Native Sons In Convention Receive Royal Welcome From City Of Courtenay

MAYOR McPHERSON GIVES VISITORS KEY TO CITY—MUCH IMPRESSED WITH SCENIC WONDERS OF COMOX VALLEY

COURTENAY,—Sixty-eight members of the Native Sons of Canada, delegates to the fourth annual session of the Grand Council of that organization, from all parts of the Province, assembled at the Sons' Hall, Booth Building on Tuesday morning for the first meeting of the convention.

Bro. Frank McPherson, Mayor of the City of Courtenay, delivered a short address of welcome, presenting the visitors with a key to the freedom of the City. Acknowledgement was graciously made by Bro. Grand President R. H. Carson, of Vancouver Assembly No. 2.

Courtenay Assembly No. 3, is to be congratulated on having brought the convention to the Comox Valley this year, for it was the first Provincial wide meeting of its kind ever held in this section of the Island. It was also the most successful convention of the Native Sons of Canada, from a social as well as from a business standpoint.

Much discussion took place on very many important questions among them being immigration, industrial development and education, the debates being conducted along very broad lines. On Wednesday the election of officers was held, the result bing: Past President,Bro. R. H. Carson, Vancouver; President, Bro. Col. McGugan, Victoria; First Vice-President, Bro. S. E. Johnston, Vancouver; Second Vice-President, Bro. Martin, Cranbrook; Chaplain, Bro. Duchemin, Kamloops; Secretary, Bro. Robt. D. McLachlan, Victoria; Sergt-at-Arms, Bro. J. P. McConnell, Vancouver. Treasurer, Bro. A. C. Pike, Victoria; Inside Guard, Bro. Frank Cummings, Vancouver; Outside Guard, Bro. H. Herd, Courtenay.

Twenty-six assemblies were represented, rapid growth having been experienced by the organization since its inception two years ago. Organized in British Columbia, it has spread east of the mountains and it hoped that before another twelve months has passed that it will be possible to make the announcement that least twice and perhaps three times that number of assemblies have been brought into being, chiefly for the development of a distinctively Canadian national spirit.

The entertainment of the visitors was a big feature in the success of the Grand Council meetings. The visitors, a great many of whom arrived by motor car, were met by a reception committee. All available rooms in Courtenay were filled and an overflow party was sent to Comox. Tuesday afternoon Courtenay assembly sent a float to Cumberland to take part in the May Day celebration at that place. It was given a rousing send off by the delegation. On return to Courtenay the youthful Native Sons who had represented the various provinces were presented to the Grand Council session by Bros. Hagarty and Herd. The boys and little Sheila Hagarty, who represented Miss Canada, were given a great reception. They were Harold Hames, Jack MacIntyre, Jack McKenzie, Gordon Blackhall, Fred Stephens, Charlie Quinn, Stewart Wood, Colton Hagarty, Willie Piket, Alfred Anderton and Austin McLeod. On Tuesday night the Sons gave a grand dance in honor of the visitors, at the Royston Tennis Court. Five hundred people were in attendance and a most enjoyable time was spent. On Wednesday after the business of the session was completed, the visitors were taken for a drive to the various points of interest in the Valley. This was a delightful feature, as many of the delegates were making their first visit to Comox Valley. On Wednesday night the members of Canadian Daughters League Assembly No. 6, gave a grand banquet in honor of the guests. It was one of the outstanding successes of the past few months, there being present over two hundred banqueters. Many prominent men were present and delivered address. Among these were George McCrossan, Prof. R. G. Matheson, R. H. Carson, of Vancouver, Col. McGugan, R. D. McLachlan, J. McDowell, Victoria; Rev. Thomas Menzies, Mr. Woodworth, Vancouver. The City Council and President of the Courtenay-Comox Board of Trades, Mr. Theed Pearse, were present, the latter delivering an address. Other speakers were, D. R. MacDonlad, Chas Beasley, Alexander Cleland, Joseph McPhee and Mrs. Embleton who spoke on behalf of the Canadian Daughters' League.

Songs were rendered by Bro. W. A. W. Hames, Miss Kathleen Beasley, Miss Kitty Williams, Dancing by Bro. H. G. Blackhall; step dances by eight girls from the school concert troupe, they were: Honor Fechner, Gladys Perez, Bernadine Shannon, Kathleen Moore, Dorothy Hames, May and Anabel, Moncrieff, Mary Morrison. Bro. Frank Cambridge, of Abbotsford rendered a solo but refused to respond to an encore.

The tables for the banquet were most artistically decorated with flowers and the serviettes were bordered with maple leaves. The Native Sons orchestra was in attendance besides whom Mrs. W. Moore accompanied the dancing girls and Miss Beasly accompanied her sister. It was certainly an outstanding success. The next session of the Grand Council will be held at Kamloops.

BOWSER HERE FRIDAY

HON. W. J. BOWSER WILL ADDRESS A PUBLIC MEETING ON FRIDAY, JUNE 13 IN THE ILO-ILO THEATRE, COMMENCING AT 8 PM. SHARP. W. DUNCAN, ESQ., CONSERVATIVE CANDIDATE FOR THE COMOX ELECTORAL DISTRICT WILL ALSO ADDRESS THE MEETING.

Charles Graham In Notable Address

The celebration of the anniversary of the birth of Florence Nightingale was held at Ladysmith a few days ago. It is estimated that 500 visitors attended the hospital during the afternoon.

The directors and staff of the hospital and auxilairy made great preparations for the event and were more than pleased with the results of their efforts .On this occasion Mr. Charles Graham president of the Cumberland General Hospital and Hospital Association of British Columbia delivered an address as follows:

Ladies and Gentlemen:—

The observance of the Anniversary of the birthday of Florence Nightingale as a Hospital day throughout the countrty is an excellent practice, giving as it does an opportunity to the hospital to demonstrate to the public at large the nature of the work it is doing.

In the early days hospitals were established for the care of the sick poor, but they have now broadened out to meet the needs of all classes.

The general public at one time looked upon hospitals as a place where their friends were sent to die.

It is true and doubtless always will be true that we have a fairly large percentage of deaths in hospitals. This is due to the fact that practically all cases of severe injury and serious illness are sent there. They are sent there because it is known that they will receive the skilled attention that is necessary if there is to be any hope of their recovery.

The first hospitals were supported entirely as charitable institutions, and even though they have broadened out their service to meet the needs of all classes, the public today still support their hospitals largely from the charity viewpoint, but the consciousness of self interest is gradually growing.

There is only one commodity that the public can obtain from a hospital and that is service.

We have reached the stage where the public is demanding that all hospitals large or small should be able to give the best possible service to those that are sick. Health, relief from pain, from disability, from fever and anxiety and postponement of death is the hospital service and how successful each one is, can readily be determined.

Somehow people expect more from a hospital than any institution can possibly give.

Visitors to institutions sometimes go away with the impression that the staff are indifferent and don't care. Accident, disease, operations and death are commonplace to hospital employees. Anxious friends heartbroken relatives, eager enquiries are all part of the day's work. And what is routine in any walk of life too often receives routine attention even though it may be the unusual and momentous to the other person concerned.

When in a weakened condition there is no limit to the attention the patient expects.

Every visitor whose dear friend or relative is there has much the same idea. The visitor especially should remember the others.

People seldom visit a hospital except when they have a relative or friend there. At that time their mind is too much occupied with the condition of their friend to receive any other impressions.

To get the proper perspective on hosptial work you should visit it at other times when the mind is free to observe what is being done and how it is done. You should become acquainted with your hospital. A hospital should be regarded as a public utility filling a definite public need.

The difference in efficient and inefficient performance is the difference between life and death.. Its sole function at present is restoration of health.

It should be our chief interest then to see that our hospitals serve the community in the most efficient way.

One of the essentials of the ideal hospital is that their service should be given to the public at the lowest possible cost consistent with the maintainance of the required standards.

The greatest difficulty the hospitals meet with in the rendering of efficient service is the lack of revenue from a permanent source sufficient to ensure the maintenance of the highest standard of food, equipment and staff.

The Boards of Management have to struggle year after year with a to-

NOTICE

A general meeting of the employees of the Canadian Collieries (D) Limited, will be held in the Lecture Hall of the Cumberland Literary and Athlethic Association on Sunday, June 8th at 10.00 a.m., for the purpose of electing officers, and committees for the forthcoming Annual Picnic.

A full attendance is earnestly requested.

Ed. Hughes, President
Chas. O'Brien, Secretary.

Sorry but the report of the crowning of the Queen from the Bevan Public School on the Recreation Grounds, the ceremony of the Crowning of the Hospital Queen in the Ilo-Ilo Theatre, the Proclamations, the Honors bestowed, the Banquets and Suppers in connection therewith, are all laid over until our next issue; also the report of the Provincial Party meeting.

The Women's Auxiliary of the Cumberland General Hospital will publish an itemised statement of receipts and expenditures on June 14th in connection with their Queen Contest and thank all those who assisted in piling up the dollars.

GARDEN PARTY

A garden party will be held at the home of Mrs. Mounce on Wednesday afternoon from 3 to 6, under the auspices of the Ladies' Aid of the Grace Methodist Church. Everybody welcome.

The Ladies' Aid of St. George's Presbyterian Church will hold their Annual Garden Party on Parnham's lawn, Wednesday, June 25 from 3 to 6 p.m. Watch for further announcements.

FIRE DESTROYS NEW-TOWNSITE HOME

A fire, which broke out in the front part of the home of Mrs. N. Huby, at about 9.30 o'clock Thursday evening, completely destroyed everything in the house and would have burned the house itself to the ground but for the timely arrival of the Fire Dept. which made short work of the blaze. Neighbors noticed the flames break out in the front room and pour out of every window in the house so they immediately raised the alarm. Mrs. Huby, who was in bed, barely managed to get out with her two children before the whole place was a mass of flames, and could save nothing but a few of the kiddies' clothes.

The Firemen made a record run to the townsite and soon had the flames under control but not until everything in the home had been completely or partly destroyed. The house itself barely escaped and now stands an empty shell. The cause of the fire is not known but some think it was defective wiring in the front rooms.

Much sympathy is extended to Mrs. Huby who is a widow with two children. Only a few days ago she had had the house newly papered and had bought new furniture all of which was destroyed.

ANNOUNCEMENT

Joe Damonte announces that he has established an office at Mrs. Oliver's Music Store, Dunsmuir Avenue, Cumberland, Phone 104, and is now specializing in Slab Wood at $3.00 per load. Phone orders to Office No. 104 or night call 93L.

Cumberland Advance Into Third Round At Expense Of Shelly's Of Vancouver

LOCALS RECEIVE SURPRISE FROM FAST-STEPPING BREADMEN—BLAIR, STEWART AND BRAKE ARE OUTSTANDING PLAYERS

After running rings around Shelly's Football team of Vancouver in the first half of the Connaught Cup game played here last Saturday, Cumberland suddenly seemed to go to pieces and in the remaining 45 minutes it seemed as though their chances of being champions of Canada had gone a glimmering. But excellent playing on the part of Brake, Stewart and Blair saved the day and the local team finally won out by the margin of one goal, getting 2 to Shelly's 1. The second half was not all Shelly's, far from it, but Cumberland did not put up their usual brand of ball and with the Vancouver team playing better than ever before, things looked pretty black at times for the local aggregation.

First Half

Promptly at 4.00 p.m., before a large crowd and under a sweltering sun, Referee Adams called the teams together for a short caution against foul play and immediately afterwards the ball was kicked off with Cumberland playing with their backs to the sun. Monohan made a faulty clearance and before Blair realized the game was on he was tested with a hot one which he cleared in a spectacular manner. Inside of ten minutes the visitors forced two corners which were relieved by the backs from dangerous positions. Graham and Co. then got going and pressed hard on Shelly's left defence. In attempting to clear, the back accidently handled the ball. Referee Adams promptly awarding a penalty, the only decision he could possibly give. Amid cries of "don't score", Stewart took the kick and converted a dandy, probably realizing that this goal might make all the difference between success and defeat, which turned out to be the case. After ten minutes of equal and exciting play in which both goals had very narrow escapes, Andy Horne took the ball up the left wing and crossed to Graham who scored from the 18 yard line with a beautiful drive just under the bar. This goal, which put the home team 2 up, seemed to take the life out of the visitors and for the remainder of the game Cumberland virtually "ran rings" around them, doing everything except score, a feat which the forwards missed time and again by inches.

Second Half

This period opened with a determined attack by the visitors and for several minutes the hearts of local fans were in their mouths but Blair saved the situation repeatedly with his marvellous saves. The excessive heat was beginnig to tell on both teams, the more so on Cumberland, whose forwards could not get into their accustomed stride. In a scrimmage Conti handled in the dreaded 18 yard line and a penalty was the result. Tommy Dryburgh scored with a bullet-like shot, Blair having no earthly chance to save even though he had tried for it, which he did not. This goal added new life to Shelly's and for the remainder of the game they led Stewart and Blair a merry run. However, they were open to all-comers that day and it would have taken a whole army of footballers to get past them into Cumberland's goal. Blair especially was excellent. He showed a really scientific exhibtion of goal-tending which was a treat to watch. The home forwards broke away at times and were extremely dangerous. Both Graham and Milligan missed several times by inches and on one occasion they did land the ball in the net from one of Deluce's famous crosses. This goal was disallowed for offside on the part of Graham and Turner who were too anxious. The final whistle blew with the homesters winners by the odd goal after what had been one of the most interesting and thrill-producing games ever seen in this City, owing to the number of narrow escapes which kept the fans at a high pitch of excitement for the full 90 minutes.

Blair is Star

For the visitors the outside left and the full backs were the best players while Blair of Cumberland was easily the star of the whole game with Stewart and Brake running him close seconds.

LOCALS TO MEET ROYSTON LUMBER CO.

Cumberland will meet Royston Lumber Co. in an Upper Island League fixture Sunday afternoon on the Recreation Grounds. The game starts at 2.30 prompt.

Manager Plump will trot out the boys to represent Cumberland as follows:

McIntyre, p; Richards, c; Plump, 1b; James, 2b; Bannerman, ss; Marocchi, 3b; McKay, lf; Conti, cf; Harrison, rf; and Hunden and Robertson.

GRAND LODGE MEMBERS VISIT PYTHIAN SISTERS

Grand Chief Irene Stein, of the Pythian Sister Grand Lodge of B.C., paid an official visit to local Pythian Sisters on Wednesday evening. She was accompanied by the Grand M. of R. & C. Nellie Beach, Press Representative Etta Urquhart and Mrs. Jones of the Vancouver Lodge.

During the afternoon the visitors were entertained by several of the Sisters at the home of Mrs. W. Beveridge Sr., and at evening they addressed the full lodge at a meeting in the K. of P. Hall at 7.30 o'clock. In her remarks Mrs. Stein touched feelingly on the death on May 15th of Mrs. Josie M. Nelson Supreme M. of R. & C., and editor of the Pythian Guest, the official newspaper of the order in North America. She gave a short description of the life and work of Mrs. Nelson and the loss Pythianism had sustained in her death.

After the meeting, refreshments were served and the visitors and visited used the opportunity to get acquainted. In the morning the four ladies left for Nanaimo where a banquet was held in their honor on Thursday night by the members of Silver Leaf Temple of that City.

BEVAN BURNS' CLUB MADE PRESENTATION TO DEPARTING MEMBER

On Saturday, May 31st, the Bevan Burns' Club held a dance in honor of Mrs. E. Jones, who is leaving shortly to visit her parents in England. On her return she will take up her residence in the United States.

During the supper hour Mr. J. G. Quinn, president of the Club, made a speech of appreciation, complimenting Mrs. Jones on the manner in which she has assisted the club during her residence here. He then presented her with five beautiful pieces of ivory as a token of the regard with which she is held by the people of the camp.

Although she has been a resident of Bevan for only twelve months, she has made many friends who will sincerely regret that she is leaving, but wish her a very pleasant voyage across the sea, and an equally enjoyable sojourn with her parents in the Old Country.

The very best wishes of her many friends will accompany her to her new home in the United States.

MEETING MONDAY

There will be a meeting of the Ladies' Auxiliary of the Cumberland General Hospital on Monday, June the 9th at 3 o'clock in the afternoon, at the home of Mrs. Jeffrey, Maryport Avenue.

GARDEN PARTY JUNE 18

The Ladies' Auxiliary of Holy Trinity Anglican Church Cumberland, will hold their Annual Garden Party on the Vicerage Grounds on Wednesday, June 18th from 3 to 6.

Mr. and Mrs. Frank Sehl of Victoria motored to Cumberland on Monday to be present at the crowning of their daughter, Florence Sehl, who was crowned Queen of the Hospital Auxiliary Carnival Contest.

Frank Porter, auditor, was a visitor to the City Offices on Wednesday.

Charles Graham In Notable Address

(Continued From Page One)

ally inadequate revenue in an effort to give the public the service that they expect yet seem disinclined to pay for, and have to carry large accounts for indigent patients who are totally unable to pay.

The biggest difficulty which the hospitals meet with is the total inability to convince a well man or woman that they may some day require the services of a hospital. The average person does not get the proper viewpoint towards a hospital and its functions and place in the community life. If they did there would not be any financial problems to solve and the hospitals would be equipped with the latest and best appliances for the treatment of accident and disease.

It can scarcely be questioned that the public in general do not seek the hospital from choice, they are skeptical regarding the outcome and lack adequate assurance of relief from its ministrations. It seldom receives the respect it is entitled to. If all goes well nothing is said, if disaster results one more accusation is levelled against the hospital.

The hospital does not advertise sufficiently. It should be one of its functions to create the greatest interest possible in the minds of the general public.

No institution has greater significance to the community than the hospital when once a right understanding is established between the two.

The hospital should seize every opportunity to create a sense of responsibility in the public mind which will lead to constructive criticism, and to active support of the hospital as an economic asset to the community.

To my mind the development of the hospital will gradually merge from the curative to the preventative stage.

As Emerson said "The first wealth is health."

The hospital will eventually be a community health center where the main function will be, not the curing of disease, but the seat of information and instruction for the prevention of disease, where preventive and corrective activities will supercede the curative.

I would urge upon you the necessity of knowing your hospital and what it is doing for the community. Your conception of it will undergo a radical change and from a state of antagonism or indifference, you will grasp the relation of the institution to your community and the power that it can make for health. When you once get the proper prospective of this great work we will be able to count you among the many workers for better hospital service.

Whether the hospital be viewed as a technical or humanitarian institution, the hospital system must be recognized as one of the best fruits of our Christian civilization, a practical contribution of grace and good will to the amelioration of suffering and the betterment of life.

ON June twentieth---Election Day---the Dominion Government, the Railway Corporations, and the Big Interests of Eastern Canada must be shown by the support that we accord the Honorable John Oliver that we are determined to grow and expand. Every vote for a Liberal Candidate is a vote for John Oliver, which is in effect an official message to Ottawa and the East that we in British Columbia are solidly behind the Oliver fight for conditions which are fundamental to the prosperity of every man, woman and child in this province.

Let us show them by our votes that British Columbia is in earnest; that we are determined to win this fight for equalized freight rates—equal charge for equal service throughout Canada; that we must have free and unrestricted use of the Panama Canal; that by natural heritage and moral right we are entitled to representation on national directorates; in short, that we demand the right of this Province to develop and grow.

John Oliver, with his great, homely common-sense and dogged fighting qualities, supported by his Liberal Government, has carried this fight to the interests which are retarding our growth and prosperity.

John Oliver and his Government made the first real fight for equalized freight rates; equal consideration in the expenditure of public monies for harbor improvement, with the resulting grain elevators, docks, etc., for British Columbia.

John Oliver and his Government are fighting for these fundamentals of prosperity which will ensure for us factory pay-rolls; a market for our agricultural products; the development of our natural resources; all of which will benefit every person in this Province.

John Oliver, the head of the Liberal Government in British Columbia, has the ear of the Honorable Mackenzie King, the head of the Liberal Government at Ottawa; and if the people of British Columbia demonstrate by their votes that they are in accord with John Oliver's fight, we in British Columbia will benefit to a far greater extent than we would if Mr. Bowser or General McRae were placed in power.

Disregard petty issues, disregard personal sentiment, and for the welfare of this Province and its economic development, and for your own best interests, return John Oliver and his Government to Victoria on June twentieth.

VOTE LIBERAL

SLATS' DIARY

By Ross FarQuhar

Friday—Was at the Pitcher show tonite & pa begun skolding me because I dropt my chewing Gum on the seat just before he sat down I gess he wood of ben jawing yet if I haddent of suggested to him he shuddent ought to let fokes see how uncarelessly I have ben brung up.

Saturday—They was a quiet wedding in are neiborhood tonite. The yung cupple had ben a going to gather for 10 years and ma sed that the woman in the case must of got tired seeing the fellow of the opposing sex so much and marryed him to get shut of him. Witch is a pritty good plan to pass on to the fare sex namely woman.

Sunday—They was a neibor lady in here at are house this evening and she is very fat and hevy and they got to tawking about reduceing yure wait and etc and she sed she had tried the fonograff method and wood of kep it up only it was to much trubble to go and find up the forog after ever time it runs down.

Monday—Since everybuddy has ben a tawking of Dieting and reducing and etc cetry. pa dissided to see a doctor and get him to lern him to be helthy and the dr. sed to wirk hard and go to bed erly and get up erly and not to eat only a little bit and take a bath evry da but pa sed Whats the use of killing yureself just to get to live a long time enny ways.

Tuesday—Went out to see Mr. and Mrs Killox tonite and there baby. They have had it moren a yr. now and it still looks nice. Mebby they will trade it in on a new 1 wile they got a good chance.

Wednesday—Well at skool today we had a lesson on trees and the teacher tried to make it plane by nameing each 1 of us kids after a part of the tree. Pug was the root and Blisters was the bark and Jake was the trunk and Elsie the leafs and Sarah the branches nd it was a toss up among Jane and me as to witch 1 was to be the Sap. I win.

Thursday—Ant Emmys sistern law and husband has ben saveing there money to by a car. last week they got enuff saved but insted of bying a otto they went and spent it for a devorce.

Here and There

Shipments of grain from the Grande Prairie and Peace River districts over the Edmonton, Dunvegan and British Columbia Railway during the past season have totalled 2,471,000 bushels of wheat and 1,700,500 bushels of other grains.

The longest solid train of red cedar edge grain shingles ever hauled across the continent left Vancouver, B.C., recently for Chicago and the Eastern States. Several other long trains of this product will be shipped in the near future by the Hunting Merritt Lumber Company, by whom the consignment was forwarded.

A despatch recently sent from London states that Professor Carlyle, of the E. P. ranch, is sailing for Canada shortly, taking back with him a number of brood mares and other stock for the ranch. The Prince of Wales continues to evince the deepest interest in all the doings of the ranch and keeps in close touch with things there.

Approximately the same acreage as produced the West's bumper crop last year will be under cultivation this season. The outlook now is that over 14,000,000 acres of land will be ready for seed under generally favorable conditions. The estimated acreage to be seeded this year, by provinces, is as follows: Manitoba, 4,450,400; Saskatchewan, 3,354,190; Alberta, 3,472,315.

The value of boots and shoes exported by Canada during the year ended March, 1924, more than doubled the value of Canadian boots and shoes bought by other countries during the preceding year. Last year the exportations were valued at $304,913, and for the preceding year at $130,034. The United States was the chief buyer, taking 2,227 pairs, with Japan second, taking 1,628 pairs.

Concluding her round-the-world cruise, the palatial Canadian Pacific steamship "Empress of Canada," docks at Vancouver on May 24th. Reports indicate that this four-months' pleasure voyage under the genial care of Captain Robinson, hero of the Japanese disaster, has been a splendid success, the passengers being loud in their declarations of satisfaction.

During the fiscal year ending March 31st, 1924, Canada imported goods to the value of $893,335,491, an increase of $91,000,000 compared with the previous similar twelve months, while she exported $1,045,141,056, an increase of about $110,000,000. The total trade increased in that twelve-month period by about $210,000,000, compared with the corresponding period a year ago.

Your Family

A mother and children bereft of home is life's most pitiful drama.

It is enacted all too often because life insurance had not been provided.

Government statistics show that "ninety-five per cent of men at age sixty are dependent" Other men die without leaving anything for the support of their families.

Life insurance has been evolved so that a man may arrange his life's program to provide for his family. It is scientific, safe and sound.

Have your wife and children sufficient life insurance protection?

Let the Dominion Life take care of your dependents.

Full information regarding any form of policy will be cheerfully furnished by writing.

Manual Training and Domestic Science

(Contributed)

So often today do we hear the criticism of our schools—that modern education is not sufficiently practicable, that our schools do not fit our children for the work which lies at hand when they leave the class-rooms. And perhaps those who are strongest in their condemnaties of our present course of instruction would be much taken back of we should proceed to lay the blame on them and them alone.

Those in charge of educational affairs several years ago endeavored to remedy this defect and introduced into the school curriculum, Manual Training and Domestic Science. As these subjects entailed some slight expense—in so much as additional room for classes engaged in this work must be provided, special desks, tools etc., and qualified teachers to instruct—they were not forced upon the ratepayers but left optional to the people of each district to introduce into their schools if they so desired.

The apathy of trustees and likewise parents in including these subjects in the school course in smaller towns is greatly to be wondered at. All over Canada today in the cities and in most of the consolidated schools, too, training along these lines is afforded. True the initial cost of establishing same might be a little heavy, but with Cumberland's present financial standing, this could not be said to be burdensome. And once the two rooms were fitted for Manual Training and Domestic Scienc, with the exception of two extra teachers' salaries, the cost would be hardly worth discussing—certainly in no comparison with the good that would accrue to the children capable of taking advantage of these courses

Some will raise the objection that if children spend half a day each week pursuing these subjects will not their academic work suffer? From personal experience I can say "Far from it." In numberless schools where these courses have been introduced—strict records have been kept of the children's progress and the percentage of pupils meriting promotion in their ordinary school studies has in no case shown retrogression.

Very often, too, children who have been looked down upon by their fellow students because of their low standing in the class-room have found themselves leading their more talented companions in hand work and for the sake of advantages in this line we find boys and girls remaining at school who otherwise would be forced out to work through distate for class room routine.

Manual Training demands of the boy neatness and exactitude. He soon perceives that the slightest carelessness here cannot be overlooked, for his model is spoiled and he must begin anew. This has a marked effect on character development also, for it is a recognized fact that exactitude in the small things of life has a marked influence on character building.

The good results of Domestic Science are more directly felt in the home, for the child on being shown in the class room the proper way of performing household tasks and especially the preparation of food is most anxious to attempt this on a large scale in the home. Very often, too, the mother who is overburdened with household tasks has not the patience nor the time to spend in teaching the girl the best way of doing housework but is very much relieved when her girl knowing just how to go about it, offers her aid. Children get the idea from presentation in the class room that cooking and household tasks are not drudgery, but rather accomplishments of which they should be proud.

Cumberland should be able to support within itself the course without depending on any outside school. The three hour or morning periods could be devoted to High School and Entrance Classes and afternoon session to pupils of Grades 7, 6 and5. This would stretch the work over six years and the boy or girl graduating from our High School would certainly be proficient in Manual Training and Household Science respectively.

Eventually judging from present trend of thought this will be one of the compulsory subjects in our school course. Why then for the sake of unnecessary economy have your boys and girls of school age today go out from our place of learning robbed of advantages which are enjoyed by their kind in the city and in most of the consolidated schools in other parts of B. C., as well as all over North America?

Wages War, Foot And Mouth Disease

With the racing season just two weeks away, unusual activity is being shown by government officials to prevent any possible entry of racehorses which have been in contact with foot and mouth disease areas in California. Hon. E. D. Barrow has received the backing of the entire agricultural industry in his fight to keep the plague out of British Columbia and nothing will be overlooked to protect animals in this province.

Political Meetings Largely Attended

Newspaper opinions here are unanimous that Nomination day last week brought out a class of candidates much above the average in intelligence and business training, and it is conceded that the electorate of British Columbia should have little difficulty in sending men to the Legislature who will be in a position to frame legislation that will give an immediate impetus to general development in the province.

Practically every meeting, no matter by whom called, has been well attended—an evidence of the interest displayed by the public in the approaching election. Enthusiasm is not lacking at Provincial and Conservative gatherings, but the outstanding fetaure of a short campaign so far is the very apparent endorsation given the Oliver administration.

The Premier admits his faults. "If you have a better man for the job send him along," is his admonition. "Our government is far from perfect, but I unhesitatingly contend that it is the best the province has ever had and after the government again receives the endorsation of the electors it will be in a far better position than ever to proceed with a policy of administration that can only result in one thing, the rapid growth of population and industry."

Secures New Gas Masks For Miners

An important step in the prevention of accidents in coal mines has been taken by Hon William Sloan, minister of mines. The department has secured a big supply of the most up-to-date gas masks for use by coal miners, and officials claim that in the event of disastrous explosions in the mines there should be little if any loss of life.

Freight Rates Out-Standing Problem

Without doubt the outsanding issue in the present election campaign is freight rates. Opposition and Provincial candidates are taking keen delight in robbing Premier Oliver of the credit for the reductions already gained, but a sure indication of his success is found in the voluntary service given him by prominent men from the prairie provinces. Many of these have come to British Columbia to boost for John Oliver ,the man credited with having started and been successful in a movement which will mean more to Western Canada than any other issue.

EDWARD W. BICKLE

SATURDAY, JUNE 7, 1924.

TIME KILLING

Is there such a thing as time to kill? Time—the very thing of which life itself consists—and who, indeed has an hour to slaughter? In the market where ability is bought and sold, today's "dead ones" are but yesterday's crop from the battle of Fool's Hill. Then, in the heyday of their youth, these valiant warriors had time to kill. And today their own drudging minds and bodies wear a bleeding wound for every blow they struck Killing time, indeed!

Reader, every hour on the face of the clock is but a mile post nearer the days of your dependency—the days of your old age. Now, in this period of your fullest strength, what are you doing with all the hours between actual labor and rest? Are you, too, killing time? How much of each day do you put in on the bellows end of a cigarette? What portion between sunset and bedtime do you devote in zealous patriotism to the red, white and blue—chips? How many billiard dents do you put into the cushion while hastening the time when you yourself will be up against it for keeps? How much sole-leather do you wear out scraping the concrete in rhythm with the garrulous gossip of Spearmint Lizzie? How much gasoline do you consume just going nowhere and coming back? Oh, yes, of course!—one must have amusement and recreation. They are essential. Deliver us from the poor stick that does not know what fun is. Yes, there is a reasonable time for cigars, refreshment, games, visiting, and all that. But your system is not equipped for kissing the nicotine twenty-four hours a day; your pay envelope does not grow catnip enough for you to spend all your evenings feeding the kitty; you are too much of a fumbler to down the poolroom bunch; you are a complete fizzle as a human tank, and moonshine is the rankest poison; and as a flirt—well, you know. Stop killing time.

THE SUBSTITUTE MOTHER

We recently read of the tragic death of a primary teacher who died as the result of the shock of seeing one of her little pupils run over by an automobile, just after school had been dismissed. The teacher was in no sense to blame, and she could not reproach herself for the accident, but consciousness of deep responsibility is the life habit of the teacher, and her sympathy is always enlisted in behalf of her pupils when there is need of it. The sad death of this teacher will arrest the attention of thousands who never think of the mothering of pupils which is one of the commonest and finest phases of a school teacher's work.

In brief, the teacher is the school room substitute for the mother, and in uncounted cases her affections are drawn out by her pupils and enlisted in their behalf with almost a mother's intensity of feeling. She works for the boys and girls she loves, as well as for others who do not so stir her heart, and because of this abounding affection she strives doubly hard to do her best and most for the children who are in her charge six hours every school day. If the world could realize fully the wealth of devotion and tenderness which is lavished daily upon little children by these substitute mothers of the school room, the debt which civilization and humanity owe teachers would be better understood. It is service which cannot be paid for in dollars and cents, and it is all the finer and more valuable because it is a free offering of womanhood to the little ones who have ever been woman's especial care and charge.

THE PRIMROSE PATH

A great many more young men and women are sent upon the road to ruin by wealth than by poverty. As a rule, the devil wants no better chance at boys and girls than to have their pockets filled with cash and to have them sit down in some popular roadside inn or country club, where the whine of the saxaphone lulls them to unconsciousness. The revelry of today for youth with an automobile, and a little ready cash, is as great a temptation as the young people of this scarred old world have ever faced. Check up the early graves filled by the young people from the homes of the rich and you will be surprised.

This is not the wail of a pessimist; it is rather a note of warning from an observer who would call upon the youth of today to meet a condition that will try their strength and wisdom.

Comox Electoral District

Paul Phillipps Harrison

BARRISTER-AT-LAW

Cumberland, B.C.

Independent-Liberal Candidate

Election of the Year A.D., 1924

To *the* Electors *of* Comox Electoral District

Greeting:

This pamphlet is issued under authority of the several District Committees composed of local citizens, many of whom belong to different political parties, but are now unanimous in their desire to ensure the election of Mr. Paul Phillipps Harrison, of Cumberland, B.C., Barrister-at-law, the Independent-Liberal Candidate.

The word "Independent" indicates absolute freedom from the rule of the Rubber-stamp Brigade.

The word "Liberal" refers to no particular party, but denotes the principle of re-modelling and enacting laws to meet promptly the radical changes which from time to time occur in the economic and social status of organized society as opposed to the ultra-conservative or reactionary principle of remaining stationary and only enacting legislation to meet such radical changes at the last moment when forced to do so by political pressure exerted by organized labor, or for some other like reason.

To those who reside in the more remote parts of the district and who are not personally acquainted with our Candidate, we may say that he was born in Victoria, B.C., some 43 years ago, and is the eldest son of His Honor Judge Harrison, now retired, who for some 35 years occupied the Bench for two Counties on the Mainland, and in later years for the County of Nanaimo. Mr. P. P. Harrison nas resided with his family at Cumberland, B.C., and practised law there, for the past 18 years.

We are supporting him in his candidature for the following reasons:

1. During the past 18 years we have on many occasions experienced convincing proof of his broad-minded attitude in politics, combined witn a most commendable independence of spirit, and the ability to make a determined fight for anything that he is advocating or supporting.

2. That he has always been strongly opposed to Oriental immigration into Canada.

3. That his entire legal practice is with the general public, such as miners, farmers, fishers, loggers, merchants, etc., and he does not serve any interest or class in particular, we therefore are assured that if he represents us in Parliament he will not be prejudiced in favor of any particular interest or class.

4. That as his entire legal business depends upon his retaining the people's confidence, it is to his interest to give them proper representation in Parliament.

5. That he has not accepted and will not accept funds for his campaign from any Party, Association, or the like, in short, he is financing the whole of his campaign with his personal funds. We doubt if any other Candidate in this Field is doing this.

6. We are entirely in accord with Mr. Harrison's running as an Independent-Liberal and in his view that if he were to do otherwise he would put himself in the position of practically saying that he is satisfied that the Government has accorded our District the consideration to which it is entitled, while as a matter of fact we feel that they have, in many instances, failed to do so. It is our experience, covering a period of many years, that Political Parties, become nothing better than 'Political Machines' whereby its members who are elected on a straight party ticket, uphold their Party even when they are acting contrary to the interests of the people, thus constituting the infamous 'Rubber-stamp Brigade,' every member of which is completely subservient to the dictates of the Party Bosses, particularly as such members are individually under obligation to their Party, tor funds to carry on their campaign. This condition of affairs can only be remedied or at least ameliorated by our persisting in placing the interests of the District before that of any Party as we are doing in this case.

Mr. Harrison will refrain from making wild promises for the purpose of catching votes.

He has agreed with us to make a most careful investigation into the complaints of Timber Operators regarding the present Royalty on logs; And also the question of an embargo on the exportation of logs, and if the facts fully warrant it, he will advocate and support any equitable measure which can be adopted to meet the situation in a way satisfactory to all concerned. And a like enquiry into the matter of the present system of repairing and maintaining public roads, ditches and culverts, in order to ascertain if a reasonable scheme can be worked out whereby the farmers can obtain a fair share of employment in that connection, particularly during the slack months in farming operations and thus enable them to meet their taxes.

Also amendment to the Poll-tax Act, so that the collection of such tax will not be made from any person liable to pay the same, until such person has resided a reasonable time within the place where it is sought to collect the tax.

Also the filling of local Government positions by local people, where competent, instead of the present method quite often adopted of giving the same to persons who reside elsewhere and have no stake or interest in the District.

Mr. Harrison is also strongly in favor of the principle of Recall by the people of any Member of Parliament whom they may feel is not giving them proper and adequate representation and will give his support to any legislation of that character, which contains

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for *five years and improvements made* to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

LAMPS

ELECTRO-AUTOMATES

(AUTOMATIC ELECTRIC LAMPS)

NO BATTERIES! - NO ACIDS!

$5.00 WILL LAST A LIFE-TIME **$5.00**

Practical, Durable, Always Ready on Land, Under Water, Any Climate, Anywhere

The Electro Automate is an Electric Lamp made in France without a battery or refills, and of a new conception. It is a perfect machine; the result of years of test in the plants of the manufacturers in Switzerland and France :: This marvellous little pocket lamp, embodying simplicity, reliability and compactness, weighs only 12 ounces. It is patented in all countries.

The dynamo, with permanent magnet, based on new methods, gives dense magnetic fields of perfect concentration, which surrounds the induction without loss of magnetic dispersion, and permits the maximum exploitation of the energy.

Construction of these lamps is very carefully carried out by skilled Swiss clock and scientific instrument makers :: Electro Automate Lamps are tight and dust-proof. They can be used in all climates, including equatorial regions. They will everywhere render the utmost service, giving a clear white light, without fear of the bulb burning out or the generator becoming warm.

All Electro Automate Lamps are guaranteed for six months, conditionally that they are not tampered with. With reasonable care they will last for years. Any part can be renewed at slight cost. Lamps are provided with a pocket for extra bulbs.

This lamp is especially useful to travellers, tourists, marine and mining engineers, automobilists, dairymen, in fact everybody. They are indispensable on life-boats and rafts, where a light is needed that will not be extinguished by wind or wave :: Every mine should be provided with one or more of these lamps at its portal or entrance, for the convenience of the employee or official whose work takes him in and out of the mine at irregular intervals. It is the cheapest and best light on the market for this purpose :: Marine engineers welcome Electro Automate in their engine room. It saves them from the annoyance and loss of time occasioned by the unreliability of battery lamps when they wish to locate trouble or find something in a hurry :: Pilots are favorable to these little lamps because they are always standing by ready and able to do their part in any and all kinds of weather. They are hardy little fellows and will stand any amount of knocking about, even to the bulbs, which are superior to any others on the market :: Mushers over the northern trails take these lamps in preference to others, because they give a never ending light and add less than a pound of weight to their outfits. The winds can't blow them out and the snow or wet can not short circuit them.

DIRECTIONS

The working of this self-generating lamp is very simple. Pull the lever completely and sharply with the fingers and let go, allowing it to open fully in order to take another full stroke. Strokes should be even and sharp for best results. This lamp is the only one of its weight that will give a perfect light. The bearings of this lamp should be oiled about once a month.

English As It Is Spelled

A stranger in our land was he:
He tried to learn our spelling.
He thought it would as easy be,
As buying or as selling.

He tried to write, but couldn't quite
Learn when to wright or right.
He couldn't tell just where he stood,
When using cood or wood or shood.
He had to stand a lot of Chaffing,
When cruel people started laffing.
Then other things confused him so,
As doe and dough and roe and row,
And mail and male and sail and sale,
And many more that turned him pail.
Said he, "I left my wife and daughter,
In other lands across the waughter,
I wanted much to bring them here,
But they will have to stay, I fere,
And I must leave you." With a sigh
He added, "Else I'll surely digh."

—The School.

Thomas Meighan In "The Confidence Man" At Ilo-Ilo Friday And Saturday

Thomas Meighan's new Paramount picture, "The Confidence Man," which will be shown on Friday and Saturday at the Ilo-Ilo Theatre, is a crook romance with a brand new angle and bristling with punches—and not unlike "The Miracle Man."

Meighan chose it from over one hundred and fifty stories that he considered. It was written by Laurie York Erskine and Robert H. Davis and ran as a serial in Argosy All-Story Weekly. So did "The Miracle Man." Victor Heerman directed, and the supporting cast is AA-1.

In the story, the strongest Meighan has had in months, the star has the role of Dan Corvan, the greatest of all confidence men. He is the master-mind type of crook rather than the plug-ugly kind. Corvan hooks the old sucker, Querritt, falls in love with a young country girl, (Virginia Vall) plays philanthropist to get "in right" with the town-folk, collects from Queritt and prepares to skip town.

But the real action starts when Corvan is exposed for the crook he is. Laurence Wheat and Charles Dow Clark have prominent supporting roles in the cast. Others include Helen Lindroth, Jimmy Lapsley, Margaret Seddon, David Higgins, George Nash and Dorothy Walters.

'FLAMING BARRIERS" IS PICTURE OF THRILLS

Enough thrills for a full length serial are incorporated in the George Melford Paramount production of "Flaming Barriers" which comes to the Ilo-Ilo Theatre on Monday and Tuesday next. Jacqueline Logan, Antonio Moreno and Walter Heirs are featured players and in the portrayal of their respective roles they accomplish death defying feats such as would put fearless circus performers to shame. Miss Logan pilots an aeroplane over a flaming forest and drives a fire truck over a bridge enveloped by flames. Mr. Moreno has his hands full in quenching the fire as it licks its way toward a gasoline supply truck, throwing himself full length upon the flames with a soaked mattress, saving hundreds of lives of excursionists who are trapped by the conflagration. These and other thrills galore distinguish this production.

The Toy Canoe

THE TOYMAKER AND HIS CARVING IS A PLANT OF VILLAGE GROWTH.

When at Christmas time we turn into a toy store or in a large department store toward the toy counter, we are apt to see in our minds' eye only the toy and the child. Some of us see and feel, ourselves. And in spirit go back to the days when toys were to us, as they are to children, the embodiment of the imagination. The tangible form of our dreams! Sight of the toys, the touch of them, is a magic wand restoring our lost childhood. And so we really end in buying the thing that we like, the thing that takes our fancy. That is, if we have a choice, and are not forced by circumstances of limited stock or limited means to take what we can get.

But the toy reaches further back than this. Behind each is the toymaker. The man or woman whose deft fingers shape the thing of art and life out of unpromising and wholly unsuggestive raw material. Thus Canada has men, art-craftsmen, who see in the forest-log latent figures of saints, windmills, weather-vanes, miniature canoes, legends of Mother Hubbard.

Take the part-French, part-Indian, maker of the toy-canoe that so delights the hearts of little boys even when for lack of lake, river or sea in their neighborhood they are forced to sail it in the bath-tub, or just carry it to bed clasped in chubby arms, at night, as a sort of galleon whereon to sail away to the land of dreams, is there not in the canoe, a spirit of race? The French trait of "sculpteur," as the woodcarver calls himself down in Quebec, and the elemental knowledge and association of the canoe that in the Indian reaches back to prehistoric days in this great stretch of country that is Canada.

It would be difficult to say which side of him aids the other more, but it is true that in combination, he is something more of an artist than the United States or Mexico to the South, without such combination, can boast. A born toy-maker. Someone who gets into the toy that prescient something which is of the spirit and of life, and which makes it art-products rather than a mere thing of wood. So fine in its lines that it is no mere substitute but a miniature of the larger canoe . . . the boat of a race. No less than the Viking ship or the gondola is the boat of a race and a people.

Did we see the artistry and human interest, not to speak of the nationality, the true Canadianism in such toys, we would select them and put them more in the hands of children than we do. Even in giving the purely mechanical toy to the child the youngster not having arrived at the age of mechanics proceeds to see the suggestion, the romance, the story, the association. As to wit the "chu-chu" train, rather than the mechanism, the parts, which are far too small to interest the mind at that stage.

And when you happen upon the canoe-carver at work out-of-doors in one of those many quaint and historic villages along the St. Lawrence between Montreal and Quebec, his own child seated on the logs, one of the rough canoes in his little hand, how envious it makes you feel for the city child! For the toymaker and his carving is a plant of village growth. The big log still, as it were, touches the forest. And all these things, too, are in the tiny canoe over which the mind of childhood dreams.—Victoria Hayward.

Thirty Years of Dunlop

Experience Certainly Tells in Making Tires

You cannot go astray in your tire purchases if you buy this kind of experience:—

1894-1924

DUNLOP TIRES

30 Years in Canada

Many a man is driving a motor today who was not born when Dunlop Tires first appeared on the highways of Canada.

Thirty years is a long time in the Tire business. It is the very beginning of the industry. 1888 saw the world's first pneumatic tire; 1894 saw the industry taking hold in Canada.

Doesn't it stand to reason, in view of the above facts, that we must be better equipped and better qualified to serve the exacting demands of Tire users?

Knowing the past of the Tire Industry so well, we must have pretty good intuition regarding not only the needs of the present, but the possibilities of the future.

Money cannot Buy More—Usage cannot Demand More—than what you get with present-day Dunlop Tires.

There's a Dunlop Tire for every purpose.
—For Every type of Rim—
—For Every Pocketbook.

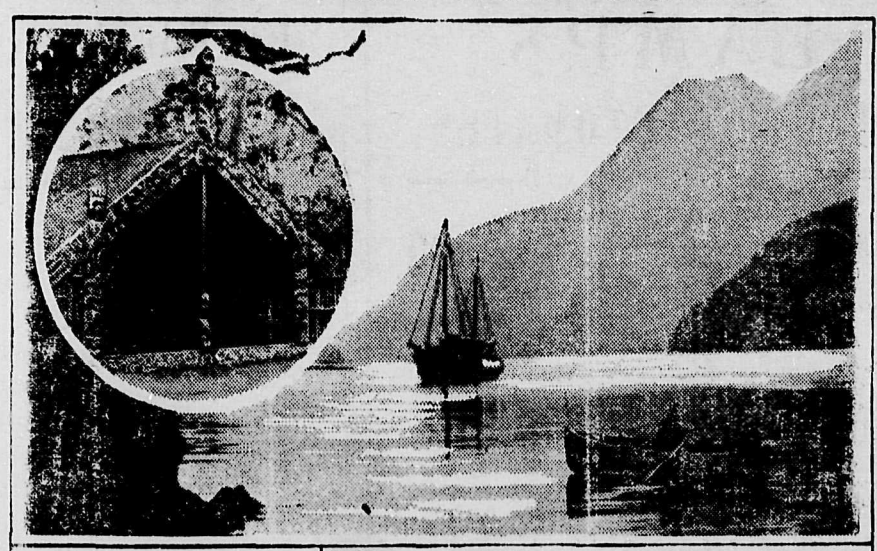
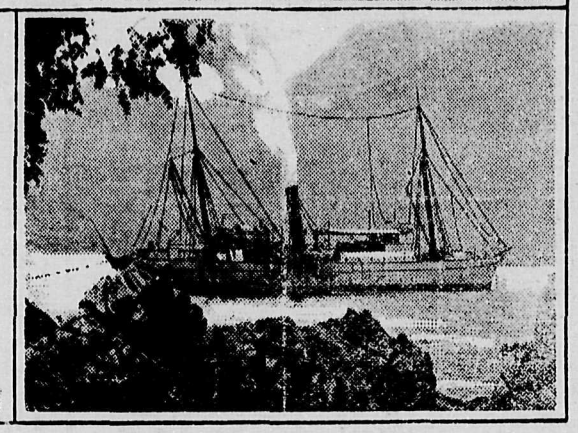
Maori Retains Native Customs





Above—Pickengill Harbor, Duskey Sound, first discovered by Captain Cook in 1770. It was here that he repaired his ship the "Resolution." *Inset—A carved Maori home.* Bottom left—Maou Gate, Roturna. Right—In George Sound.

Geographically considered, New Zealand is the Japan of the South Pacific. It has much the same varied configuration, the same abundance of bays and harbors and like Japan, lies about midway between the tropics and the pole New Zealand is, too, a land of never fading verdure.

Canadian Pacific officials report that in recent years tourist travel from Canada and from Europe through Canada to New Zealand has shown a remarkable increase. From the earliest days of settlement the fame of New Zealands wonderful scenic attractions has spread abroad and they are now regarded as without equal by their kind in the world. Within the compass of the two main islands are found virgin forests full of remarkable subtropic vegetation with many rare and beautiful flowers; wonderful thermal regions cover a wide area in the centre of the North Island where volcanoes, geysers, boiling springs and countless other manifestations of natures titanic hidden forces are manifest. The lakes and fiords of the South Island are of an unimaginable grandeur and magnificence, and the country provides excellent sport for the fisherman or big game hunter with its trout and salmon filled rivers, and the fine deer herds of the interior.

At Roturna, on the Northern Island, may be studied many interesting phases of Maori life for here the Maori still retains most of the old customs and traditions of his storied past and all through the country one comes upon him paddling his canoe up or down the wonderful rivers, much as his fathers did before the advent of white man. Little native villages of carved homes dot the river banks and roads. Aukland is the chief port of the Northern Island and is the calling place of the Canadian Australasian line of steamships

The South Island is rich in scenic attractions, and its marvellous fiords are unsurpassed by those of any country in the world. The great range of Southern Alps running from north to south through this island is capped by many superb peaks, and huge glaciers, rushing snow-fed rivers provide a never ending source of enjoyment and pleasure.

The city of Dunedin with its busy shipping port possesses many attractions for the visitor and is next year to be the scene of the New Zealand Exhibition. This Exhibition will embrace all industries and resources of the Antipodes, many international features and will attract visitors from practically every corner of the world.

Dry, dull hair takes new softness, sheen

You, too, can have the beauty of lustrous, silky hair. Even if your hair is brittle, dull, lifeless today.

It can be done by using this correct shampoo — which authorities recommend.

This offers you a test, free.

Pay attention to this fact which hair specialists know:

The correct shampoo contains olive oil. It cleanses hair and scalp thoroughly, clear down into the tiny pores at the base of each hair.

Yet it cleanses gently, mildly. Leaves hair soft as a child's, pliant, richly gleaming with natural color and beauty.

This olive oil treatment is given to you in a modern, dainty form in Palmolive Shampoo. Pleasant to use. Not a bit oily. Quickly beneficial. And economical.

Try it—at our expense. Send coupon for 15c trial bottle free.

After using it the first time you will notice encouraging results.

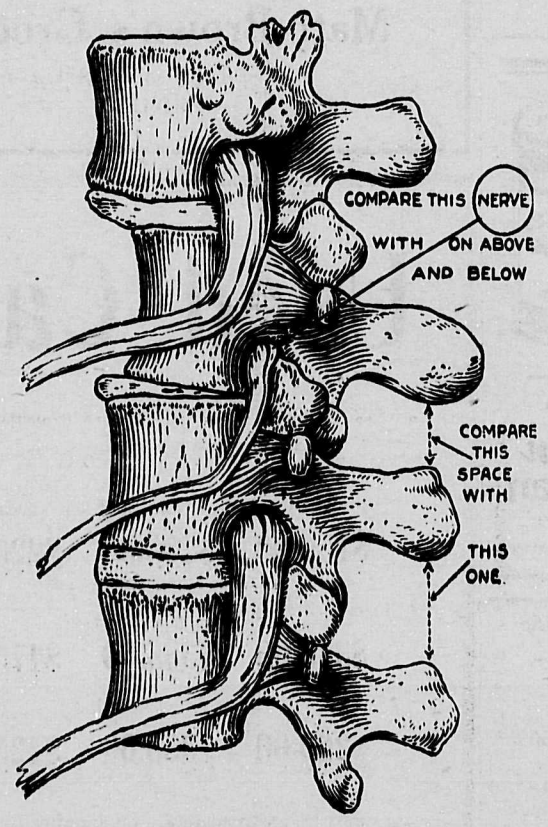
APPLICATION TO CHIROPRACTIC

Science recognizes that vibration is the ruling factor of the Universe. Intellectual vibration is a term we can apply to the working of God's forces along definite and practical lines as immaterial forces acting in and through material objects producing what we see as life. The revolving planets are good examples attesting the truth that motion is a result of intellectual vibration. If true then we must give our source the credit for using it in all things. The harmony we realize existing there is a result of the uninterrupted connection and transmission of forces between source and product. This is the Philosophical basis for Chiropratic. Mental Impulses delivered from the brain is but intelligent vibration being directed to certain parts to start in motion and keep normal these parts for which it is meant. We now find it necessary at all times to have a standard quality (100 per cent) of vibration (mental impulses) to be transmitted from the brain to the tissue cells of each and every part of the body to have as a result, 100 per cent of expression and efficiency or complete life or health. Any change from this normal will result in a lack or excess of structure or function making according to degree the various conditions known as disease.



The above cut shows four spinal segments. The second from above is slightly displaced, illustrating a diminished nerve because the opening between the second and third vertebrae is partly closed.

Owing to the peculiar construction of the spinal column and the adaption of the vertebrae to the many positions and exertions to which it is put, we find these segments become displaced slightly thereby decreasing the size of the openings where the bone structure surrounds the nerves.

As the nerves are very soft in structure we can easily realize that only a slight pressure will cause their capacity for work to be seriously diminished. This is more easily understood when we know that each nerve is composed of thousands of small fibers, each a distinct wire, if you will. The bones being very hard and at this point entirely surrounding the nerve by a movable opening.

A Chiropractor with his hands adjusts these slightly displaced segments, or vertebra, with his bare hands to the natural position, thereby relieving the pressure on the nerve, and nature does the rest.

proper safe-guards to prevent fraudulent or corrupt practices in carrying out its provisions; And will also give support to any legitimate plan to procure an amendment to the present Act relating to Divorces, so as to put women on an equal footing with men, as regards obtaining a divorce for certain matrimonial offences. As the Act, in question, now stands a husband may obtain a divorce on the sole ground that his wife has been unfaithful, while a wife must not only prove that the husband has been unfaithful but must also prove that he has deserted her for the space of two years and upwards or that he has been guilty of extreme cruelty.

There are, of course, many more matters of interest, which the expense of printing prevents us from setting out.

We urge all those who are interested in the welfare of the District to join with us in electing Mr. Harrison.

The ordinary way to measure distance is by miles. You think any place you have in mind is so many miles away. It seems a long way off. Look at it another way. Measure the distance by minutes. Say to yourself, "Such and such a place is so many minutes away," meaning, of course, that if the telephone is used distance does not need to be considered.

If you want to talk to a friend or discuss a business matter, no place is very far away, Not only that, but the means of communication is always right at hand. Every telephone is a long distance telephone. Besides, if you talk in the evening, you can take advantage of the special rates.

For Sale by
Cumberland Electric Lighting Co.

Local Briefs

The Matron of the Cumberland General Hospital desires to thank the ladies of Grace Methodist Church for the gift of beautiful flowers on Sunday last.

Miss Margaret Watt, the Bevan May Queen, paid an official visit to the hospital on Tuesday last and was shown around the wards by the matron.

Comox Lake, the famous summer resort, a mile and a half west of Cumberland is now a great fishing centre. J. D. Somerville entered the Ellison competition of Nanaimo a few weeks ago and won first prize by sending down a trout weighing 4½ lbs. caught in Comox Lake last Sunday.

CARD OF THANKS

We desire to extend our sincere thanks to all those who assisted in any way during our recent bereavement at the death of William J. Jones, whose remains were shipped to Ladysmith for interment.

Mrs. Hume, Wife and Family.

TENDERS WANTED

Tenders will be received by the undersigned up till June 28th for the shingling of the Bevan School. Specifications may be seen at residence of Secretary, Bevan.

Wm. Weir,
Sec. Bevan School Board.

Poisons Self! Didn't Know It

Merchant Didn't Know What Was the Matter Until Nausea, Sick Headache and Bad Digestion Were Traced to Their Cause.

A local merchant was surprised to find that his tired, nervous, billious condition was due to poison from the food he ate. Instead of being digested and eliminated properly, his food was poisoning his whole system, causing sick headaches, nausea, gas on a sour, weak stomach, bad digestion, improper movement of his bowels. Having neglected his liver that important organ became a menace to his health instead of an aid. Dr. H. S. Thacher's Liver & Blood Syrup, however, made a quick difference in the way he felt, slept, ate and looked. This remarkable remedy acts directly on the liver and keeps the whole system toned up. It is sold with the understanding you will be completely satisfied; otherwise, there will be no cost. Get Dr. Thacher's from Lang's Drug and Book Store in Cumberland and by leading druggists in every city and town.
