RESUME WORK ON LAKEVIEW

Ambitious Program Laid Out for Further Development on Leading Glacier Creek Property

Extensive operations are to be undertaken soon on the Lakeview, according to R. F. Hill, who as managing engineer brought the property to its present stage of development. Mr Hill was here over the week end making the preliminary arrangements, and left for Vancouver Monday night. He is now in charge of the Woolsey group in the Revelstoke district for the Bernier Metals Corporation, a United States concern. He has, however, been retained in a consulting capacity by the Lakeview company, and will visit this property occasionally as the need arises.

Under Mr Hill's management the veins' occurrences were clearly defined by extensive underground exploration, and surface prospecting by means of stripping and open cutting. Work necessary for the next year can now be done "by the map" and it is not necessary for him to be here continuously. Tenders will be called for at once for carrying ahead the present plans by contract. These call for drifting 210 feet on the third level and upraising 240 feet to the second; raising 130 feet from No. 1 level to the surface, and driving a 350-foot crosscut to intersect the No. 1 vein at a depth of 175 feet. Judging by the ore already developed the work as outlined above should result in opening up a larger tonnage than that already assured.

At a general meeting in Victoria, when the company decided upon the present program, Mr Hill stated that extending from the third level to the surface an ore shoot had been determined that averages $30 per ton in gold and silver and has a total value of $135,000; a second shoot of the same character of ore on No. 1 level has a value of $90,000. Between these shoots is a horizon of 350 feet of vein as yet unexplored.

It is hoped that the suggested 350-foot crosscut tunnel will cut as large a body of ore as that opened up in the lower tunnel of the Emperor, as the north and south showing of the Lakeview is undoubtedly a continuation of the same fissure that carries the ore on the Emperor.

The engine, compressor, drills etc at the mine are in perfect working order; the winter's wood is cut; necessary snowsheds have been built, and there is now at the camp a sufficient supply of oil and groceries to last until the trail is open in the spring.

GETTING ACTION FOR NEW DOCK

The Stewart Board of Trade had a heavy session last Tuesday evening, discussing subjects from street lighting, new docks, incorporation, to water for bath tubs.

Ernest Love, new manager of the Light and Power Co., was present and the Board took up with him the question of street lighting which, after thorough discussion resulted in the passing of an appropriation for installation of street lights at the corners and possibly in the centers of the blocks on 5th street from the laundry to Conway st.

Correspondence was read to and from the Federal Department of Public Works in connection with the construction of increased dock accommodation for Stewart. Letters were also read from Mr Fred Stork, M. P. for this riding, and the managers of the various steamship companies plying into this port, all supporting the request of the Board. A letter was also read from the Federal Minister of Public Works, Hon. Dr. J. H. King, to the effect that instructions have been issued to the Department's engineers to submit at once plans and specifications in order that provision can be made in the estimates to be brought down in Parliament, which opens Jan. 9th.

An important item was the motion passed requesting the rehabilitation of existing trails between Stewart and Telegraph Creek, and the construction of some 25 miles of new trail up Bell-Irving river from the outlet of Bowser lake to the telegraph trail. The attitude taken was that construction of a road would cost too much money at present, while if this trail is put through, it will open the route and make Stewart the winter port for the Telegraph Creek and Dease Lake country, the winter mails going in via it. As travel developed this trail could be converted into a wagon road, opening a country extraordinarily rich in natural resources, bringing to Stewart greatly increased business and at the same time giving the Telegraph Creek district greatly improved winter transportation.

The Service Club are holding their bi-monthly card party and dance tonight at the club rooms.

STEWART-HYDER LOCAL NEWS

Mr and Mrs R. F. Hill left for Revelstoke Monday night.

Mr and Mrs A. E. Young left yesterday for a visit outside.

Seymour Campbell left yesterday to spend the winter in Vancouver.

Mrs P. R Backus left Thursday for a visit with friends in California.

L. Jesson, vice president and field manager of Boyles Bros. Ltd., has gone to Peru to extend the company's diamond drilling operations, and expects to be away six months. Denny Jackson, who arrived from the south yesterday, has taken command during Mr Jesson's absence.

Nick Belyin left for Vancouver yesterday on business.

Sam Potts is now conductor of a horse stage between Hyder and Stewart.

Mr and Mrs I. N. Hoguewood left for Seattle yesterday to visit friends for a few weeks.

Eighteen sacks of Dunwell ore were sent out Monday night to the company's Victoria office.

H. Dawson, an oldtimer from Ashcroft, arrived Monday night and has gone up to the Albany.

H. McClymont left Monday night to bask in the salubrious climate of the Fraser valley for a few months.

Mr and Mrs. Harry W. Cochrane and child of Hyder came to Stewart this week to reside. Mr Cochrane has opened a barber shop on Fifth street next to the Anderson Cafe.

Ernest Love, who arrived last Thursday from Prince Rupert to take charge of the local light and power plant, has jumped into the harness and has been very busy going over things generally

The Rev. Walter Allen, B. A., Curate of St. Andrews, Prince Rupert, will preach in St. Marks Church, Stewart, at 7:30 p. m., Sunday, Dec. 13th. This service will take the form of a special with the Choir singing an anthem, Tennyson's "Crossing the Bar" to setting by Sir Fredrick Bridges. Communion will as usual be at 9:15 a. m.

Hauling Ore From Indian

A shipment of ore from the Indian mine is being accumulated at Thirteen-mile and will be hauled from there to the dock in the near future.

PUBLIC SCHOOL ENTERTAINMENT

Under instruction by Miss M. B! Henderson, principal of the high-school, and L. M. Gordon, teacher of the intermediate grades, pupils of the Stewart school have been working hard preparing the most ambitious program ever undertaken in this school centre. The entertainment will be given next Wednesday night in the opera house, commencing at 8 o'clock, admission being 50 cents. The funds are to apply to the purchase of a phonograph, the use of which is becoming general throughout the public schools of the continent as a medium for instruction in various lines. The program to be presented is as follows:

Part I.

Chorus, "O Canada."
Introduction, Recitation by three children.
Play, "The Country Cousin."
Recitation, Pat Heinekey.
Fan Drill, Eight girls.
"Five Little Chickens."
Recitation, Horton Jack.
Playlette, "Country Mouse and City Mouse."
Songs of the Camp Fire, Six girls.
Living Statues.
Play, "Strike in Santa Clause's Land."

Part II.

Chorus, "Silent Night."
Play, "Santa Clause's Assistant.
Recitation, Leah Horstman.
Drill, Eight boys.
"Over in the Meadow."
Ballet Dance, Margaret Jancowski.
"A Surprise for Santa," Doreen Jack.
"The Hungry Chickens."
Shadowgraphs.
Play, "The Golden Goose."
Chorus, "Hark the Herald Angels Sing."

SERVICE CLUB DANCE ENJOYABLE AFFAIR

A most enjoyable evening was spent at the United Services Club dance last Friday evening in the opera house, by a crowd that taxed the capacity of the floor. A splendid orchestra was organized for the occasion, consisting of Wm. Cameron at the piano, J. P. Scarlett violin, and Joe cullen, drums. An innovation was introduced in connection with the supper, a number of the members' wives and friends bringing cakes, the quality of which demonstrated beyond a doubt that the ladies of Stewart cannot be excelled in the fine art that is reputed to be the nearest and surest way to the heart of the sterner sex. Members of the club made sandwiches and served the refreshments.

Hospital Dance Dec. 31.

L & L MINE RE-OPENING

Operations are to be resumed at once on the L. & L. Glacier Creek property, after a shutdown of several weeks, according to Wm. Irwin, who returned yesterday from Vancouver, and who has been appointed superintendent. For nearly seven years Mr Irwin has been associated with the development of some of the leading properties of the district, starting with the Premier, and his faculty for finding ore has become a by-word in the camp. He has taken charge of the L. & L. only after giving it a thorough examination.

Mr Irwin starts tomorrow with a crew of men to break trail to the property and commence winter operations. He will drive a new tunnel, to be known as No. 3 level, starting down the hill from No. 2 and gaining about 30 feet of additional depth. The tunnel will be an adit, driven on the vein from the portal, and should open up a considerable body of high-grade, about 75 tons of which was shipped this season from the two upper levels.

While the No. 3 tunnel is being driven a crew will also be put in No. 1, where a considerable amount of crosscutting and drifting will be done.

DRIVE TUNNEL ON THE ALBANY

Development of the Albany this winter will be done by contract in 100-foot sections, the first section having been taken by Jack Watkins, vendor of the property to the Albany Mining Co., a close corporation organized in Vancouver. Mr Watkins has already placed a crew to work, the camp having been built and preliminary arrangements made before winter set in.

A tunnel is being driven on one of the veins carrying a shoot of high-grade lead-silver ore, with which is associated a considerable amount of milling ore. Edward G. Brown, the managing director, returned to Vancouver this week after getting operations under way, and expects to re-visit the property next month. His intentions are to put a mill on the mine as soon as conditions warrant, which he believes will be some time next summer.

The new pool hall on the corner of 5th and Columbia is now in full swing and becoming quite a popular resort.

OPERATING CO. BIG MISSOURI

Standard Mines Corporation Turns Property Over To Big Missouri Mining Company

One of the most interesting developments in this district for some time is the sale of the Big Missouri by the Standard Mines Corporation to the Big Missouri Mining Co., a new organisation with a capitalisation of $5,000,000, incorporated under the laws of the State of Washington and created for the express purpose of developing and operating the Big Missouri, which was last spring bonded to the Standard Mines, and developed by them with exceptionally good results.

Officers of the new company are in part G. H. Osgood, of Wheeler, Osgood & Co., Tacoma, president; H. A. Henton, a Tacoma mining man, general manager; Harry Townsend, consulting engineer; P. E. Petersen, superintendent.

According to latest reports from the property, the result of the work in the old "Mann" tunnel on the E Pluribus claim has been to open up the ore body, as previously reported, but of far better quality than at first reported, it being a high-grade gold-silver ore, similar in character to that of the Premier and B. C. Silver.

The Standard Mines Corporation was organized about four years ago as an exploration and development company, and has had, during the past summer, several propositions under development. It is only natural that, with the results on Big Missouri rapidly exploding one theory after another all season as to the system of ore deposits, and reaching a point in its development that demonstrates the property to be a big mine in embryo, it should be turned over to an operating company.

B. C. SILVER NOW SHIPPING OUT ORE

The Crawford Transfer Co. are busy these days hauling ore down from the B. C. Silver, the first of a 50-ton shipment reaching the dock Thursday. The ore body cut a short time ago appears to be standing up well, carrying an exceptional shoot of high-grade. Sampling across four feet gives returns of 5.86 ounces gold and 255 ounces silver upwards of $300 per ton.

Pat Keys left for Seattle yesterday.

MINING IN B. C. BRILLIANT FUTURE

THE REPLY of the Minister of Mines to a question asked in the Provincial Legislature recently by Mr. H. F. Kergin, brought out some very interesting figures in connection with the increase of the mineral production of this Province during the past ten years, and in such a way as to impart their significance to even the layman in mining, in the most forceful manner.

The quantities produced in 1924, as compared with 1914 were:

	1924	1914
Silver, oz.	8,341,768	3,602,180
Copper, lb.	64,845,393	45,009,699
Zinc, lb.	79,130,970	7,866,467
Coal, tons,	1,930,526	1,810,967
Gold, oz.	268,753	247,170
Lead, lb.	170,384,481	50,625,048

From these figures some remarkable increases will be noticed; for instance, the production of silver increased by 4,639,588 ounces; copper production increased 19-835,694 pounds; zinc production experienced possibly the second greatest increase, being 72,224,503 pounds greater than in 1914; but without doubt the most remarkable increase of all is lead, the production of which increased for this ten-year period 120,759,433 pounds, or 600,329 tons.

While this increase is most satisfactory, offering as it does positive proof of the progress within the Province of the mining industry, it must be borne in mind that it is by no means all, and that while production in the past few years may have been rapid, it has not been any more so than the resources fully justify, and in the future promises to be still more rapid.

For instance the value of the total mineral production for 1914 was $26,388-825; in 1924 it was $48,704,604, or $22,-315,779 greater than in 1914, while for 1925 it is estimated to exceed 1924 by at least $12,000,000, reaching a total production of $60,000,000, and with producers coming in, in 1926 a greater increase will be recorded for that year over 1925; in fact the production for 1926 should total $75-000,000, with 1927 being still greater.

These figures should prove very interesting to those who, by being out of touch with the mining industry, are inclined to think that mining has reached the hey day of its production, and that even at that it is not a real permanent factor in the development and business life of this Province.

A casual consideration of these figures and predictions, in conjunction with a rough survey of the industry, should be sufficient to convince anyone that the prophecy contained in these columns a short time ago, to the effect that the mining industry in this Province will, in a few years' time, have a greater value of production than agriculture, fisning or lumbering, is certain of fulfilment.

It will be British Columbia's premier industry for many years, distributing millions for wages, supplies and materials, to say nothing of dividends. It will be the greatest incentive to greater agricultural production and increased manufacturing, the basis of the greatest prosperity that this Pacific Coast Province has ever known.

MAN'S INGRATITUDE

There is nothing in life so cruelly unappreciative as the Public. History down through the ages is crowded with instances of both great men and women, who in the service of the people gave of their very best, and to do so made great personal sacrifices, only to in the end be dragged down and repudiated by the very people for whom they worked and sacrificed.

The most recent repetition of this old story is Herbert Greenfield, until recently Premier of Alberta. Not wanting political honors, only wishing to lead a quiet life doing what he could in his own sphere, he was after great pressure induced after the elections of 1921, though not a member of the legislature, to take the Premiership of the Province, which position he held with credit to his Province until last month, when certain elements within the ranks of his party succeeded in throwing him overboard into the discard.

As reported he left office without even one sign of well wishing from the members of his Farmer Party. who for some four years had used him to the advantage of their party and themselves.

"Back to the farm for me" was Mr Greenfield's only remark on leaving office, "I am through with politics for good and all." He evidently appreciated Shakespeare when he wrote: "Blow, ye wintry winds, blow—
Thy tooth is not so unkind as man's ingratitude."

BUDGET SURPLUS

The statement issued by the Hon. J. D. McLean, Minister of Finance, in his opening speech introducing the Budget in the Provincial Legislature recently to the effect that the Province this year has a surplus of revenue over expenditure amounting to $156,000, the second since 1917 and that next year would witness a still greater surplus, in spite of preposed reductions in the Income and Personal property taxes, is without doubt the best news that this Province has had for many a day.

For this good work the Minister, Hon. J. D. McLean, deserves the graatest possible credit, which the Portland Canal News hastens to here accord him.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

DIAMOND DRILLING CONTRACTORS
Twenty-five Years' Experience at Your Disposal

Diamond drilling is to mining and exploration work what the X-Ray is to surgery. The one sure method of obtaining exact geology. Invaluable for determining the most suitable system (method) to adopt for proving, developing and mining ore bodies.

Heavy and light portable gasoline, and air powered drills located in various districts.

Hand powered drills for inaccessible places.

History of work, log of holes, graphic map and detail of drill results by our staff when desired.

BRITISH COLUMBIA

The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $77,382,953; Lode Gold, $118,473,190; Silver, $68,824,579; Lead, $70,548,578; Copper, $187,489,378; Zinc, $32,171,497; Coal and Coke, $260,880,048; Building Stone, Brick, Cement, $42,225,814; Miscellaneous minerals, $1,431,349; making its mineral Production to the end of 1924 show

AN AGGREGATE VALUE OF $859,427,386

The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895 inclusive, $94,547,241; for five years 1896-1900, $57,605,967; for five years 1901-1905, $96,507,968; for five years 1906-1910, $125,534,474; for five years 1911-1915, $142,072,603; for five years 1916-1920, $189,922,725; for the yea. 1951, $28,067,641; for the year 1922, $35,158,843; for the year 1923, $41,304,326 and for 1924, $48,704,604.

PRODUCTION DURING LAST TEN YEARS, $372,604,641

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been prospected; 200,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than of any other province in the Dominion, or any Colony in the British Empire. Mineral locations are granted the discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

N. B.—Practically all British Columbia Mineral Properties upon which development has been done are described in some one of the annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Pacific Building, Vancouver, are recommended as valuable sources of information.

ROAD AND TRAIL APPROPRIATIONS

Proposed expenditures for roads, streets and trails in the various electoral ridings of British Columbia for the year 1926 were given in the Legislature by Hon. Dr. W.H.Sutherland, minister of public works in answer to questions presented by Mr W. A. McKenzie, (Simalkameen) as follows:

Alberni $47.500, Atlin $50,000. Burnaby $10.000, Cariboo $70,000 Chilliwack $31,000, Columbia $40,000, Comox $55,000, Cowichan-Newcastle $40,000, Cranbrook $50,000, Creston $50,000, Delta $25,000, Dewdeney $40,000, Esquimalt $40,000, Fernie $35,000, Fort George, $68,000, Grand Forks-Greenwood $45,000 Islands $33,000, Kamloops $50,000, Kaslo-Slocan $68.000, Lillooet $48,000, Mackenzie $25,000, Nanaimo $15,000, Nelson $3000, New Westminster $1800, North Okanagan $45,000, North Vancouver $2500, Omineca 70,000, Prince Rupert 27,600, Revelstoke 38'000 Richmond-Point Grey 12,000, Rossland-Trail 18,650, Saanich 6000, Salmon Arm 28,000, Similkameen 40,000, Skeena 50,000, South Okanagan 40,000, South Vancouver 3500, Yale 50,000.

Those who have had the stamina to read through this array of figures may be as disgusted as is the printer. You will have noticed that we ran short of dollar marks before the list was finished; you will also have noticed that the government is very generous in building roads for American tourists, as compared with its assistance to the wealth-producing districts.

HENDERSON DAILY OUTPUT TEN TONS

That the daily production at the Henderson property on Hudson Bay mountain had been worked up to ten tons: that the proven ore bodies assured production at this rate for approximately 18 months without any new development; and that a very encouraging showing of ore had been opened up in the development tunnel being run on the White Swan property, were statements made by J.R.Turner, engineer in charge of the operations, during an optimistic review of progress at the Duthie mine while in Smithers last week, says the Interior News.

Since Mr Duthie regained control of the properties known as the Duthie mine after their abandonment by the Guggenheims in July of last year, 22 carloads of ore have been shipped to the smelter, and the shipments continue at the rate of a carload every five days.

Values continue to hold good, and after paying all freight and treatment charges the ore is returning close to $90 per ton—a remarkable showing for a property supposed to be damned with disabandonment. and in consideration of the fact that all ore shipped is crude. It is doubtful if another mine can be found in the province to return such high values without milling.

Since work was started on their recently-acquired White Swan group, the tunnel has been driven over 100 feet, and last week a fine body of ore was uncovered in the tunnel. On the Henderson property Mr Turner has plans for sinking operations in the near future, and all the necessary pumps and other mining machinery have arrived for the new development work.

ANYOX HAS NEW SUPERINTENDENT

W. R. Lindsay of Engelmine, Cal. has been appointed general superintendent of the Granby Consolidated Mining, Smelting & Power Company plant at Anyox. He succeeds J. B. Haffner, who has resigned to become general manager of a big copper company in New Mexico. The new general superintendent is a graduate of the University of Washington, and has had charge of extensive mining operations in Alaska.

Charles Wing has resigned as superintendent of employment, housing and community facilities for the same company, after having been with them for 13 years. He plans taking an extended holiday.

Will Develop Snowflake

G. W. Ellis, late of Vancouver and one-time sawmill operator furnishing Grand Trunk Pacific construction in Western B. C., was in Usk recently to complete arrangements for preliminary development of some mining properties in the vicinity. He has bonded the Snowflake group of 23 claims, which are situated on Kitnakwa river, a branch of Copper river, at 28-mile, and owned by John Gabriel. Mr. Ellis intends to devote the winter to active development of the property, the mineralization of which consists mainly of native silver and some sulphides carrying silver.

COLUMBIA CHAMBER OF BRITISH MINES

MINING ENGINEERS PROSPECTORS AND INVESTORS

We offer reliable information regarding any phase of mining development in British Columbia, or general information concerning any mining property in the Province.

Keep in touch with mining developments in B.C. Official reports show that its mines have already paid $70,000,000 in dividends. Prospecting during the last few years has resulted in most promising discoveries.

GET THE FACTS

We are not interested in any mining property. We have no stock to sell. We are a semi-public body organized to disseminate authentic information concerning the mining industry of B.C.

Address enquiries to Secretary, B.C. Chamber of Mines, Suite P, 438 Pender St. W., Vancouver B.C.

A High Grade Shipment

"If Stewart people want high-class stuff now's their chance," remarked D. W. McLennan as he kicked a lot of packing cases out of his way and started displaying various collections of silverware, cut glass, Waltham watches, clocks, and other articles of adornment and utility such as would appeal to the householder of discriminating taste. "We have all kinds of fancy drink mixers too," he ruminated "still, anyone who don't know how to use them can come around here and learn." This appears to be an invitation to acquiring an accomplishment indispensible for Christmas and New Year.

When you have finished reading this paper, send it to a friend who might be interested.

Local Stocks

[illegible] Dunwell changed ownership [illegible] lively in morning time. It is rumored that the Dunwell will shortly be in the steady producing class, with which [illegible] will be considered.

It is now [illegible] the Dominion, at the highest level in [illegible] mined to [illegible] Dominion is looked upon as still [illegible] prices.

Independence showed up in Vancouver, which tends to substantiate the continued rumors that the [illegible] has been [illegible].

The news being most quiet, the interest drift was shifted, starting on the Ghost Creek property, brought on [illegible] the latter, which, it is [illegible] is looked for.

Portal Lake remained in line, unsold with large blocks offering at the new low levels. During the various changes in the quotations drop in Portal Lake, which has always been a very popular stock. The main cause appears to be the sharp shortage of second stock, and the quoted [illegible] block of outside stock will be placed on the market early in the new year, has not been confirmed.

Local stocks closed as follows.

AN APPRECIATIVE LETTER

In a letter recently received from Mrs. Robert Marhaus of this city the various ways in which Pacific Milk has been served in her family are carefully given. She says in the six years she has used Pacific Milk it has given entire satisfaction.

We are very grateful for this letter.
