LOCAL LINES

Messrs Wm. Duncan and Rev. T. Menzies are at Victoria this week.

Harvey Creech is going to build and reside at Headquarters. Raise chickens and run his car for hire.

Messrs. Shepherd & Hornby are having a substantial addition built to their store which will make it nearly twice the present depth.

A number of loggers are arriving daily, en route for the logging camps which reopen next Monday. Among them are many familiar faces.

The steamer Cowichan did not make her regular trip to Comox on Tuesday morning. No reason has been assigned as yet that we have heard.

Messrs. Hicks Beach & Field, who are opening up the Real Estate office on the Union Bay road arrived in town on Thursday's boat.

The The plasterers on the Bank of Commerce building used an ingenious method to get water for plastering, they built a dam across the ditch, and piped the water unto the job.

Mr. T. D. Hind, the delegate to the Knights of Pythias Grand Lodge, which meets at Kamloops this year, left on Sunday's boat for that place. He is expected home tomorrow.

Mr. Fred Thulin, of Thulin Bros., Campbell River, has gone to his old home in Sweden. He left there twenty-five years ago, and this is his first visit to the homeland.

The opening dance at the Athletic hall on Denman Island was well attended by people from here and Comox. A delightful time was spent. There were 120 people in the Grand March. The people of Denman are to be congratulated on the possession of so fine a hall

Miss Blanchard wishes to announce that she has moved her dressmaking establishment into the Perez Block on Isabel Street, and is prepared to do all kinds of dressmaking and Ladies' tailoring, at reasonable prices. Fit and work guaranteed.

For Sale---Rhode Island Red eggs for hatching; new blood from the mainland. Bruce Towler, Cumberland Road.

To Rent—5 roomed house with basement, hot and cold water, modern conveniences. Apply J. R. Johnson. Courtenay Hotel.

For Sale—Good farm horse, strong working harness and wagon plough and harrows. Apply to John Johnston, Lake Trail, Courtenay, B. C.

T. D, Hind is closing out his Gent's Furnishings goods at 20 per cent off regular selling prices. Some of these lines are below manufacturers prices.

For Sale—Sixty-five acres in Happy Valley, will sell 20 or 45. Good first class soil, 500 fruit trees, 100 bearing. Good buildings. Apply box X Review office.

Do you want cordwood or poles cut with circular saw? If so call up Grimsley & Hodgkinson Telephone 36, or enquire B. C. Investments. Wood delivered $4 per load.

Cumberland Steam Laundry For Sale—Buildings, boiler, engine, and machinery and all utensils. Good business will be sold at a bargain. Can be seen at any time. Price $1250. Liberal terms.

Half Term commences June 2

Miss M. King - Principal

The gun club held a shoot on Monday. A good attendance of members was present and some fine shooting shown.

There was rather a small attendance at the Knights of Pythias dance last night. Those present thoroughly enjoyed themselves. The music, supplied by Mrs. Faber and W. Winningham, was superb. A dainty ice cream lunch was served at midnight.

Harvey Creech arrived home from Victoria last week with a fine car. While coming through Duncans he had the misfortune to get behind the oil wagon, which was oiling the highway. and got the body and wheels of his car badly splashed with oil and dust.

Mr, C. B. McAllister of New Westminster was in Courtenay Sunday and Monday. Mr. McAllister is president of the Grain Growers Association at New Westminster, and is looking over the District with a view of organizing a branch of the business in Courtenay.

Mr. G. P. Thompson, of the Royal Bank staff, spent the holiday in Vancouver.

The hotels and rooming houses are doing good business these days, all being filled up Thursday and Friday.

A special show will be put on at the Opera house to-night. The world's famous talking pictures and scenes depicting the Relief of Lucknow, The Battle of Trafalgar, and the Charge of the Light Brigade will be shown.

One of our much respected townsmen Mr. J. McPhee has purchased a Ford car and was seen driving it on Union St. last week, The astonishment of one of his old friends at seeing him coming down the hill at full speed was so great he nearly fell out of his buggy

For Baking Success —This Oven Test

Success on some baking days can be expected no matter what flour you use. But constant success is rarer. It can be assured in only one way. The miller must select his wheat by oven test.

So from each shipment of wheat we take ten pounds as a sample. We grind this into flour. Bread is baked from the flour.

If this bread is high in quality, large in quantity, we use the shipment from which it came. Otherwise we sell it.

Constant baking success comes as a matter of course from flour bearing this name

Build Concrete Barns and Barnyards

YOU will find that they are best at first and cheapest in the end.

Concrete buildings cannot burn and many dollars are saved in lower insurance rates. They need practically no repairs and never need painting.

Concrete barnyards make the best kind of a feeding-floor and save many dollars in feed bills, as your stock gets every particle that you feed to them.

Send for this free book "What the Farmer Can do With Concrete." It shows just how to build your own concrete barn, feeding-floor or any other building that you may need.

Smith (on steamer in midocean)—going across, old chap?

Brown—Yes. You?—New York Times.

Inspiration

"You can't write verse on some subjects. Now, for instance, what poetry is there in a pork chop?"

"I can see you've never been real hungry."

The Fixin's

A kindergarten teacher, after explaining to her much interested class that birds have feathers, bears have fur, sheep have wool, etc., asked the question: "Now, who can tell me what oysters have?"

A bright little girl, very eager to recite, answered: "Crackers."—National Monthly.

Meant "Who is That?"

Excitable party (at telephone)—Hello! Who is this? Who is this, I say?

Man at Other End—Haven't got time to guess riddles. Tell me yourself who you are.

With Dark Stage Mostly

Maud—Jack Slowboy has been calling on you regularly now for two years, hasn't he?

Marie—Yes; he evidently thinks papa is running a continuous performance house.

Proudly he walked up to his betrothed and drew from his pocket a small morocco case. Opening it, he took out a ring—a single diamond—and placed it on her tapering finger.

"It's a very small diamond!" she said, and paused. Then, "And not very brilliant, either."

"Ah, sweetheart, but love is blind."

Raising her limpid eyes to his, she said:

"Yes, dear, but not stone blind!"

Minard's Liniment Relieves Neuralgia.

A Boy Needs His Father

A prominent welfare worker recently summed up his experience and observation in the simple words: "A boy needs his father." The whole world knows that a girl needs her mother, but there seems to be some apathy on the question of a boy's constant need of his father. Comparatively few fathers appear to realize that providing food, shelter, clothes, good schooling and money for a boy is not a full discharge of the obligation a father owes to his son. A boy needs the encouragement, the inspiration and the comradeship of a father who hasn't forgotten that he himself was once a boy.—Los Angeles Tribune.

Time Has Tested it.—Dr. Thomas' Eclectric Oil has been on the market upwards of thirty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. It has no equal in the whole list of liniments. If it were double the price it would be a cheap liniment.

Firewood

Cutting firewood in summer, when it can be done much easier and cheaper in winter, is a waste of valuable time. First clean up old logs, rails, broken boards, etc., around the buildings. Perhaps somewhere on the farm there are two fields that could profitably be made into one, and the old rail fence between them converted into good posts or into fuel. In the wood lot there may be dead or fallen trees that should be removed and made into firewood before the live trees are touched.—J. F., in Conservation.

Nora was applying for a place as cook, and when asked for a reference presented the following:

"To whom it may concern:

"This is to certify that Nora Cole has worked for us a week and we are satisfied."—Everybody's Magazine.

REPLENISH YOUR BLOOD IN THE SPRING

Just now you are feeling "out of sorts"—not your usual self. Quite exhausted at times and cannot devote real energy to your work. Sleep does not rest you and you wake up feeling "all tired out." Perhaps rheumatism is flying through your muscles and joints, or may be your skin is disfigured by rashes, boils or pimples. Headaches, twinges of neuralgia, fits of nervousness, irritability of temper and a disordered stomach often increase your discomfort in the spring.

The cause—winter has left its mark on you. These troubles are signs that your blood is poor and watery, that your nerves are exhausted. You must renew and enrich your blood at once and restore tone to your tired nerves, or there may be complete breakdown. The most powerful remedy for these spring ailments in men, women and children is Dr. Williams' Pink Pills for Pale People, because these pills cleanse the bad blood and strengthen weak nerves.

New, rich, red blood—your greatest need in spring—is plentifully created by Dr. Williams' Pink Pills, and with this new, pure blood in your veins you quickly regain health and increase your strength. Then your skin becomes clear, your eyes bright, your nerves strong and you feel better, eat better, sleep better, and are able to do your work.

Begin your spring tonic treatment today for the blood and nerves with Dr. Williams' Pink Pills—the Pills that strengthen.

These Pills are sold by most dealers, but do not be persuaded to take "something just the same." If you can't get the genuine Pills from your dealer they will be sent you by mail, post paid, at 50 cents a box or six boxes for $2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Restoring Rubber

Articles of rubber frequently lose their elasticity through oxidation and yet the material may be restored to its original condition by a simple process. Soak the article in a mixture of one part of ammonia to two parts pure water.

This is said to be particularly well adapted to the restoring of rubber bands, rings and small tubings which are ready to become dry and brittle.

To Cure a Cold in One Day

Take LAXATIVE BROMO QUININE Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

The Albanian Flag

The new Albanian flag has made its first appearance in Vienna. The eagle, the principal heraldic emblem of the Albanian arms, does not appear on the flag, which differs from the prince's banner in consisting of longitudinal stripes of red and black and red and white, with a five pointed star in the middle.

Attacked by Asthma.—The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

"Now," said the new husband, "I am your captain, and you must let me command you through life."

"You have a dual capacity," replied the clever widow, "because you are my captain and my second mate in one."

COUNT TEN! BAD COLD RELIEVED FIGURE THREE HOURS---COLD CURED

Never a Failure With Catarrhozone; it Cures Completely

Don't sniffle and sneeze with a nasty cold. Kill it at once by "Catarrhozone." It's the surest thing on colds ever known; simply knocks them out in one time. The medicated vapor of CATARRHOZONE spreads through all parts of the breathing organs, and it's beneficial action is felt instantly. Doesn't matter whether the cold is in the head, chest or lungs, Catarrhozone will reach it and cure it quickly.

Easy to use—you bet it is—not a single drug to take because you simply breathe in the most healing and soothing of pine vapors that come from the wonderful Catarrhozone inhaler.

"I can cheerfully testify that Catarrhozone is simply a magical cure for colds," writes F. F. Clement of Augusta. "For days last winter my head was completely filled up with cold. My eyes ran water. I sneezed and coughed constantly. I took many medicines. I was sick of the sight of them. Finally, I tried Catarrhozone. Its effect was magical. It soothed the inflamed membranes, stopped the sneezing, and cured in no time. I never met anything to kill a cold like Catarrhozone."

Get the complete $1.00 outfit; it does the work quick. Small size 50c; trial sample size 25c. All dealers everywhere

PLAN TO BUILD A WESTERN EMPIRE

A SCHEME TO FURTHER COLONIZE WESTERN CANADA AND DEVELOP ALL RESOURCES

Suggested That the Advertising of Western Canada be Centred in One Organization, Having as its Slogan "Ten Million For Western Canada in the Next Ten Years."

Arrangements are being completed for a convention in the city of North Battleford, to which there is being invited representativts of the Dominion government, the governments of the various provinces, from the various railway companies, the cities and towns and in addition, all those who are interested in the promulgation of and carrying out of this scheme, which is to build an empire with a population of 10,000,000 people at least, and the accomplishment of that end in ten years. This colonization convention will be a most interesting meeting and the outcome will be awaited with interest by one and all. The North Battleford board of trade has issued an announcement in reference to this convention as follows:

Western Canada must have a population of 10,000,000 people within the next ten years. This, and the way to accomplish it, is interesting news, and the very adoption of such a slogan as 10,000,000 in ten years is a splendid goal to aim for.

Providing the men and women of Western Canada will devote their attention and energies towards a comprehensive and united scheme for the establishment of an empire, with a population of 10,000,000 people, bounded on the east by the great lakes and the Hudson Bay ports, and on the west by the Pacific ocean with its splendid harbors, and keeping in mind continuously the opening of the Panama canal, it will be accomplished.

We have all the facilities at our disposal for the building of the grandest empire which either ancient or modern history has ever known. The opportunities are waiting at our hands. It remains for us to go in and possess the land. True, this would seem to have been the burden of our efforts for some years, but as all growth brings with its new phases, involves new conditions, presents new ideas, it would seem that the time is at hand when we should set ourselves to the accomplishment of even a greater era of development than has gone by in the last 25 years. Heretofore, we have been laying the foundation, constructing railways, building harbors, and bringing into the country merely an advance guard of colonization. The day of the pioneer is past, and the pioneer has done his work well. We have now entered upon ten years of nation building.

Method of Scheme

For the building of this empire—the creation of a population of 10,000,000 in Western Canada in ten years—it is suggested that there be formed the Western Canada Colonization and Development League, whose purpose shall be the keeping before the public of the world the many advantages, resources and possibilities of Western Canada as a whole. Up to the present, Western Canada has been advertised largely by the railways, each of which gave prominence to the development of the area with success of their lines or proposed lines. Every city has been advertising its own attractions. The governments of the various provinces have been advertising their own province, and thousands of individuals have been advertising their individual attractions. It is now suggested that the advertising of Western Canada be centred in one organization.

It is recognized that many of the sources of advertising and development referred to would desire to continue to a certain extent their own advertising, for the direct benefit of the specific areas which they controlled, or were interested in, but it is believed that one and all of these organizations and individuals will readily recognize advantages which will accrue through their devoting a portion of their present advertising appropriations to the achievement of this great end. There would also be advantages in impressing upon the peoples of the world "Western Canada." Let them once become attracted to the west, then let them take their choice as to where they settle. As a matter of fact, with 10,000,000 people in the country, it will make very little difference where they locate.

Customs Ports and Outports

The following outports of custom and warehousing ports have just been enacted by order-in-council. Edson, Alberta, under the survey of Edmonton; Wainwright, Alberta, under the survey of Edmonton; Newport, B.C., under the survey of Vancouver. The customs outport of Medicine Hat has been established as a customs port, as has also the outport of Prince Albert.

Canada's Water Power

Canada's water power is estimated at 16,000,000 horsepower, equal to an annual production of 36,700,000 tons of coal; only 1,016,521 horsepower has been developed.

FEWER RECRUITS FOR ARMY

Continued Activity in Trade and Emigration Have Affected Scheme of Recruiting

The annual report on recruiting for the British army for the year ending September 30, 1913, published as a parliamentary paper, shows that the number of recruits who joined the regular army, excluding re-enlistments, and colonial corps recruits, was 28,091, a decrease of 2,225 as compared with the previous year, while the figures for the special reserve were 18,454, a decrease of 2,937.

The general results, it is observed, have been disappointing. Whilst the recent increased competition by the royal navy, and the facilities for obtaining work provided by the government Labor exchange, have had an adverse effect, the poor results achieved are attributed mainly to continued activity in trade and emigration. 178,468 male British subjects emigrated from the United Kingdom during 1913, and, though probably only a small proportion were men who would have enlisted, yet the report declares the men who emigrate in most cases leave vacancies in the field of employment at home to be filled, perhaps, by one who in other circumstances would have entered the army.

Whilst of late there have been signs of slackening in Canada's appetite for unskilled laborers, it is discouraging from a recruiting point of view to note that Australia has inaugurated a scheme offering special facilities for immigration of lads between 16 and 20, the very ages between which the majority of recruits now join the special reserve and the regular army.

WESTERN CANADA NEWS

"That none but British subjects and ratepayers be employed on city work until further notice, preference being given to married men; efficiency to be conceded in the interest of the city.' This is a copy of a resolution passed by the Vancouver city council recently.

* * *

The ratepayers of Calgary are shortly to vote on the erection of three bridges, the expenditure for which will total $512,000. The individual bridges will cost: Centre street, across Bow, $330,000, plus $45,000 for Sunnyside approach; Ninth street west, across Bow, $60,000; Fourth street west, across Elbow, $77,600.

* * *

Winnipeg has appointed a traffic inspector for the city in the person of R. P. Lewis, who will in future devote all of his time to the improvement of the street railway system in that city. Although the system is owned by a private company, the city is of the opinion that efficient supervision will pay for the new department out of the five per cent. profit which goes to the city from the street railway revenues.

* * *

At Winnipeg an inspector from the city engineer's department will in future be in charge of the moving of houses and other buildings across car lines and will see that the work of replacing the wires is properly done. All expenses in connection with the work done, including a fee for the inspector's time, will be charged to the contractor.

* * *

Vancouver is to have the largest telescope in the world this summer, the Dominion government having decided to erect this instrument at the Meteorological observatory, Point Grey. The new instrument will have a focal length of fifty feet and the diameter of the lens 10 feet—20 inches larger than the one at Mount Wilson, California, which is 100 inches in diameter.

* * *

An enterprising real estate and shipping firm in Vancouver has secured a large model of the Panama canal which is being used for advertising purposes. It shows clearly the famous Gatun lock and the system of lighthouses along the canal zone.

CIGARETTE CURE

Dozen or More Toronto Ladies Trying to Get Rid of Habit

A dozen or more Toronto ladies are taking the cigarette cure which is being administered by doctors who are associated with the Boys' Dominion. They do not take the treatment at the branches of the institution, where the boy smokers are attended to, but go to the residences of the medical attendants.

All the lady patients are reported as good, self-respecting, respectable women, although they smoke and they all sincerely desire to get rid of the habit. They are of good position and character and some are well known in society. In only a very small degree are the patients girls, most of the number being wives and mothers. Originally there were merely one or two, but recommendations of the success met with has caused a daily increase.

Flour Export to Germany

Canada's exports of flour to Germany have more than doubled during the past six years. For the year ended March 31, 1913, the export amounted to $4,478,043 barrels, with a value of nearly $20,000,000. In 1908 the amount was 1,962,340 barrels, valued at $8,454,954.

HOW TO SECURE SETTLERS IS PROBLEM

RESTRICTIONS PLACED ON IMMIGRATION FROM EUROPE BY AUTHORITIES

J. S. Dennis Says There is Only One Field Now Altogether Free, and That Majority of Settlers Will Come to Canada This Year From United States.

J. F. Dennis, head of the natural resources department of the C.P.R., addressed a large gathering of business men at a smoker given by the board of trade at Lethbridge recently. He referred to the wonderful development of the west in the forty-two years of his experience of it, when Winnipeg had only 1,100 people, and the district between that post and Victoria, was known on the map as the American desert.

Urban development, however, had been far in advance of agricultural development. This brought the people of the west to face resulting conditions. The "hot-air" period had passed, and the problem to be solved at the present time was that of agricultural development for laying permanently, the foundation of the Western Canada to be as optimists looked forward to it. The solution of this problem had developed a new policy with the C.P.R. Up to two years ago they were merely sellers of land. Now they were colonizers, in that no land was sold without an obligation that residence should be taken up and agricultural operations undertaken. How to get the people was the problem.

Difficulties in Europe

In the British Isles there was small opportunity for obtaining the desired agricultural immigration. In Europe the policy was handicapped in that, to get the class of immigrants, the company had to meet with restrictions by the authorities. Holland, Denmark and Belgium were practically the only countries open. In Germany and Austria an immigration policy was made impossible. In Norway it was limited, and in Sweden prohibited. The company had, therefore, in fact only the field of the United States entirely available.

Mr. Dennis dwelt on the importance of irrigated lands and the necessity for individual effort in preventing any of the wrong impression which carried against them. It was difficult to obtain immigrants from irrigated areas and 60 per cent. of the farmers, who came over from the United States knew nothing about irrigated areas.

Encourage Mixed Farming

The speaker urged the necessity on boards of trade of enlisting the sympathy and working with the farmers as the only means for the desired development. To encourage mixed farming was the solution of the agricultural problem, and to this end the C.P.R. in its ready-made farm policy extended purchase payments to twenty years and advanced $1,000 worth of live stock to those who intended going in for extensive farming. He looked to little agricultural immigration from the British Isles this year. Though immigration would not be diminished he thought the bulk would arrive from the United States.

TRAIN LOAD OF COAL DAILY

That Was the Lethbridge Record for 1913, According to Correct Figures

In the year 1913, the province of Alberta produced 4,306,346 tons of coal. Lethbridge, including the district within one hundred miles of this city, produced 3,300,000 tons, or 66 per cent. of the total output of the province.

Allowing forty tons to the car, the output of tht Crow's Nest Pass for the year in carloads, was 70,000 or 1,400 trainloads, allowing 2,000 tons to each train. Lethbridge alone provides tonnage for 372 trains each year, on the 1913 basis of production.

The total number of men employed in the coal mines of Alberta was 8,068 and of thi number, the mines in the Pass including Lethbridge and Taber, employed 4,368, or 54.2 per cent. of the total. Of the total of 2,815,455 tons mined in the district, the Pass mines produced 1,774,796 tons; Lethbridge, 746,452 tons; Taber, 206,459 tons; Pincher Creek, 77,005 tons; Bow Island 12,095 tons, and Milk River 2,499 tons.

Many Homestead Entries

It appears there has been a rush of business at the Weyburn Dominion lands office during the last eight months, during which period the revenue has amounted to $75,752, or an average of more than $9,000 per month. The cost of operation has been $450 per month, or 5 per cent. of the receipts. The eight months show that 356 homestead entries have been made in the Weyburn district, and that fees for 142 pre-emptions have been paid in.

School Population of Quebec

Quebec province is full of children. This year, according to government figures, 370,200 children attended the Catholic schools and 52,400 the Protestant schools. There are no "public" schools so called in that province. A school registration of 422,615 out of a total population of 2,000,000 seems to be pretty fair.—Canadian Courier.

AFTER 22 YEARS

Rev. Pere Edouard Gouy Reaches Edmonton After Voluntary Exile Among Indians

"It seems good to be in civilization once more, after twenty-two years of voluntary exile among the Indians of the north," The speaker was the Rev. Pere Edouard Gouy, father superior of St. Isodore mission at Fort Smith, who arrived in Edmonton by rail from Athabasca, after being away from the city for nearly a quarter of a century.

In the flowing black robes of the Oblate fathers, a large jet cross and bronze crucifix tucked in his girdle, a heavy untrimmed dark beard beginning to show white streaks of grey, but with the healthy tan of the north on his face, Father Guoy presents a striking figure.

Sees His First Auto

"I saw at Athabasca an auto for the first time," said Father Gouy. "Such things were not dreamed of when, as a young man of 25, I left for the north to work among the Indians. Edmonton was then but a village. Of course I have kept track of its growth through the newspapers, although we received papers only during the summer, by canoes winter mail carriers by dog teams confining themselves to letters."

Is Going to France

Father Gouy will rest in Edmonton a few days, and then after a short trip to St. Albert for the purpose of visiting Bishop Legal, he will start for Nantes, France, where he will visit his aged parents. Before his return he will go to Rome for an audience with Pope Pius, and expects to arrive again in Edmonton next September, when he will go once more to Fort Smith, perhaps to spend the rest of his life in his self-sacrificing labor for the education and the uplifting of the Indians.

Soo Locks Busier Than Panama

No less than 72 million tons of freight passed through the locks of Sault Ste. Marie, on the Great Lakes last year. These locks, which connect Lake Superior with the lower lakes are now a feature of our inland navigation system, for through them passes nearly 75 per cent. of the entire lake traffic.

To increase the facilities for handling the traffic on the American side, a lock of exceptional size is under construction, as an addition to the two existing locks, while excavation has been commenced for a fourth lock.

The traffic to be handled is enormous, and navigation is stopped by ice for or about four months each year (ordinarily from Dec. 15 to April 15). Consequently, it is of the utmost importance to handle the vessels promptly and enable them to make as many trips as possible during the navigation season.

In 1905, congress authorized the widening of the canal, while in 1907 an appropriation was made for the construction of a third lock with an independent canal. The canal widening was completed in 1911, and the new lock and canal are expected to be in operation at the beginning of navigation in 1915, or possible earlier.

It was subsequently consiered desirable to duplicate the traffic capacity as to provide against interruption to traffic in the event of any accident at the third lock. This duplication is a feature of the locks on the Panama canal, where the traffic will be much less in volume than at "the Soo." The additional lock was authorized by congress in 1912, and work is now in progress on the excavation. With all this work completed, there will be the unique spectacle of two parallel and adjacent canals with four parallel single-lift locks.—Engineering News.

West's First Flax Factory

The appalling waste of valuable flax fibre each year is emphasized in the statement that, in 1914, the flax fields of the west have produced over two million tons of flax straw, representing four hundred thousand tons of fibre, and that all of this wealth of raw material is now in ashes and scattered to the four corners of those broad western plains.

There is, however, one little spot on the plains where flax straw is not regarded as rubbish, to be burned and got rid of as soon as the harvest is over. Away southwest of Saskatoon, on the Goose Lake branch of the Canadian Northern, at the bright little town of Rosetown, flax straw is being used for purposes of manufacture in the first flax factory to be established anywhere in Western Canada.—Norman Lambert in Industrial Canada.

Medal For Bravery

R. S. McKenzie, Indian agent, Kenora, after considerable delay and correspondence, is in receipt, through the department of Indian affairs at Ottawa, of a bronze medal, beautifully engraved, awarded by the Royal Canadian Humane association, to Alexander Mandamin, a pupil of the Cecilia Jeffray boarding school, aged 16 years, for his heroic act in the rescue of Charles E. Aitkin from drowning in Shoal lake in December, 1913. This medal will be presented to Alex Mandamin in a suitable manner by Mr. McKenzie in due time.

Provide Home for Lepers

The late Lord Strathcona by a codicil to his will left $25,000 to John Burns to provide a home for lepers in the United Kingdom.

PRISON REFORMS ARE ADVOCATED

PRISONERS COST COUNTRY ONE DOLLAR PER DAY IN EXCESS OF EARNINGS

Parole Officer Archibald Makes a Plea For Prison Labor—Impossible to Expect Good Results From a Man Who is Held at a Stone Pile

The annual report of the inspectors of penitentiaries for the fiscal year ending March 31st, 1913, was recently laid on the table of the house of commons at Ottawa, and contains a large number of interesting facts and figures. There were 1,970 convicts in custody at the end of the fiscal year, of whom 984 were Canadian born. The cost per capita ranged from $328.24 in Kingston to $700.58 in Saskatchewan, Alberta being $420.46.

"The fact," reports Inspectors Douglas Stewart and W. S. Hughes, "that each man sentenced to hard labor costs the country a dollar per day in excess of his earnings seems to require explanation." As remedies, they suggest (1) That the penitentiaries be administered by the minister through his responsible officers, and free from local or other external interference; and (2) that the government utilize the obligatory labor of its wards in supplying as far as possible, its own needs and requirements such as articles required for the various departments of the government.

445 Prisoners Paroled

Parole Officer Archibald reports that during the fiscal year 445 prisoners were released on parole from penitentiaries and 470 from the provincial jails. The number of cancellations for non-compliance with the condition of license was 32, or three per cent., and the number of forfeitures for subsequent conviction was 45, or 4.9 per cent.

Mr. Archibald makes a plea for prison labor. "The penitentiary," he says, "surely should be a place to qualify and fit men for usefulness in life, even if they have gone astray and this cannot be accomplished until a more sane and humanitarian system is inaugurated. It is impossible to expect good results from a man who is held at a stone pile or kept at menial abor all through his sentence."

Warden McCaulay's Report

Warden McCaulay in his annual report of the Alberta penitentiary, refers to the completion of the warden's house, the wing cell block and the foundation for the workshops, and says the brick yard has supplied all the brick necessary for the buildings. The farm supplied all the vegetables for the institution, and the coal mine furnished all the coal.

Dr. A. Forin, surgeon of the penitentiary, and the Protestant and Catholic chaplains, Rev. Dr. McQueen and Father J. A. Cullette, also submitted reports.

GEN. GREELY'S BIRTHDAY

Former Arctic Explorer 70 Years Old, Celebrated Birthday Recently

As vigorous and active as many of half his age, Major-General Adolphus Greely, famous as a soldier and Arctic explorer, has reached the seventieth milestone of his life's journey. Since his retirement from active service six years ago General Greely has made his residence in Washington, D.C. Much of his time, however, has been spent in the study of aviation, military affairs and geography and kindred sciences.

More than thirty years ago General Greely attracted world-wide attention by a polar expedition, of which he was the chief. The expedition sailed northward in 1881. It contained 25 members, of whom only seven came back. Two relief expeditions failed to find the Greely party, and when finally rescued by the third expedition, sent under command of Capt. Winfield Scott Schley, the survivors of the party were nearly crazed with hunger.

Canadian Import Trade

The apparent indifference of British manufacturing firms toward the Canadian import trade, has prompted the Canadian Chamber of Commerce in London to establish a British manufacturers' section. Nearly a hundred firms, among them some of the most prominent in England, have joined the section, and it has been decided to take collective action immediately, for a trade campaign to capture the greater proportion of import trade in the Dominion of manufactured goods. Another matter that will receive early attention will be the Canadian transportation problems, taking into consideration the freight position as it will exist consequent upon the working of the Panama canal.

New Demonstration Farm

One hundred and thirteen acres will be set apart by the Southern Alberta Land Company for a demonstration farm on their new tract which is about to be opened up. The farm in question will be located 113 miles east of Bow river at Ronolane and will be in charge of an experienced irrigationist from Colorado.

Alfalfa and other field crops will be grown on the farm, of which a large portion has already been broken and leveled in preparation to receive water.

New Real Estate Firm

Messrs. Hicks Beach & Field moved into their handsome new building on Isobel street last week. They have also installed a large safe with a number of safety deposit boxes for rent, which should prove of value to the people hereabouts.

The Omineca Herald of New Hazelton in its last issue has the following to say in connection with their departure from that place.

"When the train pulled out last Sunday morning it took away some of the best and oldest residents from the old town. E. H. Hicks Beach, Mrs. Hicks Beach and family and Fred Field have gone to Courtenay, Vancouver Island, where they will open a Real Estate and Insurance office. Mr. Hicks Beach and family have been residents of the old town for many years and they were always considered among the first families of the district. In all matters pertaining to the public welfare they were leaders and in social and public circles they will be greatly missed. At the same time the best wishes of the community will follow them to their new homes.

Fred Field is one of the best known and best liked young men of the northern interior. He first went to Hazelton as a small boy with Rev. and Mrs. Field and with the exception of the time he was in England at school he spent practically all his life in Hazelton. He will be missed quite as much as his partner Mr, Hicks Beach."

Messrs. Hicks Beach and Field have erected a handsome two storey office building at Courtenay. It is modern in every respect and has all the latest conveniences. As a firm they will start in business with the very best reputation possible to have their success is assured as the country grows and develops.

Thos. Aitken has arrived back from Portland where he has been attending the dental college.

Chief Engineer Bambridge and other C. P. R. officials were in Courtenay on Friday inspecting the new station building. They expressed satisfaction at the way the work is progressing.

Work on Athletic Grounds

Men and teams are busy at work on the sports grounds, recently acquired by the Athletic Club. The grounds are being ploughed and graded and will be be seeded down after the ground has settled. A good job is being made, and when completed the grounds will be a decided asset to the town.

A. W. Lee, Dominion Express route agent, is in town inspecting the local office to-day.

J. W. McKenzie jr. had the misfortune to cut a guide in his wrist whilst doing a little amateur cobbling on Sunday last. Stick to your own trade, Johnnie.

Mr. W. G. Robertson, who has successfully managed Peacey's drug store for the past ten months, has purchased the business. Since coming to Courtenay Mr. Robertson has made many business and social friends who will join with the Review in wishing him luck in his venture.

Some Comox Indians celebrated Empire Day on Tuesday in their usual manner, if they get a chance but being a day late their patriotism did not appeal to Constable Hannay, who was called to the reserve to help in the celebration. Tom George and George Mitchell were each fined $2 and costs by Wesley Willard, J. P. whilst Tom Jones, an Ontario Indian, who is accused of supplying the liquor is remanded for further enquiries.

Empire Day in Courtenay and District

Empire Day was celebrated on Monday in Courtenay and District in a fitting manner. The day was variable but fortunately the rain kept away. In Courtenay flags were flying from all the principal Government buildings etc., whilst the shipping at the wharves displayed bunting of all colors, (Oh, wake up Ed. this is not 1924.) Excuse me.

Empire Day has been conceded to Cumberland in the district, and right well did she do herself. Over 30 events were on the sports program for the day, and these furnished great interest for the large numbers of spectators who thronged the grounds.

The baseball games were a surprise, the Japanese team winning from Cumberland, Union Bay and Bevan, Courtenay won the 5 a side football match.

What was the matter with our Courtenay boys, they were not represented in the other events, it is time we had an Athletic Club to make our men come out. Joe Davis of Comox won the old man's race and also came second in the open quarter, going some for a man 69 years of age.

A large crowd availed themselves of the kindness of the Colliery Company, and left by the special train from the Riverside platform in the morning and returned in good spirits about 10 p. m. after spending an enjoyable day.

The West Cumberland Conservative Band rendered some fine music during the day, and looked very well in their new uniforms. The Cumberland Gleemen gave an open air concert and after that the Symphony Orchestra supplied the music for the enjoyable dance which took place after.

Taken altogether the Cumberland committee are to be congratulated on the splendid program they put on and the admirable way all arrangements were carried out.

Opening Shoot of the Gun Club

The opening shoot of the newly formed Courtenay Gun Club took place on Thursday afternoon, a good number of members and spectators being present. The trap took a few hours to fix, the professional and amateur mechanics having some little difficulty in getting the correct adjustment which is rather intricate. At 5 p. m. the signal was given to let her go and the shooting commenced. Some fair shooting took place and there is no doubt that with the material in hand the Club will be able to render a good account of themselves. The trap once going worked well.

POLICE COURT

On Thursday afternoon at the Police Court House C. E. London of Comox, was taken before Wesley Willard, J. P. and charged with carrying a gun without a license. Information was laid by Game Warden Dawley that accused was shooting pigeons to which charge London pleaded guilty. He was fined $5 and costs.

COMOX

I had the pleasure the other day while in Comox, of attending a meeting of the Salt Barrel Club, in their room on Main Street. It was a special session of the club, two able speakers being present to address the audience. The chair, which consisted of a chees box, was ably filled by Cyril Piercy, who after making a few remarks as to the nature of the meeting, hoped the audience would keep good order and give both speakers a fair hearing as they were both going to talk on the general topics of the day. The first speaker was a resident of Happy Valley, but formerly of that tight little island called Hengland, on the other side of the herring pond. He spoke with an English accent, and was togged out with the regulation suit, consisting of a Tom and Jerry coat, and buckskin breeches, and when he mounted the platform he resembled a pugilist who had run out of a job, but he had his subject well in hand, and handled it to his own satisfaction. He sailed into the Borden Government, denouncing it as the rottenest government Canada was cursed with. Then he sailed into the Dick McBride Government—that it is run by a gang of grafters and crooks and blacklegs and eggsuckers, and Dick McBride is robbing the poor man, and making the rich man richer. He said this country is getting filled with English dukes and lords, and soon the poor man will be taxed to help to keep them. He thinks they should have a parliament at Dublin. He thinks by what little he has heard about Ireland that the natives are a smart people and quite capable to govern themselves. He said he was not quite sure where Ireland is located, but as far as he can find out, it is in the south of France. Mr. LaForest was the next speaker and was in fine form. He is an able platform speaker, and as he is a fine robust looking man, and being very neatly attired, he got a great reception, and after taking a fresh chew of Black Watch he got down to business. He sailed into the first speaker and knocked every plank out of his platform. He said it was all rot about the Borden Government. He said it was the best government Canada ever had, and any galoot who is not satisfied with it should get out. He said he can lick any man who throws dirt at such a government, and that the people have prospered under it. He knew some of the natives in Comox who used to subsist on mush and milk for breakfast; milk and mush for dinner; and both for supper, but since the present government have been in power, they have buckwheat pancakes three times every day, except Sunday. Then he made a few remarks about the McBride Government. What the other speaker said was just like what he would expect from a man who had no more brains than a toad has feathers. He said there is a great chance at Nob Hill for all English lords and dukes who want to locate there; that they can find work with the farmers, and will not be a burden on the ratepayers. Then he proceeded to refute charges of the other speaker, that Ireland is not treated right, and went on to explain that Ireland has more freedom than any other place, except Comox, and he thinks the speaker from Happy Valley should go home and put his head to soak and not come to Comox and make a public exhibition of his ignorance. He then concluded his address, amid great applause.

Summer Boat Schedule

Tuesday, Cowichan arrives at 8.15, leaves at 11, Charmer arrives at 6, leaves at 7.15 Wednesday morning.

Thursday, Charmer arrives at 6, leaves at 7 15 Friday morning.

Sautrday, Charmer arrives at 7 p. m., leaves at 11. p. m.

Sunday, Cowichan arrives at 8.15 a. m., leaves at 4 p. m.

Some time ago the Saskatchewan Government enacted a law forbidding white women to be employed by orientals. Two Regina Chinamen carried an appeal to the Privy Council and were defeated.

HEADQUARTERS

New arrivals are reported daily.

On Monday work began in the machine shop, and the cheery whistle now informs the inhabitants of Headquarters, when to eat, as it used to do.

Mr. and Mrs. Pietela have returned.

On Monday, Empire Day, a party numbering about eight or ten people joined the Cumberland train at Courtenay, and spent a most enjopable day among the revellers at Cumberland. A train was sent down to fetch them in the evening.

Many familiar faces are seen among those coming to work at the Logging Camp, among them Mr. Gerald Fagen. It is expected that many more men will arrive by every boat this week.

Facts and Fancies

On the Courtenay River drifts a stubborn
motor boat,
And Smith an angry man is he when he
cannot make the shore,
He cusses softly to himself and tries the
blooming air,
And wonders why it did not burst before
he got so far.

The carbureter seems to be the cause of
all his woe;
He tightens half a dozen bolts, but still
it dosen't go,
And then he tries the steering gear, but
finds no trouble there—
Till wet with prespiration, then, he
quits in sheer despair.

He squats beside the engine to give his
brain a chance to cool,
And ponders on his training at the cor-
respondence school;
And then he starts the job once more,
until by chance 'tis see
The cause of all his trouble is—he's out
of gasoline.

Honors For A Cumberland Miner

Hon. Dr, Young, in his capacity as Provincial secretary, on Thursday received a communication from the Imperial Government, notifying him that it had been determined to bestow the Edward medal of the second class upon Mr, Robert Henderson, of Cumberland The recipitent of this coveted honor for some years was employed in the coal mines of South Africa. On January 11, 1913, while employed at the Hatting Spruit Colliery, Natal, a serious "gob" fire started in one of the workings. A number of native "boys" were overcome by poisonous gases, and Mr. Henderson and another, at the imminent risk of their own lives, effected a heroic rescue. It is intended that the presentation of the medal to Mr. Henderson shall be made in a public manner.

Running A Paper

It's lots of fun to run a paper,
As you're aware by now,
For any one can cut the caper
Who has a bulging brow,
A pen and ink, some type and presses,
Fresh items gathered near and far,
A mailing list with good addresses,
An office boy, and there you are.

If Mrs. Jones should have a pension
For wearing last year's hat
You mustn't make a single mention
Of anything like that.
But if her daughter has a steady
As soft and sweet as mush,
For their engagement date make ready
With several yards of gush.

Keep all the politicians guessing
And living in the air
By very cautiously expressing
Opinions here and there,
And when one thinks he has you going
And safely on his side
That's where you make a careless showing
To prove his guess is wide.

And as for profits, never mind it.
The dollar is a fickle friend.
You may and then you may not find it,
But what's the difference in the end?
You miss the fun and get the worry,
Forget the weak and pet the strong,
If you are always in a hurry
To see the profits come along.

Notice—All letters intended for publication, and copy for changes of ads must reach this offiice by Monday evening.

NOTICE TO CONTRACTORS

GRANTHAM SCHOOL.

SEALED TENDERS, superscribed "Tender for Grantham School," will be received by the Hon. the Minister of Public Works up to noon of Wednesday, the 27th day of May, 1914, for the erection and completion of a small one-room school-house at Grantham, in the Comox Electoral District.

Plans, specifications, contract, and forms of tender may be seen on and after the 11th day of May, 1914, at the office of Mr. J. Baird, Government Agent, Cumberland; Mr. M. B. Ball, Secertary of the School Board, Sandwick; and the Department of Public Works, Victoria.

By application to the undersigned, contractors can obtain one copy of plans and specifications for the sum of ten dollars ($10), which will be refunded on their return in good order.

Each proposal must be accompanied by an accepted bank cheque or certificate of deposit on a chartered bank of Canada, made payable to the Hon. the Minister of Public works, for a sum equal to 10 per cent. of tender, which shall be forfeited if the party tendering decline to enter into contract when called upon to do so, or if he fail to complete the work contracted for. The cheques or certificates of deposit of unsuccessful tenderers will be returned to them upon the execution of the contract.

Tenders will not be considered unless made out on the forms supplied, signed with the actual signature of the tenderer, and enclosed in the envelopes furnished.

The lowest or any tender not necessarily accepted.

J. E. GRIFFITH,
Deputy Minister and
Public Works Engineer,
Department of Public Works,
Victoria, B. C., May 8th, 1914. my14

Letters to the Editor

Editor Review.

Dear Sir:— As there is a lot of Hospital talk just now, the present seems an opportune time to direct attention to some of the advantages the Sister's Hospital at Comox has in its location over the proposed one at Courtenay.

Those who visited there last Thursday could not but be impressed with the superior advantages of the place as a hospital site.

In the first place, it is high and dry, commanding a view of the Bay, Islands and Gulf, and is open to the bracing and stimulating sea breezes, one of natures great healers.

It is away from the foul odor of decaying salmon which pervades Courtenay for three months of the year. It will also be away from the bustle, noise and dust which will attend the advent of the train service to Courtenay, and still be within easy reach of Courtenay, Cumberland and the camps.

All thoughtful and unbiased persons will agree that it would be better to have one thoroughly equipped and efficent Hospital than two partly so, there is not sufficent population to support two, and the natural consequences would be two half supported and half efficent institutions.

In the matter of Government assistance it would be quite simple for the Government to pay so much per patient treated there, as they do in other places.

This course would be much less expensive for the Government than attempting to build, equip and maintain one themselves.

However, if there must be one at Courtenay, why not in the interests of suffering humanity, try to get these ladies to close their place here and locate in Courtenay, that our efforts and support may be concentrated in one institution, so that those who may have to be treated there, possibly members of our own families, may have the very best that experience and money can provide.

Yours respectfully,
Comox.

Editor Courtenay Review

Dear Sir:—I was pleased to find on opening this weeks issue of the Review, that Mr. Anderton had been before me in taking exception to Mr. Cameron's remarks, anent the class of patients received by the hospitals of this Province under the management of denominational societies. There is accordingly, nothing more to be said on this point, but I hope I may trespass on your space in order to corroborate another point that Mr. Anderton has touched upon, by means of a few facts of which Mr. Cameron seems entirely unaware.

If that gentleman will turn up the B. C. Public Accounts for the year ending March 31. 1913, (a free Government publicatio 1) he will find on page C79, a list of the hospitals of the Province in receipt of the "per capita" grant, A large proportion of these hospitals, though by no means denominational as such, are nevertheless under the direct manageament of denominational societies. Some of them obiviously so by reason of their titles, such as the Sacred Heart at Greenwood. and the St. Eugene at Cranbrook, and are in all probability Roman Cathclics. St. Bartholomew's at Lytton, is I believe Anglican and under the direction of Archdeacon Pugh. well known to many residents of our district.

Nearer home the Columbia Coast Mission carries on a useful work at Vananda, Rock Bay and Alert Bay, and is I fancy a Nonconformist undertaking

One connot be surprised in view of these facts that the Sisters at Comox, as Mr. Anderton announces no doubt with all authority, should take advantage of the grants provided under the Hospital Acts.

It is clear therefore, that the Provincial Government is equable enough to grant equal rights to its citizens, without regard to denomination, and it is not too much to expect the like from a fair minded locality.

With regard to the site for a hospital destined to provide not only for the needs of Courtenay itself, but for a wide district by no means sparsely settled, of which Comox and Little River cannot be considered negligible factors, I should not care to lightly venture an opinion.

Other considerations apart, the natural advantage of the situation the Sisters have chosen must come very near the ideal, and while it is not altogether surprising that the townspeople should desire to have the institution in their midst, they may well console themselves with the immeasurably superior advantage the district now enjoys over what has hitherto existed.

In conclusion, I have no doubt that Mr. Cameron as I myself, as well as the whole committee of local men, should any of us have the misfortune to fall a victim to one of "the thousand natural shocks" will gladly take advantage of the kindness and ability (to use Mr. Cameron's own expression) of the worthy Sisters of Comox.

With all apoiogies, dear Mr. Editor for this serious claim on your indulgence.

I am yours truly
A Resident of the District.

BUYERS APPRECIATE FORD GOOD SERVICE

It Makes Owners Feel Like They Are Part Of A Big Family

"While in London, Ontario, recently," said G. M. McGregor, general manager of the Ford Motor Company of Canada Limited' "I met personally a number of Ford owners, as is my custom when on business trips, and was delighted to find that our efforts to give good service through our branches and dealers, were highly commended. One owner, in expressing his satisfaction, emphasized the very feature that we have been endeavoring to make the cardinal principal of our service, the idea that each owner is a unit of the whole. He expressed himsels something after this fashion:

" 'I am impressed with Ford service, because after experiencing it for four years, I feel as though I were a part—a real part—of the Ford family. It it not as though I were dealing with an individual dealer, more or less a stranger to me and to his own factory. The attention the branch here gives to my needs, as well as that received from outside when touring, has always been executed with such a willing spirit that I feel as if we were all brothers in one big family.

There is a spirit of camaraderie that is extremely gratifying. To be a Ford owner is like being in a fraternity, or some excluive society and without this family feeling I know your service could not be as efficient. It certainly is pleasing to know that any time you wish you can roll up to your dealer and be received as cordially as though you were a new prospect, no matter what your wants may be.' "

"That is the style of service we are aiming to give all along the line, and we are doing our utmost to see that our intentions are being carried out. Promises and intentions are one thing, however: fulfillment quite another. The owner is the only one in a position to pass judgment accurately, and his opinion is worth considerably more than all the service talk a factory executive or a dealer can hand out. He is the fellow who can tell you how quickly his repair part was filled and whether or not the man who overhauled his car did a good job.

And that is the reason why I considered the remarks of my friend in London so gratifying and so important. He is in a position to know, and he proves that sometimes service ideals are actually realized."

The Nichi Nichi, an influential Japanese newspaper, of Tokyo says:

"The Japanese must prepare to stand alone and face the white race in battle. The Japanese must also inform other Asiatics of the fearlul consequences of prejudice and of the unrighteous attitude of the white man. Asia must be prepared to co-operate with Japan for the common defence.

Letter to the Editor

Courtenay Review

Dear Sir:—One hears nowadays so much of the Incorporation of Courtenay, emanating mostly from, shall I say, with your permission Mr. Editor, a number of those who have their axes to grind. On the other hand there is quite a bunch of sharp headed business men who do not favor Incorporation, men who have spent their all in building up Courtenay Hamlet to what she is today, men who have large interests in the welfare of this place, conditions of living and lighting their own places; others who have lived the greatest part of their lives in the District, improving their farms and getting same to as near a state of perfection as is possible; men who have the knowledge that this Hamlet requires most of all, water. The latter have spent time and money for the last 12 months to secure for the town water, to be bucked time after time by the above named. Now, Mr, Editor, it strikes me very forcibly, that to incorporate a small hamlet such as Courtenay is today would be the height of madness, insomuch and as far as I am able to understand it is necessary for an incorporated city to be self supporting.

It is not my intention to enter largely upon the pros and cons of Incorporation, but I should certainly like to draw a comparison not between Courtenay Hamlet and Incorporated Cumberland, or Incorporated Alberni, but between Incorporated Courtenay and those who are interested in Agriculture and the District as producers.

Perhaps it has never come to your notice, how we in this beautiful Agricultural Valley (considered to be the first on the Island) are so dependent upon outside help. One sees it on all sides, if they keep their eyes open, how we largely depend upon the outside world for most things that sustain life. One sees onions and butter from New Zealand and Australia, radishes, lettuce and cabbage from California, hay and oats and general feed are being shipped almost every two or three months into this splendid agricultural district. Canned goods salmon, beef, jam, vegetables, etc. all come to us from an outside source. Money to buy and sell and gamble in Real Estate is kindly sought and secured on the strength of the great value of the land (from a productive point) in this splendid agricultural valley, from English and other suckers.

Mow, Mr. Editor, if this so called and much boosted agricultural valley, endowed with the best of climates, and finest of soils to produce all these articles enumerated above, has to depend upon the outside world for its main supplies of food for horse and man, it is not self supporting.

How can 6, 7, or 8, hundred people on the suggested Incorporation area, expect to support this Hamlet of Courtenay as an Incorporated city? No, Mr, Editor, it won't work. It is like Monkey Braud Soap, won't wash clothes.

Let those interested in Agriculture introduce modern methods, improve their farms and produce—not buy in. Let those who are interested in Real Estate instead of waiting for suckers from England, turn their thoughts and energies to securing money for this Hamlet for the production of something from the raw material, waiting for development, and so increase the payroll and find employment for many men who would work.

Let these Grafters, Squatters on Real Estate, Buckers of Electric Light Works, or anything for the welfare of Courtenay, be confined to our new lock-up, until such times that they fail in line and like the naughty boy, promise to be good.

Let all the hard headed, shrewd business men meet and discuss the ways and means of making a self supporting city. Let the buckers of everything be firmly excluded, and when we have fixed everything down to a business footing, let us one and all, Produce, Produce, Produce.

Then Mr. Editor, we should be in a position to Incorporate, being self supporting. But, oh dear, no, not as we are today, depending upon the outside for all but unmanufactured lumber, coal, and a few spuds and a little butter. I almost forgot canned milk. (How the cows in this district are going to produce sufficient milk to make both butter and canned milk, I am at a loss to know,) but I should put my money on the canned milk even if the pigs are to have shorts and water.

I am, Dear Sir,
Yours faithfully
Chas. Cook

Wolverine Swims the Straits

Some Comox Indians whilst proceeding from Cape Mudge to Campbell River last week, sighted an annimal swimming in the water. They rowed over and despatched it with their oars and pulled it into the boat. On their arrival at Comox they threw it out on the beach, and allowed it to stay for several days, where it speedily decomposed. Their chagrin at finding from Game Warden Dawley that the annimal was a wolverine and very scarce and valuable, can be imagined. Constable Hannay captured the brush.

Cattle Maiming at Courtenay

A cattle maiming outrage took place at Robt. England's, Lake Trail road, early on Friday morning. Constable Hannay was called to the scene and found a valuable cow with all four legs cut above the hocks. No trace of the author of this can be found as the ground was very hard at the time, but the police are working on the case and it is hoped the perpetrators will be brought to justice.

Gerald Fagan was one of the old timers who has come back to work in the Camps again. We are pleased to welcome him because seeing him contradicts the rumor that he had flown to Ulster to help to fight Home Rule.

THE WINDOW AT THE WHITE CAT

By Mary Roberts Rinehart

(Copyright)

(Continued)

She watched me suspiciously while I straightened the nails she had bent and lifted the boards. The article that had smashed under the vigor of Miss Letitia's seventy years had been a teapot of some very beautiful ware. I have called just now from my study to ask what sort of ware it was, and the lady who sets me right says it was crown Derby. Then there were rows of cups and saucers and heterogeneous articles in the same material that the women folk seemed to understand. At the last, when the excitement seemed over, they found a toast rack in a lower corner of the box, and the "Ohs!" and "Ahs!" had to be done all over again.

There was not the slightest clew to the sender; but, while Miss Letitia rated Heppie loudly in the kitchen and Bella swept up the hall, Margery voiced the same idea that had occurred to me.

"If—if Aunt Jane were all right," she said tremulously, "it would be just the sort of thing she loves to do."

"I'm not pretending to know what took Jane Maitland away from this house in the middle of the night," said Miss Letitia. "She was a good bit of a fool, Jane was. She never grew up. But if I know Jane Maitland, she will come back and be buried with her people if it's only to put Mary's husband out of the end of the lot. And another thing, Knox, I told you the last time you were here that I hadn't been robbed of any of my pearls, after all. Half of those pearls were Jane's, and she had a perfect right to take forty-nine of them if she wanted. She—she told me she was going to take some, and it slipped my mind."

I believe it was the first lie she had ever told in her hard, conscientious old life. Was she right? I wondered. Had Miss Jane taken the pearls, and if she had, why?

CHAPTER XVIII.

Wardrop's Story

Wardrop got back about 5, and as Miss Letitia was in the middle of a diatribe against white undergarments for colored children Margery and he had a half hour alone together. I had known, of course, that it must come, but under the circumstances, with my whole future existence at stake, I was vague as to whether it was colored undergraments on white orphans or the other way round.

When I got away at last I found Bella waiting for me in the hall. Her eyes were red with crying, and she had a crumpled newspaper in her hand. She broke down when she tried to speak, but I got the newspaper from her, and she pointed with one work-hardened finger to a column on the first page. It was the announcement of Mrs. Butler's tragic accident and the mystery that surrounded it. There was no mention of Schwartz.

Bella told me that she had lived with Mrs. Butler since she was sixteen and had only left when the husband's suicide had broken up the home. I could get nothing else out of her, but gradually Bella's share in the mystery was coming to light.

Wardrop was looking better that afternoon than he had when I saw him before, but the news of Mrs. Butler's approaching death and the manner of her injury affected him strangely. He had seen the paper, like Bella, and he turned on me almost fiercely when I entered the library. Margery was at the window.

"Is she conscious?" Wardrop asked eagerly, indicating the article in the paper.

"No, not now; at least, it is not likely."

He looked relieved. Then he paced the room nervously. His next action showed the development of a resolution, for he pushed forward two chairs for Margery and myself.

"Sit down, both of you," he directed. "I've got a lot to say and I want you both to listen. When Margery has heard the whole story she probably will despise me for the rest of her life. I can't help it. I've got to tell all I know, and it isn't so much after all. You didn't fool me yesterday, Knox. I knew what that doctor was after. But he couldn't make me tell who killed Mr. Fleming, because, before God, I didn't know.

"I have to go back to the night Miss Jane disappeared—and that's another thing that has driven me desperate. Will you tell me why I should be suspected of having a hand in that when she had been a mother to me? If she is dead she can't exonerate me; if she is living and we find her she will tell you what I tell you—that I know nothing of the whole terrible business."

"I am quite certain of that, Wardrop," I interposed. "Besides, I think I have got to the bottom of that mystery."

Margery looked at me quickly, but I shook my head. It was too early to tell my suspicions.

"The things that looked black against me were bad enough, but they had nothing to do with Miss Jane. I will have to go back to before the night she went away, back to the time Mr. Butler was the state treasurer and your father, Margery, was his cashier.

"Butler was not a business man. He let too much responsibility lie with his subordinates, and then, according to the story, he couldn't do much anyhow against Schwartz. The cashier was entirely under machine control, and Butler was neglected. You remember, Knox, the crash when three banks, rotten to the core, went under and it was found a large amount of state money had gone, too? It was Fleming who did it. I am sorry, Margery, but this is no time to mince words. It was Fleming who deposited the money in the wrecked banks, knowing what would happen. When the crash came Butler's sureties to save themselves confiscated every dollar he had in the world. Butler went to the penitentiary for six months on some minor count, and when he got out, after writing to Fleming and Schwartz protesting his innocence and asking for enough out of the fortune they had robbed him of to support his wife, he killed himself at the White Cat."

Margery was very pale, but quiet. She sat with her fingers locked in her lap and her eyes on Wardrop.

"It was a bad business," Wardrop went on wearily. "Fleming moved into Butler's place as treasurer and took Lightfoot as his cashier. That kept the lid on. Once or twice when there was an unexpected call for funds the treasury was almost empty, and Schwartz carried things over himself. I went to Plattsburg as Mr. Fleming's private secretary when he became treasurer, and from the first I knew things were even worse than the average state government.

"Schwartz and Fleming had to hold together. They hated each other, and the feeling was trebled when Fleming married Schwartz's divorced wife."

Margery looked at me with startled, incredulous eyes. What she must have seen confirmed Wardrop's words, and she leaned back in her chair limp and unnerved. But she heard and comprehended every word Wardrop was saying.

"The woman was a very ordinary person, but it seems Schwartz cared for her, and he tried to stab Mr. Fleming shortly after the marriage. About a year ago Mr. Fleming said another attempt had been made on his life with poison. Things were not going well at the treasury. Schwartz and his crowd were making demands that were hard to supply and behind all that Fleming was afraid to go out alone at night. He employed a man to protect him, a man named Carter, who had been a bartender in Plattsburg. When things began to happen here in Manchester he took happen to the home as a butler.

"Then the Borough bank got shaky. If it went down there would be an ugly scandal, and Fleming would go, too. His notes for half a million were there, without security, and he dared not show the cancelled notes he had with Schwartz's endorsement.

"I'm too proud of the rest of the story, Margery." He stood looking down at her. "I was engaged to marry a girl who was everything on earth to me, and—I was private secretary to the state treasurer, with the princely salary of such a position.

"Mr. Fleming came back here when the Borough bank threatened failure and tried to get money enough to tide over the trouble. A half million would have done it, but he couldn't get it. He was in Butler's position exactly, only he was guilty and Butler was innocent. He raised a little money here, and I went to Plattsburg with securities and letters. It isn't necessary to go over the things I suffered there. I brought back $110,000 in a package in my Russian leather bag. And—I had something else."

(To be Continued)

ECZEMA STARTED IN A RASH

Suffered Terribly. From Eyebrows Spread to Neck, Chest and Arms. Completely Cured by Cuticura Soap and Ointment.

Briercrest, Sask. — "When my baby boy was about four months old he suffered terribly from eczema. The trouble started in a rash and was very itchy. It made him very cross and fretful. I noticed the rash first in his eye-brows. From there it spread to his neck, chest and arms. When he would scratch, it would make sores.

"I got medicine but it did no good. I tried different remedies without result. At last I got a sample of Cuticura Soap and Ointment and after using them for two days I noticed a change. I then purchased a full-sized cake of Cuticura Soap and Cuticura Ointment. I would give him a hot bath with the Cuticura Soap every night afterward applying the Cuticura Ointment. Before I had used half of the Cuticura Soap and Ointment he was completely cured." (Signed) Mrs. H. L. Stromberg, May 29, 1913.

The regular use of Cuticura Soap for toilet and bath not only tends to preserve, purify and beautify the skin, scalp, hair and hands, but assists in preventing inflammation, irritation and clogging of the pores, the common cause of pimples, blackheads, redness and roughness, yellow, oily, mothy and other unwholesome conditions of the skin. Cuticura Soap and Ointment are sold by druggists and dealers everywhere. For a liberal free sample of each, with 32-p. book, send post-card to Potter Drug & Chem. Corp., Dept. D, Boston, U. S. A.

Take Hall's Family Pills for constipation.

Did Not Believe In Banks

Gold and notes to the value of $65,000 were found in the house of an elderly maiden lady who died the other day in an unpretentious dwelling in the east end of Glasgow.

The old lady had lived on a very simple plan. She was friendly with her neighbors, but never gave an indication that she was any wealthier than others in the same neighborhood, who were all of the working class.

Some of the money was found in an old-fashioned purse, but there was no miserly effort at hiding the money, which was scattered about in different parts of the house. She had often declared that she did not believe in banks.

The Test

Nurse—Well, doctor, must we give him up?

Doctor—Not until he can't sign a cheque.

EAGER TO WORK

Health Regained by Right Food

The average healthy man or woman is usually eager to be busy at some useful task or employment.

But let dyspepsia or indigestion get hold of one, and all endeavor becomes a burden. A woman writes:

"A year ago, after recovering from an operation, my stomach and nerves began to give me much trouble.

"At times my appetite was voracious, but when indulged, indigestion followed. Other times I had no appetite whatever. The food I took did not nourish me and I grew weaker than ever.

"I lost interest in everything and wanted to be alone. I had always had good nerves, but now the merest trifle would upset me and bring on a violent headache. Walking across the room was an effort and prescribed exercise was out of the question.

"I had seen Grape-Nuts advertised, but did not believe what I read, at the time. At last, when it seemed as if I were literally starving, I began to eat Grape-Nuts.

"I had not been able to work for a year, but now after two months on Grape-Nuts I am eager to be at work again. My stomach gives me no trouble now, my nerves are steady as ever, and interest in life and ambition have come back with the return to health."

Name given by Canadian Postum Co., Windsor, Ont. Read "The Road to Wellville." in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Oil Field in Pacific Ocean

Unique among the oil fields of the world is the Summerland group of wells in California, which extend out into the Pacific ocean. There are 141 producing wells in this group, which is situated about eighteen miles from Santa Barbara. These wells are drilled out in the ocean just off the coast and 100,000 barrels are taken from the oil sands underlying the ocean bed every year. This interesting spectacle of derricks built out into the sea is visible from the train on the way from Los Angeles to San Francisco.—Engineering and Mining Journal.

Practical

"Yes, my friend, I was about to marry the countess when I suddenly learned that she spent more than $12,000 a year on her dress-maker."

"Then what did you do?"

"Married the dressmaker."

A Safe Pill for Suffering Women.—The secluded life of women which permits of little healthful exercise, is a fruitful cause of derangements of the stomach and liver and is accountable for the pains and lassitude that so many of them experience. Parmelee's Vegetable Pills will correct irregularities of the digestive organs and restore health and vigor. The most delicate woman can use them with safety, because their action, while effective, is mild and soothing.

Seed Is Their Currency

An ancient system of banking is still in active and successful operation in Southern Italy. This is that of the monti frumentari, or grain storage warehouses. In these are stored large quantities of seed, which is given out to farmers upon demand without payment. After the harvest the farmers return to the warehouse the amount of seed they have received, plus interest in seed. Thus do the farmers become established agriculturists without the necessity of borrowing money.

Piles Cured in 6 to 14 Days

Druggists refund money if PAZO OINTMENT fails to cure Itching, Blind, Bleeding or Protruding Piles. First application gives relief. 50c.

Biggest Windmill Has Steel Sails

It is reported that a wind motor claimed to be the largest of its kind in the world, has lately been broought into use at Harlingen (Friesland) for a polder (tract of lowland redeemed from the sea by high embankments) with an area of 1,850 acres. This machine, which has steel sails and is mounted on a steel tower, has a diameter of 50 feet, and is said to be capable of dealing with 64,000 to 70,000 cubic feet of water an hour. It is an interesting fact that first the wooden wind mills were replaced by explosion motors, but now again, the steel wind motors are said to be the more and more employed, especially in the draining of "polders."

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Beans Instead of Beef

The chief chemist of the department of agriculture, Washington, sends out a message to housewives about the high cost of living. It is authoritative and cheering. "The prospect need not larm the average salaried worker," he says, speaking of the cost of beef. "There are good substitutes for meat, and the one at the head of the list is beans."

Minard's Liniment for sale everywhere.

Home-Grown Rugs

Two beautiful fur rugs were on the floor, of a pale fawn color, and suggestive of doe skins. But, as it proved they were not from the woods, they were from the farm, and had originally been on the backs of some very pretty Jersey calves. When in the course of events the calf had no further use for his coat, it was sent to be properly tanned, then it was lined and laid upon the floor.

New Varsity Building

At a meeting of the board of governors of the University of Saskatchewan at Saskatoon the plans for the new residence building which, when completed, will cost $250,000, were approved.

A WONDERFUL DISCOVERY

An eminent scientist, the other day, gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a wound or a sore, such injury is insured against blood poison! Not one species of microbe has been found that Zam-Buk does not kill!

Then again. As soon as Zam-Buk is applied to a sore, or a cut, or to skin disease, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.

Again. As soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new healthy tissue is quickly formed. This forming of fresh healthy tissue *from below* is Zam-Buk's secret of healing. The tissue thus formed is worked up to the surface and literally casts off the diseased tissue above it. This is why Zam-Buk cures are permanent.

Only the other day Mr. Marsh, of 101 Delorimier Ave., Montreal, called upon the Zam-Buk Co. and told them that for over twenty-five years he had been a martyr to eczema. His hands were at one time so covered with sores that he had to sleep in gloves. Four years ago Zam-Buk was introduced to him, and in a few months it cured him. To-day—over three years after his cure of a disease he had for twenty-five years—he is still cured, and has had no trace of any return of the eczema!

All druggists sell Zam-Buk at 50c. box, or we will send free trial box if you send this advertisement and a 1c. stamp (to pay return postage). Address Zam-Buk Co., Toronto.

Russian Biplane Largest Ever

An aeroplane so large and powerful that the first accounts of its size and performance were disbelieved by the experts, has been making a series of flights in the vicinity of St. Petersburg, Russia. Its upper plane has a span of 88½ feet and a surface of 1,400 square feet, while the total weight of the aeroplane is 6,600 pounds. It is capable of carrying besides its crew and ten passengers, enough fuel for a flight of 20 hours, and an additional load of 1,760 pounds. Four 100 horsepower motors which drive four propellors, furnish the motive power.

A young German who wished to be enlisted in the navy, but was unable to speak English, was being coached by an officer. "Look here, Mike, when the inspector comes to you he will ask you how old you are. And you must say twenty-seven years; 2-7 y-e-a-r-s. Then he will ask you how long you have been in the service. And you tell him three months; three m-o-n-t-h-s.

"His next question will be 'Are you provided wit' food and clothing?' And you must say both. B-o-t-h."

The following week the inspector came and walking up to the German said: "Good morning, friend, and how long have you been in the service?" "Twenty-seven years," was the answer. "Well, that's funny; I never saw you before. How old are you?" "Three months," replied the German. "Say, what do you think I am, a lunatic or a fool?" "Both," boldly answered the German.—National Food Magazine.

Corns and warts disappear when treated with Holloway's Corn Cure without leaving a scar.

Daniel Webster was once sued by his butcher for a bill of long standing. Before the suit was settled he met the butcher on the street and, to the man's great embarrassment, stopped to ask why he had ceased sending around his order.

"Why, Mr. Webster," said the tradesman, "I do not think you would want to deal with me when I brought suit against you."

"Tut, tut!" said Webster, "Sue me all you wish, but for heaven's sake don't try to starve me to death!"

NERVOUS ENERGY IS LIMITED

There is only so much energy in the human body. A few people have an abundance, but more have not enough. Hence the necessity of conserving vitality.

If wasted by mode of living, disease or worry there must be a reckoning, and trouble is sure to come. It may be headaches and weak, aching eyes; it may be nervous indigestion; or it may be merely lack of energy and ambition, and feelings of fatigue or helplessness. Of course, sooner or later exhaustion of the nerves leads to prostration, paralysis or locomotor ataxia, but there is no need to let the trouble develop that far.

By using Dr. Chase's Nerve Food you can restore to the feeble, wasted nerve cells the energy they have lost. It will take some effort on your part to give up worry and anxiety, but you should realize your serious condition. Rest and use this great food cure and you are bound to improve in health and vigor.

Down in Texas, "before the war," an Episcopal missionary living out on the plains was aroused one night by a likely looking negro man and maid, who asked the preacher to marry them.

The missionary's wife and a guest were impressed to act as witnesses, and the ceremony began and proceeded as usual until that part or portion of the service where the groom was asked if he took this woman "for better or for worse."

At this question the groom replied loudly: "Nossuh! I takes her for to cook and for wash."—Judge.

"Does your father object to kissing?"

"I don't know. Shall I tell him that you would like to kiss him?"—Houston Post.

The post office department has issued notice declaring that the transmission of coin or bank notes in unregistered letters is prohibited.

A Prolific Hymn Writer

Miss Fanny Crosby, the blind hymn writer, was 94 years old on March 24 last. It is said that she has written 7,000 hymns, the best known being: "Jesus Keep Me Near the Cross" and "Safe in the Arms of Jesus." If count has been kept carefully, Miss Crosby must have written two hymns a week since she was able to write at all.

QUICK CURE FOR HIS RHEUMATISM

ROBERT J PYLE FOUND IT IN DODD'S KIDNEY PILLS

He Suffered for a Year, but His Return to Health Was Quick and His Cure Complete.

Bourg Louis Que.—(Special).—How quickly Dodd's Kidney Pills will cure rheumatism and other forms of Kidney Disease when taken in the early stages is shown in the case of Mr. Robert J. Pyle, a well known farmer living near here.

In an interview Mr. Pyle says:—"Working in cold, wet weather was the cause of my trouble, and for about a year I had occasional cramps in the muscles and stiffness in the joints. I was often dizzy and felt depressed and low spirited. I was nervous and my skin itched and burned at night.

"When Rheumatism was finally added to my ills I decided to try Dodd's Kidney Pills. One box cured me completely and I had no return of my trouble."

Dodd's Kidney Pills cured Mr. Pyle's Rheumatism because it was caused by sick Kidneys. Dodd's Kidney Pills always cure sick Kidneys. If you have any two of Mr. Pyle's symptoms, you have sick Kidneys and you need Dodd's Kidney Pills.

"You've heard a lot of stories about the fool mistakes women make when they come to a bank," said a well known paying teller, "and some of them are true."

"I've seen 'em all—the woman who gets mad when we call her attention to an overdraft and then wants to write a cheque to make it; the woman whose indorsements are weird—all of them.

"But the worst came in a few weeks ago. She shoved a cheque through the window without looking at me. I said:

"'Madam, you will have to get somebody to introduce you before I can cash this cheque for you.'

"'Sir!' she answered haughtily, 'I am here on business and not making a social call. I do not care to know you.'"

A Wise Child

"George Washington told his father the exact truth about chopping the cherry tree."

"Yes," replied the sweet, impressionable child; "George knew when he was caught with the goods, all right."—Washington Star.

Shiloh 25¢

The family remedy for Coughs and Colds. Small dose. Small bottle. Best since 1870.

The author staggered home. "The jury," he sobbed, "decided that my book is not immoral."

"Never mind," said his wife, consolingly, "Perhaps you can make a success of it in play form."—New York Press.

One of Marconi's latest attempts with wireless electricity is to supply light. The reports from London say he has succeeded in lighting an electric bulb at a distance of six miles by a wireless current supplied from a hundred horsepower engine.

A Large Family

A child from a country town, visiting her cousin, who lived near an orphan asylum, wondered why so many children were there.

"Why," said her small hostess, "that is where the orphans live—lots and lots of 'em—little girls and little boys—and Mr. and Mrs. Orphan are both dead."

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by the best worm remedy that can be got, Miller's Worm Powders, which are sure death to worms in any shape.

A tramp called at Mr. Titewad's house one morning.

"I've walked many miles to see you, sir," he said, "because people told me you were very kind to poor unfortunate fellows like me."

"Indeed!" said the old gentleman. "And are you going back the same way?"

"Yes, sir," was the answer.

"Well," said Mr. Titewad, "just contradict that rumor as you go, will you? Good morning."

BABY'S OWN TABLETS USED FOR YEARS

When a mother uses only one medicine as long as there are little ones in the home it certainly bears grand testimony to the value of that particular remedy. Thousands of mothers use nothing else but Baby's Own Tablets. Concerning them Mrs. M. LeBlanc, Memramcook West, N.B., writes: "I have used Baby's Own Tablets for my little ones for the past ten years and know of nothing to equal them during teething time or for colic, constipation and indigestion. All my neighbors who have used them think as I do." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Rapid Descent

They had been making hay while the sun shone, and when they had finished a high haystack the boy shouted from the top:

"Say, mister, how am I going to get down?"

The farmer considered the problem and finally solved it.

"Oh, jest shet yer eyes and walk round a bit."—Pittsburg Chronicle.

Lumbago's Misery Ceases, Every Aching Muscle Cured

Just Rub on Old-Time "Nerviline"

Not necessary to drug inside!

That awful stiffness that makes you yelp worse than a kicked dog will be cured—cured for a certainty, and quickly, too, if you just rub on Nerviline.

Rub Nerviline right into the sore spot, rub lots of it over those tortured muscles, do this and the pain will go. You see Nerviline is thin, not oily. Therefore it sinks in, it penetrates through the tissues, it gets right to those stiff, sore muscles and irritated nerves that make you dance with pain.

You'll get almost instant relief from muscle soreness, stiffness, aching joints, lameness or rheumatism by rubbing with Nerviline. It's a soothing liniment, and doesn't blister, doesn't burn or even stain the skin.

It's the most harmless cure in the world for Lumbago, Back Strain or Sciatica. It takes away the ache at once and ends your misery quickly.

Now quit complaining—don't suffer another day—Nerviline, that good, soothing old-time liniment will limber you up mighty quick. Get busy today, the large 50c family size bottle is the most economical, of course, the trial size costs but 25c. Any dealer anywhere can supply Nerviline.

Courtenay Fair To Be Held on Friday and Saturday September 18 and 19

At the meeting of the Board of Directors of the Comox Agricultural Association last night it was decided to change the date of from Thursday and Friday to Friday and Saturday, September 18 and 19. It was thought best to do this as the superintendent of the logging camps says it will be impossible to shut down the camps any day but Saturday.

Several working committes were appointed and other prelimenary work done.

Work at Camps to Start June 1st

That the work in the camps of the Comox Logging and Railway Company is to commence on June 1st as announced in our columns last week has been confirmed by the sight of many of the men who were working here before the camps shut down coming back to Courtenay. This is in response to the call of the Company for all the old hands to come back to work for them if possible.

The farmers at Lumby in the Okanagan will import cows from Ontario, and reopen their dairy.
