STEWART BRANCH MINING INSTITUTE

Enthusiastic Meeting Led By Engineers and Metallurgists Organizes Local For This District

At a crowded meeting of those interested in mining, held in the Stewart Club Monday afternoon and instigated by Major C. B. North, superintending engineer of the B.C.Silver, P.E.Peterson, metallurgical engineer at the Big Missouri, and Wm. Asselstine, superintendent of the concentrator at Premier, it was decided to organize locally a branch of the Canadian Institute of Mining and Metallurgy. Mr Peterson was elected chairman of the meeting and G.C.Andrew secretary.

Major North, representative of the Institute in this district, very clearly explained the aims and objects of the Institute, viz. to further the interests of the mining industry. He outlined that there are three grades of membership; first the professional member, who is a professional mining engineer; second, the associate members, composed of those not engineers, but who are interested in the development and operation of mines; third, the student member, who is a student mining engineer. Thus all classes are provided for in a community of this kind which is dependent on mining for its very existence, and in his opinion the Institute could be of the greatest possible assistance to it.

Mr Asselstine, whose high standing as a mill man and metallurgist is eclipsed only by his ability as an entertaining speaker, followed, pointing out the assistance that such an organization would be to the development of the mining industry in this district, and the need of organizing.

(Continued on Page 3)

LARGE ORE BODY MARMOT METALS

What is believed by several miners and prospectors who have seen it to be the largest ore body ever located in this district, is being opened by the Marmot Metals Co. on their property on the south fork of Marmot river. Owing to the extent of the showing revealed by open cutting and other surface work, the management as yet have not felt justified in making any statement, preferring to wait until more work has been done in order to be in a position to give some authentic idea of the width and length, also values, strike and dip. The values, it is anticipated, will be principally in zinc, for the deposition of which geological conditions are said to be ideal.

Big Time Dominion Day.

BIG MISSOURI RICH IN GOLD

A rumor reported last week was of a new strike on Big Missouri. It now transpires that this was the location of another lead 80 feet south of the big showing opened during the winter on the northern end of the property near the Unicorn group, thorough sampling of which gave an average of $15 per ton. The new vein so far shows a width of four feet, averaging 12.6 oz. gold or $252 per ton, with good silver values in addition.

The News has it on good authority that Big Missouri never looked better than at present. Good commercial ore has been cut at a depth of 300 feet in what is known as the ground-hog tunnel south of the camp, and ore is being obtained in the new tunnel started some little time ago to get greater depth on the ore body cut in the old Mann tunnel.

RESUME WORK ON SILVER TIP

Work on the Silver Tip has been resumed under the direction of Manager J.V.Clegg, one of the original owners, and will be followed with particular interest because of the exceptionally high values found in parts of the property.

The company has entered into arrangements with R. S. Lennie and F.D.Lundy of Vancouver for the sale of 400,000 shares of treasury stock, which it is estimated will provide ample funds for development of the property. Mr Lennie is one of the best known mining men of the province and has been associated with a number of developments, the most recent being the Ruth Hope mine near Sandon. Mr Lundy has been connected with the promotion of the Cotton Belt Mines near Shuswap lake, the financing of which was remarkable for the low overhead costs incurred.

Development work so far done on the Silver Tip consists of three short tunnels and many open cuts, uncovering and stripping the various ore zones along their strikes, the work having been done under the supervision of C. W. Frank, Geo. E. Winkler and J.V.Clegg, well known mining men. A smelter shipment gave returns of $239.30 per ton.

RUBY DOLAN MUST SERVE FIVE YEARS

It is reported that Ruby Dolan who was convicted of manslaughter for killing James Donald in Stewar Jan. 1, was senteneed to five years' imprisonment. The case against Gladys Gale, who was present when the killing took place, was dismissed.

Mrs Gosling's dancing class at Premier gave a largely attended and much enjoyed dance during the past week.

STEWART-HYDER LOCAL NEWS

Mrs J.P.Scarlett left last Sunday for a visit in Victoria.

Summer vacation commenced today for the public school.

Harry Townsend, consulting engineer for the Big Missouri, arrived from the south Sunday.

Dr. and Mrs Carson returned to Premier Sunday. Mrs Carson has been visiting her people in Boisevein, Manitoba.

Doctor George Hanson, Dominion Geologist, arrived Sunday and has started his geological survey at Marmot river.

Mr and Mrs H. Zeffertt arrived from Vancouver Sunday and have taken up tneir residence in the Nesbitt bungalow, 7th and Columbia.

The Dunwell company have decided to clear the right of way for the tram by day labor, all the bids received being considered too high.

The Premier Community Club have commenced their outdoor summer schedule basketball games and are entering two teams for the Portland Canal championship, the Esquimos and Maroons.

Mr and Mrs A.L.Irwin left recently for Trail, B.C., where Mr Irwin has accepted a position in the research department of the Trail Consolidated Co. He is being succeeded at Premier by Mr Wallace Forrester, geologist.

J.A.Mills, who recently lectured in the United Services Club Hall, has upon request arranged to give another talk in the same hall at 8:30 p.m. on Friday, June 25. These lectures are free and an invitation is extended to all. His subject will be the Great Pyramid.

Boat Change Schedule

Effective Saturday, June 19th, either the Prince Rupert or the Prince George will arrive Saturday mornings, leaving for the south at 9 a.m. The Prince Charles will arrive Tuesday mornings and leave at 10 a.m.

Board of Trade Meeting

The Board of Trade held its regular meeting Tuesday evening, dealing mostly with routine work, with the exception that wires were instructed to be sent to H. F. Kergin, M. L. A., and W.A.Talbot, Provincial Public Works Engineer for this district, requesting immediate opening of the trail to Meziadin lake where it has slid down the hill around Bear river glacier.

FREIGHT SUPPLIES WITHOUT A ROAD

Mining and camp supplies are being rushed in to the Cantu property by the Premier Gold Mining Co. in preparation for extensive development. In spite of there being no road, four-horse teams and wagons are being used. Salmon river is forded a short distance below the Nine-mile bridge, and the Texas creek flats followed for some distance, this creek also being forded several times. The American government built the bridge at Nine-mile several years ago, but made no provision for wheel traffic over it, the approaches being only trails.

E. and R.S. Bartholf left for Seattle last Sunday.

The Cardena brought 300 sacks of oats for Crawford Transfer.

Harry Comer returned Sunday from a business trip to Rupert.

Mrs C. G. Ireland, mother of Mrs Wm. Grey, arrived Monday night for a visit.

Henry Rivard this week purchased from W. J. Mitchell his building at 5th and Brightwell.

Dennis Jackson, in charge of Boyles Bros. drilling contracts in this district, returned Sunday from a business trip south.

The contract for hauling and packing freight to the Big Missouri mine has been let to E. Armstrong, freighter and packer of Stewart.

Dr. Agnew, Dentist, has returned to Stewart and will remain for about three weeks to practice his profession. His office is at the Newell rooms.

Some 30 members of the Loyal order of Moose went from Stewart and Hyder to Premier last Wednesday evening, where a meeting of the Order was held and ten new members initiated, after which there was a smoker.

The annual Memorial Service at the Cenotaph will be held Sunday evening at 7:30. All ex-service men in the district are requested to gather at the United Services Club at 7 o'clock to take part in the parade to the service.

F.E.Gigot has been elected 1st vice president of the local Native Sons of Canada, to succeed A.B, Armstrong, who resigned because the pressure of his freighting business prevents him from giving proper attention to the organization.

The Stewart Tennis Club have announced the first of their summer tournaments, to commence with ladies' and gentlemen's open singles on June 27th, with the finals on July 4th, entries for which must be in the hands of the secretary by June 23d.

Two dozen lacrosse sticks and a number of balls arrived this week for the local Assembly Native Sons of Canada, and will be distributed to the boys of Stewart on Dominion Day, in a laudable effort to arouse enthusiasm for the country's national game.

BEAR RIVER TRAIL GONE AT GLACIER

Jim Douville, Frank Riva and associates left last week with a summer's supply of food and other supplies to do assessment work on two groups of claims east of the Bear river divide. Arriving at Bear river glacier they found that where several hundred feet of the trail had been built on the moraine underlain with ice, the soft winter and spring had melted the ice and the trail had disappeared to an extent that blocked their progress, forcing them to return to town.

They claim that as a result of the changes a good bench exists along which a permanent trail can be constructed, but that such work will take a crew of men about three weeks. The Board of Trade has taken the case up with the proper officials and it is hoped that early action will result.

FIND NEW VEIN GLACIER CREEK

"It is always the unexpected that happens, particularly in mining."

A repetition of this occurred last week when a crew of men employed by the Dunwell, who were building a trail through Glacier creek canyon on the Glacier Creek Company's Lucky Boy claim, in connection with the power dam for the Dunwell company, saw a lot of new galena float at the bottom of a bluff from which it had recently fallen. Examination proved that it had come from a lead cropping in the face of the cliff some little way up from the bottom, about 20 inches wide in a quartz vein. The samples found were some of the finest specimens of galena ever discovered in the district, and an average assay gave a return of $120 in silver and lead, with a little gold.

No work has yet been done, the strike being reported to the head office in Victoria. It is anticipated however that before long the Glacier Creek Co. will resume operations, when this discovery will most certainly be properly explored.

GOOD SHOWING ON 96 GROUP

Developments on the 96 group are proving most satisfactory, according to Dan Woodmore, one of the owners, who visited Stewart this week. Ore in the face of the drift is showing in increasing quantities as the work progresses, and would now all be a good milling product.

The 96 is located on Mineral Hill, which lies west of Salmon river just south of the glacier, and a short distance southeast of the Cantu, which was recently bonded by the Premier Gold Mining Company. The 96 vein was encountered by a tunnel 50 feet in length and is 12 feet wide where crosscut, with two feet of ore that gives values from $80 to $100. From this point the vein has been drifted on for 50 feet, and now has a vertical depth of 125 feet.

The owners are Dan Woodmore, Ray Snyder and P.Wilson, who have kept the work going steadily for two years. A model camp with all necessary buildings has been constructed, as well as ore bins capable of holding 100 tons, into which the high grade has been dumped as mined. The camp is only three miles from the Salmon valley road at Nine-mile on the Alaskan side.

New Assayer Arrives

A. T. Miller, assayer and metallurgist, late of Brittania Mines has taken over the assay business and office of Geo. H. Shepherd, who left here last fall in connection with the operation of a property in southern B. C. and is not able to return this summer. Mr Miller arrived on the Prince Rupert last Sunday.

GREAT GOLD FIND B. C. SILVER MINE

Ore Running Up To 167 Oz. Or $3340 Per Ton Found In Winze on Main Working Level

Last week the News reported a rumor to the effect that a new strike had recently been made on the B.C.Silver. In the light of authentic information this is not entirely correct, though from the standpoint of some sensational gold values in spots, it might be said to be a strike. It appears that a 50-foot winze was sunk in one of the ore bodies at the north end of the main level. From the bottom of the winze, the ore, which has a width of 25 feet was crosscut, showing the whole to be of good commercial grade with a shoot of high-grade. In the course of this work the ore was continually sampled, and some of the samples ran as high as 167 oz. gold or $3340 per ton, with satisfactory silver values. However, these phenomenal gold values do not appear to be persistent, but to occur in pockets, though the whole body carries good gold and silver values. Ore extracted in the course of this development is being sacked and shipped.

The management of B.C.Silver have had a very difficult geological problem to work out and the greatest credit is due both C. A. Banks and Major C.B. North for the efficient and determined manner in which they have tackled what many others would long ago have given up. A great deal of credit is also due the English shareholders for having stuck to their task of putting up the development money in the way that they have, and the reward which now appears to be at hand will be well earned.

DRIVING TUNNEL CHIEF METALS

Work is steadily progressing in ine Chief Metals tunnel, according to Emil Davis, manager for the company. The tunnel is following the vein and is now in 130 feet, with a good showing in the face. The vein is four feet in width, of quartz which is heavily mineralized with galena, especially on the footwall side. Development for this season so far decided upon is to extend this tunnel a further distance of 200 feet. Fire Chief Ebbinghouse of Seattle, president of the company, is expected in to visit the property early in July.

The Chief Metals is located a short distance southeast of the Big Missouri, in a favorable location for economical operation if transportation were provided. Mr Davis says the property is ready for a power plant and one would be installed immediately if it could be taken to the ground. Ore cars and rails were recently packed in by the Crawford Transfer Co.

THE BUDDING OF A GREAT FUTURE

THOSE people of this Province who have for the past six to nine months been pulling long faces and spreading pessimism as to the mining future of this district, prove their ignorance of the mining industry, inscfar as they forget that a quartz mine, or mining district, is not made in a day, but that it takes years.

The great Sullivan mine at Kimberly is situated in one of the oldest mining districts of this Province, and was first staked in the early nineties, or more than 30 years ago, and was not a commercial success until scientific research made it a possibility at the close of the war. As a result it now figures as one of the world's largest mines of its kind, paying hundreds of thousands annually to the Government treasury, millions each year in dividends, and distributing many more millions through the business channels of this Province, thus making for general prosperity.

The Premier mine in this district was first staked some 20 years ago, during which time it was turned down on more than one occasion. Not until 1919 were sufficient funds made available for its development by the present company, and as a result it has paid in a few short years nearly ten millions in dividends and is still going strong, besides distributing as much again in wages, supplies and materials, and hundreds of thousands in taxes.

The Dunwell mine is another, just now emerging from that of a prospect to the status of a mine after many years of determined effort and perseverence on the part of the owners.

B. C. Silver, after many thousands spent in development, is now promising to soon be another monument to perseverence and like Dunwell will soon repay its backers handsomely.

Big Missouri is another comer that promises in the near future to reveal great wealth for those who have had the dogged courage to stay with it.

Instances of this sort could be recounted almost without number. Space in these columns precludes naming any more individual cases in even this district, where there are a large number coming along very well indeed. In fact the gains made by the mining industry of this district during the past few years more than offset the losses, and by comparison the present situation promises to make these losses negligible within the span of a few short years.

As one mining engineer of great and successful operation all over this continent, as well as several years in this district stated the other day: "The future of Portland Canal is exceptionally bright; its mineral resources and possibilities are not yet fully realized nor known, and I look to see the day when the population of this district will number thirty thousand." This statement came from a man who in his profession is recognized as eminently capable, and of wide experience, therefore it should be sufficient to cheer the faint-hearted, as well as withering and drying up the moans and groans of the pessimist. Compare its source with that of the expressions of the pessimists and knockers, who invariably are men who have done but little, men of no vision, little courage and oftimes weak ability, to say nothing of their having little or no knowledge of the district or the mining industry. Stewart and the Portland Canal district as a whole are on the eve of great, and still greater development, carrying them on a wave of progress and prosperity that will make them in a few short years one of the greatest mining camps on this or any other continent. But it is only those who stick with it who will win out, for those who do not, will quickly have their places taken by others who will.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

BRITISH COLUMBIA

The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $77,663,045; Lode Gold, $122,808,459; Silver, $74,111,397; Lead, $89,218,907; Copper, $197,642,647; Zinc, $39,925,947; Coal and Coke, $273,048,953; Building Stone, Brick, Cement, $44,905,886; Miscellaneous minerals, $1,594,387; making its mineral Production to the end of 1925 show

AN AGGREGATE VALUE OF $920,919,628

The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895 inclusive, $94,547,241; for five years 1896-1900, $57,605,967; for five years 1901-1905, $96,507,968; for five years 1906-1910, $125,534,474; for five years 1911-1915, $142,072,603; for five years 1916-1920, $189,922,725; for the yea. 1951, $28,067,641; for the year 1922, $35,158,843; for the year 1923, $41,304.320 for 1924, $48,704,604, for 1925,$61,492,242

PRODUCTION DURING LAST TEN YEARS, $404,649,575

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been prospected; 200,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than of any other province in the Dominion, or any Colony in the British Empire. Mineral locations are granted the discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

N. B.—Practically all British Columbia Mineral Properties upon which development has been done are described in some one of the annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information. Reports covering each of the six Mineral Survey Districts are published separately, and are available on application.

STEWART BRANCH MINING INSTITUTE

Enthusiastic Meeting Led By Engineers and Metallurgists Organizes Local For This District

(Continued from Page 1)

Mr Peterson very aptly supported the other speakers, advocated that an immediate start be made on organization, and that the first meeting be called early in July, to be held in conjunction with a dinner at which a number of good papers would be given by technical men on mining and metallurgy, and that invitations to this dinner be sent to Alice Arm and Anyox. This suggestion was approved by the meeting, which appointed a committee of the present members of the Institute attending, to organize for it.

All three speakers were enthusiastic as to the mining progress being made by the district, its mineral resources and immediate future, which, coming from men of their experience and standing was most gratifying to all present. The meeting evoked an enthusiasm and optimism seldom before witnessed in Stewart

Application blanks are to be distributed shortly, it being the intention to place the new local aggressively on the map, in keeping with the great strides that the industry is making in the district. and the future that is now promising.

Road and Trail Work

As a result of the week-end visit of Provincial Chief Engineer of Bridges Carruthers, whose mission here was to go into bridge and road matters with W. A. Talbot, Public Works engineer for this district, it has been decided to materially widen and improve the road between Stewart and Hyder, complete the Marmot river road to the forks and the new cut-off between Bitter creek and Bear lake this season. Work on the two latter projects is now well under way. There will in addition be the usual amount of trail work in the district.

NOTICE TO ELECTRIC LIGHT CONSUMERS

In order to place Electric Power at the disposal of the household during the summer months at a reasonable rate, for small cooking and heating appliances, we beg to announce the following rates, for Bona-Fide Residences ONLY:—

15 cents per Kilowatt Hour for the first 15 Kilowatt Hours; all excess over that amount shall be charged for at the rate of 5 cents per Kilowatt Hour.

PAY CASH AND SAVE MONEY

Realizing that the cash customer should be encouraged and is entitled to consideration, we have decided to give the following

DISCOUNTS FOR CASH

10 Per Cent for SPOT CASH,
5 per cent if paid by the 4th of the following month
No discount allowed after the 4th of the month following purchase.

This does not refer to Mining Companies, who have a special arrangement with us, nor does it apply to Fire Insurance Premiums, or goods on which the price is set by the Manufacturer.

We take this opportunity of thanking our many friends and patrons for their liberal support and bespeak a continuance of same, which we shall at all times endeavor to merit.

Consider

If Dunwell in May, 1925, was worth $4.50, with very little cash in hand and practically no treasury stock, and capital of $350,000,—

What is Dunwell worth the present day, with $275,000 available for mill, tramway and development?

The present market on this stock is around $1.75 to $2.00.

This is the third time Dunwell has offered an opportunity in Canadian Mining Investments.

And further take notice that action, under section 85, must be commenced before the issuance of such Certificate of Improvements.

Dated this 15th day of March, A. D. 1926. 45

Local Stocks
(By H.W.M.Rolston & Co)

It is noticed that experienced mining investors are continually taking advantage of cheap offerings in mining stocks of merit in the Portland Canal district. This is most noticeable in Dunwell, Premier and B.C.Silver as investment stocks, and Marmot Metals as a mine in the earlier stages. In the case of the latter the stock is allowed to remain inactive, but on the slightest drop becomes in heavy demand. The report of the finding of a large ore body on the Marmot Metals is covered on the front page of this paper, but as usual to the management of the property, is very conservative.

Independence remained in very active demand during the week, and higher levels are looked for in this stock.

There are various reports that the L & L are changing control, though nothing authentic has been made public as yet.

The Indian situation remains unchanged, with little activity in the stock.

Little trading is being recorded in Lakeview, Porter Idaho and L & L.

The market closed as follows:

	Bid	Asked
B. C. Silver	$ 2.16	$ 2.22
Dunwell	I.85	2.00
Glacier Creek	.12	.15
Independence	.08½	.10
Indian	.04½	.05½
National Silver	.13	.16
Lakeview new issue	.02½	.04½
Premier	2.17	2.25
Terminus	.—	.25
Silver Crest	.12½	.15
L&L Glacier Creek	.10	.12½
Victoria Mines	.15	.25
Marmot Metals	.08½	.09½
Porter Idaho. Co.	.—	.08½
Rufus	.—	.12
Ore Mountain	.—	.25
Bay View	.—	.10

TENNIS CLUB HOLD ENJOYABLE DANCE

An excellent four-piece orchestra, the very best in the way of refreshments served by the lady members, a wonderful floor and decorations in keeping with the event, combined to make the Tennis Club dance in the Opera House last Wednesdry evening possibly the most enjoyable affair of its kind given in Stewart for a long time, and reflected great credit upon the committee.

MRS. L. LEARNS MILK

Mr. L. has bought a pleasure boat and the family has gone to live on it for the summer. They spend many days cruising about. Mrs. L. had an idea that she could not use canned milk but has learned to like Pacific so well that even when tied up in town she continues to cook everything with it.
