SAVE THE FORESTS

Canada's timber reserves are national assets of incalculable value. To neglect to take ordinary precautions which ensure them against destruction from forest fires is to rob civilization.

Quite apart from the danger to the lives, homes and property of settlers, every acre of forest burned means labor turned away, reduced markets for manufactured products, heavier taxation on other property, and higher lumber prices.

Passengers on trains should not throw lighted cigar or cigarette ends from car windows.

Those who go into the woods—hunters, fishermen, campers or canoeists—should consider it their duty to exercise every care to prevent loss from fire

SMALL FIRES SHOULD BE CAREFULLY EXTINGUISHED.
