Pulverized Coal May open Markets For B.C. Industry

Conference at Victoria Hears Many Prominent Men; Transportation Officials Show Willingness to Assist; Movement of Crop Will Benefit B.C.

The use of pulverized for general industrial purposes, including both land and water communications; the adoption of improved spark arresters on Canadian locomotives, once these are proved practicable, and a systematic consideration for British Columbia coal wherever its use can be economically effected, were pointed to as three means within the power of British Columbia business and governmental circles for the relief of the soft coal industry of the province, in a general discussion which took place yesterday afternoon.

While no direct request was made to Hon. W. A. MceenKzie, who presided at the conference, many delegates pointed to the serious inroads made into the coal industry by crude oil imported duty free, and indicated that Government action to bring the full wegiht of its power behind the increased use of the home product would be welcomed. The lightening of the tax and royalty on coal production was directly urged on the Government, as was the use of every means in its power to encourage a wider use of the natural British Columbia product that supplies a livelihood for large numbers of men and their dependents on the coal centres of the province.

Miners Hard Hit

The miners' side of the picture was given to the conference by George Pearson, M.P.P., who said 1,644 coal miners had been displaced in the coalfields of the province since 1920.

"What we want now," said Mr. Pearson, "is immediate relief, and the only way this can come for Vancouver Island miners is by securing more coal orders. We feel that the transportation companies have an obligation to perform in regard to the miners, and that this obligation has not been fully met.

"The progress of this Island is vital to transportation companies and they are using oil. It is a source of disappointment to Nanaimo to see the growing use of fuel oil on land and sea. The men have only one weapon, a weapon we propose to use to the limit, and that is the influence we may have with the Government of this country," concluded Mr. Pearson.

C. F. Davie, M.P.P., said he endorsed the views expressed by Mr. Pearson in regard to the distress in coal mining areas through the shrinkage of employment.

New Spark Arrester

W. Ray, inspector of Provincial Government Railways, told of tests he had witnessed with the new Brown-Cyclone spark arrester, to reduce fire hazards in the operation of locomotives with both oil and coal. The tests had shown, he said, that, while certainty had not yet been demonstrated, the new device was far in advance of that known as the "mechanics' front-end," now in use on Canadian locomotives, and, if applied by the Dominion rail systems, would enable a much larger use of coal with efficiency. The cost of extra fire patrols, and the penalizing costs of fire outbreaks attributed to the railroads, had in the past encouraged the use of fuel oil rather than coal, he declared.

F. Z. Coverhill, the chief forester said records of his department showed that there was one fire for every three miles of road on the average coal-burning systems, and one fire to every ten miles where oil was in use. He was not prepared to say that perfection had been reached in spark arresters.

The cost of changing from the present system in use of locomotives to the new device, if it were proven suitable, would be between $200 and $400 each, the conference was told by Clyde Leavitt in reply to further questions. Mr. Leavitt, chief fire inspector for the Dominion Railway Board, strongly urged the attention of the delegates be given to recent tests with the new spark arresters. Nine-tenths of the fires in coal-burning systems would be reduced if the new device were applied, he believed.

The railway board did not undertake to tell the companies what they should use, but had drawn the attention of both transcanada systems to the new device some weeks ago, and the matter was still under advisement, said Mr. Leavitt. There was reason to suppose that the new device would also contain an element of fuel economy, which might serve to popularize coal for locomotive use.

Charles A. Cottrell, of the Canadian Pacific Railway, said that every sympathy was felt for those concerned in the coal industry of the province. The railways, on the other hand, had a duty not bounded by provinces, and, as far as his road was concerned, Island coal could only be used to a point eighty-two miles east of Vancouver, at best, as was being actually done at present. If coal were burned in the mountain division it would have to be bought from Alberta, and each little producing centre depended to some extent on the section of railway nearby for its support.

Stocked Up On Coal

Last year the Canadian Pacific Railway stocked up with coal in anticipation of a big grain movement. The movement did not take place and as a result large coal reserves had been on hand, with consequent reduction in purchases later in the season. There was, he added, every prospect of a good grain crop this season, and, just as soon as the crop was moving the road would be in the market again for coal. Progress along the lines of experimentation had to be workekd out slowly, but something would likely be worked out that would be of benefit to the coal situation on the Island, he thought.

Railways Sympathetic

J. M. Cameron of the Esquimalt & Nanaimo Railway, said that the road was very sympathetic to the subject under dispute. The Island was different from the Mainland in many respects, and was a heavily timbered section with a long dry season. Conversion from oil to coal burning in locomotion was a costly affair ,with bunkers and other facilities that would have to be supplied.

World Condition

Col. T. A. Hiam, representing the Canadian National Railways, said the British Columbia Government was to be congratulated on having brought about the conference, which officials of his road felt would have an immediate effect in the betterment of conditions for the British Columbia coal industry. Conditions facing the industry in this province, he said, were not unique, but were being shared generally throughout the world.

Expect Good Crop

"Like the Canadian Pacific, we are looking forward to a good grain crop this year." continued Colonel Hiam. "A rough estimate of the crop might be anywhere in the neighborhood of 400,000,00 bushels compared with about 260,000,000 bushels last year. We would require for our share in that business, so far as the westward movement is concerned about 15,000 tons of coal, so you see there is some prospect of early relief for the coal mines of this province.

"You know the railways are not the only 'bad boys' in this business. There are other bad boys as well, and I am inclined to believe you are expecting too much of the railroads if you look to them for the solution of all your problems,' 'continued Colonel Hiam. "So far as the Canadian National Railways are concerned, we would be delighted to have representation on any committee that is appointed as a result of this conference to further the use of B. C. coal, and to assist in any way that is open to us the work of that committee," he concluded.

Use of Oil Necessary

Speaking for the B.C. Coast Service, Capt. C. D. Neroutsos said that service used both coal and oil. To keep up the requisite speeds demanded by fast passenger schedules oil was necessary, he explained, as the schedules could not be maintained with coal under the present system. The service carried a very large number of people into the province every year and competed with oil burning ships in the movement of tourists through B. C. points to Alaska. That form of competition could not be met with coal, he commented, when other lines were using oil, and the public itself set the demand for fast service schedules.

Oil and internal combustion engines were being used all over the world for shipping nowadays, continued the manager of the B.C. Coast Service. It was physically possible for the service to burn coal in some of its ships, and this matter was being taken under advisement, he added, with the hope that something of interest to local producers might be arrived at.

For Power Generation

Tom Uphill, M.P.P., stressed the point that the increasing use of hydro-electric power was ousting the

FISHING BULLETIN

Trout—Fair to good reported from Campbell Lake, Buttle Lake, Sproat Lake, Cameron Lake, Comox Lake, Cowichan Lake and Shawnigan Lake. Species: Cutthroat, rainbow, lake trout and dolly varden. Methods: Fly and trolling; just after sunrise and just before sunset.

Salmon—Fish running well in Brentwood Bay, Deep Bay, Cowichan Bay, Qualicum, Comox, Parksville and Campbell River. Species, cohoes and springs. Methods: Trolling deep or on surface with light tackle.

Bevan Party On Successful Hike

A party of eight comprising the Misses Isabel and Bessie Watt, Marian Webber and Annie Hofstatter, of Bevan; Helena Fairhurst, of Nanaimo; Robert Watt and Otto Hofstetter, of Bevan; and Melford Biggs, of Nanaimo, returned from the Forbidden Plateau Saturday after an enjoyable hike.

They went in by Dove Creek and spent four days. They hiked through to Circle and Mary Wood lakes, and climbed up the mountain to the edge of snow. The weather was ideal throughout the trip.

On the way out they met the Richard Barthelmess party going in. Miss Fairhurst is the guest of Mrs. Oswald Harmston, of Bevan, and Mr. Biggs is visiting his aunt, Mrs. Jack Webber, also of Bevan.

Local Athletes In Finals at Olympiad

Word was received late on Thursday night that George Brown, Cumberland athlete running in the 100 yards and 220 yards at the British Columbia High School Olympiad, at Vancouver, came second in his heats in both events, being beaten in the 100 yards race by Large, last year's champion. The finals will be run off this afternoon or evening, the first and second in each heat competing.

Kathleen Brown, daughter of Mr. and Mrs. W. Brown also managed to win her way through to the final of the girls' 100 yards which will be decided this afternoon or evening.

Cricket Game Saturday at 2.30

The Cumberland and Courtenay cricketers, after a rest of several weeks will stage a game on the "Y" ground, Cumberland on Saturday afternoon, commencing about 2.30. P. McLaughlin, who play for both Cumberland and Courtenay will be on the team for the latter this game. Cumberland team will be chosen from F. V. Hall (capt.), J. Idiens, vice-capt., J. Vernon-Jones, S. Gough A. J. Taylor, C. V. Dando, G. I. Guy, T. Carney, J. Heaton, S. Boothman, T. H. Mumford, J. Vaughan and L. H. Finch.

Cricketers Take Lease Of "Y" Grounds.

Through the generosity of Lt.-Col. C. W. Villiers, the Cumberland Cricket Club have been granted a lease of the "Y" ground and have assumed control of the same. The Colonel, readily recognizing the great work put in by the cricketers on the "Y" ground granted the lease which gives to the cricketers absolute control of the ground. It is to be hoped that all parties granted permission to use the ground will do their utmost to assist in keeping the same in good condition. It is intimated by the officials of the cricket club that any persons or persons caught damaging the property in any shape or form will be instantly prosecuted.

WEDDING

Rennison—Bannerman

Christ Church, Vancouver, was the scene of a very pretty wedding on Friday afternoon at five o'clock, when Margaret Christina, youngest daughter of the late Mr. Thomas Bannerman, of Cumberland, became the bride of Mr. George Garrett Rennison, manager of the Canadian Bank of Commerce at Revelstoke, and son of Mr. and Mrs. R. Rennison of Wexford, Ireland. The bride is a member of pioneer family of Cumberland, formerly of the local teaching staff, and until recently on the staff of the Revelstoke schools.

The bride, who was given in marriage by her brother, Alderman Dan. Bannerman, of Cumberland, wore an exquisite creation of French lace, in egg-shell shade, featuring the graceful long lines and uneven hemline of the present mode. Her large picture hat, shoes and gloves, were of matching shade, and she carried a shower bouquet of Opheleia roses and lilies of the valley.

She was attended by Miss Fern Abbott of Vancouver, who wore a charming frock of blue georgette with biege picture hat and matching shoes and who carried a bouquet of sweet peas and fern.

Mr. Richard Harris of Vancouver, was best man and the ceremony was performed by Dean Rennison, cousin of the bridegroom.

Immediately following the ceremony Mr. and Mrs. Rennison left for Toronto en route to New York from which port they will sail for Ireland to visit Mr. Rennison's parents, extending their tour to England and France. For travelling Mrs. Rennison wore an ensemble of blue crepe-de-chene, a blue broadcloth coat, and a biege picture hat.

The bridegroom's gift to the bride was a fur coat, to the bridesmaid a brooch set with pearls and to the best man white gold cuff links.

On their return Mr. and Mrs. Rennison will make their home in Revelstoke.

Amongst the guests present at the wedding were Mrs. Grace Conrod, Mrs. A. Gray, Mr. and Mrs. Dan Bannerman, Leland and John Bannerman and Miss Edna Conrod, Cumberland.

Remains Of Dead Power Plant Chief To Be Cremated

Well Known Figure of District Will Be Mourned By Many

George Forbes Harvey, superintendent of the Puntledge Power Plant of the Canadian Collieries Dunsmuir, Ltd., dies Tuesday morning in the Cumberland General Hospital at the age of 56 years. The deceased had been in the employ of the Company for a great many years and was universally liked. He had been on the sick list for some time but his death in the local hospital this morning came as a distinct shock to a large number of the residents, who will mourn the passing of a genial soul.

The remains of the deceased were taken over to Vancouver on Thursday by Mr. T. E. Banks to be cremated in the Vancouver Crematorium.

New Method Of Treating Coal

R. L. Process for Low Temperature Carbonization of Carbonaceous Substances (Coals, Slacks Lignites) Has Been Patented in Canada

It is a matter of newspaper and political comment that the unemployment situation in British Columbia collieries is serious.

Hence, any scheme which would cause an increased consumption of coal and thereby afford additional employment to miners should be seriously considered and investigated. This much, at least, is due the unemployed.

With this in view attention is drawn to the merits of the R. L. process for the low temperature carbonization of carbonaceous substances such as coal, slack and lignites. It is claimed that this process will encourage the consumption of coal and stimulate the mining and other industries of the Province.

The low carbonization of coal by a speedy process, inexpensive in operation and capable of being installed at a low initial cost, with the equipment safe-guarded against high depreciation, should materially stimulate the consumption of coal ,increase employment and thereby give out-of-work miners the opportunity to earn food, clothing and shelter for themselves, their wives and children.

A pilot plant, capable of treating 50 tons of coal or slack or lignite of any kind by the R. L. Process is ready at Spokone, Washington, to demonstratee the economic feasibility of the process and the truth of the various claims of the inventors, Messrs. Records and Louttet of Spokane.

The investigator can choose his own raw material, his own expert and his own operatives to effect the low carbonization of his raw product by the use of superheated steam and to check up the statements of the inventors.

The investigator's expert can investigate the following claims and his report can state definitely as to the truth thereof.

1. Coal, slack or lignite of any kind is equally suitable for treatment, hence practically worthless slack and lignite can be changed into clean, smokeless, valuable fuel with *free burning, high heating, qualities* at a low cost. Further, differing

TO TOUR ISLAND

Clarence Lindman, who has recently assumed the position of general manager of the San Francisco Examiner, and E. T. Hoffmeyer, general manager of the Seattle Post-Intelligencer, arrived in Victoria Saturday night from the Sound City and are staying at the Empress Hotel. They are making a tour of the Island in the company of George I. Warren, publicity commissioner for Victoria.

Much Needed Ferry Operating

A. H. SWAN COMMENCED THE DENMAN FERRY ON MONDAY

Last Monday, after many, many months of effort, the Denman Island-Buckley Bay ferry became a reality when Mr. A. H. Swan, started the run across from the Island to Buckley Bay. The ferry is subsidized by the Provincial Government and is the outcome of a combined effort of the Farmers' Institute of Denman Island, Courtenay-Comox Board of Trade and Dr. G. K. MacNaughton, M.L.A.

That the ferry will be a success goes without saying and Capt. Swan in announcing his schedule intimates that as near as possible the ferry will run to coincide with the E. and N. Train service and also that of the stage service. The first ferry leaves Denman Island at 8:30 a.m., 10:15 a.m., 2:15 p.m., 4:30 p.m. and leaves Buckley Bay at 9:15 a.m., 11:15 a.m. 4:30 p.m. and 5:30 p.m., every day except Sunday. The Sunday service will be slightly modified, the first boat leaving Denman at 8:30 a.m. and the next at 5:00 p.m. and leaving Buckley Bay at 9:00 a.m. and 5:30 p.m.

Visit Cumberland After long Absence

Mr. and Mrs. Ralph E. Frost and daughter, Miss Norma, arrived in Cumberland on Thursday to renew acquainttances when they were residents here some eight or nine years ago. Mr. Frost at the time of his residence in Cumberland operated the Drug Store now run by R. C. Lang, who took over the business seven and one-half years ago. Both Mr. and Mrs. Frost were exceptionally well known throughout the district. Mrs. Frost being at the time a prominent pianist, her services being in great demand at all dances and parties. Miss Norma Frost along with her brother attended the local public school and also made many friends and whilst in the district, Mr. and Mrs. Frost would like to meet as many of their old friends as possible before returning to their home in Covina, California.

Bowling Green Being Drained

During the past week, the bowling green has been fully occupied each evening and some real good games enjoyed by the members. The green, will undoubtedly become a favorite place during the summer months and those not wishing to play on the green can sit on the spacious cool verandah and enjoy watching others play. Tuesday evening the members travelling down to the green received a decided shock when they discovered that a trench half way across the green and about two feet deep had been cut. On investigation it was learned that Mr. A. D. Clark, of Vancouver, who is the superintendent of greens there had paid a visit to the local green in the course of a holiday jaunt. After consultation with members of the executive and the architect it was decided that the green should be drained immediately with the result that the trench was dug. In the fall the other half will be trenched and Mr. Clark states that next year the green will be in first class shape. The alterations being undertaken, however, do not interfere with play as four rinks are still available. A singles handicap is being arranged and entries are now being received. The draw will be made on Saturday and play commenced in the first tournament at the new bowling green, the same day. Already half of the members have entered and it is expected that by closing day, Saturday, every member of the club will have his name on the list.

Ladies May Form Club

Whilst there has been nothing definite done up to the present time, there is talk of the ladies forming a club. Several well known ladies of the town have been heard to remark they can beat any of the men they have seen play so that if a club is formed a most successful and interesting future is in store for the bowling green.

Long Cherished Aim Attained

Bowling Green Is Declared Open; Colliery Company Thanked for Assistance Rendered

Shortly after 11 a.m. on Saturday last, a long cherished aim was realized when the Cumberland bowling green was officially declared open by Lt.-Col. Charles W. Villiers, general manager of the Canadian Collieries (Dunsmuir), Limited.

Prior to the opening ceremony the Cumberland City Band appeared on the scene and rendered several popular selections, the huge throng present appreciating the efforts of bandmaster Jackson and his men greatly. In opening the proceedings, A. J. Taylor, president of the Cumberland Literary and Athletic Association said it afforded him very much pleasure to welcome so many of the residents of Cumberland there that morning. He also extended a cordial welcome to the officials of the Canadian Collieries (Dunsmuir), Ltd and the sixteen members of the Nanaimo Lawn Bowling club who had come up for the express purpose of assisting in the opening ceremony. The officials of the Canadian Collieries said Mr. Taylor had been very generous in their offers of assistance to the board of management of the Athletic Club in their efforts to include lawn bowling in the activities. That assistance was very much appreciated and he felt sure that the feeling of friendship that existed between the management and the employees would be greatly enhanced. He paid a great tribute to Mr. W. A. Owen who as the architect was responsible for the building of the green and club house, a club house, second to none in the Province and made possible entirely through the generosity of the Canadian Collieries through Lt.-Col Villiers. Mr. Taylor said he did not want to take up any more time but would call upon Lt.-Col. C. W. Villiers to say a few words and to declare the green open.

Col. Villeirs Throws First Ball

The Colonel was very enthusiastically received and in the course of his remarks said it afforded the officials of the company a great deal of pleasure to have been of assistance in bringing about the completion of the bowling green. He wished the club a very successful future. He had been told, he said, that he was to throw the first bowl, but that "jack" looked a long way off. He had never thrown a bowl before, but would do his best. The bowl was then given to the Colonel, who without any effort landed in the ditch , which proved the "jack" was not too far away for him.

Other prominent men present included Mr. P. Perry, president of the Company, Mr. John Hunt, Mr. Thomas Graham, Dr. G. K. MacNaughton, M.L.A., and Mr. Alex. Auchinvole.

Dr. MacNaughton, who was called upon to say a few words, congratulated the board of management on at last achieving one of their greatest ambitions, the building of a bowling green. He did not know very much about the game but what little he had seen of it he had formed the opinion that it was very skilful and at the same time a very healthful form of recreation. He wished the club all success.

Presentations Made

The president of the club, Mr. Taylor said before proceeding any further he had one or two very pleasing functions to perform. The board of management had decided that such help received from the Colliery Company should not go unrecognized. He asked Colonel Villiers to accept a pair of bowls and a "jack" mounted on a beautiful statute. The Colonel, in accepting the presentation said it was a great surprise to him to receive such a very nice present. He did not know very much about the game of bowling but with the handsome pair just given to him, he hoped to come down to the green sometimes and get one of the members to show him the way.

Mr. John Hunt, general superintendent was also the recipient of a pair of bowls and in accepting them said he was always pleased to be associated in any way at all with amateur sport and intimated that he at all times was quite ready to help in promoting such sports to the best of his ability. Concluding he said, "you will always find me here."

Mr. W. A. Owen was also the recipient of a pair of bowls and a "jack" mounted. Mr. Taylor remarking that Mr. Owen had been of great help to the board of management and the green could never have been completed but for his good work. Mr. Owen in reply said "I am not going to make any speech, my work has been completed but I thank you very much for your nice words and the beautiful gift."

Mr. Thomas Graham was also presented with a "jack" mounted on a beautiful statute, the president saying that during Mr. Graham's connection with the Colliery Company, the board had always received a courteous hearing from him and at all times great assistance. Mr. Graham in reply said it had afforded him great pleasure to have been of assistance. Looking at the bowling green he could not help but feel glad of the fact that after years of deliberatiton a bowling green had become a reality. He felt sure thta many of the older members who had got past the time participating in the more strenuous games would find just the relaxation needed to give them a great deal of benefit and enjoyment. He wished the club all success in the future.

Mr. T. H. Williams should also have been presented with a souvenir, but as he was not able to be present, the gift would be presented to him at a future date.

Mr. P. Perry (the president of the company who happened to be on a visit to Cumberland was called upon for a few words. Mr. Perry said it was always a pleasure to him to come to Cumberland. He had been brought up in a mining village in the old country where all was black and smoky, but coming to Cumberland was like coming to a health resort instead of a mining camp. The beautiful country surrounding the city looked so peaceful and inviting and with the new bowling green added to the many activities of the club he felt sure that much enjoyment would follow the use of the green. He was very glad indeed that the Company could be of assistance in procuring for their employees some of the amenities of life. With a broad smile on his face, Mr. Perry continued, "but I must say I am disappointed, when I see so many beautiful statutes depicting Queen Elizabeth presenting some favor to Sir Francis Drake and not being one of the recipients." He wished a successful future to the club.

Mr. Taylor before the close of the proceedings notified all present that through the generosity of Lt.-Col. Villiers a handsome cup had been presented for annual competition, between the employees of the company in the Nanaimo and Cumberland divisions.

The sixteen members of the Nanaimo club coming up to participate in the opening ceremony were entertained at a dinner at the Union Hotel and in the afternoon played friendly games with a number of the Cumberland members. All Saturday evening and again on Sunday, the green was fully occupied.

Drowned Man Interred At Nanaimo

Puntledge river claimed a victim Sunday afternoon when Josef Francyck, of Polish extraction, a man of twenty-eight years who was employed on the E. & N. section gang, got into difficulties in the pool which has been used by a number of bathers and goes by the name of "Dead Pood".

After attending the baseball game Francyck, accompanied by a nephew, went to the river and not being a good swimmer soon got into difficulties in the current. He called for help and the young man with him relayed the call. It was heard by Mrs. Veitch, who lives at the top of the steep river bank, and sent her husband to the rescue. Mr. Veitch succeeded in recovering the body from the water and with George Smart and his two step-sons, Charlie and Morris, endeavored to restore respiration. In the meantime Dr. McKee, who had been sent for, arrived and pronounced life extinct when the body was taken from the water. No inquest is to be held. As there was apparently *little water in the lungs it is possible* that natural causes contributed to the fatality.

Deceased was unmarried, but had a married sister, Mrs. Ladysh, living in Cumberland.

The funeral of the late Joseph Franchyk, who was drowned in the Courtenay River last Sunday, took place Wednesday afternoon at 3 o'clock from the D. J. Jenkins, Limited chapel, where Rev. W. R. Welch conducted services. Interment took place in the Nanaimo cemetery with the following friends acting as pallbearers: S. Gajda, S. Tomszk, R. Zakyk, K. Tomszyk, T. Debeak and J. Zuiailz. The following floral tributes are gratefully acknowledged.

Heart—Mr. and Mrs. Dybeak, The Pall-bearers. Spray, Mr. and Mrs. F. Hynek, Mr. and Mrs. W. Johnson, Mr. and Mrs. L. Winthrop and Billy, Mr. and Mrs. T. Johnstone, Mr. and Mrs. Krall, Mr. and Mrs. Kovich. Mrs. D. Plensky, Mr. and Mrs. Bohoslowich, Mrs. Romanchuk, Mr. and Mrs. T. Kowba, Mrs. J. Charvat, Mr. and Mrs. B. Webb.

Miss Florence Sehl, matron of the local hospital has been holidaying at her home in Victoria.

BIRTHRATE DROPS

ACCORDING to figures made public by the United States Bureau of Education the American birthrate is declining rapidly.

If it were not for large families owned by men and women whose parents came from some land across the water, things would probably be more alarming, for in most sections few large families of old American stock can be found.

Even as it is, less than four children per two hundred Americans were born in 1928, whereas five children were born in 1915.

In 1920 we had 4,320,000 children in the first grade. Six years later with ten per cent. more population there were less than four million children in this grade.

Keep this up and it will not be very long before some wise Mr. Barnum will round up the few remaining Americans and exhibit them at so much per look.

During the recent election campaign one of the candidates expressed himself as being opposed to immigration especially assisted immigration as a means of populating the country and gave it as his confirmed opinion that the only way to populate this country was via the stork. After obtaining the figures on the American birth-rate it is quite plain to be seen that our political friend was away off in his reckoning when he said "populate via the stork."

CROW'S NEST PASS COAL CO.

THE ANNUAL financial statement of Crow's Nest Pass Coal Co. presented to the shareholders at the annual meeting held at Fernie on June 11, showed net profits for the year ended December 31, 1929, of $262,236 after all charges. Directors and officers were all re-elected.

The balance at the credit of profit and loss account brought forward from 1928 was $68,345. To this had been added the sum of $155,233 which was transferred from contingent liability reserve, and also $2,514, being the amount of adjustment of income taxes, 1928, and prior. There had also been added the sum of $262,236, being the company's net profit from all sources of the operations for the year 1929, after making provision for the Dominion income tax for the year 1929 amounting to $18,571, making a total of $488,329. From this amount the directors have paid four dividends of 1½ per cent each, making a total of 6 per cent for the year amounting in all to $372,697.50, leaving a balance of credit of profit and loss to be carried forward to 1930 of $115,632.

The operative profit of the subsidiary company, the Crow's Nest Pass Electric Light and Power Co., Ltd., for the year was $11,775, all of which was transferred to depreciation reserve.

The operative profit of the subsidiary company, the Morissey, Fernie and Michael Railway Co., for the year was $20,429, all of which was transferred to depreciation reserve. —Mining & Industrial Record.

AN EXCELLENT EXAMPLE

WHEN the school board of an Ontario town granted two teachers an increase of $100 a year in salary instead of the $150 for which they asked, the students of the high school took matters into their own hands and undertook to raise the further amount from among their own resources. The fortunate result of this undertaking was that the school board came to a realization of their duty towards the school, and the total amount of desired increase in salary was granted.

This incident speaks highly for the loyalty and spirit of the students in that Ontario school, and is also a sufficient indication that the teachers in question were worthy of the increased salary which they requested.

—The Halifax Herald.

THE JOY OF SUMMER

Oh, all the world is bright and fair,
The sky o'erhead is clear.
The earth is filled with flowers rare,
When summer time is here.

The maple, birch, and poplar tree,
Are dressed in brightest green.
The world is filled with joy and glee.
When summer time is seen.

Nina Shields, Grade X, June, 1930.

LOVE

There are so many kinds of love,
For some it is a problem,
To try to find which kind of above,
All other loves for them.

Of fathers, sisters, brothers, loves,
Sweethearts and aunts, and cousins,
Of grandpapas and grandmamas,
And friends adored by dozens.

Of all these if I had to choose
Which one above the others,
The one I'm sure I wouldn't lose,
'Tis the real true love of Mother.

Marguerite Herd, Grade IX, June, 1930.

Better Terms for Vancouver Island and the Unemployment Question.

Dear Sir:—

If the Government did (as Dr. Tolmie publicly stated) give the anticipated unemployment question serious consideration months ago, then why did his Government unnecessarily purchase at $350,000 third or fourth grade timber as an addition to the inaccessible Strathcona Park" Vancouver Island did not ask for it, in fact this purchase was a Mainland political obligation and cannot be classed as a contribution to this Island from the Provincial Government. Further I doubt if one hundred people will go to see this timber within the next one hundred years. Surely the Government in all fairness realizes the seriousness of the unemployment among the miners on Vancouver Island, a condition which calls for immediate action ,and if the present Government was to immediately commence the construction of the Long Beach-Tofino Road (about thirty-nine miles), also the cut-off triangle road between Cumberland and Alberni, (the incompleted part about 18 miles) and continue the Ocean West Coast Road, it would be a step towards better terms for the Island, and incidentally these necessary roads would have the immediate effect of relieving the unemployment among the Nanaimo and Cumberland coal miners, and at the same time this Long Beach Road would open up the greatest show place on the whole Pacific Ocean, as well as giving access to 75 miles of inland waterway to the north of it.

A few reasons why we have the right to request and even demand the above roads: For the past fifty-eight years Vancouver Island has been the taxation milch cow that has been used to develop and open up the mainland of British Columbia—in fact our own Island members of Parliament have been so apathetic regarding our just requirements, that the Mainland members have taken it for granted that it is a privilege for the Vancouver Islanders just to pay taxes; and I think they would be amazed if they found out that we have the intelligence to ask for what we are entitled to.

A few of the exclusive Mainland enterprises that Vancouver Island has been taxed to pay for: Twenty million dollars' worth of Mainland reclamation schemes; likewise we have been taxed to pay the interest and sinking fund on the P. G. and E. Railway that is of no earthly benefit to Vancouver Island—in fact the proportionate share that this Island pays each year on the P. G. & E. Railway would more than pay the total cost of the three developing roads mentioned (the Cumberland-Alberni cut-off, the Long Beach road and the Ocean Highway Coast road). Then there is the twenty million dollar Mainland University project, the Cariboo Road and many other large projects. The above is only a part of the unjust and unfair treatment Vancouver Island has been receiving for the last fifty-eight years. Incidentally this Island pays into the Provincial Treasury approximately one-third of the total motor licenses and registration fees—this year about $750,000; Vancouver Island also contributes more than $1,750,000 annually from her timber resources, and almost one- third of the revenue to the Liquor Control profits, and what has this Island received back in the past fifty-eight years? Practically nothing, except the Parliament Buildings, which cost just about as much as the last addition to the Essondale Mental Home. Sometimes it makes one think that both the Parliament Buildings and the Mental Home were established in the wrong places. This year I note the Island road appropriations were $333,000 (including the Islands constituency) and this in the face of a two-million dollar tax increase, Vancouver Island contributing about $600,000 toward it. Never was there a better clear-cut case for Better Terms than this one for Vancouver Island, so let us go after what we are entitled to, and if necessary create a Vancouver Island "ginger group" of our Island members and get something, get these three developing roads built immediately, then the Seymour Narrows Bridge and a tidewater Customs Smelter adjacent to the coal mines and a conservation policy of the West and East Coast fishing grounds so as the waste will be eliminated (by way of modern storage facilities); this in itself will justify the existence of the Ogden Point Storage Plant. Obviously, Vancouver Island has been robbed from cradle of Confederation, but is that the reason why it should go on forever?

Yours truly,

P. K. WINCH.

929 North Park St.,
Victoria, B. C.,
August 7th, 1930.

Softball, which is tremendously popular this season, was introduced in Cumberland on Sunday evening when the Royal Candy team engaged the Unionites of West Cumberland in a friendly game at the cricket field, the former gaining the higher score. This pastime promises to receive many followers in the district and many teams are said to be organizing.

Courtenay Locals

—o—

Miss Eveline Laing, of Cumberland, was the week-end guest of Miss Kathleen Cooper.

* * *

Miss Ethel Sutton, of Vancouver, is spending her vacation with her parents, Mr. and Mrs. John Sutton, at their camp at Little River.

* * *

Mrs. J. K. McKenzie and family are holidaying with Mrs. McKenzie's parents on Pender Island.

* * *

Dr. and Mrs. F. H. Moore returned on Monday from attending the Armishaw-Davies wedding at Sayward.

* * *

R. Matthews, formerly of the Courtenay detachment of provincial police, is visiting in town.

* * *

Len. Roberts is reported progressing favorably towards recovery in Cumberland general hospital following head injuries received when his car overturned on the island highway south of Union Bay last night.

* * *

Dr. Thompson, of Ottawa, who is lecturing to the women's institute on Friday afternoon on health matters, is also visiting the institutes at Lazo, Quathiaski Cove, Whaletown, Cortes Island and other places.

* * *

W. A. Dawson has returned to his home from Cumberland hospital.

* * *

Mrs. Pete Dargie and children are visiting in Powell River.

* * *

W. Marsh, formerly employed at the Merville store and now of Vancouver, was a visitor at the home of his parents, Mr. and Mrs. D. Marsh, during the past week.

* * *

Lorraine Wiles has returned to Vancouver, and Ray Wiles is spending a few weeks in Courtenay.

* * *

Mrs. Wilmot Coltart and son Byron, of Vancouver, are visiting Mrs. Kenneth Grieve, Union Bay Road.

* * *

Mrs. W. J. Hopkins, of Northey's Lake, returned on Monday from a couple of weeks' vacation spent in Victoria, having accompanied her son Ted as far south as the capital city on his return to San Francisco.

* * *

Miss Muriel Pigott, of Victoria, is visiting her uncle, A. H. Westrup, at Little River.

Visitors to Comox, Campbell River, and other haunts of the big Tyees are amazed and delighted at the quality of sport, and there is sure to be an even bigger invasion from Hollywood and other places next season when those who have been fishing here this year get back and illustrate their fish stories with photographs.

Mr. Erickson, of Comox, landed a 43 pound specimen recently, probably the biggest so far this year. Tod Morgan, former lightweight champion of the world, and Doc. Snell, well known boxer of Tacoma, have been hauling them in at Campbell River, as have a great number of tourists from all parts of the continent.

England sends telephone greetings to B.C. bride

Uttered wedding congratulations travelled a record distance when from far-away Byfleet, in Surrey, England, some 7,000 miles across ocean and continent, came a telephone message to a Vancouver bride.

During the reception at the home of the bride's parents, following the wedding ceremony, a telephone call came through from the bride's uncle and aunt, of Byfleet, who voiced greetings appropriate to the occasion.

Time and space were speedily bridged by the telephone in bringing the voices of distant dear ones to the happy bride.

HEALTH SERVICE
of the
Canadian Medical Association

Questions concerning Health, addressed to the Canadian Medical Association, 184, College St., Toronto, will be answered personally by correspondence.

SLEEP AND REST

Good habits of sleep and rest play a large part in securing the healthy development of children. Very many children do not get sufficient rest and, as a result, they do not grow or gain in weight. In addition their appetites are poor, or they are irritable and cranky. Perhaps the most frequent cause of malnutrition in children is lack of sufficient rest.

The pre-school child suffers most in this way. He has reached an interesting age, and often he his allowed to remain up for the evening meal so that his father may play with him. Father most likely thinks that he is amusing the child, but it is really the child who is amusing Father. The child enjoys this play, but it makes him excited, and so he does not settle down to sleep readily when put to bed, with the result that his rest is disturbed.

The child of two and three years of age should be put to bed long before the family's evening meal. The child of four and five should go to bed right after the evening meal, and should not be stimulated by being played with just before his bed-time.

We need never worry about a child's having too much sleep. Up to six years of age, the child should sleep for not less than twelve hours at night ,and one or two hours in the afternoon. The night sleep should continue until the child wakes naturally.

The child under six needs more rest than the school child, because he is more active and he is passing through a period when he is developing rapidly, both physically and mentally.

The afternoon rest should be continued. It is better that the child should sleep because sleep is the best form of rest. If he does not sleep, he should be told to lie quietly and rest, and he should not be fussed over for not going to sleep.

Mention should be made that the over-tired child is the one who, very often does not feel a bit sleepy. Parents may think, if the child says he is not sleepy and seems wide-awake, that rest or sleep is not necessary. We would like to stress the fact that the underweight and so-called nervous children very often refuse to admit that they are tired.

Children are more active on some days than on others, and therefore, they are not so tired on one day as on another. It is best, however, to have a regular bedtime for the child, because this makes it much easier for him to go to sleep. He should then be allowed to sleep until he wakens. In this way, he will get all the sleep he requires, which is, without question, what is most essential for his health and strength but which, nevertheless, entails no expense.

New Method Of Treating Coal

Continued from Page One)

from coal, it can be shipped or stored indefinitely in a powdered form without danger.

2. The smokeless fuel produced by the R. L. Process has a low ignition point. This means that, unlike coke, it can be kindled as easily as ordinary coal—a very valuable feature, especially in domestic use.

3. Further, this smokeless fuel has greater heat values and consequently greater radiation than ordinary untreated coal or commercial coke. The radiation of this smokeless fuel is approximately 25% greater than that of ordinary coal and the period of combustion is approximately 50% longer in duration.

4. The ash produced from such combustion is free from clinkers and in appearance resembles wood ash. This feature is extremely valuable in both domestic and commercial uses.

To sum up, this smokeless fuel, produced by the R. L. Process, is clean to handle, free from smoke and soot, burns about half again as long as coal and gives off approximately 25% more heat than an equal weight of first class coal.

The low temperature carbonization of one short ton of first class coal or slack or lignite, by the R. L. Process, yields approximately the following products.

(a) 1,400 lbs. smokeless fuel
(b) 25 gals. Tar Oils
(c) 10,000 cu. ft. of 400 B.T.U. Gases.
(d) 20 lbs. Ammonium Sulphate.

Now 1 ton of slack or lignite yields about 10,000 B.T.U's per lb. or 20,000,000 B.T.U's in all.

1 ton of smokeless fuel (produced by the R. L. Process) yields about 12,750 B.T.U's per lb. or 25,000,000 B.T.U's in all.

1 ton of slack lignite produces 20,000,00 B.T.U's.

1 ton of slack or lignite produces 1,400 lbs. of smokeless fuel or (12,750 x 1,400) equals 17, 850,000 B.T.U's in all.

Therefore, one can compare 1 ton of slack or lignite before and after treatment:

1 ton unheated slack or lignite yields 20,000,000 B.T.U's.

1 ton slack or lignite treated by R. L. Process yields:

(a) 1,400 lbs. smokeless fuel capable of yielding 1,750,000 B.T.U's.
(b) 35 gals. Tar Oils (which can be fractionated)
(c) 10,000 cu. ft. of Gas containing the equivalent of 400 B.T.U's per cu. ft. of gas equals 4,000,000 B. T. U's.
(d) 20 lbs. Ammonium Sulphate.

Thus though 1 ton of slack or lignite on treatment produces only seven-tenths of its weight in smokeless fuel, this amount of smokeless fuel will yield 89.25% of the B.T.U's credited to the ton of slack or lignite.

As an offset to this decrease of 10.75% of the B.T.U's, the ton of treated slack or lignite yields 10,000 cu. ft. of gas containing 400 B.T.U's per cu. ft. or in all gas capable of yielding 4,000,000 additional B.T.U's

Further the ton of treated slack or lignite gives 35 gals. of Tar Oils and 20 lbs. of Ammnoium Sulphate.

The ton of treated coal, slack or lignite yields products whose value can be compared at Spokane (wholesale):

1 ton coal, market price, $7.92, Drumheller, run of mine; 1 ton slack market price, $6.00 Drumheller slack 1 ton lignite, market price, $5.20, Lundbreck, Alberta.

1,400 lbs. Smokeless fuel (at Spokane, wholesale), $10.50; 10,000 cu. ft. Gas (wholesale at 7 cts. per M.) (sold at Spokane 32 cts. per M. 70c.; 35 gals. Tar Oils at 10 cts. per gal, wholesale at Spokane $3.5o; 20 lbs. Ammonium Sulphate 2½ cts. wholesale 50c; total $15.20.

Now, in British Columbia coal can be sold by the mine owner at a profit f.o.b. cars, pit mouth for $2.00 per ton. This coal, if treated by the R. L. Process at or near the mine should give a gross return in smokeless fuels, tar oils and gases and ammonium sulphate of $15.20.

The cost of treatment by the R. L. Process, including all operation, administration and overhead charges, sales costs, interest on capital and allowance for depreciation, is found to be $3.00 per ton treated.

Hence after purchasing the coal, on which the mine owner derives his profit, at $2.00 per ton and paying $3.00 a ton treatment charges, there is still a net profit of $10.20 per ton on the raw product treated under the R. L. Process. This is reckoned on the basis of wholesale prices for the products and makes no allowance for freight.

These figures are based on production costs at peak and sales of products at minimum wholesale prices. Therefore, the net profit by using the R. L. Process in treating carbonaceous substances is approximately 204% without allowing for freight. If this process were used at pit mouth in Vancouver Island Collieries the freight to Victoria, Vancouver or New Westminster, etc., would be comparatively small. Further, the use of smokeless fuel would tend to eliminatee the smoke nuisance in large centres of population.

Smokeless fuel is available for use in:

1. Domestic Consumption.
2. Industrial consumption as a powdered fuel.
3. Industrial consumption in forge work.
4. Industrial consumption in metallurgical processes.

Time of Organization

Under the R. L. Process, the time for carbonization overages 1½ hours In high temperature carbonization systems now in use the time runs from 17 to 72 hours, thereby greatly increasing the cost of production; and the rate and extent of depreciation while lowering the commercial value of the by-products.

It is therefore submitted that whether colliery owners adopt this process, or other organizations buy the coal, slack and lignite from the collieries direct and use the process, the production of coal would be greatly stimulated and coal miners then given steady employment.

The high profits resulting from the use of R. L. Process could be drastically cut and clean, smokeless fuel of high heating value could be marketed at a lower cost to the consumer whether domestic or commercial.

Freight charges would allow the smokeless fuel to be sold at least as far East as Winnipeg ,to meet competition of American coal in the markets of the Prairie Provinces.

Hence, there would be increased work for coal miners as the collieries would be forced to meet the increased demand for their coal.

As already pointed out the tar oils produced by this process could be used wherever ordinary oil has been in use.

Now, any interested party who wishes is at liberty to send his own coal, slack or lignite to the Spokane Plant for treatment under his own expert and crews and to attempt by any legitimate means either to vindicate or disprove the statements above made.

If the statements are true, then the R. L. Process if used, is capable of reviving the coal industry in British Columbia and of stimulating other industries and reducing unemployment.

It is to be trusted that any expert who may come to investigate will be open-minded. In 1929 a certain expert metallurgist supervised the low temperature carbonization of coal by the R. L. Process at the Spokane Plant. When the coal was carbonized and results obtained exactly in accordance with the claims made, he stated "Well, I saw it work, but still I don't believe it is true".

Man Missing; Boat Is Found

Provincial police were yesterday engaged in dragging for the body of Edgar H. P. Pollard, assistant inspector of customs at Victoria, who is believed to have drowned off Arbutus Point, Parksville, last Friday eevning.

A launch carrying dragging gear was sent out following Mr. Pollard's return from a fishing trip. The boat in which he left Parksville Friday afternoon was recovered Saturday off Bowser, north of Parksville, by tug Sinclair II, Captain R. A. Johnson ,of Vancouver, who brought it into Deep Bay.

Residents of the district believe Mr. Pollard fell into the water just off Arbutus Point. He was last seen in that vicinity by Mrs. Pollard and other people at James Craig's auto camp.

The boat, right side up, was seen adrift off Ballenas lighthouse, by the light-keeper, before dark Friday. At that time he could not see anyone in it.

Early Saturday morning an empty rowboat was seen near Lasqueti Island. A strong southeasterly wind arose at that time, evidently blowing the boat towards Bowser, where it was picked up later. The boat had a number of fishing lines out ,only one oar and Mr. Pollard's pipe in it when recovered.

Mr. and Mrs. Pollard had been holidaying at Craig's camp, Parksville, for some time.

Two planes scouted for the boat and missing man and it was one of them which located the boat and notified the tug.

Parents Should Exercise Strict Supervision Now

Reports from all sections of drownings coincident with the coming of extreme hot weather bring out once more the need of strict supervision of the swimming activities of children at all times.

Despite the fact that all young people feel quite able to take care of themselves there are a number of factors such as cramps, currents, deep holes and so on which make bathing dangerous even for expert adult swimmers if they are not in a position to receive help in emergencies.

Continent's Age Average Raised

America is growing up. The day when this continent was a young man's land is behind. Latest census statistics reveal that whereas 70 years ago only 9 per cent of the people were over fifty years of age, today 16 per cent are older than that.

While the advances made by medical science have been a factor in this condition, life expectation has not been increased to such an extent as these figures seem to indicate. But the decline in birth rates and the lessening of immigration have much to do with the matter.

In 1860, 50 per cent of the population of Canada and the United States was under twenty years of age. This percentage has now dropped to below 40 per cent. The decline in the birth rate was largely instrumental here, statisticians point out.

This state of affairs will inevitably have an effect on the industrial life of the continent, it is predicted. Those industries which refuse to employ people of more than fifty years will find it increasingly difficult to find the people they desire for their pay rolls.

Wit and Wisdom

It costs nothing to have the ears pierced. Any jazz band will do it for nothing.

Mrs. McKay, on the Grant Road, returned to the old home last week accompanied by Mr. and Mrs. W. Miller, from Cowichan, who will holiday there for a short time.

* * *

Professor Charles Smith, of the Seventh Day Adventist college at Lacombe, who has been attending the convention at Vancouver and who is a native of the Valley, was a visitor along with his brother Wilfred ,of Little River, to Mr. and Mrs. Thomas Pearse last Friday. Professor Smith went to Alberni to conduct the Sabbath meetings there.

Mr. and Mrs. T. Eccleston and Mr. and Mrs. H. Farmer of Black Diamond, Wash., former well-known residents of this city have been renewing acquaintances during the week, having motored here. They leave today, the former for their home, while the latter will visit, Mrs. Farmer's parents at Chemainus for a short time.

WHO IS THIS R. B. BENNETT ANYWAY

A Brief Biography Ot The New Premier

Now that Hon. R. B. Bennett has become the Prime Minister and is forming his cabinet, interest in him as a man as well as in his political role is in order. The following notes may help in forming a mental picture.

Hon. Richard Bedford Bennett, P.C. (Can.), LL.B., K.C., (Hon.) LL.D., M.P for Calgary West was born at Hopewell, N.B., July 3, 1870, the eldest son of Henry J. Bennett and Henrietta (Stiles) Bennett. He was of United Empire Loyalist descent, the ninth generation on the American continent. He was educated in public and high schools of New Brunswick, Dalhousie University, Halifax, N.S. He has honorary LL.D. degrees at Dalhousie, Queen's and Alberta Universities.

He was admitted to the Bar of New Brunswick in 1893; commenced practice at Chatham, N.B.; member of town and municipal councils of Northumberland, 1896; moved to Calgary, Alberta, 1897; member, legislative assembly of North West Territories, 1898-1905; King's Counsel 1905; legislative assembly Alberta, 1909-1911, resigned 1911; represented Calgary in House of Commons of Canada, 1911-1917; declined nomination, 1917; defeated 1921.

Mr. Bennett was president Alberta division, and member of executive committee and central council Canadian Red Cross society 1914-1919. He twice represented Canada at Geneva for league of Red Cross society and international Red Cross society. He was a member of the Canadian Patriotic fund, 1919-1919. He accompanied the prime minister to England, France and Belgium in 1916.

Until the passing of the military service Act of 1917 Mr. Bennett was director general of national service. He was minister of justice and attorney-general of Canada in 1921 until defeat of Meighen administration; minister of finance 1926; was elected leader of Conservative party at national convention, Winnipeg, October 1927.

Mr. Bennett is president of the Canadian Bar association; bencher, law society of Alberta; honorary colonel, Tenth battalion Calgary highlanders; governor Dalhousie university; and fellow, Royal Colonial institute.

The new Prime minister, like his predecessor, is unmarried. He is very fond of reading. He holds membership in the following clubs: British Empire, London; Ranchmen's and Country, both Calgary; Rideau and Country, Ottawa; and Mount Royal, Montreal. His permanent address is Palliser hotel, Calgary.

Appreciate Beauty of Forbidden Plateau

On their return from the Forbidden plateau Mr. and Mrs. Richard Bartelmess and Mr. and Mrs. Clive Brooks expressed their delight in the unique beauty of the area they had visited. They say they would not have missed the trip for anything, and will certainly recommend it to their friends down south.

Pulverized Coal May Open Markets

(Continued from page 1

natural use of B.C. Coal to an alarming degree. The Government he advised, should go slow about granting adidtional water rights for hydro development until the use of pulverized coal for electric generation had been tried out.

Retail Prices Criticized

Many factors entered into the coal question, continued Mr. Uphill, including the cost of coal to the ultimatte consumer. In this, he thought the coal operators and distributors had not been entirely blameless.

A price of $11.50 a ton retail at Victoria left many to go without coal in Winter, he said, whereas the water haul to the city was only thirty-five miles. Island coal was being sold at a cheaper price in Seattle, he had been informed.

It was the plight of the miners that interested him most, continued the member for Fernie, as they had given from twenty to thirty years of their life to the only business they knew and now found that that business was drying up on them. He would like to see the subventions increased and extended, if possible, to the use of coal by railways to points as far as Winnipeg. In this matter, said Mr. Uphill, the Government could afford to take a lenient stand in the interests of the coal industry and its undoubted difficulties at this time.

No Profit to Producer

Lieut.-Col C. W. Villiers, vice-president of the Canadian Collieries, Limited, said the coal producers had no part for the price of coal in the retail trade. The Company received $6.47 a ton over its own wharf, and the equivalent of $7 a ton at Vancouver after the harbor dues had been paid. The dealers' profit was their own affair, and not part of the consideration of the conference in so far as the coal producers were concerned, he said.

Lorne Campbell of the West Kootenay Light & Power Company and representing the Associated Boards of Trade of Eastern British Columbia, remarked that he had paid $12.50 a ton for lump coal delivered in Victoria. The difference between that price and the $6.47 received by the mines was too great a spread, he believed, amounting to some $6 a ton.

The Collieries were selling fine coal at prices below the cost of production, observed Lieut.-Col Villiers. "That is due", he added, "to the subsidy on oil. We are taxed and the oil goes duty free."

Claude L. Harrison, representing the Cumberland Board of Trade, said that two questions were before the conference, the problem of immediate relief for the miners, and the greater problem of a stabilized market for British Columbia coal. He favored investigation of the use of powdered coal for electric development.

At this stage of the conference Hon. W. A. McKenzie, in the chair suggested that the transportation officials and the representatives of the coal producers withdraw to another room, to see if an accord could be reached on a tentative basis of closer co-operation. This was done, and the general conference rose for the day, with an arrangement to meet at 9:30 o'clock today.

Marius P. Riis, inventor of the Riis device for the distillation of combustible products, invited the delegates to see his test plant at the city yards. Many of the coal men accepted the invitation and will be shown the new distillation process
