WORLD'S NEWS IN BRIEF.

Boer Generals in England—Interesting Lador Notes.

Dowie and Booth—Australia's Terrible Drought.

The production of both hard and soft coal was but 60,000,000 tons in 1880; in 1900 it was 240,000,000 tons—a fourfold increase in twenty years.

Gen. Kitchiner will go to Southampton to meet Gens. Botha, Delarey and De Wet August 16 (to-day), the day of the naval review there. The King will receive them and Earl Roberts and Viscount Kitchener immediately the Boer leaders arrive.

The owners of a ship due in the Clyde from Sydney, with a cargo of wheat have been offered a freight of 10s. 6d. per ton to put the ship about and send her back to New South Wales, where, owing to the great drought, grain is in big demand.

The number of dead in the coal mine disaster at Johnstown, Pa., last week is stated at 114.

Reports from Butte, Mont., show that the copper mines of that district lost $10,000,000 during the year.

Col. Lynch, Nationalist M.P., accused of high treason during the Boer war and who was committed for trial at London, declares he was only a war correspondent.

The first series of old age pensions to colliers under the scheme of the Warwickshire Miners' Association, have just been given away by the Countess of Warwickshire.

As a result of the big explosion in the Crow's Nest Pass mine seven damage suits have been entered against the company.

All of the unskilled employees of the Carnegie Steel Company at Pittsburg, nearly 15,000, have had their wages increased 10 per cent. This will make the wages of the lowest laborer $1.65 a day.

The Tacoma Steel Company has chosen a site there for a 250 ton blast furnace. It will be the first modern blast furnace erected on the Pacific Coast.

Dowie is after General Wm. Booth of the Salvation Army. He says "the General and his officers have said too many harsh things about Zion, and that now, after suffering in patience, the time has come to strike back."

It is estimated that allowing a yearly output of 60,000,000 tons the stock of anthracite in Pennsylvania will last 80 years.

Two clay-makers took a day's holiday without leave from their employment at a pottery near Pontefract, England. Their action stopped one side of the works, threw forty men idle, and decreased the value of the factory's output for the week by some $1,000. At Pontefract the men have been ordered to pay $6 damages each.

All available men of the 3rd Dragoon Guards, 6th Dragoons, 8th and 14th Hussars are to be held in readiness to proceed to South Africa to join their respective regiments at an early date.

For unlawfully using armorial bearings, keeping a carriage and dog, and employing three male servants without having the necessary licenses, Robert William Brown, of Newton-by-the-Sea, Northumberland, has been fined £32 10s exclusive of costs, at Alnwick.

Of 15,966 emigrants who sailed from Liverpool last month, 9,402 went to the United States and 6,037 to British North America.

As the results of the efforts of a mediator, it is hoped diplomatic relations between Italy and Switzerland will shortly be resumed.

Mr. Hudson Trafford the American citizen who ran over a shepherd near Paris on June 5 has been sentenced to 8 days imprisonment and a fine of $60.

The time to advertise is all the time.

WOODMEN'S EXCURSION.

Tomorrow's Outing Promises to be Well Patronised

There should be a large crowd of Ladysmith people aboard the steamer Joan tomorrow morning when she sails for Steveston on the Fraser. The weather gives promise of being all that could be desired, and with good music, beautiful scenery and bracing sea air of the Gulf the trip should be quite an ideal one.

At Steveston will be witnessed a scene of activity and novelty that will astonish all who have never visited the Fraser during the interesting time of the salmon run. Every facility will be given to the visitors from Ladysmith to view the whole operation of dealing with the fish. It is an impressive spectacle.

Around Steveston are plenty of fine spots for picnicking, where lunch can be enjoyed and sports and games held.

The return voyage is to be made by the light of the moon and Ladysmith will be reached in good time on Sunday evening.

TEACHERS APPOINTED.

Additions to Ladysmith's Scholastic Staff.

On Wednesday evening a meeting of the Ladysmith Board of School Trustees was held, Mr McKenelly presiding.

Trustee A. S. Christie reported that he had seen the Superintendent of Education, Mr Robinson, in Victoria in regard to increased school accommodation and additional teachers. Mr Robinson willingly agreed to sanction the increase of teachers to six on the representations made by Mr Christie, who tried to get seven, and said that more could be appointed as needed. He was much surprised to learn from Mr Christie that the large school house now nearing completion was already almost too small for the wants of Ladysmith.

The following additional teachers were then appointed for the Ladysmith school: Miss Alice John, Miss Milligan, both of Ladysmith; Miss Nicholas, of Victoria; Miss Frame of Nanaimo.

It has since been learned that Miss Frame had accepted another school, and will probably not come to Ladysmith.

The Board then appointed Mrs Patterson, widow of one of the miners killed in Extension last year, as caretaker of the new school building at $30 a month to start; this will be increased when the stoves are put in and used. The school is to be heated with stoves this coming winter, but the following winter it is hoped that the furnaces will be installed for hot air.

It was intimated at the meeting that the number of children in Ladysmith of school age was considerably more than first announced and published in THE LEADER. It is well over 300.

CHURCH DEDICATION.

Anglican School Church Formally Opened by Bishop Perrin.

In presence of a congregation that comfortably filled the building the new school-church just finished by the Anglican congregation of Ladysmith was solemnly dedicated to the service of God by Lord Bishop Perrin of Columbia on Wednesday evening last.

His Lordship was assisted by Venerable Archdeacon Scriven, incumbent; Rev. C. E. Cooper, M.A., Nanaimo, and Rev. Mr Christmas, St. Philip's, Cedar.

The religious service was of an appropriate character and was conducted by the Lord Bishop, who, in his address, expressed the hope that prosperity would attend the Ladysmith congregation, and that before long they would have the pleasure of erecting the church building proper, the present one being, of course, used for church purposes temporarily.

Go to Seattle with the Bity of Nanaimo next Friday and see Elks cavort, the sight of a life time. Seattle will be at it's best that day. Only $2.50 round trip. D Galloway, Abbotsford Hotel gives all information, sells tickets and books berths.

Go Carts and Baby Carriages.

Why tire yourself out carrying that baby of yours when for a few dollars you can secure one of our pretty Go Carts which are built so light and that run so easily?

We are running off our stock of these carriages, as by some error this spring we overstocked ourselves, but this is your gain.

We prepay all freight to Ladysmith.

SATURDAY AUGUST 16, 1902.

A MODERN CINCINNATUS.

From legislating for a people to pick and shovel work is a tolerably far cry in those days of comfort-loving and high feeding; of cheap swagger and jackanapery where every man seems to be trying to impress his neighbor with his own importance, and when there is a distaste amounting to horror for earning a living by handwork and the sweat of one's own brow.

Mr J. H. Hawthornthwaite, the only consistent labor member ever chosen by the Nanaimo people to represent them in the provincial assembly, is the man who, having done his darg, and no unimportant one, in the legislature, has taken up the tools of horny-handed toil, the pick and shovel, because other employment was not at the time to the fore, and is exercising his right to earn his daily bread by honest toil.

It reminds one of the old Roman, Cincinnatus, who was persuaded by his fellow-countrymen to forsake his turnip and onion beds and come to Rome and extricate the state from a pickle. He disliked the notion of deserting his little farm and going up to the roaring city even for the sacred sake of Rome; but like a man, he went, did what he could—sufficient for all relief then wanted—and then went back to his neaps and oats.

Mr Hawthornthwaite, who has given a degenerate age an example of this stern Etruscan or Spartan resolution, accomplished more during the last session of the provincial legislature, more to the solid advantage of the workingmen of this province, than Ralph Smith has accomplished in all his years as a public man, and with all his selfish intriguing for his own ends. Mr. Hawthornthwaite may take the Workmen's Compensation Bill in his hand and confidently await the sober and sensible judgment of his fellow-workingmen. Legal men will tell the enquirer that that bill represents quite the best bit of work ever done in that Legislature for the special benefit and behoof of the workingman, and if the workingmen do not see it they deserve to have the old man of the sea, which his name it is Bombastes Furioso Smith, M.P., cling to their shoulders for aye.

What has Mr. Smith done that can for one moment compare with the splendid achievement of Mr. Hawthornthwaite in securing the passage of that bill? How he did work to get it through, too. The Leader is not able to see eye to eye with Mr. Hawthornthwaite always, but an active sense of fair play compels us to do honor to the man who, elected as a labor member has acted like a labor member, has not wasted his precious time palaavering and soft sawdering his constituents in the attempt to bamboozle them into the belief that he is a great man. He has thought and he has done something, the best ever done for labor in this province.

He did not come back to Nanaimo seeking a fat job or to take his ease; he did not get a chance to stick his right hand into his manly bosom, crook his left knee and pivot on his right leg, elevate his Roman nose (we suppose it must be that kind of conquering conk) and say to a group of gaping newspaper reporters:

"Gentlemen, I have been offered a portfolio as minister of labor at five thousand a year, but I won't take it, (sensation among the reporters) No, gentlemen, not if it was fifty thousand would I break my word if by doing so I might make a tactical mistake. And, gentlemen, (get this down, please, just as I say it) as a champion of labor I have other sacrifices to make for the dear workingmen who have given me a leg up to the lofty perch you now admire me on. I would rather be plain labor member holding the balance of power between capital and labor, than a gay minister at five thousand a year, free house and coal."

Reporters deeply affected and much borrowing of handkerchiefs.

No, Mr. Hawthornthwaite just got out his pick and shovel and went out to work, something that the illustrious Mr Smith has not done these ten years back and does not intend to do if he can keep on fooling the workingmen of Nanaimo as successfully as in the past.

The time to advertise is all the time.

Nanaimo's loss is Europe's gain—Dr. R. E. McKechnie, the eminent medico-political specialist in diseases of the pocket book, sailed from Montreal for Europe on the 7th inst. Vienna, it is understood, gets the plum. On the same date, according to Nanaimo's Court Circular, the Herald, England was bereaved of the brilliant presence of Ralph Smith, M.P., who could not be induced to oblige the king by waiting for the Coronation and the free dinner after. Mr. Smith is said to be heading for Ottawa where a fat government job is waiting for his gracious acceptance. Ralph has no intention of acting on the Nanaimo gas committee any more when his own patent acetylene can light him to the happy-land of "soft snaps."

The time to advertise is all the time.

The latest utterance from Mr. Rockefeller's University of Chicago is found in a lecture on art and literature by William Norman Guthrie. He declared:

"Shakespeare and Homer are not immortals, and I should be bitterly disappointed if they were. I hope that in the near future the human race will so improve in its tastes and accomplishments that Shakespeare will be held unfit to read."

Professor Guthrie might take a post-graduate course in English grammar to begin with, and then grieve about the unworthiness of Shakespeare. We have seen boys flogged for milder breaches of grammar than the emasculated Guthrie perpetrates in the foregoing deliverance. When the human race finds Shakespeare "unfit to (be) read" it will be because it has more Guthries than men of sense.

The time to advertise is all the time.

Nanaimo Free Press's Victoria correspondent uses the telegraph to announce to an awe-struck public that Miss Agnes Deane Cameron of that town has succeeded in worrying an autograph letter out of one Rudyard Kipling who used to write books and things. Miss Cameron, it seems, composed a panegyric on Kipling as a writer for children. (O Lord! have you read "Stalky and Co?"—more piquant than Rabelais); and the spicy delineator of swearing soldiers and barrack room brawls thanks the clever Victoria school ma'am most effusively. British Columbia is proceeding.

In passing an unusually severe sentence upon a ruffian who had been convicted of gross cruelty to a horse which he was driving, an English judge remarked that ninety-nine times out of a hundred the men who abused horses which they were driving, did so to hide their utter ignorance of the art of driving. A skilled driver very seldom maltreats his beast, because he can manage the animal; whereas the untrained man cannot, and to escape ridicule abuses the horse. Besides which downright fear of the horse often causes the unskilful driver to resort to cruelty.

NANAIMO DOCTORS.

Plain Talk by a Miner on the Medical question.

The Leader culls the following from Nanaimo Herald of all papers on a subject hitherto only ventilated in the Ladysmith Leader:

Editor Herald—

Sir,—A great confab is going on at present respecting the McKechnie-Hogle deal and it is about time we, as the men who have to pay the piper, should have something to say respecting the tune.

It is a fact as published that McKechnie is still drawing our pay while in the east improving himself for his own good then we ought to know about it.

On the other hand, if he only sold the good will of his business to Hogle for a certain sum, I don't know if we can do anything about as it is something that happens every day and every doctor considers his practice has a commercial value.

On the other hand, if Hogle bit off more than he could chew, and now that we are face to face with dull times he wants to squeal, we are the people who ought to kick. I for one want to see our money spent in such way as to procure for us a first class doctor who will not entrust any department of his work to an unqualified man. Surely the money we pay ought to ensure us that. I have no kick against McKechnie except that he was a monopolist. I have no kick against Hogle except for the same reason.

But if McKechnie, in the role of monopolist made a deal with Hogle. Hogle is as much to blame as McKechnie, because it was Hogle who took the risk of making these payments and giving us a first class service.

Men of Nanaimo can we afford to be bought and sold in this way? I say no. Let us throw the whole business up and divide the work among the other qualified men in the town and then we can get our prescriptions dispensed where we think proper.

(signed) MINER

AT THE SPRINGS.

Following is the list of guests at St. Alice Hotel, Harrison Hot Springs, B.C., during week ending August 10th, 1902:

From Vancouver:—Geo. Lamarre, J. Barnet MacLaren, Mrs Harry Wilson, E. Barnard, Mr and Mrs E. P. Davis, governess and three children, Mr and Mrs R. C. Davis, Miss Kathleen Davis, M. W. Nolan, Miss A. M. Freer, Mr and Mrs H. C. Ackroyd, W. G. Rose, T. V. Rounsefell, A. V. Crisp, Mrs Field, Miss Stickney, N. Cleland, H. W. Welsh, Geo. Higgins, S. T. DePencier.

From New Westminster:—C. B. Sword, L. A. Day, Ewen McMillan, Charles Rodrigue, A. E. Beetles, J. C. Armstrong, L. McQuarrie, Mrs G. A. Calbick, S. Malcolmson, Jno. A. Briggs, N. McCaskill, Mrs D. J. McQuarrie, D. J. McQuarrie, Miss Margaret Lewis, Miss Hazel Calbick, D. J. McQuarrie, W. E. Vanstone.

Armitage, Minnedosa, Man.; G. H. Allis, Esquimalt, B.C.; Mr and Mrs F. G. Crisp, Dawson, Y.T.; F. E. Curtis, Agassiz, B.C.; Mrs Marshall Smith, Ladner's, B.C.; S. Miller, Fairhaven, Wash.; Peter Nuuson, Ferndale, Wash.; Edwin Klingberg Ferndale, Wash.; L. Martinson, Birch Bay, Wash.

SONG SERVICE.

The second of the summer open air services will be conducted in the same place as the last one, two weeks ago, near the lagoon, by Rev. W. G. Tanner, of the Methodist church, and Mr. G. Morton of the Presbyterian. Music will be furnished by organ and cornet. The place is shady and cool. Service begins at 4. p.m., to-morrow.

CHURCH SERVICES.

Methodist Church—Rev. W. G. Tanner, B.A., pastor. Sunday: 11 a. m., Sabbath School; 7:30 p.m., evening service, subject "Old Enemies Pursuing."

Church of England—August 17th, twelfth Sunday after Trinity. 8 a. m., Holy Communion; 11 a. m. Matins and Litany; 2:30 p. m., Sunday School; 7:30 p.m., Evensong.

The music sung at the opening service on Wednesday will be repeated at the evening service.

A. SCRIVEN, Missionary in Charge.

Catholic Church—Services every Sunday as follows: Mass at 8 a.m. and 10 a.m. Benediction at 7 p.m.

First Presbyterian—Aug. 10, morning service at 11, Sunday school 2:30 evening service 7:30. Evening subject: "The Loneliness of Sin."

PURE BLACKGUARDISM.

What Happened to Gregson of the Life Guards.

One who witnessed the cowardly conduct of the young blackguards, who assaulted Lieut. Gregson of the 2nd Life Guards gives the following account of what happened:

"About half-past eleven," he said, "I heard shouts on the lawn near the officers' quarters, and, thinking it was some of the troopers I went to the spot but found it was the officers setting about Lieutenant Gregson.

"They chased the unfortunate man round the barrack-yard with their whips using most foul language the whole time. I heard such sentences as 'No, you ——, we have got you!' and 'Take that, you ——!' and so on. Eventually they took hold of Gregson and rolled him in the gravel, after which they put him in the water trough. They turned him over and over in the water and he got out of the trough more dead than alive.

"The officers then made for Gregson's quarters, which they turned completely upside down, breaking the windows, and pitching the furniture into the yard. They threw his boots on to the roof of the quarters and decorated his door with mats, etc.

"After it was all over, the poor lieutenant returned to his apartments, and he passed a bad night wrapped in his overcoat.

"His brother officers had destroyed the whole of his kit, and the next morning he had no regimentals to go on parade with."

Lieutenant Gregson, who belongs to A squadron is one of the most popular officers with the men in the regiment. He is a thoroughly good soldier, but he will not join in any of the bouts by the junior officers, and that is why they dislike him.

It is understood that Lieutenant Gregson went to London and reported the facts to the War Office. Major Gregson, his uncle, has also interviewed Colonel Audley Neeld on the subject.

It does not appear that any of the senior officers had a hand in the affair, and Colonel Neeld, who lives at Queensmead, some distance off the barracks, did not know of the affair until the next morning. He has had the officers before him and an inquiry is to be held.

On the occasion of Mrs Scriven's birthday a social meeting was held in the Anglican church on Thursday evening. There was a very good attendance and a first class programme of songs and readings. Everybody enjoyed it.

FARM AND GARDEN

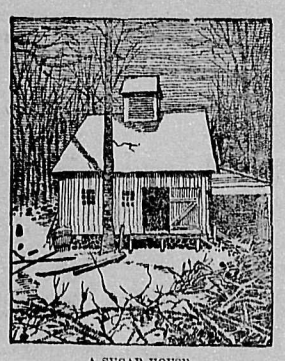
MAPLE SUGARING.

How They Do It In Vermont—From Sap Gathering to Sugaring Off.

Maple sugar and sirup are favorite sweets the country over, and this fact gives a general interest to some information about the maple sugar industry which has practical value also for the sections where this particular kind of sugar making prevails. An American Cultivator correspondent supplies the following details:

Some sugar places in this immediate vicinity number over 7,000 trees.

The evaporator is the first and most important consideration. The point to be considered in an evaporator is the



A SUGAR HOUSE.

one that can make the best sugar in the least possible time with the least amount of fuel. Evaporators are made of galvanized iron or steel, copper or tin. They are usually supported on iron arches lined with brick, but sometimes the arches are made entirely of brick. Storage tanks, draw tanks, sirup tanks, buckets and pails are of galvanized steel, tin or wood. We consider galvanized steel the superior article because it will not rust. Bucket covers can be of wood or tin; spouts, steel or tin.

Take a sugar place of 3,000 trees or, rather, one that uses 3,000 buckets. When the "boss" thinks it is time to "sugar," the men are set to tapping the trees. A three-eighths or one-half inch bit is used, and in large trees the hole is bored about two inches deep, in smaller trees only about one and a half inches. Spouts are driven or screwed in, buckets hung to each spout and covers, if they have them.

Some trees are tapped in two or three and oftentimes four places, hanging a bucket to each spout of course. Then, the weather being right, the sap runs, and the teams are started as soon as possible, for the quicker the sap is made into sugar the better the sugar is.

Men with pails holding sixteen quarts go to each tree, collect the sap and empty it into the draw tank, which is being hauled about on a "sugar sled" by a pair of horses. These tanks hold anywhere from twenty-five to fifty pailfuls. When a load is secured, the team is driven to the sugar house, and the sap, by means of four inch pipes, is drawn from the draw tank to the storage tank.

The storage tanks are placed on a staging on the outside of the sugar house and connected with the evaporators by rubber hose or iron pipe, the flow of sap from storage tank to evaporators being regulated by automatic valves. Thus the sap enters one end of the evaporator, working back and forth through partitions and corrugations till it reaches the other end of the evaporator, when it is drawn off as "sirup."

The sap is not "handled" any from the time the men pour it into the draw tanks until it comes out a finished article—i. e., maple sirup at eleven pounds to the gallon.

This may be put away in sirup tanks and allowed to cool and settle, and

TREES TAPPED AND BUCKETS HUNG.

then, if the sugar is wanted, this sirup is put into the "sugaring off" pan on a separate arch and boiled down until the right pitch is reached, when it is taken from the fire, stirred gently and allowed to cool and then put into tin cans or wooden tubs, and it is then ready for market in the form of maple sugar.

Hog Feed and Firm Pork.

Food is thought to greatly determine the firmness of pork. At the Canadian experimental farm a ration of equal parts of oats, peas and barley gave the firmest pork. The longer corn was fed the greater was the tendency to softness.

Manuring For Wheat.

Manuring for wheat is not advised in most parts of Iowa, as a rank growth is liable to result and lodging follow. It is best, according to an exchange, to apply the manure to corn or grass crops.

INCREASING BUTTER FAT.

The Kind of Feed Given Hasn't Anything to Do With It.

A correspondent writes to Dairy and Creamery to ask how he can so feed his cows that their milk will be richer in butter fat. The old belief that cows will produce milk rich, or poor in butter fat according to the feed they are given has a strong hold in this country. This belief led to the saying, "Nothing comes from a cow's teats that has not gone into her mouth." While this is true in every sense of the word, long continued and careful experiments have proved that except within very narrow bounds it is impossible to improve the quality of the milk of a cow by feeding her.

The quality of the milk is a characteristic of the individual cow. She gives milk that is rich or poor in butter fat from some natural tendency which is not well understood. This tendency is transmittable to her descendants, and by careful selection it is possible to improve the average quality of the milk from a herd of cows to a wonderful degree.

Given a cow that naturally gives good milk—that rich in butter fat—and breed her to a bull that is from a cow that gives good milk, and the progeny is likely to be better than the dam, although this is not invariably the case.

Butter fat does not differ from tallow in any essential way. It is animal fat and is elaborated from the feed given the cow that produced the milk from which it is separated. One cow will turn the fat in her feed to butter fat, and another will store it up in her body. The one cow will be a good butter maker and the other a poor one.

It is now pretty generally conceded that milk is elaborated largely during the process of milking. That it is separated from the blood in some way is certain. Feed a cow more of the elements that go into the composition of milk, and she will become fat. The cow that gives poor milk will fatten much easier than the one that gives rich milk.

According to recent exhaustive experiments made by Professor Haecker, it does not make much difference what is fed to a cow if she is given a plentiful supply of sound feed. Give a cow all she needs of sound forage and grain, and she will produce to the utmost possible limit butter fat or tallow. If she turns her feed into milk and butter fat, she is a good cow. If she turns it into tallow, she is a poor cow from the dairyman's standpoint.

If our correspondent will follow this plan, he will get more butter fat from his cows, but not richer milk. His cows will give more milk than they would if poorly fed and every 100 pounds of that milk will contain just as much butter fat as is natural for a given cow to give. If she gives 3 per cent milk and only 100 pounds a week, the milk will contain three pounds of absolute butter fat, or about three and a half pounds of butter. Feed her so she will give double the quantity of milk, and that milk will give double the quantity of butter fat, but will not be richer than the smaller quantity. The way to get more butter fat is to feed the cows better. Just what it is best to feed them is a matter on which learned doctors disagree at this moment. However, it is safe to feed them enough, even if the ration is not quite balanced.

BALANCED RATIONS

The hot wave last summer struck the dairy portion of Iowa more severely than any other part, says The Creamery Journal. A study of the weather maps issued from Des Moines during the summer showed that a strip running south by southwest from near the northeast corner of the state received no rain at the critical time when the corn needed it most, and consequently this strip suffered extremely. This winter farmers living in this strip are feeding shredded corn fodder almost exclusively, the high price of grain and of bran and even of hay being practically prohibitive. What is the result? Not bankruptcy. There is not enough protein in the fodder ration to make much more than half a mess of milk, but the feed cost of this half mess is practically nothing compared with former methods of wasting the fodder. And, furthermore, a big fraction of the farmers when they did feed grain fed it so "unbalanced" that the milk yield was little greater than it is this winter with no grain.

To Feed a Cow For Milk.

We keep a few cows, so I am most interested in them and want to make it a specialty, says "Subscriber" in National Stockman. Our cows look well and do well. We feed oats and corn ground together; also sugar beets, some of which weighed seven and three-quarter pounds. They eat them very greedily, a peck apiece. I would not be without them. Also fed timothy and clover mixed. We have no fodder, but it is equal to grass if it can be saved green. I have a box for salt on the side of the barn, where the cows can help themselves. I think the best time to feed a cow for milk is when it is a calf. Feed it well, keep it growing, vigorous and healthy until it gets to be a cow, and you can be assured of a good cow if the stock is right. I think as much of keeping a calf in good order as I do a cow. Everything is stabled and in stanchions. In this way we keep two more than formerly in the same space.

Refuse From the Cow Manger.

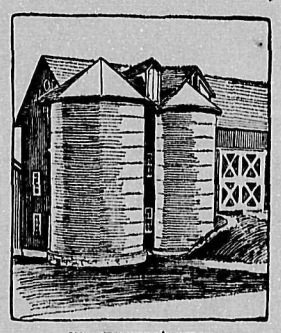
Cows which are producing milk under heavy feeding should not be compelled to eat up forage too close. Let them eat what they will readily, then give what is left to young stock. They will do well on it, and the cows will not be compelled to eat material which is not palatable.

CONVENIENT SILOS.

The Question of Food and Its Preparation For Dairy Cattle.

Since dairying has become one of the principal agricultural pursuits, especially in the east, the supply of fodder or the raising of forage claims almost the first consideration of the farmer, says T. H. Mitchell of Cayuga county, N. Y., in American Agriculturist. We have tried on Oakland farm the various forage crops recommended and have come to the conclusion that they are all too expensive on account of the necessary labor. We except rape for pigs and sheep and ensilage, which we have for some years past used practically the year around. Ensilage is just as valuable in the heat and drought of summer as in the winter's cold. If when you cut your new crop in the fall any is left in the silo, cut right on to the old. We are now feeding out of the smaller of our two silos shown in the illustration corn put in in 1900, and it is just as good as that put in last fall.

When building the first silo, place it convenient for a second one. You may



MR. MITCHELL'S SILOS.

need it. The photo shows that ours are so placed, and it is not necessary to move from one to the other while filling. This is not only a saving of time, but allows one to get much more forage into a given space, as it has time to settle. I believe that every one is agreed that ensilage corn must have cultivation and light and not be planted too thick. But I believe that it is not settled that grain in the silo is of as much value as the same grain dried and fed as grain. My experience leads me to believe that by chemical action or by some unknown cause to me, at least, the corn put into the silo with the stalks is not of as much value as the same would be if dried, ground and fed as grain. This subject our experiment stations should investigate more fully.

We are so well convinced of this that this spring we shall plant and raise as good a crop of field corn as we can, striving especially to raise a large quantity of grain, remove the ears and cut the stalks into the silos. If it proves a failure, we will let the readers of this paper know why. But we don't intend that it shall prove wrong. On the contrary, we believe it a decided step in advance, the serious question being how to get the stalks into good ensilage if put in as dry as they must be if left long enough to mature the grain. Our idea is to have plenty of ensilage for winter feed, enough for summer and some left over. We will do away entirely with green forage crops, as they cost too much labor and do not produce enough per acre.

The Steady Milker.

From testing the best milking cows are found out, and it is wonderful how animals are discovered to be good milkers when a whole twelvemonth is taken, which yet have never yielded a very large quantity at one time, while, on the other hand, animals which have yielded an enormous quantity over a short time and have had great notice taken of them are really poor milkers when their total yield for twelve months is summed up. The cow that yields a moderate quantity over nine, ten or eleven months is the sort to have and breed from, and it is only by a record that this is found out. In addition to this, the quality of the milk must be taken into account, and it is desirable to test this from time to time also.

Veterinary

To cure a hard milker confine the cow so that you will be safe to insert the teat bistoury into the teat, then cut the small opening in four opposite directions. This will make a free opening and allow the milk to run on its own accord for a short time, but it will soon close, leaving an opening sufficient to allow the milk to come easy. In fact, milking in itself will keep it from closing too tightly. Above all things have your instruments clean, also the teat.

What Kills Clover.

We are asked to give some of the reasons why clover kills out. Under ordinary conditions clover is a biennial. Sown in the spring, it lives over the next winter, produces its seed the second year and then dies, its mission being ended. Some plants, failing to produce seed, will live over another season. This fact explains the loss of the clover to the many who do not know the history of the plant. Many fields are killed out the first summer by the too great affection of the nurse crop. Then, if pastured heavily the first fall, many fields will winter kill for want of cover, while on clay soils alternate winter thawing and freezing will heave the soil and break the roots. Scant nurse crops and plenty of cover the first winter will usually insure the crop.

A delicate perfume for the gown is made by dropping a little lavender into boiling water and holding the garment over the steam.

Ladysmith, B. C.

This beautifully situated town offers exceptional advantages

Headquarters of the coal shipping industry of the Pacific Coast.

It is the largest railway centre in British Columbia.

Tyee Mining Company's smelter and reduction works to be erected here.

First class water system, electric light and power plant about to be installed.

Third seaport in B.C. Seven hundred vessels entered and cleared in 7 months.

Every facility for manufacturers and all needing cheap power.

Splendid openings for merchants and professional men.

Keep Your Eye on Ladysmith

LADYSMITH, B. C.

WHAT WOULD YOU DO?

If you were a clothier and had too many light suits on hand—would you carry them over to another season and have your money thus tied up? Or would you mark a small price on the lot and sell them now?

Well we've put on the small price—We'll sell them now.

$15.00 suits for $9.50
$13.50, & $12.50 suits for $8.75
$10.00 Suits for $7.00.

Some of these suits are dark enough to wear into the winter.

—THE—

G. D. SCOTT CO.,

LIMITED.

CASH CLOTHIERS, NANAIMO.

THE CITY

Mr Elliot, late of Chemainus Lumber Mills, has succeeded Mr Robert Allan as secretary to the Ladysmith Lumber Co. Mr Allan is now bookkeeper for the Tyee Copper Company.

Lively repairs all kinds of English, Swiss and American watches.

Attention is drawn to the E. & N. Railway Company's advertisement of an excursion by Str. City of Nanaimo from Ladysmith to Seattle on the 22nd inst., the occasion of the Elks carnival there. The steamer leaves here at 10:30 p.m. Friday, returning the Sunday following.

Prof. Charles Culley, late of the Toronto Conservatory of Music, will start a class here, commencing on August 2nd, for the purpose of teaching violin, piano, mandolin and all stringed instruments. Parties wishing to receive instructions will address Prof. Charles Culley, Nanaimo, B. C.

If you want to get a nice ring remember we can make anything you want. W. H. Lively, Jeweler.

You will be neglecting the opportunity of a lifetime if you miss the grand excursion of the Woodmen and band to Steveston tomorrow. Round trip one dollar and a good time guaranteed.

THE KEITH HOUSE

VICTORIA CRESCENT, NANAIMO

Visitors from Ladysmith and district will find in this well-appointed house all the home comforts. Lunches for lady shoppers a specialty. Terms strictly moderate. Service and cuisine first class.

MISS B. KEITH, Prop. and Mgr.

DR. J. GRICE,
DENTIST

Johnston Block, - Nanaimo, B. C
P. O. Box, 37, Tel. 145.

Visits Ladysmith every Saturday. Hours from 9 a. m. till 5 p. m.
Abbotsford Hotel.

SHOOTING SHOOTING

Shooting Season will soon be here and you'll need a new Gun or Rifle.

Have just received a full line of the latest make in Guns, Rifles, Ammunition, Etc.

E. ROLSTON,
Ladysmith, - B. C.

Hardware, Stoves, Tinsmith, Plumbing,

Agent for S. W. Paint. McClary's Stoves and Ranges.

A special meeting of the Board of Trade is called for Monday evening at 8 o'clock promtly, to consider urgent business. All members of the exechtive are expected to be present.

All members of Orange Lodge, and all Orangemen resident in Ladysmith are requested to meet in Nicholson's hall on Tuesday evening next at 8 o'clock on very important business.

Chinamen interviewed as to what they think of the "move on" order take the matter resignedly, like Chinamen, and and say they are ready to go whenever the Company says "March!" which they expect any day.

Mary had a little ring;
It shon with beauty rare.
She said it was her engagement ring
And was bought at Lively's store.

Mischievous boys have burned nearly all the grass off the spit. Hoodlumism of this sort is going to loose the public the privilege now enjoyed of using that portion of the water front unless more care is exercised.

"It was reported first by Mr William Ward and afterwards by Mr Drysdale, president of the Puget Sound Packers' Association, that there was 18 solid miles of fish in Plumper's Pass that had evaded the traps and were heading for the Fraser."—Colonist Aug. 12.

The Woodmen have arranged to have these fish in the river tomorrow, Sunday, August 17th. Don't fail to take in the excursion and see them.

Wheelmen are advised not to try the Ladysmith-Nanaimo road at present. It is quite unfit for bicycling.

If it is a nice clock you are looking for we have them from $1.00 to $18.00. W H. Lively, Ladysmith's Leading Jeweler

Str. City of Nanaimo's grand excursion to Seattle next Friday will be the only one from here this Summer. Don't fail to seize this good chance to see the bustling American city, and the Elk's Carnival. Call on Mr D. Galloway, Abbotsford Hotel, early, about your ticket and berth. Tickets round trip $2.50.

Still the lumber old and new pours into town on long trains every day; some from the lumber mills, and some from the houses pulled down at Extension, Alexandria, Nanaimo and other places.

Salmon are now running plentifully in the harbor. Some good catches have been made.

Mr Jos Hunter superintendant of the E. & N. Railway Co, was in Ladysmith on business on Wednesday.

British Columbia is the greatest salmon packing country in the world and Steveston is the capital of the industry. You can see the modus operandi for one dollar tomorrow when the steamer Joan takes the Woodmen and Band over for the day. A never-to-be-forgotten sight.

Mr George Roberts, butcher, late of Extension will open his new shop at the corner of Roberts st. and First Avenue to-day. Mr Jno. May, of Nanaimo, putting up the building.

Some light-fingered gentleman walked off with a coal oil tin filled with hardware for a building being erected on First Ave., which had been left outside Wednesday night. The carpenters said things in several languages when they discovered their loss in the morning.

An improvement which will be welcomed by the travelling public is being carried out at the railway station, where the bank leading from the Esplanade to the platform is being cut down for the reception of a sloping sidewalk.

Ladysmith Lumber Company are simply overwhelmed with orders for all sorts of lumber.

Clearing for the Union Brewery building at bridge 105 is going on briskly.

The elevated railway to the smelter bins has been finished, and trains can now run on top of the bins.

Mr Rolston has received from the East a large consignment of corrugated iron for use on the top of the Tyee smelter buildings.

Str. Otter arrived in port last Thursday for a cargo of coal.

Barquentine C. B. Kenney will start loading next week.

Next Saturday, Aug. 23rd, the First Presbyterian Sunday School will hold their annual picnic to Chemainus River.

Miss Bertram will open her school on Monday the 18th inst., in Mr S. Lauderbach's house, Esplanade.

An opportunity to see the great city of Seattle and the Elks Carnival for $2.50 return from Ladysmith is something not to be missed. The fine steamer City of Nanaimo will leave here at 10.30 p m. Friday next; returning leaves Seattle, Sunday 10. a. m. 23rd. August. Mr D. Galloway is selling tickets and has the steamer's berth plan at Abbotsford Hotel Book your berths early.

JOB PRINTING PRICES.

THE LEADER Is ready to prove to anybody who wants to save money on Printing that this shop's prices are lower than those of any other office in the country. Having satisfied ourselves on this point we shall be pleased to compare notes with any who doubt.

The quality of THE LEADER'S job work is equal to anything produced in the Province.

THE LEADER employs only skilled union workmen, receiving the full union scale of wages; its prices and quality are always up to the accepted standard.

Ladysmith merchants and others who send to Victoria, Vancouver and other places for their job printing can save money, time, misunderstanding and annoyance by investigating THE LEADER'S statements as published here. When we cannot print certain classes of work we tell you so, we do not take your order, have it done elsewhere and charge you middleman's commission.

Our Motto Is:—"Square dealing; one price for all; our best work in every job." No trouble to estimate. Call and see us about that job printing work you are wanting and we will save you money.
