Total tons	322	15,301

New Year's Service

A New Year's Eve service was held in St. George's church by the Rev. John Cleland, which was fairly well attended. The office, which was musical, was the Eucharist, set by Adams. The rector preached appropriately, finishing his sermon before midnight. Just before 12 o'clock the Benedictus was sung as a solo by Miss W. Crowley, the Gloria in Excelsis being sung shortly after twelve.

The New Year Curlers

From an early hour yesterday forenoon until two o'clock this morning the curlers had it all their own way in the rink. Curling was the feature of the day. There was a match of ten rinks a side ranged under the Vice-President's and Presidents standards and victory, hovering awhile, settled upon the former, winning by 12 points.

The Oxygen Remedy

Dr. Kenning has procured for cases of emergency a machine for administering oxygen to pneumonia patients. The treatment is the same as that which was used successfully with the novelist Kipling, and is the latest and best that is known. Luckily, however, there have been but few cases in the city of late, and there has been no occasion for its use. The plant is not a large one but contains forty gallons of compressed oxygen.

IS GOLD SPATTERED

Mill Shipments From the Lucky Jack Run Rich.

Fifteen tons very rich quartz from the Lucky Jack, at Poplar is enroute to the Oyster mill for treatment; the values from this ore will be enormous, as gold can be seen freely spattered in all the quartz sacked for treatment.

Begin your New Year right and buy your goods from Agnew & Co.

Camborne Mines

There is every reason to believe that this month's clean-up at the Eva and Oyster mills will be a record breaker.

A Gold Brick

The Eva people have already taken out a gold brick valued at $5000 as a result of the first 13 days work of this month.

Dancing lessons Tuesday evening from 7:30 to 9 o'clock followed by a social. MacKinnon-Schorlemmer Dancing Academy.

P. O. Box 302 Rossland B

THE NEW YEAR.

Rossland is beginning the Near Year with prospects of being yet more firmly established in its position of being the premier mining camp of the Kootenays. The year just past has demonstrated its almost inexhaustible capabilities. It remains for this year to make these prospects a reality. And this can be done by a hearty co operation of one and all, of class with class, of mineowner with miner, of professional man with business man, of all with each. It is to the interest of the general public to see that the mines get fair treatment. The mines are the reason of Rossland, not Rossland the reason of the mines. The mines want certain things. Let Rossland unite to secure these to them, just so long as the things desired do not hurt the commonweal, and thus in the long run hurt the mines themselves. This can be done, not by bickering and class jealousy, but by men standing sturdily shoulder to shoulder, not watchful of differences, but eager to mark out and widen the boundaries of common ground and common sympathies The Board of Trade in working for the interests of Rossland, unafraid of offending this or the other important little person, are working in the interest of each and every individual member. A series of Mr. Much Afraid, Mr. Ready to Halt, Mr. Never Ready to Begin won't help the camp. People who are afraid of making a mistake never do anything, and measly mouthed politicians end in getting kicked by both parties, as a Soapy Jim. Pettiness and sulky remembrances of past quarrels ought to be ruled out of court. If instead we each and all help each other, Rossland will indeed have a prosperous New Year. So might it be.

THE WORLD RETURNS THANKR

It Accepts Unimpeachable Testimony as to its Veracity

For many months past citizens of the camp and outside correspondents noticing the heavy discrepancy between the shipping returns of this camp as published by the Miner and the World, have asked the reason. All that could be said in answer that the returns were first estimated, and carefully checked, that they were as far right as was possible and that the World was not responsible for other peoples' carelessness. London papers have noticed the discrepancy and have given it as an instance of the unreliability of even the most easily accessible of all mining information coming from the Kootenays. Within the last past few days our morning contemporary has telegraphed its figures which have been generally accepted. Yesterday morning it made one of its frequent, too frequent, apologies for inaccuracy and climbs down to the conservative figures given by the World.

THE YEAR IN MINING

Prospects are Brightening Daily

IMPRESSIVE PROGRESS IS MADE

General Review of the Conditions Prevailing During the Year

The strides made during the past year will mark it perhaps as the most memorable year ever in the annals of the camp. For years past, as has been well known, while the tonnage has increased the values per ton have decreased. This will prove to have been the case during the year just ended. At the same time, with one break, owing to a heavy fall in copper, the value of the camps output has year by year increased leaving only the one inference to be drawn which is that the camp has yearly received better and better rates for the ore which it has shipped making it profitable to ship ore of lower and yet lower rade. But as the tonnage increased commeasurately with this, in order to keep up a general increase of value in the aggregate a point was reached at the end of 1901 when it seemed no longer possible to ship ore of lower grade than was at that time being done. This meant that the maximum of output has been reached, a maximum which, unless other mines were discovered, would soon dwindle as greater depth was reached necessitating a heavier outlay for hoisting. But though smelting had apparently said its last say the fact that there were millions of tons of ore in the mines working on levels which had been opened up which were of lower grade than profitable smelting ore, stirred mine owners to redoubled exertions. For some years past the War Eagle company had been working on concentration as a means of dealing with this low grade ore. During 1901 a series of experiments were conducted when it became definitely known that ore below smelting grade could be profitably concentrated. That is to say siliceous ore. Ore containing iron could not be thus concentrated because the iron, being a metal would be present in the concentrates. Now many of the Rossland ores, possibly even a half, are ores which run 40 per cent and over in iron. As far as the siliceous ores were concerned, however, the first step in concentration was made by the Le Roi No. 2 which has successfully concentrated up to date over 1000 tons of low grade siliceous ore. The War Eagle is erecting a plant on similar lines at Trail, the White Bear has ordered another plant of the same process, the Elmore, and other mines are negotiating to follow the pioneers.

With regard to the ferruginous ores it may shortly be stated that a process of electro cyaniding which is being established in the neighboring camps of Republic or such mines as the Mountain Lion and Tom Thumb will also be extended to Rossland. That is to say that instead of the maximum of output having been reached a new horizon has been opened up whose limits cannot at present be

NOTICE

Take Notice—that a plaint has been entered and summons issued out of the County Court of Kootenay holden at Rossland, wherein the Nelson and Fort Sheppard Railway Company are plaintiffs and the Canadian Pacific Exploration, Limited, are defendants, and wherein the plaintiffs claim is as follows:

The plaintiffs claim from the defendants the sum of $650.00 The following are the particulars:

To 200,000 feet of mining timber sold by the plaintiffs to the defendants at 50 cents per thousand $100.
To 2,200 cords of woods at 25 cts, per cord. $550.

Total' $650,

AND FURTHER TAKE NOTICE that an order made herein on the 20th. day of December, 1903, wherein it is ordered that service of the summons, plaint and the said order be effected by publishing notice of the said summons, plaint and order for six weeks in the "World" newspaper, published in the City of Rossland, and posting to the defendants of a registered letter containing a copy of the "World" newspaper having the first publication of such advertisement, addressed to such defendants at therein registered office in London, England, shall be good and sufficient service upon the defendants of the said summons, plaint and said order.

The first publication of this advertisement is on the 30th day of December, 1903.

The Hoffman Bar has just received 300 gallons Bass Burton ale. Now on tap.

SPECIAL HOLIDAY RATES VIV SPOKANE FALLS & NORTHERN RAILWAY.

Account Christmas and New Year holiday the Spokand Falls & Northern railway will make a rate of one fare and one third for the round trip between points in British Columbia. (including Victoria and Vancouver)-

Selling dates, December 23, 24, 25, and January 1st. Final limit, January 4th.

H. P. BROWN, Agt, Rossland
H. A. JACKSON, G.P.A.
Spokane, Wn

MINOR MENTION

AT THE CHURCHES TOMORROW

St. George's Church—Rev. J. A. Cleland, rector. Second Sunday after Christmas. 8 a. m. Holy Communion; 11 a. m. Memorial Service in honour of the late Mrs Boultbee. 2:30 p.m., Sunday School; 7:30 p. m, Evensong

Church of the Sacred Heart.—Rev. M. W. McKinnon in charge. First mass 8:30 a.m.; Second mass 10:30a.m.; Sunday School,2:30 p.m. followed by Benediction of the Blessed Sacrament.

St. Andrew's Church,(Presbyterian.)—Corner First avenue and Queen street. Services 11 a. m., and 7:30 p. m. Rev. Hugh Grant of Pincher creek will officiate.

Methodist Church.—Rev. R. F. Stillman, B.A., pastor. Services 11 a.m.,and 7:30 p.m. Class meeting 12 noon, Sabbath School 2:30 p. m

Baptist Church—Rev. P. H. McEwen in charge.

Salvation Army.—7 a.m., Knee Drill; 11 a.m., junior meeting; 3 p.m., Free and Easy; 8 p.m., Salation meeting.

The Granby

The heading of No. 4 tunnel of the Granby mines is now nearly 100 feet from the portal. The blasts, when set off, shake the exper typographers of the Pioneer force a little.

The Hoffman Cafe. open all night. Short orders a specialty.

THE YEAR IN MINING

forecast. It is likely that the tonnage will before long attain the million ton mark per annum instead of having it maximum at less than half that quantity. Now as there are ten tons of ore, to speak roughty, below smelting grade to one ton above, even in the midds now developed, the horizon of the output seems to recede. When to this is added the reflection that there are tens of mines undeveloped to one that is developed, each containing ore below smelting but not below concentrating grade the maximum of output seems far off. And when, finally it is considered, that with the removal of the vexatious legislative restrictions on mining low grade ore, such as the two per cent tax and the duty on oil the cost of concentration may possibly be even cut in two it will be dimly seem that it would be indeed a bold Rosslander who would set a figure and call it the utmost output possible.

Turning to the individual mines, and beginning with the Le Roi, it may be said that the management for the past year has done much to bring the mine again on a good footing. Towards the end of 1901 the property had been badly gophered in order to clear off certain indebtedness which had been incurred owing to the lack of working capital. Discoveries at depth have placed this property on much about its old intrinsic value. There has been discovered large quantities of low grade ore suitable for concentration in all the levels, rendering any further sinking for the wining of such ore unnecessary for long time to come and converting many a book loss of the present day, losses which have been incurred by development at present barren of results, into future handsome profits. This means of course the installation of a concentrator on a large scale, and it is no secret that negotiations to this end have been in hand for several months past.

The Le Roi No. 2, including the No. 1 and Josie, as well as several other excellent properties, has gained a new lease of life by its erection of a concentrator, and while it has plenty of smelter ore has enough concentrating ore exposed by old and new developments to make the shares a handsome buy at the present price.

A lately issued report of the Centre Star mine shows that this mine contains a large amount of siliceous ore of concentrating values and already a concentrator is going up which will treat this ore and make this mine more valuable than ever intrinsically. And the remarks that are made with regard to the Centre Star will also apply to the contiguous property of the War Eagle. The output of smelting ore has not decreased during the past year. More has been sent out from both of these sisters mines than was previously the case but a heavier tonnage yet by far lies stored in the concentrating of its siliceous ores.

The White Bear, which has been pluckily struggling along against adverse fortune for many a year, has come upon good ore bodies at depth, has erected a winding plant fit to handle these and is putting up a concentrator which will mill them. From the White Bear a good record is to be looked for durthe coming year.

Similarly the Spitzee. This mine, not far from the White Bear, is a small property, but is typical of a many another in the camp. It possesses plenty of ore, but ore which is only of concentrating value, ore which cannot be mined on sufficiently large a scale to make it profitable to smelt, but ore which will yield handsome dividends, if treated by the Elmore process. It is an open secret again that this mine is negotiating the purchase of a suitable Elmore plant.

Turning to another class of mines those bearing iron ores, the Kootenay at once presents itself. Developed by a system of working which as intends over three miles, total length there has been uncovered vast bodies of iron ore of low grade which it is proposed, if the proposal meets with the approval of the London shareholders, and there is no reason why it should not as the mine is in excellent standing financially and is well and economically managed, to treat by electro cyanidization. It is probable that a mill of the description here shadowed will be erected on the property during the coming year. The success of this will open up a vista of many such similar successes on many another property, especially on the south belt. Thus the Elmore process will find a fitting corollary, as far as this camp is concerned, in the electro cyanide method taking up its complement of the ores of the camp.

And this brings the review to the Jumbo. Here is a property which for long lay idle till cheapened smelting and cheapened transportation brought its ore well within the pay limit. The ore bodies upon the Jumbo are large in extent and double in character, presenting themselves under both aspects, ferruginous and silicious, and are therefore possible of treatment under either of the processes which are revolutionizing Rossland. The Jumbo will show up much more largely in the future than it has done in the past, and will give an earnest of this during 1904.

Lastly there is the Velvet. Also a shipping property and one that has done fairly well in the past hampered as it has been by the onerous charges involved in a wagon transportation over 12 miles of mountain road, it is about to enter upon a new era. Its ores are liable to smelter treatment, and to concentration, and it is proposed to erect a small smelting plant and a small concentrator upon the property. The smelter will be of the pyritic type. Consequently the charge for reduction will be small. Also it follows that the concentrates will be valuable in the plant. Further, that as the iron in such smelting will slag off with a nearly equal quantity of silicious ore, the value of the smelting grade of the latter will be reduced, bringing a much larger quantity of ore within smelting range of values. Pursued to its logical conclusion, which we have here no space to attempt, it will be seen that this method will cut into the Elmore process of concentration, though it is possible that the Elmore process itself will be an adjunct of the Velvet concentrator. But there is room for both.

And this completes the list of the shipping properties of the camp. Next New Year there will be many another to briefly and favorably review and the WORLD cheerfully predicts that it will have much more space in which to do them justice.

THE LOCAL EXCHANGE

Few Sales During the Holidays.

WATERLOO MAKING A JUMP

The Latest Quotations and Sales Locally Upon the Market.

Being holiday weekthe sales were few in number. American Boy is much weaker than it was, Centre Star is a trifle stronger, while Waterloo has taken a decided jump. Otherwise stocks remain much as they were at the end of last week.

Today's Local Quotations:

	Asked	Bid
American Boy	3¼	2¾
Ben Hur	4

MINOR MENTION.

The War Eagle staff had a lovely dance last night.

Dr. Coulhard beat W. M. Wood by 14 to 10 with the stanes.

W. M. Wood is back from Seattle.

St George's Christmas Tree was well attended last evening.

The curlers celebrated Hogmany with usguebaugh and brooms.

Andrew Larsen is back from a trip south on business.

George Clothier has joined the surveying staff of the Le Roi mine.

The Knights of Pythias had an installment of officers last evening.

There was a watch night service held in the Methodist church.

Miss J. K. LeVanger will leave tomorrow for Meyers Falls.

Cranus and Mrs. Grahare am locating for the future in Spokane.

The Knights of the Maccabees had a very successful ball on New Year's Eve.

The hockey match between Rossland and Trail juniors was postponed.

It is stated that R Evans will be the probable successor of W. J. Robinson in the shrievalty.

The mines worked generally yesterday. That is to say the civilized ones.

Cousin Jack are to be asked to sing some carols at the forihcoming sacred concert.

The officer for the Prevention of Cruelty to Animals should look after some of the Rossland teamsters.

There was a fair attendance at the rink last evening, to witness the first hockey match of the season.

The services in St, George's tomorrow morning will be in memoriam of the late Mrs. Boultbee.

Ex-Alderman Raymer begs emphatically to state that none of his relations were injured in the late Chicago fire.

Somebody turned in a false fire alarm on New Year's morning just after midnight. A person of unimpeachable veracity declares it was not the mayor.

The Cousin Jacks on New Year's Eve tried to attune their notes with the melodious mine whisthes at midnight, but they didn't. The harmony was too much for them.

The Miner this morning confirms the WORLD's report on the good ore found in the 1350 level, running nearly $50 to the ton. The news was published in the WORLD before Christmas.

The Miner announces that the Balfour government will give bounty on West African cotton, thus cutting out that of the United States. The WORLD had this four days ago.
