LETTER FROM BIG BEND.

The following is an extract from a letter to the *Sentinel* from Big Bend by Mons. B Deffis, the well known Cariboo correspondent:

* * * * There are still about 600 people in Big Bend, viz: 200 on McCullochs Creek, 200 on French Creek, and 200 more scattered all over the country. Out of the 200 men stationed on French Creek about one-third are engaged putting in wing dams, etc, the rest are lying back eating up their provisions, and seem to depend on the few who are prospecting and on Providence to make their "pile." Such a lazy and sluggish set of people I never saw in any place; if, instead of grumbling at impossibilities from morning to night, with no better purpose than the dog barking at the moon, they would turn to at prospecting, the chances of striking something would be greater for us all. As for me, I am busy running a tunnel with Johnny Gillis, in a side hill adjoining the Lafleur or Half Breed claim; George Weaver has already crossed the line, en route for Blackfoot; James May and John Tilford are to join us to run the tunnel, should we strike nothing they intend going to Blackfoot via Kootenay. A new batch of Caribooites started this morning, some for Blackfoot and others for somewhere else.

Many people have come here from Blackfoot, after having prospected there for several months without success. They say the country is open and extensive, but it is overrun by people, and the gold is very spotted. From all that I hear and see, I think that a miner stands a better show yet in Cariboo than anywhere else. Please tell the boys that "all that glitters is not gold," and that "a bird in the hand is better than two in the bush." Many who have left Cariboo to come up here wished themselves back there again. They may strike some rich spots up here, but upon the whole I think it will never be a good mining country. The mountains are high and steep, barren of every kind of vegetation but trees (for the most part cedar) and prickly ferns (called most appropriately by miners devil's clubs), which tear your hands when walking along. The bed rock in the streams and all over the country, as far as I am able to judge, is as a general rule what is known among geologists as amphibolous, it may contain rich spots in some of its seams, but upon the whole it never proves to be rich, and every ounce of gold taken out costs two. The bed rock here seems sometimes to be a compound of granite and limestone or slate rock, the latter belonging to the class of rocks known among scientific men as phyllades. The diggings, though perhaps not so deep as in Cariboo (no one knows much thus far about their average depth), will be of a very costly character, owing to the numerous large boulders obstructing the way. It requires a good deal of capital to prospect this country, and unfortunately no one up here seems to have any money. I think that all the broken men in the two colonies and in California, Blackfoot, etc., have found their way here. Very little will be known about French Creek before fall, on account of high water; for size and in everything else it resembles Keithleys Creek more than any creek I have ever seen. If no gold is struck in some of the flats I would not give much for the beds of the creeks in Big Bend; still our knowledge and experience is so limited in regard to gold discoveries that I do not want any one to take my opinion as they would current coin. The country may turn out yet better than I think, and it is my earnest wish that I may be wrong in my anticipations; for it is of little consequence whether an individual is incorrect in his calculations, whilst it is of momentous importance to see the country prosper.

B. D.

CANON CREEK.

(From the Cariboo Sentinel, 25th.)

We have been permitted to make an extract from a private letter from Quesnelmouth respecting the new diggings on Canon creek. It says: "Hickson, Shepperd and McLeese have just arrived from a prospecting trip on Canon creek, and they bring back a first rate account of the country. The water was so high in the creek that it was impossible for them to prospect it, so they tried the benches. The first bench tried was some 12 feet above the level of the creek; they brought a ditch in and ground sluiced for a space of 20 or 25 feet, and washed up $73—I weighed it here myself. The amount does not seem much, but considering the obstacles they had to contend with I think it is first rate. It took them five days to sluice and wash up the above. They had but one shovel and one pick, having lost some of their tools on the way up, and had to use two old leaky sluice boxes, through which a good deal of fine dust got lost. Shepperd showed me a prospect of 50 cents to a pan which he got in another place. All the gold is more or less mixed with quartz. Bob McLeese found one piece of quartz that weighed about two pounds which is perfectly impregnated with gold. They are all going back again immediately. They represent the country as being extensive. Enclosed you will find a sample of the gold."

[We have seen the sample alluded to, and judging from its dark color, we would be inclined to think that it will assay well.—ED. SENTINEL.]

FRIDAY EVENING, JULY 6, 1866.

The Mass Meeting in Cariboo.

The *Sentinel* of June 25th contains a full and excellent report of the great mass meeting held in Richfield on the 23d ult., to condemn the arbitrary conduct of Judge Begbie in regard to the Aurora-Davis case. The meeting was first addressed by Mr. Burdock, who spoke strongly against the complicated and expensive system of laws which exist at the mines, and on the rights of trial by jury, condemning the arbitrary and partial conduct of Judge Begbie in setting aside the verdicts of juries. Mr. Towers followed, stating that the laws of the country had been trampled on in an *outrageous manner* by Judge Begbie, and urging the people to demand redress from the Government. Mr. John Maclaren came next, insisting especially on the necessity for a Court of Appeal. The meeting was further addressed by Messrs. Perrott, Murdoch, Simpson, and Lanmeister. The conclusion of the meeting is thus given by the *Sentinel*:

"The Secretary by request of the meeting, then read a leading article from the *British Colonist*, which had just arrived that afternoon by Express, containing sentiments which met with the unanimous approval of the meeting.

"The Chairman then proposed that Messrs. J. McLaren and Frank Lumeister be appointed as a committee to wait upon His Excellency the Administrator of the Government with the foregoing resolutions, which being put to the meeting was carried by acclamation, the meeting at the same time pledging themselves to defray the expenses of the journey.

"Three cheers were then given for Judge Cox, the *British Colonist*, the Chairman, the Secretary, the *Cariboo Sentinel*, and the Queen, and three groans for Judge Begbie. The meeting then adjourned." [Where are the cheers for the Victoria *Chronicle*, so ostentatiously published as telegraphed by our contemporary a few days ago? ED. TEL.]

"Throughout the whole proceedings there prevailed that spirit of good order and decorum which is peculiarly characteristic of men of intelligence; not a word was uttered or an action taken that could be construed into anything approaching threats or intimidation or force; the greatest harmony and unanimity existed on all points brought before the meeting, and on the whole the people of Cariboo have reason to be proud of the orderly character of the first meeting ever held in the district."

Public School Examinations.

GIRLS' DEPARTMENT.

This department of the Public Schools was examined yesterday by the Superintendent, assisted by several of the visitors, who comprised most of the clergy of the city, several of the Board of Education, and a number of ladies and gentlemen. The varied exercises of the pupils were very creditably performed, and the visitors generally expressed their satisfaction with the progress evinced and the conduct of the school under the careful and efficient management of Mrs. Fisher and her assistant, Miss McDonell.

The following pupils were especially commended at the close of the examination:—*First Class*—Misses Sarah Todd, E. Latham, M. Latham, M. Fox, M. Watson, M. Norris, E. Eyre, J. Freeman, J. Phelps. *Second Class*—Misses B. Cameron, J. Eyre, J. Watson, M. Overstone, J. Kinsman. *Third Class*—L. Wilcox, A. Barry, J. Jamieson, E. Siddell.

The exercises of the day were agreeably varied by vocal performances by the pupils, accompanied by Miss McDonell on the piano. At the conclusion the Superintendent and several of the visitors addressed the school in very complimentary terms and the proceedings terminated with the National Anthem.

The District School.

The examination of this school, under the tuition of Mr. Burr, commenced this morning at half-past nine o'clock. The Superintendent of Education was present, also the Bishop of Columbia, Rev. A. C. Garrett, Rev. Thos Somerville, Rev. F. Gribbell, Messrs. Tolmie, C. B. Young, Alston, Macdonald, Williams and others. Some 25 or 30 pupils were in attendance, and their neat and clean appearance was noteworthy. The examinations were conducted by the Superintendent and Messrs. Garrett and Somerville, and were generally very good, more especially in the lower branches: in history, however, they were rather deficient, as also in physical geography. One or two pupils showed fair proficiency in grammar and book-keeping. The writing of several of the pupils was very good, although some of the best were absent. In arithmetic the advanced class were very good, and deserving of particular mention. The exercises were concluded by short addresses to the scholars from the Superintendent and one or two of the visitors.

MR. ZAHN begs to announce to the inhabitants of Victoria that he has lately received a large assortment of Children's Carriages and Chairs, Fishing Baskets and Fishing Canes, and a large quantity of Market and Traveling Baskets, China Vases, Fancy Goods and Toys, all of which have to be sold on or before February next at greatly reduced prices. Goods sold at wholesale for cost prices. *

THEFT—Jack, a Hydah Indian, was charged in the police court this morning with stealing several pairs of boots from Mr. Schultz's store, Government street. Three white men were also brought up charged with complicity in the theft. The case was remanded for further inquiry.

SAILED.—The bark Camden warped out of the harbor to-day *en route* for Puget Sound.

ASCENT OF MOUNT BAKER.—We are glad to learn that two adventurous townsmen of our own are about to undertake the hitherto unattempted feat of ascending the lofty peak of Mount Baker. Dr. Robert Brown, well known in this city as the chief of the Island Exploring Expedition, and Mr R. Coleman, artist, librarian to the Mechanics' Institute, will start about the end of this month for Skadgett river, which they will ascend as far as practicable in canoes, and then strike out for the southeastern slope of the mountain, which they have reason to believe the most accessible. They will endeavor to make a thorough exploration of this magnificent peak, and determine accurately its altitude, a point which is still a subject of dispute, the stated height varying from 14,000 to 16,000 feet. Dr. Brown is an experienced traveller, having explored a great part of the north-western slope of the Rocky Mountains during his botanical researches, and Mr. Coleman is a member of the Alpine Club of London, and has made the ascent of Mont Blanc twice, besides having made several other Alpine excursions. He is also a glacial artist of repute, and on his return we may look for some fine sketches of the glaciers of that *mons incognita* yclept Baker. Both gentlemen are admirably adapted to this daring and hazardous exploit, and we wish them every success in their attempt.

"FORSOOK."—In these times of long faces and lean purses it is refreshing to observe that the popular tendency is not towards despondency, but to enjoy the passing moments and "shoot folly as she flies." This morning an early riser might have seen a "gay and festive" party, comprising a number of ladies and children marshalled (*a la* Marsh, in *days of yore*) by one of our favorite amateurs, wending their way to where the saucy little Diana lay, with steam up and awnings spread, awaiting her fair load. A number of others joined the party at the wharf, and at 9 o'clock the Diana forsook Victoria for Sooke, leaving "one more disconsolate," who arrived too late, *forsook* on the wharf. *Apropos* of amateurs we hear it mentioned that the dull times are to be enlivened by another theatrical performance by the Dramatic Association, under the management of R. G. Marsh,—a good idea, which we hope to see carried out.

THE RUSSO-AMERICAN TELEGRAPH. — The Telegraph Company's stern-wheel steamer Mumford, Captain Coffin, sailed yesterday evening for the North, with Captain Butler and a party of twenty men to assist in the construction of the great overland line to Behring's Straits. The Mumford will ascend the Skeena river as far as practicable, whence supplies will be forwarded by canoes and Indians for the use of the working parties inland. The steamer will then ascend the Stekin river for the same purpose, after which she will return to Victoria for supplies.

TELEGRAPHIC.

Last Night's Despatches.

HALIFAX, July 2.—The steamer Cuba, from Liverpool, *via* Queenstown, on the 24th has arrived.

The Italian army crossed the Mincio, on the 23d, and entered Venetia unopposed.

The Prussians left a small garrison in Dresden, and marched into Bohemia without resistance. A slight collision had occurred between the Austrians and Prussians in Silesia, when the former retired. The Prussians have entered Austrian Silesia.

St. Petersburg advices deny that there has been any movement of Russian troops, and says that non-intervention continues to be the policy of Russia. Nothing authentic has been made known of communication by France to Austria, but the Vienna press says France denies having made any agreement with Prussia, and if Austria does not menace the existing Kingdom of Italy, and, if successful, does not advance beyond Milan, France will not interfere, but will assist in the conclusion of a definite peace, and will further propose to Italy to pay indemnity for Austrian expenses for war.

The Paris Bourse closed unsettled at 62 francs 85c.

Liverpool cotton market closed, 23d. with an advance of 1/2 and 3 pence. Under favorable advices from India, Uplands was quoted at 13 1/2. Breadstuffs inactive, but firm. Provisions quiet and steady. Consuls closed on Saturday at 86 1/4 and 86 5/8 for money; 5:20's 66@66 1/2.

Victor Immanuel had issued a stirring manifesto to the Italians, in which he reiterates that for supreme reasons the noble Province of Venetia was then allowed to remain in the hands of the Austrians, but that a favorable opportunity had now arrived to accomplish the independence of Venetia from Austrian rule. He charges Austria with having assumed a hostile and threatening attitude on the Italian frontiers, to disturb the pacific task of reorganization in Italy, and he had replied by taking up arms, but he nevertheless showed a desire for peace by accepting a proposal for conference. Austria having refused, affords fresh proof that if she confides in her strength, she does not rely equally upon the goodness of her cause and her right. The manifesto concludes with a patriotic declaration of assurance that Italy has the sympathy of Europe, and he hands over the Government of the State to the Princes Gerta, Posimango of Pallistro, Gufi and San Marino. Victor Emmanuel has also issued a proclamation to the National Guards, confiding to them the guardianship of public security and order.

Victor Emmanuel left for the camp on the 21st, and was received enthusiastically. He had ovations on his way. He arrived at Cremona on the same day.

Judge Begbie and the Davis Claim.

The following letter, published in the *Sentinel* of the 25th ult., with the editorial comments thereon, will be of interest to many of our readers at the present time:

TO THE EDITOR OF THE CARIBOO SENTINEL.—SIR,—Permit me to ask the following questions through your valuable paper:

First—Have we, as colored men, the right to pre-empt ground for mining purposes?

Second—Have we any rights in common with white men?

Third—Why were our interests taken from us and given to white men?

I bought my interest in the Davis company and expended $2900 before I received one cent out of said claim, and the dividends I have received from said claim have been appropriated to pay my debts in this colony, but just at the time I was about to be rewarded I have been deprived of that portion of the Davis claim which would pay. I have taken some pains to spread about the equality we, as colored men, had in the laws in an English colony, and am proud to say I have found no difference until now.

Poor Marshall lost his life coming to Cariboo to look after his small interest in the Davis company, the only pittance he had left after six years hard work in this colony, and the only means of support for his family. His wife and four children are more in need of the money than those to whom it was given. There are about fifty colored men in and about Cariboo, the greater portion of whom are miners, and the quicker we know our position in this colony the better for us.

Respectfully yours,

COLORED MINER.

[We had hoped that discussion in this matter would have ceased with the decision of the case, and were it not that we consider that a great injustice has been done to men whose rights have been outraged by the one sided decision given by a Supreme Court Judge in a British colony, we should have let the matter drop. It is unnecessary to state in answer to "Colored Miner's" first and second questions, that the mining laws of this colony make no distinction as to the color of a man's skin; the mining laws have been wisely and judiciously framed. It is only with the administration of them that we take exception. The laws may say one thing, but the Chief Justice says another, and we must grin and bear his "ipse dixit," having no other recourse left. The judge has given as his reason for depriving 'Colored Miner' of his claim, that it was an act of wisdom and expediency, justified by the circumstance of his, 'Colored Miner's,' knowledge of the jump, which, singular to say, although it was not established to the satisfaction of the jury, was quite clear to the learned judge.—ED. SENTINEL.]

THE POLICE INVESTIGATION.—This committee met again to-day, and examined Policeman Bakes, and Bourne, the cook. The latter's evidence went chiefly to show that Superintendent Hankin made use of his services as a private cook, and that prisoners had also been employed by the Superintendent in private services; also that furniture had been made by prisoners for Mr. Hankin's private use. He also testified to Mr. Hankin's imperious and arbitrary conduct to both policemen and prisoners. Policeman Bakes corroborated the above, and stated that his instructions from Mr. Hankin were *not to report any of his superior officers*, no matter what their conduct, as it would tend to the injury of the force. He also stated that the police had made a practice of trying to entrap licensed victuallers into selling whiskey to Indians, in order to get the fine and that these attempts were made especially upon those who were known to be able to pay the fine. His evidence also went to show the injustice with which prisoners had been treated, and the unbecoming language used by the Superintendent. The committee then adjourned till Saturday, at 11 a.m.

SALES OF REAL ESTATE—The Committee of the House, consisting of Messrs. Cochrane, Ash and Pidwell, appointed to inquire into the recent sales of real estate for taxes, had an interview with the Governor to-day. His Excellency said he was ready to coincide with the views of the Assembly in the matter, and if the House would pass resolutions expressing their wishes he would cause a bill to be drawn up by the Attorney General in consonance with those views.

PUBLIC ACCOUNTS.—The Finance Committee, consisting of Messrs. Young, Tolmie and Carswell, waited upon the Colonial Secretary to-day, but were unable to obtain an interview, that gentleman being in attendance on His Excellency, and afterwards in the Executive Council.

THE NOVELTIES in the Silk trade this season are the beautiful Gros de Suez Gros de Londres, and Gros de Pekin. A choice lot of these are for sale at the LONDON HOUSE; also a splendid stock of Black Gros Grains and Glacés, from three-quarters to a yard and a quarter wide, bought before the advance in the silk market. *

REMOVAL.—Mr Hibben requests us to state that he is now removing his bookstore from the old stand, corner of Yates and Langley streets, to the fine new premises in the Masonic Building, Government street, where he will open in a day or two. *

OUR DESPATCHES.—The wires have been down all day below Portland, consequently we have no later despatches.

Cariboo.

Per steamer Alexandra we have the Cariboo *Sentinel* of June 21st and 25th, from which we extract the following:

ARRIVALS.—Mr Harris, ex Mayor of Victoria, arrived here on Thursday last from Seymour; he rode into the creek in his gig, being the first vehicle of the kind that has ever appeared on Williams Creek. Mr H. intends remaining here during the summer, having entered into partnership with Mr. Toomey in the butcher business.

CHINESE LICENSES.—A goodly number of the celestials have responded to the Commissioner's order, to step up to the office and pay. A considerable revenue will thus be obtained this season.

ACCIDENT.—An accident befel Mr. C Maloy, foreman of the Ruby company, on the evening of Monday last. It appears that while he was examining the work underground a boulder weighing many a ton fell from the breast of the drift, striking and knocking him down, and rolling on his leg, broke it in two places below the knee. Drs. Chipman and Wilkinson promptly set the limb, and the patient is now doing well.

LAND SLIDE.—Last Sunday morning about 3 o'clock, the inhabitants of the quiet town of Van Winkle were aroused from their peaceful slumbers to the consciousness of danger by having their dwellings inundated with a stream of water and mud which proceeded from Van Winkle Creek. It was soon ascertained that the cause of the flood arose from the damming up of the water of the creek by a land slide about a quarter of a mile above. No further damage was done, however, than the flooding of the houses and filling the street to a depth of three feet with gravel.

FACTS vs. THEORIES.

"Give me a place to rest my lever on," says Archimedes, "and I will move the world." "Give me pure and unadulterated drugs," says Medicus, of the olden time, "and I will cure disease."

In one sense, both of these learned pundits were the veriest charlatans. They knew there was no place to rest their lever on, either to *move the world or cure disease*. Mechanism was in a backward state, and the medical profession was but another name for sorcery, and all the adjuncts of magic filters and charms of the "evil eye," &c.

But these latter days have borne unto us something more than even superstition and its crew ever dreamt of in their maddest philosophy. In these days of practical science, what was theory of yesterday is fact to-day, and all the old time notions become as bubbles in the sun, and burst and break with every breath we draw.

Let Archimedes shoulder his lever and we will find a resting place for it to move the world. Let mine ancient Medicus pant and toil no more for the drugs he so sorely needs, for we have them at our hand, ever ready to serve them at his beck.

Refined in the laboratory of Dr. Maggiel, the finest materials known in the medical profession are obtainable by any one. His Billious, Dyspeptic, and Diarrhœa Pills stand unrivalled, and his Salve operates with magical effect upon burns, scalds, and all sores and ulcers of the skin.

In fact, we think Maggiel's Pills and Salve are the wonder of this century, and we are happy in the thought that many others of our brethren of the craft agree with us. We would earnestly counsel that all families provide themselves with Dr Maggiel's Preparations at once, and keep them ready at hand, so as to use them at the most opportune time and as occasion serves.—*Valley Sentinel.*

A NEW AND GRAND EPOCH IN MEDICINE!—Dr. Maggiel is the founder of a new Medical system. The quantitarians, whose vast internal doses enfeeble the stomach and paralyze the bowels, must give precedence to the man who restores health and appetite, with from one to two of his extraordinary Pills, and cures the most virulent sores with a box or so of his wonderful and all healing Salve. These two great specifics of the Doctors are fast superseding all the stereotyped nostrums of the day. Extraordinary cures by Maggiel's Pills and Salve have opened the eyes of the public to the inefficiency of the (so called) remedies of others, and upon which people have so long blindly depended. Maggiel's Pills are no of the sugar coats that are swallowed by the dozen, and of which every box full taken creates an absolute necessity for another. One or two of Maggiel's Pills suffices to place the bowels in perfect order, tone the stomach, create an appetite, and render the spirits light and buoyant! There is no griping and no reaction in the form of constipation. If the liver is affected, its functions are restored; and if the nervous system is feeble, it is invigorated. This last quality makes the medicines very desirable for the wants of delicate females. Ulcerous and eruptive diseases are literally extinguished by the disinfectant power of Maggiel's Salve. In fact, it is here and there that **Maggiel's Billious, Dyspeptic** and **Diarrhœa Pills** cure where all others fail. Salve for Burns, Scalds, Chilblains, Cuts and all abrasions of the skin **Maggiel's Salve** is infallible. Sold by J. MAGGIEL 11 Pine tree New York, and all Druggists, at 25 cts per box.

Evening Telegraph.

FRIDAY EVENING, JULY 6, 1866.

THE WAR IN EUROPE.

The telegraphic news which we published last evening, and the additional intelligence which we present to our readers to-day, shows that war has at last broken out in Central Europe. The thunder-cloud hung threateningly long enough, upsetting commerce and creating financial disasters; we are now about to witness the tempest—to see the Federal German States, like Virginia and Kentucky at the commencement of the American war, turned from the smiling aspect of industrious peace to the desolation of destructive war. As the range of hostilities in the American Republic, however, soon extended beyond the Border States, so may we expect the German war to be carried quickly beyond the confines of Saxony or Bohemia. The desire to push the battle-field into the enemy's country always leads to the opening collision, and in this instance both Prussia and Italy have the advantage of the first offensive movement, and of carrying the war beyond the borders of their own dominions. Austria, it would seem, is disposed to act more on the defensive than the offensive, having allowed Italy to cross the Mincio and Prussia to enter Austrian Silesia. Her great strength is really in defence, but it may be found an imprudent step to leave the Federal States to the mercy of Prussia. These States in the present instance are undoubtedly on the side of Austria, because they have nothing to fear from her but everything from Bismark; once overran, however, they will have no option and must succumb to Prussian dictation. In most countries this would prove a weakness to the invading army, as strong garrisons would have to remain in the conquered States; but these small German duchies or principalities are a queer conglomeration of helplessness, and have been so used to a dependent attitude that they are more likely to accept the first blow of war as a stroke of misfortune that must be accepted with resignation, than as a temporary calamity that might be retrieved by vigorous action. So far things look unfavorable to Austria. She is beset on both sides and has in her extremity not a sympathiser. Had she made terms with Italy and given up Venetia, she would have had an ally rather than an enemy to her south; had she resisted the rapacious overtures of Prussia at the commencement of the Schleswig-Holstein imbroglio, she would have allowed her present invader to get into difficulty and would have secured the friendship of the other European powers. As things stand now, if she defeats Victor Emanuel, France will not allow Italy to be invaded, and if she brings up forces sufficient to repel Prussian aggression and save the Federal States, she must relinquish Venetia. Her wisest course would be to do now what she should have done at the first—make friends with Italy. That done, Prussia would be quickly reduced to terms, and Prussia, like herself, has got no friends. The great feature, indeed, in the present war is the utter absence of sympathy for either of the two great combatants. The hope of every liberty-loving person is that the Hapsburgs, as well as the Cobourgs and the Bismarks, should disappear from the scene forever, and if the war continues the hope will not prove a groundless one. We are certain to see the old revolutionary fire lighted again in Prussia, and once that illumes Central Europe, farewell to the despotic dynasties.

DISCHARGED.—John Taylor, who was accused of causing the death of Jim, a Northern Indian, was discharged by Mr. Pemberton yesterday, the Coroner's jury having rendered a verdict of "death from natural causes."

THE MECHANIC'S INSTITUTE will realize nearly $300 by the Fourth of July excursion to San Juan.

THE NEXT STEAMER.—By private telegram received by the agent here last evening, the steamship Sierra Nevada is announced to leave San Francisco for Victoria to-morrow.

REMOVAL.—Andrew Robertson, merchant tailor, of Government street, has removed his establishment across the street to the store just vacated by Waitt's book store.

FOR NEW WESTMINSTER.—The steamer Alexandra sailed this morning at 10:30, with about 25 passengers and a quantity of freight.

J. A. McCREA will sell at eleven o'clock, on Nathan's wharf, the Plant of the Nanaimo "Gazette."

The Presentation to Mr. Cox.

[From the Cariboo Sentinel, June 25th.]

Immediately on the adjournment of the mass meeting the whole multitude waited on his honor Mr. Commissioner Cox, at his residence, for the purpose of presenting him with an elegantly gold mounted walking cane, as a token of the high respect and esteem entertained for him as a just and upright administrator of the laws, by the miners of Cariboo.

Mr. S. Booth, who was appointed by the Committee to wait on his Honor and make the presentation, read the address of the miners accompanying the gift, which ran as follows:

"WM GEO. COX, ESQUIRE, GOLD COMMISSIONER, &c., WILLIAMS CREEK, B. C.

"SIR,—The miners of Cariboo beg leave to express their continued confidence in your administration of the Mining Laws in this District,—all high-handed efforts to set those laws aside to the contrary notwithstanding.

"We therefore beg that you will accept the accompanying present as a token of our respect and esteem, and we ask that you will take it as a mark of our appreciation of your determined efforts to do substantial justice in all cases tried before you."

(Signed by 500 miners of Richfield, Barkerville, Cameronton, Van Winkle, Lowhee Creek and Grouse Creek.)

After which Mr. Booth, in a very able and eloquent speech, presented the cane to His Honor, concluding his remarks with the wish of the whole community that his career of usefulness amongst us might be prolonged for many years, and that his life might be crowned by happiness and prosperity. (Three cheers were given for His Honor.)

After the noise subsided Mr. Cox read the following reply:

"GENTLEMEN,—I beg to thank you most sincerely for this valuable testimonial—valuable in itself—but much more so in the estimation of it as an expression of your esteem and respect for me as the Commissioner of this District. Not that I required any such token to convince me of it. Your approving opinion of my efforts at duty and service are not unappreciated.

"In conclusion, I wish you all success and a continuance of the mutual good feeling which has hitherto existed between us.

"Yours faithfully,
WM. GEO. COX.

"Cariboo, 23d June, 1866."

The cane is made of rosewood and beautifully polished. The head is composed of over five ounces of Cariboo gold gracefully wrought into an octagon shape, having a piece of polished gold bearing quartz inserted on the top. On one of the squares is elegantly engraved the Coat of Arms of British Columbia as represented on the seal of the colony; on the reverse side is a representation of the various modes of gold mining; on the left the mouth of a tunnel can be seen; on the right an elevated water flume with hydraulic hose attached, and in the foreground a set of sluices with a sturdy miner in the act of raising his pick are all very minutely brought out. The inscription occupies the remaining squares, and reads as follows: "Presented to G W. Cox, Esquire, Gold Commissioner, by the Miners of Williams Creek, Cariboo, 1866." The work was designed and executed by Mr. E. Watson, Yates street, Victoria, to whom great credit is due for the beauty of its execution. The cane cost something like two hundred and fifty dollars.

FACTS vs THEORIES.

"Give me a place to rest my lever on," says Archimedes, "and I will move the world." "Give me pure and unadulterated drugs," says Medicus, of the olden time, "and I will cure disease."

In one sense, both of these learned pundits were the veriest charlatans. They knew there was no place to rest their lever on, either to move the world or cure disease. Mechanism was in a backward state, and the medical profession was but another name for sorcery, and all the adjuncts of magic filters and charms of the "evil eye," &c.

But these latter days have borne unto us something more than even superstition and its crew ever dreamt of in their maddest philosophy. In these days of practical science, what was theory of yesterday is fact to-day, and all the old time notions become as bubbles in the sun, and burst and break with every breath we draw.

Let Archimedes shoulder his lever and we will find a resting place for it to move the world. Let mine ancient Medicus pant and toil no more for the drugs he so sorely needs, for we have them at our hand, ever ready to serve them at his beck.

Refined in the laboratory of Dr. MAGGIEL, the finest materials known in the medical profession are obtainable by any one. His Billious, Dyspeptic, and Diarrhœa Pills stand unrivalled, and his Salve operates with magical effect upon burns, scalds, and all sores and ulcers of the skin.

In fact, we think MAGGIEL'S Pills and Salve are the wonder of this century, and we are happy in the thought that many others of our brethren of the craft agree with us. We would earnestly counsel that all families provide themselves with Dr. Maggiel's Preparations at once, and keep them ready at hand, so as to use them at the most opportune time and as occasion serves.—*Valley Sentinel.*

A NEW AND GRAND EPOCH IN MEDICINE!—Dr. Maggiel is the founder of a new Medical system. A Triumph of Science

—AND—

THE LIGHT OF THE WORLD

DR. MAGGIEL'S

PILLS & SALVE.

These Life giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-Giving Pills

Have been used with the greatest success. Their mission is not only to prevent sickness but to cure. They search out the various maladies by which the patient is suffering and so invigorates the ailing system. That the aged and infirm, a few doses of these valuable PILLS will prove to be

A VERY FOUNTAIN OF YOUTH,

For in every case they add new life and vitality, and restore the wonderful energies to their existing state. To the young and middle aged they will prove most invaluable, as a speedy, specific and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to vigor and make youth ever

An Eternal Spring!

It was left for this day and hour to realize the dream, and show in one glorious fact the magic that made it fair.

THESE FAMOUS REMEDIES

Cannot stay the flight of years, but they can force back, and hold at bay, diseases that will triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—

For Billious Disorders

Nothing can be more productive of cure than these Pills—Their almost magic influence is felt at once; and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe.

For Cutaneous Disorders

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

DR. MAGGIEL'S PILLS

Invariably cure the following Diseases:

Asthma,
Bowel Complaints,
Coughs,
Colds,
Chest Diseases,
Costiveness,
Dyspepsia,
Diarrhœa,
Dropsy,
Debility,
Fever and Ague.
Female Complaints,
Headache,
Indigestion,
Influenza,
Inflammation,
Inward Weakness,
Liver Complaint,
Lowness of Spirits,
Ringworm,
Rheumatism,
Salt Rheum,
Scalds,
Skin Diseases.

☞ NOTICE.—None genuine without the engraved trade mark round each pot or box, signed by DR. J. MAGGIEL, 43 Fulton street, New York, to counterfeit which is felony.

☞ Sold by all respectable Dealers in Medicines throughout the United States and Canada—at 25 cents per box or pot.

THE GREAT REMEDY OF THE AGE.

HOLLOWAY'S OINTMENT.

The effect of the Ointment on the System.

To the very core and centre of all diseases which affect the human body, this remarkable preparation penetrates. It disappears under the friction of the hands, as salt disappears when rubbed upon meat. The unguent performs its healing errand rapidly, safely, and without pain. Simple eruptions, open sores hard tumors, scrofulous developments of all kinds, abcesses, cancers, old wounes, and, in fact, every species of inflammation and suppuration, whether in the skin, the flesh the glands, or among the muscles, can be arrested in its destructive course, and permanently cured without danger by rubbing in this inestimable Ointment.

Bad Legs, Bad Breasts, Sores, and Ulcers.

In many Hospitals in Europe this celebrated remedy is now used for the cure of old wounds sores, and ulcers; in Spain and Portugal, and in many parts of Italy, the first Physicians regularly prescribe its use. It is a sovereign remedy for bad breasts and bad legs; and likewise for all skin diseases. It is to be found in the chest of nearly every sailor, soldier, and emigrant.

Imprudencies of Youth;—Sores and Ulcers.

The above class of complaints is surely removed by nightly fomenting the parts with warm water, and then by most effectually rubbing in this Ointment. Persons suffering from these direful complaints should lose not a moment in arresting their progress. It should be understood that it is not sufficient merely to smear the Ointment on the affected parts, but it must be well rubbed in for some considerable time two or three times a day, that it may be taken into the system, whence it will remove only hidden sore or wound as effectually as, though it were palpable to the eye. Bread and water poultices, after the rubbing in of the Ointment, will do great service. This is the only proper treatment for females in cases of cancer in the stomach, or for those who suffer from a general bearing down.

Piles, Fistulas, Strictures.

Blotches, as also swellings, can with certainty be radically cured if the Ointment be used freely, and the Pills be taken night and morning as recommended in the printed instructions. When treated in any other way these complaints only dry up in one place to break out in another; whereas this Ointment will remove the humor from the system, and leave the patient vigorous and healthy being. It will require time, aided by the use of the Pills, to ensure a lasting cure.

Diptheria, Bronchitis, Sore Throats,

Any of the above class of diseases may be cured by well rubbing the Ointment three times a day upon the skin covering the throat, chest, and neck of the patient. The unguent will soon penetrate the pores and give immediate relief. To allay the fever and lessen the inflamation, eight or ten Pills should be taken night and morning. The Ointment will produce perspiration, which is so essential for removing fevers, sore throats, and those oppressions of the chest which arise from Asthma, Bronchitis, and other causes.

Both the Ointment and Pills should be used in the following Cases:

Bad Legs	Corns (Corns)	Rheumatism
Bad Breasts	Cancers	Scalds
Burns	Contracted and Stiff Joints	Sore Nipples
Bunions	Elephantiasis	Sore Throat
Bite of Moschetoes and Sand-Flies	Fistulas	Skin diseas
coco-bay	Gout	Scurvy
Chiego-foot	Glandular Swellings	Sore heads
	Lumbago.	Tumors
Chilblains	Piles	Ulcers
Chapped Hands		Wounds
		Yaws

Sold at the Establishment of PROFESSOR HOLLOWAY 244, Strand, (near Temple Bar), London; also by all respectable Druggists and Dealers in Medicines throughout the civilized world, at the following prices 1s. 1½d 2. 9d. 4s 6d., 11s., 22., and 33s., each Pot.

*** There is a considerable saving by taking the larger sizes.

N.B.—Directions for the guidance of Patients in every disorder are affixed to each Pot.

THE ONE THING WANTED.

HOLLOWAY'S PILLS.

The Blood.

These famous pills are so composed that they operate wholesomely on the stomach, the liver, the bowels, and other organs; by correcting any derangements in their functions, whereby a steady supply of pure materials for the renewal of the Blood is furnished, and a constant abstraction of effete products is effected. This perfect circulation thus becomes the very fountain of health and life, and overcomes all form of disease wherever its situation.

Genera Disorders of the Liver and Stomach.

All who ever indulge at table, either in eating or drinking, should take about ten of these famous pills at bed time, from which will result a clear head and good stomach the following morning. Thousands of Ladies are always complaining of sick headaches, want of appetite, want of energy, and want of strength, to correct all these evils, three or four of these Pills should be taken twice a week, when they would give the invalid the health and appetite of a ploughman.

Females of all Ages and Classes

Obstructions of any kind, either in young or those between forty and fifty—the most critical period of life—may be radically removed by using these Pills according to the printed directions which accompany each box. Young persons with sickly and sallow complexions may have the bloom of health restored by this corrective, which purifies the blood and expels all gross and impure humors from the system. Beware then of the critical age from forty to fifty, as it sends many thousands to premature grave,—these Pills should be taken at that period of life two or three times a week.

Want of Strength and Energy.

Persons of sedentary habits, or those troubled in mind, working in Factories or Coal Pits, who cannot obtain that amount of fresh air and exercise which nature requires, suffer from weakness and delility, lowness of spirits and want of appetite. All such should take a dose or two of these Pills every three or four days, as they act gently and effectually on the system and impart vigor and energy to the body, which is always followed by a good appetite, sound and refreshing sleep, and a high flow of spirits.

For the Cure of Dropsy.

The efficacy of Holloway's Pills in Dropsy is extraordinary. They act with such a peculiar effect upon the system, that the fluids causing this direful complaint, are perceptibly carried off and prevented from any further accumulation. The sufferer regains a buoyancy of spirits and rejoices in a completely renovated constitution. It is indispensably necessary that the Ointment should be most effectually rubbed into the complaining parts during the whole course of treatment.

Children and their Ailments.

In no country in the world are more children carried to an early grave than in Great Britain. Coughs, Measles, Scarlatina, Fevers, and other diseases attack the little sufferers, and death, but too often, follows at a rapid pace; yet if, at the first stage of these complaints, parents were to have recourse to Holloway's Pills, all danger would be avoided; for the stomach and bowels would be gently but effectually cleansed by this mild aperient; the depraved humors corrected and the secretions duly regulated. A perfect cure would soon be effected, and the little patient restored to sound health.

Holloway' Pills are the best known remedy in the world for the following diseases:

Sold at the Establishment of Professor Holloway, 244, Strand, (near Temple Bar,) London; also by all respectable Druggists and Dealers in Medicines throughout the civilized world, at the following prices—1s. 1½., 2. 9d., 4s. 6d., 11s., 22s., and 33s. each box.
