Grosvenor Square. W.

Jan 5/63

Dear Mr. Chadwick

Many thanks for
your kind letter and
for your "Address."
The Lancashire
distress must stand
first now in all
minds. And therefore
I only mention two
of my own concerns
to you now, in answer to
yours. I have sent (to the
Athenaeum) a copy of
my Indian paper

June 23rd 1848
W. Campbell Esq.

(will woodcut) for
you, & one for Mr.
Mill. Please
remember & remind
him (tho' it seems
impertinent to say
so to two such
distinguished officials)
that it shall be
strictly confidential
till the Indian Blue
Book is laid on the
table of the H. of C.
2. It is really despair
giving & keeping the

obstinate & interested
ignorance of the News-
paper about Dr.
Thomas. One day "of
course the brains of
a Hospit. must be
the Med^l. Staff" of
course it must be
a Dr. who writes. Of
course, if the Hospit.
Cook were writing, it
would be, "the brains
of a Hospit. must
be the head-Cook".
Or if a Nurse, "the
Matron". — The real
truth being that the

"brains" are fixed in
the collision of all these
authorities, Medical,
Administrative, Nursing
Governing.

But I should like
to know what great
sanitary improvements
Med. men would have
made, by themselves?
And the two Works
Koepfle I know in
the world, Edinburgh
& Vienna, are exclusively
managed by these
"brains," the Med. staff.
Yours ever J.W.
