I was most thankful to see this letter
It has just come in (from Lady Williams, I suppose)
& after having read it 20 times, I return it
in haste with a rain of thanks -
6 black letter days in the Calender -
but even the man "hid in the washerwoman's cart"
makes them less appalling -

35 South Street,
Park Lane,
W.

I had a letter yesterday from a lady at Versailles. She describes the rage of the people against the Communeux - They would hardly let her give a drink of water to an Communeux mortally wounded who was brought in. She says she cannot help feeling this

save herself -

All her poor people whom she had re-established in their old quarters, Meudon, Garches, La Celle St. Cloud, St. Cloud (the last at the village of Boulogne) driven out again

Ever your
Flo.
