## A REAL GOOD TIME

Festivities Gracing the Departure of W. J. Venner to the East.

There ought to be no prouder man in Rossland at this moment than W. J. Venner. He was tendered a banquet, on the eve of his final departure for the east, by a number of his friends at the Windsor hotel last night and he is to be entertained royally this evening at the Kootenay by the Eagles. That Mr. Venner is a popular man goes without saying, but the number of friends that he has in the city must have astonished him. The banquet and presentation last night at the Windsor was an exceedingly enjoyable affair. The Windsor, E. S. C. Winn, one of the committee of the entertainers, declares, surpassed itself on this occasion. Every thing was in first class order. Despite the untowardness of the season the table was decorated with an abundance of flowers tastefully arranged, the cuisine was good and the wines sound. Everybody had a jolly good time.

The Eagles, of which body W. J. Venner is a past president are going to let themselves loose tonight and the spacious dining room at the Kootenay will be especially decorated for the occasion. The wellknown caterer Jack Lucas is absent but his partner is more than equal to the occasion, although the hospitality of the Eagles has already become proverbial.

Typewriting, stenography, accounting  
G. A. Ohren, U. S. Consulate Phone 247

## The Foghorn.

The tunnel at the Foghorn is now in some 550 feet and, there being no proper ventilation, the men quit work a few days ago. A contract has been let for the driving of the tunnel 50 feet further. Under existing conditions but one shift can work. Before the completion of the contract, however, a fan will be installed and work will be proceeded with full blast.

## ARE UNDECIDED

No Definite Action Has Been Taken.

## LIBERAL ASSOCIATION MEETS

Lively Proceedings—Great Influx of New Members—A Vote of Thanks.

The Liberal Association of this city held a crowded meeting last evening to elect certain officers, to receive the report of the delegates and to transact general business.

The officers elected were F. C. Lawe, secretary, in place of T. Parker, resigned, and H. Daniel on the executive in place of W. J. Whiteside who has left Rossland for New Westminster. The report of the delegates was received, and a resolution passed asking the provincial government to allow a drill hall to be built upon an unused portion of provincial land at the back of the new court house.

Many new members were enrolled, and the new secretary was kept busy gathering in the shekels.

The meeting was characterized by an unwonted liveliness of discussion and difference of opinion. The proceedings began by Dr. Sinclair calling into question the names of several new members proposed on the ground that he was not acquainted with them and did not know whether they were good Grits. He proposed a ballot. This looked like an all night sitting but the doctor was prevailed upon to withdraw his motion. Next came up the question of secretary. The executive had nominated F. C. Lawe in place of T. Parker and Mr. Lawe was present acting in that capacity. Arthur Dutton was placed in nomination and refused to withdraw on the ground that labor deserved a recognition. It was pointed out that he was already a vice-president. A ballot was cast and the result being a tie the chairman cast his vote in favor of F. C. Lawe, for the balance of the term.

Dr. Sinclair then gave his reasons for leaving the convention at Vancouver, which were received with silence. W. Hart, McHarg got a kindlier hearing, but as the proceedings afterwards showed, failed to convince his auditors. R. W. Grigor, H. W. C. Jackson and others criticized the action of the delegates and of the late Provincial Liberal Executive forcibly amid much applause. A motion was put thanking the delegates for their services which was amended by another declaring that they had failed in their duty, and yet by a third casting the blame on the executive. The amended amendment failed to carry, but the amendment was carried easily. On the original motion being put it was also carried, many persons refraining from voting. This elicited hearty laughter.

Mr. Arthur Dutton raised the question of the infrequency of the meetings, but as he mixed the financial aspects of the case with his motion he was ruled out of order.

Henri Roy presented a resolution turning down Hon. J. Martin but a motion to adjourn prevented the discussion.

If you are thinking of getting a new suit of clothes for spring, wait until our new spring stock arrives. Finest ever brought to the city. Comerford & Cameron, the leading tailors.

At W. F. Lingle's you can get wood that will burn. Phone 149.

## Real Estate.

E. M. Kinnear, of the Crescent Dry Goodhouse this day acquired the title of the lot on which his establishment is built. The consideration was \$6000 which sum was paid over to the vendors Ross Thompson, J. S. C. Frazer and Judge Sphink. The sale was conducted by J. B. Johnson.

For imported wines go to the International Liquor Store.

## Another Wedding.

Yesterday evening at St. George's church the ceremony being solemnized by Rev. C. W. Hedley, were united in the bonds of holy matrimony Alfred D. Sykes, well known in this city and Miss S. Genelle. The best man was J. G. Billings. After the ceremony the wedding party adjourned to the Kootenay where a recherche supper, in the very best manner of that well known hotel, was well enjoyed. The wedded couple, to whom their many friends extend their heartiest congratulations and felicitations, will take up their residence in this city.

## LE ROI ACCIDENT

Shaftman Charles Gustafson Hurt This Morning in the Shaft.

Charles Gustafson, a shaft man working on the extension of the Le Roi shaft was hurt seriously this evening. His injuries are upon the breast bone, but just how serious they may prove to be yet remains to be seen. He has been taken to the hospital where he is likely to have a long siege of it under favorable circumstances.

It seems that Gustafson was working on the staging hanging in chains along the length of the shaft from which are placed the sets of timbers as the shaft is gradually deepened. Past the staging run two poles used as skids for the bucket carrying up the excavated rock at the bottom of sinking. These rest upon the ground and are inclined against the guides of the completed shaft above. Though so placed that it is impossible for them to spread, and so let the bucket through between them, they are otherwise loose and can be moved up or down.

By some means, the bucket, while being hoisted, caught in some portion of one of the rough poles used as skids, lifted it some distance and finally freed itself, dropped the skid with some violence against the staging, inflicting a heavy blow upon the breast of the unfortunate shaft man.

For sale cheap—a three room furnished house with city water and a good wood shed. Apply to J. L. Whitney & Co. if

## The Bonanza.

It is understood that the values of samples of ore found at the bottom of the new winze of the Bonanza mine and which were taken right across the showing, averaged \$17. This is a good thing for the property and one that should increase its value to the holders. It has been stated that the mine has been closed down, but this is by no means the case, as a force of men are still working on the property. It is possible that orders will be given to this effect in a few days but they have not been at present issued.

## NOT AGGRESSOR

Facts of the Struggle for Chair.

## SMITH CURTIS' EXPLANATION

Complains He Has Not Been Fairly Treated by the Provincial Press.

Smith Curtis, the member for this riding, complaining that the press has not fairly represented the struggle for the seat in the house which is usually occupied by the leader of the opposition, and in which he was himself personally concerned, has forwarded the accompanying statement for publication, in justice to himself:

"The trouble about the seat of the leader of the opposition arose in this way. The government in the first instance refused to decide who should have the particular seat, which by custom and long usage has always been accorded to the leader of the opposition. Some time before the session on Monday began, Mr. McBride's desk was placed in the position usually occupied by the leader of the opposition. When he came in he found it so, and took the seat. Mr. Martin came along and objected, but in place of referring the matter to the house to decide, remained standing a little distance back of the seat. When prayers began and the members stood up Mr. Martin came forward, seized Mr. McBride's chair, pulled it back and stood in front of it. Immediately upon the conclusion of prayers, and not before, I pushed my chair forward for Mr. McBride to occupy—an act of courtesy which I had a right to do—thereupon Mr. Martin threw himself against my chair and against me, endeavouring to push the chair and myself back, whereupon I resisted and started to push Mr. Martin and his chair over, when a number of the other members took part in a general scramble over the possession of the chair. There were two acts of aggression on Mr. Martin's part before I interfered with him; first, in the seizing and pulling away Mr. McBride's chair; and secondly, in his thrusting himself with great force against my chair and myself. In addition to my undoubted right to resist force with force, it had been made quite apparent that the government was utterly helpless, as it had not dared to decide the matter at the proper time; and it was therefore a case of every man being a law unto himself and protecting his rights as best he could. There was no attempt made by any member to hit or injure any other member. So far as I know there was no real anger shown by any one—on my part there was none—but I was fully determined not to allow bulldozing to prevail, as it would likely lead to other future attempts of it from the same source."

I will pay CASH for all kinds of Cast Iron, Old Metals, Rubber Boots and Shoes, Beer Bottles, Hides, Skins and Furs. Tanning done. Satisfaction guaranteed.  
JOSEPH LANG,  
Back of Oregon Restaurant.

## The Winnipeg.

During the month of February the Winnipeg mine shipped about 300 tons of ore to the smelter. The managing director of the property expresses great satisfaction at the continued and substantial increase in the showing at the mine.

Address all communications to James H. Fletcher, Manager, P. O. Box 902, Rossland, B. C.

## KLONDIKE AND RAND.

The difference between the course of affairs in the Klondike and on the Rand is so striking and so typical as to be worth nothing in parallel. Instead of insisting on a whip hand over the mining centre of Dawson City, the Canadian government gave it its own way. When the municipal government is chosen it will undoubtedly be American in character if not in actual personality.

If the Transvaal government had done as the Canadian government had done, there would have been, of course, no Boer war. It is quite within its national rights in not doing as the Canadian government had done, but the question remains, and presents great interest, as to which government's course is to be imitated by self-governing people. Ought the control of a mining center to be settled by a brief battle at the polls, in which every decent male resident is allowed a part, in the Canadian way, or is it worth a three years' war on the veldt, hundreds of millions of pounds, thousands of lives and the practical obliteration of the war making people, in the Boer way? In this question is involved no certificate of perfect administrative character for the Canadian government of the Northwest territory. Its regulations have been in some respects more severe than those of the Transvaal. The single issue presented is that of the extension of the franchise to the resident alien, the refusal of which has been the principal cause of the devastation of South Africa.—New York Exchange.

## CITY REVENUES.

There is always plenty of money available for enterprises that promise to give a return in good interest to the investors. It is a little moment whether the enterprise is to be carried out by a public or a private body.

On the other hand a public corporation, living beyond its income, cannot borrow money for its ordinary expenses any more than an individual. Suppose that a man's income is \$5,000 per annum and he wishes to spend \$6,000 he will have great difficulty in obtaining the extra thousand unless he is able to show that in future his expenditure will be cut down to under \$4,000. But supposing the same man wishes to raise \$10,000 to invest in an enterprise that will return \$1000 per annum he will find little trouble, always supposing that he can show that the enterprise is indeed likely to give the returns he states.

This is exactly the case with the city of Rossland. As long as this city wishes to borrow money for the upkeep of its roads, hospitals, fire service, etc., it will find it impossible except under the conditions above stated. But this is not the case when it comes to a question of borrowing money for enterprises such as would return an income. No trouble would be found in floating debentures under the latter conditions. It is true that the city has borrowed very largely but it is not at the end of its resources in this line and the extent of that borrowing power largely depends the assessor's roll which is now being made up.

The success which the city has enjoyed in the working of its water system, which although taken over

under most unfavorable conditions has proved remunerative from the very outset, ought to encourage it to proceed. Money has actually been voted for the purpose of buying both the water and the lighting plants but only the latter was acquired. Yet the Rossland Water & Light company openly declared that it was deriving so much revenue from the light that it could afford to give the water free and yet make a profit. This ought to have opened the eyes of all but the wilfully blind and there is no doubt but that all such eyes were opened. Yet \$40,000 was paid for the water when a little more than double that sum would have purchased both plants. All the citizens got was an inadequate cut in the lighting service more than made up for by the loss of revenue and consequent added taxation.

Here is something else to which the city council might very well pay attention. Mayor Clute was alderman at the time when the iniquitous deal was put through and is well versed in the motives which caused its success.

## NOTES AND COMMENTS.

Silver and lead values are gradually climbing back to the old figure, which, to Lardeauites, is a thing of beauty and a joy forever.—Lardeau Eagle.

Uncle Sam has suddenly become a person of consequence among the nations of the earth. Great Britain and the other powers seem to have joined in a grand scramble for the contract of greasing the cowhide boots which go with the striped pantaloons of his noble and historic figure.—Toronto Telegram

The natural and inevitable reply, in almost any city, to an appeal for a city hospital is that there are no available funds. Seattle is no exception to that rule. To that extent we are still uncivilized. There is not an American city where, if there was in the treasury just enough money to build either a hospital or an engine house, and the city had neither and needed both, the city council would not promptly order the engine house.—Seattle P. I.

The DETROIT HOUSE, on Second avenue, has been reopened. Meals 25c. Table the best to be found.

For a nobby suit of clothes call and see Comerford & Cameron, successors to Sharp & Co., Dean Block.

## Outside Comment.

The Rossland Miner, says the Phoenix Pioneer, keeps a standing editorial notice of the great things it intends to do, but the paper itself is smaller than ever. It has had the best opportunity of any daily in the Kootenays, and has so far taken the least advantage of it.

A big glass of beer and bowl of Clam Chowder for 5c at the Alhambra.

Fine wines and liquors at the International Liquor Store.

## The Bodie.

The Bodie mine, near Republic, is shipping small quantities of ore and it is probable that as soon as the season advances enough to admit of wagon shipments they will send out considerable lots, the ore body being well blocked out.

Steady boarders, board and room, \$6.50 per week at the ALHAMBRA.

WANTED—To buy second-hand furniture and clothes, or anything of value. Layton's Second-hand Store.

## Union Made Cigars.

Why not begin the New Year by smoking union made cigars? When you wish a smoke ask your dealer for a "W. B." or "Crown Grant" Cigar.

## LEAD ORE TREATMENT

Description of a Newly Patented Process by Antonin Germot.

An improved process of obtaining metallic lead from lead ores, the invention of Antonin Germot, of Asnieres, France, has been patented in the United States by patent No. 690,550. Of the invention the Mining Reporter says:

The object of this invention is a method of treatment of lead ores in order to obtain, on the one hand metallic lead containing the whole of the silver which the ore may contain, and on the other hand, metallic lead free from silver. To this end use is made of a crucible or converter, the top of which is furnished with an eduction pipe leading to a suitable collecting chamber, or to several such chambers, the top of the crucible around the orifice of the said eduction pipe being hermetically closed so as to prevent any entry of air.

At starting a first mass of galena is melted in the crucible, and through the melted mass a current of air is blown either through the bottom or side of the crucible, or by means of a vertical blast-nozzle entering the molten mass. The galena rapidly becomes liquified and the injected air burns part of its sulphur reducing sulphurous acid and lead.

The combustion of air injected raises the temperature, which is maintained by the continuous addition of fresh quantities of ore.

The lead separates from the sulphurous portion, the latter occupying the upper part and the former accumulating in the lower part of the crucible in a mass containing the whole of the silver in the ore.

The sulphurous acid escapes from the upper portion, carrying off without contact of external air a quantity of sulphide of lead free from silver, which passes by the eduction pipe into the collectors, where it condenses in the form of a black, heavy and very fine powder, which is easily collected into the same crucible, or for introduction into a similar and separate crucible.

When the ore treated contains no silver, the eduction pipe may be carried vertically upward to a sufficient height for the sulphide powder to fall back into the molten masses in the crucible.

Where the ore treated contains other metals besides lead—such, for instance, as silver—the distilled and condensed galena contains no silver, the whole of that metal remaining in the lead. If, however, the condensed galena be further separately treated in the same way as the original galena, a very pure lead will be obtained.

For sale cheap—a three room furnished house with city water and a good wood shed. Apply to J. L. Whitney & Co.

Furnished rooms, single and suite, at "The Traders," opposite the new post office, Columbia avenue. Rates moderate.

### Republic Mines.

The Gold Ledge tunnel is in about 880 feet and shows but little change in the formation since a week ago.

The work at the Butte & Boston mine is still confined to drifting on the vein and the ore broken has a very fine appearance.

Since resuming work on the Tom Thumb the main working shaft has been sunk several feet and is now down 47 feet below the No. 1 level and 267 feet in all.

The south drift on the Trade Dollar presents a full face of ore that now assays about \$15 per ton in the proportion of five ounces of silver to one of gold. It is now in 109 feet.

The San Poil expects to fit up the mine with a complete line of

machinery and will install a compressor plant, put in pumps, hoists and other machinery, in all costing about \$25,000.

The lessees of the El Caliph mine have for the present suspended work in the northeast drift on the lower tunnel level and are now taking out ore from the bottom of the Heffstetter-Bedier stope above.

I will pay CASH for all kinds of Cast Iron, Old Metals, Rubber Boots and Shoes, Beer Bottles, Hides, Skins and Furs. Tanning done. Satisfaction guaranteed. JOSEPH LANG, Back of Oregon Restaurant.

## V., V. & E. LOCATION

Line is Anxious to Ascertain Smelting Center of District.

The V., V. & E. has, ever since it proposed to commence operations in the Boundary country, been anxious to find out what point was likely to become the smelting center of the district, says the Midway Advance. It recognized that much of the tonnage, for a time at least, would be from the mines at Phoenix, among which were those of the Dominion Copper company. This company was contemplating the building of a smelter, and the railway company was in no hurry about going ahead with any of its spurs until it was definitely decided where the smelter of the Dominion Copper company was to be located. For some time the Dominion Copper company has been negotiating with the British Columbia Copper company for the disposal of either its entire holdings or a large block of stock to the latter company. This deal hung fire for a considerable length of time, and last week it was reported on what appears to be reliable authority, that the deal had gone through.

Almost simultaneously with this report comes the information that the V., V. & E. has abandoned its idea of building the Granby or Phoenix spurs from Grand Forks, which would naturally lead one to arrive at the conclusion that both reports are true and that the contractors will be put to work on this side of the mountain instead of the other. The line is already located between Midway and Phoenix. The company can build from here without being interfered with by injunctions placed upon it by an opposing company, or from any other cause.

For high-class family liquors go to the International Liquor Store.

We make a speciality of family trade at the International Liquor Store.

### MIDWAY-VERNON.

Likelihood of a Connecting Railroad This Summer.

There is every reason to believe that the proposed railway from Midway to Vernon will be constructed during the coming summer. A fund of \$30,000 has been appropriated for the purpose of making the surveys, and it is said that this part of the work is now being done under the direction of Engineer Coyle.

August P. Heinze, the millionaire mine owner of Butte, Montana, has a charter for this road which carries a government bonus of \$4000 per mile. This road will open up the rich mining and agricultural of the west fork of Kettle river and will greatly shorten the distance by rail between the Boundary country and the coast.

Hot Clam Chowder served with every glass of beer at the Alhambra.

For high-grade whiskey go to the International Liquor Store.

For Fresh Salmon, Halibut, Herring and Crabs go to the B. C. Market, Columbia avenue.

## ANOTHER REFINERY

Proposed Increased Plant at the Granby--Electrolytic Works.

When asked as to proposed improvements at Phoenix, Mr. Graves said in reply to representative of the Phoenix Pioneer, they would be undertaken as far as needed. This year the compressor plant capacity would of necessity be increased, to allow the working of more drills in development as well as in breaking down ore, and already Superintendent Williams is planning for a new and large hoist at the No. 2 shaft of the Old Ironsides mine.

The large plant talked of last year will be started in due time, when needed, but at present the machinery in use is answering the requirements in good shape.

An increase in the force men at the mines will be necessitated probably before long, owing to the increased shipments of about 1500 tons per day, but it could not be stated just what the increase would amount to. Last Saturday 304 names were on there Phoenix payroll.

Mr. Graves has no fear of the outcome of the copper market. Just as soon as the big fellows back east get done quarrelling, it would settle down, and there are some in Boston who look for a higher range of prices than has prevailed in years.

It is part of the policy of the Granby Co., when it gets to the proper stage, to erect and operate its own refinery, and Mr. Graves had not the least doubt but that this would be carried out. While he and Mr. Flumerfelt were in the east this winter, they took occasion to visit various electrolytic works, and are gathering data and information on the subject constantly.

For fine Cigars and Tobaccos go to Ed Farnsworth's cigar stand.

# STOCK MARKETS

**Business Improved This Morning Somewhat.**

**CENTRE STAR IS RECOVERING**

The Latest Quotations and Sales Locally and on the Toronto Market.

The sales on the local market today were an improvement over the records of the past few meetings although the volume of business was not extraordinary. It is noticeable that War Eagle shares, despite the various more or less well founded stories in circulation with regard to the mine, are fairly steady and that Centre Star is recovering somewhat in the market. Rambler Cariboo still stronger. Today's quotations and sales here and in Toronto.

### MINOR MENTION

The city council meets tonight. The water rights case was adjourned yesterday to April 7.

Don't forget the hockey match tonight.

Whitaker Wright is again up against it in London.

Dr. Milloy left for the Slokan this morning.

Rossland Liberals are still in the woods. Where are the trail blazers?

Louis Blue is going to have a peach of a place on East Columbia avenue when he gets around to it.

Good story that on the Iron Mast. Pity the contradiction was not on the same page.

Little Willie was observed buttoning his coat on Columbia avenue yesterday afternoon. But he wasn't cold.

A old friend is desirous of knowing the whereabouts of John Schmidt at one time thought to be a shift boss in this camp.

Editor Gregg has a grievance against the Miner to the extent of \$1000. The Miner won't be happy if he gets it.

Some water users are kicking. Geewillikins the city must have a revenue; can't expect the police court to put up the whole business.

There was a drunk at the police court this morning. Being an old offender and having no money he was remanded until tomorrow morning.

Tom Thumb.

The Tom Thumb mine, in Republic camp, encouraged by the prospect of early transportation, has resumed operations, commencing sinking a shaft last Friday night. Seventeen men are employed.

## CANADIAN MERGER

President J. J. Hill Denies the Whole Ottawa Story.

Regarding the truth of the story published in the Spokesman-Review regarding the application in Ottawa for a charter for the Northern merger the Associated Press publishes a dispatch denying the whole matter. President Hill is reported as particularly emphatic. He says:

"I think I have a fair idea of what the company is. I know nothing about the Canadian charter. This is news to me. That is all I wish to say. It seems to cover the ground."

We make a speciality of family trade at the International Liquor Store.

## STOLE A GOLD BRICK

Two Miners Are Arrested on an Unique Charge at Nelson.

Simon Pleff and H. J. LaBrash, of Ymir, are at the provincial jail in Nelson, awaiting trial this morning before Stipendiary Magistrate Crease on a rather unique charge. It appears that that on Sunday last P. J. Nichols, lessee of the Fern mine, was superintending the monthly clean-up of the mine. With him were working in the laboratory the two prisoners. As a result of the clean-up there was a brick of gold valued at \$700. This brick Pleff and LaBrash are said to have kept possession of, informing the manager that as their wages were considerably in arrears they would cut off enough from the brick to

Brussell Sprouts

satisfy their claims. This the prisoners state, they did, returning the balance to Mr. Nichols, together with a receipt for the amount received.

### HOT AIR LINE.

Bridge at Curlew—General Progress of Work.

Rube Hall, well known throughout this section, says the Grand Forks Gazette, was down during the week from Ferguson, Wash., where he is acting as bookkeeper for Contractor Butts, who is one of the largest sub-contractors on the Grand Forks & Republic line.

Rube says that the work in the neighborhood of Ferguson is nearly all completed and after the big bridge at Curlew is crossed the tracklayers will make rapid progress until they get almost into Ferguson. When this place is passed they have several small bridges which have not yet even been started and this will take some little time to get over. From that on to Republic it will be clear sailing. He does not expect to see the line get into Republic for a couple of months yet.

## KNOB HILL ACCIDENT

A. J. Ryan, a Norwegian, Killed Last Saturday Evening.

Word has been received from Phoenix that a miner, a member of the Helena Miners' Union, was killed at Knob Hill mine on last Saturday night, and was buried by the Phoenix Miners' Union on Sunday evening. His name was A. J. Rian, 28 years of age, and a Norwegian by birth. A telegram from his union elicited the fact that he had no relatives in this country.

Having received a list of forty applications desiring the formation in this city of a Lodge of the Order Sons of St. George, I hereby call a meeting to be held in the Beatty hall, Washington street, at 7:00 p. m., Thursday the 6th inst., for the purpose of giving information relative to the above order, appointing officers pro tem, and transacting other business. All Britishers and their descendants are invited to attend. The lodge will be instituted in a few days. THOS. BRADBURY, Grand President

### NOTICE.

The strike has been settled at the Le Roi mine, but it is still in force at the other mines as before.

Negotiations are being carried on with the other mining companies of the camp which have been effected by the strike but they are not yet completed.

Working men in outside camps are advised to keep away from Rossland for the present, as there are more union men at the present time here than can secure employment until a settlement has been effected with the other mining companies. Executive Committee, Rossland Miners' Union, No. 38, W. F. M. Frank E. Woodside, Sec'y. Jan. 24th, 1902.
