THE EDENOGRAPH

VOLUME 2. NUMBER 13. ENDERBY, B. C., AUGUST 9, 1905. PRICE, $2 A YEAR

Enderby Doings

Dr. Tunstall left on Tuesday for Kamloops.

John Fowler, of the Farmers' Advocate, is registered at the Enderby.

T. G. Wanless, of Vernon, was in town this week talking insurance.

A man requires the thinnest kind of underwear this hot weather, they have it at Harvey's.

Dr. Duncan, of Vernon, passed through on Tuesday en route for the coast.

Mrs. Swanson and O. Swanson left on Thursday of last week for New Westminster.

C. C. Poyntz, of Armstrong, was a passenger on Monday's outgoing train, bound for Spokane and other Washington points.

When children start to go to school they will want new shoes, books, slates and a lot of things. Get them at Harvey's.

G. E. Griffiths, of Norwood, London and L. J. Hannam, of Weymouth, England, are registered at the Enderby Hotel.

Dr. Manchester, lately in charge of the New Westminster lunatic asylum, takes charge of Dr. Morris's practice at Vernon, who is taking a trip to the east.

The train crew of the S. & O. Limited are a hard working lot these days. It was heard said by one of them that he had had no sleep for a day and a half.

What do they sell at Harvey's? Why everything that is good and they sell them cheap. Not all gone yet, but going fast—those straw and canvas hats at Harvey's.

On Sunday morning last the Rev. F. V. Venables held divine service at Salmon Arm. The attendance was very good, and the Celebration of the Holy Communion there were fourteen present.

N. H. Kenny and R. P. Bradley expect to go out this week to examine the various creeks with the end in view of seeing if one could be found suitable from which to supply the town with water.

The Kootenay Mail come out this week with a Railway Edition, containing illustrations of scenes along the C. P. R. main line and various others of railway interest. It is well designed and gotten up, and is a credit to the publishers.

The ladies of St. George's Guild of the English church will hold a garden party on Mrs. Moffet's lawn on Wednesday, August 16. All are cordially invited. Ice cream and other refreshments will be served. No charge for admission.

T. W. Fletcher, of Armstrong, passed through on his way home on Saturday. Mr. Fletcher had just returned from an extended business trip to Calgary and the Crow's Nest line towns. Business is picking up there, and merchants confidently expect a revival in all lines of business.

Enderby has now a resident exponent of the law. W. P. Gooch came in the latter end of last week, accompanied by Mrs. Gooch, from Victoria, and has opened offices in the Bell Block. Already business is coming along, and we sincerely hope that Mr. Gooch will find residence in Enderby both profitable and pleasant.

For a cool comfortable summer shirt, pretty tie or neat collar Harvey's is the place.

Rev. D. Campbell spent Thursday afternoon visiting round town.

Fresh fruits in season at J. G. Metcalfe's.

W. Hill expects to go out on Saturday for main line points on Saturday.

C. H. Chester and wife, of Manitoba, are visiting this part of the valley, the guests of Mayor and Mrs. Bell.

Preserving Pans, air tight sealers, sugar and everything to make jam at Harvey's.

P. Burnett, P.L.S., spent a few days last week surveying at Grand Prairie.

Mr. Hugh Davidson, of Victoria, is at present in town, making the annual audit of the books of the Columbia Flouring Mills Company.

W. E. Truesdale has a fine plant of flowering Maple with twenty-one blossoms on. The plant came from M. J. Henry's nurseries at Vancouver.

Mr. Rollston, of Deloraine, Manitoba; passed through on Friday for Vernon with a car of effects to join his mother and brother, who are located here.

Mr. and Mrs. Brookland, of Mathers, Manitoba, spent several days in town last week. Mr. Brookland has purchased the 6 3-4 acres owned by J.W. Evans. The deal was put through by A. E. Hale.

T. Bell was up from Armstrong on Saturday viewing the progress being made on his new hotel. The brickwork is now well above the second floor, and by the end of the month it is hoped to have the building ready for occupation.

J. R. Elmhurst, of Ymir, who spent last week looking over the Okanagan valley, spent a portion of Friday and Saturday driving through the country around Enderby, returning home on Saturday's train, Mr. Elmhurst seemed very favorably impressed with the condition of things in this section of the valley.

If any further evidence were needed as to the increasing volume of the amount of fruit being shipped out of the valley, one has only to pay a visit to the express car on the afternoon train, and see the piles of boxes that line the sides. So much so has it increased that an assistant clerk from the main line now helps the regular way clerk.

Armstrong does not know whether to have a fall fair or not this year. At a meeting of the Armstrong & Spallumcheen Agricultural Society held last week this matter was discussed: but owing to the poor attendance the meeting was not considered representative enough to decide the question. A general meeting will therefore be called for at an early date, due notice of which will be given.

In another column will be found the advertisement of the Dominion Fair to be held at New Westminster from September 27 to October 7. From time to time notes have been published in these columns concerning the attractions and inducements offered to visitors at the exposition: and the benefit that will result to the Province by such being held on B. C. soil this fall. Nothing has been left undone to make the exhibits thoroughly representative: and it is hoped that all who can will journey to New Westminster and so help to make it the financial success that it deserves. We do not want it to be written that the Dominion Fair of 1905 was a failure.

Threshing from the stook is now the order of the day. Wheat is yielding well here; and reports from all over the valley are excellent. Threshing is about finished on the Stepney Ranch; wheat went 50, and oats 80 bushels to the acre.

P. L. Lowery announces in the current issue of the Fernie Ledge that he has handed over the pen to D. V. Mott, who takes over the plant and goodwill of the paper. Mr. Lowery expects to resume publication of Lowery's Claim at Nelson.

R. Skinner, of the Vernon News mechanical staff, was a pleasant caller at the office Tuesday afternoon. Mr. Skinner was on his way to attend a district meeting of the Methodist church to be held at the summer school at Tatten's siding. Quite a few from along the line were journeying there.

C. H. Giberson, in the employ of the Kamloops Lumber Co., leaves to-day for Kamloops where he takes a foreman's position in the company's mill at that place. He will be very much missed by his fellow workers, who all wish him success in his new position. Mr. Giberson is very sorry to leave Enderby, which has been his home for the past two years.

The railway company are putting in quite a bit of work on this line at the present time. Last week a gang of men, with three flat cars, sleeping and living cars, made their headquarters at Armstrong. The ticket office there is being moved back four feet to permit of a wider platform, which has been a a pressing need for some time. A gang were working here last week, patching up the platform and placing barrels around and on top of the freight shed for fire protection.

Don't you want shoes. Get a pair of "Walkover" at the Enderby Trading Company. New line opened up.

Rev. Dr. Shannon, of London, Ontario, and recently from Prince Albert, Saskatchewan, spent several days here last week looking over the district. Mr. Shannon is visiting the valley for the benefit of his health, and incidentally looking for a location for his son, who contemplates settling in the valley. Walter E. Truesdale drove Mr. Shannon through the district, and the latter was very favorably impressed with all that he saw. Dr. Shannon left for the south on Thursday.

Death of R. Harvey.

The sad news reached town on Saturday last week of the death of Rout Harvey, at Victoria, after a protracted illness, at the age of 78. Mr. Harvey was a pioneer of that city, coming there from Bury St. Edmunds, Suffolk, England, in the year 1861, and had been prominent in commercial pursuits. For many years he had been identified with the firm of Turner, Beeton & Co.

A family of six sons and one daughter are left to mourn his loss, one of whom (H. W. Harvey) is a prominent merchant of this town.

Sailed for Canada.

London, August 1.—According to an announcement of the Admiralty, the squadron commanded by Prince Louis of Battenburg sails from Gibraltar this day for Canada, the itinerary including a visit to Quebec, St. John, Halifax, New York and Bermuda. The squadron consists of six of the fastest cruisers of the British navy, with the battleship Drake as the flagship.

Beneficial Changes in Lead Tariff.

Winnipeg, August 1.—Mr. W. A. Galliher, M.P., of Nelson, is here en route west. He says that the changes in the tariff affecting the lead mining are proving very beneficial to the industry in British Columbia.

Business at Council Meeting, Aug. 2

Present.—Geo. Bell, Mayor, in the chair. Messrs. Ald. Bradley, Evans, Kenny, Sharpe, Smith.

Minutes.—The minutes of the previous meeting held on July 26th, 1905, were read and confirmed.

By-law for the prevention of cruelty to animals. By-law to amend By-law, No. 8. By-law to amend by-law, No. 10. It was moved by Ald. Bradley, seconded by Ald. Kenny, that the clerk be instructed to affix the seal of the Corporation to these By-laws. Passed.

Evergreen Lane. The clerk was instructed to write to Mr. H. Swann informing him that Mr. Greyell had undertaken to open this street to its full width, as registered, as soon as he has taken off the crop at present growing on the land.

Public water supply. The Council continued the discussion of this matter, which had been postponed from the previous meeting. It was referred to Alderman Kenny and Bradley to inspect at their earliest convenience the various creeks in the vicinity of this City, and to report upon them as possible sources of supply.

It was felt that in the meantime some action should be taken by the Council in reference to protection of the city from fire, and it was decided as a beginning to form a ladder and bucket brigade. It was referred to Ald. Bradley to have three ladders made, and the clerk was instructed to procure a supply of buckets.

Report of Sanitary Inspector. His Worship the Mayor stated that the sanitary inspector had reported to him that on proceeding to investigate the complaint of Mr. J. H. Bailey made to the council at their last meeting, he had discovered the same to be unfounded, there being no hogs on the premises mentioned by Mr. Bailey, nor anywhere else between the railway and the river.

Drainage of the City. The council had under consideration the question of doing the necessary ditching to drain the City, and it was referred to the chairman of the board of works to arrange for levels to be taken.

A letter was read from H. W. Harvey, complaining of the condition of the approach to the bridge in front of his store. The clerk was instructed to reply that the council regret that at the present time they have no funds in hand, but at the earliest opportunity this and other urgent matters of the same kind will be attended to.

The council adjourned at 10.46 p.m.

Advertising B.C.

The exhibit of B. C. fruit at the Winnipeg Exhibition was a very representative one, and attracted a great deal of attention from the visitors. This exhibit, as was stated some little while ago, is under the charge of Mr. Palmer, the fruit commissioner for British Columbia. From there it was sent to Brandon, and then to Indian Head and Regina. Under such able care benefit cannot fail to accrue to those who sent down exhibits; if not directly, it will be so indirectly, to the benefit of British Columbia, as the fruit growing province par excellence of our fertile Dominion.

While in Winnipeg Mr. R. M. Palmer was induced to give a little talk on the aims and objects of the British Columbia government in making exhibits of fruit at the various fairs.

Mr. Palmer said: "The most important object is to promote the sale of British Columbia fruit in Manitoba and the Territories. The orchard areas of British Columbia have been widely extended during the last three years. The area in fruit now exceeds 14,000 acres; and by the spring of 1905 at least 20,000 acres will be planted in orchards. At the present time the fruit market which is reached from Calgary and Edmonton is largely controlled by B. C. fruit, and Saskatoon and Regina are the next objective points as being nearer to our large producing centres. It has been evident for some time that to provide an outlet for the crop that will be produced from the newer orchards coming into bearing that the Winnipeg market will be one of the principal points for shipment, British Columbia fruit growers, in their new orchards are making a specialty of fancy apples, such varieties as the Jonathan, McIntosh Red, Wagoner and the Spitzbergs are being largely planted. These are varieties of the highest quality and reach perfection in the Pacific province. With the increase of wealth in Manitoba and more especially in such centres as Winnipeg, it is recognized that there will be a market for fancy fruit, quite equal to that which now exists in the larger cities of America, such as New York or Chicago, which draw their supplies of fancy fruit from the Pacific coast states. Then, particularly in the southern Okanagan and Similkameen districts, considerable attention is being paid to the growing of peaches for shipment. Many thousands of trees have been planted during the last three years. The first commercial orchards are now coming into bearing and samples of the product formed part of the B. C. exhibit. It is generally admitted that the quality of the B. C. peach is greatly superior to the California or Oregon fruit, and in the course of the next two or three years Winnipeg may receive similar shipments in carload lots.

"The growing of tomatoes under glass during the spring and early summer months is being made a specialty of. The quality of the tomatoes is very high and it is expected that from this time on shipments will find their way regularly to this market.

"The B. C. exhibit of fruits at Winnipeg are thoroughly representative of the province at this season. The principal feature has been the magnifiaent display of cherries. The supplies have been drawn from the Okanagan, the Kootenay, from the Lower Fraser districts and from Vancouver Island. Early apples are also shown from all of these districts. Plums from Victoria, and the southern Okanagan small fruits, including raspberries, blackberries and red and black currants from the Fraser valley and from the Kootenay districts, peaches and plums from the Okanagan and Victoria districts."

Letter Received.

A letter was received at this office from a representative of the residents of up-river points on the Mabel Lake road, regarding the condition of that highway and the work now being done to it. We regret exceedingly that we are compelled to hold over this interesting letter on account of it arriving just as we had closed up the forms to go to press, but it will be published next week.

Provincial News Items.

Vancouver's population, at a conservative estimate, is placed at forty-five thousand. It has grown at least four thousand since the commencement of the year.

Kamloops, Aug. 2.—John Franklin, a young Englishman in the employ of William Fortune, Tranquille, was seriously stabbed in six places by Henry Baker, a Mexican and a fellow worker last night. Franklin is now in the hospital and his assailant is in jail.

The salmon run of 1905 promises to eclipse that of all previous years. As a result it is estimated that the coast will be richer by nearly $2,000,000. The canners figure on packing 12,000,000 salmon this season. The boats are on a limit of 200 fish each; but catches average from four to six hundred fish. The canneries are glutted, and working day and night in an effort to get ahead.

A large party of railway men are expected to visit the coast this September, who will attend a convention at Portland on September 14 and 15, visiting other coast cities afterwards.

An Interior Band Association has been formed with headquarters in Vernon. The object is to hold an annual band meet and to create an interest in band work generally. Officers: S. A. Shatford, Vernon, president; Vice-pres., J. S. Logie, Summerland; 2nd vice pres., W. W. Wolfenden, Armstrong; Sec.-treas., C. Goodwin, Vernon; Conductor, R. H. Sawyer, Revelstoke. Kamloops was not represented

Construction work has been commenced on the Midway and Vernon: A New York syndicate is financing the necessary money to build the road. McLean Bros. are building from Midway westward, and as soon as all arrangements are completed contracts will be let for the construction of the entire road. Work had to be commenced on or before August 1st in order to earn the subsidy voted two years ago by the Dominion parliament.

Nelson, August 4.—Reginald McIntosh, age 13 years, son of Mr. Harry McIntosh, a well known hotel man of Rossland and Halycon, was drowned yesterday afternoon on a Methodist picnic from Rossland. The boy bathed in the Columbia, and was caught in a whirlpool. He struggled out, and fell back exhausted and sank. The body was recovered after 15 minutes immersion, and though life was not extinct the lad died after an hour's effort to resuscitate him.

Every man owes it to himself and his family to master a trade or profession. Read the display advertisement of the six Morse schools of telegraphy in this issue and learn how easily a young man or lady may learn telegraphy and be assured of a position.

THE EDENOGRAPH

W. & H. FRASER.

"JE SUIS PRET."

Published each Wednesday at Enderby, B.C. the Eden of Canada.

FIRE PROTECTION

In the minutes of the last city council meeting we were pleased to read that some steps had been taken to remedy the lack of protection from fire. That it is a very real danger was proved on Friday, when some mischievious boys playing with matches, set fire to a barrel of waste paper, etc., just at the rear of the Bank of Montreal business premises. These combustible materials blazed up fiercely and but for the prompt arrival of assistance would certainly have spread to the hotel building, and the town placed in jeopardy. As is usually the case, no water was available, and the blazing barrels and fence had to be thrown out into the road.

The C.P.R. have also shown that the danger is no imaginary one by the placing of a staging and barrels filled with water on the roof of the freight shed. The C.P.R is usually given the credit of not making improvements without an object in view and the possibility of some return. With this before them the people of Enderby should "get a hustle on" and see the thing through.

If some temporary arrangement could be made with either the Columbia Flouring Mills Co. or the Kamloops Saw Mill Co. for a supply of water (even if only for the business section), for fire protection and domestic purposes, it would be a popular move, especially if the corporation owned the pipe or pipes, the mills only supplying the water. It is now nearly a year ago since the same subject came up in these columns, and little has been done between then and now to remedy what is a great inconvenience, a possible source of disease, and an obvious state of unpreparedness in case of fire. A bucket brigade is a poor substitute for a hose pipe with pressure, but if nothing else is done, it were best to organise it at once, and then Enderby will be free from the slur of being found in a state of confusion and impotency if a conflagration were to occur.

ONCE AGAIN

Already that hardy annual, the winter railway service foreboding has made its appearance in the valley and we gather from the tone of some down south that the Canadian Pacific Railway is standing ready with out-stretched arms, like a beneficent god father, to shower blessings, good-will and peace upon the inhabitants of the Okanagan valley.

The freight and passenger traffic has been and will be this winter deserving of a daily service, and the veriest tyro in the affairs of the valley will see the utter absurdity of sitting down and waiting, like a child, with eyes shut and mouth open to see what heaven will send him.

If we are to have a daily service this winter we must be up and doing, and press upon the C.P.R. and the Post Office authorities, the injustice of depriving about five thousand people of a daily mail service, and the grave inconvenience and loss to the industries and merchants of the Okanagan caused by a tri-weekly service.

TOPICS OF THE WEEK.

It is gratifying to note that the Provincial Government is alive to the possibilities and prospects of an ever-increasing market in the Territories and Manitoba for B. C. fruit. The collections of fruit exhibited at Winnipeg, Brandon, Indian Head and Regina attracted a great attention. It is to be hoped that local growers are alive to the fact that an exhibit is the best form of advertisement, and they should therefore seize every opportunity that offers to show off the products of the valley.

The Dominion Fair at New Westminster is coming on apace, and it behoves us all to see that Enderby and district is well represented there. We have seen it stated that the B. C. exhibit at Portland was a poor one and unrepresentive. We want to dispel any disparaging ideas which may have been formed by having an A1 and fully representative exhibit this coming September. From all accounts a large number of the farmers on the prairie have delayed visiting the Okanagan Valley till the fall. No doubt the majority will journey to New Westminster first, visiting the Okanagan on their way home. The business men of Enderby are interested in a project for the advertisement of the valley, which will be deserving their support, and from which we all shall as a whole reap the benefit. But that is not all; an exhibit of our products should be there, too!

Secrets of Success.

What is the secret of success, asked the Sphinx.

Push, said the button.

Never be fed, said the pencil.

Take pains, said the window.

Always keep cool, said the ice.

Be up-to-date, said the calendar.

Do business on the tick, said the clock.

Never lose your head, said the barrel.

Do a driving business, said the hammer.

Aspire to greater things, said the nutmeg.

Never do anything off hand, said the glove.

Be sharp in all your dealings, said the knife.

Spend much time in reflection, said the mirror.

Trust to your stars for success, said the night.

Strive to make a good impression, said the seal.

Turn all things to your advantage, said the lathe.

Make much of small things, said the microscope.

Get a big pull with the ring, said the door-bell.

Find a good thing and stick to it, said the glue.

Never take sides, but be round when you're wanted, said the bell.

Make the most of your good points, said the compass.

Viscount with Guards.

The officer who will be in charge of H. M. Irish Guards band on their forthcoming visit to the Dominion Fair at New Westminster will be Lieut. Viscount de Vesci. The Viscount de Vesci descends from the great baronial family of de Vesci, which was in historic eminence in the time of the early kings, and had summons to parliament as Baron de Vesci in 1264. The first baronet was Sir Thomas Vesey, who was created a baronet of Ireland, September 28, 1698 but subsequently taking holy orders was consecrated Bishop of Killaloe in 1711. Lieut. Viscount de Vesci is the second son, although heir presumptive, of Sir John Robert William Vesey, who was lieutenant-colonel of the Coldstream Guards, and of the Honorable Artillery company of London. The Vesey family have for a century and a half occupied important commands in Britain's army and navy.

Church Notices.

ST. GEORGE'S CHURCH.

Aug. 13th—8th Sunday after Evensong and sermon, 7.30.

REV. F. VERNON VENABLES, Vicar.

ST. ANDREW'S CHURCH

Service at 11 a.m. Sunday School, 9.45 a.m.—REV. D. CAMPBELL, Pastor.

NOTICE is hereby given that 60 days after date the undersigned intend to apply to the Lieutenant-Governor in Council, under the provisions of the Rivers and Streams Act, for permission to clear and remove obstructions from Cherry Creek and its tributaries in Yale District and to attach, construct and maintain dams and booms to the shores of said creek and Shuswap river, and to make such other improvements as may be necessary for driving, holding and sorting of logs and fluming of lumber thereon.

The tolls proposed to be charged are such as may be fixed by a judge of the County Court.

KAMLOOPS LUMBER CO., LTD.

With *The* Owl

HANK REKLAW IN THE DARK WOODS.

is good for me, is not, of necessity good for you. Every man's environment and the conditions surrounding him must comport with his own ideals, and the work he has undertaken. The way, save for minor things, is open in one direction, and each should clear it of all obstructions and make conditions conform to that which will stimulate his growth and enable him to give his best.

Conditions which would be favorable for one would be unfavorable for another. Man makes his own conditions and environment, and each should govern himself—and so govern his conditions, so as to constantly enlarge his life expression and favor continued expansion and development of his interior life.

Repression instead of development is the rule with us. Through unfavorable environment which we always condition, we are constantly made to repress our inner selves—our most lofty and sublime thoughts and feelings, and the real self is not developed because we permit unfavorable and adverse conditions to environ us. We do not favor as we should, the awakening of the latent, passive powers within us which are potential and without limitations. We allow feelings of our own weakness and insufficiency to dominate us, which gives the lie to our real sufficiency and power. We are weak and incompetent only because we think so, and because we refuse to recognise and act upon the promptings of that voice within, which does not recognise limitations. We curtail our powers through the limitations which we impose upon ourselves.

The material with which we build our lives and condition environment is from within. All that is needful is to open the valve and put the machine in operation. It will run so long as its product is utilized, so there is no clogging at delivery. We must keep the product cleared away to make room for more, and when we cease to dispose of this, and content ourselves with feeding upon what we have gained, we close the valve and further product ceases. We must give if we would receive, and the more we give the more we receive.

PURE DRUGS

The hardest lesson for all of us to learn is "the value of little things." But there is another lesson equally as important and quite as hard to master. It is "the value of pure drugs." If you are ill, no matter how simple the ailment, you will find that it is important to make sure of the drugs—they must be pure.

Self-Sterility in Fruits.

THEO. ROSS, B.A., P.E.I.

Extract from an address delivered at the annual convention of the P. E. I. Fruit Growers' Association.

For some reason which we do not understand many varieties of fruit are self-sterile. The pollen of that variety will not fertilize the pistils of the same variety, as for instance the Northern Spy. The pollen of a flower of a Northern Spy tree may fall on the pistil of the flower of a Northern Spy, but fertilization does not take place. We say the Northern Spy is a self-sterile variety and then we are in the dark groping blindly. This subject of self-sterility has not yet been worked out and will not be for a long time to come, for self-sterility is influenced by climate and location to quite a degree.

There are some varieties of nearly all kinds of fruits that are self-sterile, and by a self-sterile variety is meant a variety that is unable to set fruit when alone; in order to be productive it must be set near some other variety. Planting them near more trees of the same variety does not make them fruitful, but if trees of another variety are planted near them they are often made fruitful. Then there are all the graduations from self-sterility to self-fertility. Some varieties will set fruit with their own pollen, but the result will not be nearly as good as if fertilized by pollen from another variety, while again with other varieties it will be just as good.

In some work done at Cornell, Stark pistils were fertilized with Wagner pollen and others with Stark pollen with these results, so with Longfield Greening. In these instances the size was much increased by cross-pollination, but it might have been still further increased if some other variety had been used as a fertilizer. In the case of the Talman Sweet there has been very little improvement, but there again if some other polinizer had been used we might have had different results. The number of crosses that might be made are very large and in most of our orchards, where there are a large number of varieties, the number made every year is undoubtedly larger but we cannot cneck up results.

Experimenting with various pollinizers is not only pleasant work, but it requires really no outlay, and much good might result. All that is necessary is a few paper bags and some twine and pair of scissors. Cut the stamens from some blossoms as soon as they open and fasten paper bags over them to prevent pollination. Then, when the pistil is ready, dust some pollen taken from some stamens that have been protected in the same way and cover again with paper bags. In this way results can be noted but not in any other way. Even if there should be only one variety in an orchard the pollen might come a long way in the wind or bees might carry it. It is only when every precaution is taken that one can be sure. Even if this work has not been carried on very extensively cross-pollination of varieties is no longer a theory. It is an established orchard practice.

Among the common varieties of apples more or less self sterile are Gravenstein, King, Northern Spy, Red Astrachan, Russet, Winesap.

Mostly self-fertile: Baldwins, Ben Davis, Fallawater, Greening, Duchess.

Most of our common plums are self-fertile, such as Burbank, Bradshaw, Green Gage, Lombards, Damsons, etc. Strawberries very often lack stamens altogether, as the Anna Kennedy, Arrow, Avery, etc., while others like the Crescent have so few and so poor stamens that they are practically self-sterile.

These observations ought to be of some practical worth in the setting out of an orchard. Some varieties of fruit will not bear at all unless they are planted near other varieties, while nearly every variety is benefited by cross-pollination. Do not then set out a large block of any one variety, but mix them, setting varieties that blossom simultaneously side by side, and try to find out which varieties cross best. If we have large blocks of one variety it be advisable to put on each tree some grafts of other varieties to act as pollinizers.

Job Printing

That touches the artistic and keeps house for Economy, will be done at this office—quickly, neatly and cheaply. You do not have to send your printing out of town. Anything that can be done in Toronto (in ordinary commercial printing) can be done right here.

Attractive Packages.

In a report issued by the Department of Trade and Commerce, Ottawa, under date of June 19, Mr. J. B. Jackson, Leeds, England, has the following to say about apples from Tasmania:

"Australian and Tasmanian apples are arriving in large quantities. These apples are shipped in a nice sized box holding about forty pounds of fruit, and are bringing wholesale to-day from $3 to $4.15 per box. The packing and grading is excellent. Each apple is rolled in tissue paper and all interstices in the box filled therewith.

"I have seen no apples imported into England that can in any way approach these apples for packing. They come out of the box without the least sign of bruise or discoloration, and in as perfect condition as when picked from the tree. The best varieties sent are very fine in flavor, but do not excel the best Canadians as we find them in the orchards in Canada.

"The boxes are well stencilled 'Australian' or Tasmanian,' together with the initials of the grower and the place where grown. Within the box a neat show card the full size of the box is found, printed in colors, stating where grown, the variety, and a guarantee that they have been packed and graded according to government regulations, together with the address of the grower and shipper In every way they are well packed, neat and attractive packages.

"These apples sell readily retail from 8 to 12 cents per pound. For the finest 'Canadian dessert apples' packed in boxes in this attractive form there should be a ready sale at prices almost double what the same apples bring in barrels."

Cultivation and Cover Crop.

Cultivation should be commenced as early in the spring as possible, with disc cultivator or gang plow not more than four or five inches, and continued each week or ten days with a light harrow through July till the middle of August. Then a cover crop may be sown of red clover, barley, oats or peas, which will aid the trees in ripening, and by holding the leaves and snow prevent alternate thawing and freezing and lessen the depth to which frost penetrates, thus carrying trees through the winter uninjured which might otherwise be killed. If the season is dry and trees heavily loaded it would be better to delay sowing the cover crop, as it would take too much moisture from the trees and cause the fruit to cease growing and prevent development to fair size.—W. H. Dempsey in Canadian Horticulturist.

LOCAL NEWS. Continued.

J. Hamill, of Armstrong, passed through on Monday on a business trip to Kamloops.

T. Bell, of Armstrong went through on Monday on an extended trip to the coast.

This season's apples are now on the market, and Yellow Transparents find a ready sale.

J. Murphy passed through on Wednesday last week on his return to Armstrong from a trip along the main line.

Call up and see the EDENOGRAPH, we want to know you. We promise not to talk "subscriptions" more than half the time.

Arnold's Shows passed through on Wednesday en route for Armstrong. Accordingly, the arrival of the train was considerably delayed.

Mr. and Mrs. Chester and Mr. and Mrs. Geo. Bell took a trip to the southern part of the valley as far as Penticton on Friday, returning on Monday afternoon's train.

Bert Wilson and T. Johnson returned from a prospecting trip along the main line on Saturday, bringing back with them some promising samples of gold copper ore.

The illustrated write-up of the Okanagan Valley which is being prepared by the Vernon News Printing & Publishing Company is well under way. It is expected that this publication will be by far the best that has ever been gotten up in the valley.

Over two thousand telegraphers of the Great Northern and the Northern Pacific Railroads are on strike, and are causing immense hindrance in the moving of many trains on both the transcontinental systems affected. Two head-on collisions have been reported on the main line of the Northern Pacific railway as the result of the strike.

Writing from Winnipeg to the Hon. Mr. Tatlow, R. M. Palmer said regarding the exhibit of B. C. fruit: "The earliness of the season has helped the province wonderfully, and it is difficult to get many people to believe that all the fruit shown is this season's production. One marked result of the exhibit will be a great influx of visitors to the province this coming fall."

Armstrong will not be flattered to learn that a visitor to that place recently got off at the creamery when the train stopped there. Going up to the door of the creamery he inquired: "Is this all of Armstrong!" but was relieved to find that it was not, and that Armstrong boasted of two hotels, two newspapers, etc; to say nothing of a waterworks system, the water of which he pronounced to be the finest he had tasted in Canada.

A would-be smart journal of one of the coast cities, which is always on the watch for slips in the pages of their rural cousins, to the mutification of them, recently eclipsed all. It published a map of Canada, in which the "unimportant" territory of Alberta was omitted entirely. No doubt the said city journal in its superior wisdom wants to show the powers at Ottawa the correct way to name and divide up the Northwest Territories into two provinces.

The prospecting fever caused by the recent discovery of galena to the north of Shuswap lake claims more victims every day. On Monday's train bound for the camp were F. N. Daniels and G. J. Wallace, two of the original locators, together with A. Shary, G. Smith and A. Emond all of Armstrong, who aspire to locate a bonanza. F. N. Daniels says he is quite satisfied with the report of the assayers and intends to ship a carload to Trail smelter as soon as the ore can be got out. An official from the smelter is en route for the strike to examine the ore.

An Impressive Funeral.

Referring to the mention in recently received British papers of the suicide of a workman by jumping into a cupola of molten metal, a gentlemen now living in Victoria, but formerly connected with the government works, Woolwich, Eng., told a Colonist representative recently that the incident reminded him of one of the most singular funerals he had ever witnessed. The event occurred a number of years ago, and made a considerable stir at the time. A workman in the arsenal, engaged in his duties, had the misfortune to miss his footing and plunge into a cupola containing some five tons of molten metal. Naturally the unfortunate man was instantly killed, and, equally naturally, it was quite impossible to secure adequate remains for Christian burial. To put the metal to the use originally intended was not, in the opinion of the authorities, a thing to be contemplated for a moment; and, as the deceased workman had become an integral part of the metal, it was decided, after some consideration, it was decided to inter both together as the easiest way out of the difficulty. This was actually done, the enormous mass of steel with which the unhappy laborer had become incorporated was lowered with befitting ceremony into a suitable grave, and the chaplain read the Church of England burial service over it. No man, ever had a more singular coffin.

Bear this in Mind

There may be, no doubt there are, features about other parts of the Okanagan that will equal anything we have about Enderby in the way of nature's provisions for home-life, but certainly none can excell us. Climatic conditions are perfect; and for health and beauty, Enderby's location is unsurpassed. No cold damp weather, or hot sultry days.
