PROGRESS OF THE TERMINUS

Initial Shipment of Ore Is Now Coming Out—Developments Give Most Satisfactory Results

H. A. Heywood, director and former manager of the Terminus, returned this week from a trip of inspection of the property in company with Manager B.W.W.McDougall, and reports that development of that property is producing most gratifying results.

Since striking the main vein the long tunnel has crosscut six high-grade ore shoots. There is two feet of shipping ore on the hanging wall, beyond which 35 feet of tunnel has disclosed no foot wall, breaking through several small diorite dykes and then again into vein matter. A drift has been run south on the main vein for a distance of 25 feet and the face shows galena, zinc and grey copper, with the associated silver sulphides that carry the high values distinctive of this property. The main tunnel is now being pushed ahead to crosscut the large quartz veins to the north, the first of which is 150 feet distant. Meanwhile, a raise is being driven to connect with the drift from the bottom of the shaft. This is a three-compartment raise nine feet in width, and designed for a part of the permanent workings.

A small vein was recently discovered below the camp which, with development, may prove important. It carries 2½ inches of silver sulphides, and the few shots put in show that it widens downward like a wedge.

Mr Heywood deprecates the press reports circulated through outside papers to the effect that regular shipments from the Terminus have been going on for several weeks. These reports, he says, are premature and entirely unauthorized. At present a small shipment of six or seven tons is coming out for smelter tests, but no regular shipments will be made until the snow falls.

(Continued on Page 4)

H. Zeffertt has added to the attractiveness ot his store by putting in a new glass front.

Prince Rupert Exhibition, September 8th to 12th. Write for Entry Forms without delay.

W.W.Rush returned yesterday from Wales island where he has been doing some assessments.

Mrs David Watt of Birtle, Manitoba, mother of Mrs Bert F. Smith of Premier and sister of Geo. A. Fraser of Stewart, arrived Saturday for a visit.

UNITED EMPIRE WILL SHIP ORE

Excellent progress is being made with development on the United Empire property. Considerable trail and other preliminary work has been completed and a good camp established for the accommodation of the 18 men employed. The short crosscut tunnel of 50 feet cut the vein for which it was driven, and the crew are now employed drifting on it, extracting and sorting the high-grade ore for shipment. This ore is to be packed down the hill as the pack train returns from packing supplies in. As soon as sufficient tonnage has been assembled it will be sent south to the smelter.

In order to assist operations, the government is making certain improvements to the Bay View trail, which is used jointly by that company and the United Empire.

NATIONAL SILVER

The management of the National Silver Company, controlling the Bush Mines, report that they have cut a very fine ore body in three diamond drill holes recently run. The ore in these holes, encountered at a depth of from 100 to 150 feet, shows considerable width, and while not yet assayed, is of such a nature and similarity to the Premier that good gold and silver values are assured. Twelve men are employed getting things in shape for putting into effect a definite development program, drawn up as a result of the diamond drilling. A fourth hole is now being run.

A distinctive sample of ore from the National Silver was this week added to the News ore exhibit. It comes from the hanging wall in a 50-foot tunnel driven on a vein of which the foot wall has not yet been found. It shows silver sulphides, galena, zinc and iron pyrites, in a gangue of quartz-porphyry such as forms the vein filling of the B.C. Silver and Premier.

H. Quickstead, manager of the Barite, left Monday night on a business trip to Rupert.

Roy Priest arrived Saturday from Vancouver to look after his mining interests.

Grant Mahood and A. E. Truxell left for the south Monday night after spending a week looking over the camp.

Jas. Anderson returned Monday night from Rupert, where he attended the funeral of his sister-in-law, the late Mrs John Andersen.

STEWART-HYDER LOCAL NEWS

There will be a baseball game in Stewart Sunday.

Paddy Bagan is back from a visit to his old home in Quebec.

E. J. Conway, field engineer for the Granby, arrived Saturday from Anyox.

Mrs Wm. Dann has gone up the mountain to help Billy open up the May group.

Mrs Thomas Sherman and son Billy left Monday night on a visit to her parents in Revelstoke.

A. D. Murray, blacksmith and millwright, arrived Saturday from Vancouver.

Mrs Joe Green returned Monday night from Seattle and Vancouver where she spent most of the winter.

Col. R.D.Davies, well known in this district through his connection with various mining enterprises, has severed his connection with the firm of Ross-Davies Ltd., Victoria and Vancouver.

Dan Lindeborg, the "daddy" of Hyder and locator of the Big Missouri, Forty Nine, Riverside, Fish Creek and other properties, returned Monday night for a short visit, after an absence of two years. He is accompanied by Ed Duffy, an Oklahoma oil magnate.

Wm. Hamilton left Monday night for a visit in Rupert.

F. N. Cronholm, manager of the Hollywood, left for Seattle on the Cardena.

The Marmot Metals Mining Co. this week donated $25 to the Stewart Hospital.

A rockslide blocked the road between Stewart and the old wharf for a few hours Thursday morning.

Mrs and Miss McCulloch, sister and niece of Geo. Cameron, arrived Tuesday night from the Okanagan country for a visit.

Service Club Lectures

At last night's meeting of the United Services Club it was decided to hold the meetings in future on the first and third Thursdays of each month, this change being made to prevent conflict with the Moose Lodge meetings.

The Club has arranged for several lectures to be given in the near future, attendance at which will be on invitation from Club members. When these lectures are on mining subjects the Club will extend a general invitation to all prospectors.

HAVE UNION VEIN

A vein ten feet wide has been crosscut by the tunnel on the Union group at the head of Glacier creek. This includes three feet of solid sulphides, principally iron, but with a sprinkling of galena and zinc. The vein was encountered at a distance of 65 feet from the portal of the tunnel at a depth of 75 feet on the dip of the vein. The tunnel is being pushed ahead to locate a porphyry dyke with which the ore is associated on the surface.

LOOKS GOOD FOR VICTORIA MINES

By open cutting, the north extension of the Dunwell vein has been established on Victoria Mines ground. If this vein retains its present estimated dip of 50 degrees to the west, it can be cut within 100 feet by extending the No. 4 tunnel, and give a depth of 300 feet.

The discovery on Dunwell of other veins to the east, which appear to be converging to the north, or at a point on Victoria, makes the extension of No, 4 tunnel of utmost importance, as the situation is such as to offer very great possibilities.

THE SHIPPING LIST

Aside from the regular shipments by Premier, the following properties are moving ore:

The Indian mine sent out 37 tons on the Prince Charles Tuesday night; seven tons were also shipped by Victoria Mines on the same boat.

More than 15 tons of high-grade from Porter Idaho is now at the beach and the pack train is bringing down two tons daily. Ore will shortly commence to move down from the United Empire, Between six and seven tons from the Terminus is en route to the wharf.

CONSERVATIVE ORGANIZATION

A local branch of the Liberal Conservative Association was organized last Friday night, with a good attendance and a spirit of enthusiasm and optimism apparent. By-laws were adopted and officers elected as follows:

Hon. Presidents, Right Hon. Arthur Meighan and Hon R. H. Pooley; President, G. A. Fraser; Vice President, G. C. Andrew; Treasurer, W. S. Orr; Secretary, F. E. Gigot.

Meetings will be held on the third Friday of each month.

OPENING ORE ON SILVER LEDGE

H. Horstman brought down some samples of ore this week from the Silver Ledge group, on which he has charge of development for the Silver Ledge mining company, which owns four claims lying between the Victoria and the Americus Girl in the Glacier Creek section. The ore shows a sprinkling of galena, zinc, iron pyrites and chalcopyrite and looks promising. Open cuts are being made, tracing out the vein with the object of establishing a location for permanent tunnel development. The cuts thus far dug have crosscut eight feet of vein matter, a 3-ft dyke, and then four feet more vein matter. This dyke is an attractive feature, as practically every property of importance in the district has dykes of this nature associated with the veins.

A pack trail about two miles long was cut from the Bear river wagon road to the property before development work started, and a summer camp erected.

REGARDING ORE

Thanks of this paper are extended to E. Moss, editor of the Alice Arm Herald for some beautiful specimens of scheelite ore, (tungsten) from the Esperanza mine, which make a valuable addition to the News ore exhibit. In this connection we also take a belated opportunity for thanking George Bruggy for a large specimen from the Torio mine, which is literally impregnanted with native silver.

Although we have specimens from more than 75 properties in the Portland Canal district, a number of operating properties are not yet represented. This exhibit is the cynosure of all eyes when visitors are in town, and is daily visited by dozens of local mining men and prospectors for reference and comparisons.

The Portland Canal News is now assembling a representstive collection of ores for display in the Vancouver exhibition, and as a permanent individual display for the Vancouver Chamber of Mines. Fresh samples are solicited from all mines and prospects in the district. It pays to advertise.

Miss B.M.Leach of Anyox is staying for a few days with Mrs F. E. Gigot.

F. L. B. Diplock, inspecter for the B. C. Fire Underwriters Association, is in Stewart making surveys of the latest buildings on behalf of Board companies.

HIGH-GRADE ON SILVER SLIPPER

New Cross Vein Discovered This Week Has Shipping Ore on the Surface---Is in Ideal Location

Manager John Haahti of the Silver Slipper, this week brought down ore samples from a high-grade vein which he discovered while prospecting the surface. Samples submitted for assay gave returns as follows: Gold, 1.15 oz. $43.00; silver, 25.5 oz. $17.08; copper, 9.9 per cent, $26.73; total value, $86.81.

This vein is an entirely new discovery and will undoubtedly prove of great importance. The discovery was made about 200 feet northeast of the point where miners are attacking the "big vein," and the strike is toward the latter, it apparently being a cross fissure. The point of contact should be a short distance south of the present workings.

Considering the fact that the ore can be treated by the Granby smelter and shipped in barges, and the further fact that it is only a short distance from deep sea water, there will be a big margin of profit to the company in shipping it, even by packing it down to the beach by horses. It is the most important new discovery reported since the Dunwell made a big surface strike several weeks ago.

MINERAL ISLAND

Ed Wagner this week brought in some interesting ore samples from Mount Trevor.

The mountain is a peak entirely surrounded by glacial ice. It lies about nine miles east of the Porter Idaho, which is near the head of the north fork of Marmot river. The mountain was reached by following the south fork of Bitter creek to its head and then following the Bromley glacier south. The ore is lively-looking quartz, carrying some chalcopyrite and iron pyrites, and stained with copper oxides.

As a commercial proposition, its value might develop 300 years hence. Its importance at present is merely academical, proving as it does, that the mineral zones extend beneath the glaciers.

These are said to be the first samples brought in from this almost inaccessible mountain.

A.W.Kelly has gone with four horses to pack F.C.Green's survey outfit from the George Copper across the Bear river pass to the Murdock group on the Naas slope.

PROTECTING THE PUBLIC

WE ARE fully in accord with the views expressed by the Canadian Mining Journal, which editorially says in part as follows:

"The action of the Provincial Government of British Columbia in imposing a fine on a concern entitling itself the Platinum Gold Mines, for non-observance of the provisions of the Mineral Survey and Development Act, is to be commended heartily, and the fact deserves the greatest possible publicity. It is of small use to collect a fine of $900 or $1000 unless the public, in whose interests the action is taken, has the opportunity to see, and is made to realize, its full significance."

Under sections 16 and 17 of the Act above referred to, a company is required to submit its prospectus for endorsation of the Government Resident Mining Engineer in the district in which the company proposes to operate, in order that he may check up the statements therein made, and pass on their authenticity. While it is realized that it is impossible for him to say definitely exactly what will be found underground on the property, yet he is able to verify or otherwise the salient features of the undertaking, particularly as to its location, extent of surface showings and their values.

In this manner the Government has protected the public as far as it is humanly possible for it to do so. The rest is up to the public themselves. They have to do their part if the fullest possible protection is to be given.

It is an extraordinary thing about mining, that the average man seldom thinks for one moment of applying even the most rudimentary principles of business before investing in a mining undertaking; for instance, he seldom if ever inquires as to to the organization of the company, its management, or transportation possibilities, neither does he ascertain how much of the money which he is investing goes into actual development.

The Department of Mines of this Province is doing its utmost to protect the public from unscrupulous mining promoters, but this is not sufficient protection. No laws can protect a man from his own foolishness. The public must learn to carry some of the burden, and the sooner they do so, the sooner will the pure stock-selling promotions be eliminated.

To every reader of the Portland Canal News we would say, remember the following points, and when approached to buy stock, apply them. Investigate the organization of the company; if you are not in a position to do this for yourself, get advice on this point from someone in whom you have confidence. Second, investigate the management—is it experienced and practical? Third, how much of your money goes into actual development; to guide you in this, the Hon. William Sloan, Minister of Mines, states that at least 70 per cent of your money should go into actual development. Fourth, what are the mineral showings, their values and possibilities. Fifth, what are the transportation problems.

Most of the great men the world has ever known, never pounded a typewriter.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

STEWART LAND CO., LTD.
Fifth St, Stewart, BC

BRITISH COLUMBIA
The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $77,382,953; Lode Gold, $118,473,190; Silver, $68,824,579; Lead, $70,548,578; Copper, $187,489,378; Zinc, $32,171,497; Coal and Coke, $260,880,048; Building Stone, Brick, Cement, $42,225,814; Miscellaneous minerals, $1,431,349; making its mineral Production to the end of 1924 show

AN AGGREGATE VALUE OF $859,427,386

The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895 inclusive, $94,547,241; for five years 1896-1900, $57,605,967; for five years 1901-1905, $96,507,968; for five years 1906-1910, $125,534,474; for five years 1911-1915, $142,072,603; for five years 1916-1920, $189,922,725; for the yea. 1951, $28,067,641; for the year 1922, $35,158,843; for the year 1923, $41,304,326 and for 1924, $48,704,604.

PRODUCTION DURING LAST TEN YEARS, $372,604,641

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been prospected; 200,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than of any other province in the Dominion, or any Colony in the British Empire. Mineral locations are granted the discoverers for nominal fees.

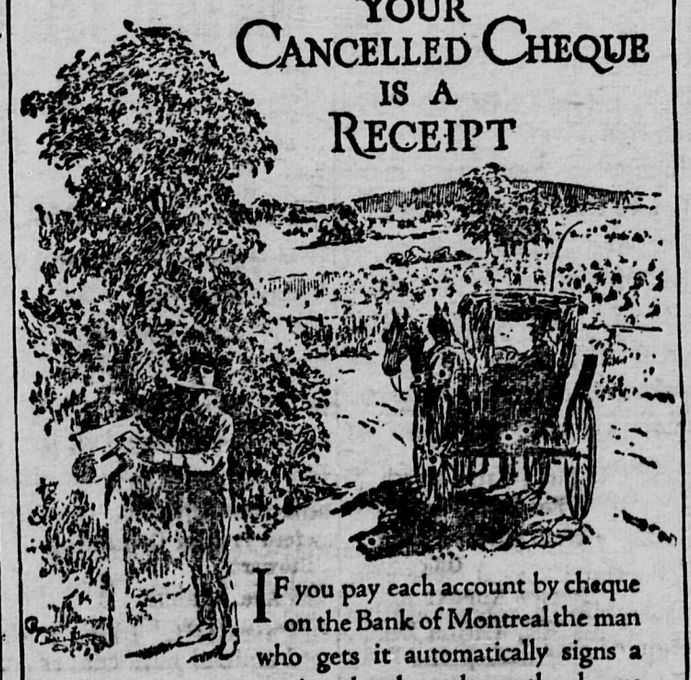
Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

N. B.—Practically all British Columbia Mineral Properties upon which development has been done are described in some one of the annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Pacific Building, Vancouver, are recommended as valuable sources of information.

YOUR CANCELLED CHEQUE IS A RECEIPT



IF you pay each account by cheque on the Bank of Montreal the man who gets it automatically signs a receipt when he endorses the cheque to get his money from the bank. He cannot cash your cheque without first signing his name on the back, thus acknowledging payment.

It is because of this method of doing business that payment through your bank is the sure, safe, economical way. You need not even call to pay a bill. Just mail your cheque to the person to be paid.

AMALGAMATION

(Victoria Colonist)

A deal of particular interest has just been consummated whereby the syndicate owning the Rocks of Ages group of claims on Bear river, near Stewart, in the Portland Canal mining division, have agreed to amalgamate their properties with the adjoining group of claims owned by the Dalhousie Mining Company, Limited, (non personal liability.)

Each of these groups consisted of eight mineral claims, and both groups had good showings of ore. It was the opinion of all parties concerned, however, that economics might be effected and much better value obtained for the work done, by the amalgamation of the two groups. In this way one good trail can be made to serve the entire property, and management and development expenses greatly reduced in every respect.

Work is expected to start shortly on an important lead on the Dalhousie group which ultimately runs into and intersects the principal showings on the Rocks of Ages group.

ROY GETS RESULTS

Roy Clothier and the small group of local investors who acquired the Revenge Silver Mines at Beaverdell a few months ago, have struck very high grade ore in the workings, says the Victoria Colonist. A body four and a half feet in width has been encountered. This yields 500 oz. to the ton in silver.

Mr Clothier, who is president and manager of the company in control, has been in the city for a few days, but is returning to the Beaverdell camp. Already there has been about $20,000 worth of ore taken out of these workings.

The Revenge group is close to the Wallace Mountain Mines and the Bell Mines, which have made excellent showings. The Revenge for years has been changing hands repeatedly, the successive operators endevoring to locate ore bodies similar to those in the Wallace Mountain Mine.

Shortly after Mr Clothier took charge he located the body now being worked with such gratifying results. The location of the property is also a very important feature, as it is alongside a good road and a short way from the railway.

For Atlantic steamship sailings and further information, apply to R. F. McNaughton, District Passenger Agent Prince Rupert, B. C.

YOU WANT STEWART TO GROW

Then pay heed to the following.

You don't plant oats upon a hill
A hundred miles away,
And somewhere else your corn to drill
You know would never pay.
You plant at home to get the yield
Whatever crops are grown,
For planting in some other field
Will never help your own.

And it's the same with dollars,
For dollars too are seeds,
The cash today you send away
Tomorrow you will need.
Don't send your cash afar to roam
But, wiser, learn to sow,
Just plant your dollars here at home,
And watch your dollars grow.

Local Stocks

(Quotations by H.W.M.Rolston & Co)

During the week the market remained weak in all stocks except on properties shipping and those about to ship. L & L Glacier remained in good demand at enhanced prices caused by a rumor that negotiations for a sale were pending. Porter Idaho is in big demand, and as soon as the cheap unit stock has been picked up a much higher level is expected. Though work started only five weeks ago on Marmot Metals, the very satisfactory reports from the mine have caused a big demand for this stock. No very great activity in Bear river stocks will take place until something happens in the Dunwell deal. By general appearances the general public want to get into shipping mines and the ones about to ship held their prices.

Local stocks closed as follows:

	Bid	Asked
B. C. Silver	$ 1.25	$ 1.50
Dunwell	3.35	3.90
Glacier Creek	.15	.20
Independence	.—	.15
Indian	.—	.07

GOOD RESULTS ON TERMINUS

(Continued from Page 1)

It is the intention to deliver 150 tons of ore at the wharf before January 1 and continue shipping as long as conditions are right. This feature is strictly a winter proposition at the present time. Ore blocked out to date, he says, amounts to about 1500 tons.

Powder Companies Merge

An amalgamation of the Giant Powder Company of Canada Ltd. and the Canadian Explosives Ltd. has recently been made under the name "Canadian Giant Ltd." The change will make for greater efficidncy in serving the trade, and a reduction of overhead expense for the company.

In the Local Court

Nothing doing.

Frank Nagel is giving free tickets to the Hyder picture show to each member of the winning baseball team on Sundays.

GOVERNMENT LIQUOR ACT
NOTICE OF APPLICATION FOR BEER LICENSE

Notice is hereby given that on the 1st day of August next, the undersigned, intends to apply to the Liquor Control Board, for a license in respect to the premises being part of the building known as Tourist Hotel, to be changed later to Marmot Hotel, situate at Stewart, Province of British Columbia, upon the lands described as lot thirteen (13), block ten (10), of plan nine hundred and five (905), Prince Rupert Land Registration District, in the Province of British Columbia, for the sale of beer by the glass or by the open bottle for consumption on the premises.

Dated at Stewart, B. C., this 31st day of July, 1925.

JOHN McLEOD,
Applicant.
