DUNWELL PLANS WINTER WORK

Directors Visit the Mine Actual Work Commenced Ship High Grades During Winter---Concentrator

Dnuwell mine resumed operations this week, according to a statement made to the News by Robert Stewart, president of the company, just before he left for the south after three days spent at the mine in company with the full board of newly elected directors, where every detail was fully considered on the ground.

This Winter's Program

In speaking of the program for the coming winter Mr Stewart said that the first men, a small preliminary crew, were being put to work getting the pipe line from the compressor plant to the mine in order, also getting all plant equipment in shape, which will take until about the 1st of October. The crew will then be increased and actual mining development carried on.

The first thing to be done will be the continuation of No. 4 tunnel to its intersection with the downward extension of the ore body opened in tunnels three, two and one. It is then planned to raise through from four to three, a distance on the dip of the vein of about 200 feet. This done, the north drift on No. 3 will be widened to a working level and continued north a sufficient distance, possibly 1000 feet, when a crosscut will be driven west to encounter at depth the large ore bodies exposed on the Sunbeam claim.

Will Ship and Mill

This work will necessitate breaking a considerable tonnage of high-grade ore, which it is the intention of the company to ship on the snow during the winter months. This work it is estimated will take until spring to complete. In the interval it is the intention to have all ores tested by several testing laboratories for the purpose of determining the most suitable type of a mill required. With this information, and large ore reserves blocked out, the management will be warranted next spring in constructing a concentrating mill which it is expected will be of 75 or 100 tons capacity and situated at the foot of the hiil nearly due west of the portal of No. 4 tunnel.

Well Fixed Financially

Concerning the reported intention of appointing a manager, Mr Stewart said that nothing has as yet been decided upon in this connection, though he inferred that negotiations to this end were being carried on. In connection with finances, these are in excellent shape and the company is assured of all the capital necessary to place the mine on an operating basis.

Ore Bodies Opened Up

In speaking of the ore bodies opened up in the mine, Mr Stewart said that the company's assayer, Mr White, last fall gave the mine a thorough sampling, and 300 samples taken from the veins as exposed in the drifts from numbers 2 and 3 tunnels, gave an average value of $46 in gold, silver and lead. The greatest depth gained on the dip of the veins in these drifts is about 400 feet. The length of the drift in No. 3 tunnel is 550 feet, with the vein very strong in the north face and carrying both high-grade and a good milling grade ore. The showings on the Sunbeam claim, consisting of three veins, two of which have been traced by open cutting and stripping for a distance ot about 800 feet, have been proven to be the northern extension of the vein system opened approximately 1000 feet to the south.

The Visiting Directors

Last Saturday the outside directors, R.M.Stewart, T. S. McPherson, J. F. Errington, James Stewart, L.D.Chetham and A.B. Saunders, arrived from Victoria and went immediately to the mine, where they stayed until Monday evening. They examined the mine in company with John Stewart, the resident director, who has had charge of all development work. On returning to town they expressed themselves as being very much pleased with what they had seen. stating that results obtained were even better than they had anticipated, and that they were more more than surprised at the possibilities promised.

GEORGIA--TEXAS

W. Beaton went out Monday night to Vancouver after looking over his various mining interests He said that while the crew is diligently engaged in building a trail from salt water to the Georgia River property, it is doublful if they can complete their work in time for a camp to be built and real development started.

Texas creek, though, looks a little more promising. It is possible that accommodations may be made there for winter work. but this is not assured. The engineers' operations on these properties at the present time will determine the company's policy in the spring in case work cannot be commenced this fall.

STEWART-HYDER LOCAL NEWS

Jack McNeil of the Red Top, returned Tuesday night from a trip to Seattle.

Dan and Neil Mathieson went outside Monday night. Dan is quite a sick man.

Oren Hill, postmaster of Hyder, returned on the Cardena from a trip south.

Charlie Larson says they have quit sacking ore at the Spider. They are now bottling it.

Born—At Hyder, Wednesday afternoon, to Mr. and Mrs. W. Bunting, daughter, 5½ pounds.

J. A. Hall, president of the Hyder bank, returned Monday night from a business trip south.

The Portland Canal News won first prize at the Prince Rupert exhibition for district display of ores.

Vince and Mrs. Lade returned home on the Cardena Monday night. Mrs. Lade has been in Nova Scotia for three months.

Among the new buildings constructed this summer in Stewart is a nine-roomed house, built on Columbia street. south of Fourth by J. M. Risch.

The Moose will hold their regular meeting in Stewart next Thursday night. A special order of business will be in connection with the Mooseheart and Moosehaven funds. A full attendance is desired.

A terrible tragedy happened Monday afternoon. One of Jake's ducks fell in the Fifth street pond and drowned. When discovered its life was extinct. Jake retrieved the carcass and burned it to make sure of its extinctness.

Word has been received that Miss Helen Crawford, youngest daughter of Mr. and Mrs. Wm. Crawford of Stewart, who is visiting in Vancouver, has been for some days confined to bed with sickness, which, while not serious, has occasioned some anxiety,

J. A. Stephen, provincial public works engineer, has returned from Telegraph Creek, in company with Bill Hobill, who has been there all summer on the surveying department. The latter, who is an experienced mining man, speaks optimistically of the future of that district.

Mrs. John Conway, one of Stewart's early residents, after spending a few days visiting old friends in Stewart, left for the south Saturday, where she will join her husband, John Conway, formerly government agent for this district at Anyox, but recently moved to Cumberland on Vancouver Island.

A crew of men has this week been put on the Marmot road for the purpose of completing it sufficiently to anable go-devils to be used to the forks. W. L. Ross is in charge of the work.

Miss Henderson, having returned from the south last Saturday, the high school classes were commenced at the public school on Monday last. She has nine pupils in high school and entrance classes.

The local meeting of the Conservative Association was a big success, there being something over 50 people present. Besides expressions of optimism by a number of speakers, the meeting concluded considerable business.

Nichol Thompson, representing Cammel, Laird, steel, arrived from Vancouver on the Charles Tuesday evening and is spending the week in the district on business. Mr. Thompson, who is interested in the development of the Gold Cobalt property in the Hazelton district, reports that very good results are being obtained, and 25 tons of high grade ore are now on the dump ready for shipment. Duke Harris, well known northern mining man, is in charge of operations.

POWERS—PECK

Thomas Powers, wharf superintendent for the Premier ever since operations started, was married last Monday evening at Premier to Miss Eleanor Peck of New Westminster, the ceremony being performed at the home of Mr. and Mrs. Dale L. Pitt by Rev. A. W. R. Ashley of Stewart. Miss Florence Taylor was bridesmaid and Bert Smith, assistant manager of the mine, acted as best man. The bride was given away in marriage by Dale L. Pitt, the mine manager. The ceremony was witnessed by about 20 friends of the contracting couple, and was followed by a buffet luncheon. Mr. and Mrs. Powers, who are being showered with felicitations by the many friends whom "Tom" has accumulated during his six years residence here, will make their home in Hyder.

PAYSTREAK LOCALS

Lost—Gold fountain pen; $10 reward. W. R. Harner.

Why buy stale vegetables? Ask your grocer for local produce. Oliver Smith, gardener.

For Sale, on terms, two years—Four-roomed house, furnished (new); on double corner, close in; with 3-stall barn, cuter, saddle, etc. Apply ROLSTON & Co.

MINES UP THE SALMON FINE

Staff Representative Tells Of Trip To Munro, Troy, Forty Nine and Big Missouri Mines

A member of the Portland Canal News staff, with two companions, recently made a three-days' trip into the Salmon river section. His story, in part, follows.

Fish creek seemed impassable; why is it that all the salmon in the world want to die just there? It is a pretty place and would be delightful if only the salmon could be persuaded to not come there to spawn.

Leaving the stage at Texas creek bridge over Salmon river, the trail led by more or less easy stages up to the well known pass from which that splendid vista of the toe of Salmon glacier suddenly opens like a picture flashed on a screen. This view is perhaps the most-photographed one of the whole district. The writer photographed it in 1910; a comparison of that photo with the present appearance of the ice shows that the glacier has receded nearly 1000 feet.

Glacier Is Easy

The climb onto the ice is still easy, and so is the travel, except that on the evening in question the usual night wind coming down hill in curious alternate hot and cold waves, was an element impeding progress. A mile or so up the glacier the crevasses had widened considerably in the past decade, but are still negotiable, even by the uninitiated. The fact that horses are constantly packing supplies to the many mining properties bordering that huge field of ice, and that only one has been lost in recent years, indicates in a very telling manner how much more simple is the transportation problem than would be snpposed by the general public,

An hour from the foot of the glacier landed us on the Munro group of claims, where a well-graded trail up an impossible-looking mountain-side led, in a few minutes, to a splendidly built log cabin in one of the most beautiful spots imaginible. On a comparatively level, timbered bench, with open grassy slopes nearby, affording excellent horse-feed, the cabin, perched almost at the corner of two precipices, overlooks the whole of the Salmon valley, a view that makes the ordinary town-dweller gasp with amazement.

Munro Group

This property is one of the most accessible of the glacial area. It can be reached even under present transportation conditions within four hours of the Stewart wharf. There is nothing to hinder shipments of high-grade ore, such as is in evidence, as soon as the owners are in a financial position to mine it. There are timber and water on the ground. There are no physical difficulties to prevent the building of a tram to the foot of the glacier, or even to 11-mile if desired.

Some Great Work Done

The work done on the claims is a credit to their owners. Unfortunately, time was too short to permit an examination of the largest showings of the rich ore several feet above the cabin, but that seen in the tunnels and open cuts on the side of the hill, with its heavy percentage of grey copper, was more than sufficient to justify the enthusiasm that the holders of the group put into their work. A recent open cut discloses a new vein which is of such promising richness that when it is more completely opened up next year it will probably feature as one of the big things of the district. A word of praise is due to Messrs MacDonald, Munro and McBride for the way in which they have every year put their wages from winter work into this ground. The cabin alone is a credit to the district, entailing very heavy handlogging and built in a way that should be an example to some of the incorporated companies who can afford ample labor and supplies.

Leaving Alex MacDonald and his hospitality reluctantly, our course took us up and across the ice for another three miles to a point where an easy grade enabled us to reach the trail to the Forty Nine group on the opposite mountain.

Forty Nine

Situated on a bare mountain-side at an elevation of 4000 feet the camp, accommodating about 30 men, under direction of Gus Anderson, of the Premier staff, was in the clouds on the day of our visit. Even so, the views from the immense Chickamin glacier in front down to the north and south ends of Salmon glacier, were vast. The situation is bleak, timber visible in the distance only, scrub wood for stoves scarce; but there was an air of business and hustle that made one feel that small inconveniences as these mattered little

Oil was being used for heat. Tents on substantial wooden frames constituted living quarters that were cosy enough for the time being. It was not then known whether winter work would be carried on. If such is

"BRITISH?"

THERE is an old saying and a true one, that the influencs of liquor oft-time portray the real man. The same holds good concerning the ego of some writers; they become so intoxicated with their own arrogant egotism that they cannot help at times exposing their real character in all its warped and prejudiced ignorance.

One such case is an editorial in the Vancouver Sun of August 25 entitled "The Problem of Empire" which we recently read in going over some old papers. Reading it, one is reminded of poisonous anti-British propaganda circulated throughout the U.S.A. and Canada by the Hearst publications in the early stages of the war.

This editorial says in part: "But the British Empire is too far off, too vague, too immense, for any to say 'This is my Empire.....' Except for the purposes of patriotic buncombe and political bombast with which the Conservative tries to juggle between a free-trade England and a protective Canada, imperial patriotism is as false and artificial as the dreamer's vision of Utopia."

We quite believe that to the puny vision and narrow-guage mind as exhibited by the writer of these lines, that such is the case; but when he lays it down as a truth and a law encompassing the whole, he exposes an arrogant, egotistical ignorance that is colossal.

What an insult to those patriots, even from his own city of Vancouver, whose bodies lie in "Flanders Fields:" What an insult to the widows and orphans, to the wounded who are maimed for life! We ask—did not many of them sacrifice for Empire? What right has he, holding a "safety first" job, sitting in a cushy swivel chair in a nicely warmed office in Vancouver, to slander even one of these?

Such a show of ignorance would not be worth commenting on, if it were not circulated with authority of one of the big B.C. dailies. Everyone is entitled to his own opinions, but let him not profess to speak for the whole.

ALASKA WEEKLY IS IN FAVOR

We are pleased to note that that ably edited paper, the Alaska Weekly, published in Seattle by men who not only know the north but who as well know mining, and deal with its various phases in a sane and intelligent manner, and who for some years past have been working in an attempt to awaken the people of this Pacific Coast to the enormous possibilities and mining future of northern B. C., the Yukon and Alaska, is supporting our humble campaign for sane mining legislation.

The Alaska Weekly, published in a land that has had its fill with several years' experience of blue sky legislation, served up in every conceivable form that the politicians and lawyers, seldom mining men, wish to serve it, speaks with knowledge and undoubted authority. It is therefore interesting to note that in an editorial on August 28, speaking in support of the recent action of the Minister of Mines of this Province, under autuority of the Mineral Survey and Development Act, the Alaska Weekly closes with this statement: "Such methods, we believe, would prove more efficacious than any blue sky law."

In view of the fact that the futurre of the Dunwell is assured, affording a good pay roll right at our back door, would it not be an opportune time to commence considering the incorporation of Stewart nnder the Village Act, which has worked out so advantageously in many towns throughout the Province, smaller even than Stewart?

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

BRITISH COLUMBIA
The Mineral Province of Western Canada
Has produced Minerals valued as follows: Placer Gold, $77,382,953; Lode Gold, $118,473,190; Silver, $68,824,579; Lead, $70,548,578; Copper, $187,489,378; Zinc, $32,171,497; Coal and Coke, $260,880,048; Building Stone, Brick, Cement, $42,225,814; Miscellaneous minerals, $1,431,349; making its mineral Production to the end of 1924 show
AN AGGREGATE VALUE OF $859,427,386
The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895 inclusive, $94,547,241; for five years 1896-1900, $57,605,967; for five years 1901-1905, $96,507,968; for five years 1906-1910, $125,534,474; for five years 1911-1915, $142,072,603; for five years 1916-1920, $189,922,725; for the yea. 1951, $28,067,641; for the year 1922, $35,158,843; for the year 1923, $41,304,326 and for 1924, $48,704,604.
PRODUCTION DURING LAST TEN YEARS, $372,604,641
Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been prospected; 200,000 square miles of unexplored mineral-bearing land are open for prospecting.
The mining laws of this Province are more liberal and the fees lower than of any other province in the Dominion, or any Colony in the British Empire. Mineral locations are granted the discoverers for nominal fees.
Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.
Full information, together with Mining Reports and Maps, may be obtained gratis by addressing
THE HON. THE MINISTER OF MINES, Victoria, British Columbia.
N. B.—Practically all British Columbia Mineral Properties upon which development has been done are described in some one of the annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Pacific Building, Vancouver, are recommended as valuable sources of information.

MINES UP THE SALMON FINE

(Continued from Page 1)

decided upon, presumably all that will be required for comfort will be substantial roofs and some more oil. The group is a large one and shooting could be heard in all directions, exploration being carried on by tunnels, open cuts and diamond drills. Continued work on this ground will be a splendid assistance to the whole district in keeping open a winter trail, and should satisfactory results be obtained from exploration, the improvement of the summer trail and eventually construction of a road for the development of this mine

Northland Mining Co.

North of the Forty Nine, less than three miles, reached by trail well marked by monuments of rocks and of almost imperceptible grades, the route, through ever changing vistas of glorious scenery ended at the camp of this company in one of the most wonderful scenic spots imaginable. The tents accommodating the crew were pitched on a heather slope about 1000 feet above Daisy lake. On the shore of this lake a large three-room log cabin with a concrete floor and galvanized iron roof, was ready for occupation; (the move to these comfortable quarters was made the ay after our arrival.) Feeding into this lake are three substantial creeks, two of which, being close and easily harnessed, will afford ample water power for mining purposes in days to come.

Glacial Scenery

On a timbered point opposite is S. G. Benson's camp on the Daisy group; nearby the outlet of the lake flows into the larger Summit lake, which forms one of the headwater supplies of the far-distant Naas river. Into both of these lakes the northern extremity of Salmon glacier breaks off in towering ice cliffs. On the west side of Summit lake another spectacular glacier, reaching down from the top of August mountain with terrifying steepness, adds to the picturesqueness of the scene. Away to the southwest the gigantic Chickamin field appears to reach for hundreds of miles into the sky. On the south, towering rock pinnacles and crags, split with waterfalls and backed on the east with more white-blue-green ice canopies, afford contrasts to the heather benches and timbered slopes to the north that are beyond description in their transcendent splendor.

Well Situated for Mining

From a mining viewpoint the claims are splendinly situated. The topography is such that the main fissure veins, running across the hillside can be approached economically from several directions. Timber in quantities is accessiole; water is abundant and though the distance from tide-water is greater than that to many properties it is compensated for by the easy grades for transportation.

Sacking High-grades

Sacking ore for trial shipment was from the intersection of a feeder vein with the main contact vein, lying between argilite and slate formation. This is only one of the many rich showings. The welcome afiorded us by the manager, Niel MacDonald, and the generous hospitality of the whole camp, was in itself a feature that was worth the trip.

Big Missouri

Retracing steps to the Forty Nine, thence over the ridge past the Silver Crest and Silver Tip properties, down through a broken country of miniature lakes

(Continued on Page 4)

LAND ACT

In Prince Rupert Land District, District of Prince Rupert.

Take Notice that I, Richard Guy Mellin, of Stewart, B. C., occupation Mining Engineer, intend to apply for permission to purchrse the following described lands:—

Commencing at a post planted at high water mark, at a point 400 ft., more or less, westerly from the mouth of Georgia River; thence north 20 chains, thence east 25 chains more or less, to the west bank of Georgia River thence southerly and westerly, following the west bank of Georgia river and the shore line of Portlanc Canal a distance of 35 chains, more or less, to point of commencement, the whole containing 40 acres, more or less, to be used for mining, milling and transportation purposes.

Local Stocks

(Quotations by H.W.M.Rolston & Co)

Local stocks continue to show an increased activity. This is mainly due to the commencement of work on the Dunwell. Much higher market is looked for in Porter-Idaho; it is noticed that this stock is attracting a great deal of attention. Continued good results from Marmot Metals is holding this stock steady. It is considered to be due for a rise in the near future.

Local stocks closed as follows:

	Bid	Asked
B. C. Silver	$.—	$ 1.25
Dunwell Ex R	1.25	1.60
Dunwell R	1.40	1.75

MINES UP THE SALMON FINE

(Continued from Page 3)

and hills, and ever-changing views, brought us to the park-like claims of world-wide repute, now held by the Standard Mines Co. Pat Daly was there. It is hardly necessary to say that his first question was, 'have you fed?' It was late for dinner, but "Shorty," the chef, had a full course meal ready with a smile, almost before we had washed our hands.

Great Ore Showings

After that, the big new showing! "Tremendous" best describes it. Uncovered along a creek for many feet from a point where the overburden is too heavy to warrant removal at present, to another where the vein stands up like a cliff, the mineral is evident in such quantities that one is tempted to ask why a steam shovel has not already been ordered to handle it. The width had not been determined. The hanging wall was covered by Caseade creek at that spot. A crosscut tunnel was being driven to find the foot wall and had encountered a dike, beyond which it was expected the ore would be found again; estimates of the width ran to about 40 feet feet and assays over $200 in silver and lead. Owing to the body of water in the creek at the time, and to development having only just started, no average assay had been obtained but from the appearance of the ore, so much of which is almost solid galena, it would be safe to estimate the average as high.

High Grade Gold Ore

Pat next took us to some of the work done by A. B. Trites, and his associates who recently allowed their bond on the property to drop. The shafts and open cuts had disclosed some very high grade ore on another vein which was sufficient to make the uninitiated wonder why the late owners had abandoned their chances. Then there is the showing further down the creek from which ore running from 6 to 8 oz. in gold was taken, to make us wonder more. Pat Daly says he has been looking for an open-air mine all his life; now he has one that will last him the rest of his life if things work out the way he thinks they will. There is enough evidence on the Big Missouri to convince the most skeptical that some day it will be one of the big things of the continent.
