MINING NEWS

C. H. Schupster and William Hartman, prospectors, arrived yesterday and will outfit in Lillooet for a trip up Bridge river and Cadwallader creek.

William Leach is busily engaged doing assessment work on his claim, the Minuri, which is situated on Cadwallader creek and lies to the east of the Blackbird and the Ida May group.

The Canadian diamond has been tested by the greatest gem experts of the world and pronounced to be equal to the South African product.

T. A. Brett and J. C. Williams returned Monday from a prospecting trip up Cayoosh creek and report a fine time and good results. Mr. Williams left for the coast Wednesday.

A. F. Noel and H. J. Keary were guests of John E. Johnson on Sunday and inspected the Jesperson Hydraulic leases on Cayoosh creek, now being developed by Messrs. Mellott and Johnson.

H. J. Keary and H. L. Phair have closed a deal for the mineral claim known as the Skukum. It is situated on Cadwallader creek adjoining the Nellie and will undoubtedly prove itself worthy of the purchase.

The prospectors who have been up Cayoosh creek for the past week are highly pleased with the result of their investigations. Mr. Davidson and son and Mr. Crane, all of Vancouver are working in the vicinity of the old Bonanza mine and are elated over the prospects.

G. D. Bell and Grant White intend to further develop their claims between Tyoughton and Gunn creeks, and in a short time will open up the veins at different points to have a practical surface showing for the examining engineers when they arrive to look at the property this summer.

Development is still going on at the Rhodes-Sunborn group of claims on Seton lake owned by John Dunlop. Under the able management of Will Haylmore a good showing is being made and all the openings being placed in shape for examination of the ore body. This property has had considerable development done upon it and the values are very encouraging.

The Spokane group of claims owned by Dr. Christie and situated on Big creek, a tributary to the North Fork of Bridge river will in all probability be surveyed in a short while. Extensive development work has already been done on this property and one tunnel is in over 200 feet. The object of this is to tap the vein, which will eventually give them a depth of about 100 feet. The assays are of a good value and this group is generally considered one of the best propositions in the Lillooet mining district.
