

THE EDENOGRAPH

VOLUME 2. NUMBER 12.

ENDERBY, B. C., AUGUST 2, 1905.

PRICE, \$2 A YEAR

Enderby Doings

Mr. Venables, of Vernon, spent Sunday in the city.

Just a few summer hats left at Harvey's. They must be sold.

Mrs. Cameron visited Miss Fenton over Sunday.

Send your grocery order to Harvey's and see how quickly it will be delivered.

H. N. Hendrickson and wife came in on Friday's train to Enderby.

Mr. Gibbs returned on Thursday from a business trip to Revelstoke.

All the best dressed men about town are wearing twentieth century suits—they get them at Harvey's.

The lock-up looks spick an span with a new coat of paint. Visitors made quite at home!

Miss Fenton returned to Enderby on Friday last week from an extended visit to Salmon Arm.

Canned meats are very convenient for hot weather—get them at Harvey's.

There is so much devil in the best of us, and so much angel in the most of us that it does not become any of us to say much about the rest of us.

The S. & O. "Lightning Limited" excelled itself last Thursday, being only three and three quarters of an hour late. "It's never to late to mend." By Charles Reade.

The Trail Creek News says: "A young man in town has an open account with a local store for over two years. The first item on it was a box of chocolates, and the last was a nursing bottle. This ought to be a lesson to young men not to let accounts stand over too long."

Every man owes it to himself and his family to master a trade or profession. Read the display advertisement of the six Morse schools of telegraphy in this issue and learn how easily a young man or lady may learn telegraphy and be assured a position.

MARRIAGE.—The wedding took place on Tuesday, July 18, at Portland, North Dakota, of Mr. Henry N. Hendrickson and Miss Emma Florence Lucken. Mrs. H. N. Hendrickson will be at home after August 16. The EDENOGRAPH wishes to join with the many friends of the newly married young people in wishing them all happiness and health on life's journey.

F. Huggard, of Winnipeg, was looking over Enderby and district Thursday. Mr. Huggard is looking for big investments in land in the Okanagan and will handle a ten or twenty thousand acre block. In company with Mr. Brindle he climbed the bench and took a number of photographs of Enderby and the valley, over the prospects of which he was very enthusiastic.

The rifle shoot held on Wednesday, July 26th resulted in the following scores being made:

	200 yds.	500 yds.
C. W. Layton	- 28	28
Geo. Bell	- 32	21
G. R. Sharpe	- 24	19
J. English	- 23	20
R. Hancock	- 23	—
W. Hancock	- 11	28
S. Waby	- 22	8
J. E. Evans	- 19	8
W. Thompson	- 6	6

The shoot on Thursday resulted as follows:

R. Hancock	- 27	24
Geo. Bell	- 26	20
G. Hancock	- 19	19

The highest possible score at the two distances combined was 70.

A new lot of Mocha and Java Coffee. The finest in the land at Harvey's.

Building is brisk in Enderby. New buildings are continually springing up.

The Enderby Trading Co. have just opened up a fine selection of Ladies' Skirts. Call and inspect.

H. W. Harvey received the sad news of the serious illness of his father on Monday, and left for Vancouver on the same day.

C. Collas, of the Vernon branch of the Bank of Montreal, has Mr. Brendon's place in the local branch, who is on his summer vacation.

Mrs. Budden and daughter, Margaret, returned to Kelowna on Monday after spending a week in Enderby, the guests of Mrs. Jas. Robertson.

Mr. Armstrong and son, of Drumbo Ontario, who have been the guests of Mr. and Mrs. Patten, of Armstrong for the past two months, passed through on Tuesday on their way to the coast.

Mr. H. W. Harvey evidently has plenty of faith in the future up-building of Enderby and district. He has placed a large order for nails, building paper, etc. with a firm on the coast.

The brick for the facing of the new C. P. R. station at Revelstoke has been supplied by the Enderby Brick & Tile Company. A carload of brick was also shipped to Golden on Monday.

Denis Murphy, barrister of Ashcroft, came into town on Monday in connection with business with the Enderby Coal Mines, Limited. A meeting was held at Sicamous later in the evening.

The service at St. George's church last Sunday evening was particularly well attended, and the Rev. F. V. Venables is very much encouraged by the steady increase in the numbers of attendants at divine service.

As will be seen by the table prepared by W. E. Truesdale, from June 1 to 11, and from the 18th to the 31st, were periods of uninterrupted sun, giving twenty-five days of cloudless sky for the month of July. How's that?

Mr. and Mrs. Wm. Fraser came up from Armstrong on Saturday and spent Sunday in town. Mr. Fraser will remove to Enderby on Tuesday or Wednesday this week and will take up his residence permanently in the city.

Mr. Henderson, district manager of the Bank of Montreal, passed through on his return from Nicola, where the bank has opened a branch. Mr. Henderson says that business prospects are bright, and the coming of the iron horse is eagerly looked for.

The results of the matriculation examinations of the Toronto University held at the Columbian College, New Westminster, were made known on Tuesday, and the students from this district who passed were: W. M. Miller, Enderby, E. O. Wood, Salmon Arm, Miss N. M. Heard, Lansdowne, J. M. Burnett and J. H. Crawford, of Knob Hill.

James Litster, Toronto, manager of Pure Gold Extract, accompanied by A. J. Cooksley, representing W. J. McMillan & Co., of Vancouver, and E. F. Gerater, of Martin & Robertson, Vancouver, spent some time last week visiting Okanagan points in the interests of Pure Gold. The party drove through the Valley in an Oldsmobile motor car under the charge of W. M. Stark, of Vancouver. The appearance of this modern means of locomotion in our midst and along the rural lanes of our wheat fields and orchards created no little interest, and should prove a good advertisement.

The Edenograph for 75c to the end of the year.

Mrs. H. W. Wright returned from the south on Tuesday.

Mr. and Mrs. Masterman and daughter, of St. Thomas, Ontario, passed through on their way to the coast. They are on a holiday trip through Western Canada, and were for a month the guests of Mr. and Mrs. F. H. Whiting, of the Okanagan House, Armstrong.

It is a great relief to all that the hot weather of the past four weeks has given place to a more temperate variety. The weather has been idyllic for the crops, and a bounteous harvest is now assured. The hay is all stacked and fall wheat nearly all cut; and soon the whistle of the engine and the whirr of the separator will be heard.

The results of the teachers' examinations held throughout the province about a month ago are now known. A. N. King, of Victoria College, made the highest average of marks, 1,081, out of 1,400. Out of the five candidates who sat for the above examination at Vernon, two passed: J. Becker (Armstrong) 790; John L. McMillan, 786.

SALMON ARM ITEMS

Edenograph Correspondence.

Mrs. J. Fraser, of Arrowhead, is visiting friends here.

Mrs. McPhail and daughters of Revelstoke are camping here.

Geo. Bell and Mr. Brindle were in from Enderby on Friday.

The mining claims on Mount Ida are reported to be looking well.

Haying is about finished. A good crop and fine weather has made the work pleasant.

T. Cunningham and Thos. Earl spent a few days looking over the valley last week inspecting orchards.

The Sunday schools held a picnic at the camp grounds at Tappen siding on Wednesday last.

J. F. Goforth is erecting a fine residence on his farm which he purchased recently from R. Mowson.

Mrs. Grant is here from Vernon visiting her parents, Mr. and Mrs. Pratt.

There are between fifty and one hundred persons camping on the beach near here and at Tappen. The bathing is lovely these days.

Dr. Simpson had a fine gasoline launch put on the lake last week. We will soon have a respectable fleet at the Arm. A new wharf is needed.

Mr. and Mrs. W. J. Wilcox, of Virden, Manitoba, paid us a visit last week. Mr. Wilcox has purchased some property here and intends to make his home in winter.

At a meeting of the Farmers' Institute held here last week it was decided to hold a fall exhibit here in September, and the following committee was appointed to solicit subscriptions and prepare a prize list: Messrs. R. Turner, Dr. Simpson, S. M. Currie, J. D. McGuire and J. W. McCallum.

The above committee met on the 22nd and subscribed ten dollars each towards prizes and expect to raise enough to give some good prizes for collections of fruit, vegetables and grains.

Salmon Arm, July 28.

A quiet wedding took place at Kault, on Wednesday evening, July 26, Rev. Mr. Duncan of Salmon Arm, uniting in matrimony's bonds A. MacFadyen, brakeman, of this city, and Mary Madeline, youngest daughter of S. S. MacDonald, of Kault. Mr. and Mrs. MacDonald intend to reside at Salmon Arm. Mail.

The Argonaut Rowing Club of Toronto has already intimated that it will send an eight to Henley next year.

A New Camp!

If the expectations of a few sanguine mortals are realized, a new camp will soon spring into being to the north of the Seymour Arm of Shuswap Lake.

The ore is galena, and the ledge on which the discoverers have located is fourteen feet, and sixteen claims have been located on it at present; though it is said that the lead has again been found and more claims staked. Other ledges are also reported to have been discovered.

The ore is very pure and solid, and assays of samples give values of \$15 of gold and 160 ounces of silver to the ton; the percentage of lead being 61.

The Bell Block was the scene of no little excitement on Tuesday, when three members of the community left the place of action. St. Clare Brindle, R. Linton and H. J. Byrnes were the centre of it all. Mr. Brindle was very busy all day making preparations and collecting supplies for their march to fortune. He looked particularly a lammer in a shirt that left plenty of room for a doubt!

The party will miss the refinement of civilization for a while, and we hope that fortune will smile.

Great Prosperity in the Okanagan.

"Finer wheat than is being raised in the Okanagan Valley this year I never saw in my life before—not even in the Northwest," said Mr. T. J. Smith to a Province representative on Thursday of last week. Mr. Smith who is a well-known mining broker of this city, has just returned from a trip into Nicola and Okanagan via Spences Bridge.

"The people of the Okanagan valley are the most prosperous and best satisfied I have seen for some time," he continued, "for in the agricultural and horticultural lines fortune is smiling upon them. Their wheat crop will be exceptionally heavy, and their fruit yield will beat all records for quantity and quality."

"We seldom see any Okanagan fruit from the Vancouver market for the reason that this fruit commands better prices in the Kootenay and through the Northwest and Manitoba than can be secured here. The Okanagan peaches, for instance, are a much better fruit than is to be found on the Vancouver market, and they command higher prices than the local market is willing to pay. I brought some boxes of peaches home with me. They cost me \$1.50 a box at Vernon, and I will pay express charges of 35c on each box to this city. I could buy peaches cheaper here, but the quality of the Okanagan fruit is lacking in the article Vancouver gets from the south."

"The peach crop in the Okanagan Valley is a large one. Several weeks ago as high as \$350 per acre was paid by Winnipeg buyers for peaches on the trees. The people at this price agreed to do their own thinning, picking and packing, and took all chances to adverse weather conditions till the fruit was in the boxes. One grower was offered \$400 per acre for his peaches on the trees, but he refused it. Last season he sold his fruit on the trees, but this year he will do his own picking and packing, and thinks he can make more money that way than if he sold the fruit on the trees."

Signed After Death.

A peculiar state of affairs with regard to a will which Messrs. Higgins & Elliott are seeking to probate exists. The will, which is that of the late Leon A. Pulze, of Vernon, is dated on February 3 last, and two witnesses have subscribed their names and sworn that the signature was then made by the deceased. But there are other witnesses who have sworn that the deceased died on January 29, and that they saw his dead body. He leaves his estate to a brother in Quebec with a provision that \$500 be paid to a sister in Quebec. But legal difficulties have arisen regarding the probate, inasmuch as it is sworn by witnesses that the will was signed some days after deceased had died.

Council Doings

The Minutes of previous meeting held on July 19th were read and confirmed.

By-law for the prevention of cruelty to animals. Ald. Bradley moved that this By-law should be amended by the deletion, in section 3, of the words "are to" and the substitution thereof of the word "shall," and by the striking out of clause 5 and the substitution of the following:

"Any person found guilty of an infraction of any of the provisions of this by-law, shall, upon conviction before the Mayor, Police Magistrate, or any two Justices of the Peace having jurisdiction in the said city of Enderby, be liable to a fine not exceeding \$100, exclusive of costs, and it shall be lawful for the mayor, police, police magistrate, or justices, or any two or more of them to levy the said penalty and costs, or costs only, by distress and sale of the offender's or offenders' goods and chattels, and in the case of no sufficient distress to satisfy the said penalty and costs, or costs only, it shall and may be lawful for the mayor, police magistrate, or justices convicted as aforesaid to commit the offender or offenders to the common gaol or lock-up house for a period not exceeding 60 days, unless the said penalty and costs be sooner paid."

The amendment having been seconded by Ald. Evans, was carried unanimously.

It was then moved by Ald. Smith and seconded by Ald. Sharpe that the by-law pass the third reading. Passed.

Ferne's Second Conflagration.

Damage to the extent of \$75,000 was done by a fire which visited Ferne on the night of July 26. This is the third time that Ferne has suffered from the ravages of fire.

The fire totally destroyed the Free Press office, Carruthers' tailor shop, Sheppard & Elliott's hardware store, the B. C. furniture store, Waltham Hotel, Great Northern city office, Henry & McLeod's tailor shop and C. C. Wright, jeweller, and several other buildings. The Waldorf Hotel and storerooms on the other side of the street were also more or less damaged.

The town was only saved by the exertions of the citizens. The water supply proved inadequate, which has caused much indignation.

The origin of the fire is a mystery, and was got under control at 4 a.m., after burning for four hours.

The insurance is one-third.

Items of General Interest.

FOURTH TEST MATCH.

The fourth game of cricket between England and Australia has ended, like the first, in a victory for the old country cricketers. Against 446 runs compiled by the Englishmen, the Australians replied with 197. Following on however at the close of the second day they had put up 118 for the loss of one wicket, and it appeared as if they might, as they had often done, pull the match out of the fire. But it was not to be, for on resuming the game next morning their wickets went down one after the other so rapidly that they were all out for 169, leaving the Englishmen victorious by an innings and 80 runs.

CHANNEL FLEET FOR BAL TIC.

London, July 27.—The British channel squadron sails for the Baltic Sea on August 20, and will remain there through September. The cruise of the fleet is regarded as designed to counteract the preponderance of German influence in Russian and Scandinavian affairs, but which is denied by the Admiralty.

RAILWAY ACCIDENT IN ENGLAND.

Liverpool, July 28.—Twenty-three people were killed and many injured in a collision between the electric express on the Lancashire and Yorkshire line and an empty train. This is the first serious accident that ever occurred on an electric railway in England. The wreckage burst into flames and heart-rending scenes were witnessed. The victims included several women and children. The train was going from Liverpool to Southport, and the collision occurred at Hall Road Station.

The by-law to amend by-law No. 8 passed the third reading.

The Finance recommended the payment of the following accounts: J. C. English, \$27.75; Bank of Montreal, \$200; Basil Gardom, \$15; Graham Roseman, \$16.65; and to petty disbursements, \$3.25.

Collection of Road Tax. A letter was read from the Council's solicitor advising one or two alterations in by-law No. 10, and stating that the by-law would then be in order. The By-law being a matter of emergency it was read the first time and the second, and finally adopted.

Nulnace Ground. The land offered for sale by Mr Teece not being suitable they recommended the purchase from Mr. Baird of a strip of land 60 feet wide adjoining Messrs. Baird & Gibb's prick yard, the price being \$220.

The Committee was instructed to close with Mr. Baird.

Attention was drawn by the Mayor to the necessity of providing at the earliest possible date some means of fire protection for the City. It was suggested that it might be possible to make arrangements with the two milling companies for the installation of a water supply which would be available not only for fire protection but for household use.

The Columbia Flouring Mills Co. were asked to submit an outline of what they would be prepared to do in the matter.

After some further business the Council adjourned at 11.20 p.m.

Automobile Route.

William Scott, formerly stage driver between Kelowna and Vernon, has secured the sub-agency in the Okanagan of the Vancouver Automobile Co. For the past week he has been testing a 10 h. p. machine.

According to the News the vehicle made a run to Kelowna on Sunday last in two hours and fifty-five minutes, bearing the oxygen generator from the hospital, which was used in an effort to prolong the life of Mrs. E. M. Carruthers. The return trip was made in two hours and forty-five minutes. It is understood that an automobile line between Kamloops or Enderby and Vernon is under discussion, the obstacle being the present grades of the roads. Provincial Engineer Gamble, L. Norris and Reeve Schubert went over the road on Friday to look into the possibilities of bettering the grades.

The Weather.

Walter E. Truesdale, government observer at Enderby, furnishes the following record of the temperature, and general state of the weather for the month of July:

Date	Maximum Thermometer	Minimum Thermometer	General state of weather	Rain	Snow
1	76	45	bght. sun.

# THE EDENOGRAPH

W. &amp; H. FRASER.

Published each Wednesday at Enderby, B.C., the Eden of Canada.

Subscription, \$2 a year, \$1 six months, 50c three months, 50c a copy.

Advertising rates, \$1 an inch per month; contract rates on application. Legal advertising rates, 5c and 5c a line.

Dear Friend: You can take The Edeno-graph by paying \$2 a year and believe everything the editor says. (If you want to but if you do not occasionally express your thoughts through its columns, you will not get a lot of the good you might, nor will your neighbor, the editor. Writing to encourage perfect freedom and candor between The Edeno-graph and its readers, we have thrown down all barriers, and want you to feel free to walk into the sanctum sanctorum with you best thoughts in your hand and demand a hearing. If you have an idea, have it printed. Don't wait for a better one. Address—

THE EDENOGRAPH, Enderby, B. C.

The Edeno-graph to the end of the year, 75c. Send it to your friends

## PRINTERS' INK.

A business man cannot daub his name on a fence or rock without getting some good out of it; neither can he run a stereotyped ad. in a paper for a solid year without some returns. Even if he does not think he sees any benefit, it comes, nevertheless. What then must be the result of a real live advertisement? If a business man will simply give to his advertising the same thought and care, and the same application of business experience that he gives to buying his stock, the selection and training of his clerks and the miscellaneous details of his business, there is nothing more sure under the sun than that he will then no longer complain of rates, or "that there is nothing in it," but will be an enthusiastic and thoroughly convinced advocate of the efficacy of printers ink.

## B.C. WHEAT PORT.

The Vancouver World is responsible for the report that the C.P.R. intend shifting the wheat crop of the Calgary district through Vancouver in order to relieve congestion on the Great Lakes' route, thus making Vancouver a wheat exporting port, and naturally a flour milling centre. The possibilities in the carrying of lumber and general produce of British Columbia to the prairie and the carrying of wheat from the prairie in cars which would otherwise have to return empty, were discussed by several prominent Vancouver men in a recent interview.

The idea, if carried to a successful conclusion, should be welcomed by the inhabitants of the Okanagan as tending to the reduction of freight rates between points here and the markets for Okanagan and British Columbia produce in general.

## UNITY IS STRENGTH.

The Okanagan sentiment is growing and it seems not unlikely that, at no distant period, the last remnant of sectional ill-feeling will pass away and every part of the valley unite in harmonious intercourse and in hearty co-operation for the advancement of the best interests of the whole. A noteworthy sign of this tendency is the very general adoption, by fruit growers, all over the valley, of the practice of conspicuously stamping every box of fruit shipped with the words "Okanagan Fruit." Okanagan fruit has already won a reputation for itself, and the careful methods of packing and shipping that now prevail, together with the excellent quality of the fruit sent out, are bound to add to that reputation and to give the Okanagan product a distinct market value. Apart altogether from sentiment, it pays to advertise a united Okanagan. —News.

## PRECAUTIONS

At this season of the year, when the great heat is favorable for the development of all forms of bacteria, the greatest of care should be taken to ensure absolute cleanliness of house, yard and out-buildings. All house refuse should be burnt and not allowed to accumulate to become a source of infection and consequent danger to the whole town.

It has been found in all the great cities of Europe that with the elimination of the slums, and the more general enforcement of sanitary laws, together with the knowledge now obtainable by the people, that dirt diseases can be controlled and in some cities stamped out.

Another source of infection is impure water and care should be taken to see that all vessels used to store water are frequently scoured or scalded out. Enderby has been remarkably free in the past from epidemics of any disease, and the death-rate from all causes is very low. With the growth of the place, however, risks increase proportionately and there is all the more need for greater precautions to ensure a continued immunity from disease.

We are not, for obvious reasons, able to state more plainly what steps need to be taken at once on the part of some, but we leave to the intelligent reader and the public spirited man, who desires to do his duty by the rest of the town, the task of solving and taking in the right spirit our remarks.

## To Make a City Beautiful.

The mayor of Denver aspires to a more beautiful Denver, and he is doing what he can along practical lines looking to that happy consummation. He is urging the people to co-operate with the municipal authorities in cleaning up the city.

Believing in the value of suggestions and direct appeal, he addressed a proclamation to the citizens, in which he said:

If your store front, residence or fence is dull or dingy, order it painted.

If your awning is old, torn or faded, get a new one.

If your sidewalk, fence or gate needs repairing, fix it.

Destroy the young weeds that are starting on your property, and on your neighbor's property!

If your advertising sign is old or faded, take it down and paint it.

Resolve never to throw paper in the streets.

Take all dandelions out of your lawn—they spoil the beauty.

Burn all the rubbish possible; allow no one to throw it on the streets, alleys or vacant lots.

Promote not to spit on the sidewalks.

Organize a block improvement society, and allow no weeds to grow on sidewalk area or vacant property in your block.

Ask your milkmen, grocery men and expressmen to have their wagons painted.

Irrespective of the size of your house make your lawn the finest.

Illuminate the front of your store in the business section.

Every effort put forth or dollar spent to improve our city's appearance will be returned twofold.

It is claimed that these suggestions have been cordially carried out by the people, and that they are perfectly delighted with the result.

NOTICE is hereby given that 60 days after date the undersigned intend to apply to the Lieutenant-Governor in Council, under the provisions of the Rivers and Streams Act, for permission to clear and remove obstructions from Cherry Creek and its tributaries in Yale District and to attach, construct and maintain dams and booms to the shores of said creek and Shuswap river, and to make such other improvements as may be necessary for driving, holding and sorting of logs and fluming of lumber thereon.

The tolls proposed to be charged are such as may be fixed by a judge of the County Court.

KAMLOOPS LUMBER CO., LTD.  
Dated at Enderby, B. C., June 10, 1905.

NOTICE is hereby given that sixty days after date the undersigned intend to apply to the Lieutenant-Governor in Council, under the provisions of the Rivers and Streams Act, for permission to clear and remove obstructions from the Upper Shuswap River and its tributaries in Yale District, and to attach, construct and maintain dams and booms to the shores of said river and Sugar Lake, and to make such other improvements as may be necessary for driving, holding and sorting of logs and fluming of lumber thereon.

The tolls proposed to be charged are such as may be fixed by a judge of the County Court.

## Tilling the Orchard

The best tillage is that which begins early in the season, and which keeps the surface stirred until late Summer or early Fall. The best implements are those which secure this result with the least amount of time and labor. For the first two years it is generally advisable to turn the land rather deeply with the plow at the first Spring cultivation. There are many styles of ground pulverizers, spring-tooth, cut-away, and smoothing harrows, which will adapt themselves readily to the cultivation of any soil. In all loose soils shallow cultivation is always preferable, and in these some form of cut-away or smoothing harrow will be found to be efficient. When the land is once in good condition, but little effort and time are required to run through the orchard. Crust should never be allowed to form on the surface, and weeds should be killed before they become firmly established. The entire surface of the orchard should be stirred as often as once in ten days.

Level culture is best in most orchards. This is done by plowing to the trees one year and away from them the next—one year north and south and the next year east and west. It is often difficult to plow away from large trees, however, so it may be best to throw the furrow toward the trees each Spring, and subsequent cultivation, with improved cultivators and harrows now in use, the soil can be worked away from them; but always plow the orchard in opposite directions in alternate years.

In past years trees have had their tops started too high rather than too low. This is probably owing to the difficulty in working close to the trees, and partially to the use of improper implements of tillage. For most fruit trees the length of trunk should not exceed four feet, as there is danger from sun and wind. Picking the fruit is more difficult, and insects and fungous diseases are harder to combat if the trunks are higher.

Low-headed trees or those laden with fruit, can be reached by separating the halves of a double harrow, and by means of a long doubletree, so that the halves when adjusted will run five or six feet apart. A cut-away harrow is the best implement for working down the back furrows from under the trees. The young orchard may be cropped for the first few years, but as the roots of the trees spread the cropping should diminish. Trees less than twenty feet apart should never be cropped after the third year. Apple orchards may be planted lightly for seven or eight years. The lighter and drier the soil the less it should be planted. As soon as the trees begin to bear fruit nothing more should be grown except cover crops to maintain the soil fertility. Sod may be advisable in the orchard for a short period, but it must be closely pastured, without allowing hay to be cut. The sod consumes the moisture so important to the trees, and is also a breeding place for many insects. Neither dwarf pears nor any of the stone fruits should stand in sod, as borers are very prevalent in grass land. Standard apples and pears are often tardy in coming into bearing. If land is seeded down for a time, their growth will be somewhat checked, and the tree will bear a year or two sooner. This only applies to thrifty young orchards.

All old orchards now in sod should be plowed, fertilized, and sprayed early in the Spring. It may be that the roots are too near the surface to allow plowing. If so, harrow the ground thoroughly and continue to work it during the season with any of the cut-away harrows or other implements which tend to break up the sod.

## CANNING VEGETABLES.

The majority of people who have tried canning vegetables have some trouble in getting them to "keep." Most housewives now know that this tendency to spoil is caused by bacteria. In pears, corn, etc., which, of course, must be "done up" without sugar, itself a preservative agent when used in sufficient quantities, these bacteria find an element which suits them beautifully; hence it is that, as a rule, vegetables are so much more likely to spoil than fruit.

Now, there are several ways of preserving foods of all kinds: 1. By subjecting to a heat sufficient to kill all germs, and keeping afterwards in air-tight vessels. 2. By keeping foods so cold that the growth of bacteria is discouraged. 3. By drying foods and so providing an unfavorable element. 4. By adding sugar or salt in quantities, spices, vinegar, etc.

The first is, of course, the method to be used in canning all vegetables, and in adopting it care must be taken that the heat is great enough and applied long enough to kill every organism, and thoroughly sterilize every vessel in which the vegetables are to be kept. Put the sealer rims into cold water, set on the stove and let boil. Adjust the rubbers on the jars, and twirl in boiling water. Dip the jars in sideways, so that water will reach inside and out at the same time, and they will not likely crack. Set the jars in a boiler on a wooden rack, and surround partly with water warm enough to prevent the hot jars cracking; fill up with vegetables, which should already be cooked and still hot. If salt is added, put it in now, put on the lids loosely, cover the boiler, and bring gradually to a boil. It will be necessary to boil peas 3 hours, corn 4, string beans hour and a half, and beans hour and a half. When done, fasten on tops firmly, let cool in water and remove. Keep in cool, dark place.

## Enderby Flour

Never send out of town for what is made as good as the best in town. In supporting home industries you are supporting yourself and others who make the town

These are our brands:

## IS A GREAT FRUIT COUNTRY

High Authority Praises B. C. Fruit Orchards and Methods.

A. McNeill, Chief of the Fruit Division, Commissioner's Branch Department of Agriculture, after having made a tour of the fruit districts of the mainland of British Columbia, recently, for the purpose of reporting to the Dominion Government, said: "The one thing that impressed me is the fact, as far as the fruit industry is concerned, that the growers commence in this country with a clean slate. The general public cannot fully appreciate what this means to the industry. Fruit growers here have not the slovenly habits of the Ontario grower, but come into the new industry willing and anxious to adopt every up-to-date method in their orchards. Taking twelve fruit farms in Ontario and twelve fruit farms here you will see better average results in British Columbia, in attention, care and even varieties of fruit grown, than you will in any other part of Canada. Many fruit growers in Ontario cultivate quite as enthusiastically as many do here, but it is the average results I am speaking about. Of course, these better methods are sure to tell in favor of this Province in the long run. I also wish to point out that the packages in British Columbia are much superior to the eastern packages. In Ontario for a long time fruit growers had but one market, near by. They did not put the fruit up to last. When, however, they secured far away markets they continued to ship their surplus to these markets in the same packages as they shipped to near-by points. The result was inevitable failure, as far as the distant shipments were concerned. Thus apart from all conditions of climate and soil, British Columbia is in better condition to appropriate the markets of the Prairie Provinces, but just so far as the freight rates will allow them.

As far as soil and climate is concerned, however, I think the dry valleys such as the Okanagan, are most suitable for fruit growing, when it is considered that irrigation costs but \$2 per annum per acre. This cost is a mere trifle as compared to the advantages of a dry climate, as well as abundant moisture for growth. The dry atmosphere gives you the shipping texture. On my visit there was still enough rain fell to keep the leaves a deep green, therefore there was a freedom of the worst of all fungi, the apple scab, and this healthy foliage gives the trees almost a double capacity of growing. The leaf is to a tree what the lungs and stomach are to an animal. If a horse has weak lungs and stomach, it cannot perform its task. So it is with a tree with scant foliage. The green leaf means healthy fruit, plenty of moisture in the ground and rain enough to keep the leaves from being clogged with dust is sure to be followed by a big crop of healthy fruit.

Another feature here is the freedom from codling moth and San Jose scale, as well as the scab, and these healthy conditions reduce the expenses of cultivation. Speaking specifically, the British Columbia methods and orchard practices, and prevalence of clean culture is nothing short of remarkable. I did not see in my whole trip, a single orchard of any pretensions whatever, where clean culture was not practised. This is a marked contrast with eastern Canada, where carefully cultivated fruit orchards are a great exception. In Ontario not more than ten per cent. of the orchards are clean cultured. The next point is the almost universal prevalence here of thinning out the fruit, a practice I might say, which is unknown in Ontario, among even the best orchardists. The natural result of thinning out is that the quality of the fruit is much better. I make this prediction, that in the nature of things the cultivation of fruit will become a scientific study here for all time among fruit growers, and result in a higher standard of excellence, and for this reason: In many of the valleys the land is being rapidly subdivided into comparatively small lots, and among those who have to make a living off their lot. From the nature of the situation, they cannot go in for the coarse products such as grain or cattle, which

demand high freight rates in comparison to their value, so they must devote the very greatest care to make as much out of their fruit orchard as possible, and they will be exceedingly anxious to grow fruit that will command the best prices in the market. So that at the most, the early vegetables will be the only addition to their fruit crop, and in time there will be in British Columbia a fruit and vegetable business entirely out of proportion to the land available for such purposes under ordinary conditions. The Ontario farmer does not have to grow fruit. He has plenty of land and can raise grain and cattle, and it makes him indifferent as to his fruit very often, and as to the methods of marketing it.

From these facts, the British Columbia fruit growers should in the course of time entirely monopolise the markets of the prairie provinces. In the natural course of events the British Columbia fruit should flow to the east as far as possible. Let the Ontario farmers try for the market if they will, but their fruit should also go eastward.

In reference to the freight rates, I think a railway should not try to secure all the tons possible from an industry, and thus kill it in its infancy. I think the fruit business should be fostered by the railway. The C. P. R. have made concessions. I think they should make further concessions. The three sources of supply are, Ontario, British Columbia, and the States to the south. Of these three sources of supply certainly the one that should receive least consideration would be the States to the south of us, though in the matter of freight rates, the reverse seems to be the case. Even Ontario could afford to be generous, inasmuch, as the farmers there are capable of engaging in a larger number of alternative industries, and are not limited to any particular line."—Commercial.

### Alberni Election.

Nanaimo, July 27.—The complete returns of the Alberni bye-election were received to-day. Cape Scott gave Manson (Conservative) a majority of eight, while Yreka and Quatsino, where thirteen votes were polled, went solid for Aitken. Thus the majority by which Manson is elected is reduced to 54.

The poll was Manson, 254; Aitken, 200.

## Bear this in Mind

There may be, no doubt there are, features about other parts of the Okanagan that will equal anything we have about Enderby in the way of nature's provisions for home-life, but certainly none can excell us. Climatic conditions are perfect; and for health and beauty, Enderby's location is unsurpassed. No cold, damp weather, or hot sultry days.
