visit in Rupert.

Dale L. Pitt, manager of the Premier mine, left last Sunday with his wife and baby, for a visit in New York.

Government Agent and Mrs Conway of Anyox visited Stewart today, coming in on the Awake this morning and leaving at 6 p. m.

Danny Hume is back from Alice Arm, where he has been working on the new government bridge. He has his left hand in a sling, the result of being hit by a falling jin-pole.

Bert Kergin, M.P.P. for Atlin and Liberal candidate in the forthcoming election, arrived from Alice Arm this morning on his launch, the Awake, making the trip in 12 hours. Mr Kergin spent the day renewing acquaintences, and left on his return trip this evening.

Captain Jas. Griffiths of Seattle, head of the Coastwise Steamship and Barge Co., paid this port his annual visit on the 19th, making the trip on his private motor yacht Sueja. He was accompanied by Mrs Griffiths and a guest, Miss Lillian Russell, of Vancouver.

A large number of members of the International Service Club turned out and worked all day Sunday constructing the cenotaph which, when unveiled, will present a very creditable monument to former residents of this section who lost their lives in the late war.

W.R.Wilson of Fernie, B. C., a director of the Premier Gold Mining Co. and interested in various other mining projects, has bought the Vancouver residence of the Lieutenant-Governor, Hon. W.C.Nichol, and will reside there. The price paid was around $40,000 cash.

A meeting of the Stewart Local of the Provincial Party was held last Tuesday evening for the purpose of hearing the report of the delegates to the Anyox convention, and perfecting organization for the coming election. Headquarters of the party in Vancouver has unqualifiedly denied that there is any likelihood of affiliating with the Conservative party.

Another Steamship Service

The Curacao, of the Admiral Line, called at Hyder today with general cargo. This is the first visit of any ship of this line to the Portland Canal district.

Get your miner's licence.

SILVER CREST TO WORK AGAIN

According to advices received from the south by the last mail, the Silver Crest, lying northeast of the Big Missouri and near the head of Cascade creek, will this year become active, some $10,000 to $15,000 having been placed in the treasury for further development.

This property was acquired by the Silver Crest upon the advice and recommendation of P. W. Racey, formerly with the Canadian Consolidated Mining and smelting Company for many years, and now superintendent of the Surf Inlet Gold Mines. The company expended $10,000 in preliminary developments under Mr Racey's supervision four or five years ago, with very good results. Thirty-seven feet sampled by Mr Racey went 19 ounces in silver and better than $1.00 in gold.

The property of the company, consisting of 13 claims, is crown-granted and the affairs of the company have always been conducted in a business-like way. The preliminary development work consisted of 24 open cuts on the Argentite and September claims, and in the majority of these 24 open cuts commercial ore was found, and in one or two instances, good bodies of ore are indicated by surface showings.

INDEPENDENCE IN FINE SHAPE

In spite of having started work during midwinter, and consequently having to go up against heavy climatic obstacles that would have caused less determined men to have flinched, work on the Independence property is making very satisfactory progress.

The work started with sending up a crew of men last November to get the camp ready, which having been done, the men resumed work in the tunnel, which is now in some 265 feet. Such good results had been obtained with this work that the management changed their program and decided to ship in on the snow a compressor, and supplies sufficient to last well into the summer. This resulted in taking the men off actual mining about the 5th of March and employing them in moving up to the property some 35 tons of freight, among other things 1000 feet of track and a like amount of air pipe. Having to contend with soft weather, this was a most difficult task, and only the indominitable courage of the men and management resulted in the supplies being completely moved up to the workings, an elevation of 3400 feet. The compressor has since been installed, and all connections made. This week will see a continuation of mining with the aid of power, thus greatly speeding up the work.

Finances of the company are in good shape, allowing of putting into effect a thoroughly sound development program. A crew of ten men is employed on the property.

B. C. SILVER TO SHIP ORE

High-grade Ore Now Being Sacked---Maybe Premier Will Take Over Operation Of This Property

After persevering with a very thorough and extensive development program for some two years, the B. C. Silver mine is now about to enter the district's shipping list, according to a statement given out recently by the management. High-grade ore is now being extracted, sorted and sacked for shipment, from a 6 ft. x 14 ft. raise which is now up some 40 feet from the No. 3 level, which it is the intention to continue for another ten feet and then drift both ways for the purpose of exploring the extent of the ore body. From present indications this ore shoot appears to be improving. The ore now being taken out averages approximately $135 per ton in all values, the gold content fluctuating around five ounces and the silver 58 ounces, with local enrichments running up to 51 ounces gold and 261 ounces silver. It is the intention to have from 50 to 100 tons of this ore ready for shipment in the very near future.

A recent report, emanating from the south, announces that the Premier Gold Mining Co. have taken, or are going to take, over the management of the B. C. Silver, in which they own a minority interest, the Selukwe Co., of London and South Africa owning the controlling interest. In substantiation of this report it is interesting to note that the Premier have recently commenced transporting B. C. Silver freight over their aerial tram line. It has long been recognized in the district that the logical operation of the B. C. Silver is under joint management of the Premier, the latter company being already equipped, and the underground workings for some months past connected up.

USES OF RADIO UNDERGROUND

IT IS INTERESTING to spe ulate on the possibilities of radio underground. Since the Westinghouse company made its recent successful attempt in New York to pick up local broadcasting stations from a point in a tunnel 80 ft. below the Hudson river, tests have been made in two western mines. For one of these the celebrated Star crosscut, now being driven from the bottom of the Hecla shaft in the Coeur d,Alenes was selected. Receiving apparatus set up at a point in the crosscut 6,000 ft. from the shaft, which is 2,000 ft. deep, is reported to have picked up code signals, presumably from a coast station,-the messages, however, being too weak to be understood. The sound of the human voice from Bunker Hill & Sullivan's broadcasting station at Kellogg, 20 miles away, was heard, though unintelligibly. Similar tests are reported to have been made at the Junction shaft of the Calumet & Arizona, in Bisbee, where on the 1,400 level what seemed like wireless code was picked up. These results, of course, are too meager to indicate anything. But such tests are interesting and can well be continued, if only to teach us in general the possibilities and limitations of radio.

What value will radio have in mine work? Two uses suggest themselves; for communication between the mine office or other near-by surface points and the underground workings, and, secondly, for communication between two points both of which are underground. In the first case it may prove an acceptable substitute for the wired mine telephone. In the second it may have advantages when accidents occur and one part of the mine is cut off from the rest. Several limitations and objections at once suggest themselves. Should ground fall or a fire occur and a group of men be isolated, as happened in the Argonaut mine, radio would be of little value unless the trapped miners could transmit as well as receive. And were such transmission practicable, would the necessary equipment be at hand for the entombed miners to make use of? How and where would such equipment be disposed of underground ordinarily? These and other questions like them, indicating possibly a varying degree of scepticism, are bound to be asked when the application of radio to mine work is considered, and they must be satisfactorily answered if radio is to be of any assistance when accidents occur. In a play now on the New York stage, thieves and police alike have pocket wireless receivers and transmitters for communicating with their headquarters. Thus imagination solves the difficulty, and it remai s for science and engineering to make the idea work. Hence the need for more tests like those in Idaho and Arizona.—Engineering and Mining Journal-Press.

STURDY NORSEMEN FOR CANADA

THESE are some of a party of 15 Norwegian fishermen who passed through Winnipeg on their way to Vancouver, where they expect to take up their hazardous vocation in Pacific waters. They were photographed as they stood outside their special coach attached to the Continental Limited of the Canadian National Railways, on which they travelled from Montreal to Vancouver.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is non-timbered land, i.e., carrying less than 1,000 feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on prescribed forms, copies of which may be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivation of at least 5 acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timber land, for agricultural purposes at an upset price of first-class (arable) land $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment for timber and stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling-house being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under the Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, preference being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers.

FIFTH STREET, STEWART.

PROGRAM OF GRANBY CO.

The program of the Granby Co for the present season includes laying a cable across Granby bay to supply power to Granby point where it is proposed to mine the remaining quartz tonnage. It is estimated that there are some 25 thousand tons of quartz that can be handled economically, and at the rate of 60 tons a day, output will be available for 18 months. Rambler quartz mine, the main source of quartz supply for some time past, will be worked out in about 30 days more, although drilling west of this property is now being prosecuted in search for further deposits. Re-opening the Granby poiut properties will necessitate the erection of several buildings to replace those destroyed by fire last July. By the time the Granby point quartz is used up, it is expected the Maple Bay properties will be producing enough fluxing material needed for smelting purposes at Anyox.

A new high-pressure air line of 10-inch pipe will be laid immediately betweer the beach and the mine, and in order to safeguard the trestles on the ore line from fires, a six-inch water pipe will follow the track, while an eight-inch pipe will supply steam from No. 2 power house to the business and residential sections of the town.

Exploration work will be carried on in the immediate vicinity of Anyox throughout the season in search for further deposits of mineral. Dr. Bancroft, eminent consulting engineer, will arrive in Anyox early in June, and will spend the summer between Anyox and Maple Bay. At the latter place, there will be a lot of drilling, preparations being now about ready to commence on the Eagle group, which it is expected will prove to be equally as good as the Outsider properties. At the present time, no new properties are held under option by the company.

All miners' licences expire at midnight May 31.

TRAIL SMELTER IMPROVEMENTS

Elaborate improvements and extensions are being made by the Consolidated Mining & Smelting Company of Canada, which will add materially to the total output of varied products turned out by that already mammoth plant. While many considered the Consolidated had about already completed its program of extensions, it is quite evident from the recent additions made and those already planned to be carried out shortly, that the huge plant is still in the expansion stage. These improvements as well as the new machinery for various units of the smelting and refining plants, will involve an expenditure running into six figures.

Prominent among the many improvements to be made shortly is the addition of a large Cottrell plant to take care of the gases from the new Riverside roaster plant. Another notable addition will be a second Cottrell plant as well as an antimony refining plant at the silver refinery.

Three more D. & L. furnaces will be constructed at the main smelter, two of which will be 50 per cent larger than those now in use.

The company is also installing at the Sullivan mine four 6-ton electric locomotives, an 8-foot Hardinge mill, a 6000-ft. air compressor, built by the Rand Drill Co., of Sherbrooke, Que., which will be directly connected to a Westinghouse motor. This compressor will be one of the largest in British Columbia.

The John Bertram Company of Dundas, Ontario, has shipped to the Consolidated a 60-inch open side planer for installation in the Trail shops; a Niles 6-foot right-line radial drill will also be installed. With these additions the Consolidated machine shop will be the best equipped of any in the province. This shop already has the largest lathe in Canada.

Has produced Minerals valued as follows: Placer Gold, $76,962,203; Lode Gold, $113,352,655; Silver, $63,532,655; Lead, $58,132,661; Copper, $179,046,508; Zinc, $27,904,756; Coal and Coke, $250,968,113; Building Stone, Brick, Cement, $39,415,234; Miscellaneous minerals, $1,408,257; making its mineral Production to the end of 1923 show

AN AGGREGATE VALUE OF $810,722,782

The substantial progress of the Mining Industry in this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895, inclusive, $94,547,241; for five years, 1896-1900, $57,607,967; for five years, 1901-1905, $96,507,968; for five years, 1906-1910, $125,534,474; for five years, 1911-1915, $142,072,603; for five years, 1916-1920, $189,922,725; 1921, $28,066,641; for the year 1922, $35,158,843; and for 1923, $41,304,320.

PRODUCTION DURING LAST TEN YEARS, $350,288,862

Lode mining has only been in progress for about 33 years, and not 20 per cent. of the Province has been even prospected; 300,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.
