Miscellaneous.
THE ABYSSINIAN CAPTIVES.—The following letter has been received from the Emperor of Abyssinia by Dr. Beke. It was brought by Mr. Martin Flad, one of the missionaries so long detained in that country, who has just arrived in England with despatches for her Majesty's Government. Mr. Flad, who is the Emperor's camp at Zage, on the south-western edge of Lake Tsana, on the 20th April last, at which place Mrs. Flad and her three children, Consul Cameron and the remaining captives, together with Mr. Rassam and his suit, are detained until Mr. Flad's return:—

In the name of the Father, and of the Son, and of the Holy Ghost, one God, the King of kings, Theodoros, may this reach the Englishman, Charles Theodore Beke. Thou and thy wife, by the power of God, have reached my country. Are you well? I, God be praised! am well. What time you come, come by Matamma. As regards the persons who were imprisoned by the power of God, out of friendship to the Queen of England, I have liberated them and given them to Mr. Houtum Rassam. May this give you pleasure. Written at Zage, in the 7398th year since the creation of the world, and the 1858th year since the birth of Christ.

To this letter is affixed the emperor's seal, bearing the device of 'the Lion of the tribe of Judah,' with the title, 'the King of kings, Theodoros of Ethiopia,' in Ethiopic and in Arabic characters.

The Portland Press says that one of the dispatches, after the fire, spoke of everything having burnt at a white heat so that there were no blackened walls, and said that "the tints among the ruins are a study for an artist." Very naturally this was printed "tents among the ruins," whereupon Harper's Illustrated Weekly came out on July 28th with a picturesque view of "tents among the ruins," which the citizens of Portland have vainly sought to locate. There are the tall chimneys and fire-stories walls, with large trees, showing it to be in the heart of the city, and nine or ten large tents, with families clustered about their doors in picturesque attitudes, women washing and men smoking their pipes, all drawn by the magic pencil of their special artist, Mr. Stanley Fox, from the unfortunate "tints" of the reporter, which got changed into tents.

Why does the sun rise? Because it is in the (y)east.

Why does it set? To hatch another day.

FACTS vs. THEORIES.

"Give me a place to rest my lever on," says Archimedes, "and I will move the world." "Give me pure and unadulterated drugs," says Medicus, of the olden time, "and I will cure disease."

In one sense, both of these learned pundits were the wisest charlatans. They knew there was no place to rest their lever on, either to move the world or cure disease. Mechanism was in a backward state, and the medical profession was but another name for sorcery, and all the adjuncts of magic filters and charms of the "evil eye," &c.

But these latter days have borne unto us something more than even superstition and its crew ever dreamt of in their maddest philosophy. In these days of practical science, what was theory of yesterday is fact to-day, and all the old time notions become as bubbles in the sun, and burst and break with every breath we draw.

Let Archimedes shoulder his lever and we will find a resting place for it to move the world. Let mine ancient Medicius pant and toil no more for the drugs he so sorely needs, for we have them at our hand, ever ready to serve them at his beck.

Refined in the laboratory of Dr. Maggell, the finest materials known in the medical profession are obtainable by any one. His Billious, Dyspeptic, and Diarrhoea Pills stand unrivalled, and his Salve operates with magical effect upon burns, scalds, and all sores and ulcers of the skin.

In fact, we think MAGGELL'S Pills and Salve are the wonder of this century, and we are happy in the thought that many others of our brethren of the craft agree with us. We would earnestly counsel that all families provide themselves with Dr. Maggell's Preparations at once, and keep them ready at hand, so as to use them at the most opportune time and as occasion serves.—*Valley Sentinel.*

Miscellaneous.

Relief for the Afflicted.

THE INTRODUCTION OF

Perry Davis'

Vegetable Pain Killer

To the Suffering Humanity of this Age has relieved more pain, and caused more real joy than any other one thing that can be named.

IT IS AN

Invaluable Remedy.

Our first Physicians use it, and recommend its use; the Apothecary finds it first among the medicines called for, and the wholesale Druggist considers it a leading article of his trade. All the dealers in medicine speak alike in its favor; and its reputation as a medicine of great merit and virtue is fully and permanently established, and it is the great

Family Medicine of the Age.

Every Volunteer should have a bottle, in case of sudden attacks of Disease.

Taken Internally, cures

Sudden Colds, Coughs, &c.,
Weak Stomach,
General Debility,
Nursing Sore Mouth, Canker,
Liver Complaint,
Dyspepsia or Indigestion,
Cramp and pain in the Stomach,
Bowel Complaint,
Painful Colic,
Asiatic Cholera,
Diarrhoea and Dysentery.

Taken externally cures

Felons, Boils, and Old Sores,
Severe Burns and Scalds,
Cuts, Bruises and Sprains,
Swelling of the Joints,
Ringworm and Tetter,
Broken Breasts,
Frosted Feet and Chilblains,
Toothache,
Pain in the Face,
Neuralgia and Rheumatism.

PAIN KILLER.

Taken internally, should be adulterated with milk or water, and sweetened with sugar, if desired, or made into a syrup with molasses. For a COUGH and Bronchitis, a few drops on Sugar, eaten, will be more effective than anything else. For SORE THROAT, gargle the throat with a mixture of Pain Killer and water, and the relief is immediate and cure positive.

It should not be forgotten that the Pain Killer is equally as good to take internally as to use externally. Each bottle is wrapped with all directions for its use.

Prices 25 cents, 50 cents & \$1 per bottle

AYER'S

CHERRY PECTORAL,

FOR THE RAPID CURE OF
Colds, Coughs, and
Hoarseness.

BRIGHTFIELD, MASS., 20th Dec., 1855.
DR. J. C. AYER: I do not hesitate to say the best remedy I have ever found for Coughs, Hoarseness, Influenza, and the concomitant symptoms of a Cold, is your CHERRY PECTORAL. Its constant use in my practice and my family for the last ten years has shown it to possess superior virtues for the treatment of these complaints. EMBEN KNIGHT, M.D.

A. B. MORTLEY, Esq., of Utica, N. Y., writes: "I have used your PECTORAL myself and in my family ever since you invented it, and believe it the best medicine for its purpose ever put out. With a bad cold I should sooner pay twenty-five dollars for a bottle than do without it, or take any other remedy."

Croup, Whooping Cough, Influenza.
BRIGHTFIELD, MASS., Feb. 7, 1856.
BROTHER AYER: I will cheerfully certify your PECTORAL is the best remedy we possess for the cure of Whooping Cough, Croup, and the chest diseases of children. We of your fraternity in the South appreciate your skill, and commend your medicine to our people. HIRSH CONKLIN, M.D.

AMOS LEE, Esq., MONTEREY, LA., writes, 24 Jan., 1856: "I had a tedious Influenza, which confined me in doors six weeks; took many medicines without relief; finally tried your PECTORAL by the advice of our clergyman. The first dose relieved the soreness in my throat and lungs; less than one half the bottle made me completely well. Your medicines are the cheapest as well as the best we can buy, and we esteem you, Doctor, and your remedies, as the poor man's friend."

Asthma or Phthisis, and Bronchitis.
WEST MANCHESTER, PA., Feb. 4, 1856.
SIR: Your CHERRY PECTORAL is performing marvellous cures in this section. It has relieved several from alarming symptoms of consumption, and is now curing a man who has labored under an affection of the lungs for the last forty years. HENRY L. PARKS, Merchant.

A. A. RAMSEY, M.D., ALBION, MONROE CO., IOWA, writes, Sept. 6, 1855: "During my practice of many years I have found nothing equal to your CHERRY PECTORAL for giving ease and relief to consumptive patients, or curing such as are curable."

We might add volumes of evidence, but the most convincing proof of the virtues of this remedy is found in its effects upon trial.

Consumption.

Probably no one remedy has ever been known which cured so many and such dangerous cases as this. Some no human aid can reach; but even to those the CHERRY PECTORAL affords relief and comfort.

ASTOR HOUSE, NEW YORK CITY, March 5, 1856.
DOCTOR AYER, LOWELL: I feel it a duty and a pleasure to inform you what your CHERRY PECTORAL has done for my wife. She had been five months laboring under the dangerous symptoms of Consumption, from which no aid we could procure gave her much relief. She was steadily failing, until Dr. Strong, of this city, where she came for advice, recommended a trial of your medicine. We bless his kindness, as we do your skill, for she has recovered from that day. She is not yet as strong as she used to be, but is free from her cough, and calls herself well. Yours with gratitude and regard, ORLANDO SHELLEY, OF SHELLEYVILLE.

Consumptives, do not despair till you have tried AYER'S CHERRY PECTORAL. It is made by one of the best medical chemists in the world, and its cures all around us bespeak the high merits of its virtues.—*Philadelphia Ledger.*

Ayer's Cathartic Pills.

THE sciences of Chemistry and Medicine have been leaving their utmost to induce the best, most perfect purgative which is known to man. Innumerable proofs are shown that these Pills have virtues which surpass in excellence the ordinary medicines, and that they win unprecedentedly upon the esteem of all men. They are safe and pleasant to take, but powerful to cure. Their penetrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel disease. They purge out the foul humors which breed and grow distemper, stimulate sluggish or disordered organs into their natural action, and impart healthy tone with strength to the whole system. Not only do they cure the every-day complaints of every body, but also formidable and dangerous diseases that have baffled the best of human skill. While they produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children. Being sugar-coated, they are pleasant to take; and being purely vegetable, are free from any risk of harm. Cures have been made which surpass belief were they not substantiated by men of such exalted position and character as to forbid the suspicion of untruth. Many eminent clergymen and physicians have lent their names to certify to the public the reliability of my remedies, while others have sent me the assurance of their conviction that my Preparations contribute immensely to the relief of my afflicted, suffering fellow-men.

The Agent below named is pleased to furnish gratis my American Almanac, containing directions for their use and certificates of their cures, of the following complaints:—Costiveness, Bilious Complaints, Rheumatism, Dropsy, Heartburn, Headache arising from a full Stomach, Nausea, Indigestion, Morbid Inaction of the Bowels and Pain arising therefrom, Flatulency, Loss of Appetite, all Ulcerous and Cutaneous Diseases which require an evacuant Medicine, Scrofula or King's Evil. They also, by purifying the blood and stimulating the system, cure many complaints which it would not be supposed they could reach, such as Deafness, Partial Blindness, Neuralgia and Nervous Irritability, Derangements of the Liver and Kidneys, Gout, and other kindred complaints arising from a low state of the body or obstruction of its functions.

Do not be put off by unprincipled dealers with some other pill they make more profit on. Ask for AYER'S PILLS, and take nothing else. No other they can give you compares with this in its intrinsic value or curative powers. The sick want the best aid there is for them, and they should have it.

Prepared by DR. J. C. AYER,

Practical and Analytical Chemist, Lowell, Mass.

The Coal Question.

A correspondent in another part of today's paper takes exception to some remarks made by us recently on the waste attending non-caking coal, asserting that "slack" can be and is used with as much profit as coal. We do not doubt the gentleman's experience in the mines of South Staffordshire, to which we particularly alluded, but no later than the present year this very question came up in the House of Commons for discussion, and in this body as well as in the various periodicals of England, the general conclusion was that an enormous loss in non-caking coal was entailed every year in England because its slack could only be used in particular cases and by an additional outlay. On this subject we have the following remarks from an eminent scientific writer in the *London Quarterly*. "If the coal will not cake, then the whole at least of the fine slack may be utterly wasted. It may, it is true, be manufactured into coke, after having been ultimately mixed either with pitch, whether from wood or coal, or with a proportion of caking coal; but an additional process like this increases the cost of manufacture, and, except in special cases, cannot be conducted with profit: so long as coal slack is largely obtained, which needs no such preliminary treatment. Or, it may be consumed in furnaces specially constructed for the purpose; but manufacturers will not generally be induced to accept innovations of this kind while they can command an adequate supply of coal at remunerative prices, in a form adapted to furnaces in actual operation. It is certain that many millions of tons of coal slack are annually wasted, being for the most part left in the pits. It is a grievous national loss, and the time may come when owing to the scarcity of coal, and its consequent advance in price, this slack, now regarded as worthless, will be sought out and applied with advantage." Such are the ideas entertained on the question by scientific men in England, and we see somewhat similar views put forward by practical colliers in letters to the *London Times*. In one letter the writer says:—"In order to utilize the slack, the furnaces of steam-engines and manufactories should be constructed so as to burn in steam-engines of all kinds 'through-and-through' coal, and in smelting furnaces, small. If furnaces can be constructed that will smelt copper with small coal, which produces such intense heat, why not construct the same class of fire places for steam engines? I have no hesitation in asserting that fully one-half the coal comes down through the fire bars of the steamers without having been burnt and done its duty"—and so on. We do not wish to depreciate the character of our own coal, because so far it has been found to be non-caking; we merely desire to place all the facts in connection with coal before our readers. It is enough for us to know that whatever may be the defects in the coal produced on the Island, they are small when compared to the defects of other coal raised along the coast. The Nanaimo coal is without dispute better than any bituminous coal on the Pacific; but it is possible to find much better and assert even a wider pre-eminence. If our correspondent has discovered or knows of the existence of a caking coal on the Island he places us in a position still higher than we have hitherto occupied. It is, however, with this natural resource as with others. There is no hope of its development so long as we are met by duties in our only market. Let but our relations with the United States be changed so that the products of the Island can enter Californian ports duty free, and, as we have repeatedly observed, no country on the Pacific will be more prosperous than Vancouver Island. Without this time, energy, and money of the inhabitants are merely thrown away.

A PANTHER SHOT.—A few days ago Mr. George Askey, of Oyster Bay, Chemainus, shot a very large panther, while in the act of depredating his piggy. The monster measured nine feet from tip to tip.

An Appeal to the Citizens of

Victoria, V. I.

THE CONGREGATION EMANUEL OF

Victoria, V. I., in meeting assembled, this day, Saturday, Sept. 22d, 1866,

Resolved, That the aid of our Fellow Citizens of all Denominations be solicited through the following authorized and duly appointed Committee. And that such Committee endeavor, by every means in their power, to raise funds whereby part of the debt or mortgage on the Israelitish Synagogue may be cancelled. Knowing the liberal views and generosity of the citizens of Victoria, the congregation has not the slightest doubt (making due allowance for the dullness of the season) that their appeal will meet with that response which the exigency of the case requires.

Ayer's Pills

Are particularly adapted to derangements of the digestive apparatus, and diseases arising from impurity of the blood. A large part of all the complaints that afflict mankind originate in the bowels, and consequently these PILLS are found to cure many varieties of disease.

Subjoined are the statements from some eminent physicians, of their effects in their practice.

AS A FAMILY PHYSIC.

From Dr. E. W. Cartwright, of New Orleans.

"Your PILLS are the prince of purges. Their excellent qualities surpass any cathartic we possess. They are mild, but very certain and effectual in their action on the bowels, which makes them invaluable to us in the daily treatment of disease."

FOR JAUNDICE AND ALL LIVER COMPLAINTS.

From Dr. Theodore Bell, of New York City.

"Not only are your PILLS admirably adapted to their purpose as an aperient, but I find their beneficial effects upon the Liver very marked indeed. They have in my practice proved more effectual for the cure of bilious complaints than any one remedy I can mention. I sincerely rejoice that we have at length a purgative which is worthy the confidence of the profession and the people."

DYSPEPSIA—INDIGESTION.

From Dr. Henry J. Knox, of St. Louis.

"The PILLS you were kind enough to send me have been all used in my practice, and have satisfied me that they are truly an extraordinary medicine. So peculiarly are they adapted to the diseases of the human system, that they seem to work upon them alone. I have cured some cases of dyspepsia and indigestion with them, which had resisted the other remedies we commonly use. Indeed I have experimentally found them to be effectual in almost all the complaints for which you recommend them."

DYSENTERY—DIARRHOEA—RELAX.

From Dr. J. G. Green, of Chicago.

"Your PILLS have had a long trial in my practice, and I hold them in esteem as one of the best aperients I have ever found. Their alternative effect upon the Liver makes them an excellent remedy, when given in small doses, for bilious dysentery and diarrhoea. Their sugar-coating makes them very acceptable and convenient for the use of women and children."

INTERNAL OBSTRUCTION—WORMS—SUPPRESSION.

From Mrs. E. Stuart, who practices as a Physician and Midwife.

"I find one or two large doses of your PILLS, taken at the proper time, are excellent promoters of the natural secretion when wholly or partially suppressed, and also very effectual to cleanse the stomach and expel worms. They are so much the best physic we have that I recommend no other to my patients."

CONSTIPATION—CONSTIVENESS.

From Dr. J. P. Vaughn, Montreal, Canada.

"Too much cannot be said of your PILLS for the cure of constiveness. If others of our fraternity have found them as efficacious as I have, they should join me in proclaiming it for the benefit of the multitudes who suffer from that complaint, which, although bad enough in itself, is the progenitor of others that are worse. I believe constiveness to originate in the liver, but your PILLS affect that organ and cure the disease."

IMPURITIES OF THE BLOOD—SCROFULA—ERY-

SIPSELA—SALT RHEUM—TETTER—TUMORS

—RHEUMATISM—GOUT—NEURALGIA.

From Dr. Ezekiel Hall, Philadelphia.

"You were right, Doctor, in saying that your PILLS purify the blood. I have used them for a long time, and they have cured me of every ailment. I place great dependence on an effectual cathartic in my daily contest with disease, and believing as I do that your PILLS afford us the best we have, I of course value them highly."

Most of the Pills in market contain Mercury, which, although a valuable remedy in skilful hands, is dangerous in a public pill, from the dreadful consequences that frequently follow its incautious use. These contain no mercury or mineral substance whatever.

FOR HEADACHE—SICK HEADACHE—FOUL STOMACH—PILES—DROPSY—PLETHORA—PARALYSIS—FITS—&c.

From Dr. Edward Boyd, Baltimore.

"DEAR DR. AYER: I cannot answer you what complaints I have cured with your PILLS better than to say all that we can with a pen. I have used them for a long time, and they have cured me of every ailment. I place great dependence on an effectual cathartic in my daily contest with disease, and believing as I do that your PILLS afford us the best we have, I of course value them highly."

se 26

Ayer's Cherry Pectoral

Has long been manufactured by a practical chemist, and every ounce of it under his own eye, with invariable accuracy and care. It is used and proved by law from counterfeits, and consequently can be relied on as genuine, without adulteration. It supplies the surest remedy the world has ever known for the cure of all pulmonary complaints; for COUGHS, COLDS, HOARSENESS, ASTHMA, CROUP, Whooping Cough, Bronchitis, Inflammatory Consumption, and for the relief of consumptive patients in advanced stages of the disease. As time makes these facts wider and better known, this medicine has gradually become the best reliance of the afflicted, from the log cabin of the American peasant to the palaces of European kings. Throughout this untiring country, in every state and city, and indeed almost every hamlet, it contains, CURET PECTORAL is known as the best of all remedies for diseases of the throat and lungs. In many foreign countries it is extensively used by their most intelligent physicians. If there is any dependence on what men of every station certify it has done for them; if we can trust our own senses when we see the dangerous affections of the lungs yield to it; if we can depend on the assurance of intelligent physicians, whose business it is to know; in short, if there is any reliance upon anything, then is it irrefragably proven that this medicine does cure the class of diseases it is designed for, beyond any and all other remedies known to mankind. Nothing but its intrinsic virtues, and the unmistakable benefit conferred on thousands of sufferers, could originate and maintain the reputation it enjoys. While many inferior remedies have been thrust upon the community, have failed, and been discarded, this has gained friends by every trial, conferred benefit on the afflicted they can never forget, and produced cures too numerous and remarkable to be forgotten.

Salem flour, 200 qr scks, Magnolia flour, 200 qr scks; E, 80 pgs; Wilson & Murray, 2 boxes.

THE PRUSSIAN NEEDLE GUN.—The first terror inspired by the needle gun is becoming more subdued. A correspondent of the London Times, writing from Vienna, says: "According to the surgeons, the wounds inflicted by them are, in general, slight. In fact, the medical men employed in the Vienna hospitals say that the great majority of their patients will soon be fit for active service again, as most of the wounds are mere flesh wounds." It cannot be doubted that the statement is correct, for the streets of the city and of the villages in the environs are now full of soldiers who have one of their arms in a sling. An Italian veteran, who has had three wounds, told me that he would rather have half a dozen Prussian 'pellets' in his body than one French conical bullet. The Vienna Medical Gazette informs the public that of the 12,000 wounded men brought to Vienna, not five per cent are so severely hurt as to be in danger of losing their lives.

A LUCKY CIRCUMSTANCE.—It is stated that so great is the interest of Mr. Daniel Gurney (of the late firm of Overend, Gurney & Co.) in the Atlantic Telegraph Company that, now as the cable is successfully laid by the Great Eastern, his fortune will be so far recovered that he can not only pay whatever calls may be made upon him as a contributor to the failed firm, but also have sufficient capital to enable him to join any new discount establishment that may be started as its successor.

MECHANICS' INSTITUTE.—A theatrical entertainment in aid of the funds of this institution will be given in about two weeks, in the theatre. The Amateur Dramatic Association have generously volunteered their services, and will be assisted by Miss Jenny Arnot, the stage management being in the hands of Mr. R. G. Marsh. Members of the Institute will also perform. The proposed benefit to Mr. Marsh has been postponed till after that to the Institute.

REPAIRS TO GOVERNMENT HOUSE.—Owing to the defective construction of the original "Castle Cary," by which the rain and damp of winter penetrated the roof and walls of the building, destroying the plaster and rendering the dwelling uncomfortable, Governor Kennedy has, we understand, given orders for the necessary repairs to be effected, comprising a new roof on the old structure, with other minor improvements. These repairs have been contemplated for some time.

POLICE COURT.—The three young seamen who had absented themselves without leave from the ship Royal Tar were brought up in the Police Court to-day, and remanded till asked for by the captain. The magistrate cautioned the men to obey orders on board ship, and if they were ill-treated to apply to the proper authorities when they arrived home.

FOR AUSTRALIA.—The ship John Jay arrived off the harbor last evening, and was driven off by a gale. She is laden with 414 M Burrard Inlet lumber for Sydney. The bark Jeddo sailed from the Roads to-day, for Adelaide, with 246 M lumber, also from Burrard Inlet. Both vessels loaded at Moody & Co.'s mills.

INDIANS AT SOOKE.—A grand "patlatch" is now being held at Sooke, several hundred Indians being present. Superintendent Hankin and officer Tennet went down last night to look after them and returned to day, reporting no greater disturbance than is usual on such occasions.

TO LONDON AND BACK IN FIVE DAYS!—The captain of the ship Belmont telegraphed to London last week, in regard to the disaster to his ship, and had an answer back within five days from the time his message left Victoria. Vise the Atlantic Cable!

THE SALMON OUTRAGE.—The unfortunate woman Fredrison, who was attacked by the ruffian Williams, is still insensible and delirious; she will, it is thought, recover, but will probably be maimed for life.

THE ROYAL TAR will be towed over to Utnahy to-morrow, by the Sir James Douglas.

GOVERNMENT HOUSE.—A private ball will be given at Government House to-night.

UNTRUE.—We are requested by members of the Fire Department to correct the misstatement in the Chronicle of this morning in reference to the expenses of the Department. Instead of \$100 a month as mentioned by the Chronicle the outlay at the lowest computation reaches \$144; and this does not provide for water, fuel, light, oil, or any of the numerous petty expenses and contingencies.

PUBLIC MEETING.—A Public Meeting will be held in the Theatre to-morrow (Saturday) evening, at Half-past Seven o'clock, to take into consideration the condition of the Colony. All persons interested in the progress of the country are expected to attend.

THE NAME OF THE AMERICAN IRON-CLAD. Miantonomah, is a puzzle to many. What does it mean? It is the name of a famous Indian chief in Cooper's novel of "The Wept of Wish-ton Wish."

GOV. SEYMOUR.—It is reported that Mr. Birch has received a telegram to the effect that Governor Seymour sailed from Southampton on the 17th inst., for these colonies.

FRENCH MILLINERY.—The millinery department at London House is now under the management of a lady who arrived by last steamer from Paris. —J. H. TURNER & Co.

FIREMEN'S LECTURE.—The nett proceeds of the lecture on Wednesday night, deducting expenses, were \$100.

TELEGRAPHIC.

Europe.

NEW YORK, Sept. 21.—By the Java we learn that a great deal of rain continued to fall in England, and outstanding crops were sustaining considerable damage. A French agricultural journal sums up as follows: "The latest accounts of the harvest in France show that there is neither the ordinary quantity nor quality of wheat, and but for free importation a scarcity would succeed the abundance of the past three years. England also is beginning to complain not only of the quantity but of the quality. Russia has had an excellent wheat harvest, and so has Spain. Italy does not seem to be much more fortunate than France. The locusts have ravaged Algiers. As to the United States the deficit is still greater than in France. Northern Germany appears to be divided. The Southern provinces of Hungary have suffered much."

LIVERPOOL, Sept. 8.—Wheat, winter red and southern, 10s. 6d. to 11s. 3d. Indian corn, 27s. for mixed American, and 27s. 3d. for yellow. Lard, 60s. per cwt. for American.

Paraguay.

CHICAGO, Sept. 22.—A Buenos Ayres paper in one of its late numbers, says a diplomatic conflict was imminent between Mr. Washburn, the American Ambassador to Paraguay, and the Argentine Government. It seems that Mr. Washburn has again returned to Buenos Ayres from Corrientes, having been denied permission to pass into Paraguay. The same paper says he insists upon going, threatening to force his passage up with the American vessel now in those waters.

Salt Lake.

The failure of Klopstock & Harris, tobacco and fancy goods merchants at Virginia City and Salt Lake, is announced, with liabilities reported at \$60,000 or \$70,000, most of which falls upon San Francisco merchants, principally tobaccoists.

California.

The residence of the late Russian consul on Harrison street, was burned last evening.

A telegram from Santa Clara last evening says the Santa Cruz stage capsized at the first bridge this side of Lexington; four ladies and six gentlemen passengers were all more or less injured. One man is supposed to be mortally injured; one lady had her eye torn out; another had her knees badly injured, and three had broken legs.

A meeting of the stockholders of the California Steam Navigation Company was held on Saturday, when the proposition to increase the capital stock to \$5,000,000 was voted down. The Company, however, decided to reduce the par value of their shares to \$100 each from 150—their present par value. The stock of \$2,500,000 remaining as at present.

A respectably dressed man, name unknown, jumped off Pacific street wharf to-day. A bystander took a skiff and sculled to the drowning man, reaching him just as he was sinking beneath the waters. He not only made no effort to help himself, but resisted the friendly aid that was offered him, and it was not until a second boat had put off to his assistance, and after a furious attempt to bite his rescuers that he was dragged into the skiff. As the man was apparently sober it is supposed that insanity was the cause of this rash act.

Codfishing.

The schooner Flying Dart, Captain Howes, arrived last evening in 38 days from the fishing grounds in Ochotsk Sea. She brings a full cargo of codfish, some 25,000 well dried (about 80 tons) merchantable fish, and is the first vessel from the fleet that left this port for the Asiatic coast last spring. Capt. Howes reports speaking or hearing of every vessel of the fleet from this port, with the exception of the schooner Pride of the West, which sailed about the 1st of April, and has not been heard from since.

Non-Caking Coal.

EDITOR OF THE EVENING TELEGRAPH.—SIR:—In the article upon coal in your issue of Sunday last I find a statement which needs correction: it reads thus: "The next description of coal is that found in South Staffordshire and the Mid and Counties of England and Scotland. This coal contains a large proportion of oxygen, but contains more carbon than lignite. It is, however, unprofitable fuel, as the slack, which must of necessity abound in the production of all coal is wasted. The coal does not cake, in other words, the small pieces of coal do not combine together and generate heat—if coal will cake, all the slack may be utilized by converting it into coke! If it does not an immense quantity of coal is wasted, and as a pound of slack is capable of producing as much heat as a pound of the same coal in lumps, it naturally follows that a seam of this description of coal requires many facilities and advantages over the caking coal to make it pay." Now sir, this statement so far as South Staffordshire and Midland Counties of England is concerned is incorrect; the slack being entirely used, and no part of the coal being wasted—in fact, the slack is now so eagerly sought after that there is more difficulty in obtaining it than the large coal. I am not quite sure that there is so great an advantage in the "caking" coal as you would wish your readers to believe; what is the use to which it can be applied that the slack of South Staffordshire cannot be applied also, and with equal advantage. I know that the slack is now being converted into coke for smelting iron ore. It is also used for heating and puddling furnaces, for glass houses, burning bricks, lime land, and has always been the only article in use in the district for generating steam for steam engines, &c., &c.; and no part of it is wasted more than is wasted in the working of the "caking" coal. Where then is the advantage of the latter over the former? The importance of developing our coal fields you do not, however, over estimate. Some of our coals may not be equal to the English or Pennsylvania coals but ask our ironfounders here if they would not as soon work with our Queen Charlotte Island anthracite as they would with any other they can obtain here; then although our bituminous coal may not be the best in the world, it is unquestionably the best of the kind found on the Pacific coast and although our Nanaimo coal is not "caking," yet I know that such a coal does exist here, having shown specimens of it to a gentleman in this city; but even the "slack" of the Nanaimo coals may be utilized; but we may not have smelting, heating or puddling furnaces, but there are still many other ways in which it may be used with equal advantage, and the same may be said with regard to the many other seams of coal known to exist upon the Island none of which, as far as our knowledge of them extends at present, are inferior in quality to the Nanaimo coal, and there is no doubt but those parties who have sufficient capital and energy to prosecute the working of our undeveloped coal mines, will in a few years be considered as the most "lucky" men of the day.

I am, Sir,
One who revelled for more than 30 years in the mines and smoke of South Staffordshire.

Atlantic Telegrams.

A Boston daily recently issued a series of 'Atlantic Cable Messages,' 'in advance of any other paper in the country.' We think they are so much in advance that we will quote a couple of them for the amusement of our readers. The first is from P. T. Barnum:

MESSAGE TO BE DELIVERED 'IN TRANSIT.'
'Mermaids and other odd fish observing this message pass are informed the undersigned is open to overtures for engagements at his American Museum; as an inducement, he would state that the establishment is conducted on cold water principles, and he is actuated by no self-fish motives in making this proposition.'

The second is dated Paris, August 2nd, 1866:

ARTEMAS WARD,

To his American Business Manager:
'This world is ori a floatin sho. Among the principal Shos hear, Prushy has the best Sho at present. The principal curiosity in her Sho being the needle gun. Have jest konkluded an arrangement with Lewis Napoleon for a side Sho of Wacks works and snax, near the entrance to the grate exhibishun—terms private between me and Lewis. Admission 1 frank French money, or fifteen cents American currency. Ou klosin the kontrakt the M. P. ror remarked, 'You and me hez dun a good day's work, Artemas.' A. W.'

Special Notices.

MR. ZINN begs to announce to the inhabitants of Victoria that he has lately received a large assortment of Children's Carriages and Chairs, Fishing Baskets and Fishing Canes, and a large quantity of Market and Traveling Baskets, China Vases, Fancy Goods and Toys, all of which have to be sold on or before February next at greatly reduced prices. Goods sold at wholesale for cost prices.

REMOVAL.—Messrs. Solomon Bros. have removed to the two-story brick building on Government street, opposite the St. Nicholas Hotel. They have received, ex ship Mohawk, from London, a fine assortment of men's clothing and underclothing, which they will sell lower than any house in town. Give them a call.

ALEXANDRE'S GLOVES.—Messrs. J. H. Turner & Co., London House, have received to-day, by Express from Paris, a full assortment of Alexandre's famous kid gloves, for which they are the sole agents in Vancouver Island and British Columbia.

HOLLOWAY'S PILLS.—Dysentery and Bowel Complaints.—These maladies are ever present, and if left untended frequently terminate fatally. It should be every where known that both cholera and diarrhoea depend on the presence of some undigested substance in the stomach or bowels, or some deleterious matter in the blood, and that Holloway's Pills can expel either with ease and expedition. They concentrate in a surprising degree purifying, alternative, regulating and strengthening qualities, and thus exert over every internal organ the wholesomely controlling influence so necessary to a healthy and vigorous action in the human frame. Holloway's medicine may be advantageously taken as a means of keeping the blood pure and the body cool—the only practicable plan of maintaining health in youth, manhood, and old age.
