VOL. 8, NO. 2

STEWART, BRITISH COLUMBIA, FRIDAY, JUNE 4, 1926

\$5 THE YEAR—10c. the Copy

The "Hinterland" of Stewart

A wonderful vista of country lies between Stewart and the Telegraph Creek section. Vast areas of farming lands, with beautiful, trout-teeming lakes, the scenery broken by mineral-bearing mountains. It abounds in potential resources which transportation facilities would make available for immediate use and revenue

DEAL MADE ON INDEPENDENCE

A deal of some kind, believed here to be an option for examination, has been made on the Independence, one of the most highly thought-of properties of the district.

A report emanating from the southern papers says that financial interests of Detroit, headed by Chas. D. Bush, consulting engineer of that city, and J. Taylor, his partner, and with whom are associated Portland, Ore., interests, represented by Isham N. Smith, a lawyer, having taken over control of the Independence Gold Mines, it was announced following the arrival in Victoria of S. P. Fitzgerald, one of the discoverers and manager of the Independence.

As a result of the deal, reports say, the Victoria directors who have been on the board of the company during its early development stage, will be eliminated and control of the mine will go to the Detroit bankers and mining interests. The office of the company will remain in Victoria for the present, it was announced.

Mr Bush is going north with Mr Fitzgerald as consulting engineer on the property. A \$125,000 development program has been agreed upon by the new control with the object of putting the mine on a shipping and dividend basis.

FOR SALE—Furnishings of Marmot Hotel. Lease can be arranged to suit purchaser. This place is a money maker. Stewart is over the top from this spring on. I must lend my efforts to mining. Write or call for particulars. W. R. Harner.

VOCAL MUSIC PLEASURES ALL

The formation of a musical society has been a long-felt want in Stewart, and the concert given Thursday night by the Stewart Musical Association, under the able direction of Mrs G. C. Andrew, gave proof of the interest taken in the subject by the members, and residents of the town.

The varied program, composed of part songs, solos, trios, quartettes and duets, gave evidence of painstaking and intelligent preparation and was rendered with a spirit that left an impressed and appreciative audience.

After the concert the remainder of the evening was given over to dancing, and refreshments were served. The affair was thoroughly enjoyable and the Association is to be congratulated on the success of its effort. Special credit is due Mrs Andrew for her untiring zeal and the generous spirit that has caused her to employ her talent for the benefit of the whole community. Also, Mrs W. Jancowski contributed in no small measure to the success of the affair by her sympathetic accompaniment at the piano.

Those taking part in the concert were: Mrs G. C. Andrew, conductress; Mrs Thompson, Mrs H. Wilkinson, Mrs H. D. Rochfort, Mrs W. Jancowski, accompanist; Mrs G. P. Heinekey, Mrs W. H. Watson, Mrs F. Bowler, Mrs S. Smith, Mrs W. R. Hull, Miss M. Mellor, Miss M. Crawford, Miss I. Watson, Messrs A. W. R. Ashley, P. S. Jack, F. Bowler, W. H. Watson, J. H. Wilson, W. Noble, J. P. Scarlett, R. G. Mellin, J. W. Wilson and W. Jancowski.

STEWART-HYDER LOCAL NEWS

H. Zeffert left for Vancouver last Sunday.

Bert Kergin, M.P.P. for Atlin Riding, visited Stewart this week.

R. M. Stewart, president of the Dunwell Co., left for Victoria last Sunday.

Surveying Regulations

The following information has been supplied by Dalby B. Morckill, P.L.S., for the benefit of those who have to look for land marks.

New regulations have been issued by the Surveyor General governing the survey of mineral claims, the most important of which, as affecting those who have occasion to search for landmarks, or the owners of claims, being the new manner of marking corners or angles of surveyed claims.

The new rules call for placing iron posts, besides the usual wood posts, bearing trees and rock mounds.

The wood post hereafter will not be placed at the corner, but at a convenient place near the corner. The iron post will be placed at the exact corner, standing six inches above the ground, and the bearing trees or other references will refer as usual to the true corner.

Wood posts will, as usual, be carved with the lot number, and the name of the claim and corner represented. The iron posts will be stamped with steel dies, or cut with a punch, and will bear the lot number and corner markings.

In soft ground the iron post will be a 30 in. length of angle iron driven within 6 in. of the top. On rock the post will be a 10 in. length of 1 in. square iron sunk 4 in. in a drill hole and split and wedged at the bottom.

The regulations apply to all posts, whether corner, angle or witness posts.

An Ajax motor car arrived for C. M. Adam last Sunday.

Rev. A. W. R. Ashley returned Sunday from a short visit in Rupert.

W. A. Talbot, Public Works engineer, was an arrival on the Cardena.

H. G. White, assayer at the Dunwell, left last Monday night for a visit in Victoria.

Hugh B. McGuire, head of the Premier Extension, returned from the south Monday night.

Mrs J. S. Stickney has opened a boarding house in the Workman building, 4th and Columbia.

G. R. Bancroft, managing engineer of the Bush property, returned last Sunday from a business trip south.

H. A. Ives, the famous scenic photographer of Portland Canal and Alaska, is in Ketchikan securing views of that neighborhood. He expects to return to Hyder in about two weeks.

James Conley, Past President of the Vancouver Liberal Association, and member of the Provincial Executive of the same party, visited Stewart looking over the district for a few days during the week.

W. V. Smitheringale, nephew of Mr and Mrs W. B. George, is here for a visit and is meeting many friends, having resided in Stewart several years ago. He was recently awarded a scholarship in the Massachusetts Institute of Technology, where he is completing his technical education.

William Edgar, of 7343 Dante Ave., Chicago, brother in law of Miss E. W. Maxwell, chiropractor, of Stewart, was instantly killed recently when his head was caught in a planing machine in the Illinois Steel Company plant. The remains were interred in Oakwoods Cemetery, Chicago, on May 7th. Deceased leaves a wife and daughter to mourn his loss.

ENGINEER GIVES ENTERTAINMENT

Continuing the policy of last year the United Services Club had a lecture in their Club Hall Friday evening, the lecturer being J. A. Mills, M. I. M. E., engineer in charge of development of the American Mining & Milling Co. property on Fish creek.

Addressing some 60 to 70 people, a number of whom were from Hyder, Mr Mills, while not a professional lecturer, held his audience in rapt attention for close to two hours on the question of the destiny of the English speaking people. He pointed out times without number scriptural prophecy that has been fulfilled in the history of the Anglo Saxon people. Starting from the very beginning he supported his theme with historical events, the Bible, the great pyramid of Cheops, current events, both political and military.

As a result of this lecture there have already been a number of requests for Mr Mills to give a lecture at an early date on the Great Pyramid, which it is understood is being arranged.

Hammond Hit Hard

E. F. Hammond, who left for Vancouver on the Cardena, received a knock-out blow from one of the truss rafters of his cabin up Bitter creek during a heavy wind storm one night last week. Regaining consciousness he found himself crawling on his hands and knees outside, and imagined he had been struck by lightning, until examination of the cabin disclosed a tree across the roof. He had been working on the Hill-Olga group of mining claims and was occupying the McNeil cabin.

TRAIL FEASIBLE SAYS P. M'BRIDE

Pat McBride, who with Homer Ficklin left Stewart in the fall of 1924 for Telegraph Creek and Dease Lake, traveling via Mexiadin and Bowser lakes, returned this week, his former partner having returned last year.

In discussing the feasibility of a trail from Stewart to Telegraph Creek, as advocated by the Stewart Board of Trade, Mr McBride said there should be no difficulty experienced and that it would prove of great benefit, not only to Stewart, but also facilitate the development of the very rich country tributary to Telegraph Creek. In addition it would open for prospecting and trapping, a very rich country enroute.

He predicted that if such a trail is built a lot of men will go into the sections tributary to it, prospecting in the summer and trapping in winter, in addition to which a number of men would take up pre-emptions, there being a great deal of very splendid land capable of growing anything, as demonstrated by several linemen on the Yukon telegraph trail.

Mr McBride spoke very enthusiastically of the intervening country.

Card of Thanks

Niel Matheson of Premier, B. C., wishes to take this means of expressing his very great appreciation for all the many kindnesses and assistances rendered by his many friends at Premier, Dunwell, Stewart and Hyder, on the occasion of the death of his brother, Dan Matheson.

B. C. CHAMBER OF MINES AN INVESTMENT

It is unfortunate that in the rush and hurry of this life the vast majority of the public never find the time to contemplate from the proper perspective those elements which have such a great bearing upon our happiness, progress and prosperity, and as a result credit is in too far an extent withheld, when it should be unstintedly given.

Such an instance is the B.C. Chamber of Mines in Vancouver, and the men who are responsible for its creation and present eminently successful operation. Such an organization was and is essential for the furtherance of the mining industry of this Province. The officers, from President Frank Woodside and Secretary Henry Browning to the most junior, are typical of that high type of citizenship so necessary to the upbuilding of a new country. In the face of great obstacles this small group of men have persevered, early and late, trouble and long hours proving only an incentive to still greater initiative and determination. Encouraging the prospector, operator, and educating not only the public but the school children and the world at large, to the mineral possibilities of this Province.

No history of the mining industry of this Province will be complete without a section devoted to the great work of these men and the B.C. Chamber of Mines.

There is no other organization in this Province that deserves greater support

from the individual prospector, retailer-merchant, wholesaler and manufacturer than does this Chamber of Mines and its officers. Every dollar given in support of this institution is a dollar invested. Support, though, is not the correct word in this instance. The prospectors, mining and business interests should not "support" the Chamber of Mines, but "invest" in this valuable institution, and assist in making British Columbia, as a result of a tremendous mining industry, the happiest, most progressive and prosperous spot in the world, and this can be done.

LODE TIN AT TRAIL

Not content with announcing sensational mining and smelting operations successes, the Consolidated Mining & Smelting Co. of Canada has recently sprung another surprise upon the people of this Province, with the fact that the lead-zinc ores of the great Sullivan Mine also contain tin in commercial quantities, and that during 1925 their metallurgists successfully worked out a table concentrating process that enabled the company to "save this tin, which occurs as a cassiterite. The production of tin concentrates was incidental to other concentrations. The recovery for the year amounted to 124 tons of concentrates containing 13,000 pounds of tin" which is apparently being stored pending the installation of the required equipment for its reduction and refinement to a clean metallic state.

Aside from England the bulk of the world's supply of tin is recovered from creek and river beds in the form of placer or what is termed stream tin. Therefore this discovery of tin in a lode mine is most uncommon, and shows the possibilities of mining in British Columbia.

The presence of lode tin in British Columbia is of the utmost importance, and again demonstrates the necessity of the prospector and miner adopting every possible measure to determine exactly what metals are contained in his ores. Assays are not sufficient. Every owner of a property that shows merit should have an analysis made of the ore. Millions of dollars have been lost to the miner by neglecting this important procedure.

The importance of this discovery at Trail is not confined by any means to the mining industry of this Province, but to the entire manufacturing and industrial life, and thereby affects every resident in every walk of life. For if copper, lead, zinc tin and iron are produced in sufficient quantities, and the first three are, the day should not be far distant when British Columbia will be self sustaining.

SYNOPSIS OF

LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management, free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

BRITISH COLUMBIA

The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, \$77,663,045; Lode Gold, \$122,808,459; Silver, \$74,111,397; Lead, \$89,218,407; Copper, \$197,642,647; Zinc, \$39,925,947; Coal and Coke, \$273,048,953; Building Stone, Brick, Cement, \$44,905,886; Miscellaneous minerals, \$1,594,387; making its mineral Production to the end of 1925 show

AN AGGREGATE VALUE OF \$920,919,628

The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895 inclusive, \$94,547,241; for five years 1906-1910, \$125,534,474; for five years 1911-1915, \$142,072,603; for five years 1916-1920, \$189,922,725; for the year 1921, \$28,067,641; for the year 1922, \$35,153,843; for the year 1923, \$41,804,326 for 1924, \$48,704,604, for 1925, \$61,492,242

PRODUCTION DURING LAST TEN YEARS, \$404,649,375

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been prospected; 200,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than of any other province in the Dominion, or any Colony in the British Empire. Mineral locations are granted the discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

N. B.—Practically all British Columbia Mineral Properties upon which development has been done are described in some one of the annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information. Reports covering each of the six Mineral Survey Districts are published separately, and are available on application.

NEW BLASTING REGULATIONS

Regulations designed to provide still greater measure of protection for workmen in the metalliferous mines of the province, have just been approved and promulgated by Hon. Wm. Sloan, Minister of Mines. These new regulations cover every phase of the storing, handling, and use of explosives in the metal mines of British Columbia. Hereafter none but properly qualified men holding certificates will be permitted to handle powder and conduct blasting operations.

Under the new regulations it is provided that every man handling explosives must undergo an examination by a mine inspector, and hold a certificate from that official indicating that he is possessed of the necessary qualifications. Provisional certificates may be issued by the superintendent of the mine for a period not exceeding 90 days, or until the next visit of the inspector of the district, who will re-examine the man and assure himself of his qualifications.

Heretofore, practically any worker has been allowed to handle and use explosives without restriction. Under the new system now being brought into effect all responsibility for the proper use and handling of explosives, rests upon the man to whom the certificate is issued. It is his duty to see that the magazine in which the explosives are stored is properly constructed, in accordance with the regulations and satisfactory to the mines inspector; that a supply sufficient for not more than 24 hours is allowed underground; that no naked lights shall be taken into any magazine or place where explosives are kept, and, in general, see that the regulations are properly lived up to. All explosives used in the mine must be labelled with the date of manufacture; it is prohibited to convey blasting caps and blasting

powder together into the mine; restrictions are placed upon the thawing of explosives to the end that greater protection to the workers may be given. The operations of blasting are covered by the new regulations in strict manner, and in fact every phase of blasting operations is covered.

While the regulations call for a certificate being held by a person conducting blasting operations, it is provided that a prospector having charge of not more than 12 workmen, and being the possessor of a special permit, authorizing him to carry on blasting operations for the purpose of quarrying, trench-cutting and general surface prospecting, issued by the Inspector of Mines for the district in which such prospector is at the time working, may conduct such blasting operations without being the holder of a certificate required under the regulations.

The applicant for a permanent blasting certificate must produce satisfactory proof that he is properly qualified to conduct blasting operations.

NOTICE TO ELECTRIC LIGHT CONSUMERS

In order to place Electric Power at the disposal of the household during the summer months at a reasonable rate, for small cooking and heating appliances, we beg to announce the following rates, for Bona-Fide Residents ONLY:—

Diversion and Use.

TAKE NOTICE that Northland Mining Company Limited, Non-personal Liability, whose address is 405 Dominion Bank Building, Vancouver, B. C., will apply for a licence to take and use Twelve (12) Cubic Feet per second of water out of Goat Creek which flows northwesterly and drains into Daisy Lake about 500 feet north of Troy Mine Camp on Salmon River, Portland Canal Mining Division of British Columbia, about 22 miles north of Town of Stewart.

The water will be diverted from the stream at a point about two thousand (2000) feet east of Troy Mining Camp at head of the falls between Dilworth Glacier and head of Canyon on Goat Creek, and will be used for Mining, Milling and Power purposes upon the Mine described as The Troy Group of Mineral Claims as recorded at the Office of the Mining Recorder at Stewart, B. C.

This notice was posted on the ground on the 19th day of April, 1926.
A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed in the office of the Water Recorder at Prince Rupert, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

The date of the first publication of this notice is April 30, 1926.

NORTHLAND MINING COMPANY LIMITED

(Non-personal Liability) Applicant

By E. O. Weston, Agent.

MINERAL ACT Certificate of Improvements NOTICE.

Betty No. 1, Betty No. 2, Betty No. 3, Betty No. 4, Betty No. 5, Betty No. 6, Betty No. 7, Betty Fractional, Divide Fractional and Bess Fractional Mineral Claims, situate in the Portland Canal Mining Division of Cassiar District.

Where located:—North end of Divide Lake, Salmon River Valley.

Take Notice that I, Frank C. Green, acting as agent for American Mining and Milling Co. Limited, N.P.L., Free Miner's Certificate No. 93426C intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown grant of the above claims.

And further take notice that action, under section 85, must be commenced before the issuance of such Certificate of Improvements.
Dated this 21st day of September, A. D. 1925. 46

Local Stocks

(By H. W. M. Rolston & Co)

Dunwell continued on the upward trend and shows every tendency of reaching much higher levels.

Indian continued on the downward way with very little activity. This stock is once more at the gamble price, and will likely advance on the slightest rumor.

Independence slackened off a few points, but any cheap offerings were quickly absorbed.

The market on L & L remained dull with few transactions being recorded.

B. C. Silver showed a marked advance and as usual is in steady demand.

The whole market situation seems to be steadying down and higher prices are looked for in all the operating properties.

The nearness of Dunwell to the dividend stage is drawing the investing public more and more back to the Portland Canal mining field. This, with the fact that some of the properties less developed are showing up so remarkably well, doubtlessly assures the whole stock market of a very active summer and fall.

The market closed as follows:

	Bid	Asked
B. C. Silver	\$ 2.10	\$ 2.20

THANKS
FOR
YOUR
PATRONAGE

Last week was Made-in-B. C.-Week. It is perhaps fitting that Pacific Milk should, at this time, express its gratitude for the very generous patronage given by the women of our province.

In return we shall strive constantly to serve you better and better.
