19th May 1921.

Alex. Robertson, Esq.,

Harrison Lake Hatchery, B. C.

Dear Mr. Robertson;-

I have to acknowledge receipt of your favour of the 13th inst., and regret that I am unable to make the trip your way at present. Mr. Winch has gone south and will be absent for a month or so, and while it is not improbable I can spare a few days before his return I cannot do so this week, nor am I sure just when I can. I will let you know in advance however so that if it would be too late when I am free to go, you can advise me.

I am pleased indeed to learn of the success you have met with in regard to the Hicks Lake fingerlings, especially that the fish are of such a large size. It demonstrates the suitability of that lake for retaining purposes. What were the final results from your plantings in other barren lake waters, such as Grace and Otter lakes ? What waters have you available for the fry hatched from last fall's take of eggs ? Can you seine, or otherwise clear, Hicks Lake so as to get rid of any of the 1920 parr that did not migrate this spring ? Unless you can do so they will be a menance to any fry planted in that lake during the life time of the older fish.

Yours sincerely

HD/P.
