NOTES AND COMMENTS.

A Variable Climate.—Eastern Man—"Is the climate of Oklahoma healthy?" Returned Boomer—"Wall, that depends on wot sort of a feller wants yer claim."

Horton Bailey, of Omaha, is suing for a divorce, and one of his allegations is that his wife once hit him on the head with a picture frame in which was the motto: "God Bless Our Home."

Justice—"You say you did not know that you were violating the law. Ah! but my dear sir, ignorance of the law is no excuse to any man." Prisoner—"That's kind o' rough on both of us, ain't it, judge?" Crier—"Order in the court!"

At the meeting of the Presbyterian General Assembly, in session in New York, Rev. Dr. Thompson announced the other day that he had received overtures from fifteen Presbyteries asking that revisions be made in the Westminster confession.

An Indian fisherman in offering a string of fine brook trout was asked, "What's your price?" "One shilling, one fish," was the answer. "But there is another little one! a shilling for that?" "Sure," he quickly rejoined, "just as hard to catch him as big one."

A new "society manual" gives thirteen ways of popping the question. The average man could never think of even one stereotyped "way" when the critical moment came, if the girl was pretty and he wanted her very much. It is a warfare which does not give premediated action much of a show.—*Ex.*

Jones—"There are only two periods in a man's life when he is greatly interested in his personal appearance." Smith—"When do they occur?" Jones—"One is at twenty, when he watches the hair coming out of his upper lip, and the other is at forty, when he watches the hair coming out on the top of his head."

An old bachelor, who was quite a wit, lived alone in a very uncomfortable looking place, and his apartments were always in great disorder. "Why don't you get married?" said a friend one day. "Then you would have some one to fix up things here, and make it look homelike." "The fact is, I've never thought of it," said he, "but it does look reasonable that a better half would make better quarters."

The state of New York adopted electricity as the best method of inflicting the death penalty, and after about a year of experimenting with applicances the sheriffs are prepared to carry it out, as a murderer has been sentenced to undergo this punishment on the twenty-fourth of June next. Scientific experiments have made it certain that if applied properly the electric current will outrun sensation in the race to the brain and, therefore, death will be perfectly painless where there is no bungling, and the possibility of bungling, is almost obviated.

If the Turkish government consents it is probable that Palestine will be invaded by locomotives, and that before long the conductor will have an opportunity of calling out "Galilee; all out for Galilee," and in good Turkish, "Damascus passengers will please retain their seats till the train comes to a full stop." Application has been made by Joseph Elias, formerly government engineer of Lebanon, for a commission for a railway from Haifa, on the Mediterranean, about midway between Tyre and Cæsarea, by the way of Lake Galilee over the River Jordan to Damascus.

Very Small in the Boy's Eyes—The small boy is a terror when he has an inquiring mind. Such a boy strolled into the editor's room the other day, and at once proceeded to down the patient man at the desk. "Are you on the paper?" "Yes." "What do you do?" "Write for it." "Write all the time?" "Yes." "Don't do anything else?" "No." "Just wait for somebody else to do something and then write about it?" "Yes." "Um?" ejaculated the small boy with a look of deep disgust as he walked off. The toiler at the desk did not laugh. Never before had he felt so small and mean. He had been made to see himself from a new and original point of view.

One of the latest achievements of inventive genius is an automatic chair. The seat has a hinge, and when not in use the seat, by means of this hinge, rests upwards against the back of the chair. When you want to sit down, "drop a penny in the slot," and the seat gets itself rapidly into sitting order. When the occupant rises it again assumes the upright position. This chair is much in vogue at Paris, just now, for public gardens and outdoor entertainments. It certainly promises relief to that despairing class of persons who occupy the rear, and have to call out continually. "Sit down in front." For the man who is mean enough to obstruct the view of his neighbor at a concert or circus is too mean to pay a penny for the privilege.

Children Cry for Pitcher's Castoria

CLAN NA GAEL

Responsible for the Murder of Cronin, who was Convicted of Being a Spy.

The San Francisco Press Begins to Talk Sense on the Sealing Question.

Hyppolite Sweeping all Before Him in Hayti and Sure of Complete Victory.

BAD FOR THE CAUSE.

CHICAGO, May 30.—The *Globe* this morning says: "It can no longer be disguised that the police as well as the Cronin committee are convinced that Cronin came to his death as the result of a conspiracy involving a number of prominent Irish-Americans, among whom is Alex. Sullivan, the well-known Chicago attorney. It was known Cronin had made serious charges against the lawyer, and at least one of his colleagues of the Clan-Na-Gael triumvirate, in connection with the misappropriation of the Irish Nationalist funds, defalcation of which exceeded $80,000, and the allegations were to have been heard at Philadelphia this year.

THE CANADIAN WINS EASILY.

SEATTLE, W. T., May 30.—In the regatta to-day, O'Connor won easily by four lengths, Hamm second, Peterson third, Lee far in rear of the third man. O'Connor played with the rest almost over the whole course.

PASSENGER LIST.

SAN FRANCISCO, May 30.—Passengers per Mexico for Victoria: J. H. Gordon, L. Kleifeker, Col. H. A. Clarke, Harry Marbœuf, G. Herz.

FIGHT IN PROGESS.

SAN FRANCISCO, May 30.—A rumor prevails here that Joe Choynski and Jim Corbett, the well known heavy weights, between whom a grudge has existed since childhood, and who recently signed articles to fight to a finish for a thousand dollars a side, are having it out at Laurel Grove, San Rafael, this morning.

BEGINNING TO TALK SENSE.

SAN FRANCISCO, May 30. — The *Chronicle* says editorially this morning: "Nobody who is of sound mind wants war about the seals in Behring's Sea, and the only apparent danger is that some officer in command of a war vessel, British or American, may misinterpret or exceed his instructions. But even in that event there would be no war so long as the two nations preserved their temper and did not discover an insult or indignity where none was intended."

FATAL ACCIDENT.

PIOCHE, Nevada, May 30.—At 11 o'clock this morning a piece of pine four inches square and fifteen feet long, which had just been put in place as a portion of the guides of the Buckboard Cage to be used in a pump compartment of the Raymond and Elly mine, became detached and fell ten feet, to where Jack O'Neil stood on a two inch plank. O'Neil fell 18 feet. Death was instantaneous.

TWO MEN LOST.

SAN FRANCISCO, May 30.—The ship Portland Lloyds, coal laden, from Baltimore, and which has been considerably overdue, arrived in port this morning. Her delay was due to bad weather. Two men were lost during the voyage.

DECORATION DAY.

BROOKLYN, N. Y., May 30.—The weather was gloomy with occasional light rains early in the day. The flags displayed from all public and many private buildings waved from the top of staffs, and made it seem like the celebration of some joyful event. Then the bands did not play funeral dirges as they passed along the streets from their *rendezvous* to the location for the forming of line. The presence of President Harrison added great interest to the occasion and in the excitment to pay all honor to the chief magistrate it seemed as if the memorial part had been forgotten. The president had breakfast at the residence of Joseph F. Knapp, and chatted pleasantly with his host and hostess, Secretary Tracy, Mayor Chapin and others. After the meal they repaired to the parlors and for upwards of two hours held a reception. Prominent citizens, generals, colonels, naval officers and heads of grand army organizations shook hands with him. The various organizations participating in the parade were all at their respective places of *rendezvous* at 10 o'clock. At 10:30 the line moved. It is estimated there were between 11,000 and 12,000 men in line. As the head of the column reached the reviewingstand at Willoughby avenue and Washington Park it formed to the left and dressed back to the curb. When the signal was given the president entered a carriage in company with Secretary Tracy and rode from the left to the right of the line. As he moved over the route he received a grand ovation from the spectators who lined the sidewalks and door steps, and filled the windows of houses. The organizations saluted and bands played "Hail to Chief." The president gracefully acknowledged the flattering recognition accorded him. Upon taking his place on the reviewing stand, the organizations wheeled into column and resumed the march, passing through several streets to Flat Bush avenue where the parade was dismissed. Various divisions of the grand army assigned to cemeteries then repaired to their respective destinations. The cemeteries visited were Greenwood, Cypress Hill, Evergreen, Holy Cross and Flatbush, where the little mounds which mark the spots where beloved comrades rest in peace, were transformed into flower beds, and eloquent orations were delivered in which tributes were paid to the memories of the heroes for their valor and loyalty.

AFFAIRS IN HAYTI.

NEW YORK, May 30. — Admiral Gherardi, of the United States corvette "Galena," who has just arrived here, says, in relation to the situation in Hayti: "I feel sure that the troubles on the island will be brought to a speedy termination. The advantage at present rests with Hippolyte, and the forces of the north. When we first arrived in Hayti, Hippolyte's men were holding a very small portion of the northern part of the republic; but by a succession of movements have gained control of all the northern half and have made serious inroads in the south. When we left they were certainly within 16 leagues of the capital, Port-au-Prince, and rumor placed them even nearer than this."

BASE BALL.

NEW YORK, May 30.—Association games to-day: Syacruse 5, Hamilton 1; Buffalo 18, Toronto 12; Rochester 4, London 5; at Brooklyn, St. Louis 8, Brooklyn 4; at Philadelphia, Athletics 3, Cincinnati 0; at New York, Indianapolis 6, New York 5, at Boston, Boston 10, Chicago 18; at Philadelphia, Philadelphia, 13, Pittsburg 6; at Washington, Washington 1, Cleveland 2.

DECORATION DAY.

NEW YORK, May 30.—Despatches from various points indicate that to-dap, Decoration day, is being universally observed as a holiday, with military parades and exercises appropriate to the occasion. At many places as well as here heavy rain is interfering somewhat with the celebration.

CYCLONE.

EMPORIA, Kansas, May 29.—A cyclone has just passed over the entire country doing great damage to crops and buildings. Four fatalities are reported.

THE BEHRING'S SEA AFFAIR.

OTTAWA, May 29.—The minister of marine and fisheries, C. H. Tupper, when seen this morning regarding a despatch from Victoria, B. C., stating that the English flag ship Swiftsure and the Amphion had received orders to patrol Behring Sea, said: "If this is true I do not believe that the matter possesses any special significence. A British squadron is constantly maintained in the North Pacific and the fact that it undertakes to cruise here or there is no indication of a fresh phase in the negotiations on the subject between the U. S. and England. I see no danger of any collision between the vessels of the two powers. While the American cutters have seized Canadian vessels there, it has always been under color of an accusation of breaking the American laws by hunting for seals. A Canadian or British merchantman traversing that sea would not be molested. It is only vessels found engaged in catching seals that have been molested."

THE CRONIN MURDER.

CHICAGO, May 28.—The grand jury this evening, after being in session nearly 7 hours, indicted Detective Daniel Coughlin, P. O. Sullivan, the Lake View ice man, and Frank Black, *alias* Woodruff, for the wilful murder of Dr. P. H. Cronin. Black is the man arrested for stealing the white horse and rig in which the physician was driven to his death, and who told the story regarding Dr. Cronin having been taken to attend a woman, whose body, as he claimed, was afterward hidden in the trunk. Over a score of witnesses, including both the personal and political friends of the murdered man, were examined, but no evidence was introduced to prove a conspiracy, and the private papers, about which so much has been said, were kept from the jury. As a result of the examination, it was decided by a unanimous vote to include the three prisoners in one indictment of three counts; one charging them with killing Dr. Cronin with a blunt instrument, the second alleging the use of a sharp instrument, and the third with instruments and means unknown. The indictments were returned to Judge Williamson and the jury released for the night. State Attorney Longnecker said subsequently that the question of a conspiracy was not investigated in any form and that the matter would not be taken up again by the present body. It is said to-night upon absolute authority that the police are only just beginning to get an insight into the magnitude of the conspiracy.

CRONIN A SPY.

The *Herald* to-morrow, in an elaborate article, will reiterate its former statement that Dr. Cronin was removed by the Clan Na Gael after trial and conviction on the charges of being a British spy. It declares circumstantially, that an officer of the order, known as a delegate, called upon the senior warden of the North Side camp to appoint a trial committee. No name or specifications were given. At the next meeting of the camp it was announced, under the rules provided for such an occasion, that a trial committee was required, each man present to vote a name on a piece of paper. When all the strips had been deposited in a ballot box, it was delivered to a trusty member, who counted them and selected the seven that received the highest number. Each was quickly notified of the fact while the unsuccessful ones simply received a blank slip. The committee met within a week and for the first time became aware of each other's identity and also of that of the man whom they were to try and the charges preferred against him. Hence, of all the members of the order only the committee men preferring the charges and the witnesses examined were cognizant of the personality of the body or its proceedings. Charges were preferred against Dr. Cronin of his being a British spy. He was found guilty by a unanimous vote and sentenced to be removed in some way. The knowledge of these proceedings came to Dr. Cronin, and hence his frequent statements just before he met his death that a violent end was in store for him. The article also states that the only object of the presence in Chicago of Luke Dillon, of Philadelphia, who is one of the triumvirate now ruling the order, is to learn the number of the camp by which the committee was appointed. The coroner's jury to-day visited the cottage, the man-hole and the locality in which the trunk was found, and returning to the city adjourned until to-morrow. A widow, named Hamburger, has turned over to the police a suit of flannel underclothes and a vest which were found by her two boys, aged 9 and 11 years, in a clump of bushes on the Wanaton road, not far from the spot where the trunk was found. The officers are mysterious regarding the find and refuse to say whether the articles have been identified as having been worn by the murdered man.

The Manitoba government and Ontario emigration agents have been instructed to visit Michigan and Wisconsin, to report the condition of the farmers in those states with a view to commencing a vigorous emigration campaign there. It is said that a great many are anxious to move to Manitoba.

THE SAMOAN TREATY

Finally Agreed Upon. Rights of Natives to be Respected and Malitoa Restored.

A London Publisher Sentenced to Three Months in Jail for Publishing Zola's Works.

Arthur O'Connor M.P. for Donegal Gives Evidence Before the Parnell Commission.

THE SAMOAN TREATY.

BERLIN, May 30.—The provisions of the treaty concluded at the Samoan conference are substantially as follows: The government of the Samoan Islands to be exclusively native in its composition, and none of the treaty powers will have any voice in the local government of Apia further than that granted them in the general control of the Samoan Islands. The leading clause in the treaty insures absolute autonomy of the Samoan Islands, guaranteeing to the natives not only the predominating influence in every government body, but restricting the powers from representation upon the Samoan council or ministry. The treaty further provides for a sort of advisory council to consult with the native king whenever necessary; in view of the large commercial interests of the United States and Germany, each of these countries will be allowed a full fledged member, but England's representative acts only in the character of arbiter or umpire when the German and U. S. ministers fail to agree. A land court, or commission, is provided by the treaty, whose business it will be to examine into titles of Samoan real estate, settle many disputed claims that foreigners have been setting up in Samoa, and generally to set at rest all questions as to the ownership of land. The islands are to be governed by a native king and vice-king elected by the Samoans. These two officials, together with the chiefs of Samoan families or clans will compose the upper house of the native legislature. The upper house is styled the Taimua. The lower house, or Faipule, is to be made up of native Samoans chosen by the people upon the basis of one representative for every 2,000 people. The treaty guarantees the restoration of the *statu quo* ante, and rehabilitation of Malietoa as king of Samoa. An outline of a tariff schedule is also embraced in the treaty. Its terms are general and provide for changes after the expiration of certain periods. The provisions of the several treaties now in existence between the powers and Samoa as to coaling stations set apart upon the islands are re-enacted in this treaty. A separate station is allotted to each power, and each government shall also be at liberty to hoist its flag on the ground where station buildings will be erected, but the sovereignity of the government of Samoa over harbors shall not in any way be abridged or prejudiced thereby. The German demand for a large indemnity from the Samoans for the destruction of German lives and property in a sum which would have impoverished the Samoans for years to come, was withdrawn, and the treaty provides for the payment of a nominal sum only.

THOSE AWFUL BOOKS.

LONDON, May 30.—Henry Vizitelly, the publisher, has been sentenced to three month's imprisonment for selling Zola's works, though revised and expurgated since he was fined for a similar offence.

PARNELL COMMISSION.

LONDON, May 30.—Arthur O'Connor, M. P., for East Donegal, testified before the Parnell commission to-day. Among other statements he said he heard President Harrison, in a speech delivered at Indianapolis, said every honest man and lover of liberty would rather be in the company of William O'Brien in Tullamore jail than be entertained by the viceroy of Ireland at Dublin castle. O'Connor testified when he took the office of secretary of the League he found many of the organization's books in a fragmentary condition, and so far in arrears that it was impossible to do anything with them. The witness did not know whether the books of the league which the government seized, when Forster was chief secretary for Ireland, had been destroyed or not. Presiding Justice Hannen ordered that enquiry be made and that it be ascertained if the books are in existence.

THE BOULANGER CHARGE.

PARIS, May 28.—In the chamber of deputies to-day, Laguerre gave notice that he would interpellate the government in relation to the delay of the senate in making a report in the case of Gen. Boulanger. President Meline replied that while he was desirous to respect the liberty of the tribune it would be impossible to allow Laguerre to make such an interpellation. The senate, he added, was fully independent in this matter, for the issue was of a judicial character. The chamber had no right or power to interfere. Considerable debate and much confusion followed. De Cassagnac finally said that if the deputies retained any feeling of shame, courage or duty they would vote to allow Laguerre to proceed with his interpellation. The chamber after passing a vote censuring De Cassagnac, proceeded with the order of the day by a vote of 308 to 216.

IMPORTED MINERS RIOTING

BRAIDWOOD, Ill., May 28—Eight companies of the fourth regiment, Illinois National Guard, pitched their tents on the Chicago, Wilmington & Vermillion coal lands at the "J" shaft this morning and are now scouting Italian quarters. Everything was quiet until 10 o'clock this morning, when a body of strikers moved in the direction of the place where the militia were encamped. A company of militia was deployed with fixed bayonets, and surrounded 25 strikers, making them prisoners without resistance. While they were held under cover of the guns of the military the sheriff and posse disarmed the strikers, who were found to be pretty thoroughly provided with knives and pistols. Several of the prisoners were identified as among those who took part in the rioting yesterday. These are held under guard and will be sent to Joliet this afternoon.

Daily British Columbian

Thursday Evening, May 30, 1889.

Viewing the situation from a convenient distance, the *Canadian* (London) *Gazette* sees danger ahead in the fisheries complications on this coast. In a recent number is the following expression on the subject:

But if the relations between Canada and the United States on the Atlantic are unsettled, they are nothing short of dangerous on the Pacific coast. There the United States administration seems inclined to insist on a pretension which the British and Canadian authorities cannot for a moment admit, and which United States ministers themselves have shrunk from asserting when brought to the test. What is wanted is only too obvious—a clear definition of the claims to which the Washington government restricts itself, so that the way may be open for their submission to some court of arbitration. But that is just what Mr. Blaine seems disinclined to agree to, though his refusal inflicts grave injustice upon the honest and industrious fishermen of the North Pacific, and imposes a restriction upon legitimate British enterprise which may become unbearable.

The *Canadian Gazette* is a paper published in London, Eng., that takes particular note of Canadian affairs, is ably edited, and aims to give a fair and clear expression on all subjects affecting Canada and the empire. Its views on this subject are therefore worthy of notice. In fact in the paragraph quoted it does not do much more than state the case as it is. Not from a Canadian point of view only, but from an impartial survey of the questions by any one, and even by fair-minded Americans themselves, the United States—or some of its people—are at fault in both the Atlantic and Pacific fishery disputes. To put it briefly, on the Atlantic, the American fishermen wish to transgress within the three-mile limit, while, with a remarkable inconsistency, on the Pacific coast, the United States government, in defiance of all custom, law, and reason, have set up, and are endeavoring to make good, the absurd claim that all foreign fishermen must be excluded from Behring's Sea, which is claimed as American waters. Not only this, but American sealers are excluded even, and the paternal American government essays to shut up Behring's Sea as a great fish and game preserve for that gigantic monopoly the Alaska Commercial Company. This last point in the whole unreasonable contention naturally alienates a large portion of the American press and people from the policy of the administration on this question. The Tacoma *Ledger* expresses itself as follows on the subject:

Since the people have come to understand that the primary object of the law under which the Behring Sea was closed by the president's proclamation was to protect the Alaskan Commercial Company they have felt less interest in the question. The fact that American as well as British Columbia sealers have been confiscated under this law, corroborates this view of the case. The privileges of this company are far greater than its right to catch seals. It has very valuable commercial opportunities on the Russian side, as well as among the Aleutian islands and on the northern coast of Alaska. While there are some people in the United States who think the Behring Sea is too large a body of water to be monopolized by our nation, there are far more who think it too large to be monopolized by one company.

Now, when matters are coming to a point, the American authorities are advancing the pretension that their object in trying to close Behring's Sea is to protect the seal from extinction. This is very good of them, but they will find other nations equally interested and desiring to have their rightful share in "protecting" the seals. Our American cousins will have to come down off their high horse in this Behring's Sea matter, give up all foolish pretensions and tergiversations, and arrive at some amicable and reasonable adjustment. It will be to the everlasting disgrace of the great leading nations of Christianity and civilization if these fishery disputes on both oceans are not speedily settled, and in a peaceable and honorable manner.

It would certainly seem as if on this side of the millenium, before the nations of the earth swear off fighting for good, and turn their arsenals into model farms and their weapons of destruction into agricultural implements, that they intended to go on one grand final spree and just make match-wood of everything. Surely the elaborate and costly preparations which every nation that has arrived at the dignity of a "power"—and some that haven't—are making, in both their naval and military departments of warfare, are not destined to be all for show, and never to be called into exercise. We do not think so. The crash is hardly pleasant—although interesting, it must be confessed—to anticipate; but it must come sooner or later, and that on a grand scale, commensurate with the long continued and gigantic preparations. What nations shall be involved would be easier answered, perhaps, by inquiring what powers will not have a hand in the grand *melee*. It is only natural to look for a great clearing of the political and social atmosphere after the dire immediate effects of such a terrible collision of mighty forces have been obliterated or mitigated by time. The world is certain to witness a goodly number of battles on the water in its future wars, judging from the industry and ambition that are being displayed by even the most laggard nations in adding to their floating batteries. According to a careful estimate, the number of war vessels launched last year by the naval powers of the world was 60, while more than 100 were building when it closed. England led, with 15 vessels launched and 28 building; France launched 9, and laid down 15; Russia launched 2, and began 10; Germany put 6 vessels into the water, and ordered or laid down 4; Italy launched 10, and laid down 18; Austria launched no vessel, but laid down or ordered 3; Sweden laid down 1; Denmark launched 1, and laid down another; China added 4 vessels to her navy, and ordered or laid down 4 more; Japan ordered 3, and launched 3; the United States launched 6, and laid down 6; Chili ordered a new cruiser in England, and the Argentine Republic contracted for a 4,300 ton ironclad; Brazil laid down a cruiser, and even Uruguay has contributed to the navies of the world, launching a small iron gunboat. The minor powers, like Greece and Portugal, have either contracted for or launched small vessels. Turkey has begun the work of building up her navy, laying down one ironclad and several smaller vessels.

Newspapers and club circles, says a recent New York despatch, are excited over news from Europe that Mr. James Gordon Bennett, proprietor of the New York *Herald*, has gone to Khartoum. He left Paris over four weeks ago. One story is to the effect that at the Club Menton, in Paris, one night, an officer, who had seen service in the Egyptian army, said it was impossible for a foreigner to enter Khartoum and depart alive. A discussion arose which culminated when Mr. Bennett declared that anyone possessing sufficient brains and money could visit the Mahdi and return unscathed, and offered a heavy wager that he could himself do it within six months. The bet was accepted, and Mr. Bennett, accompanied by an intimate friend, started on the journey. Another story is that on the evening in question, at the Club Menton, Mr. Bennett received a despatch from a Cairo correspondent, stating he had received a visit from an envoy of the Mahdi with important news regarding Chinese Gordon, and that the latter was still alive and kept a close prisoner, and the new Mahdi, by reason of his reverses in Kordofan and the Bahr-el-Ghazel and his loss of the province of Darfur, was willing to ransom Gordon for a million francs. The next few days Mr. Bennett made arrangements for the trip and for the payment of the vast sum mentioned, and with an intimate friend set out for Egypt. At the *Herald* office it is stated that Mr. Bennett has been in Cario, but nothing is known about his prospective movements. The story about General Gordon is not considered to have any foundation in fact; but one thing is certain, and that is that James Gordon Bennett will be a "lion" if he fools around Africa much longer. Perhaps that's the sort of game James Gordon is after.

Port Kells

This Fine Townsite, at the Fresh-Water Junction of the

Southern Railw'y

—WITH THE—

FRASER RIVER

12 Miles Above Westminster,

Has just been Surveyed, and the Lots are for sale by

WOODS, TURNER & GAMBLE

—AND—

ALBERT J. HILL & COMPANY

OF NEW WESTMINSTER, B. C.

The advantages and prospects of this Plot for a future thriving Town are many.

The Land in the vicinity is good.

There are inexhaustible IRON ORE DEPOSITS, of a superior quality, immediately adjacent, as well as vast strata of the finest BUILDING SAND and POTTERY CLAY.

On the Townsite are a number of valuable MINERAL SPRINGS.

Communication by land and water is unequalled, by reason of the location of the Townsite on the Fraser River and the Southern Railway, while the natural elevation and lay of the land can not be excelled as a situation for a fine town.

The ground is open and clear of heavy timber.

The site has been selected as one of the most important stations on the Southern Railway, and with the completion of the road, in the near future, must, with all its other advantages, spring into prominence at once.

These who apply early will have the pick of the Lots.

A clear title given with every purchase.

Parties wishing Lots can apply as well, on the premises, to

HENRY KELLS,

dmy9tc Proprietor.

QUEER TREASURE BOXES.

Pearls Found in a Bamboo and Gold in a Tree Trunk.

Of all the queer mines from which precious stones have come, the oddest is that which yielded his $13,000 diamond to Dr. Gimp's boy, Jake, writes the Hoxawottamie *Herald*. He was wild enough ten years ago, and when he ran away to sea nobody expected to be surprised after that at any thing that happened. He landed without a pound in his pocket at Cape Colony, and was soon on his way to the great South African diamond mines. There he worked for thirteen months, and when he reached the coast on his return home he was as black as a negro. He had, indeed, hired out in the diamond holds and blacked his face with palm oil so as to be on better terms with his fellow diggers. He had an enormous molar which had given him trouble from his infancy. Finally it had been plugged with a chunk of ivory. The bottom of this plug he sawed off in the mines, stuck the big diamond into the cavity, clapped the plug back, passed the inspectors and reached home with it safely. It has long been known that in some specimens of bamboo a round stone is found at the joints of the cane. This is called "tabasheer," and is supposed to be deposited from the silicious juice of the cane. Another curiosity of the sort is the "cocoa-nut stone," found in the endo-sperm of the cocoanut in Java and other East India islands. It is, according to Dr. Kimmins, a pure carbonate of lime, and and the shape of the stone is sometimes round, sometimes spear-shaped, while the appearance is that of a white pearl without much luster. Some of the stones are as large as cherries and as hard as feldspar or opal. They are very rarely found, and are regarded as precious stones by the Orientals, and charms against disease or evil spirits by the natives. Stones of that kind are also found in the pomegranate and other East India fruits. Apatite has also been discovered in the midst of teak wood.

Mr. Dantree found that if a speck of gold were placed in a solution of the chloride, the gold would grow into a small grain on any piece of wood or cork introduced into the liquid. In other words, the metal contained in the chloride would come out from its combination as native gold and unite with the tiny speck of pure metal which served it as a nucleus. It is not improbable that the gold in quartz got similarly deposited round a common center, so that in the most literal sense it may perhaps be true in spite of Aristotle's dogmatic statement to the contrary) that money grows, though very slowly. It is a pleasant thought, indeed, for the poor man to know that gold is even now still growing. Brough Smith has shown that it can be deposited nowadays in somewhat appreciable quantities within comparatively short periods. Bits of mineralized timber and beams from the galleries of the older workings in Australian mines have been found to exhibit, under the microscope, particles of gold, intermixed with crystals of iron pyrites, all through the central parts of the wood, and this gold must, of course, have gathered there from solution in water during the few years that have elapsed since the first discovery of the precious metal in Australia. Mr. Uhrich similary notes that in the gold drifts auriferous pyrites are often found incrusting or replacing roots and twigs, and samples of such gold-bearing wood, when submitted to an assay, have yielded amounts of pure metal varying from several pennyweights to several ounces per ton. H. A. Thompson further mentions a specimen of pyrites which had gathered in the center of an old tree trunk, and which yielded at the rate of as much as thirty ounces.

HEROINES OF TO-DAY.

What Some Plucky Women Have Done Within Our Own Borders.

When Thomas Hardy's novel, "Far from the Maddening Crowd," was published, Bathsheba was recognized as a heroine of new and fascinating quality, says the New York *Graphic*.

Bathsheba was beautiful, managed her own estate, went to market, danced her samples of grain up and down in her own white hand, and of course won the hearts of all the squires with whom she bought and sold.

According to the Western papers, Bathsheba is as common as silver mines in the Territories. From timid, half-scared girls, they become cattle queens, landlords, great farmers, mighty hunters, enter politics; in fact do whatsoever their fancy pleaseth them and without losing any of those womanly qualifications which make them attractive to the men of that country.

These general assertions come backed up by special instances. One such is a Western girl who took up a homestead claim in Montana, and extended it in time to the limited 640 acres, and went to sheep-raising. This prospered to such an extent that she sent East for a brother to be her overseer. Meanwhile other matters were progressing. On the next ranch was a young bachelor, also a sheep-raiser. It seemed easier to these two to use one brand than two, so they joined flocks and hands, and the sheep now run in happy harmony over a farm of 1,280 acres.

Then there is Miss Catherine Wilkins, of Idaho, whose father gave her a colt when she was a baby. Kitty is now of age, and the start that colt gave her early in life has made her the owner of nearly one thousand head of blooded horses, besides a large herd of cattle. Miss Kitty now employs thirty-five herders and cowboys, besides keeping a general oversight of her wealth herself.

Another woman, Mrs. Ira McLane, bid for a number of Montana mail contracts and got them. These contracts run through a populous, but rough country, but there seems no doubt but that the plucky Mrs. McLane is going to succeed.

A Chicago saleswoman is another of the Montana heroines. Going to Bozeman as a school teacher she eventually announced herself as a candidate for county superintendent, and was elected over her competitor, a man.

In fact, neither sex, race, nor previous condition of servitude is any bar to a woman in the West. The Garfield lode, which is one of the promising mining properties at Yago, is owned by a negress, Millie Ringgold, who has a reputation as a wise prospector in the mining districts. Millie is one of the pioneers—she washes, keeps hotel and handles her pick and shovel like a man. Her successful location and purchase of mining properties, it is believed, will yet make her a mining queen.

Life in the West brings out all the sterling qualities of a woman. A woman belonging to one of the best known families in town, gay and pretty, a belle in her circle, went with her husband as post trader to a far western fort. Leaving the fort they became ranchers. They had a large family of children and generally no servant. She cooked, sewed, taught her children and entertained hospitably. A blizzard descending at the lambing season, she rode twelve miles by night with a cowboy to the herding ground in a buckboard, carrying blankets and bottles, and worked with the herders to save the flock. The united efforts were unavailing. Thousands of dollars' worth of cattle were destroyed that night. The family returned to this country and this brave lady is again a woman of fashion and easy hospitality.

Five Thousand School-Ma'ams.

New York City has in round numbers 3,100 women teaching in its public schools. Brooklyn has 1,600 women teachers. Here is a colony of 4,700 schools-ma'ams training the young ideas of the two cities. Add a second colony almost if not quite as large for teachers in private schools, kindergartens, academies and institutes of all sorts not connected with the public system, and for teachers in convents, orphanages, asylums, etc., and you have the makings of a thriving city which might be founded with the women engaged in this one calling. Male teachers are, so far as numbers go, in an insignificant minority. New York has 223 and Brooklyn has 66 men employed in the public schools. Ninety-three per cent. of New York teachers and 96 per cent. of those across the bridge are women.

Russian Grand Dukes.

There are about thirty Grand Dukes in Russia, all of them being near relatives of the Czar. Each receives from the State an annual pension amounting to $80,000, and the majority of them have large private fortunes besides.

Streets and Park Debenture By-Law.

A By-Law to raise by Loan the sum of $85,000 for Street and Park Improvements.

WHEREAS IT IS EXPEDIENT that the council of the city of New Westminster should provide for the improvement of certain streets in said city, and of Queen's Park.

AND WHEREAS it will be necessary, in order to effect said improvements, to issue debentures of the said city for a sum of money not exceeding $85,000.

AND WHEREAS for the payment of interest and creating a sinking fund for payment of said debentures it will be necessary to raise the sum of $5,950 annually by special rate in each year.

AND WHEREAS the amount of the whole rateable property of the said city, according to the last revised assessment roll, is the sum of $2,540,245.

AND WHEREAS the total amount of the existing debt of the said city is $155,500, irrespective of the sum of $200,000 proposed to be borrowed under authority of the Water Works Debenture By-Law, which by-law is to be submitted to a vote of the electors of the city concurrently with this by-law.

AND WHEREAS, for the purpose of raising the said yearly sum of $5,950 an annual special rate of 2 2-5th mills in the dollar will be required.

THEREFORE, the Mayor and Aldermen of the city of New Westminster, in council assembled, enact as follows:

1. It shall be lawful for the mayor of the said city to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same upon the credit of the debentures hereinafter mentioned a sum of money not exceeding in the whole the sum of $85,000.

2. It shall be lawful for the said mayor to cause any number of debentures to be made for such sums of money as may be required, but not for less than $100 each, such debentures to be sealed with the seal of the corporation, signed by the mayor and countersigned by the treasurer of the said city.

3. The said debentures shall be made payable in fifty years at furthest from the day on which this by-law takes effect, either in sterling money of Great Britain or in currency of this province or the country where the same may respectively be made payable, which may be in any place or places authorized by law as may be agreed upon between the purchaser or purchasers thereof and the mayor, and the said debentures shall have attached to them coupons for the payment of interest.

4. All moneys arising from the said rate beyond the amount required for the payment of interest upon the said debentures may be invested in each year as the council of the said corporation may direct, for the purpose of creating a sinking fund for the redemption of the said debentures as they respectively become due, without prejudice to any of the powers conferred upon the said council by the act of incorporation.

7. The proceeds of the debentures issued and sold under authority of this by-law shall be applied to the improvements on Queen's Park and the streets hereinafter mentioned, and, as nearly in the proportion following as may to the said council seem expedient, that is to say: Queen's Park, $15,000; Columbia street, $1,000; Provost, Dallas and Carnarvon streets, $2,500; Agnes street, $2,500; Royal avenue, $3,000; Queen's avenue, $3,000; Pelham street, $3,500; Montr al street, $3,000; Melbourne street, $2,500; Leopold Place, $500; Park Lane, $1,500; Clinton street, $2,000; St. Patrick street, $1,000; Clement street, $5,000; St. George street, $1,000; Mary street, $1,000; St. John street, $1,000; Douglas street, $5,000; Halifax street, $750; St. Andrew's and Ellice streets, $3,000; Fortescue street, $2,700; Edinburgh street, $2,500; London street, $1,000; Blackle street, $500; Merivale street, $500; Blackwood street, $500; McKenzie street, extending and making, $7,500; streets in St. Andrew's square, $1,500; St. George s square, $500; St. Patrick's square, $1,000; sidewalks and general street repairs, $8,050; provided that out of the said sum of $15,000 set apart for the improvement of Queen's Park there shall be paid into the city treasury to the credit of the general account the sum of $3,000, being the amount already expended out of the general revenue for Park improvements; provided also that if the requirements of any of the streets above mentioned should be found to be less or greater than the sum apportioned to said street, the said sum may be increased or diminished as in the circumstances may seem to the council expedient, and if any surplus, if any, remaining out of the appropriations above set out, after said streets have been completed, may be applied to other works of permanent improvement not specified herein, at the discretion of the council.

8. This by-law shall take effect and come into force on the 17th day of June, A.D., 1889.

9. This by-law, before the final passing thereof, shall receive the assent of the electors of the city in the manner provided by the New Westminster Act, 1888, and amending acts.

10. This by-law may be cited as the Street and Park Improvement Debenture By-Law, 1889.

By-law read a first time on the 6th day of May, 1889.

By-law read a second time on the 6th day of May, 1889.

NOTICE.

Water Works Debenture By-Law.

A By-Law to provide for the issue of Water Works Debentures.

WHEREAS BY THE "NEW Westminster Act, 1888," an act of the legislature of British Columbia, passed in the fifty-first year of the reign of Her Majesty, Queen Victoria, and chaptered forty-two relating to the corporation of the City of New Westminster, it is among other things provided that the council of the corporation of the said city may, subject to the provisions of the said act, pass by-laws for constructing water works, and providing for the expenditure thereof.

AND WHEREAS it is expedient that the council should provide for the construction of water works for the supplying of water to the inhabitants of the said city.

AND WHEREAS, in order to carry into effect the said proposed construction, it will be necessary to issue debentures of the said corporation for a sum of money not exceeding two hundred thousand dollars.

AND WHEREAS, for the payment of the said debentures, sinking fund and interest, it will require the sum of $14,000 to be raised annually by special rate in each year.

AND WHEREAS the amount of the whole rateable property of the said city according to the last revised assessment roll is the sum of $2,540,245.

AND WHEREAS the total amount of the existing debt of the city is the sum of $155,500, irrespective of the sum of $85,000 proposed to be borrowed under authority of the Streets and Park Improvement Debenture By-law, which by-law is to be submitted to a vote of the electors of the city concurrently with this by-law.

THEREFORE, the corporation of the City of New Westminster enacts as follows:—

1. It shall be lawful for the mayor to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same upon the credit of the debentures hereinafter mentioned, a sum of money not exceeding in the whole the sum of two hundred thousand dollars.

2. It shall be lawful for the mayor to cause any number of debentures to be made for such sums of money as may be required, but not for less than one hundred dollars each, such debentures to be sealed with the seal of the corporation, and signed by the mayor and counter-signed by the treasurer thereof.

3. The said debentures shall be made payable in *fifty years at furthest from* the day on which this by-law takes effect, either in sterling money of Great Britain, or in the currency of this province, or the country where the same may respectively be made payable, which may be in any place or places authorized by the said act as may be agreed upon between the purchaser or purchasers thereof, and the *mayor, and the said debentures shall have* attached to them coupons for the payment of interest.

4. The said debentures shall bear interest at the rate of five per centum per annum from the date thereof, which interest shall be payable half-yearly on the first days of January and July in each and every year.

5. *For the purpose of forming a sinking* fund for the payment of the said debentures and the interest thereon an equal annual special rate of 5⅝ mills in the dollar shall be levied and collected in addition to all other rates in each year upon all the rateable property in the said city during the currency of the said debentures or any of them.

6. All moneys arising from the said rate beyond the amount required for the payment of interest upon the said debentures may be invested in each year as the council of the said corporation may direct, for the purpose of creating a sinking fund for the redemption of the said debentures as they respectively become due, without prejudice to any of the powers conferred upon the said council by the said act.

7. This bylaw shall take effect on the 17th day of June in the year of Our Lord one thousand eight hundred and eighty-nine.

8. This by-law, before the final passing thereof, shall receive the assent of the electors of the city in the manner provided by the New Westminster Act, 1888, and amending acts.

9. This by-law may be cited as the Water Works Debenture By-Law, 1889.

By-law read a first time on the 11th day of March, 1889.

By-law read a second time on the 11th day of March, 1889.

NOTICE.

TAKE NOTICE THAT THE ABOVE is a true copy of the proposed By-law which will be taken into consideration by the Municipal Council of the City of New Westminster after one month from the first publication thereof in the BRITISH COLUMBIAN newspaper, which first publication took place on the 15th day of May, 1889, and that a vote of the Electors of the City will be taken on said proposed By-law at the New City Hall, Market Square, in said city, on the **13th day of June, 1889,** between the hours of 9 o'clock a.m. and 5 o'clock p.m.

PROVINCIAL SECRETARY'S OFFICE,
8th May, 1889.

WHEREAS THE LIEUTENANT-Governor in Council is empowered, under the "Public School Act," to create School Districts, in addition to those already existing, and to define the boundaries thereof, and from time to time to alter the boundaries of existing Districts; *it is hereby notified that His Honor has* been pleased to create the tract of land enclosed within the under-mentioned boundaries a School District, under the title of the "Bigger Prairie School District," viz:—

Commencing at the south-west corner of Section 8, Township 10, New Westminster District; thence east along the International Boundary Line to the south-west *corner of Section 9;* thence due north to the north-east corner of Section 21; thence due west to the north-west corner of Section 19; thence in a direct line south to the point of commencement.

Also, that His Honor has been pleased to create the following tract of land to be a School District, under the title of the "Aschroft School District," viz:—

All that tract of land embraced between the circumference of a circle whose centre shall be the centre of the plot of land on which the Government Building now stands, and whose radius shall be a distance of four miles from such centre.

Dont forget the lecture to-night, "Everybody's School," by Dr. Ormiston, at the Presbyterian church.

The str. Rithet left for Victoria this morning with 40 tons of freight, a car-load of horses and 25 passengers.

Lots in sub. Lot 6, B. XII, Dublin and London streets—$100 and $125, on easy terms.—Woods, Turner & Gamble. *tc

North Arm Road Lots, from $100; Sapperton, $150; and Brownsville Acre Lots at $100, on easy terms, at W. J. Walker & Co's. *

Look out for the great sale of lots in the town of Seattle, at the Mission Bridge, on June 15th next. For particulars, apply to Wm. Reidt. *

The Rifles parade to-night for skirmishing practice. Every man must be present at this parade to sign the pay roll. The artillery parades to-morrow night.

Major Peters has advised Capt. Scoullar that he will inspect the Westminster militia on Saturday afternoon. Both corps will parade at the drill shed at 1 o'clock, and march to the cricket grounds where the inspection will take place.

The funeral of the late Mrs. Cecilia Isabella Drake, beloved wife of Mr. Wm. Tyrwhitt Drake, took place in Victoria, on Sunday afternoon from the family residence, Cook street. Many sympathizing friends were in attendance, and heaps of floral offerings covered the casket.

Stock ranch, on Pitt River, for $3,500; worth at present rates $6,000; 276 acres land with improvement; 136 acres high bush land, rest prairie. Must be sold immediately; a rare chance for anyone with the cash; double your money in 12 months. Apply to T. J. Trapp. *

The *Courier* says: The Vancouver Coal Co. recieved 520 feet of tubing for the Southfield bore a few days ago. We are given to understand that the bore is already down about 800 feet, and if that be so, the company is determined to thoroughly prospect their land lying in that direction.

The calves brought down yesterday by the str. Irving remained on the wharf all night, during which time they kept up a continual chorus of "ba's." This noise is a great nuisance and the authorities must put a stop to it by having the calves removed immediatly after arrival.

Chief Pearce made a long and fruitless search to-day for Squamish Charley, the Indian who attempted to kill his klootchman on Tuesday afternoon. Nothing of Charley's whereabouts could be discovered, and the chief is convinced he has got into safety somewhere and will not return to the city.

Tuesday afternoon a white boy attacked a Chinaman on Government street. The Chinaman showed fight and in the struggle that followed, the belligerents fell through the window of the Bon Marche boot and shoe store. This accident put an end to the hostilities, and the quarrel was settled by both parties paying for the broken window.—*Colonist.*

Through an unfortunate error, says the *Colonist*, in fixing the hours of polling from 10 a. m. to 4 p. m., instead of from 8 a. m. to 4 p. m., as provided under the new Municipalities Act, the Street Railway Guarantee By-Law and the $45,000 Loan By-Law will have to be again submitted to the ratepayers for their approval. Tuesday, June 11th, has been fixed upon as the day for voting.

Mr. Dashwood Jones laid on our table to-day a box of strawberries and a dozen new potatoes, the former grown by Mr. Keith on Montreal street, and the latter by Mr. Jones on Clinton street. The strawberries were large, weighing about an ounce each, and most delicious in flavor. The potatoes are splendid specimens of the Murphy tribe, being large, well formed and almost matured.

Sir Matthew Begbie, Chief Justice of British Columbia, does not like the press. His lordship recently told a jury that it was one of the worst of modern institutions, prying into private affairs, libelling characters, and perpetrating a variety of other indiscretions too numerous to mention. Of course there are newspapers and newspapers, just as there are judges and judges. It is rather to be feared that the chief justice has been subscribing to a journal of the wrong kind, though, truth to tell, they are difficult to discover in the Pacific Province.—*Toronto Mail.*

The Snagboat.

The snagboat Samson returned from up-river last night, where it has been kept busy of late removing snags from the steamboat channel between Sumas and St. Marys Mission. Snags are numerous and large this year, and the Samson has a busy summer's work ahead of it. The Samson went down to the mouth of the river this morning to straighten out the channel buoys which have been out of place for a week.

Those Extra Licenses.

The despatch from Ottawa, which was published in The Columbian a few days ago, stating that Mr. Thomas Mowat, inspector of fisheries, had been asked to report on the advisability of issuing 50 additional fishing licenses this year, has not been heard from yet by Mr. Mowat. If such instructions do come, as is quite probable, they will be received by mail and therefore are not due for a couple of days yet. Mr. Mowat thinks it quite probable that the department has decided on the course indicated in the despatch. The issurance of 50 extra licenses would be greatly appreciated by all who consider the interests of the fishermen.

Rifle Association Meeting.

A meeting of the New Westminster Rifle Association was held last night, the president, Mr. W. Wolfenden, in the chair. It was decided to hold the first prize meeting of the season on Saturday, June 9th, and a committee was appointed to solicit prizes and subscriptions for the same. A challenge will be forwarded to the Vancouver association to shoot a match on June 16th, 10 men, Queen's ranges, Martini or Snider rifles. A committee was appointed to canvas for members. The team to compete against Vancouver on June 16th will be chosen from the top scores at the prize meeting on June 9th. The officers of the association are anxious that the Saturday afternoon practices should be largely attended.

Vessel Burned.

The bark Emerald, belonging to the Puget Mill Company, was destroyed by fire and a half cargo of 500,000 feet of lumber almost totally ruined, at Port Gamble at an early hour Sunday morning. The Emerald was worth about $30,000, and the cargo perhaps $5,000. The Emerald was built in New York in 1855. She was 181 feet in length, 36 feet breadth, and 23 feet depth. She was purchased by the Puget Mill Company about 18 years ago. Since then she has been continually in the service of the company, transporting lumber to San Francisco and different parts of California, and at times to South America, Australia and Hawaiian islands. At the time of the fire she was loading for San Francisco.

Dr. Ormiston at Vancouver.

We clip the following from the *News-Advertiser's* report of Dr. Ormiston's lecture, "Everybody's School," at Vancouver last night: It would be impossible in limited space to give more than an outline of the eloquent discourse to which Dr. Ormiston treated his hearers. In the hour and twenty minutes occupied, he said more than the average speaker would say in double that time. The main thought of the lecture was kept steadily in view, and every word uttered was required and conveyed a meaning which was necessary to the full elaboration of the subject. The ideas expressed were all of a vigorous, healthy, practical character, clothed in eloquent and strong language, and delivered in a full, rich and clear voice.

Columbia River Salmon Fisheries.

The take of salmon all along the river continues to be very poor, and fishermen are rather discouraged. Fish Commissioner Reed says the traps are doing better than the seines, but are only taking from one to four or five. Some of the cannery men say this is the last season they will use gill nets, and the prospect is that next season the shores of the river will be lined with traps for many miles up. If the gill nets are done away with, and the channel left open, it will give some of the fish a chance to get up the river. A letter from the Cascades states that three wheels there which last year were catching three tons of salmon daily, are now not averaging more than forty pounds each per day. Of course, this is a very unusual season, the spring coming so early and there being no food in the river to speak of; but it looks as if the salmon were disappearing despite the hatchery. If they are not exterminated it will be no fault of the cannery men.—*Oregonian.*

Libel Suit.

The libel suit of Captain Robertson *vs.* the *Colonist* will come up to-morrow before Sir Matthew Baillie Begbie. In view of the opinions held by the chief justice, of the press and the profession generally, we think the interests of justice would be better served were Sir Matthew to decline to preside at any more trials for libel. This is not our opinion alone; it is the conviction of almost every citizen of Victoria. Sir Matthew has outlived his usefulness on the bench, and the two late libel cases clearly demonstrated that there is a wide divergence between his opinion and the opinion of eight respectable jurymen as to what is right and just in such cases. If Sir Matthew Begbie will refuse to retire upon superannuation allowance altogether, he ought at least to confine himself to cases where it will be impossible for personal prejudices to have any effect in determining the issue. Certainly it will be most improper for the chief justice to hear any more cases against newspapers.—*Times.*

PERSONAL.

T. E. Ladner came up from Delta last night.

J. H. Todd, of the Richmond cannery, is in town.

W. H. Ladner, M.P.P., arrived in the city last night and went over to Vancouver this afternoon to be present at the meeting of the B. C. Jockey Club.

Rev. Dr. Ormiston arrived on the 2.10 train, and is a guest of Rev. Thos. Scouler. He leaves to-morrow for Victoria and the east, *via* Vancouver.

Rev. Thos. Crosby came down from the Chilliwack camp meeting yesterday, and left to-day for Victoria, where he takes the steamer Sardonyx for the north on Saturday.

Bad for Fish Exporters.

Fish exporters were feeling rather downhearted to-day owing to the advance in rates which has been made to all points east. The express company yesterday notified exporters that in future gross weight would be charged for instead of net weight as in the past. This makes the advance in rates about 60 per cent. Each box contains 100 lbs. of salmon and about 40 lbs. of ice, while the box itself weighs about 20 lbs., making the gross weight of the package 160 lbs. Heretofore expressage has only been charged on the 100 lbs. of salmon at the rate of 6 cts. per pound to Calgary, 7 cts. to Montreal and 9 cts. to New York. These figures include iceing the fish once a day *en route*. It will now cost 11¼ cts. per pound to transport the fish to Montreal, which with the price of the fish will bring the wholesale cost up to 20 cts. per pound. It will be easily understood that the large trade which has developed during the past year cannot be continued if the extra charges are enforced. The effect of the advance will be to temporarily kill the export fresh salmon trade. The exporters had made all arrangements for large shipments of fish each day during the whole of the season, but it is now certain these will be very considerably cut down. The C.P.R. have got the earth, as far as Canada is concerned, and now it wants the sea and all that therein is.

Chilliwack Camp Meeting.

The annual camp-meeting at Chilliwack opened on Thursday 23rd inst., and closed last Wednesday morning at 7 o'clock. The tents on the ground were all occupied, and a large number of strangers and visitors were seen upon the grounds during the week. With the exception of one or two light showers, the weather was delightful and most of the services were held out of doors under the shade of the spreading branches. A feature of the meeting was the presence of Rev. Dr. Eby, who arrived by steamer Batavia from Japan last Friday on a flying visit to the eastern provinces. He remained upon the ground over Sunday. Dr. Eby's sermon and addresses will be long remembered by those who heard them. On Sunday afternoon the doctor gave a very instructive address on mission work in Japan, explaining the pressing need that exists at present for a large central hall in the city of Tokio, to receive funds for which is the object of his present visit to this country. At the close of the service a collection of $265.00 was taken to aid in the work. Among the visiting ministers, all of whom rendered faithful service during the meeting, were Revs. T. Crosby and J. Greenwood, of England, R. J. Irwin, J. H. White and J. Calvert. The Indian camp-meeting was held simultaneously upon the same ground, and the services were largely attended and most successful.

Rev. Dr. Ormiston.

Rev. Wm. Ormiston, D. D., LL. D., of New York, who lectures to-night in the Presbyterian church, is a Scotchman by birth. He was born April 23, 1821 (making him about 68 years of age), on the banks of the Clyde, at Castle Hill farm, Lanarkshire, Scotland. In the spring of 1834 his parents emigrated to Canada, and settled on a farm in the township of Darlington, about 30 miles east of Toronto. On this farm the son spent five years assisting in its laborious work, and in the study of his Bible; at the same time acquiring a knowledge of arithmetic, mathematics and Latin as far as books could assist without a teacher. To secure books he ransacked the country all round and read all he collected. He opened a school at Whitby, which prospered, and with its fees supported himself while he was preparing for college. In 1843 he became a student in Victoria College, Cobourg, where for two years as an undergraduate he filled a tutorship in English and mathematics, took his degree of B.A. in 1847, and was immediately appointed professor of moral philosophy and logic. In 1849 he was ordained to the ministry in connection with the United Presbyterian church, and became pastor of the churches in Newton and Newcastle. In 1853 he was chosen professor of mathematics and natural science in the Normal school in Toronto, and was afterwards appointed examiner in the University of Toronto, a member of the board to approve of candidates for masterships in grammer schools, and inspector of grammer schools for Canada West.

During the years in which he held these positions he received calls to several important churches, and in 1867 accepted the pastorate of the Central Presbyterian church of Hamilton. The University of New York conferred on him the degree of D. D. in 1860. In 1862 he visited Great Britain, preached several times in London, addressed the Free church assembly in Edinburgh, and on his return to America delivered a series of lectures descriptive of his travels. He declined calls to some of the chief cities of the United States, and also to London, England. He made a second trip to Europe in 1867; and in 1870 received and accepted a call to the Collegiate Reformed church of New York, corner of Twenty-ninth street and Fifth avenue, where he is still laboring. He visited the south in 1871 and California in 1872. His alma mater—Victoria College, Cobourg, Canada—showed its appreciation of the ability and acquirements of its former graduate and professor by enrolling him in 1881 with the LL. D.'s on its honored list.

In person Dr. Ormiston is described as rather tall, with a full form and remarkable presence. His forehead is full, smooth, and round, and bordered with a mass of frizzled hair, now marked with the daintiest touches of silver. He impresses the observer at once as a man of power. His greeting is always cordial, and his conversation cheerful, symphathetic and instructive, revealing a warm heart and a well furnished mind. He has shown remarkable versatility of talent and adaptedness in every situation he has been called to fill.

It is announced in Costa Rica that the Anglo-Spanish Steamship Company will soon put on a steam line between Valparaiso, Callao and Panama, which will also run from San Francisco and British Columbia, competing with the Pacific Mail Steamship Company, and connecting at the last-named place with the Canadian road.—*Standard.*

It is said that capitalists intend to erect a mammoth hotel at Toronto, to rival the Windsor hotel of Montreal. The present site of the Ontario parliamentary buildings, fronting on the Esplanade, is spoken of.

Headaches and Fevers, to cleanse the system effectually, yet gently, when costive or bilious, or when the blood is impure or sluggish, to permanently cure habitual constipation, to awaken the liver and kidneys to a healthy activity, without irritating or weakening them, use Syrup of Figs.

OTTAWA NOTES.

Ottawa, May 28.—Mr. Vanoughnet, the deputy superintendent of Indian affairs, leaves to-morrow for Vancouver. He will be followed shortly by Hon. E. Dewdney, superintendent-general. Both are likely to go north to settle various disputes that have arisen between the government and the Indians.

Sir John Macdonald, Sir Adolph Caron and Messers. Chapleau and Costigan left to-day for Montreal, to attend the banquet to Hon. L. O. Taillon, ex-leader of the conservative government in Quebec.

The members of the government do not express surprise at the extraordinary precaution taken by the United States for enforcing their sovereignty in Behring Sea. British vessels may go north and take the risk of capture, but the impression prevails that the British men-of-war on the scene will not interfere unless urgent necessity existed. England, in view of the progress of the negotiations, would be committing a hostile act by permitting her war ships to interfere with the American revenue cutters, while the claims for compensation on account of previous seizures will be pressed.

THE BISHOP INQUEST.

New York, May 28.—In the Bishop inquest this morning, Deputy Coroner Jenkins testified to having examined the body of the mind reader, reopening the incisions previously made. He found the body well preserved. In the chest cavity he found many of the vital organs, including the brain, all sound, and healthy in appearance, and presenting no cause for death. Portions of the brain and other organs were missing.

The grand Orange lodge of British North America met at Goderich yesterday. Most Worshipful Grand Master Clarke Wallace occupied the chair. His address dealt fully with the Jesuit question. It is expected a discussion on this subject will be one of the leading features of the meeting.
