Improvement of Streets

A most aggressive campaign of street work in the city has been outlined by the board of works committee of the city and came before the council last evening in the form of recommendations introduced by Chairman A. J. Henderson. The council unanimously adopted the report.

He said that in view of the number of petitions now on file in the city hall for street improvements it was considered advisable to deal with the requests and also

Resolved

(1) That having regard to the importance of insuring the commencement of street improvements in the city at the earliest possible date the Board of Works committee recommend that the Council take the initiative under the Local Improvement Sections of the "Municipal Clauses Act" and carry out the following works of local improvement:

(a) Grade to permanent grade for full width the Esplanade from east side of Forbes Avenue to the east side of Roger's Avenue, and from the east side of Lonsdale Avenue to the east side of St. Patrick's Avenue and Crescent street from the east side of St. Patrick's Avenue to the east side of St. David's Avenue, and construct 10-inch wooden sidewalks and curbs on each side.

(b) Grade to permanent grade for full width First street from east side of Forbes Avenue to east side of St. David's Avenue and construct 12-inch concrete walks on each side, pave the roadway with wood block pavement, with concrete curbs on each side.

(c) Grade to permanent grade for full width Second street from west side of Lonsdale Ave. to east side of St. David's Avenue and construct 10-foot wooden sidewalks on each side with suitable curbs.

(d) Grade to permanent grade for full width Lonsdale Avenue from the water front to the north side of Upper Keith Road, and construct 12-foot concrete walks on each side with concrete curbs.

(2) And that the City Engineer be instructed to forthwith commence the surveys, taking of levels and the preparation of plans, profiles and estimates, etc., and report to the Council on the above works of local improvement.

(3) And that the City Clerk thereafter publish the necessary statutory notices in the local newspaper and give any further notice required by statute.

(4) And that the City Engineer and the City Clerk be authorized to engage such temporary assistance as they may require to properly carry out the above instructions and that a separate account be kept of such expense, and charged up to the respective street improvements.

Provincial Legislature

Synopsis of Work of the House for the Week

(By Express Gallery Representative)

Victoria, January 21.—The first week of the legislative session, while largely devoted to talk of a more or less complimentary kind, has developed a few points of practical interest. One of these was the proposal of Mr. Cawley of Chilliwack to revive the scheme for a canal between Pitt river and Burrard Inlet. While such an undertaking may yet be far in the future, it is well worth keeping in view. Pitt River, as Mr. Cawley pointed out, has a width of about 1800 feet, and the influx from so large a stream of fresh water must convert the harbor of Vancouver into a semi-fresh water body. One effect of this would be to sweep out the destructive forces of the teredo, another would be to drain the Pitt meadows and make them all arable, and still further it would open an easy channel for the transportation to Vancouver and North Vancouver of the agricultural produce of the Fraser Valley and Pitt River districts. The matter will be further ventilated when Mr. Cawley brings in a resolution urging the Dominion government, which alone has jurisdiction over these waters, to take the matter up.

Mr. C. E. Tisdall of Vancouver, in his speech on the address, pointed out that as the people of Vancouver had authorized assistance to the Second Narrows bridge, which was really outside the city limits, the provincial government might see fit to authorize the construction of traffic bridges between Westminster Junction and Port Hammond across the Pitt river, and over the Fraser river to connect the Ladner district with the cemetery road leading to Vancouver. Both these arteries would serve to bring the farmers of Delta and the Fraser Valley into closer touch with their urban customers on the shores of Burrard Inlet. Another matter of considerable interest to both cities was touched upon both by Mr. Tisdall and Mr. Watson, and this was the immense margin between the cost of the production of coal on Vancouver Island and the high price at which it was sold on the mainland, only 35 miles away. In this they are strongly supported by Dr. Maguire and it is quite possible that the final result will be at least an inquiry into this discrepancy.

Premier McBride, in a two-hour speech last Tuesday afternoon devoted himself chiefly to a vindication of the government's land and railway policies which had been attacked by Mr. Brewster, at once leader, whip and henchman of the Liberal party. The Premier, in a dignified manner, showed that there was little ground for pessimism in connection with the settlement of the country. The chief difficulty had been hitherto that the Dominion government controlled the land along the C.P.R. and E. & N. railways which was most available for settlement but now that new areas were being opened up by the construction of the Grand Trunk Pacific and Canadian Northern lines the provincial government would not be found wanting in its duty.

One of the sensations of the week was furnished by Mr. Jardine of Esquimalt who came out boldly in support of the government's policy and roundly rated his fellow-Liberal, Mr. Brewster, for his strictures. It is said by some that "Jawn" is continuing his war against Mr. Templeman in another fashion.

The two Socialists, as usual, added spice to the debate. Mr. Parker Williams was sarcastically pessimistic and Mr. Hawthornthwaite was humorously socialistic. The latter gentleman also took advantage of Mr. Brewster's desertion by his former ally to assert beyond doubt his position as leader of the opposition that still remains. It is the privilege of the opposition leader to move an amendment to the address, but this Mr. Brewster was debarred from doing as he had no seconder. Mr. Hawthornthwaite promptly jumped into the breach by moving a Socialistic amendment which was seconded by Mr. Williams and though it went down to overwhelming defeat, Mr. Hawthornthwaite rose from its ruins as the undoubted and unchallenged leader of His Majesty's loyal Opposition.

While the week has been one of talk rather than of action a number of useful measures have been placed before the House. One of these is a bill of Attorney-General Bowser for the stricter regulation of automobiles Not only must every driver of a motor car take out an annual $10 license, but he can only take it on conditions which minimize his own freedom in action and speed while aiming at the greatest degree of public safety. The automobile is regarded as the last comer in the world of traffic, and as such has to take its place.

The Premier has also introduced a bill providing for greater safety for workers in coal mines, and Hon. Dr Young has one to provide for the sanitary inspection of logging camps, sawmills and allied industries so that the humanitarian aspect is being kept well in view. Another bill introduced by the provincial secretary extends the time for selecting the university endowment lands for three years. There are also a number of minor amending bills and some old-time labor measures of Messrs. Hawthornthwaite and Williams have been reintroduced.

The debate on the address is now over; the work of the session is well in hand and with a good surplus in the treasury there is every prospect of smooth sailing and efficient work during the five weeks or more for which the session is yet likely to last.

MAPLE LEAF DANCE

The initial dance of the Maple Leaf Dancing Club held in the Horticultural hall Friday evening was a pronounced success and augurs well for a very successful season for the newly organized club. Those at the head of affairs have adopted strict measures to ensure the dances being clean and up to the standard. The attendance was large considering that little effort had been made to advertise for the reason that it was not intended to make much publicity of it except through the few invitations which were sent out. The next dance takes place on Friday evening, February 3rd.

MAYORAL RECOMMENDATIONS

Scavenging System Proposed. Also Appointment of Building and Sanitary Inspector.

The following was introduced by Mayor McNeish at last evening's city council meeting and adopted:

Gentlemen,—I think you will all agree with me that we should to the best of our ability, endeavor to fulfil whatever pledges we may have given to the ratepayers.

The matters to which I desire to bring to your notice refer to:

(a) The collection and disposal of offal and household refuse.

(b) The supervision of house sanitation, such as drainage, septic tanks and plumbing and the construction of chimneys in such a manner to ensure protection from fire.

We have now under construction a comprehensive system of sewers, which when completed should place the city from a sanitary point of view in the front rank as a residential resort. It is usual and customary when sewers are ready to receive house drainage to have all drainage connections, sanitary fittings and plumbing closely and efficiently supervised by a properly qualified official. In order that these matters may receive the requisite attention I will with your permission recommend the following resolutions:

(1) That the Board of Works and the Board of Health take joint action in providing a suitable scavenger cart with the necessary teamster, team and stabling for the collection of offal and household refuse, and the performance of other incidental scavenging work.

(2) That the City Engineer report to the Board of Health the best method of dealing with and disposing of the daily collection of offal and household refuse, for the time being, and that the City Engineer collect for the information of the Council and the Board of Health all available data as to the cost and most efficient type of incinerator suitable for installing in an approved location within the city limits.

(3) That the Board of Works and the Board of Health jointly confer and draw up a list of duties for the office of Sanitary and Building Inspector and bring up to the Council a recommendation for securing by public advertisement the services of a competent and properly qualified official to fill the dual office of Sanitary and Building Inspector.

(4) That the City Clerk obtain from other city municipalities on the Dominion or elsewhere, copies of Regulations that may be in force for regulating modern sanitation, and if possible obtain particulars of duties of officials engaged in that department of public work.

With reference to the installation of an incinerator, personally I am of the opinion that we may be able, by properly utilizing a convenient dumping ground, and burning the refuse, to defer the heavy cost of providing an incinerator for a year or two, but it is well to have all the information in relation thereto collected as early as possible.

As time is the essence of progress in this year's civic work I would impress upon those who compose the Board of Works and the Board of Health to take prompt action to give effect to the resolutions which I have the honor of submitting to you provided you approve of them.

BUSY SESSION OF CITY COUNCIL

Last evening the city council expeditiously handled a large docket of business, and amongst the matters brought up were many important propositions and recommendations which will materially enhance the city's welfare.

His Worship Mayor McNeish and all the aldermen were present.

Correspondence was read as follows:

From C. J. Fagan, secretary Anti-Tuberculosis Society, advising of the annual meeting of the society and soliciting the annual fee. The letter was laid on the table.

From F. I. Clarke, secretary Bureau of Provincial Information, on behalf of the Hon. J. H. Turner, agent-general for B. C. in London, asking the city to furnish him with all data in connection with the city's financial position and any other information regarding the city's debentures. The clerk was instructed to do this.

From E. H. Bridgeman, for the Lonsdale Estate, stating in connection with the Haywood park that he had a letter from Jas. P. Fell who wished him to inform the council that the owners of the property have every intention of granting them a park area as arranged, but that it is quite impossible to complete the transaction until the subdivision has been registered.

Ald. Dick said the excuse seemed very slim indeed. The park area could very easily be described by meets and bounds and he thought that Mr. Fell might be advised that when the park area division came on.

Ald. Smith said the park area was originally 12 acres.

Certain streets made under a new arrangement increased it to over 13 acres. Under those circumstances and until the plan was settled upon the matter was in a rather peculiar position.

Ald. Dick withdrew his objection.

It was referred to the Parks Committee.

The mayor said he was strongly in favor of keeping the matter alive.

From N. V. City Band soliciting financial assistance in the matter of purchasing uniforms and other band equipment. The uniforms had been purchased from a local merchant but the finances of the band were too low to pay the balance owing. Referred to the finance committee.

From the Board of Trade, advising of a resolution passed recently to request the C.P.R. to consider in connection with the plans for their subway under the tracks at the ferry approach in Vancouver a more shallow tunnel in addition to the main one for pedestrian travel.

Ald. Dick thought it was strictly a matter for the City Ferries to deal with and he considered that it should be taken up with the Ferry Company.

Ald. Henderson said the idea was to approach the C.P.R. before the plans for the subway were completed. After the plans had been passed it would be no easy matter to make any changes then. He thought having a joint committee from both the Board of Trade and Ferry Company it would have more weight.

It was referred to the Transportation committee.

From the secretary of the Board of Trade, advising that the Board requested the council to consider the advisability of establishing a public weighing scale near the wharf. Referred to the Transportation Committee.

From the Western Engineering Co. asking for 50 per cent. of $1650 of the payment for road roller recently ordered from them as per contract. It was referred to the finance committee to arrange payment.

From F. R. Glover, Asst. Man. B.C. E.R., noting the fact that the city was about to block pave Lonsdale Ave. He asked for copies of profiles and plans and other data in connection to enable the company to prepare for this change. Referred to the Board of Works.

From C. A. Lett and Son stating that they were getting out plans for a large building on First street next to the Bank of Hamilton and asked to be advised what had been done regarding their previous petition for block paving the street. Referred to the Board of Works.

From J. C. Burmeister and others petitioning for a sidewalk on Mahon Ave. from 19th street to 22nd street and 250 feet down 22nd. Referred to the Board of Works.

They also asked for a street light at the corner of 22nd and Mahon Ave. Referred to Fire and Light Committee.

From N. V. Lumber Co., asking the Council to protect them for material supplied to McDonald, Gzowski & Co., sewer contractors.

Ald. Dick thought as the contractors were under bond proper protection was afforded all parties. It was resolved to notify the writers that it was a matter between them and the contractors, but protection would be given if payment was not made finally.

From the city engineer recommending that a bylaw be prepared to provide $60,000 in connection with putting in branch sewers to the property line of the lots from the mains.

The clerk was instructed to prepare the bylaws to cover the mains on Esplanade, First street Second street, Third street, Lonsdale Ave. from 19th to 23rd street.

Mr. Dick as a delegate from the Board of Trade, appeared before the Council requesting aid to send a delegate or delegation to Ottawa in connection with urging the Dominion government to grant aid towards the construction of the Second Narrows bridge. The Board of Trade's funds were limited, he said. It was proposed to ask the city and district council to contribute an equal amount.

Mr. W. J. Irwin, another delegate from the Board of Trade also spoke. He said in previous years the Board had provided the expenses to Ottawa itself. $300 per delegate was required and it was intended to send two delegates if possible. Referred to the finance committee.

His Worship said that after Vancouver had passed the bylaw now was the supreme moment to act.

The mayor said that in future any persons wishing to address the council in connection with Iorrespondence, would be required to ask for this permission when the council would decide by resolution if they would be heard or not.

Board of Works recommendations: Re the application of Fraser and Fraser Co. to have the street opened to give access to lot 11, block 170, D. L. 274. It was referred to the engineer to report.

A claim of $25 made by F. E. White for damages done to his house through blasting operations carried on by the board of works was referred to the road foreman to report.

With reference to a notice from Mrs. A. J. Chresoser that the district municipality has constructed a sidewalk from Sutherland Ave. eastwards the engineer was asked to report on the cost of building a sidewalk on 13th street from the boulevard to Sutherland Ave.

With a reference to a letter from J. R. J. Murray that a client was hindered in building operations at the corner of 8th and Ridgeway Ave. by water running from the street across the lots. The engineer reported that water does not come from the street but a natural water course, and the clerk was instructed to notify Mr. Murray accordingly.

Ward, Burmeister and von Graevenitz applied for a sidewalk on the south side of 5th street west from Lonsdale Avenue a distance of 120 feet. The committee recommended the work to be done.

With reference to the application of the Canadian Financiers for the opening and grading of streets for sidewalks in front of lots 1 to 18, easterly part of block 12, D. L. 550, the engineer was asked to report on the probable cost of the work.

The application of T. J. Leourex that the boulevard between 14th and 15th streets west side on St. George's Ave., be cleared. It was resolved to have the work done in due course.

A request by F. Blow that the surface water on 17th street be attended to and that a large stump standing on the roadway be removed, was referred to the engineer to see what could be done with the surface water and report re the removal of the stump.

With reference to the application of the Seymour Lumber Co. for a grant of $1,500 towards the expense of building a plank road from the corner of 17th street and Williams street to the N.E. corner of D. L. 616, the engineer was asked to return to the council a fair estimate of the cost of the work.

A supplementary report of the engineer recommended the granting of Fraser & Fraser's request, that damages of $25 asked for by F. E. White be paid, that the request for a sidewalk on 13th street from the boulevard to Sutherland be granted. The whole report was adopted. He reported that the cost of clearing the right of way for the Canadian Financiers was about $80 and that the request of F. Blow was already attended to.

In regard to the request of the Seymour Lumber Co. for aid re building a plank road Ald. Henderson thought the matter could be dealt with more intelligently if the application had been made for clearing the street instead of subsidizing a plank road which would cost considerable for maintenance. This would be creating a bad precedent.

Ald. Dick suggested that as the road had been already built that the matter be dropped.

Ald. Biss and Smith were of the opinion that as about two blocks of this road was in the city some compensation should be made.

Ald. Kittson considered they should be subsidized in this respect.

The Mayor recommended that the Board of Works go over the ground.

It was finally referred back to the Works committee for a report.

W. C. Williams wrote asking for the opening up of 20th street to lots 29, 30, 31, block 8, D. L. 549.

Referred to the Board of Works.

From August George and Ambrose Johnson, claiming damage for alleged damage to their property through blasting by the city's work gang.

The matter was held in abeyance until the work was completed.

Ald. Dick stated that the Hastings Shingle Mfg. Co. had no right-of-way through D. L. 855, but that it had been cancelled six months ago in the regular way.

A plan of portion of D. L. 545 was passed. Plan of lot 13, block 4, D. L. 616 was referred back for re-arrangement.

On the recommendation of the mayor it was resolved to place full authority in the hands of the city engineer for the carrying on of the works of the several departments coming under his supervision. The foreman of each will have authority to engage and discharge men and in this way the aldermen will be greatly relieved from any responsibility in the way of demands being made upon them.

(To be continued in Friday's issue)

HOCKEY

In a splendidly contested game on Saturday played on the Boulevard Park, North Vancouver administered the first defeat to Vancouver that they have sustained in three years, the score being 4 to 1. This win now puts the locals at the head of the league with Vancouver second and James Bay third. In the event of Vancouver defeating James Bay, which appears a certainty, North Vancouver will have to meet them in a deciding game.

Saturday's contest was a very good exhibition and well worth going to see. McPherson opened the scoring for the locals some ten minutes after the game started. Barwick equalized soon after by scooping in the ball when the home custodian had just stopped a good shot but failed to clear. Not to be denied North Vancouver retaliated with another before half-time, Hazel Cameron scoring when the ball rebounded from the goal post after a shot from the right wing leaving the half-time score 2 to 1.

Give and take play followed the interval with the home team having slightly the better of the exchanges until McPherson with a brilliant run along the right wing beat three or four men and scored with a great individual effort. He followed this up a little later with an excellent shot from a sharp angle completely beating the visiting goal-keeper, and putting the result of the game beyond doubt. Time was shortly afterwards called. The game through was contested in a good spirit. For Vancouver Bayfield, Underhill, Rhodes and Henry were distinctly good and while all the North Vancouver men played at the top of their form Armytage and Montgomery were the stars.

Mrs. Verner of Victoria Park will not receive until the fourth Wednesday in February.

Miss Mabel Markle, daughter of Mr. and Mrs. E. Markle of Lonsdale Ave., left yesterday to take charge of the Agassiz school for the ensuing term.

FERRY REPAIRED

The SS. North Vancouver which had her aftercabins crushed in on the port side through a mishap caused by a collision in the fog a short while ago, is practically repaired now with the exception of a little paint when all traces of the accident will have vanished. The cost of fixing the boat will be borne almost exclusively by the insurance company. In this connection the 1910 ferry board are to be congratulated on the policy which they held on the boats. Previous to taking out the renewal policy which was done the latter part of 1910 the board could not get a policy that would pay on an accident resulting in damage less than $1800. The new policy which they secured provided for payment for damages no matter how slight and in this case the board were fortunate in holding a policy of this kind when the North Vancouver was damaged, the extent of which was much less than $1,800.

NORTH VANCOUVER, B. C. . . . JANUARY 24, 1911

ALIENATION OF INDIAN RESERVES

During the debate upon the speech from the throne in the provincial legislature last week two members in the course of able speeches referred in pronounced terms and at considerable length, to the necessity of following up the successful efforts whereby Victoria has been relieved of the presence of the Songhees Indian reserve with similar proceedings upon behalf of other cities throughout the province which are similarly situated in this respect. The prominence thus given the matter goes to show that the question of the *alienation of Indian reserves is now* a live issue in legislative circles and that it will not be allowed to rest until some permanent means of a speedy and equitable solution of the problem is made available wherever it exists. It is understood that assurances have been received from Ottawa that it is the intention of the Dominion government to bring down legislation this session which will provide the necessary machinery of which any municipality may avail itself to secure possession of Indian reserves lying within its corporate limits. If even handed justice is to be meted out to all municipalities throughout the Dominion, then legislation along the lines suggested is the only solution fair to all parties. If an Indian reserve can be alienated in favor of Prince Rupert, if an Indian reserve can be alienated in favor of Victoria, if the Selkirk Indian reserve in Manitoba can be alienated, then in equity it is unavoidable that any Indian reserve can be alienated where good reason can be shown why the same is desirable in the interests of any municipality.

It is freely admitted that in every case in which the alienation of a reserve is sought, the rights of the Indians should be properly protected and any legislation formulated in this connection should make adequate provision in this regard. At the same time when a municipality deems it essential to its development, to secure possession of an Indian reserve and when that municipality is prepared to accept any proposition that a competent board of judges may consider fair and reasonable the fact that it is impossible to procure the consent of the individual Indians resident upon the reserve in question should not be sufficient ground for defeating the wish of the people as expressed by the municipality concerned.

The property of any Canadian citizen or of any company of citizens is subject to expropriation at any time, in the public interests and expropriation proceedings can be carried into effect no matter how strenuously the individual owner or the majority of the members of the company which is the owner of the property may protest. The Indian act provides however, that no portion of an Indian reserve shall be alienated without the consent of a majority of the heads of families actually resident upon the reserve. It is difficult to understand why the protest of an individual Indian (in certain cases) or of a number of Indians in other instances, should be all powerful in this connection while the protest of a fully qualified citizen sustaining his share of the responsibilities of the nation or of a number of such citizens should prove absolutely futile under similar conditions. As the words of the government, that is of the Canadian people, the Indians should be provided for in a proper and in a liberal manner but it is neither necessary nor desirable in order to accomplish this that the interests of the citizens at large should be made to suffer or that special rights shou'd be conferred upon the Indians relative to land tenure which are denied to responsible Canadian citizens.

Legislation of such a nature as would protect the interests of municipalities in cases in which the majority of the resident heads of families on any reserve are inclined to be intractable or unreasonable, wou'd meet the case while conserving the interests of all parties.

PROVINCIAL LEGISLATURE

The Express is pleased to announce that a special representative has been engaged in the press gallery of the provincial legislature from whose pen a weekly letter will be published in each Tuesday edition giving a synopsis of the doings in the House during the week. These letters, while containing a full statement of the proceedings will give special attention to matters pertaining to Burrard Inlet and the lower mainland. Our representative is one of the ablest and most experienced members of the *staff* in the press gallery and is particularly fitted to deal with all matters from a North Vancouver and Vancouver point of view. By reading these letters regularly our subscribers will be able to keep in close touch with the proceedings of the House at the expense of a small portion of their time. The first instalment will be found in another column of this issue.

GOLD OUTPUT IN KLONDYKE

The output of gold in the Klondyke region for the year 1910 amounted to $4,100,000 according to figures published in the statement of the comptroller of the Yukon, who had tabulated the royalties paid by the different companies operating in Dawson. The output over 1909 is announced to be $540,000. While individual operators are no longer working in the Klondyke, their place has been taken by the two big dredging companies which have operated on the streams which were turned over by pick and shovel in the early days of the camp's history.

Two immense dredges have cut a swath up the Klondyke river from Lousetown at the confluence of the Klondyke and the Yukon as far as Bear Creek. All of the cabins which once lined the historic stream have been torn down and the ground beneath them dug away and sent through the dredging machines. A big cut has been made up Bonanza Creek, and the town of Grand Forks, at the junction of Bonanza and Eldorado Creeks, which is built on a bed of auriferous gravel, is destined soon to disappear.

Both the Yukon Gold and the Treadgold companies are planning immense operations and within a few decades practically every stream in the district will have been worked over.

COMPLETE LINK IN TELEPHONE LINES

The completion of a stretch of government telephone from Kamloops to Vernon via Grand Prairie was the last link in a circuit 378 miles long on which the six main offices for relay purposes are Kamloops, Vernon, Kelowna, Penticton, Hedley and Nicola.

Most of the line uses an iron wire but from Vernon to Kelowna there is a copper wire as well which is used for telephone purposes altogether. Also for a portion of the distance between Kamloops and Nicola copper is used. The reason why the system is not all copper is partly on account of the greater cost of the copper and also because the iron is not so easily broken when a tree falls across it.

Hedley office is the connecting point for two sections of the circuit, viz., Hedley to Nicola and Hedley to Penticton.

A good deal of the line has lately been re-poled and the intention is to go over a considerable section of it next summer and renew the poles.

GREAT BRITAIN AS BANKER OF WORLD

The inhabitants of Great Britain, notwithstanding the limited extent of the natural resources of their own country, and their need to purchase from other lands, and to transport from distant parts of the earth the greater portion of their supplies of food and raw materials, have been so successful in overcoming the obstacles placed in their path by nature that they have not only had the means of purchasing all the food, raw materials, and manufactured goods they have needed to buy from other lands for their own consumption and maintenance, but they have been able to create so much surplus wealth that they have supplied other nations with visible capital to the extent of nearly £3,200,000,000, or approximately $16,000,000,000, as well as with a large amount of private capital, so that the total sum provided is estimated to be upwards of £3,500,000,000. The days of miracles are supposed to have passed, but had anyone predicted two generations ago that in 1911 Great Britain would possess this great wealth abroad, over and above the vastly increased wealth of her people at home, the prediction would have been regarded as beyond the possibility of realization, said the editor of the Statist in a recent lecture.

That Great Britain has been so successful is undoubtedly due to the enterprise, courage, hard work and thrift of her people which have caused them to save money in the first place; and in the second to use it wherever the best results were to be obtained whether in their own country or in other lands. In fact, wherever capital has been urgently needed and likely to obtain profitable employment the British investor has been ready to find a large part of the sums required. Sometimes new railways were urgently needed, sometimes the production of coal required to be expanded, sometimes the copper supply had to be largely increased, sometimes tin, or nitrate, or gold, or silver, or lead, or tea, or rubber, or oil, or electric power—in fact, British capital was available for producing anything that the world urgently required for its use. The result of this attitude of our investors has been an increase not only in the wealth of Great Britain beyond the dreams of the most sanguine, but an expansion in the prosperity of the whole world at a rate and in a measure never previously witnessed or possible. The greatness of the work accomplished by the investors of Great Britain cannot fail to impress every impartial person.

The lecturer, in weighing up the advantages which have accrued from Great Britain's policy of investing capital wherever it was urgently needed, said: "In ascertaining the large amounts of capital that Great Britain has supplied to individual colonial and foreign countries, one is compelled to recognize the powerful influence which Great Britain has exerted in developing the world's natural resources by supplying other countries freely with the funds for railway construction, for mining, and for the production of every kind of natural wealth. It is no exaggeration to state that Great Britain's enterprise in placing her supplies of new capital wherever they could be profitably employed has been one of the great forces which has made for the increased prosperity of the human race in modern times."

The income directly derived by the British people from their investments abroad now reaches a very large sum. In the paper it is shown that the investment of about £2,700,000,000 of British capital up to the end of 1907 in other lands gave a direct income of £140,000,000 a year to this country, and it is fair to assume that the investment of nearly £3,200,000,000 gives a return of about £166,000,000 a year, a sum which comes to us in the produce of the countries in which we have invested capital, and thus provides us with no inconsiderable part of the supplies of food and raw materials we obtain from abroad. But the indirect advantages of the capital investments are quite as important as the direct advantages. By means of the capital which our investors have supplied, the young countries and India have so greatly expanded their productions of food and raw materials that they have had the means not only of paying the interest due by them to Great Britain, but of purchasing greatly increased quantities of British goods. The prosperity of Great Britain, which has provided the capital, has been stimulated in three ways.

First, the remittance of capital to other lands has created a greatly increased demand for British goods.

Second, the remittance of the interest upon the capital has increased Great Britain's purchasing power and has given her the means of paying for a large part of her supplies of food and raw materials.

Third, the investment of British capital abroad has greatly increased the production of other countries and given them the means of purchasing additional quantities of British goods.

Moreover, after 60 years of large investments the world's need of British capital is greater than ever, and in 1910 the amount of British capital supplied to other lands reached the unprecedented figure of £165,000,000, while in the last three years it has been £455,000,000. The investment of this new capital assures to the world in general fresh supplies of food-tuffs and raw materials, and to Great Britain in particular the additional quantities of foodstuffs and of raw materials needed to feed and clothe her growing population. Furthermore, it enables other nations to purchase additional quantities of British goods both by reason of the loans of capital and of their increased productions. In brief, the investment of British capital wherever it is needed brings advantage to everyone.

In the Daughter States of the Empire and in India the investment of British capital has been very great; in the aggregate it reaches £1,564,000,000, of which £83,000,000 has been supplied in the present year. In the three Daughter States of Canada, Australasia and South Africa the amount reaches nearly £1,100,000,000—a very large sum when we recollect that the total population of these three countries is only 20,000,000. Commenting upon these great investments, the lecturer stated that, "in so far as the prosperity of the British Empire is governed by the amount of capital which the Mother country is able to supply to the colonies and to India, its future expansion in population and prosperity is assured. Never has Great Britain had so much new capital available for investment in the colonies and in India, and never has she supplied money so freely to the other nations of the Empire as she has done in the past few years."

WILL BE CALLED STRATHCONA PARK

Accepting the invitation to allow his name to be linked with British Columbia's new provincial park at Buttle's lake, which will be known as Strathcona Park, Lord Strathcona has cabled the Hon. Dr. H. E. Young the following:

Hon. H. E. Young,
Victoria.

Your cable message intimating that the government of British Columbia has set aside a large area surrounding Buttles lake for a provincial park, thus adding another charm to the already beautiful and fertile island of Vancouver, and which they desire to call Strathcona Park, received. I would regard it as a signal honor to have my name so associated with the park, and feel deeply grateful to your government for the great kindness and consideration in so honoring me.

(Signed) STRATHCONA.

ST. ANDREW'S CHURCH

The annual congregational meeting of this congregation was held on Wednesday evening in the church. In the absence of the interim moderator, Rev. J. W. Woodside, Mr. G. A. McBain was called to the chair.

The reports from the different organizations were submitted and are briefly summarized in the following letter from the session to the members and adherents, which is printed with the accounts circulated:

To the Members and Adherents of St. Andrew's Church, North Vancouver

Dear Friends,—We take this opportunity of the retirement from the pastorate of our congregation of Rev. John D. Gillam, M.A., who has so faithfully and loyally ministered here during the past six years, to lay before you a brief record of the progress of the congregation so far as that can be shown by statistics.

The first enrollment of members of the congregation was made at the communion in March, 1905, when nine names were entered, but a local session was not constituted till July of that year when Messrs. McBain and Philip were elected. At the present time the Congregation has an enrolled membership of 175 and a large number of adherents, and the session consists of Messrs. Geo. Baldwin, H. B. Howell, G. A. McBain, R. McMillan, Alexander Philip and C. J. Telfer.

The Sabbath School was begun in 1904, before the church was erected. It has now an enrollment of 18 teachers, 160 scholars and 20 members of the Minister's Bible Class.

The revenue of the congregation from the ordinary collections and from all sources has been as follows, viz.:

Year	Ordinary Collections	Total
1905	$ 460.56	$1186.17
1906	761.41	1651.46
1907	1129.42	1871.32
1908	1296.75	3041.20
1909	1527.48	2878.29
1910	1786.65	3930.50

During the past year the North Lonsdale congregation has been organized. Through office-bearers of this congregation they have received property to the value of $3940 for the carrying on of their work and under Mr. Van Munster that young congregation is doing well.

We sincerely trust that we will all unite in the heartiest possible way in taking the necessary steps to fill the vacant pastorate and to carry forward the work of the church here.

We are, dear friends,
Yours faithfully,
BY ORDER OF THE SESSION

18th January, 1911.

The following were appointed to the Board of management: Messrs. A. J. C. Robertson, A. Wickins, J. McMillan, J. Cant, Ira Peers and W. C. Mitchell, and these with Messrs. R. J. Fowler, John R. J. Murray, Richard Hutchison and Wm. Knowles with the session now constitute that Board.

In the absence of the moderator no steps were taken towards filling the vacant pastorate but it was resolved that an adjourned meeting would be held on Monday evening next to take that matter into consideration.

After the business of the evening was transacted the congregation adjourned to the basement hall where a number of ladies had refreshments ready for service in the form of coffee and cake.

NOTICE TO CONTRACTORS

Wing, Court House, Vancouver.

SEALED TENDERS, superscribed "Tender for Wing, Court-house, Vancouver," will be received by the Honourable the Minister of Public Works, up to and including Thursday, the 2nd day of February, 1911, for the erection and completion of an addition to the court-house at Vancouver.

Drawings, Specifications, Contract, and Forms of Tender may be seen at the office of the Provincial Timber Inspector, Vancouver, B. C., and at the Department of Public Works, Parliament Buildings, Victoria, B. C.

Intending tenderers can, by applying to the undersigned, obtain one copy of the drawings and one copy of the specifications for the sum of twenty-five ($25) dollars.

Each tender must be accompanied by an accepted bank cheque or certificate of deposit on a chartered bank of Canada, made payable to the Hon. the Minister of Public Works, for a sum equal to five (5) per cent. of his tender, which shall be forfeited if the party tendering decline to enter into contract when called upon to do so. The cheques or certificates of deposit of unsuccessful tenderers will be returned to them upon the execution of the contract.

The successful tenderer shall furnish a bond of a guarantee company satisfactory to the Minister of Public Works, equal to twenty (20) per cent. of the contract amount, for the due fulfilment of the contract.

Tenders will not be considered unless made out on the forms supplied, signed with the actual signature of the tenderer, and enclosed in the envelopes furnished.

The lowest or any tender not necessarily accepted.

F. C. GAMBLE,
Public Works Engineer.

Department of Public Works,
Victoria, B. C., 5th January, 1911.

FREIGHT HAUL IS LONGEST IN WORLD

The annual report of J. Lambert Payne, controller of railway statistics, delivered at Ottawa recently shows that the year 1910 established significant marks in railway development and operation in Canada. The railway mileage of the Dominion increased from 24,194 in 1909, to 24,731 in 1910, an addition of 627 miles. Of this increase 519 miles were in the western provinces. These figures do not include any mileage attached to the Grand Trunk Pacific, which is officially regarded as "under construction," although over 1,000 miles were in actual operation during 1910. It is estimated that 4500 miles of railway were under construction on June 30 last. During the year 79 miles of second track and 344 miles of yard tracks and sidings were made available. During the year $10,816,271 was added to capital liability bringing the total up to $1,310,297,687 of which $667,557,887 was represented in stocks and $722,740,300 in bonds. The actual outstanding liability on June 30 last, after eliminating duplication was equal to $52,361 per mile of line. Cash subsidies during the year amounted to $1,789,724 and bring up the total to $146,932,180 by the Dominion, $35,838,040 by the provinces and $17,983,823 by municipalities. In addition 55,232,321 acres of land have been granted of which 32,204,328 were alienated by the Dominion. Guarantees to June 30 amounted to $127,336,357.

The public service of Canadian railways was represented in the carrying of 35,894,595 passengers and 74,482,866 tons of freight, an increase of over 3,221,267 passengers and 7,640,608 tons of freight. The average number of passengers per train were 59 and the average passenger journey 69 miles. An average freight train consisted of 311 tons and the average freight haul was 211 miles. The average passenger journey and average freight haul in Canada are the longest in the world.

The gross earnings for 1910 were $173,957,217, a gain of $28,899,881 over 1909, an average of 19.9 per cent.

Operating expenses amounted to $120,405,400, an increase of $15,895,356. Net earnings were $53,550,778 or 32.2 per cent. better than for the preceding year. Gross earnings were equal to $7,031 per mile and net earnings to $2,166. Of the amount of earnings $16,088,889 came from passengers and $117,497,604 from freight. An analysis of operating expenses showed that considerable increases had been made in maintenance of way and equipment so that the physical upkeep of the railways was well maintained.

Six hundred and nineteen persons were killed in 1910 and 2139 were injured. Of these 524 were killed and 1441 injured from the movement of trains. The killed included 60 passengers and 214 employees. Accidents at highway crossings during the year resulted in 63 persons being killed and 61 injured. The 123,763 employed involved a wage and salary bill of $67,167,793 as compared with $63,216,662 in 1909.

Mileage of electric railways grew from 989 in 1908 to 1018 in 1910. The capital liability increased from $91,804,989 to $102,044,989. Gross earnings reached $17,100,789, a betterment of $2,275,863. Net earnings reached $5,383,276 for taxes and interest on funded debts. The electric railways of Canada carried 360,964,876 passengers in 1910 and 852,298 tons of freight. Employees numbered 11,396 and the wages bill was $6,316,757. Accidents led to the death of 95 persons and the injury of 2538.

CANADIAN GRAIN ELEVATORS

The grain statistics issued by the department of trade and commerce show that the total number of grain elevators and warehouses throughout Canada on August 31, 1910, was 1,840, with a total storage capacity of 94,266,100 bushels. The bulk of the grain comes through the elevators of the western grain inspection division, which have increased in number from 523, with a total storage capacity of 18,879,352 bushels in 1900-1 to 1,820 in 1909-10, with a capacity of 77,901,100 bushels, which added to the 20 eastern transfer elevators with a capacity of 16,365,000 bushels makes the totals for Canada 1,840 elevators and warehouses and 94,266,100 bushels as stated.

P.O. Box 11

DISMISSED CASE

In Lynn Valley on Saturday last Geo. Myers was charged with threatened assault on the person of Sam Mars. The case was heard by Reeve McNaught who decided that the facts as submitted did not constitute a sufficient cause for alarm and dismissed the charge. Messrs. Mars and Myers are residents of North Lonsdale and the dispute arose first through the ownership of a shack or tent.

MAY INTRODUCE BOARD CONTROL

If changes proposed by Mayor Morley of Victoria are adopted alterations will be made in the manner in which the council deals with the public affairs of the city. His worship favors council meetings held but once a month, the creation of a board of of works which shall be composed of the heads of the various standing committees and all work to be carried through under the direction of an administrative committee of control.

FRESH GAME BIRDS FOR THE PROVINCE

Provincial Game Warden A. Bryan Williams says his department is continuing its policy of introducing fresh blood for the pheasants, partridge and prairie chicken of the province. Within the past two years about 1,500 pheasants have been put out in the lower mainland and Vancouver island and the good results in the improvement of the quality of the birds have already been seen. For some time the British Columbia pheasants had been deteriorating in size and quality and the department found this plan of improving the breed an excellent one. It is likely that more pheasants will be brought in this year, although the object aimed at has been practically accomplished.

Some partridge were turned out at Agassiz last year and are doing well. Fifty brace have now been ordered for distribution among the native partridge this season. The partridge in the province are increasing rapidly and it is for the purpose of having the quality of the stock kept up to the quantity that the game department is introducing new birds.

Prairie chicken have also been ordered from Saskatchewan to breed with the chicken now in British Columbia, which are spreading rapidly, especially in the Okanagan Valley.

On account of the fact that grouse are almost impossible to secure no efforts are being made to bring any of them in, either willow or blue variety which are the most common here. The British Columbia grouse in any case have not shown any signs yet of material deterioration in quality.

Mr. Williams says that if the heavy snowfall in the mountains continues the situation with respect to the feathered game as well as the deer and wapiti will become serious. A heavy snowfall would mean a scarcity of food and the deer especially would be driven down into the lower ranges, where they were more likely to become the prey of other animals and less likely to obtain food to their liking.

B. C. GAZETTE

IN THE MATTER of the Water Act and Amending Act and

IN THE MATTER of License No. 42 granted to the Corporation of the District of North Vancouver for 300 inches of water to be taken from Lynn Creek, dated the 30th August, 1904.

NOTICE is hereby given that the City of North Vancouver being the owner and licensee under the said license by virtue of the North Vancouver City Incorporation Act, 1906, will apply to S. A. Fletcher, Esq., Water Commissioner for New Westminster, B. C., on Wednesday the first day of March, 1911, at the hour of eleven o'clock in the forenoon or so soon thereafter as counsel can be heard for an order amending the said license by substituting therein as licensee the name of the City of North Vancouver in place of the Corporation of the District of North Vancouver, and for adding to the words defining the point of diversion the words "and at a point on Lynn Creek either on Lot 999, Group 1, New Westminster District or Lot 1363, Group 1, New Westminster District at or near the boundary between the said Lots" or, in the alternative, for an order amending the license originally granted apportioning the water to be taken from Lynn Creek under said license No. 42 between the point of diversion as set out in the original license and a point of diversion of Lynn Creek either on Lot 999, Group 1, New Westminster District or Lot 1363, Group 1, New Westminster District, at or near the boundary between said Lots or to issue two or more licenses for the water to make such other order in the premises as may be just and equitable.

DATED this 24th day of December, 1910.

R. L. REID,
Solicitor for said City of North Vancouver.

(Signed) CHARLES T. BREWER,
(Signed) FRED TUCK.

27-1

DISTRICT OF NORTH VANCOUVER

NOTICE OF COURT OF REVISION

NOTICE is hereby given that the Court of Revision of District Assessment Roll will meet in the District Municipal Office, North Vancouver, on Tuesday, the 14th day of February, 1911 at 3 o'clock p.m. when all complaints and appeals against assessments will be considered.

Notice of complaints and appeals must be given to the Assessor at least ten days before the said date, and such notice must set forth the ground of complaint.

Given under my hand this 5th day of January, 1911.

JOHN G. FARMER, C.M.C.

W. C. T. U.

The local W.C.T.U. will hold a special meeting at the home of Mrs. Ellingson, 18th street, next Thursday afternoon at 3 o'clock. On account of the importance of the business in hand all members are requested to be present.

MEETINGS WEEKLY

It is understood that owing to the amount of business coming in to the district office it will be necessary for the council to hold weekly meetings in order to keep matters up to date and relieve the congestion that would otherwise be caused if the meetings were deferred to twice a month.

LEFT FOR THE EAST

Mr. T. L. Kennedy, contractor and pioneer resident of this city left for Ottawa on Saturday where it is rumored an interesting event will take place in which Mr. Kennedy will be one of the principals. Mr. Kennedy is a son of Mr. S. Kennedy of 12th street, and is also interested considerably in real estate.

LOST AND FOUND

On Saturday afternoon when darkness was settling down the police were notified that five of Mr. and Mrs. Hooper's little children had strayed from their home on Ottawa Gardens and were nowhere to be located. The eldest of the five was said to be about 10 years of age and the youngest a small tot. The police instituted a search but soon afterwards the children returned home of their own accord. They had been out playing and became so interested that time slipped by and the usual time for their returning home passed. When darkness threatened however they quickly took the back trail.

Burns' Supper (Haggis)—25th January, 1911, Horticultural Hall.

WANTED—A young man as stenographer for the city engineer's office, North Vancouver. Must be thoroughly competent. Applications to be made personally on or before Saturday noon, January 28th.

GEO. S. HANES,
City Engineer.
