Messrs International Pacific Salmon Fisheries Commission,
New Westminster, B. C.

Dear Sirs;-

I enclose herewith copy of an article I have written concerning the attempts of the Provincial Government at Victoria to develop the water power possibilities of the Fraser river watersheds even though this might mean the destruction of the salmon fisheries.

The failure to make a fight when the Nechaco area was alienated but encouraged the Victoria authorities to make this second attack and I sincerely trust the fishery interests will not make a second mistake of the same order. It was with the idea of helping to make such a fight I prepared the article herewith enclosed.

Yours faithfully,

HD/P.
