

15th October 1936.

Dr. E. D. Clark,  
Association of Pacific Fisheries,  
826 Skinner Building,  
Seattle, Wash.

Dear Dr. Clark:-

In case #6 you will find several scrap books containing specimen labels used by early American and Canadian canners.

Just after the San Francisco fire of 1906 the Alaska Packers Association advised me their collection of old labels had been destroyed and they asked me if I had any duplicates I could send them. What few I did have I sent at the time, but naturally could not spare any of which I had but the one copy.

I do not know if the A.P.A. would be still interested in these but you might show them to Mr. Timson the next time he is in Seattle and if his company wants these labels I would like it to have this collection: otherwise they are intended for your association.

Yours faithfully.

HD/P.
