THE EDENOGRAPH

VOLUME 2. NUMBER 9. ENDERBY, B. C., JULY 12, 1905. PRICE, $2 A YEAR

Enderby Doings

The Twelth is Armstrong's great day. Do not miss it.

All kinds of harvest tools to be had at Harvey's.

Charlie Truman, foreman painter of Enderby, left here on Monday to work for A. J. Lapworth, Armstrong.

Mrs. Geo. Bell presented Mayor Bell with a baby daughter last week. Mother and child are doing well.

Alex. Forrest, of La Riviere, Manitoba, was looking over land here on Friday. He left for his home on Saturday's train.

Crockery, granite and enamel ware. The largest stock to be seen—at Harvey's.

When a woman has matriomonial designs on a man she doesn't let him think she thinks he isn't what he thinks she thinks he is.

Acrobatic performances are all very well in the gymnasium, but can hardly recommend the baseball ground at a practice, between runner and first base man.

The bank of Montreal have opened a branch in Nicola. Mr. Henderson, district manager, of Vernon, is getting things on a business footing and a local manager will be appointed later.

Enderby will have a promenade second to none in the valley when the new bridge over the Spallumcheen is finished. No doubt this will be a favorite spot to watch moonlight effects on the water.

A. St. Clare Brindle, of the firm of Brindle & Mowat, real estate, left on Friday's train for New Denver to transact some important mining business. He expects to be away for a week or more.

The boys are getting in some swimming these hot days. Some of the younger ones will be getting "finny"-ished if they don't take care. Constable Gardom swam about a mile and a half down the river one day last week.

R. E. West is helping H. W. Wright draw in his clover hay, which has been a very heavy crop. Mr. West expects to go out to the Mabel Lake country in a few days on a prospecting expedition. He thinks there is no place like the mountains.

Enderby never was so full of 'em before. We now have a junior team, a team of intermediates, and the seniors. If you can't play ball of some kind—baseball, football, or tennis—then your name is—Rojestvenski, or words to that effect.

R. R. Burns, Armstrong's popular druggist, has sold half a ton of Quassia Chips and Whaleoil Soap this season to the fruit growers of Armstrong and Enderby districts. Four pounds each of these ingredients, boiled, will make 50 gallons of the best wash known for keeping the trees clean.

H. A. Brown, of the Revelstoke cigar factory and his brother, R. S. Brown, accompanied by E. Corning went fishing to Gardom's lake from Enderby, on Thursday. They had fairly good sport, catching fifteen good sized trout, and left for Revelstoke Friday, taking the piscatorial specimens with them.

Messrs. Stenson Bros. and Rogers Bros. passed through on Wednesday on their way home after having viewed the land in the Okanagan valley preparatory to buying. They come from Carberry, one of the best centres for wheat in Manitoba, and stated they were very well satisfied with the outlook in the valley.

Large stock of straw hats still on hand at Harvey's.

Hay Tedders on good terms, to be had at Harvey's.

On the 11th, Mrs. Robert Mowat, of a son.

W. H. Hutchinson is thinking of going to Banff to take the waters there for sciatica.

Secure your mowers, rakes, and haying implements from Harvey's.

Sunday was the hottest day of year, the mercury reaching 98 degrees in the shade.

Mr. H. L. Godsoe, the new shipper at the flouring mills, who came in on Monday, July 3, was joined on Saturday by his wife and little daughter.

The Rev. F. Venables was in Salmon Arm on Sunday, getting back Monday night. An addition is being built to the vicarage.

The river drive of logs came in on Monday from Mabel Lake, and is the biggest one on record, containing over eleven million feet of lumber. Albert Johnson was the foreman.

W. H. Scott is starting up a shoe making and repairing depot in the Evan's block. He is on the spot to do all kinds of shoe making and rebair work.

The Loyal Orange Lodge, No. 446, of Enderby, paraded Sunday evening to the Methodist church. There was a fine turnout of members, who are very strong in Enderby. The Rev. A. N. Miller pastor, preached.

Geo. McCormick, manager of the Columbia Flouring Mills Co., of Enderby, accompanied by some of the family drove in from Salmon Arm, Sunday, getting off the trans-continental from the east. Mrs. McCormick stayed behind to look after some of the family who are sick. They are going to reside in what was the Whatmore property, and have had a large addition built.

Try an ad. under our "wanted" head.

Children's white pinafores and sunbonnets, etc., secured at Harvey's

Mr. Morrison, of near Winnipeg, was looking over land the last of the week before buying.

The Council meet on Thursday, instead of Wednesday, on account of the Orange celebration at Armstrong on the latter day.

Mrs. Bentley has company from England. Her two sisters arrived on Monday, crossing the Atlantic in the new turbiner S.S. Victorian. They had a very quiet and pleasant voyage.

The foundations are being started of the house being put up for W. A. Dobson, an Englishman who intends to reside here permanently. The contract for the house was let to Messrs. Barnes & Allen, and J. J. Bradley has contracted for the stone work.

Walter E. Truesdale, accompanied by Jack Coulthard, of the Bank of Montreal staff here, drove out to the former's ranch at Deep Creek on Saturday. They were delayed in returning on account of the high wind making the dead timber fall, but arrived back Sunday, shortly after nightfall.

Boots and shoes. Large stock always on hand—at Harvey's.

J. P. McConnell, John Innes and J. M. Miller, a party of eastern writers and artists arrived in Nicola this afternoon on a tour through the interior writing up the country with illustrations for the eastern press. Mr. McConnell is a noted writer and with the artistic touches of Mr. Innes will accomplish wonders for the west. The party is in charge of Mr. Miller of the Okanagan.—Nicola Herald.

F. A. Meyer, sub-collector of customs at Vernon, informs us that the imports through his office for the fiscal year just ended ameunted to $51,412, dutiable goods, and $20,798 free goods, a total of $72,210. The import duty collected for the year 1904-5 amounts to $18,111.39, this being about $3,500 in excess of last year. An increase of nearly 25 per cent. a year is a most interesting indication of the growth of the district and the increased purchasing power.—Vernon News.

Going to-day to Armstrong? A pleasant time assured to all who get there.

John D. Rockefeller has donated ten million dollars to educational establishments of New York, and the price of coal has not been increased—yet.

Jimmie Johnson has started to learn the tortuous art of "sticking type" in the EDENOGRAPH office. If Jimmie takes to type as he now takes to the river he'll be a duck of a printer. At present he has had a serious difference with Em Quad and the stocky squares will best him yet.

Rev. F. V. Venables held service on Sunday last, July 9th, at Salmon Arm, a congregation of forty being present There is a church in process of construction at Salmon Arm to be called the Church of St. John the Evangelist. Mr. Venables holds service at Salmon Arm on the 2nd Sunday in each month.

Round-up of Cattle.

There was a regular round-up of the cattle found loose on the streets within the city limits early Monday morning. The catch amounted to 30 head, many of them belonging to Siwash Indians, who were allowed to take them away without paying the usual fee, as the rounders up did not want it.

Our spring poet, usually kept in the lock-up, escaped that morning and gave vent to the following killer before being recaptured.

As I lay softly sleeping
On that summer's morning bright,
The sound of cowbell's ringing,
Madly woke me in a fright.

I tried some gentle 'suasion:
But those kine did not agree,
Said things that licked creation:
But, they never minded me.

An eagle eye did see them
Before they saw him around,
And straightway he did 'em
Right along into the Pound.

S.P.

Fruit Crop Prospects.

"Fruit will be from a week to ten days earlier in the Okanagan this year," Mr. R. M. Palmer, freight rates commissioner, remarked yesterday. He returned from the Okanagan, where he was arranging for exhibits at the fairs at Regina, Brandon and Winnipeg, and at the Dominion exhibition at New Westminster "The reason of the earlier start is because of the warm and dry weather," he continued. The quality is excellent in all lines, and the yield will be a good average one.—Colonist.

Special Prizes.

Special prizes for small fruit growers will be offered at the Dominton exhibition to be held at New Westminster The board of horticulture has offered prizes of $200, $150, $100, $75, $50, and $25, but this class of displays is limited only to large growers. For the further encouragement of what is fast becoming one of the large industries of the province, the board will offer special prizes of $75, $50 and $25 for the exhibits of those having moderate-sized fruit ranches. The entry to the last class is free, while a fee will be charged for the former. At the last meeting of the board of horticulture, a committee consisting of Messrs. Thomas Earl, R. M. Palmer, and Thomas Cunningham was appointed to co-operate with a committee of fruit growers, and at a joint meeting Messrs. Thomas Earl, Cunningham and W. J. Brandrith were appointed an executive committee to take in hand the practical preparationi and work of the fruit exhibit.

The whole of the upper floor of the main building will be devoted to the fruit display, and about $2,000 offered in prizes. This is a larger amount than has ever before been given for fruit in any exhibition ever held in Canada, and it indicates that the board has fully considered the proper encouragement af an industry that will soon attain very large proportions in British Columbia. Such large prizes will also induce a display which will do much to advertise the province to the large number of foreign visitors who will sure to attend the exhibition. The proposition of special prizes to small fruit displays was accepted by the finance committee of the fair with expression of gratitude.

Wednesday Baseball.

The Armstrong intermediate baseball team drove to Enderby Wednesday afternoon and tried conclusions with an Enderby team.

A very good game resulted and up to the sixth innings Enderdy had quite the best of the game. In the seventh, Armstrong scored 8 runs and in the last 5, finishing with a total of 19 against the Enderby boys' 9. It was very evident that the Armstrong lads were too big and heavy for the Enderby team, some of whom were scarcely able to wield the bat.

After the game Mayor Bell passed the hat round and collected $4.75 towards the cost of coming from Armstrong, and Enderby boys provided supper for the Armstrong team at the Enderby hotel.

The score stood as follows:

	1	2	3	4	5	6	7	8	9	
Armstrong	3	0	1	0	0	2	8	0	5	—19
Enderby	2	1	2	3	0	1	0	0	0	—9

SALMON ARM ITEMS.

On the 9th, Mrs. J. C. Judge, stillborn.

Haying is in full swing. With heavy crops and fine weather farmers should be happy.

The Salmon Farmers' Institute will meet on Tuesday, July 18th, at 7.30 p.m., for general business.

Dr. Sofarth and son have purchased a fine 60 acre farm here and are building a house on it. Several properties have changed hands lately.

The 4th of July picnic held at Canoe creek was a grand success, and with swings and games all enjoyed themselves. The Canoe creek people know how to entertain.

The Methodist and Presbyterian churches haveeach held three strawberrie and ice-cream socials, and the Armites are enjoying themselves at the many entertainments.

The branch of the B.C. Fruit Growers' Association held their annual meeting on July 9th, and elected the following officers: J. C. Maguire, President; P. Owens, Vice-President; R. Turner, J. Pongman, and J. W. McCallum, Directors. Regular meetings second Tuesday in each month.

The holding of a picnic will be considered at the next meeting.

Enderby, B.C., July 4, 1905.

Editor EDENOGRAPH, Enderby, B. C.

Dear Sir—While it is not our desire to be made conspicuous by appearing in the public press, we consider a reply to the letter appearing in a recent issue from the Enderby Brick & Tile Co only proper on our part

As to the statements made therein there is no truth in their assertions. The specimens of the Enderby Brick Co.'s product referred to were not the poorest of their product, neither were those of ours exhibited of our best samples. These samples were not placed on exhibiton py a repesentative of our company, but by a disinterested friend, who hapoened to get hold of the specimens of brick from both companies without any particular regard as to whether they were of the best or the poorest of the product of either company.

We do not consider that anything more than legitimate advertising is necessary to make out brick go. On the other hand, our brick is made to sell on its merits. We do not intend secluding our product behind a tight board fence, but will leave them open to public inspection and examination. If their quality is not sufficient to merit their sale we are quite willing that they remain in our yard.

Furthermore, we can only conclude that the motives of the Enderby Brick Co. were not of the highest in thus rushing into public print, inasmuch as the writer of the letter could but have known the falsehood of his statements at the time of writing. Thanking you for space in your valuable paper,

Yours very truly,

THE OKANAGAN BRICK CO.,
Per JOHN A. TAYLOR.

[End of controversy in these columns.—ED.]

Business at the Council Meeting, July 5th.

Present Geo. Bell, Mayor (in the chair), Ald. Bradley, Evans, Kenny, Sharpe, Smith.

The minutes of the previous meeting held July 28th, were read an confirmed.

The by-lay for enforcing the observance of the Sabbath was brought up for further consideration, and finally, on the motion of Ald. Bradley, seconded by Ald. Smith, passed third reading.

The works committee presented their report on the letter from Mr. H. Swann, wherein he applied to the council to have Evergreen lane opened up to its full width, as registered. The committee having inspected the street complained of, considered that there was no need for immediate action.

Cemetery Committee.

The Mayor made a verbal report on behalf of the committee; and after full consideration, the council decided that as the only suitable land in the vicinity of the city is held at so high a price, and as the financial resources of the city are at present so slender, the only course open to them was to postpone further consideration of the matter sine die.

Nuisance Committee.

Ald. Smith, on behalf of the special committee, stated that no suitable land had been found for this purpose except at a prohibitory price. Referred to committee to continue their inquiries.

Ald. Kenny stated, in reference to the motion of which he had given notice, that he had found on proceeding to draft his amendment, that it was not this by-law, but number 8, the by-law for the Prevention of Animals running at large, which was affected. He therefore asked that the matter should stand over till the next meeting. Agreed.

By-law for the prevention of cruelty to animals. The clerk reported that no reply had yet been received from the Society for the Prevention of Cruelty to Animals in reference to the drafting of this by-law. On the motion Ald. Bradley, seconded by Ald. Smith, the by-law passed the second reading.

By-law for the Regulation of Bicycles.

Ald Smith, having obtained leave, introduced a by-law for the regulation of the use of bicycles in the streets of the city, and, seconded by Ald. Bradley, moved that same should pass its first reading as follows:

1. From and after the passing of this by-law, the following rules and regulations shall be observed by all persons riding on bicycles within the limits of the City of Enderby.

2. All bicycles shall be provided with bells or horns, and riders shall slacken speed and sound such bells or horns upon approaching any person, whether on foot, riding or driving, and whether meeting or overtaking such person.

3. Cyclists shall in no circumstances be allowed to ride upon the City sidewalks.

4. All bicycles when in use between sunset and sunrise shall be provided with a light which can be seen a minimum distance of 50 yards; bicycles shall not be ridden within the city limits at a greater speed than 8 miles per hour.

5. Any person convicted before the Mayor, Police Magistrate, or any Justice of the Peace having jurisdiction within the City, of an infraction of any of the provisions of this by-law, shall be liable to pay a fine of not exceeding Ten Dollars, and in default of payment of such fine may be committed to the goal or lock up house for a period not exceeding thirty days. Passed

The council adjourned at 9.50 p.m.

Dear Friend: You can take THE EDENOGRAPH by paying $2 a year and believe everything the editor says, if you want to; but if you do not occasionally express your thoughts through its columns, you will not get out of it the good you might, nor will your neighbor, the editor. Wishing to encourage perfect freedom and candor between THE EDENOGRAPH and its readers, we have thrown down all barriers and want you to feel free to walk into the sanctum sanctorum with you best thoughts in your hand and demand a hearing. If you have an idea, have it printed. Don't wait for a better one. Address—

THE EDENOGRAPH.
Enderby, B. C.

SETTLER'S AND TOURIST'S ATTRACTIONS.

We have in Enderby as inducements for farmers to settle here a fertile soil and a grand climate, and for tourists a river unequalled in the interior for boating and swimming, with beautiful tree covered hills, easy of ascent for a background. The lakes abounding close at hand afford good fishing and the connections of Shuswap lake (into which the Spallumcheen river eventually runs), right round to Salmon Arm and even Kamloops provide unlimited scope for fishing and hunting expeditions. Up the river towards Mabel Lake is a country almost untouched by the hunter, and deer, cinnamon and black bears are plentiful, while the grizly himself is still to be found in the mountains round the lake. The tourist season is now on and some steps should be made to advertise the inducements and amusements of Enderby, and district adjacent, to those in search of change of scene, sport and health.

For the winter time Enderby has an excellent skating rink, and concerts and dances are organized by the churches and societies here. The inauguration of a lending library and public reading room last winter was a move in the right direction, and it is to be hoped it will be continued this ensuing fall and winter. Enderby could be made more attractive in other ways. Back yards covered with litter or trodden down hard do not display to advantage the growing capabilities of of the soil in which we all believe and want other people to believe. Plant something, flowers or vegetables, and then when prospective settlers get off the train to look round, let there be something for them to admire, and what is of still more value, remember. First impressions go a long way towards settling any important question, and if this be so, it is certainly most desirable that the first impression of Enderby should be a favorable one.

It is fully understood that farmers do not come here to inspect or live in the towns. They come in most cases to escape the rigors of the winter east of the mountains, and perhaps on the part of elderly men a desire to pass the rest of their days in a more congenial clime, taking some enjoyment before the power for pleasure leaves them.

If the incoming settler is interested in the town he will be interested in the country-side, and will look over the land with a desire to settle, keenly alive to any possibilities he may see, and not in a listless, half-hearted manner, for in the latter case the battle is already lost.

RECORD WHEAT YIELD.

It is with great satisfaction that the people of British Columbia hear that the wheat crop in the prairie provinces has the present appearance of there being a record harvest surpassing all previous years. That this will mean for the Northwest a period of development greater than it has ever known before is an assured fact. The eyes of the world are on the Canadian wheatfields and this report will be a source of satisfaction, not only to the farmers themselves but to the manufacturers in the East whose immense factories depend for dividends to a large extent on the prosperity and development of the western country.

With the success of these dwellers on the prairie will come also an increased demand for fruit from this province in quantities quite unprecedented, and thus the settling of the land to the east of the Rocky mountains first is the reverse of detrimental to the industries here. It will be the wealth wrought from the ground by the prairie farmer, out of wheat, which will determine the mineral and manufacturing resources of these deeply carved valleys of British Columbia, and the fruit growing possibilities of many another. Then will the long suffering individual already on the ground reap the reward of many tiresome years of waiting.

Supplementary Estimates.

Ottawa, July 4—The supplementary estimates for the fiscal year commencing July 1st, were presented to Parliament to-night. They total $13,414,973, making with the main estimates submitted some weeks ago a grand total of $82,079,370. There is also a further supplementary for the year just closed of $168,430, which gives a total for the past year of $81,517,821. The increase this year over the year just ended is therefore $561,549. In connection with this year's votes provision is made for liberal increases in the salaries to some of the head officers in the departments.

The items for British Columbia with some others of general interest are given herewith.

$25,000 is set apart for the new quarantine steamer at Victoria. 75,000 for the new hydrograhpic steamer for British Columbia waters and $75,000 is voted for quinquennial census of Manitoba and Saskatchewan.

The widow of the late Hon. William McDougall is to receive an annual pension of $1,200. The additional amount voted for militia is $1,734,490, of which $110,000 is for Esquimalt.

Two thousand four hundred is voted for each of the county court judges at Victoria, Atlin and East Kootenay. The judge at Atlin gets a living allowance of $1,200. Fifty thousand is voted to the New Westminster exhibition.

British Columbia buildings' votes are: Cumberland public buildings, $2,000; Ladysmith public buildings, $2,000; Vancouver public buildings, to pay contractor, Thos. Tompkins, in final settlement, $781.50; Nelson public buildings to pay balance due to contractors, $1,901; Osoyoos public building, $2,000; Williams Head quarantine station repairs and improvements, 1,100.

Winnipeg gets a new custom examining warehouse to cost one hundred thousand dollars. Edmonton, the home of the minister of the interior, is to have a new public building. Dominion land office and immigrants' building.

Harbor improvements for British Columbia are Mission City wharf, $2,500; Graham Island wharf, $2,500; Countenay river improvement, $5,000; wharf on Fraser river at Whonnock, $3,000; wharf on Fraser at Port Hammond, $3,000; and Campbell river wharf, $2,500. However, there is to be a snagboat for the Skeena river, costing $15,000. Lewis and Yukon river improvements, $15,000; additional for Canada-Mexico service, $5n,000; repairs to steamer Quadra, $3o,000;

Kamloops-Nicola telephone line, repoling, $3,350; Hazelton-Port Simpson line extension, Aberdeen to Port Essington, $3,000; Nanaimo, Parksville, Alberni, Cape Beale lines to provide for settlement of Canadian Pacific railway,s account for the general overhauling of these lines in 1902-3-4-5. Okanagan Landing-Kelowna telegraph line extension to Penticton, $6,000. Quesnel-Barkerville branch to complete repairs, $131,000.

With *The* Owl

HANK BERLAW IN THE DARK WOODS.

MAN can fly. No man wants to fly. But all of us can climb. And all of us want to climb—or should want to. No man is doing his best who is careless and indifferent about his work, and thoughtless about his own or others' welfare. If we want to make the best of life we must fight the evil spirits that haunt every home, and every business house—the demons of morbid repining and useles regrets. Let us talk little to those friends whose sympathy leaves us more discouraged and less ambitious to overcome the difficulty confronting us. "Life is a duty—dare it," says one; "Life is a thorn-crown—wear it," says another. Which is your motto?

When things are going hard for us, as things will sometimes go for all of us, then is the time to make a practical test of the principle that you hold so dear. If you believe in making life a crown of thorns—wear it. But isn't it far wiser to force oneself to think of the good things that have happened us? We can do no good to rake up the thousand and one little things that try us and make life miserable. There is evil, of course; but there is also good, and if we fail to find it our conception of life is at fault. Men and women cannot be saints," you hear one say. Perhaps they cannot. But they can be men and women made in the image of God, because God said they should be. Life is always the same. No man has a corner on the secret of goodness, nor of success. All have an equal right, and the same opportunity. The secret lies in not being secret. Be open, and frank; fearless and just—and hustle all the time. Then you will succeed without knowing how you did it.

NOTICE is hereby given that 60 days after date the undersigned intend to apply to the Lieutenant-Governor in Council, under the provisions of the Rivers and Streams Act, for permission to clear and remove obstructions from Cherry Creek and its tributaries in Yale District and to attach, construct and maintain dams and booms to the shores of said creek and Shuswap river, and to make such other improvements as may be necessary for driving, holding and sorting of logs and fluming of lumber thereon.

The tolls proposed to be charged are such as may be fixed by a judge of the County Court.

The Choicest Section in the Okanagan

Will always be found interesting to the homeseeker, for the homeseeker will always find here a place he can call home. THE EDENOGRAPH wants to be found in every home in the district. It *is* found in every home in Enderby. Why can't we make it a regular visitor to every home in the country round-about? It would also be an interesting visitor to the home in the East, and there is many a quiet moment in the lives of those dear ones across the seas when they would enjoy reading about the doings of the inhabitants of our Eden—where you, their boy, resides. Two dollars a year, $1 six mos.

Preserving Fruit.

Wherever we find a homemaker, we also find a housekeeper. In connection with the home and the house, everything edible, washable, workable, passes into the hands of the home-maker and house-keeper. It is her duty to test and try the various articles needed for house and home comfort, whether she be the wife and mother or a substitute for either of these two, receiving a salary for services rendered. Upon her good sense and fine judgment depend the success and failure of house-keeping and home-making.

Not the least among the many and varied house duties is the very important one of selecting fruit for the home.

The housekeeper in the country usually makes her largest selection of fruit from the bluff and the garden. These two places so necessary to home comfort, are most excellent and lavish producers of native and cultivated fruits. No home need be without its collection of preserved fruits so long as the bluff is allowed to grow and the housekeeper remains firm in her demands for a garden. The cost of providing fruit for a large family is considerably lessened when the housekeeper can have access to hillside and garden.

But whether the fruit is bought from the surplus store of another, or the housekeeper picks it herself, she must still exercise great care in her selection for preserving, if she wishes to be entirely satisfied with the result of her labors and the preserved article to be a delight to the palate and the eye—and a something around which memory will linger, when the delectable reality has vanished.

Make a selection of all kinds of fruit, if convenient, add carefully remove all that are bruised. Pick the fruit in dry weather and purchase only that of the largest and finest quality. Use only the best white sugar, or the preserve cannot be perfect, and nothing is saved.

Fruit is in the best condition for preserving when not fully ripe, and as soon as possible after picking. Small fruit should not be allowed to stand over night after it is picked. All unripe fruit must be made tender by gentle scalding before it is put into syrup, or it will not inbibe the sugar; and the syrup must be thin when it is first added to it, and thickened afterward by frequent boiling, or adding more sugar, or the fruit will shrivel. Fruits with light colored skins are more acid in their taste than the dark-colored ones, and require more sugar to be palatable.

Use glass jars as they allow an easy inspection of contents, but keep in a dry, cool, dark place, for even if the jars be perfectly air-tight the light will affect the quality of the preserves.

In making the syrup for fruit, always dissolve the sugar in the water, before setting over the fire. Never allow either syrups or jelly to boil hard. Always have the syrup ready before putting in fruit.

An enamelled preserving kettle is the very nicest kind to use, and is easily kept in order.

In regard to the amount of sugar to be used, it is a hard matter to decide, as tastes differ so much. Some prefer one quarter pound of sugar to the pound of fruit, others half a pound, and there are still some who prefer three-qnarters and the whole pound. Some prefer jams, jellies aud marmalades; others canned fruits.

It is a good idea to have a large selection of all kinds of preserves to choose from, especially where school lunches are a necessity.

And then it is so nice to be complimented on our jams and jellies, and to note the eagerness with which they are consumed. We are also confirmed in our opinion that even this branch of housekeeping is conducive to home comfort.—Nor'west Farmer.

Our Industries.

From the Commercial of June 10th we take the following as evidence of the attention that Enderby and it's industries are attracting from outside points.

The Columbia Flouring Mills Company, Limited, with mills running at Enderby and Vernon, are running to the full capacity night and day, and report trade exceedingly good. During April they made a shipment of 1,500 barrels, per S.S. Athenian, to Japan, and another ship of 2,000 barrels at the last of May, these shipments were principally of their Wheat Sheaf and Two Star brands. The output of their Enderby mill is 300 barrels per day, and of the one at Vernon, 100 barrels. This speaks well for B. C. flour, and undoubtedly is only the forerunner of a large export trade, which can be well handled by the above company. It is worthy of note that the Enderby mill was one of the first in the west to put in the patent universal bolter. These bolters are huge oscillating cylinders, each containing 250 sieves, the meshes of which are so finely and accurately made that by their means minute particles of shorts are removed from the flour, and the various grades of flour, separated one from the other. The vigorous policy which this company inaugurated is working out very successfully, and is an encouraging indication of the progress the country is making.

Halcyon Hot Springs
Arrow Lake, B. C.

Other People's Views.

That the delights of a holiday spent among British Columbia's beautiful scenery is attracting attention in Manitoba and her sister provinces is proved by the cutting taken from that bright journal, "The Hartney Star," Manitoba. Under the heading of "The holiday," accompanied by a large cut of a waterfall of this valley, appears the following in issue of July 7:

"The holiday season has come again with all it's anticipations. July divides the population into two classes, those who go away for a visit and those who stop at home. Of those who go abroad some will seek the excitement and variety of the exhibition crowds, bnt the majority will seek the cool retreats where forests shade the rushing streams or overhang the mysterious depths of inland lakes, and where the freedom of life may be indulged without the restraints of ceremony. To the west are the mountains possessed of noisy canyons, strange woods and curious lakes, encircled by trees a thousand years old where the track of the grizly can be noticed to the water's edge. To the north are the solitudes of the Hudson Bay region, to the east the wild country of river, lake and forest. A few days spent in such agreeable retreats during the hot period of summer restores the wearied mind and tired body, and the season so spent will long be remembered with interest and pleasure.

"British Columbia will yet become the greatest manfacturing country in the world. When the iron mines of other lands are exhausted British Columbia can furnish for a thousand years all the iron needed by mankind and then her resources will hardly be touched. The coal fields are as extensive as the mines and the forest wealth, while the mountains are of marble and of granite. The climate is agreeable and invigorating and the glorious beauties of its sea and mountains are only surpassed by the exquisite loveliness of its rivers, woods and lakes. The water powers are a miracle that will some day, with electric flash, speak the triumphs of the imperial province."

The Essence of Falsehood

It should be pointed out with continual earnestness that the essence of lying is in deception, not in words; a lie may be told by silence, by equivocation, by the accent on a syllable, by a glance of the eye attaching a peculiar significance to a sentence; and all these kinds of lies are worse and baser by many degrees than a lie plainly worded; so that no form of blinded conscience is so far sunk as that which comforts itself for having deceived, because the deception was by gesture or silence instead of utterance; and finally according to Tennyson's trenchant line, "A lie which is half a truth is ever the worst of lies."—Ruskin.

A Girl's Essay on Boys.

Boys are men that have not got as big as their papas, and girls are women that will be ladies by-and-by. Man was made before woman. When God looked at Adam He said to Himself: "Well, I think I can do better if I try again." And He made Eve. God liked Eve so much better than Adam that there have been more women then men.

Boys are a trouble. They wear out everything but soap. If I had my way half the world would be girls and the rest dolls. My papa is so very, very nice that I think he must have been a little girl when he was a litl e boy.

Man was made, and on the seventh day he rested. Women was then made, and she has never rested since.

Bear this in Mind

There may be, no doubt there are, features about other parts of the Okanagan that will equal anything we have about Enderby in the way of nature's provisions for home-life, but certainly none can excell us. Climatic conditions are perfect; and for health and beauty, Enderby's location is unsurpassed. No cold, damp weather, or hot sultry days.
