May 14th, 1920.

R. C. Clanton, Esq.,

Master Fish Warden,

Bonneville, Ore.

Dear Mr. Clanton,-

I have just returned from the East, but was unable to return by way of Portland as I intimated in my last letter I intended doing and have therefore not had the opportunity of seeing your operations as I had hoped to do. However, I trust you will be able to attend ~~the~~ a meeting of the Canadian Fisheries Association the beginning of June and that we will have the opportunity then of going more fully into the Sockeye propagation question. In this connection you mentioned that at the time you were writing me, you were also forwarding me some samples of the marked fingerlings you were releasing but these have not come to hand and as they would be of great assistance to me in proving that Sockeyes can be held in retaining ponds throughout the summer, I would appreciate it if you could have the matter looked into and duplicate sets sent me in the event of the lot referred to having been lost in transit.

Thanking you in advance, I remain,

Yours very truly,

HD:MW

Vice-President.
