A ST LAWRENCE RIVER SCENE A.C. Leighton.

RAILWAY TICKET OFFICE.

A Railway Ticket Office is located on board this steamship. The Ticket Agent in charge is at the disposal of passengers to furnish every assistance in connection with inland rail journey.

To facilitate landing arrangements at port of arrival it would be appreciated if passengers would kindly note the following information and call at the Ticket Office AS EARLY AS POSSIBLE during the voyage.

1. Orders issued in Europe and calling for railway transportation from port of landing or otherwise are not good on trains, but require to be exchanged at the ship's Ticket Office for actual railway tickets.
2. If passenger already holds railway ticket issued in Europe, attention is particularly directed to the necessity of having same stamped on back, in space provided, prior to arrival at port of landing, as train conductors are not authorised to honour any unstamped tickets.
3. Railway Tickets to all destinations in Canada and the United States may be purchased at the Ticket Office at special fares.
4. Reservation of sleeping or parlour car accommodation for railway journey should be made in advance by EARLY application to the ticket agent.

THE QUEBEC BRIDGE

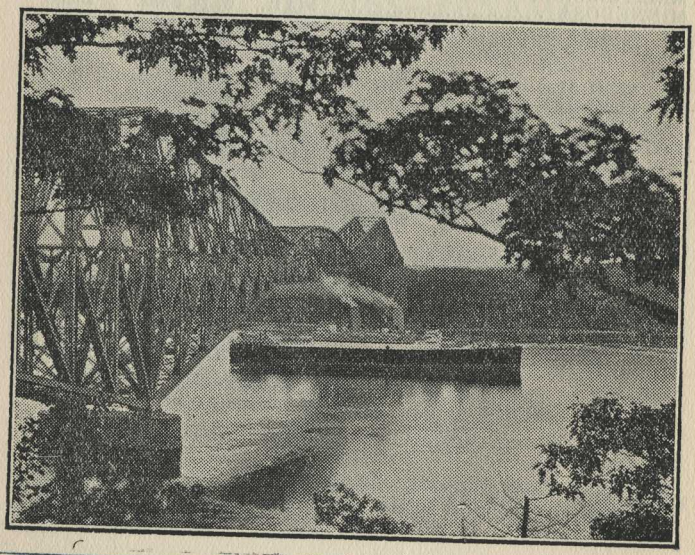
Shortly after leaving picturesque Quebec with its old world atmosphere Canadian Pacific Steamships to Montreal pass under the famous Quebec Bridge.

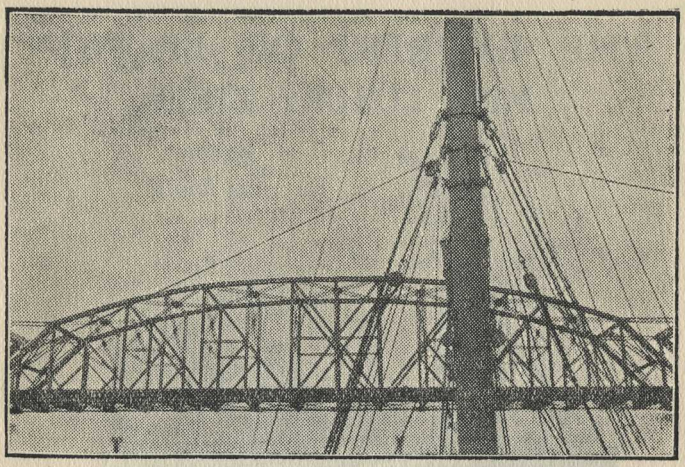
There could be no greater contrast of ancient and modern! For this great triumph of engineering skill—a greater triumph because of the way man fought and fought again until he conquered—is the personification of modernity. It represents the genius of modern brains as surely and as distinctively as the Citadel in the Ancient City reflects the engineering of a bygone day.

Building operations were first commenced in 1907 and the bridge carried its first load October 17th, 1917.

Some interesting facts about the bridge are :—

Span, 1,800 feet—100 feet longer than the Forth Bridge.
Suspended span, 640 feet.
Height above river, 150 feet.
Total length of bridge between approaches, 3,239 feet.
Total steel in suspended span, 5,510 tons.
Total steel in pins, 1,700 tons.
Total steel in whole bridge, 66,480 tons.





AN OPTICAL ILLUSION

Massive though the big bridge is, its spidery appearance when it is first sighted is deceptive. This deception of distance, however, is as nothing when compared with the sight that meets the eye as the bow of the ship, now cutting the merest of ripples in the smooth waters of the river, approaches the bridge and the formerly spidery beams and trusses take on a formidable appearance of mass and weight. Watched from the decks—even from the greater height of the ship's navigating bridge—the steel structure, because of its mass appears, as the ship gets closer and closer, to be hanging much lower than it actually is.

In fact, so great is the power of vision over the intelligence that although it is obvious to the mind that the ship will easily clear the lower stringers of the bridge, one cannot readily conceive how it is possible.

As a matter of fact even the Canadian Pacific vessels, which are the largest ships to pass under the bridge, have a clearance of from fifteen to twenty feet.

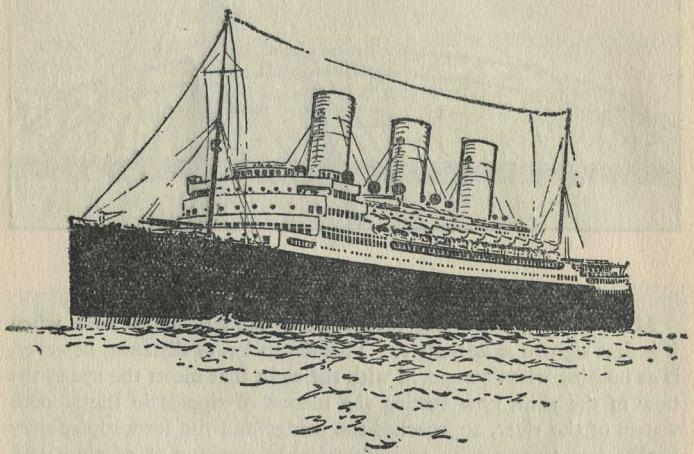
NEW LUXURY LINER

Tonnage 40,000
Speed .. .. 24 *knots*



The Canadian Pacific Steamships have in course of construction at Clydebank, near Glasgow, Scotland, a magnificent Steamship of 40,000 tons, which will be engaged in service between Quebec, Southampton and Cherbourg during 1931.

The new ship will have de luxe accommodation hitherto not available.

The ship is expected to make the Atlantic crossing in 5 days and will be named

The Mighty Water Boulevard to Canada

The Mighty Water Boulevard to Canada

The above is a vivid comparison of the size of Canada's Greatest Steamships and Canada's Greatest Hotel.

The Royal York, Toronto, is the largest in the British Empire. Over 1000 rooms with bath. How logical that Canadian Pacific should build it in Toronto . . . . mid-continent gathering-place of two great nations. Its entire second floor is dedicated to conventions . . . banquet hall, ballroom, and concert-hall, with one of the world's largest organs! Convention-seating for 4070.

MADELEINE DE VERCHERES

On the south shore of the St. Lawrence River, 21 miles from Montreal, lies the quaint old village of Vercheres. An old fort, close to the water's edge, and the statue of a young girl, animated in pose and gesture, recalls the heroic story of Madeleine de Vercheres, or, as she is otherwise known " The Heroine of Castle Dangerous."

In 1692 Madeleine, daughter of Seigneur Rochères, successfully defended the fort against an onslaught by fifty Iroquois Indians. The heroine's parents were at the time visiting Montreal. When the alarm came, the inmates of the fort—her brothers (two mere boys), a servant (an old man of eighty) and a number of women and children—were in a state of panic.

Madeleine, only fourteen years of age, at once took command. Taking a gun, she said to her brothers, " Let us fight to the death ! " The boys were born soldiers and, inspired by their daring sister, they made good use of the opportunity before them.

The Indians did not know how weak was the garrison of the fort. Every few minutes " All's well " rang out from fort to block-house. The Indians heard it and thought the fort must be full of watchful soldiers, so the attack was postponed until dawn.

For a week the siege continued. During that time Madeline took but hasty meals, and contented herself with brief intervals of sleep, sitting at a table with her head lying on her arms folded over her gun ready for action. Day after day the Iroquois camped in the woods till the garrison should be starved out, and whenever they attempted to approach the fort, the crack of a musket and the whiz of a bullet warned them to keep out of sight.

After seven days the splashing of paddles was heard in the St. Lawrence, and a hail in French told the besieged that help had come at last. Madeleine posted a sentry at the gate and walked down to the river. Saluting the officer in command, she said, " Sir, I resign my command." " Which could not have been more bravely held," was the reply; and the soldiers marched into the fort to relieve the worn-out defenders.

In Canadian history Madeleine will always be most famous as the "Heroine of Castle Dangerous."

DEPARTMENT OF COLONIZATION AND DEVELOPMENT

Passengers are recommended to avail themselves of our Colonization Agent who meets steamers. Consult him for information as to farm lands or opportunities in Canada.

The CANADIAN PACIFIC RAILWAY has established a Bureau of Canadian information as a branch of its Department of Colonization and Development with the object of disseminating reliable and up-to-date information as to agricultural and industrial openings in all parts of Canada.

WESTERN CANADA FARM LANDS

The Company has yet for sale several million acres of choice farm lands in Western Canada, at low prices and on long terms of payment. In certain districts land will be sold without settlement restrictions, but the Company is prepared to grant special concessions to those who will settle upon and develop their farms.

EASTERN CANADA FARM LANDS

Lists of selected improved farms, available for settlement in Ontario, Quebec and the Maritime Provinces with the names and addresses of their owners, may be obtained on application at any office of the Department.

INDUSTRIAL INVESTIGATION AND RESEARCH

Investigations, looking to the utilization of undeveloped natural resources and waste products and new industrial processes, are being carried on by the Research Section of the Department. Inquiries as to promising fields for investigation in this connection are invited.

INDUSTRIAL OPENINGS

Reliable information as to sites for new industries in all parts of Canada, and of special business openings in the growing towns and cities along the lines of the Canadian Pacific Railway in both Eastern and Western Canada, will be gladly furnished on request.

CANADIAN INTELLIGENCE SERVICE

Well equipped Canadian reference libraries have been established by the Department at Montreal, New York, Chicago and London, England. These libraries contain the fullest information on all matters relating to Canada and her undeveloped resources, and are kept supplied with the latest information pertaining to new developments through the medium of a news service organized through the co-operation of the other departments of the Company's service. The information on hand in these libraries is available without charge to those interested, and inquiries addressed to any office of the Department will receive prompt attention.

Further information and particulars can be obtained from the Department of Colonization and Development, Canadian Pacific Railway, which maintains offices at Windsor Street Station, Montreal, P.Q., Winnipeg, Man., Calgary, Alta., London, Eng.

INDUSTRIAL DEPARTMENT

Manufacturers, wholesalers and others who are thinking of opening branch factories in Canada to take care of Canadian and export business, can secure from this Department full information in connection with locations for new industries, warehouse sites with sidings, empty factories available, labour costs, electric power rates, etc. Interesting pamphlets on business and industrial opportunities in Western Canada will be forwarded on request. Industrial Department offices are maintained at Montreal, Toronto, Winnipeg, Vancouver and London, Eng.

TICKETING ARRANGEMENTS
TRAIN SERVICES

THE line of the Canadian Pacific Railway extends across Canada from Saint John, New Brunswick, on the Atlantic Ocean, to the City of Vancouver on the Pacific Ocean, and passengers are carried without change of cars from tidewater to tidewater. There is a frequent service of express trains to all parts.

TICKET OFFICES at important stations are open 30 minutes before departure of trains, and passengers are requested to purchase tickets before entering cars. Passengers should always procure tickets at regular railway ticket offices, and ask for them via the Canadian Pacific Railway.

CANADIAN Pacific Railway train services from Quebec and Montreal reach all important points in Canada, and connections are made for all points in the United States.

Time tables giving the schedules of all regular trains, and the equipment of the more important trains, may be obtained from Canadian Pacific Railway Ticket Agent on board.

The Ticket Agent on ship will exchange passage ticket orders, sell railway tickets to all destinations, and stamp all railway tickets issued in Europe, make reservations in sleeping cars, and when requested will prepare itinerary for rail journey and make arrangements with the shore staff to complete sleeping car and hotel reservations at desired stop-over points.

BAGGAGE AND CUSTOMS

CANADIAN Pacific Railway Baggage Agents, also Canadian and United States Customs Officers will be in attendance on arrival of the ship to arrange examination and checking of baggage through to rail destination.

On arrival of the ship and immediately after Government Immigration inspection, and tickets to inland destinations have been obtained, passengers must attend personally to the Customs examination of their baggage and arrange with the Railway Baggage Agents for its forwarding. The Baggage Agent will issue a check for each piece of baggage to be forwarded. Unless baggage is checked out by passengers it will be held at owner's risk until claimed.

U.S. Customs Officers are at Saint John, N.B., Quebec, Montreal, Ottawa, Toronto, London, Ont., Winnipeg, Man., Banff (during Summer) and Vancouver, B.C., stations to examine baggage destined for U.S. Passengers travelling to the U.S. via these points are recommended to have baggage inspected there and avoid examination at International Boundary. Baggage to U.S. not examined at above places must be inspected at International Boundary, otherwise it will be held by Customs. Passengers should attend **personally** to Customs Examination of baggage.

SPECIAL DELIVERY OF BAGGAGE

Passengers for Quebec, Montreal, Ottawa, Toronto, Hamilton, Winnipeg, Vancouver and Victoria, and the larger cities in the United States, may have their baggage checked through to any residence, hotel, steamship, dock or railway depot in such cities; this is a convenience. The transfer charge is collected by the Baggage Agent at the time of checking the baggage.

CHECKING OF BAGGAGE

must have passengers' personal attention. It will not go beyond the dock until it has been checked or registered by PASSENGERS.

The railway baggage agents will give numbered CHECKS to destination of BAGGAGE.

Baggage left unchecked on the dock will be at passenger's risk.

BAGGAGE INSURANCE

Passengers are recommended to insure their baggage, as the Company's liability is strictly limited in accordance with contract ticket. Baggage insurance can be arranged at any of the Company's offices or through the Purser on board.

CUSTOMS NOTICE TO PASSENGERS

CANADA

Residents of Canada are required to declare to the Customs Officer at port of landing in Canada all articles purchased or obtained abroad whether as gifts or otherwise. Failure to declare goods leaves same liable to seizure.

All goods, whether liable to duty or not, are required to be presented for Customs examination, and passengers are warned when in doubt as to whether or not an article is liable to duty, it should be produced for examination by the Customs Officer.

Tourists' Outfits—Temporary Admission—Persons visiting Canada for a limited period of time, for health or pleasure, may bring with them such articles of tourists' outfits or sportsmen's equipment as they may require while in Canada for their own use and not for gain or hire, upon reporting same to the Customs Officer at the Canadian frontier port of entry, subject to departmental regulations.

The Customs Officer may require all packages of baggage to be opened for his examination ; and responsibility for opening, unpacking and repacking the packages rests with the passenger or his agent.

Bribery—Any person giving, offering or promising any bribe, recompense, reward or tip to an Officer is liable to severe penalties.

Through Baggage—Passengers **en route** to destinations outside of Canada may have their checked baggage forwarded " In Bond " to a frontier port under Customs Manifest without examination of same by a Customs Officer.

Samples (such as carried by commercial travellers) are required to be delivered to the Customs Officer for entry purpose, and invoice or statement in detail showing the price—wholesale—of each sample as sold for home consumption. Such invoice or statement should be attested to by the traveller.

Settlers' Effects—Free, if actually in use for six months before removal to Canada, but are required to be produced upon landing to Customs Officer for examination and entry.

UNITED STATES

United States Customs Inspectors are located at Canadian Atlantic Ports; but they are not permitted to collect duties; therefore, in order to avoid complications and payment of duties to the Canadian Customs, citizens of the United States returning from Europe should pack all new goods purchased or otherwise acquired abroad in one or more receptacles which may be checked to destination and forwarded in bond.

All checked baggage not containing dutiable articles, or new goods in excess of the exemption to which the owners may be entitled, will be examined and passed by the United States Customs Inspectors, and will not be subject to re-examination at the United States frontier or at destination.

Baggage checked to destinations in the United States is not examined by the Canadian Customs.

Baggage carried by passengers by hand, which should not contain dutiable articles, will be examined by the Canadan Customs at the landing port, and by the United States Customs Inspectors on the train at the United States border.

Passengers destined to the United States will be issued by the Purser on the voyage a form of United States Customs Baggage Declaration, which must be completed in duplicate and presented to the United States Customs Inspector at the time of Customs examination. All values must be shown in United States currency.

Returning residents of the United States **must declare all articles acquired abroad,** in their baggage or on their persons, whether by purchase, by gift or otherwise, and **whether dutiable or free of duty.** Exemption, however, will be allowed by Customs Officers of articles aggregating not over $100 in value, if suitable for personal or household use or as souvenirs or curios, and whether intended for the personal use of the passengers or as gifts or presents to others, provided the articles are not bought on commission for another person nor intended for sale. **Articles so exempt from duty must, nevertheless, be declared.** Each member of the family is entitled to the exemption of $100 for articles purchased abroad, and when a husband and wife and minor and dependent children are travelling together the articles included within such exemption may be grouped and allowance made without regard to which member they belong.

Non-residents of the United States destined to that country must declare all articles in their baggage or on their persons which do not constitute wearing apparel, articles of personal adornment, toilet articles or similar personal effects, **whether intended for their personal use or for others.**

They must also declare all articles of wearing apparel, jewellery and other articles of personal adornment, toilet articles and similar effects **when not owned by them,** or when intended **for other persons or for sale.**

Professional books, implements, instruments and tools of trade, occupation or employment, in the actual possession of persons emigrating to the United States, owned and used by them abroad, are admitted free of duty.

DISTANCES VISIBLE AT SEA

At an elevation of 5 feet, one can see 2·6 nautical miles; at 20 feet, 5·1 miles; at 35 feet, 6·8 miles; at 50 feet, 8·2 miles; at 75 feet, 9·9 miles and at 100 feet, 11·5 miles.

DISTANCES MEASURED BY SOUND

If the steam from a ship's whistle is seen and ten seconds elapse before the sound is heard, she is just $2\frac{1}{10}$ miles off. If one second elapses, she is distant slightly more than one-fifth of a mile; if five seconds, a little more than 1 mile; if twenty seconds, $4\frac{1}{5}$ miles.

WATCH AS A COMPASS

Point the hour hand of the watch to the sun, and south is exactly half-way between the hour hand and the XII on the watch; e.g., assuming it is 9 o'clock, point the hour hand (indicating 9) to the sun, and the point half-way between X and XI is due south; or assume that it is 4 o'clock, point the hour hand to the sun and the figures II indicate south.

TONNAGE

There are three kinds of measurements of ships by tonnage—GROSS tonnage, NET tonnage and DISPLACEMENT tonnage.

GROSS tonnage is the total internal capacity below the upper deck, and also of all enclosed deck houses above it, measured in tons of 100 cubic feet. For example—2,500,000 cubic feet equal 25,000 Gross tons.

NET tonnage is obtained by subtracting from the GROSS tonnage all spaces used for the accommodation of the officers and crew, for gear necessary for the working of the ship, and for the machinery, including boilers and engines.

DISPLACEMENT tonnage is the total weight of water displaced by a ship when loaded to its utmost capacity.

KNOTS AND MILES

The statute mile is 5,280 feet.

The nautical mile is 6,082·66 feet. The number of feet in a nautical mile is arrived at thus: the circumference of the earth is divided into 360 degrees, each degree containing 60 nautical miles; or 21,600 (360 x 60) nautical miles to the earth's circumference; 21,600 divided into 131,385,456—the number of feet in the earth's circumference—gives 6,082·66 feet—the length of a nautical mile.

The "knot" is a rate of speed indicating one nautical mile per hour.

6 feet—1 fathom.
600 feet—1 cable.
10 cables—1 nautical mile.
1 nautical mile—1·15 statute mile.
