FORTY-NINTH YEAR—No. 16

CUMBERLAND, BRITISH COLUMBIA FRIDAY, APRIL 18th, 1930.

SUBSCRIPTION PRICE: TWO DOLLARS PER ANNUM

PORT ALBERNI DEFEATED BY EAGLES TEAM

POOR EXHIBITION OF SOCCER
BY WEST COASTERS

The soccer game of Sunday last played between the Cumberland Eagles and the Port Alberni eleven, produced one thing—a flock of goals, all scored by the home team. As an exhibition of the round ball game, the least said about it the better, that is from a spectator's point of view. The players themselves, or perhaps a few of them might have been getting a certain amount of enjoyment out of it, but it is a lead pipe cinch the spectators did not. From the first moment of the game it was easily seen that the visitors were entirely out of practice, some of them were told afterwards had not kicked a ball for three or four years and the game in consequence suffered. Goals came very fast, the home forwards being able to take the ball right into the Alberni goal at will, Watson and Gibson on the right wing being far too fast for the opposing halves and backs. Watson in this half scored one of the prettiest goals ever seen on the local ground—and in the old days the fans got plenty of thrills from the number of fine goals scored. Bartoldi, playing his first game for the home team was very energetic and with good coaching might develop into a really good player. Eight goals were scored in all by the home team and shortly after half time many of spectators left, there being no further interest in the game.

The Eagles appear to have improved over their last appearance and there is the making of several good players in the team.

Eagles line-up was: McFarlane, goal Brown and McLellan, backs; Hunter Conrod, and Weir, half-backs; Watson, Gibson, Bartoldi, McFarlane and McNeil forwards. J. Thorburn refereed.

A.W. Neill Backs Up Col. Villiers

The suggestion that pulverized coal be tried out in the new Canadian National Hotel in Vancouver was made by A. W. Neill member for Comox-Alberni in a series of questions on the order paper.

"Will the government endeavor to secure the co-operation of the Canadian National Railways in this matter?" he asked.

Lt.-Col. Villiers, speaking before the Nanaimo Board of Trade on Tuesday, March 18th said: "I note that your board has been in communication with the President of the National Railway with reference to the installation of a coal heating plant in the new hotel now being built in Vancouver. I have to thank you for doing this. I discussed this question with Sir Henry Thornton in Montreal 12 months ago and he promised to give coal every consideration. I know that his engineers are studying the question, and I have great hopes that we shall succeed in supplying the fuel for this heating plant."

It is very pleasing to know that Mr. Neill still has the interest of the coal industry before him and that he is quite anxious to back up Col. Villiers, even though it is twelve months since the president of the National Railway was approached by the Colonel.

St. George's Day To Be Celebrated

April 23rd is St. George's Day. It comes at that time of the year when England is taking on her spring garb in all its splendor—ready for the merry month of May.

St. George's Day is celebrated by Englishmen all over the Empire and members of the Royal Society of St. George will gather to celebrate that day in London, Bombay, Capetown, Shanghai, Vancouver—and the Comox district, Vancouver Island. The local St. George's Society will hold a dinner at the Native Sons' Hall Courtenay on the 23rd. This day means more in English history than the day of the patron saint. It is the anniversary of the birth and death of England's greatest bard, William Shakespeare. It is the anniversary of Zeebrugge that famous naval engagement during the great war when the British navy once more demonstrated "the Nelson touch." It was on April 23, 1915, that the First Canadian Division wrote its name on the honor roll of the British Army in clouds of poison gas at St. Julien.

Jimmy Walker and Fire Truck Letter

Jimmy Walker, the popular leader of the Sunnyside Orchestra has been accused of writing the letter appearing in the press re the fire truck, purchased by the City of Cumberland from a Vancouver firm.

Mr. Walker states emphatically that he was not the writer of the letter appearing in the *Islander* and takes this means of notifying the citizens of Cumberland that he resents, very much, his name being connected with the said letter, in any shape or form.

Six Members Tie At Trap Shoot

21 BIRDS OUT OF 25 OBTAINED
BY SIX SHOOTERS

A real good shoot was held at the local traps on Sunday last no less than six members breaking 21 birds out of 25. Competition was keen as in addition to six members getting 21, several more were close behind. Following are the individual scores turned in by the secretary:

K. Coe, L. Frelone, R. Coe, W. McLellan, Jr., T. Baker and R. Bennie 21 birds each; B. Horbury, 20; J. Murdoch, 19; G. Brown, 18; J. H. Cameron, 17; B. Wilcock, 17; B. Francioli, 17; M. Duco (Nanaimo), 15; J. Bono, 13; P. Scavarda, 12; L. Francioli, 6.

Ladies' Crib Club Wind Up Season

Jolly Party Held at Eagles' Home
Wednesday

Following the lead set by their male friends, the "Elite" ladies' crib club, brought their season to a close on Wednesday night when a number of members of the club along with friends met at the Eagles' home in a jolly party. Crib was played during the early part of the evening followed by refreshments served by an energetic committee. Mrs. Covert in a neat speech said how pleased she was to see them all there that evening and announced the winners at crib as ladies' first, Mrs. J. Murray; second, Mrs. Chas. Walker; consolation, Mrs. Wm. Herd. Gent's first went to Mayor Maxwell with J. Damonte gaining the second and W. H. Cope the consolation.

All through the season the secretary of the ladies' crib club kept the scores of the individual players and on Wednesday the prize for the biggest total during the season went to Mrs. J. Murray who had a score of 11,112.

Miss D. Maxwell, Mrs. F. Baird and Mr. R. Bennie entertained the assembly with songs.

Decision Of Electric Light Question Not Been Announced

The decision of Chief Justice Morrison in the appeal of the City of Cumberland objecting to the payment of \$38,000 for loss of profits on taking over the electric light franchise from the Cumberland Electric Light Co., Ltd., has not yet been announced. The case came up last week and His Worship reserved judgment. It was felt in the city here that an announcement would have been made before this, but up to the time of going to press no word had been received from the City's representative, Mr. Neil McDiarmid.

The arbitrators, Messrs. A. D. Greer and Frank Sawford, awarded the company which had been granted a 50-year franchise, of which twenty-eight years had run, \$36,000 for its plant and equipment and \$38,000 for loss of profits, a total of \$74,000. The city, represented by Mr. Neil McDiarmid, contended that under the original franchise agreement, which reserved to the corporation the right to purchase the company's property undertaking and privileges at any time, the company was not entitled to loss of profits for the unexpired term of the franchise.

Mr. J. W. deB. Farris, K.C., was counsel for the company.

CORRECTION

We have been asked to state that the social at the Veterans' Hall on the night of the 7th of April, on the conclusion of the concert by the Welsh Imperial Singers, was not sponsored by the Cumberland and District Welsh Society as reported in our columns but by a few Welsh friends of the visitors.

MOTHER OF MRS. HICKS DIES IN EASTERN CANADA

The many friends of Mrs. (Dr.) E. R. Hicks in this city and district will regret to learn of her bereavement in the death of her mother, Mrs. A. Rogers, of Spring Hill, N.S., on Monday last at the advanced age of 84 years. Mrs. Hicks was planning a visit back to her old home this summer on account of the great age of her mother.

In addition to her sorrowing husband, Mrs. Rogers leaves to mourn her loss three sons and one daughter residing in Eastern Canada, one daughter, Mrs. E. R. Hicks of this city and a daughter, Mrs. Fraser residing in Vancouver.

Personals

Friends of Mr. Tom Wilson formerly of this city will be grieved to hear that he is very ill and is a patient in Nanaimo General Hospital.

Mrs. T. Baird who underwent a major operation at Cumberland hospital on Wednesday is progressing as well as can be expected.

Born to Mr. and Mrs. L. Wain at Cumberland hospital on Wednesday, April 16th a daughter.

Mr. and Mrs. Mumford, Mrs. Short and Jackie, motored to Nanaimo Monday, returning the same day.

Mrs. Chas. MacDonald had as guests on Wednesday her mother, Mrs. Annie McNeil and her sister, Mrs. Crawford, who motored here from Campbell River.

The Women's Missionary Society of the United Church held their regular monthly meeting at the Church hall on Monday evening when Mrs. Welsh, wife of Rev. Welsh of Halliburton St. United Church, Nanaimo, was the guest speaker. Following the meeting there was a public lecture with illustrated lantern slides given by the same speaker, of Mission work in Africa where Mr. and Mrs. Welsh were for many years missionaries.

Mr. and Mrs. W. Thompson motored to Alberni Tuesday to visit the latter's sister, Mrs. J. Magnone.

The Easter services at the Cumberland United Church will be conducted by the Pastor Rev. J. R. Hewitt this Sunday. Following the morning service at 11 o'clock there will be a celebration of the Sacrament of the Lord's Supper. At the evening service there will be Easter Hymns and music and special music by the choir with an Easter message from the pastor.

Small Debts Court Jurisdiction Extended

Magistrate G. R. Bates has been notified that his jurisdiction under the Small Debts Court Act has been extended to cover the whole of the Comox electoral district. Mr. Bates informs the Free Press that sittings of the court will be held in Campbell River and Bowser if the convenience of the public requires it.

Deaths From T. B. In B.C. Are Second Highest in Canada

Press dispatches have shown that the death-rate in British Columbia from tuberculosis is the second highest in the Dominion of Canada. The news item as reported in the press places B.C., on the face of it, in an unenviable position, but we would beg leave to point out that, while British Columbia has a death rate of 108.2 per 100,000 population for 1928, 35.2 per cent of this is due to North American Indians. The Province is not responsible for their care or supervision, and the balance of the population, including Chinese, Japanese and East Indians with a tuberculosis death-rate of twice that of the whites, has a death rate per 100,000 population of 70 in round numbers. Therefore it compares fairly well with the average for Canada.

In addition to being obliged to include the deaths from tuberculosis amongst the Indians, we have also to face the fact that many cases are sent to British Columbia on account of climatic conditions. In addition to which, you must add the fact that in the Tranquille Sanatorium 400 cases of returned men, who demobilized in British Columbia, were treated, not one of them originating in British Columbia—except from the thirty-third report of the Provincial Board of Health.

Vets. Receive Maynard Cup

SUCCESSFUL CELEBRATION
ENDS CRIB LEAGUE
FOR SEASON

Crib games, for this season at least, are finished. The curtain was rung down on the activities of the Cumberland and district cribbage league on Friday night when about sixty-five players and their friends met at the Veterans' hall in a right royal social time. Every team in the league was represented and during the course of the evening, the president of the league, Mr. Ralph Gibson, using excellent judgement called on a few of the members from each of the teams to entertain the assembly. Those adding materially to the enjoyment of the evening included Messrs. Younger, Rostler, Gage, A. Maxwell, Strachan, Robertson, J. L. Brown, E. Cliffe, W. Moncrieff, A. Kay, and A. S. Jones.

Bounteous refreshments were served during the evening, both solid and liquid and the Maynard trophy, emblematic of the cribbage championship of the district was presented by W. P. Symons, captain of the City team and winners of the trophy last year, to Sam Gough captain of the victorious Veterans. Mr. Symons in his remarks stated that he felt sure all teams in the league had enjoyed the series just ended and he sincerely hoped all teams would be joining up again next year. He had much pleasure in presenting the cup to the Veterans and was pleased the trophy was remaining in Cumberland. With the trophy went crib boards, the gift of Mr. Harry Maynard, each player of the Vets. being presented with one by Mr. Rostler of the Comox team. A special crib board was also presented to Mr. Ralph Gibson, the president of the league for his work and untiring efforts during the past season. Cheese and crackers, buns and hot dogs were served in abundance, full justice being done to the "hot dogs" washed down by sparkling.

Before the close of the social, Mr. Ralph Gibson presented to Mr. T. D. Robertson, the secretary of the league a set of brushes in leather case, being a small appreciation from the league teams for the work accomplished by Mr. Robertson during the season, much of the success of the district cribbage league being attributed to the efforts of the genial secretary.

The singing of "Auld Lang Syne" at midnight brought a very successful crib season to a close.

Pulverized Coal Test Proceeding

PACIFIC MONARCH BLOWS CYLINDER HEAD BUT SOON REPAIRED

Blowing off an intermediate pressure cylinder cover on Saturday afternoon while inbound to Vancouver the sea-going tugboat Pacific Monarch of Pacific (Coyle) Navigation Co. Ltd. was towed into port from English Bay on Saturday evening. She was taken to the company dock at Coal Harbor, repaired and placed back in commission on Tuesday.

This vessel is carrying out a practical test of the use of pulverized coal as fuel for coastwise tugboat work. The test is working out satisfactorily, it is stated, though the officials refuse to make any detailed statements until after the vessel has run official trials of six hours' steaming, which will probably be done next week.

Meantime the tug has been employed in actual towing operations, and has performed well. The efficiency of the new fuel, in spite of the fact that there are many operating details which must be worked out in practice, is already proved to be better than hand fuel. Better results are expected when it is operating to full efficiency.

Cricketers to Practice

Cumberland cricketers will start practice immediately after the Easter holiday in preparation for their first game with Nanaimo, on Sunday, May 11th. Anyone desirous of joining the local club is asked to get in touch with the secretary immediately. Members of the club are reminded that dues are now payable.

On Sunday last, according to word received, the Nanaimo boys started to practice with prospects for a good season exceedingly bright. Several new players have been secured and it is more than likely that they will be in action against Cumberland.

BIRTHDAY GREETINGS TO NANAIMO FREE PRESS

The Nanaimo Free Press celebrated its fifty-sixth birthday on Tuesday of this week. Appearing first on April 15th, 1874, the paper has kept pace with the growth of Nanaimo and district. From a small semi-weekly, the Free Press has expanded into a daily and in its files is contained the history of Nanaimo.

May the Free Press continue to flourish and enjoy many more birthdays.

Mrs. W. H. Cope was hostess at a delightful party on Wednesday afternoon in honor of her daughter, Betty's fifth birthday. The young folks spent a very happy time in games, singing and music. Winners of games were Valda Frelone and Iris Noel. The attractive tea table was centred by a lovely birthday cake with its gay candles and laden with all the good things so dear to childish palates to which full justice was done. The young guests included Lily Saunders, Gladys Brown, Valda Frelone, Gloria Aspesy, Gloria and Alfred Somerville, Muriel Maxwell, Katherine and Gordon Wood, Malcolm Stewart, Miriam and Billy Turnbull, Shirley and Iris Noel, Lorraine Stevenson, Mildred Henderson, and Betty Cope.

Visitors to Oyster River on Sunday from Cumberland included Mr. and Mrs. J. Vaughan and family; Mr. and Mrs. W. Woods and family; Mr. and Mrs. K. Brown, Mr. and Mrs. R. Struthers, Mrs. Reese, Mr. and Mrs. Bullock and Mr. and Mrs. Harry Parkinson.

Quoting Contests At Local Courts

Two quoting pitching contests will be held this Saturday on the King George Hotel Courts when William Mossey and Harry Ellis will play for a side bet of \$10.00. One game will be played the Ellis style and one game the Mossey style. The other contest will be between James Murray and Harry Ellis for a side bet of \$15.00. A match between the Happy Valley quilt pitchers and Cumberland will also be held at the Courts on Saturday.

Following these games a meeting will be held at the King George Hotel when it is expected the Cumberland United Quilt Pitching club will be formed.

Peter Smith Not Guilty of Murder

Jury Deliberates For One Hour and Three Quarters

At 9:15 on Tuesday night the jury sitting on the case of Peter Smith, charged with the murder of A. Hamilton at Hilliers, returned to Court and Foreman Barclay handed in a verdict of "Not Guilty."

The jury retired at 6 p.m. but, before meeting to discuss their verdict, they had supper. It was actually 7:30 o'clock when they began their deliberations, so that actually they were out one hour and three quarters.

His Lordship Mr. Justice MacDonald thanked the jury and charged the accused, Peter Smith.

ISLAND COAL MINING CONDITIONS STATED IN ADDRESS By Col. VILLIERS

General Manager of Western Fuel Corporation and Canadian Collieries (D.), Ltd., Addresses Vancouver Gathering

Difficult mining and consequent high cost.
Tremendous increase in oil fuel consumption.
Change in marine motive power.
Inroads by hydro-electric power.
Impossibility of using pulverized coal in small plants.

Foregoing are some of the salient points made by Lieutenant-Colonel Charles W. Villiers, vice-president and managing-director of the Western Fuel Corporation of Canada, a company operating mines in the Nanaimo district, in the course of an address to members of the mining section, Vancouver Board of Trade, at a luncheon meeting today.

The picture painted by the speaker was not altogether gloomy. On the brighter side he said that Vancouver Island mines are able to operate more working days than mines in other districts of Canada and the United States. He spoke of the advances being made by science in both mining and utilization of coal strikes which may be expected to increase markets and decrease production costs.

"The mines of the companies I represent are scattered between Ladysmith and Cumberland," said Colonel Villiers. "In normal times we work six different mines, temporarily we have only five mines working. The mines situated near Ladysmith and Nanaimo are capable of producing three thousand tons of coal per day and those at Cumberland about 1200 tons. Working full time we could produce 1,250,000 tons of coal in a year. At present our annual output is just under one million tons per annum."

"Compared to other mining districts in Canada and the United States we are very fortunate, inasmuch as we are able to work on the average over 250 days out of a possible 300 working days in a year. The average number of days worked in a year in the United States in the bituminous mines is about 190. Should the demand for our coal grow we would increase our output very considerably in a comparatively short time."

State of Depression.
"At present there does not seem to be much chance that we shall be called upon to supply a greater quantity of coal than we are equipped to produce at present. On the contrary, for some years the annual production of coal from the Island Collieries has been decreasing. In 1920, the output was in the neighborhood of 1,700,000 tons, in 1929

this dropped to 1,122,817 tons. This is a serious loss to the whole community. The production of 500,000 tons of coal annually would give employment to nearly 1500 men in the mines. Assuming the average number in a family at the low figure of three persons you can estimate that a comfortable living would be provided for nearly 5000 individuals. An increase in employment in the Island mines would mean increased employment in other businesses and trade both on the Island and mainland. Our Island coal industry is like the coal industry all over the world, in a state of depression.

Oil Displaces Coal.
"There are several reasons for this depression. The competition of oil fuel, hydro-electric and the more scientific and economic methods adopted in the consumption of coal to generate power," continued the speaker. "The fuel oil imported into British Columbia annually displaces about 750,000 tons of coal annually. In addition to the actual importation of oil to British Columbia, the great majority of the ships which enter Vancouver harbor are oil burners."

"If the greater portion of the ships entering this port were coal fired, our Island coal industry would be prosperous and our output would be steadily increasing. New mines would be opened and several thousand more men would be employed. "But what is true of other mines is equally true of other parts of the world. Take for instance the coal industry of the United States, the greatest coal-producing country in the world. The output of coal in the States, notwithstanding the vast development of industry in that country shows a considerable decrease in the last ten years. In 1920 the output was 658 million tons, in 1928 569,000 tons, a decrease of nearly ninety millions tons."

Must Pump Water.
Faulty, erratic seams means that for every 100 tons of coal mined and hauled to the surface from Island collieries twenty-five tons of rock must be brought out. Fifty per cent of the output must be washed the speaker continued. Washery losses run to 20 per cent. The company must pump 5,000,000 gallons of water from the workings each day. Output of salable coal per employee is one and one-quarter tons per day, as compared with more than four tons average in United States collieries.

While United States collieries are producing coal at the pit head for \$2 (Continued on page three)

CELEBRATION ASSURED FOR EMPIRE DAY

OFFICERS ELECTED AT WELL
ATTENDED MEETING

A very well attended meeting of the citizens of Cumberland and presided over by His Worship Mayor Alex. Maxwell, decided on Tuesday night, that Empire Day, 24th of May be celebrated in the usual way. After a short explanation by Mayor Maxwell, the election of officers was proceeded with. Lt.-Col. Charles W. Villiers was unanimous choice for Hon. President and Messrs. T. Graham, T. H. Williams, J. Hunt, A. Auchinclove and Dr. G. K. MacNaughton be honorary vice-presidents.

A. S. Jones of Union Bay, was chosen as director of ceremonies Mayor Alex Maxwell, president, W. Henderson, secretary and A. McKinnon, treasurer.

The president called on the treasurer for a statement of last year's activities which showed that the total receipts amounted to \$1510.58 with expenditures amounting to \$1293.01 leaving a balance of \$217.57. Since the statement had been prepared, the treasurer reported that two outstanding bills had been presented which reduced the balance on hand. The sum of \$132.00 was transferred to the water sports committee for their sports last year. The water sports committee had a balance from their sports and on motion of Mr. Partridge it was the decision of the meeting on Tuesday that \$100 be transferred back to the 24th of May committee.

The election of committees was proceeded with when it was decided to elect the chairman of each committee and the chairman be given power to name his own committee.

J. L. Brown named as chairman of the sports committee added the following: Messrs. G. Apps, Fraser Watson, J. H. Cameron, R. Coe, R. T. Brown, L. Frelone, M. Stewart, and A. Kay (of Union Bay).

C. O'Brien was the choice of the meeting for the chairmanship of the finance committee and he named Messrs. T. H. Mumford, C. Parnham, J. C. Brown and E. W. Bickle as his assistants.

J. Vernon-Jones was named chairman of the publicity committee and for his helpers he will have E. W. Bickle Jr., and W. Henderson.

The grounds committee will have W. McLellan, sr., as chairman, the personnel of this committee will be named later.

Jim Quinn becomes chairman of the judges and will have for assistants, Dr. G. K. MacNaughton, Dr. E. R. Hicks, F. Partridge, C. J. Parnham, J. S. Williams, J. C. Brown, R. Coe, John Sutherland, W. Eadie, and John Horbury.

Harry Jackson will have charge of the starters and he will be assisted by Messrs. J. Vernon-Jones, Seymour Abrams, T. D. Robertson, R. McGrath and Allan R. Nunn.

The various committees will meet as early as possible and formulate plans and the secretary of the celebration committee instructed to write to the Athletic Club, making application for the use of the Recreation Ground on the 24th of May.

Chief Inspector Probing Disaster At Carbonado

James Dickson, chief mine inspector for the province of British Columbia left Victoria on Monday morning for Seattle, en route to the scene of the recent mine disaster at Carbonado. Mr. Dickson has been invited to make a full inspection of the situation.

The department of mines for B.C. upon hearing of the disaster proffered any assistance within its power to the state of Washington. The aid of Mr. Dickson was tendered and it was intimated that his service would be at the disposal of the Washington department of mines.

Dependents of the men killed, it was stated by Mr. N. D. Moore, vice-president of the Pacific Coast Coal Company, would receive compensation which would keep them from needing charity.

Each widow will receive \$150 funeral expenses, \$250 for immediate relief and \$35 monthly until she remarries. For each child an additional \$12.50 per month will be paid until the child is sixteen. This will be paid from the state compensation.

Monday, Tuesday and Wednesday . . . "Married in Hollywood"

EDWARD W. BICKLE

THE GLORIOUS DAY

EASTER is the Emancipation anniversary of the Christian world—the one day of all the year, next to the advent that is the most glorious and worthy of signal remembrance. It brings with it a new inspiration of faith in God and of perfect assurance in His Love for the children of men.

Every swelling bud and sprouting leaf reminds us that the life which conquers death in nature's realm has its parallel in the Resurrection—that great central fact of Christianity—in which we have the assurance of our spiritual revivification. Christ in us becomes the vitalizing force which lifts us from the darkness of sin and death into light and life everlasting.

This old world of ours needs more Easter cheer. It needs to realize that the risen Christ and the empty tomb have for the whole race a grander and higher significance than any other event since time began. It needs to grasp the imperishable truth that, when the Son of God burst the bars of death and the grave, He revealed the way of life eternal to all who accept Him and follow His footsteps. His resurrection was the divine pledge of our own, and the soul that rests upon Him has already risen from the deadness of sin and began the life everlasting. For such, the grave is not an abiding place, but the vestibule of the greater and nobler life beyond.

Therefore, at this joyous Easter time, when all nature is rejoicing, let our hearts join in the songs of praise and gladness. Around us we see the woods adorning themselves with the living green and the air is resonant with the song of birds. Over all the earth, wherever the name of Jesus is known, it is the glad emancipation time:

'Tis the festival of all creation,
Christ hath risen, who gave creation birth.

The Easter festival of our forefathers covered a period of fifteen days. The week beginning with Easter Sunday was almost entirely given over to sport and games and general merry making.

Our office dog says: "Some people are so expert they can pat your back and harpoon you at the same time."

THE BOULEVARD

Two former members of a City Council were hovering over a beautiful landscape, looking down upon the City, which had settled like a scar upon the perfect countenance of Nature. They were preparing to descend to hold post-mortem on the present City Council.

Not having earthly eyes, they failed to see that certain members of this council still showed signs—though faint—of animation. Mistakenly they judged the Council's state from its passivity—hence the autopsy.

"Poor things!" the younger member diagnosed "Anemia Perniciosa. It got me too," he confided.

"And me," confessed the elder. "If the Press had only made it take an iron tonic, a little stimulant as it were. That's what the press is for, to doctor civic bodies. But there," he sighed, "no use advising—City Councils never take it. Never!"

"I know, and weren't we all the same? And now look at the mess we left behind. A City! Bah! What is a City? And what do mortals know of Cities? Why shade!" he chorused, slapping with airy vehemence his transparent thigh. "What is a City? A thing of life, of spirit! And what is Spirit? Why Soul, good shadow, Soul—and soul? That thing which differentiates us from the lower creation: 'Tis Soul which gives us the power to appreciate, to love, and even to create this Beauty!"

"Yes, yes, but then we left this ugly heritage, you know. 'Tis hardly fair to blame the present Council for this blister on the landscape," interceded the elder tolerantly. "Though what they've done to add to the beauty, I cannot—Hello, what's that down there! Drop lower, boy, your wings are younger than mine, and tell me. It almost looks like beauty! A bit of soul left in the City Council eh? I'll drop down, too, can it be beauty?"

"Why Shade existing?" The members hung suspended in amazement. "A Boulevard! A green oasis in the bleak expanse of Main Street! Ah! there is hope," the old one beamed. "A hint of soul, that thing that makes a city live and grow; but who is this approaching?"

"I beg your pardon strangers," politely greeted another member of their fraternity. "I overheard your comments. That Boulevard was just the swansong of this City; a song of protest against the shabbiness, though here and there of course are homes worth looking at, but on the whole—you're not offended?"

"Oh no! we understand," the others hastened to assure him. "As you were saying?"

"Well then that Boulevard was just their swan song—and many a tolvorn resident has praised the Council for it—but when the trees had bloomed themselves in foliage; the grass had formed a bed of velvet the song died down. But oh! It was refreshing while it lasted."

"Why then," bewailed the elder, "won't someone prod this Council,

ere too late;—for from this lower altitude I see in it faint signs of life,—and show to them the need of beauty in the lives of citizens. Could one but make them keep their lamps well trimmed—I mean their grass—and plant perhaps a tulip bed—"

"No, no! a tulip-bed was too much loveliness, and then the dogs and children would have no playground!"

"What's that," exclaimed the elder, "a playground? you mean to say this town provides no decent playground for its children? And keeps not faith with this, its one creation of beauty? Its Boulevard? Ah woe is me!" the old chap sighed. "We'll hover around yet longer for after all, methinks this City Council will soon be a fitting subject for post-mortem."

Poets' Corner

THE GIFT OF INSPIRATION

In playing the stock-market I made a lucky bid. I sold and took the profit And then guess what I did.

I felt a generous impulse And bought my wife a car. It seemed 'twould be a Godsend To pass an idle hour.

How happily she viewed it Contentment in her eye. I felt my choice inspired— Kind—thoughtful—that was I.

When in teaching her to drive it My language took on force, Ungratefully she switched her Interest to Divorce.

Now at the City garage Great bills are run for feed; At home the house and garden Are mostly run to seed.

If e'er again I'm smitten With impulse strong to give, I'll choose a gift that leaves me At least, desire to live.

H. H. S.

A Lochinvar in days of yore With steel and sword came to the fore, To win his Dame. But out of date now horses are, The women want a handsome car, And naught of fame. They ask in men not bravery, But just a touch of slavery To keep 'em tame.

So Lochinvar your fame and sword Would merely meet with glances bored, From Rose or Pearl. But come with mighty voice of Money More power it has than tones of honey, And get your girl. 'Tis all the same how'er you win her You'll have her there to cook your dinner Through Life's mad whirl.

FROM GENERATION TO GENERATION
HERE is a great deal in the newspapers today regarding the proper management of our forests. The term used in this connection is management for a sustained yield. What does this mean?

Canada stands in a unique and very fortunate position with regard to her forest producing lands, in that over nine-tenths of them belong to the state. We are not required, as is the United States, for example, to purchase back our forest lands at a price many millions of dollars so as to have some guarantee of future supplies of timber.

Sustained yield, then, of Canadian forests does not represent the problem that it does in the U. S. We own the forest lands. It remains for the people to say what will be done with it. We have passed the stage when the man in the street still thinks of the forest of Canada as inexhaustible. We have passed the stage when the man in the street thinks that the forests, even if protected from fire, will manage themselves so as to meet the requirements of the wood-using industries.

We have reached a point now when the public realizes that forests are a crop, a product of the soil, the same as farm crops. We know from many years of experience that farms will not keep on producing unless they are properly managed. The science of agriculture has long been recognized as necessary to the proper use of land both from an economic and productive point of view.

Now comes the recognition that the science of Forestry is just as necessary if our forest-producing lands are to produce forests crops in sufficient quantities and of the required quality to meet the demands of the wood-using industries. Here comes the idea of sustained yield. It is a term that signifies a sane and correct use of forest land. A use that will keep the land continuously productive of wood crops and not simply one crop.

Let us take for example, a forest crop that is ready for the harvest. If we harvest it with the idea of making the land more and more productive, we must practice forestry. The sustained yield idea of permitting such lands to lie idle and useless for decades—or centuries—to come. It eliminates the idea of leaving a fire trap for that arch-forest devastator, Fire, to sweep over year after year.

Would we be content to use our garden once to raise a bumper crop, and then consider it had performed its function and let it grow into a wilderness of weeds? Would we not consider this an insane idea?

What, then, of our public forest lands that either net us a profit in taxes, or become a burden through lack of employment caused by vanishing forest supplies? Management of our forests on a sustained yield basis is the way out—the only way out—and the sooner we recognize the fact the sooner our forests will be made healthy and productive from generation to generation.

Correspondence

To the Editor,

Replying to the letter in your last issue of the Islander "Boost Your Own Town". I am not taking exception to his observation re the excessive overhead as the result of the perpetual motion of the delivery system in vogue in Cumberland. But there are stores here that do not require and do not have any use for, nor do they employ trucks, but who operate their overhead with the least possible expense, and who sell their merchandise at prices that are as low as can be bought elsewhere, and at the same time are expected to give credit. The cash trade, unfortunately, is a small factor in so far as food and clothing is concerned, although cash is abundant where luxuries are indulged in. What I mean by luxuries refers to anything that is spent that prevents the consumer from meeting his or her bills every pay-day as used to be the case long ago. The motto of a good many seems to be "pay any old time or when you feel like it". Whilst there are others who turn up at pay-day and hand the store or stores about 10 per cent on a bill that has been owing for two or three or more months, which must be very consoling to the merchants or business man who may have pressing bills to meet himself.

What would this class of customer do if he lived in such places as Powell River, Anyox, Britannia Beach, where there is no credit. Of course, he would have the money, because he would have to make his income and expenditure balance every pay day. He could do that just as easily in Cumberland, and at the same time it would enhance his self respect and he would be looked up to instead of down upon. Joint action by the business men of this city could remedy this situation. The reader might say when reading this: Then why don't they. To quote Shakespeare "To be or not to be" that is the question. Aye there's the rub.

Observer.

HEALTH SERVICE

of the

Canadian Medical Association

Questions concerning Health, addressed to the Canadian Medical Association, 184, College St., Toronto, will be answered personally by correspondence.

THE WAY TO HEALTH

"Give me health and a day, and I will make the pomp of emperors ridiculous!" wrote Emerson. There is no other single item of greater importance in our lives than health, because health is necessary for success in practically everything which we undertake.

Health is not merely a matter of evading disease. We do, of course, seek to evade disease, but in order to enjoy health, we must give attention to our manner of living. A condition of health is a normal condition which accompanies right living. Disregard of the needs of the body, abuse or neglect of the body, sooner or later result in a loss of health, if not actual disease.

The benefits of good health are so obvious that it is not necessary to present arguments in their favor and take time to discuss what everyone is willing to acknowledge. The question of importance is how all may acquire and enjoy the benefits which good health has to offer.

The way is not difficult. It requires that a simple, sensible regime be the regular habit of life. The habits which lead to health are neither numerous nor difficult to understand, and they can readily be made the habits of our individual lives.

We came into this world with a body which has been given to us. It may have certain imperfections, but what we are interested in are its po-

tentialities. Physically and mentally we have possibilities, and whether or not these are developed to the full determines what measure of our attainable physical and mental health we enjoy.

Some have more difficult task than others, but practically all can arrive at a condition which makes life a pleasure, providing the effort is made. Like everything worth while, health represents an effort, but also like things worth while, it is worth striving for.

The beginning of the road to health is marked by a sign-post pointing out the need for an understanding of your own body. The road you will follow depends somewhat upon your condition as you start out. You should have an appraisal made of your body to know if there are imperfections that require attention; your capacity should be known so that you may gear your pace to it.

Start out with a Periodic Health Examination so that you may know yourself and your needs. From that, go on to a full measure of health by living according to the simple rules of health.

A Negro theatre, the first of its kind in Germany, was opened recently in Berlin.

Coal Mining
Condition Stated

(Continued from Page One)

per long ton, Lieut.-Col Villiers said he would be happy if his mines could produce at double that figure.

Dealers' Price \$7.

Regarding cost of coal in Vancouver he said:

"The price received at the mines f.o.b. scows is \$6.47 per short ton. Transportation, insurance and harbor dues bring the price to about \$7. per short ton alongside dealers' wharves. The dealers have many expenses, including screening, sacking, cartage, etc., to meet before the coal is delivered to consumers. As to what margin remains in dealers' hands I am unable to state.

"The Island collieries have no monopoly of the domestic market, either in Vancouver or Victoria. There is keen competition both from other B.C. mines and Alberta lignites. Considering the long haulage from the Alberta mines to Vancouver one would think that the Island coals should be able to undersell and exclude Alberta lignites, and so they could if it was not for the high cost of production and distribution of Island coal.

"Alberta mines can and do produce coal at less than half the cost of production on Vancouver Island; in fact, various mines in Alberta in which we are interested sell their coal with a fair margin of profit at a price considerably less than we can produce it at the tipple on the Island. I wish we had those mines here."

Coal May "Come Back".

During the past five years, Col. Villiers said, his company had reduced the cost of coal by a \$1 a ton. He doubts if much further reduction can be made.

"I am afraid that I have drawn a rather gloomy picture of the present state of the coal industry," he said, "but I feel perfectly confident that the day of coal is by no means over. More scientific methods of using coal are constantly being invented; in fact it can be said with truth that the more scientific use of coal is largely responsible for the decreased tonnage of coal used. For instance, in the generation of electric power, the consumption of coal per kilowatt hour has been cut during the last ten years by 45 per cent. Great reductions have also been made in the consumption of coal used to generate steam in locomotives. Naturally in the long run, increased efficiency in the use of coal must be beneficial to the coal industry, a greater demand will be created and the competition of other fuels will be overcome.

"Both in Europe and America intensive research work is being carried on and so it seems probable that within a few years we shall see coal displacing oil in many countries, not in its present state, but in liquid form.

Col. Villiers spoke of the advances made in Germany in production of oils from coal and of low temperature carbonization. He doubts, however, if low temperature carbonization plants now in existence are being operated as economic successes.

"Possibly the most immediate improvement we may see in the coal business will be due to advancement in the use of coal in pulverized form. Considerable quantities of pulverized coal have been used on Vancouver Island and in Vancouver for some years past. The Island collieries supply over 70,000 tons of coal for this purpose annually, which incidentally is a higher proportion of our total output than the percentage of the output in the United States used in similar form.

Dependent on Vancouver.

"Unfortunately at present pulverized coal can not be successfully used to compete with oil fuel in the heating of the smaller class of buildings. In fact manufacturers of one of the best known powdered fuel plants informed me that they could not recommend the plant for use under a boiler of less than 100 h.p. But there are other methods of using coal for domestic purposes which I think can compete with and in some ways better than oil furnaces. The method I refer to is by the use of stokers. The "iron fireman," for instance gives the greatest satisfaction and is very economical. There are, of course, many other stokers which can be installed at no greater cost than oil furnaces. They are thoroughly automatic and need very little attention beyond the removal occasionally of the clinker formed by the ash. These stokers are efficient, economical and perfectly safe. There can be no danger of explosion with them.

"In conclusion, I should like to emphasize the importance of our coal industry to you, representatives of trade and industry in Vancouver. The Island collieries spend over \$5,000,000 a year in wages and stores, 80 per cent of this amount is paid in wages. Both our mines and mining towns on Vancouver Island are based on your city. Nearly all our supplies, both for the mines and mine employees, and also for the hundreds of other people directly or indirectly dependent for their living on the mines, are purchased in your city."

—Vancouver Province.

Instruction in the use of the telephone has been undertaken in several London schools.

ALBERTA PLACES BAN
ON IMMIGRATION

Edmonton, April 14.—Announcement was made today by Hon. Geo. Hoadley, minister of agriculture, that a ban has been placed on immigration into Alberta until such a time as the unemployment situation clears up. The only type of immigrants who will be welcomed are those who may come with the purpose and ability to settle on the land of their own, with sufficient means to maintain themselves for a reasonable time.

Campbell River

Mr. and Mrs. Geo. Ross, VanStone Apartments, are leaving Friday for Victoria, where they will spend the Easter week-end.

Mr. and Mrs. Ungurian and family, of Vancouver, have moved to Campbell River.

Fred Thulin, of Lund, arrived on Sunday and is the guest at the home of his son, Oscar Thulin.

Minto

Ed. Williamson is the proud possessor of a nice new run-about, with which he will get over the ground quicker than ever.

Mrs. Hassell, Sr., of Vancouver, has been visiting with her daughter, Mrs. Genge, for the past few days.

Edgar Carter has gone to Victoria to visit friends during his convalescence.

Merville

C. Widen, who has been in the hospital for a few days, is able to be about again.

Bob. Pattison, of the I. T. camp, spent Sunday with his mother.

A. Anderson has returned from Fanny Bay.

A nice crowd attended the whist drive and dance last Wednesday. The prizes were won by: Ladies, first, Mrs. J. McLoughlin; second, Miss Mavis James; consolation, Mrs. Pickering; men, first, L. Pearce; second, W. B. Churchill; consolation, S. Hodgins. Travelling prizes were won by Mrs. Berkenstock, Sr., and Mr. Blackstock. Mrs. King, W. Parkin, Geo. McCabe and H. Baker provided music for the dance.

Courtenay Locals

Miss M. McLoughlin, of Summerland, who has been visiting Mr. and Mrs. C. Rive for the past two months, returned home Monday.

Mrs. Williams and Agnes left for Seattle on Wednesday.

Mrs. W. Booth spent the week-end visiting in Nanaimo.

Mr. and Mrs. L. B. Noel have returned from a visit to Victoria.

Mrs. Hunt, of Nanaimo, has been visiting her husband in St. Joseph's hospital.

Douglas Martin, of Kootenai, Idaho, is visiting his uncle, Bruce Towler.

Mrs. W. J. McQuillan is reported improving in health. She is under the care of a specialist.

Mrs. R. Hortal leaves for Vancouver on Wednesday morning.

Miss McLennaghan, director of home economics, paid a visit of inspection to the Courtenay schools last week. During her stay Miss McLennaghan had a long conference with the secretary of the board of school trustees relative to the home economics center here.

Two British policewomen are to take up their duties in Alexandria, Egypt, for the suppression of the white slave traffic. Many European girls lured on by white slave traffickers are said to pass through Egypt enroute to the Far East.

Good Friday At
Courtenay Golf Links

A captain versus president competition, match play, has been arranged at the Courtenay golf course for Good Friday with the following draw:

R. Cliffe	W. Dobson
S. McLeod	W. Cliffe
J. Dick	C. Grant
F. Field	F. McPherson
A. Aitken	G. Tarbell
A. Auchinvol	A. Campbell
Leo Anderton	J. McKenzie

This same draw will play on Sunday, April 20th, medal play, 18 holes, full handicap allowed.

NESTLE'S MEETS
HUGE DEMAND

Growth of Company Reflected in New Slogan

Bradford Ellison, Manager of the Nestle's Food Company of Canada, Limited, famous manufacturers of condensed and evaporated milk, has returned from a recent extensive trip across Canada in the interests of his Company.

Mr. Ellison commented on the spirit of optimism prevalent throughout the Dominion, and expressed the conviction that the conditions were never more favorable for business expansion. Because of rapidly expanding sales and in line with recent intensive developments, Nestle's have evolved a new slogan which they feel will more fully express the world-wide popularity of their product. In future all Nestle's advertising will carry the slogan—Nestle's—World's largest producers and sellers of condensed and evaporated milk. The slogan is an admirable indication of the growth of the Company, which is now a universal institution selling its products in every country on earth.

During his recent visit to the United States, Ramsay MacDonald talked daily over the trans-Atlantic telephone to his office at No. 10 Downing street, London.

Elizabeth Jeff's, policewoman of Erie, Pa., figured in on 278 arrests during the past year.

Shooting put
stop to
telephone
service

Telephone men were riding along in their big truck near Nanaimo when a giant tree crashed down on the highway. Someone saw it toppling just in time to stop the truck and save the lives of its occupants.

However, the telephone wires were brought down in the crash and every circuit between Nanaimo and Victoria was put out of order.

The telephone men followed their close shave by a speedy restoration of service. Repairs were completed within half an hour, in many cases lines being back in service before they were reported out of order.
