THE GREENWOOD MINER.

Published Weekly.

VOL. III. NO. 28. GREENWOOD, B. C., JULY 12, 1901. PER YEAR, $2.00

THE B. C. MINE.

The following description of the B. C. mine, written by S. F. Parrish, M. E., manager of the mine, was obtained from that gentleman by E. Jacobs, district correspondent for the British Columbia Mining Record and the New York Engineering and Mining Journal, both of which publish it this month, with photographs and the cross section referred to:

This property, the B. C. mine, owned by the B.C. Chartered company, limited, of Montreal, Quebec, is situated in Summit camp, in the Bonndary district, on the divide between the North Fork of Kettle river and Boundary creek, about midway between the towns of Grand Forks and Greenwood.

The location was made in 1896 and development work was commenced in the summer of 1897. A shaft was sunk to a depth of 160 feet, mostly in ore and vein matter. From this two levels were turned, one at 50 feet and the second at 150 feet, and drifting was started in a general northerly and southerly direction, following the strike of the ore body, so far as it could be determined. A branch of the Columbia and Western railway was completed to the mine in in the autumn of 1899, this being a spur from the line from Eholt to Phoenix, and early in January, 1900, ore shipments were started from the dumps of ore that had accumulated during the development work. In June ot the same year stoping was commenced.

The mine is equipped with a sufficient plant to break and hoist more than 200 tons of ore a day through the present shaft.

The country is limestone which has undergone various degrees of alteration from a white crystalized or marbleized rock, containing about 48 per cent lime, and 7.30 per cent silica and having a specific gravity of 2.67, to thoroughly metamorphosed limestone, having ordinarily a small gold value, about 3-100 of an ounce, and containing 70 per cent to 80 per cent silica and from 6.25 to 8.75 per cent lime, with a specific gravity of about 3.00. There are different stages of alteration, of course, between the above mentioned limits, one piece of rock not infrequently showing various degrees of metamorphism.

The microscopical determinations of a number of specimens of this highly altered limestone have revealed the presence of the following minerals, most of which are seen in each specimen: quartz, plagioclase, epidote, garnet, zoicite, magnesium and calcium carbonates, actinolite, kaoline, pyrite, chlorite and serpentine.

Into this mass of rock sheets of porphyry, varying in thickness, from four or five feet to thirty odd feet, have intruded, the intrusions having apparently followed more or less closely the bedding of the limestone. A microscopical examination of these sheets of eruptive rock reveals the following minerals: plagioclase, orthoclase, microcline, biotite and a little quartz, and the decomposition products of these minerals, viz.: chlorite, carbonates and kaolinite. An analysis of two different varieties gives, respectively, silica 82.79 per cent and lime 2.37 per cent, and silica 53.21 per cent, and lime 5.52 per cent; specific gravity about 2.67. It will be noted that the porphyryis not mineralized at all.

Cutting through the above described formations are several faultings having a general northerly and southerly strike, with a slight dip to the east. There does not appear to have been any great vertical displacement, but there are indications of a more or less extensive lateral movement. It is in or near this faulting that the ore is found, extending into the country rock in a lens-shaped mass so far as developed having an extreme width of about 65 feet by about 200 feet in length. This extends from the surface of the ground to a depth of nearly 300 feet, below which it has not as yet been followed.

As will be seen from the cross section herewith the ore lies in close contact with each porphyritic intrusion, both above and below it, the only effect having been a possible slight throw of the ore to the east. The ore itself is chalcopyrite, pyrrhotite and some pyrite, with a small quantity of gold and silver. On the edges of the main ore body bunches of specular iron and zinc blende occasionally occur, but never in the ore mass. The specific gravity of the ore is 3.65 to 4.00. Garnet rock is the mineral most intimately associated with the ore, occurring around the edges of the ore body and occasionally in masses in the midst of it. A noticeable feature is the entire absence of oxidization of the ore body, at the outcrop or elsewhere.

The main ore mass is made up of more or less horizontal sheets of ore varying from a few inches to several feet in thickness, possibly maintaining very much the form of the original bedding of the limestone, of which it is probably a replacement. There is no cementing of these layers, consequently great care has to be exercised in breaking the ore, for if too largean excavation be made without careful timbering one sheet will fall from the one above it by its own weight. It has been found necessary to timber the stopes with square sets throughout, there being no other practical method of supporting the ground. The sets are made of 10-inch square timbers and are placed with five-foot centers.

The facilities for economical mining, shipping and smelting are excellent."

Additional information relative to this property, as under, is contributed by Mr. Jacobs:

The B. C. group consists of the following crown granted mineral claims: B. C., Truckee, Reveille, Hilda, Vashti, Falcon, J. W., London, Daisy fraction, B. C. fraction and Novelty fraction. These contain a total area of 268 acres. Practically all the important development work done to date on the group has been done on the B. C., this being about 6,700 lineal feet, of which 1,410 feet is sinking and raising and 5,290 feet crosscutting and drifting. As stated above by Mr. Parrish, ore shipments commenced in January, 1900. The tonnage shipped since then, to May 31 of the current year, is as follows:

January,	1900	157
February,	"	883
March	"	660
April	"	214
May	"	308
June	"	1,437
July	"	1,400
August	"	1,547
September	"	2,928
October	"	3,672
November	"	2,213
December	"	3,775
January	1901	2,956
February	"	3,596
March	"	3,160
April	"	5,832
May	"	4,532
		39,570

Reduced to pounds the quantity of ore sent to the smelter is 79,140,482 pounds, gross, or 78,101,110 pounds net. The yield of gold, silver and copper, from this was gold, 628.83 ozs.; silver, 111,779.74 ozs., and copper, 4,366,203 lbs. The average copper values were therefore nearly 7 per cent. The tonnage for June was about 5,130 tons. With very little exception this ore was treated at the Trail smelter.

The power plant at the B. C. mine includes four boilers, together about 225-horse power; a straight line Raud 4-drill air compressor; half of a class G Ingersoll-Sergeant air compressor, rated at 10 drills; one large and two small hoisting engines; two sinking pumps; an electric light engine and dynamo and a full complement of accessories. At the present time a diamond drill plant is at contract work in the mine, prospecting both horizontally and vertically. Quite recently there were 110 men employed here, but the pay roll at the present time is not up to this its maximum number.

The manager, Mr. S. F. Parrish, M.E., has had many years' mining experience having been engaged in mining in Colorado for about 24 years, of which 13 to 14 years were spent in Leadville, in charge of various work and properties, among the more important of these having been the mines of the Chrysolite Silver Mining company and the Yak Mining, Milling and Tunnel company.

BOUNDARY ORE SHIPMENTS.

The tonnage of Ore shipped by Boundary District mines during July to 11th inst., inclusive, so far a has been ascertained from the mines is as under:

MINE.	TONS.
Old Ironsides and Knob Hill Group	4,888
Mother Lode	4,136
B C	1,565
R Bell	60
No. 7	30
Total	9,709

Shipments during 1900 and for six months of the current year ended June 30, were as follows:

	1900	1901
Old Ironsides and Knob Hill Group	64,535	110,307
B C	19,494	25,206
Mother Lode	5,564	38,726
City of Paris	2,000	.....
Golden Crown	2,240	.....
Winnipeg	1,100	50
Athelstan	1,200	550
Carmi	.....	1,000
Snowshoe	338	320
Brooklyn	150	.....
Jewel	150	.....
R Bell		100
Sundry shipments	1,000	500
Total	97,771	176,759
Grand total to date		284,239

MINING NOTES.

Rumor has been busy around town during the week, but, as is often the case, it was astray in its assertions. The British Columbia Copper company was credited first with having bought the Big Copper, in Copper camp, next with the Oro Denoro, in Summit camp, and finally with the Monarch and Tamarac, in Greenwood camp. Enquiry at the local office of the company elicited the assurance that, so far as the general manager knew, none of these rumors were credible. Then it was asserted that the Dominion Copper company was negotiating for the purchase of the Oro Denoro, but from facts that have come to the knowledge of the Miner this report, too, is likely to for the present at any rate, be found mere gossip.

Chas. E. Betts, accountant for the Cariboo-McKinney Mining and Milling company, came down from Camp McKinney last Sunday and spent several days in Greenwood. From him it was ascertained that the mining industry is moving forward steadily at Camp McKinney, where the Cariboo mine is continuing to yield gold regularly. He had nothing to communicate respecting the contemplated addition of more stamps to the mine mill, but from another source it is learned that the stamp mill at Fairview owned by the Jenckes Machine company or the Canadian Rand Drill company—these companies being under the same management in this province—is under offer to the Cariboo-McKinney company, but that a decision as to its purchase or otherwise has not yet been reached.

John Rogers, formerly at work on the Hard Cash and neighboring mineral claims, situate in Wellington camp, and more recently in charge of the Pathfinder, on the North Fork of Kettle river, came over from Grand Forks early in the week on a brief business visit. From him it was learned that there is little if any mining being done just now on the North Fork, although it is hoped that it will not be long before two or three of the mines in that locality will be at work again.

Geo. D. Brice, master mechanic at the Mother Lode mine, near Greenwood, has returned from Portland, Oregon, whence he went two month ago on a vacation. J. C. Crawford, who relieved him, is to have charge of the machine shop that is being put in at the mine. J. Skelton, one of the hoist engineers, is leaving on a visit to Portland, where his family reside, and it is likely that on his return he will bring them with him to live at the mine.

The Engineering and Mining Journal states that the Amalgamated Copper company, of Montana, will on July 29th inst., pay its quarterly dividend, which this time will be at the rate of $1.50 per share, equalling $2,325,000 and making its total dividends to date $13,600,000. The Calumet and Hecla Copper company, of Michigan, will on the 31st inst. pay $15 per share on its 100,000 issued shares, making, with its last quarterly dividend, $3,000,000 for 1901 and an aggregate of dividends paid by it of $75,850,000.

R. A. C. McNally, British Columbia agent for the Jas. Cooper Manufacturing company, was over from Rossland last Saturday and Monday on a business trip. Mr. McNally was good enough to express the opinion that the review of the mining and smelting industries of the Boundary district, first published by the Greenwood Miner and afterwards issued in pamphlet form by the local board of trade, is likely to be of much benefit to the district at large.

Last Sunday a halt had to be called in hoisting ore at the Mother Lode mine, all the ore bins and available ore cars having been filled and, owing to the block on the branch line at Eholt, there was no locomotive to haul the ore to the smelter. Since then work has been going on as usual and ore has been coming to the smelter daily. It is intended to in future shut down the mine every Sunday if practicable, so that the men may have one day's rest out of seven.

H. H. Wilmot has started the "boom" process again on Rock Creek and shareholders in the Rock Creek Consolidated Placer company are again hopeful that their expectations will be realized. The management have now got down to business in good earnest and if they do not make a success of the venture it will not be for want of trying to do so. The prospects are now more encouraging than under the earlier "happy-go-luck" arrangement.

The Blue Bell, in Summit camp, is idle pending the making of arrangements for payment of the wages of the men who have been employed on the claim. A telegram has been received in Greenwood, John Dorsey, who is in the east, to the effect that the Blue Bell has been sold.

Those who met Dr. J. B. Porter, professor of mining and metallurgy at McGill university, when he was here a few weeks ago with McGill mining school, may be interested to know that since leaving the Boundary he has spent a few days at Grass Valley, California, examining mines there.

W. T. Smith is reported to have given an option on the Republic group, in Smith's camp, near Boundary Falls, to an English syndicate, consequently he has suspended work on the claims.

The tunnel C. Scott Galloway has for some time past been having driven on his Strathmore claim, in Province camp, s short distance from Greenwood, is now in more than 200 feet.

A car of ore was shipped from the No. 7 mine, Central camp, to the British Columbia Copper company's smelter, Greenwood, early this week. This is the first lot of ore sent out from the mine since the machinery was installed and, too, the first ore hauled to the railway by R. F. Coates under his contract for hauling. It is intended to send down six or seven carloads per week.

The United States copper production for the first four months of this year has been singularly close to the figures as regards the same metal output for the like period of 1900. Between January 1st and May 1st this year the U. S. copper output has been 88,784 English tons of 2,240 pounds, as against 89,260 tons for the same period of 1900.

A new stope has been opened at the B. C. mine, near Eholt, between the 325 and 250-foot levels, this giving 75 feet vertical of ore. The diamond drill is still at work prospecting. The working force at this mine has been increased, numbering now about 100.

Gilbert Mahon, manager of the Jewel mine, in Long Lake camp, is expected back from England, and may arrive any day. He was in Montreal last week. Work at the mine is in progress under the direction of W. Rowe, who has some 30 men employed there.

There are 15 men at work on the Rathmullen group, in Summit camp. There are about a dozen claims in this group, but so far only one or two of them have had any development to speak of done on them.

The road from the No. 7 mine has been too soft for hauling much ore to the railway as yet. Drifting at the 60 and 120-foot levels is being continued. The re-timbering of the shaft is about completed.

THE SNOWSHOE.

Mr. G. S. Waterlow, of the well known English publishing house, states that the Snowshoe mine at Boundary has been successfully floated in London, although the time was inopportune, coming immediately after the collapse of the B. A. C. The capitalization of the new venture is stated to be, relatively speaking, small, while an ample amount has been set aside for working purposes. The Snowsoe is one of the most promising copper mines in the Boundary. The men connected with its direction are not market manipulators, nor promoters of an evil type, who have been the curse of British Columbia mining, but "straight" business men of the city of London. The Snowshoe mine will, therefore, be worked for what the ground contains, and not as a means of extracting money from duped investors.—News-Advertiser.

THE GOLDEN CROWN

The second extraordinary general meeting of shareholders in the Braidon & Golden Crown Mining company, limited, necessary to authorize the winding up of the company and the organization of a new company with an assessable margin of five cents per share to provide money for the discharge of the liabilities of the old company and for the further development of the Golden Crown mine, in Wellington camp, was held in Rossland on Tuesday last. The resolutions passed at the meeting held in Greenwood last month were duly confirmed. It is hoped that preliminaries will be completed in time to admit of work being resumed at the mine next month.

A NEW COAL COMPANY.

The Similkameen Valley Coal company, limited, expect to have their incorporation perfected within the next 30 days, when they will be in shape to commence the work of developing their coal properties. The company will be capitalized for $1,000,000, in shares of the value of $1 each, and of the entire stock authorized one-half will be put into the treasury for development purposes. The company has 4,500 acres of coal lands in the Boundary district, about four miles from Princeton, and lying between the Similkameen and Tulameen rivers.—Nelson Tribune.

For sale at a special bargain, one new upright Gerhard Heintzman Art Piano, very latest design, handsome walnut case, for $425; regular price $600. The Gerhard Heintzman is the premier piano of Canada, is used in all leading conservatories and endorsed by the best professional musicians. Bargains in new slightly used upright pianos from $275 up. Terms to suit. Greenwood Music Store.

MINING VS. SPECULATION.

To the Editor of the Montreal Star:—

SIR:—The papers of Montreal and Toronto have recently contained articles of criticism and figures have been adduced claiming to repsesent the losses incurred to those and other eastern Canadian cities in mining in British Columbia.

To the minining industry of British Columbia this is manifestly unfair. The money lost in the recent slump in Northern Pacific stocks in New York and elsewhere, was not lost in "railroading." The money lost in wheat and corn stock is not money lost in farming; nor is money lost in "speculating" in mining stocks lost in mining. Furthermore, half the money—or a considerable portion of the money claimed to have gone into British Columbia mines, has not been so expended. The Virtue, for instance is an Oregon property; the Stanley, a Colorado property, each took a great sum of money out of Montreal; Oregon, California, Idaho and many other western states, took considerable money too. On the other hand, many of the stock investments, now so low, will not long so remain. The Centre Star, St. Eugene, Rambler-Caribo, Noble Five, and many others, will in due time make money for their stockholders. No reference is made whatever to a number of good paying mines which might be mentioned; the owners of which are not saying anything for publication, but making money steadily. I know of several.

Mining may be, and often is, looked upon as a gamble; under proper conditions this is a mistake. When the business is managed properly, by competent men, and when sufficient capital for proper and economical working and development, is forthcoming, the risk is reduced to a minimum, and not above the average incurred in other lines of business.

Good mining men can reckon sometimes to a fraction the values of ore in the mine, much the same as the timber inspector estimates the quantity of timber on a certain tract of timber land. They know what it will cost, very closely at least, to take out such ores, and the freight rates and incidental expenses necessary to land same at the smelter. They can easily compute values of ores, and quantity available for shipment. They will only buy on values thus computed and they are as often under the actual as over in their estimates. A mine manager, if he knows his business, studies it closer and makes a study of his mine, cannot be very much astray in his estimates of what his mine can produce, and also pay under his supervision and will regulate the expenses of the mine accordingly.

The greatest evil to stock mining is over capitalization. Greedy promoters want to make as much as the mine is worth for making sale and stocking and selling to the public. I know of several such cases. This works an injury to the country.

I know today of two or three mines that can be bought outright for much less than the value of ore in sight and obtainable for shipping and marketing, and this at present market quotations of values of the metals contained in the ores. To those unfamiliar with mining this may seem an exaggeration, but not so when the exact circumstances are understood. In one instance, the manager and principal owner has mined and worked in mines all his time and is getting old—is satisfied to take even less than the value of his mine, so as to retire with enough to live comfortable on the remainder of his life, and it will be amply sufficient for him. He is a careful mining man, knows what he has in his mine, but will not leave it to others to manage while he is the owner. Another instance is of owners in a very good mine being unable to agree, one side threatening to serve injunctions and resort to law, if policy and plans adopted for working mine are not changed to suit their ideas of how it should be done.

Again a mine may be worked by poor men up to a certain stage of development, it then requires extensive improvements at heavy expense; perhaps a long tunnel to enable the ore to be taken out by gravity or without hoisting, putting in hoisting, pumping, or other machinery. The owners have made a nice sum and do not want to put all back again, and lay out of it for months pending developments on a larger scale, which as the mine grows may be deemed necessary for economical handling of the ores. They conclude best to sell to some wealthy company, who can command sufficient money to expend in advance sufficient for such develpment, and wait until profits as result of such work are obtained. Now in such cases, and there are plenty of them, the people buy stock at prices treble the value of what such a mine cost. If such people would form a company of their own, pay the prices at which such a mine or mines can be purchased, and keep their shares or interests to themselves, spend directly on the mine development what would be lost on inflated, over capitalized stock, what a different story could be told of mining in British Columbia.

Spokane real estate brokers, men with nothing but wind, and they are not a few in that town, men who had never seen a mine could go east and fleece the poor people out of their money, while men at the front, practical and experienced men, were passed by. British Columbia like all new mining camps or countries, has, and is having, its setbacks and troubles, but you can not keep a good man nor a good thing down. It has immense treasures of wealth in its mineral resources. It is only a matter of time when they will be appreciated. Then watch the results of mining in British Columbia. Truly yours,

J. C, RYAN.

Kaslo, B. C., 1901.

OPPORTUNITY

Westward is your OPPORTUNITY!

The Town of Rendell, on the West Fork of Kettle River is now on the market.

For the man of small capital it affords uuequalled opportunity for sure investment.

With title perfect, prices low, terms liberal and excellent outlook, the sales are bound to be large.

IN

the hills surrounding this new town are excellent mining prospects. Several of them have already demonstrated that they are mines.

The richness of the ore justifies hauling it at present to Midway, by teams, over rough roads.

Good roads and railways mean fortunes. With the immediate prospect of a railroad, for speculators in real estate or mining properties, no place in the west affords you an equal chance with

RENDELL.

Prices will certainly be advanced on May 6th next. Prices of lots from $75 to $175. Terms one-third cash, one-third 4 months, one-third 9 months.

For particulars see the Townsite Agents

GAUNCE & WICKWIRE,

GREENWOOD and RENDELL.

IT DAZZLES THE WORLD.

No discovery in medicine has ever created one-quarter of the excitement that has been caused by Dr. King's New Discovery for Consumption. Its severest tests have been on hopeless victims of consumption, pneumonia, hemorrhage, pleurisy and bronchitis, thousands of whom it has restored to perfect health. For coughs, colds, asthma, croup, hay fever, hoarseness and whooping cough it is the quicket, surest cure in the world. It is sold by Miller Bros., and J. L. White, who guarantee satisfaction or refund the money. Large bottles 50c and $1. Trial bottles free.

CURBING THE RAILWAYS.

When it was first announced that the Canadian Pacific company would build and operate the lead refinery which the federal government has offered to bonus, the Miner expressed the opinion that the government would be reluctant to enter into an agreement to pay the bounties to a railway corporation. There appeared very good reasons why no company should be given a monopoly of the lead industry of the Kootenays. It may be that the Miner was all wrong, and that the government will be happy to encourage the Canadian Pacific company to undertake the enterprise. We do not get that impression, however, from a leader in the Toronto Globe on freight and smelting charges, suggested by the proceedings at a meeting of the North Star Mining company. "When the railways," it says, "combine their business as common carriers with that of smelting ores, it is difficult to arrive at a basis for determining what charges are fair and what are unfair." The meeting referred to was of the same opinion. The cost of freight and treatment to the North Star has been so heavy that the management have decided to suspend production until better terms can be obtained. This suggests remarks to the Globe which can only mean that the government is awakening to the necessity of taking the railway companies in hand and subjecting them to rather rigorous supervision. "The people have a right to see that the highways are not manipulated in the interssts of any smelting enterprise. The Canadian people will pay a bounty of $5 per ton on all the lead smlted in the Dominion next year, and under existing conditoins the entire amount may absorb in railway charges, leaving the smelting and mining industries no better off than without the public aid." If the government is alarmed to the point of legislating because of combined freight and smelting charges, it will not be anxious to aggravate the evil by throwing into the railway pot the refining interests as well.

From these and other remarks that have appeared, with a sort of semi-official authority, it would seem to be the intention of the government and parliament to take early steps to put a curb on the railways.—Nelson Miner.

A BIG ALASKAN OUTPUT.

The regular monthly report of the famous Treadwell mine on Douglas Island, Alaska, shows a gold yield of $106,930 for May. This splendid showing was made with a 240-stamp mill in operation but 21 days of the month. The other, a 300-stamp, ran 28 days. All told, 55,443 tons of ore were crushed, yielding $63,650, with 1,122 tons of sulphurets saved, of the value of $34,840. The ore gave a value of $2.95 per ton. The gross expenses of operation for the month were $47,816.

LONDON & B. C. GOLDFIELDS.

The following circular from the secretary of the London and British Columbia Goldfields was recently sent to the shareholders:

"I am directed to inform you that the financial arrangements for completing the works of the Kettle River Power undertaking at Cascade, B. C., have been carried out. From the prospectus of the Kettle River Power company, limited, recently sent you, you will be aware that the capital necessary for completing the works had been underwritten, and the issue has been made. The result of this arrangement is that the works and the provision of the machinery are now being pushed forward as vigorously as possible, and any anxiety as to unduly trespassing on the resources of the London and British Columbia Goldfields company has been removed.

"I am also pleased to be able to inform you that the London and British Columbia Goldfields company has within the last few days completed arrangements for securing an exceedingly large free milling gold property in the Lardeau district of British Columbia, upon the strong recommendations of our local manager, Mr Robertson, and engineer, Mr. S. S. Fowler, both of whom describe the deal as being a very valuable one. This is fully confirmed by the information placed at the disposal of the company by Mr. E. Nelson Fell, brother of Mr. Arthur Fell, one of your directors, who is well acquainted with the details of the property.

"A very large number of properties have been under examination and consideration, but your directors were desirous of waiting until they could secure a good property within a certain amount of development, and one capable of producing a large output at low working costs. The new property promises to fulfil all these conditions.

"Owing largely to the exertions of Mr. Robertson, the Canadian government have granted a bonus in connection with the treatment of silver-lead ores, which it is believed will, in a short time, enable shipments of the product from the Whitewater and Ruth mines to be resumed.

"The returns from the Ymir mine continue to be highly satisfactory, the average operating profit during the last three months being about £5,000 (about $25,000) per month. The fact that a substantial further profit can be made by the application of the cyanide process to the treatment of the tailings, places the undertaking in a still better position as regards increasing profits, while the developments continue to be in every way satisfactory."

A POOR MILLIONAIRE

Lately starved in London because he could not digest his food. Early use of Dr. King's New Life Pills would have saved him. They strengthen the stomach and aid digestion, promote assimilation, improve appetite. Price 25c. Money back if not satisfied. Sold by J. E. White and Miller Bros., druggists.

SPOKANE INTERSTATE FAIR.

The Elks of Spokane are preparing for a rich purple time, purple being the chosen color of the order, on the occasion of their Street Fair and Jubilee. The event will be held in connection with the Interstate Fair. the arrangement being that the fair will run in the day time and the Elks will conduct their show down town at night. The fair will run from September 10 to 21 inclusive, but the Elks' jubilee will continue three days longer, closing down September 24. Ellery's Royal Italian band, the reorganized Royal Marine band of last season, will furnish music for both events, giving nightly concerts in a large tent seating over 5,000 people. In connection with the band concerts, the Elks will have something never before given in this section of the Pacific northwest –a street fair, with midway features. The latter will show the streets of Cairo, with native Egyptians, Syrians, Turks, Arabs, camels and donkeys, sword fighters, gun spinners, wrestlers, acrobats, etc.; oriental dancers and a street of all nations with its interesting aggregation of performers. Mexican theater, Algerian theater, German village and kindred There will also be a large portion of the grounds set aside for industrial, manufaciuring, mercantile and art exhibits. Spokane Elks are just completing a new temple which, when furnished throughout, will have cost not less $60,000. The 15-days' jubiless will be a fitting dedication of the magnificent structure.

SHE DIDN'T WEAR A MASK.

But her beauty was completely hidden by sores, blotches and pimples till she used Bucklen's Arnica Salve. Then they vanished as well as eruptions, fever sores, boils, ulcers, carbuncles and felons from its use. Infallible for cuts, corns, burns, scalds and piles. Cure guaranteed. 25c at Miller Bros. and J. L. White's.

The Mining and Commercial Center of the

Richest Mining Section in

North America.

SIMILKAMEEN CITY.

Situated in Camp Hedley, in the center of the whole Similkameen country, midway between Princeton and Keremeos on the main wagon road, and location lines of three different railroads, surrounded by rich mines and connected with all the camps with good roads and trails.

The Townsite Company own all the adjacent land available for townsite purposes. We are not boxed up in a canyon and do not sell lots on cliffs.

Lots now on the market and selling like hot cakes. Present prices are from $100 to $200, one-third cash, balance in three and six months.

In blocks 19, 25, 3 D, 24 and 30 on the main street sold on building contracts only.

Buy early and get your choice. On June 1st they will advance 50 per cent.

For further particulars apply to H. M. Keefer, room 4 Wallace-Miller Block, Greenwood; Ernest Kennedy & Co., Rosslond, B. C.; Chas. D. J. Christie, Nelson, B. C.; A. G. Hanauer, Spokane, Wash.; J. J. Banfield, Vancouver, B. C Agents in all Boundary towns as well as in Ontario, England and Australia.

CANADA'S SUPERINTENDENT OF MINES.

Prof. Eugene Haanel, head of the department of physics in Syracuse university for the past 13 years, has received official notice of the ratification by the cabinet of the Dominion of Canada of his appointment as superintendent of mines of Canada.

Prof. Haanel is in New York obtaining apparatus for the government assay office which is to be established in Vancouver. From New York Prof. Haanel will go to the coast and take the necessary steps to set the assay office in motion. Prof. Haanel's appointment as director of mines marks a new era in mining matters so far as the Dominion is concerned. The new superintendent is an expert of many years' standing, and he will give his best attention to mining matters throughout the Dominion. Any suggestions he may recommend for the encouragement of mining will receive every consideration from the government. The progress of mining development will be closely watched and reliable statistics carefully compiled. The facts gathered will be issued in the form of a report, which it is expected will appear every quarter. Prof. Haanel will occupy the office in the department of the interior hitherto occupied by Mr. A.J. McKenna, half-breed commissioner. The latter will probably move his quarters to some point in the west.

Dr. Haanel was born in Breslau, Fermony, May 24th, 1841, coming to this country in 1859. He taught in Adrian, Hillsdale, and Albion college, in Michigan. In 1873 he went Victoria college, Coburg, Ont. Dr. Haanel came to Syracuse university in 1888, taking the physical science chair.

MINING STATISTICS.

The provincial revenue received at the government office, Greenwood, during the six months ended June 30th ult., amounted to $12,201.15. This includes that collected at the sub-recording offices at Westbridge and Camp McKinney, but only five months' returns from the latter office, from which those for June have yet to be received. The particulars of records and receipts are as under:

GREENWOOD.

	No.	Amount
Free miner's certificates	861	$ 4,834.75
Locations, mineral	170	
Locations, placer	1	
Certificates of work	347	
Conveyances	174

Greenwood	$10,780.15
Westbridge	819.00
Camp McKinney	602.00
Total	$12,201.15

W. C. T. U.

The Women's Christian Temperance Union held their by-weekly meeting on Tuesday, July 2nd, in the Methodist church. The president opened the meeting by reading a chapter and asking Rev. Mr. Knox and Rev. Mr. Kenny to pray. The time had again come around for the election of new officers. The W. C. T. U. was organized a year and six months ago and since that time Mrs. Travis has filled the office of president. The members of the union knowing how Mrs. Travis having her heart in the cause, devoted all her time and energy to the work, unanimously elected her president for the ensuing six months. Mrs. Travis responded with thanks, but said she felt it would be best for the union to have a change as she was sure some one else could tide over her short-comings. Finding that Mrs. Travis could not be prevailed upon to take the office, Mrs. Ada E. MacKay was nominated president and unanimously elected. Every one who knows Mrs. MacKay feels sure that the work could not be entrusted to a more capable president and is looking forward to great success in every department of this office.

The union knowing the great need of a reading room in the city decided to organize one so on February 1st the room was formally opened on Greenwood street. The W. C. T. U. wish to take this opportunity to thank the public for subscriptions and donations received without which the reading room could not have been kept up, and also to lay before them the receipts and expenses since the opening:

	RECEIPTS.		EXPENSES.
Sub. & Dona., Feb.	$126.60	Rent	$155.00
" March	54.40	Light	20.00
" April	57.35	Literature	94.75
" May	31.80	Care-taker	50.40
" June	67.65	Balance	17.65
Total	$337.80	Total	$337.80

If possible the W. C. T. U. would like to open a gymnasium in connection with the reading room in a few months.

SHIRTS SHIRTS

Big Shirt Sale

For Ten Days

Fifteen dozen men's and boys' shirts go on the bargain counter today. We find this department overstocked with men's and boys' top shirts, so to interest cash buyers we have put the knife in a number of up-to-date lines. Shirts all sizes, colors and styles in this sale.

FRIDAY, JULY 12. 1901.

On the 16th inst. the property holders of Greenwood will be called upon to vote on a by-law granting to the Sisters of St. Joseph of Peace a bonus of $3,500 towards a hospital which they purpose erecting in this city. The bonus system of building up a town is one which was long ago discarded by progressive communities. With every business proposition the question of locality must be considered the most important one, and the fact that a bonus is offered will not induce a business man to locate in a town where his enterprise would be handicapped in any way. It must be admitted by all that the Sisters' hospitals are business propositions pure and simple, and if they were not such they would not be in existence today. The question for the property holders to consider is whether the Sisters' hospital will be built here for the bonus or for the profits to be made out of such an institution. We are inclined to the opinion that the Sisters of St Joseph of Peace believe that Greenwood is the most suitable point in the district for the location of their hospital, and that they expect to make money out of the undertaking or they would not come here

The town of Oshawa, Ont., gave more bonuses to manufacturing industries than any other town in Canada, and it is not as populous a town today as it was thirty years ago. The reason for this was that Oshawa had not the location for a distributing point, and gradually manufacturers, in order to compete successfully for the trade of the Dominion, were compelled to move their plants from Oshawa to Toronto and other centers of trade.

At the meeting of the Trades Council Monday night a resolution was passed favoring a bonus being granted to the Sisters' hospital. The Greenwood Trades Council can claim the distinction of being the first body of representatives of organized labor to advocate the granting of public funds to an organization of capitalists. By their vote Monday night they repudiated the theories advocated by the supposedly advanced thinkers in unionism for the past twenty years.

The Rossland Miner accuses the Greenwood Miner of telling falsehoods favoring the provincial government because of the "pap" received. The Miner supported Smith Curtis in the last provincial campaign and has always been an opponent of the present government. The objection taken by this paper was to so much space being given to criticisms of the mining laws and so little to the mineral resources of the province. The mining laws may not be perfect, and it is more than probable that they are not, but this does not interfere with the fact that British Columbia is a splendid field for investment and also that she requires money to develop her great natural resources, and unfair criticisms of the mining laws will have a tendency to make capital timid.

News comes from Rossland that a general strike has been declared on the B. A. C. properties. Rossland has been the curse of the mining interests of British Columbia. It was from that city that all the wild-cat promotions emanated which have done so much injury to the credit of legitimate mining in the province. In that city appear to have congregated all the bilk mining promoters and stock-jobbers, all the crank mine managers, and equally cranky miners. Even the newspapers, when they cannot manage to cause friction between mine owners and miners, unfairly criticize the mining laws of the province, with the evident object of driving capital out of the country. The Rossland district has received greater prominence than its mines deserve. In another year it will not be known as an ore-producing camp in comparison with the other mining districts of Southern British Columbia. Boundary will have four camps, each one of which will ship more ore than the Rossland camp. If the mine managers and miners of the Boundary will continue to treat each other as they have in the past, the difficulties in the little Rossland camp will not materially affect the mining interests of Southern British Columbia.

While many operators in this country are too frequently given to the inexcusable habit of making a mountain out of a mole-hill when complaining of legislation, which though generally beneficial, may put them to slight additional inconvenience or cost, it must be admitted that a real grievance is to be found in the compulsory inspection of boilers by a government official whose work is largely unnecessary and whose fees are excessively exorbitant. In nearly every case of company operation, boilers are insured and the insurance companies for their own protection inspect the boilers so insured at regular and stated intervals. For this the mining company pays a moderate fee. The arrangement has proved an entirely satisfactory one up to the present time, but at the last session of the legislature an act was passed compelling a mining company to pay a heavy fee for a government inspection, while, of course, the fee for inspection imposed by the insurance companies must still be paid. The government might surely accept the certificate of a reputable insurance company without requiring special inspection, and the argument that such a course is not followed in other parts of the world hardly convincing. Another recent complaint of the mine owners is that the mine-signal code incorporated in the Metalliferous Mines Inspection Act last session is unworkable. It is alleged that the unworkability of the system was demonstrated by the mine managers at Rossland, to the satisfaction of the Hon the Minister of Finance, who recently visited that district. From what we can gather, however, Mr. Turner reports that the only section of the code which is condemned as unworkable is that relating to "station signals." If this is correct the mine managers have not succeeded in making out much of a case, for that clause in the code was taken direct from the act in force in the state of Montana and has proved under precisely similar conditions eminently workable. Moreover the clause in question, before its adoption by the mines department, was submitted and received the approval of all the important mine-managers in the province, including Mr. Bernard McDonald, of the Le Roi mine, and Mr. Kerby, of the War Eagle and Centre Star.—B. C. Mining Record.

THIS AND THAT.

Dr. Angus McKinnon, of Guelph, in his presidential address to the Ontario Medical association in Toronto, spoke of "the advertising methods of patent medicine manufacturers and vendors, regretting that the press, religious and secular, opened their columns freely to to this class of advertising because it paid well." Maybe if the doctors did a bit more advertising themselves, people would not wade into patent medicines so freely.—Exchange.

A contract was recently signed in New York for a complete outfit of rolling stock, for a new line to be constructed between the Republic mines, in Eastern Washington, and Grand Forks, B. C. There are said to be $8,000,000 worth of gold and silver ore now waiting on the dumps for carriage to Canadian smelters. At Republic, there is an absence of suitable fluxing ore, which would render the erection of smelting works unprofitable,—Toronto Mnetary Times.

Respecting mines in the South African Rand, the London Economist said recently: An interim report states that the company's chief source of income—namely, dividends on shareholdings in subsidary and other companies—has not yielded any revenue during the past year, the war in South Africa causing the stoppage of all productive mining operations in the Transvaal. The subsidiary companies requiring financial assistance during the year ended December last have been provided with the necessary funds on loan, and the machinery, plant and stores in stock for these companies had been materially increased in view of the recommencement of work. It is not proposed to pay any dividend for the year, the company's funds being required for financing some of the subsidiary companies through the long unproductive period they have had to face.

Less than a fourth of the men actually employed at mining in southeastern British Columbia work in the mines at Rossland. Outside of Rossland, there is no trouble betwen the miner and mine owner The managers and superintendents and foremen everywhere, except at Rossland, are apparently on friendly terms with the miners; and the miners, somehow, are not accused by any of these managers and superintendents and foremen of an unwillingness to do a fair day's work. Is it possible that the miners at Rossland are different from the miners in other camps in British Columbia? Or is it probabable that the men in charge of the mines at Rossland are not constituted as are other mine managers in the province? The Tribune is of the opinion that there will be no permanent peace, and consequently no permanent prosperity at Rossland until there is a change in the management of the War Eagle and the Le Roi mines—and the sooner the change is made the better it will be for British Columbia.—Nelson Tribune.

Potatoes and lots of them at Crowston's.

Dr. Simmons, dentist, Rendell block Copper street, Greenwood.

Berries fresh from ranch in any quantity from 1 to 500 crates at Crowston's.

James Kerr returned from his wedding trip Saturday last and on Thursday left for the Carmi on the West Fork.

H. McCutcheon, collector of customs at Greenwood, was ill during several days of this week, but is now improved.

J. Robillard, of the local C. P. R. office is relieving the C. P. R. agent at Phoenix, Mr. Dey, who has gone east on a vacation.

Pianolian concert in Masonic building, approximate date, 18th or 19th inst. High class music. First of the kind ever given in Greenwood.

W. H. Asquith is making steady progress towards recovery of the use of his arm, which was disabled in the accident of which he was a victim last month.

Chief McLaren returned from the coast Saturday, where at Vancouver on the 1st inst. he was married to Miss Letitia Wilke, of that place, Rev. Dr. McLaren officiating.

Rev. W. A. Robins and Ed. Cronyn have been away, up the North Fork of Kettle river, since early in the week on a fishing expedition. They are expected to return to Greenwood today.

T. H. Paterson having resigned his position in the Canadian Bank of Commerce, left that bank's service last Monday. It is stated that he will shortly leave British Columbia for England.

A horse race was run in Greenwood Monday night for a purse of $50 between Bannerman's Weasel and Bailey's Similkameen Whirlwind. The race was a half-mile dash which Weasel captured by two lengths.

Judge Leamy has gone to the coast, where he will be sworn in as a county court judge. He purposes returning to Greenwood in time for the sittings of the county court to be held at Greenwood on Monday, 22nd inst.

H. J. Bayly, of Rendell & Co.'s Greenwood mercantile business, went out on yesterday's train, bound for the coast cities, in which he will spend a four or five weeks' summer vacation. At Eholt he was joined by G. Arthur Rendell who goes on a like mission.

Edward Plewman, who after being treated by Dr. Foster at Greenwood hospital for blood poisoning, was a guest at the Imperial hotel during his convalescence, has returned to the Winnipeg mine, Wellington camp, where he will resume his duties as the company's assistant secretary.

Wednesday evening the sub-committees for the Labor Day celebration in Greenwood were appointed, and all the preliminary arrangements for the celebration have now been made It is expected that about $2,000 will be offered in prizes, and that the programme will be the most attractive ever offered in the Boundary.

G. T N. Hill, of the Canadian Bank of Commerce, returned to Greenwood from Kamloops last Saturday night, and is now in temporary charge of the bank's local branch pending the appointment of a successor to the late Mr. Smythe. Mr. Hill is much pleased with Kamloops, that inland city possessing many advantages as a place of residence.

The Russell-Law-Caulfield company's hardware store, with all its heavy stock has been removed about 50 feet farther north and now occupies the lot on Copper street immediately next to the Commercial hotel. A cellar is being excavated on the lot the store was on and preparations are being made for commencing the erection of the new buildings the company intends putting up.

Walter Foster, of Anaconda, a short time since took what is about the best photographic view of the British Columbia Copper company's smelter, at Greenwood, yet produced here. It is 8x10 in size and gives a clear representation of all the buildings. trestles, tracks, etc., comprising the works. He has been requested to print copies and place them in one of the Greenwood stores for sale.

The Greenwood fire laddies were called out by an alarm of fire sent in at 11 o'clock last Tuesday night. It transpired that a small log cabin was burning, and though its destruction was a matter of very little consequence it was situate too near the Electric Light company's works to allow of its being permitted to burn without risk to those works. Quite a large crowd turned out to see the fire, only to be disappointed, as it fortunately happened.

An accident happened last Monday to two men named John Taprill and E. Rowe, employed at the Snowshoe mine, Greenwood camp. They were at work mucking when some powder that had not been exploded went off, throwing a lot of dirt in their faces and causing such injuries to their eyes as to make it advisable for them to seek the services of an eye specialist. They accordingly went out on Tuesday's train, going via Rossland to Spokane.

Sprott & Macpherson, watchmakers and jewellers, of Greenwood, have dissolved partnership, W. E. Macpherson having bought W. M. Sprott's interest in the business. Mr. Sprott left for New Westminister yesterday, some promising mining interests he has on the coast requiring his attention. Mr. Macpherson has arranged with Geo. E. Gendron, a graduate of the Canadian Horological Institute, Toronto, and for some time with Patenaude Bros., watchmakers, etc., Nelson, to assist him in his busines. Mr. Gendron has already entered upon his new duties.

GRIP AND PASSWORD.

Wednesday night of last week the officers of Greenwood lodge No. 29, K. of P., were installed by Duncan Smith, D. D. G. C., assisted by Chas. M. Hitch as Grand Prelate and Martin Anderson as Grand M. at A. The officers are as follows: Max Berger, C. C.; Norman McLeod, V. C.; C. R. Pittock, P.; Geo. Barber, M. of W.; A. D. Hallett, K. of R. and S.; K. C. B. Frith, M. of F.; L. G. Whitbeck, M. of E.; M. Eilderman, M. at A.; K. McKenzie, I. G.; A. Allmacher, O. G. In the past six months the lodge has increased in membership from sixty to nearly one hundred, and is strong financially.

Tuesday night of this week T. M. Gulley, D. D. G. M., assisted by J. A. McKinnon, Grand Marshall; H. B. Munroe, G. S.; W. B. Fleming, G. T., and James Kerr, G. W., installed the officers of Boundary Valley lodge No. 28, I. O. O. F., as follows: D. A. MacKenzie, N. G.; F. B. Holmes, V. G.; W. Elson, R. S.; R. Smailes, F. S.; W. M. Law, Treas.; W. M. Frith, W.; D. Beath, C.; E. H. Cannon, I. G.; H. D. Johnson, O. G.; J. W. Ellis, R. S. N. G.; D. Ross, L. S N. G.; S. McLelland, R. S. V. G.; P. S. Palmer, L. S. V. G.; A. G. Amon, R. S. S.; J. Sauve, L. S. S. The retiring Noble Grand of the lodge is G. B. Taylor. After the installation an excellent lunch was served in the banquet hall. There were a number of visitors present from the Mother Lode and Phoenix. The past term has been the most prosperous one of the lodge since its institution.

FOR THE FIRE BOYS.

Last Tuesday evening Fire Chief McKenzie received a check for $25, together with the following letter, which tells its own story:

BRITISH COLUMBIA COPPER COMPANY, LTD.
Anaconda, B. C., July 9, 1901.
THE CHIEF OF FIRE DEPARTMENT,
Greenwood B. C.

DEAR SIR:—With this I have pleasure in handing to you, for the benefit of the members of the Greenwod Fire Department in whatever manner they may see fit to use it, this company's check for the sum of twenty-five dollars ($25). This contribution is sent in recognition of the promptness of the department in turning out to render assistance on the occasion of the fire which took place at this company's smelter last Saturday evening. Fortunately for all concerned the damage done was very small, nevertheless the ready disposition to prevent serious disaster is possible, is not lost sight of by the company.

With all good wishes for the continued usefulness and success of the Fire Department, I am,

Yours very truly,
FREDERIC KEFFER,
General Manager.

Greenwood, B. C., July 10, 1901.
F. KEFFER, ESQ.,
Manager B C. Copper Co.,
Anaconda, B. C.

DEAR SIR:—We beg to acknowledge the receipt of your favor of yesterday's date, enclosing cheque for twenty-five dollars ($25) in favor of the Greenwood Fire Department, and on their behalf tender you our most sincere thanks for your generous donation.

Yours very truly,
H. J. BAYLY,
Secretary.

Number of post cards, papers, packages, etc., received	93,808
Total	636,792

OKANAGAN FRUIT.

Mr. F. J. Barker, manager of the Vernon News, who is on his way east to Toronto for a vacation, stopped off to spend a week in Nelson en route. He reports that it is a very good year for crops and cattle in the Okanagan, and from present indications the fruit crop will also be first class. Till two years ago nearly all the products of the Okanagan valley were shipped to the coast, the Okanagan fruit proving much superior to that brought up from Washington, and finding ready sale. Now, although the demand from the coast is greater than before, a large quantity of their crops, especially of fruit, is being sent to various Kootenay points, among which Nelson is naturally the leading. When the Boundary road is completed through to Penticton a still larger quantity of this trade will be diverted here. —Nelson Miner.

When at Crowston's stores don't forget to get a supply of good potatoes.

Notice of Dissolution of Partnership.

NOTICE is hereby given that the partnership heretofore subsisting between the undersigned, carrying on business as hotel-keepers in the City of Greenwood, under the name and style of Wilson & Wellwood, has this day been dissolved by mutual consent. All accounts due the said firm of Wilson & Wellwood are to be paid to George Wellwood, who will continue the business, and all accounts due by the said firm are to be presented to the said George Wellwood, by whom the same will be paid.

Dated at Greenwood the 2nd day of July, 1901. J. W. WILSON
Witness, GEO. WELLWOOD.
J. R. BROWN.

MINERAL ACT.

To J. C. Haas and others interested in the Admiral Dewey mineral claim, situated in Summit camp, Grand Forks mining division of Yale district:

TAKE NOTICE that I have caused to be done on the Admiral Dewey mineral claim, situate in Summit camp, in the Grand Forks mining division of Yale district, British Columbia, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recording the certificate thereof the sum of one hundred and three dollars and fifty cents ($103.50); and that if, at the expiration of ninety days from the date of the first publication of this notice you fail to contribute your proportion of such expenditure, namely, $25.87½ each, together with all costs of advertising, your interest in said mineral claim shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act 1900."

Dated this 12th day of June, 1901.
J. W. POWELL.

CORPOPATION OF THE CITY OF GREENWOOD.

BY-LAW NO. 64.

A by-law to authorize and ratify the execution by the mayor and city clerk of a certain agreement made between the Corporation of the City of Greenwood and the Sisters of St. Joseph of Peace.

The municipal council of the City of Greenwood enacts as follows:

1. That the mayor and clerk of the City of Greenwood be and they are hereby authorized on behalf of the Corporation of the City of Greenwood to execute a certain agreement made between the Corporation of the City of Greenwood, party of the first part, and the said Sisters of St. Joseph of Peace, party of the second part, to be dated the day of final passage of this by-law, which said agreement is marked "A" on the first page thereof, a true copy of said agreement being published herewith, and to attach the corporate seal of the said Corporation thereto.

Read third time, July 4, 1901.
G. B. TAYLOR, City Clerk. R. W. JAKES, Mayor.

Take notice that the above is a true copy of the proposed by-law, upon which the vote of the municipality will be taken at the City Hall on Tuesday, the 16th day of July, A. D. 1901, between the hours of 10 o'clock a. m. and 4 o'clock p. m.

G. B. TAYLOR,
Returning Officer.

This agreement made the day of July A. D., 1901, between the Corporation of the City of Greenwood, hereinafter called the party of the first part of the one part.

And the Sisters of St. Joseph of Peace, hereinafter called for themselves, their executors, administrators and assigns, the party of the second part, of the other part,

Whereas the party of the second part desires, if suitable arrangements can be made, to erect a hospital, and maintain same, and carry on hospital work in the City of Greenwood.

And whereas the party of the first part is willing and ready to grant the sum of $3,500 by way of bonus to the party of the second part for the maintenance and erection of a hospital and the carrying on of hospital work in said city on the conditions hereinafter set out.

Now this agreement witnesseth that in consideration of the sum of $3,500 payable as hereinafter set out by the party of the first part to the party of the second part, the party of the second part hereby covenants, promises and agrees that they will erect and maintain a hospital and carry on hospital work in the said City of Greenwood for the treatment of the sick and injured of the Boundary country.

And the said party of the second part further covenants, promises and agrees that they will commence doing hospital work in the City of Greenwood on or before August 15th, 1901, and will carry on same continuously until the 31st day of December, 1904.

And the said party of the second part further covenants, promises and agrees that they will within one year from the date of the final passing of a by-law to confirm this agreement, erect in the City of Greenwood, a hospital costing not less than $8,000.

And the said party of the second part further covenants, promises and agrees that they will, during the time they have covenanted to carry on hospital work in the City of Greenwood, by this agreement, at the request of the party of the first part, treat any or all of the indigent sick or injured of the City of Greenwood, at a rate not to exceed two dollars a day, for each patient, for all charges including medical attendance.

And said party of the first part hereby covenants, promises and agrees to pay to the party of the second part by way of bonus, for the erection and maintenance of said hospital, and the carryihg on of said hospital work, and the treatment of the indigent sick of the City of Greenwood at the terms set out above, the sum of $3,500 payable as follows.. $500 cash on the execution of this agreement and the balance of $3,000 by three promissory notes of $1,000 each payable on the 15th day of January, 1902, the 15th day of January, 1903, and the 15th day of January, 1904, respectively, and said notes shall bear interest at the rate of seven per cent (7) per annum until paid.

IN WITNESS WHEREOF the said party of the first part has caused to be affixed hereto its corporate seal by the hand of its clerk, having been first thereunto duly autorized, and the said party of the second part has hereunto set their hands and seal the day and year first above written.

Signed, Sealed and Delivered
In the Presence of

MINERAL ACT.

To Sam Breslauer and others inetrested in the Henrietta Mineral Claim, situated near Beaverton in the Kettle River Mining Division of Yale District:

TAKE NOTICE that I have caused to be done on the Henrietta mineral claim, situated near Beaverton, in the Kettle River Mining Division of Yale District, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recordidg the certificates thereof the sum of One Hundred and Two Dollars and Fifty cents, ($102.50), and if at the expiration of ninety days from the date of the first publication of this notice you fail to contribute your proportion of such expenditure, namely, the sum of Fifty-One Dollars and Twenty-Five Cents ($51.25), together with all costs of advertising, your interest in said mineral claim shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act, 1900."

Dated this 5th day of July, 1901.
CHARLES PHIPPS.

MINERAL ACT.

Certificate of Improvement.

NOTICE.

SAN JUAN FRACTIONAL Mineral Claim, situate in the Kettle River Mining Division of Yale District. Where located—Providence Camp.

Take Notice that I, John William Nelson, Free Miner's Certificate No, B 40532, intend sixty days from the date hereof to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above claim

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvement.

Dated this sixth day of June, A. D., 1901.
23 J. W. NELSON.

MINERAL ACT.

To Randolph Stuart, J. C. Haas, I. H. Hallett, Walter D'Eath and others concerned:

TAKE NOTICE that I have caused to be done on the Diamond Joe, Doubtful, May Day and Deer Trail mineral claims, situated in Greenwood camp, in the Kettle River mining division of Yale district, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recording the certificates thereof the sum of four hundred and fifteen dollars ($415.00); and if at the expiration of ninty days from the date of the first publication of this notice, you fail to contribute your proportion of such expenditure, namely, Randolph Stuart, J. C. Haas, I. H. Hallett and other parties interested, the sum of $83.00 for one-fifth interest in said mineral claims, and Walter D'Eath, the sum of $83.00 for a one-fifth interest in said mineral claims, together with all costs of advertising, your interest in said mineral claims shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act, 1900"

Dated this 12th day of June, 1901.

LAURA SECORD

At Niagara Falls there was recently unveiled a monument to Laura Secord—"the first monument erected to a woman in Canada," says a despatch. The first erected to a Canadian woman, the correct expression would be. There are many statues of Queen Victoria.

Eighty-eight years ago the frontier between Canada and the United States was being devastated by fire and sword. Pursuant to bloody fighting in the Niagara peninsula, hostile troops were awaiting chances to deal further blows at each other. A Canadian outpost at a farm called DeCeu's, a few miles from where St. Catharines now stands, was troubling the enemy. The American commander at Fort George, General Deaborn, planned to surprise the outpost. On the night of June 23, 1813, an American force over 600 strong under Lieut.-Col. Boerstler, with two guns, slipped out from the United States lines to surprise the Canadian outpost at DeCeu's, held by Lieut. Fitzgibbon with 30 men of the 49th regiment and a couple of hundred Indians.

At that time Queenstown was in possession of the Americans, and the force from St. George passed through it on its way against Fitzgibbon. Living in Queenstown were James Secord and his wife, Laura. James Secore had been severely wounded fighting at Queenstown heights as an officer of the Canadian militia, and was still unable to walk. He and his wife were both children of United Empire Loyalists who had been driven out of the American colonies in the revolutionary war, after treatment of the most bitter kind and the loss of all they had possessed. Naturally their feelings were the stronger for the British cause when the torrent of war came upon Canada in 1812. Jame Secord could not move, from his wounds; in any event, the town was guarded to prevent information getting forward to the British side; but Laura Secord undertook to warn the British troops.

She was a woman of 38, the mother of five children. Those who recollect her, for she lived to be 93, and died in 1868, the year after confederation consolidated the great northern country she risked her life to save, describe her as a "fine, tall, strong woman." She had need to be; although Lieut. Fitzgibbon wrote of her as "slight and delicate," but admits that he was in considerable of a hurry after she came to him. This woman, whether strong or otherwise, accomplished an extraordinary journey. Starting from Queenstown in the night, she with one brief rest at a friendly farm house, toiled for nineteen miles by circuitous routes to avoid American posts and scouts, over bad roads put at their worst by prolonged rains; through fields and woods, wading creeks, crossing one small river on a fallen tree, until at night she stumbled into a camp of Indians near DeCeu's. They greeted her with startled yells, and in after years she spoke more of the dread the cries created in her than of any other feature of her journey. With difficulty she made them understand that she must see Lieut Fitzgibbon; finally they took her to him, and he learned of the approaching American attack.

Such was the accomplishment of Laura Secord.

The following day, Lieut. Fitzgibbon, reinforced by a few militia, ambushed Lieut.-Col Boerstler's force and killed, wounded or captured every man in it. The story of the fight need not be told here; but when it was over, 57 Americans were killed or wounded and 544 officers and men and the two guns captured. The total British force which gained so decisive a victory numbered but 67 regulars or militia and 250 Indians. This is known as the battle of Beaver Dams.

Laura Secord's heroic endeavor was equally arduous and successful. Her name has been a household word in Ontario since. The monument to her, though but an additional tribute to one whose name has been honored without any memorial stone, is a most fitting testimonial to the fearless patriotism of a noble-hearted woman who voluntarily faced a desperate ordeal with the best courage of her race.—Ottawa Valley Journal.

FUNERAL OF J. W. H. SMYTHE

The funeral of the late J. W. H. Smythe took place last Saturday afternoon. The arrangements were in the hands of T. M. Gulley & Co., who furnished an ornate shrine casket, upon which were placed beautiful floral designs sent by friends of the deceased. among these tokens of respect being several wreaths and a cross. These came from the officials of the Nelson and Greenwood branches of the Canadian Bank of Commerce, from the young men of the local bachelor establishment known as the "Saints' Rest," and from Mrs. Jakes, of Midway, and others desirous of thus showing their regard for one whose untimely death was so generally regretted. The pallbearers were Messrs. A. E. Ashcroft, P. L. S.; W. G. H. Belt, manager of the Greenwood branch of the Bank of British North America; C. Scott Galloway, P. W. W. King, accountant for the Snowshoe Mines, limited; Arthur Mowat, and Geo. R. Naden, manager of the Bealey Investment & Trust company, Greenwood. The cortege moved from the late residence of deceased at about half past two o'clock, and proceeded to the building on Government street in which are temporarily held the services of St. Jude's Church of England. In the absence on vacation of the church organist, Miss Huberta Flesher played a funeral march as the body was borne into the building. The rector, Rev. W. A. Robins, M. A., officiated, taking part of the impressive Order for the Burial of the Dead, the choir chanting Psalm XXXIX, "I said, I will Take Heed to my Ways," and singing, by special request of the bereaved ones, Hymns A. and M. 277, "Nearer My God to Thee" and 401 "Now the Laborer's Task is O'er." At the close of this short service, which was largely attended, the body was replaced in the hearse and the procession started for the cemetery, situate about three miles from town. Upon arrival there it was met by Rev. Mr. Robins, who preceeded the casket, which was carried by the pallbearers, to the Church of England portion of the burial ground. Here the funeral rites were concluded, and after the choir had sung the hymn "Brief Life is Here Our Portion" the numerous assemblage dispersed. The casket bore the following inscription: "James William Henry Smith, died July 4, 1901, aged 32 years and six months."

Among those noticed at the funeral besides those already named were T. N. Patterson, A. W. English, W. C. Duncan and A. H. Plummer, of the local staff of the Bank of Commerce; A. W. Strickland and C. W. Chesterton, Bank of Montreal; H. F. Stow and R. J. Coulter, Bank of British North America; Paul Johnson, manager of the British Columbia Copper company's smelter; J. L. Parker, superintendent of the Dominion Copper company's mines and W. R. Williams, J. P., also of Phoenix; Thos. McAuley and W. B. Rickards, Midway; A. S. Black, J. P. Myers-Gray, I. H. Hallett, J. P. McLeod and A M. Whiteside, representing the Greenwood members of the bar; W. G. McMynn, gold commissioner; H. E. Price, manager of the Standard Pyritic Smelting company; R. P. Williams, agent for the Canadian Rand Drill company; H. P. Dickinson, agent for the Giant Powder company; E. H. Thurston, A. Ferguson, W. O. Wright, E. Jacobs, J. Carmichael Smith, J. H. Custance, W. E. Hodges, G. Lysons, I. P. Armstrong, Dr. Schon, Duncan McIntosh, Duncan Ross, of the Greenwood Times and many other.

ROCK CREEK PLACER CO.

A general meeting of shareholders in the Rock Creek Consolidated Placer Mining company was held in the office of F. Keffer, Anaconda, last Tuesday night. H. H. Wilmot, who has been in charge of operations, was present, and gave an account of the work done to date. As the funds of the company were exhausted, the question of how best to raise more money was considered, with the result that it was decided to try to sell some of the remaining treasury stock and Rudolph Liden was enpower- to act as official broker The meeting was adjourned to Thursday evening, when it was reported that sufficient of the stock had been disposed of to warrant a resumption of work. Mr. Wilmot was autho.ized to clear off a certain area of the wash down to bed rock and a committee was appointed to examine the creek after this shall have been done and to make a report to the shareholders later.

The resignation of C. W. Vedder as secretary-treasurer was accepted and Mr. Liden was appointed in his stead.

NORTH STAR ANNUAL MEETING

The second annual meeting of the North Star Mining company, owning the North Star silver-lead mine in East Kootenay, was held in Montreal on the 26th ult. The directors' report, which was presented, said: "Although the conditions in the mine are most satisfactory, your directors deplore the extremely unsatisfactory conditions existing at the present time for the reduction and marketing of the company's ores. These have lately been aggravated by the low price of lead, but they are principally due to the excessive charges for smelting, and the high rate of transportion, as a rule, of which 50 per cent of the value of the ore is taken for freight and treatment. Owing to these conditions, and the strong financial position of the company, it has been thought wise to curtail shipments, as the directors believe that better markets can ultimately be obtained. From the report of the manager your directors feel confident that as there are large areas yet to be explored, additional ore bodies will be discovered."

The report of the manager, Frank Robins, stated that during the year 2,141 feet of prospecting and development work had been driven and the extension of the original ore channel to the south had been assured. The financial statement showed that the company has $260,407 cash on hand and in banks.

The following officers were elected: President, D. D. Mann; vice presidents, A. A. Thibaudeau, Senator Forget, William Mackenzie, and C. E. L. Porteous.

POT AND KETTLE.

Seattle and Spokane are both towns run "wide open," and disgracefully administered, yet a leading journal of Spokane holds up Seattle to derision, as being a place infinitely vile, forgetting the case of its own city. Seattle's champion in all things, good and bad—the Post-Intelligencer—naturally takes up the cudgels in reply and abuses the Spokane Spokesman-Review most amusingly as follows, saying:

"Comparatively little attention has been paid to many late insane ravings of the Spokane Spokesman-Review, for excellent reasons. Its vile and venal qualities are both so well known that even to couple the name of it with any other newspaper is almst sufficient justification for a suit for damages by the latter.

The Review continues to make the recent tragedy in Seattle a text for abusive personal articles. Where it cannot blackmail and has no hope that any offer will be made to purchase its columns, the Review is always industriously malignant. It is such a notorious little rascal and it enjoys so thoroughly the contempt of the whole community which it afflicts by its existence that it is hardly worthy of a parting kick.

There never could be any question where the Review would stand in any contest between decency and vice. As like seeks like, the sympathies and the ardent support of the Review are guaranteed to the gambler, the sure-thing man, the pimp, the corrupter of youth and the worshipper of boodle As the product of a diseased mind and a totally atrophied moral sense, it has fulfilled the public expectation and lined up according to its native affiliations. There let it remain"—Vancouver News-Advertiser.

The gallows frame has been in course of erection during the week at the Lake claim, in Skylark camp, and it now begins to look as if it will be practicable to resume sinking a week or ten days hence.

WHITE MAN TURNED YELLOW.

Great consternation was felt by the friends of M. A. Hogarty, of Lexington, Ky., when they saw he was turning yellow. His skin slowly changed color, also his eyes, and he suffered terribly. His malady was yellow jaundice, He was treated by the best doctors, but without benefit. Then he was advised to try Electric Bitters, the wonderful stomach and liver remedy, and he writes: "After taking two bottles I was wholly cured." A trial proves its matchless merit for all stomach, liver and kidney troubles. Only 50c. Sold by J. L. White and Miller Bros., druggists.

LOCALS AND PERSONALS.

Dr. Mathison, dentist, Naden-Flood block, Copper street

Mr. and Mrs. H. C. Shaw have been enjoying a month's change on the coast.

Mrs. Jakes was up from Miwday yesterday on a visit to Mrs. Leamy, at Anaconda.

Why not put up your own fruit when you can get home grown, fresh berries from Crowston's ranch.

W. M. Smith, of Smith & McRae, with Mrs. Smith, has gone up the West Fork for a summer outing.

Julius Ehrlich, manager in Greenwood for P. Burns & Co., went to Nelson two or three days ago on business matters.

Mrs. E. B. Dill is expected to return tomorrow from Sandon, whence she has been on a visit at the home there of Mr. Dill's brother.

Mr. Clowes, of Toronto, in the service of the Canadian Bank of Commerce, who has been travelling for his health, has joined the bank's local staff.

J. C. Haas, M. E., came in from Spokane on Wednesday night and registered at the Hotel Armstrong. He purposes remaining here until the end of the month.

Chief of Police McMellan, of Grand Forks, was a visitor to Greenwood for a couple of days this week. He took back with him a Celestial who seemed to answer to the description given to him of one who was "wanted" in the smelter city.

Anthony J. McMillan, managing director of the British Columbia (Rossland and Slocan) Syndicate- limited, and of the newly organized Snowshoe Mines, limited, is advised as to leave London, England, tomorrow, 13th inst., on his return to British Columbia.

George Robertson, a lumber man from Ottawa, Ont., has been looking into the resources of the Boundary and its business prospects during the past week. He has made the Imperial hotel his headquarters and from Greenwood has been visiting some of the surrounding places.

A car loaded with ore went off the track at Eholt at the entrance to the railway yard from the Summit camp side, last Saturday. As there were two locomotives up the track they were blocked for a day, so that the delivery of ore was delayed both on that branch line and on the Deadwood spur. However on Sunday the line was got clear and since then the ore trains have been running as usual

H. Bunting has nearly completed his comtract for the erection of the Church of England parish building in Greenwood which Rev. W. A. Robins last Sunday evening announced will be a secular, as distinguished from a sacred, building, although for the time being church services will be held in it as well as other gatherings. It will be known as St. Jude's hall, and will be available for meetings, entertainments, etc., both in connection with parish work and such other purposes as the committee in charge shall decide to let it for.

Gas for painless extraction of teeth

Your Teeth deserve the best care you can give them.—— Health, happiness & comfort depend upon them. ——

DR. R. MATHISON

Both 'Phones. Greenwood.

John Shore, representing the assignee in the estate of G. F. Williams, is returning to Vancouver at once.

The Skookum Tilicum club had another of its sociable and enjoyable dances in Miller's hall last night.

E. F. Massam and Andrew Laidlaw, mining brokers, Greenwood, have dissolved partnership. Mr. Laidlaw has gone east on a business trip.

E. A. Duff, teller at the Greenwood branch of the bank of Montreal, left by last Saturday's train en route for Winnipeg where he will spend his summer vacation.

Smith Curtis, M. P. P., arrived in Greenwood on Tuesday and next day left for the Similkameen. He was accompanied by O. N. Scott, a graduate of Queen's University, Kingston, Ontario.

H. S. Turner, editor of the Cascade Record, is giving up newspaper work and is retiring to his pre-emption near Christina lake, where he will enjoy a well-earned change of scene and occupation.

A very pretty wedding occurred at the Central Hotel, Greenwood, when Mr. Arthur McGarr and Miss Isabell McIntyre were united in marriage. Rev. W. Anderson, of the Presbyterisn church, officiating.

If the streets committee of the city council will put a man on for a few hours to drive home the numerous nails that catch the boots of pedestrians using the side walks of the town, they will earn the thanks of not a few residents.

Superintendent Downie, of the Kootenay and Boundary division of the C. P. R., arrived by last night's train. He had nothing new to tell about the trackmen's strike, none of the men having returned to work yet on his division.

L. S. Moulton Barrett is expected to shortly return from Cariboo, whither he went a month ago with A. Drucker, M. P., who is ont from England with the object of looking into some of his mining investments, and probably of making more.

The Yale-Columbia Lumber company's sawmill at Material Yard, on the Columbia river, a short distance above Robson, was destroyed by fire early yesterday morning. Besides the mill a lot of railway ties and other sawn lumber were burned.

It is stated that Provincial Road Superintendent Kileen has gone up the West Fork of Kettle river to look over the unfinished road to Rendell and Carmi with the object of ascertaining what is necessary to put the road in sufficiently good order to make it fit for wagon traffic.

Jas. Hunter, of Hunter Bros., Rossland, and president of the Hunter-Kendrick company, limited, having mercantile houses at Greenwood, Grand Forks and Phoenix, paid a business visit to the Boundary this week, registering at the Armstrong whilst here.

When the train left Rossland yesterday there were two reports in circulation in that town relating to the miners' strike at the Le Roi One was that matters were in a fair way towards a settlement, so that the men would probably soon return to work, and the other that there was a likelihood of the War Eagle and Centre Star men going out in sympathy with the Le Roi men.

The metal covering having been placed on the exterior of the Rendell block, the painters are now at work improving its appearance. Present indications are that when finished the building will be more distinctly a credit to its owners and the town than it was before, although even when unfinished it was decidedly a finer looking erection than is usually to be found in young mining towns in the west.

A general meeting of members of the Greenwood club was held on Tuesday night to take into consideration the present financial position of the club, which, owing mainly to the abuse of their privileges by a non-paying section of the members, is not a satisfactory one. It is stated that some of those who attended the meeting advocated winding up this institution, whilst others did not regard the position as by any means a desperate one. From opinions expressed by some of the members who have not made improper use of the club, it is not unlikely that a reorganization may be decided upon, so as to get rid of those who under existing conditions are a drag upon the club rather than a support to it. Whatever course may be found desirable it is to be hoped that Greenwood will continue to maintain an institution which has the name among visitors of being one of the most creditable of its kind to be found in the upper country.

FIRE AT THE SMELTER

At about 8 o'clock last Saturday evening some of the timbers supporting the corrugated iron roof of the blast furnace house at the British Columbia Copper company's smelter caught fire. For a short time there appeared to be some danger of the flames spreading to the ore bins and thence to the other part of the works, but the number of men employed on the spot and water being available together quickly removed all cause for concern. A small portion of the roof was destroyed but the damage done did not exceed $150 in value. Although the smelter is outside the city limits the Greenwood fire department promptly responded to the fire alarm and rendered assistance in extinguishing the fire. Under conditions favorable to the spread of the flames the result might easily have been serious, but there being no wind at the time to carry the flames to other parts of the works, and much of the frame work of the furnace house being steel, the loss was fortunately restricted to the small sum mentioned above. The furnace men continued at work charging the furnace even whilst the roof above them was burning, so the fire incident did not necessitate any stoppage of smelting operations.

BOUNDARY'S GOVERNMENT AGENT.

Respecting the published statement that Wm. G. McMynn, who is acting gold commissioner, mining recorder, etc., for the Kettle River Mining Division, with office at Greenwood, has been appointed government agent for the Boundary, upon enquiring it has been ascertained that although the estimates included provision for salary for a government agent at Greenwood and Mr. McMynn has received communications pointing to his appointment in this capacity, no direct official notification of his appointment has yet reached him. There is little room for doubt though that the customary official notice will shortly be gazetted and that the government's recognition of Greenwood as the leading town in the Boundary will thus become evident.

WATERLOO MINING COMPANY.

There will be a meeting of the shareholders of the Waterloo Mining and Milling company in Vedder & Cunningham's office, Greenwood, Monday evening, June 15th, at 8 o'clock.
