SNOWSHED DANGEROUS

Coroner's Inquest on Death of Brakeman McAteer

The inquest on the death of Middleton McAteer, brakeman, who was killed in No. 26 shed on Monday this week, was held on Wednesday. The following were the jury:—Roy Macdonaid (foreman), J. J. Devine, W. J. W. Brown, S. G. Robbins, J. Lee, and S. Norman.

W. J. Armstrong, conductor of the extra west freight 1739. — We left Glacier on July 4th at 11:05 a. m., west bound. Our train was made up of seven cars and a caboose. Descending the west slope of the Selkirks both brakemen were standing on the top of the cars and were like this entering 21 shed. I don't know in what position deceased was in after that till we came out of No. 26 shed. Brakeman Dings saw Mc. Ateer lying on the north side of the car, fourth from the engine, and called my attention to it, the train was slowed down and the body rolled off the car. We brought it into Revelstoke. It was 11:30 a.m. when he died. The only real safe place to stand in a shed is right in the mid. dle of the running board. The car McAteer was on was an ordinarynew C.P.R. box car. Men must be outside while descending grades and use caution while passing through snowsheds. The rule says, "Trainmen must not ride outside on top unless for the safety of the train." At this part it is necessary for the men to be outside for the safety of the train. The men are warned to look out for snowsheds. Deceased knew the road quite well. The sheds are safe if trainmen stoop over. The new cars are higher than the old ones. Sometimes men must look over the sides to see if a wheel is skidding. There is no rule forcing men to lean over however. The cen tre of the car is the safest place. The deceased was supposed to be sitting on the north side of the car when entering shed 26.

Brakeman Ding's sworn statement: I don't know what position McAteer was in when he was struck. We were both sitting going through the sheds. No. 26 shed is lower than the others.

T. Ansley, trainmaster:—Men must be on top descending heavy grades to work retainers. Men must be on the running board going through the sheds. There is no need to go to the side and I would censure men if I saw them doing it. No man has been censured by me yet for skidding a wheel in the sheds. The top of the shed is clear of the running board on this car by six feet, the car being a standard C.P.R. 30 ton car. McAteer was five feet ten inches in height. I caution the men not to go to the side of cars. It is supposed that the two brakemen were playing and deceased may have stood up in the shed to see what his mate was doing. A man can't get hit sitting The sheds are all safe, but it is best to stoop down. The men have never complained about the sheds. There is no need to travel over the cars in sheds to change retainers.

M. McQuarrie, acting resident engineer: I measured the shed.

Dr. McPherson, gave medical evidence of death as caused by a fracture of the skull.

J. J. Porter, conductor: No, 26 shed is no more dangerous than the others. It is dangerous to sit on the north side of cars in the sheds, but safe if a man stands on the running board.

VERDICT

The jury returned the following verdict:

That the deceased, Middleton McAteer, met his death from injuries received in passing through snowshed No. 26 while on duty, and from the evidence, we find that there is danger in passing through the snowshed, in as much as the shed does not sufficiently clear the whole top of the train; and in order to minimize the danger to trainmen we recommend that the C. P. R. Co. should endeavor to remedy this to the best of their ability.

Must Protect City

After lively repartee between Ald. McKinnon and the rest of the council the matter of the resolution between the city and W. Newman & Co., for the extension of time for completing the work and the release of the penalty clause was referred to the city solicitor. Ald. McKinnon contended that the agreement drawn up by the city solicitor recently was good enough and it was not right to ride over his advice and accept the advice of another lawyer. Mr. Newman had asked for an extension in order to get his bond, and the bond was not yet forthcoming, and more over the $667 for the running of the gas plant had not yet been paid. The agreement as presented last night by Mr. McCarter, in the opinion of Ald. McKinnon, if accepted would not safe guard the city, he (McKinnon) would not stand for this sort of thing.

Ald. Cowan pointed out that the bond could not be obtained without the release of the penalty clause. Mr. Newman wanted to pay up his local liabilities with the $10,000 cheque when it was returned to him, also the running of the gas plant.

Ald. Abrahamson pointed out that the new agreement would waive the whole contract.

Ald. McKinnon wanted to protect the city and refused to go against the advice of the city solicitor and would have nothing to do with the thing at all.

BOARD OF TRADE

The regular monthly meeting of the Board of Trade was held on Thursday night.

Among the communications were:

From W. Pugsley, Minister of Public Works for the Dominion, stating that Engineer Keefer, will make a report on the construction of a steamer wharf at Revelstoke.

From W. J. Bowser, Attorney-General for B. C., re the appointment of a deputy game warden for Revelstoke that he had taken up the matter with the chief game warden, who states that he cannot recommend an appointment this year, as there are no funds out of the appropriation; also that there are other points in B. C. which require a game warden more urgently than Revelstoke.

COLUMBIA RIVER SURVEY

From E. B. McKay, surveyor general, stating that it will be impossible to make the traverse survey of the Columbia round the Big Bend as far as Surprise Rapids this year, as all the survey vote is used up but that it will have attention next season. R. Smith's name will be put on file for the work.

H. B. White, of Toronto, wrote asking particulars and information as to the advisability of opening up a dress and dry goods store in the city.

The secretary was instructed to write to the Kootenay Engine works at Nelson pointing out the advantages of Revelstoke for a machine repair shop.

A committee consisting of A. McRae, G. S. McCarter and W. M. Lawrence was appointed to meet the Liberal Association to arrange for the reception for Sir Wilfrid Laurier on his forthcoming visit to the city on August 18th.

The secretary was instructed to take up the matter of emptying the letter boxes at the station for trains 1 and ? with Post Office Inspector Greenfield and enquire why they are not emptied.

WANT LOCAL EXHIBITS.

The department of agriculture at Victoria, wrote asking for a selection of grains, grasses and fodder plants, etc., grown in the Revelstoke district, for display in the botanical chambers, Victoria. Such displays will be for the benefit of intending settlers who will be able to see what each locality can produce.

J. H. Turner, agent general for Canada in London, wrote asking for copies of the local board of trade reports for use in his office.

A report from the committee on the reception to the University Commission when visiting the city recently, was read, stating that the visitors had been driven round the city and suburbs, all expressing much pleasure at what they saw.

The Department of the Interior, wrote requesting the board to let them know what they wished to do regarding the reservation of certain lands north of the city, for the conservation of the city water supply.

New Trades Licenses

The by-law amending the Trades License by-law was finally passed and adopted by the council last night The principal changes are:

Sub-section 5 of Sec. 1, is amended by striking out "$100" and substituting $200.

Every place seating less than 975 persons, $25 for every six months.

Every telephone company $5 for every six months.

Every bill poster $5 for every six months.

Every chimney sweep $5 for every six months.

Every skating rink $10 for every six months.

Every second hand store or dealer, $5 for every six months.

Every milk vendor $2.50 for every six months for each wagon used.

Every trading stamp, gift or coupon company $1000 for every six months.

Transient real estate agents $25 for every six months.

On hand—large stock of good dairy butter and fresh prairie eggs— McIntyre's.

CORONER'S INQUEST

Stepping in Open Culvert Caused Accident

The Inquest on Conductor Ernest Davis, of the C.P.R., who was killed on the south track on Wednesday last, was held the same evening.The jury empanelled were:—J. T. Pollock (foreman), E. W. B. Paget, W. Bews, W. McPherson, E. Steward and J.T. Newbigging.

Dr. McPherson gave medical evidence of death being caused by shock and hemorrhage, caused by the body being crushed.

W. J. Johnson, engineer of north extra 440, said that the accident happened at 2:40, after the train had doubled up at Greenslide. He had received the signal from the brakeman to back up to make the coupling but the coupling did not make. The train began to move down the grade and the brakeman began to set the brakes. Davis, who was on the engine, then got off on the left side, while the engine was backing up the second time by signal from the brakeman. I then saw something coming from under the tender. I put on the brakes and stopped in 8 feet. I then saw the body lying near the track on the right side. I don't know how he got hurt. There is a little box culvert there and it is likely Davis tripped in that while trying to push over the knuckle of the coupling. The couplings were alright, but it is often that they do not make the first time.

W. Green, the fireman said:— The brakeman signalled the engine to back up when the coupling was not made. Davis jumped off the tender giving me a signal to back up easy. He was running between the tender and the car of the train. Davis went to throw the knuckle open. I didn't see him struck. He lived ten minutes after he was picked up. I got no stop signal at all and when the tender was fourteen feet from the car I heard a shout.

H. W. Eagelston, brakeman said:— The knuckle didn't open enough to make the coupling. I then set the car brakes. Davis was on left side of tender, he went in to pull the knuckle open. A little culvert was just at that spot and Davis' footmark was seen there. All men should look out lor themselves, and Davis took a big chance in going in to couple when the train was moving I have been on railroads for thirteen years. Davis took undue risk and there was no need to burry over the coupling. The equipment was all O K. The engine didn't hit the cars the second time.

T. H. Nichols, road masteri said:— The culvert there is 18 inches deep. I saw no tracks on the ground. The body must have been dragged 25 ft. Just at that spot is a rail shem, and a check block, and he might have caught his foot in there.

T. Ansley, trainmaster'—I saw the coupling after the accident and it was in good order. It is foolish for a man to go in to couple like that; there was no need for it while the engine was moving. Over familiarity with a job makes a man careless

VERDICT.

The following verdict was returned by the jury.

"That the deceased met his death on July 6th, 1910, by falling across the track behind the tender, while crossing to open the knuckle to effect a coupling. Although there is insufficient evidence, the jury are of opinion that the accident was caused by the deceased stepping into an open culvert and we recommend that such culverts be covered to prevent accidents of this nature"

The Late Conductor Davis

The funeral of the late Ernest Davis, C.P.R. conductor, who was killed on Wednesday morning on the south track while on duty, took place yesterday afternoon from the family residence. A large number of friends were present at the funeral service, which was held at the house, the Rev. W. C. Calder officiating, and preaching a touching and eloquent sermon. At the close of the service the remains, which were covered with wreaths and flowers, conveyed to the cemetery followed by a large number of people, the local Orangemen and Trainmen, of which organizations the deceased was a staunch member, heading the procession.

After the last rites of the church had been performed, the Orangemen's funeral service was held at the grave side and the body committed to its final resting place. The pall bearers from the Orange Order and Order of Trainmen were:—Cliff Corson, F. Cochrane, Neil Ross, H. M. Eagelston and Bert Baynes.

The Glorious Twelfth

The Annual Orange Celebration is being held at Kamloops this year. The round trip from Revelstoke will be $3.75. Tickets are on sale good on any regular train on Monday, for those who wish to go ahead.

The regualr excursion train will leave Revelstoke on Tuesday morning at 6:25 o'clock sharp, and returning leaves Kamloops at 7:25 p.m., reaching Revelstoke about midnight. It is requested that as many as can, will purchase their tickets on Monday.

Mails Close

The mails close at Revelstoke as follows:

For eastern points—9 a. m. and 8 p. m.

For western points—4:25 p. m, and 7:45 p. m.

For southern points—9 a. m.

City mail boxes are cleared week days at 7:45 a.m. and 3:15 p. m., and Sundays at 3:15 p. m.

Local real estate agents report much activity this week in land sales both in city property and outside acreages. In all cases the prices have been good and the present demand for residential and farming property is considerable!

New Companies' Act

The much discussed Companies Act of British Columbia, as revised and consolidated at the last session of the Legislature came into effect and operation with the month of July, and is now the law of this province. That its enforcement is vigorously opposed by a considerable portion of the business interests is believed by members of the government to result largely through misunderstanding of its intents and provieions.

The Canadian Manufacturers Association is to take up the new law compelling the registration of companies from other provinces.

New National Park

Edmonton, Alta., July 8.—A national park similiar to that at Banff is to be established next year by the Dominion government, in the Jasper park reserve, 5,400 square miles in extent, on the main line of the Grand Trunk Pacific, in the Yellowhead Pass The paro will be developed under the direction of Howard Douglas, commissioner of parks for the Dominion.

The new park will be equal if not superior to the park at Banff.

The Grand Trunk Pacific will build a huge tourist hotel there and the main line will be completed through the pass by next summer.

UNION LABEL

SATURDAY, JULY 9TH, 1910

We would strongly suggest again that the stock-holders of the local Agricultural Society get busy and make arrangements for the annual Fall Fair. From the way the last meeting was attended it looks as if the fair will fall through. There are a large number af people interested who, only being possessed with ordinary membership tickets cannot take any active or organizing part in the work, so it is up to the stock holders of the Association to get together and take hold of it.

There seems to be strong opposition to the exhibition to the general public of the moving picture films of the Johnson-Jeffries fight, on the grounds that they are liable to cause race riots, although that is hardly likely to occur in Canada. The fight from a spectacular point of view, was no worse or different from other such contests that have been exhibited, and it seems that the moral reformers of this country are making use of the general opposition to the "blackman's" victory in the States to put in their objection on the ground of the degrading influence to the public. From a sporting point of view the dissatisfaction of the defeat of the whiteman is uncalled for. If a negro is allowed to enter into such contests, then it is up to the public to give him a square deal and let the best man win. Johnson was a better man than Jeffries and he deserves credit for it.

CLEARVIEW

We are now offering for sale lots in this most attractive suburb, its close proximity to the C.P.R. Shops and Offices and its sheltered situation makes it especially desirable to those home-makers who wish to add gardening to the general attractiveness of their holdings. The snow goes fully two weeks before any other part of the Town, and being sheltered from wind and storm, fruit trees flourish exceedingly, while its high position ensures good drainage and freedom from evils peculiar to low-lying lands. It is attractively wooded with spruce, fir and poplar and the lots we now offer are the best value ever offered. The view of mountain and valley is unsurpassed and a more charming residential part it would be imposible to find anywhere in the City. The present is the time to buy.

REVELSTOKE GENERAL AGENCIES, Ltd.

REAL ESTATE, LIFE, FIRE AND ACCIDENT INSURANCE

SAFETY OF LIFE.

The death of brakeman McAteer, which was caused by being struck on the head by the beams of No. 26 snow shed as the train was passing through, still further emphasizes the fact that the snow sheds, and this one in particular, are not as safe as they might be. No. 26 shed, as was stated in the evidence at the inquest on Wednesday night, is lower than the others, and dangerous for the brakemen who have to be out on top of the cars. The need may often arise for a man to get up from a sitting posture when going through snow sheds, and when he does so, he is called upon to risk his life unnecessarily. Six feet from the top of a car to the beam of the shed is not enough space for safety and provision should be made so as to render a man safe while on the top of a car in any position he may be in. There is no need to have such a close fit for the cars in the sheds and the fact that two lives have been lost this year through practically the same cause should be ground enough to show the C.P.R. that their servants risk their lives too much in this respect, The cars seem to be getting higher all the time and yet the sheds remain unaltered. It is to be hoped that the C.P.R. will take notice of, and adopt the recommendation of the jury on Wednesday for the minimizing of the danger to trainmen in the sheds and make the necessary alterations.

Lif) is too precious to sacrifice without every precaution being taken to save it.

AMERICAN EULOGY.

A writer in the Boston News Bureau, who has devoted much time to the study of the Canadian emigration question says in the course of a big letter:

"British Columbia is another empire, for it is co-extensive with Great Britain, Ireland and Germany. Its coast line is equal to that of all nations bordering the Mediterrean, its fisheries and its mineral wealth excel the world. It boasts 3,000 miles of lake and river transportation. The energy of 23,000,000 horses can be harnessed in its rivers. The Columbia and the Fraser spread out into the interior into chains of lakes that have no parallel for beauty or grandeur.

"More wonderful is its magnificent climate. I have seen cultivated orchards on plateaux and hillsides 4000 feet above sea level, and have eaten apples, pears, peaches and cherries, grown in these British Columbia valleys of a flavor more delicate and luscious than any I have ever tasted. Its valleys, when cleared and cultivated, make most luxurious pastures its dairy products excel those of Munster and Normandy, and there is ample room for 50,000,000 people."

6 AGGRESSIVE MEMBER.

The career of Mr. Joseph Martin, in the British House of Commons, has been amusing, if not interesting, and we venture to say that the honorable gentleman did not find it as easy going as he anticipated. The methods employed in politics in the west here are totally different from those in practice in England and Mr. Martin evidently got the surprise of his life when he found that things did not all go his way. He is even now condemning his own party and their policy, charging the Asquith ministry with making terms with the opposition, which means that the government will be kept in office by the connivance of the Tories for the rest of the natural life of this parliament. Why Mr. Martin should want to get after the House of Lords is difficult to say, for it is not to be supposed that they have done him any harm or indeed ever bother their heads about him. It may be a case of "sour grapes" however. But the Lords need not worry themselves about Mr. Martin.

Two Thousand Crooks

Reno, Nev., July 8.—Pickpockets and hotel thieves cleaned up nearly as much loose coin in the hey days of the fight as did the gamblers. Detectives who came to see the fight, said that never in their experience had they seen so many pickpockets in one city. It was estimated that 2000 pickpockets came to Reno.

Railway Slaughter

From an editotial in the last curreot number of the Scientific American the following excerpt relating to the annual slaughter of trespassers on U. S. railroads is taken:

It is not generally undeestood how large a proportion of the deaths and injuries on the railroads of this country is due to the risks willfully taken by trespassers who persist in using the right-of-way as a public thoroughfare. The annual reports of the Interstate Commerce Commission for the past eleven years show that, during this period, 105,000 persons were killed or injured, and that of this total, some 50,000 were killed outright. The large ratio of fatalities to injuries, which is several times larger than the ratio that obtains in the case of accidents to passengers and employees, suggests that practically all of those accidents were due to trespassers being struck by moving trains.

There is no country in the world where the loss of life due to trespassing on railroads approaches these figures, not even if we take into consideration the smaller mileage of the railway systems in Europe and elsewhere, The difference is easily explained. It is due to the stringent laws in Europe against trespassing; to the careful policing of the tracks; and especially to the fact that violations of the law are invariably punished. Here in the United States, conditions are exceedingly lax.

The fatalities and injuries are most frequent where the railroads pass through manufacturing districts in which the tracks are lined with factories. The railroad frequently offers the shortest cut between the factory and the home; and statistics show that men of the laboring class, artisans, and their wives and children, are annually killed by the hundreds. Evidently, the remedy for this shocking slaughter, which stands as a distinct reproach against the civilization of America, is to be found in the thorough co-operation of city and country authorities with the railroads in the rigid enforcement of the law against trespass.

So long as the public realizes that warning placards, railroad watchmen and laws against trespass, are subject to the caprice of local magistrates who look with a lenient eye upon offenders, treepassers will continue to walk on the track, and this horrible annual roll of deaths and injury will continue to increase.

ARROWHEAD

R. J. Chapman took an excursion party to St. Leon in his motor boat and all report having had a good time.

Capt. Forsland will launch his new motor boat some time this coming week, and it will be another improvement to our flotilla.

On Wednesday, June 28th, fire broke out on the timber limits of the Arrow Lakes Lumber Co., in Galena Bay. At the time there was a very high wind blowing. The company closed down their mill and sent all their men over there. Two fire wardens were there in short order. There were about 300 men in all, and after fighting for a day and a night, they got the fire under control. There were a few logs and bridges on the logging railway burned. The company's mill was threatened for a while and it was by hard work that they saved it.

E. McGaghran has purchased the Campbell residence consisting of five lots and a two and a half storey dwelling.

Fishing is getting good again. There was great excitement on Thursday morning at the dock, when G. Hillman landed a five pound rain bow trout.

We regret very much to say that T. B. Hall and family are leaving here to reside at Chase.

J. P. McArthur, of Columbian college, has returned home to spend the holidays.

Canada's Great Destiny

In an interesting review given recently to the Canadian Mail regarding the new era of development that has begun in Canada, Sir Thomas Barclay, M. P., L. L. B., a noted figure in finance says:

"I should say that Canada, after the United Kingdom, is perhaps the safest place for investment in the world.

"Of course the basis of Canada's new era of development is the wonderful natural resources, the fertility of the plains, the richness in minerals of the mountains, and the extraordinary fruit growing powers of the soil especially in British Columbia, which I regard as the coming El Dorado.

"The Canadian nature, Canadian traditions and Canadian manners are hostile to exaggeration or misrepresentation of any kind. The social and business life of Canada does not lend itself to the whitewashing of rascals. There is only one thing a man can do who has led his fellow men in the Dominion into disastrous speculations, and that it is to quit the country, and to quit it quick. The Canadian people would have no further use for him.

"In view of the fact that Canada is the safest place in the world, next to the United Kingdom, for the investment of funds, I think it is proving more attractive to careful investors than any other country in the world, and largely for the very reason that the safety is just about the same as in the United Kingdom.

"I think the Old Country requires all the money it can get for its own industries," continued Sir Thomas, "but, of course, the temptation of higher dividends and interest naturally determines many people's choice.

"I am not surprised that Canada headed the list of public issues made in England in 1909. I think there will be before long a Canadian boom I base my expectation on the observations made during my visit to the Dominion and my connection with a few Canadian enterprises.

"But when I say boom," added Sir Thomas, "as applied to Canada I mean something with a substantial foundation. For when the boom comes in Canada and Canadian securities it will be based on the vast natural wealth and development of the country and the intrinsic value of the securities. I regard Canada as destined to become our own greater Britain."

MAGNET
Wood Furnace

McClary's Magnet Wood Furnace has a fire-box with *corrugated* sides—*not* straight like the fire-box in ordinary wood furnaces. The Magnet corrugated fire-box, if stretched out straight, would be one-third longer. You can readily see the advantage of this McClary feature—it nearly doubles the heating power and gives you the best results. The Magnet fire-box is better, stronger, heavier than you'll find in other wood furnaces, and it is in only two pieces, held together with McClary Oil Cement at the joint (cup-shaped) so no fumes, smoke or gas can escape. The McClary agent in the nearest town will show you all of the good points of the Magnet. Write to the nearest McClary branch for booklet. No charge.

NOTICE OF ASSIGNMENT

NOTICE is hereby given that puruant to the "Creditors' Trust Deeds Act, 1901" and amending acts, Doyle and Allum, Limited, of the city of Revelstoke in the province of British Columbia, Merchants, did on the 27th day of June, A. D., 1910, assign all their estate, credits and effects which may be seized and sold under execution to William B. Robertson of the said City of Revelstoke, Agent, for the benefit of their creditors;

AND NOTICE is hereby given that a meeting of the creditors of the said Doyle and Allum, Limited, will be held in the office of William B. Robertson, corner Second Street and McKenzie Avenue, Revelstoke, B. C., on Saturday, the 16th day of July, A. D., 1910, at the hour of 2 o'clock in the afternoon.

All persons having any claims against the said Doyle and Allum, Limited, are required to forward particulars of the same duly verified, to the assignee at Revelstoke, B. C., on or before the 31st day of July, 1910.

AND NOTICE is hereby given that after that date, the assignee will proceed to distribute the proceeds of the estate having regard only to the claims which he shall have received notice and he will not be responsible for the assets or any part thereof so distributed to any person or persons of whose debt he shall not then have rereived notice.

Dated ae Revelstoke, B. C., this 2nd July, 1910.

Harvey, McCarter & Pinkham,
Solicitors for Assignee.

Mount Begbie Trail

Mr. Bridgland, surveyor, and Mr. C. B. Sissons, made the ascent of Mt. Begbie this week and experienced no particular difficulty in doing so. Mr. Sissons, when asked as to the feasibility of a trail being constructed to the mountain, and its access by ordinary tourists and visitors, stated:

"There is no reason why every able-bodied, cool-headed man in Revelstoke should not ascend Mt. Begbie and enjoy a prospect hardly equalled anywhere in the mountains. The climb is neither hard nor dangerous; the chief difficulty at present, is getting to the climb. But even without a trail further than at present it is quite possible to reach timber-line from the city the first day and make the ascent and return to the city the second day.

"The peak itself is most easily climbed by the centre ridge. The rock is solid and it would take considerable carelessness to dislodge it. For about twenty-five feet just as one leaves the glacier, the only rock work requiring much climbing occurs. But there are plenty of good hand-holds. There is a gap easily stepped across at this time of year between the glacier and the ridge. It was this, in addition to bad weather, that stopped Mr. W. W. Lefeaux six years ago. Later in the season it might cause some difficulty but should be practicable. One could ascend between the left and centre ridges at this time of year, as the snow bridge across the bergschrun is evidently still solid. The glacier between the right and left ridges is apparently too broken to permit an easy ascent by this route. But the centre ridge makes an easy and pleasant scramble.

"The difficulty of getting to the peak has been exaggerated. There is at present a good trail as far as Fleming's ranch, some five miles from the traffic bridge. About three miles out the trail branches, and there the left and narrow branch should be taken. At the ranch there is a spring about 200 yards west of the shack. Horses could be ridden this far. From the shack following in the clearing 300 yards, one finds a trail partly cut out and partly blazed about a mile further to a ridge some 500 feet above the ranch. This ridge abounds in huckleberries at this time of the year. From it the wooded slope leading up to the mountain apperars directly across a valley and only about a mile away. From the ridge one descends about 100 feet and soon crosses a stream over which however there are any number of logs. The wooded slope is steeper than Mt. Revelstoke, but a zig-zag trail could be put up it to timber line. The ascent to timber-line takes three to four hours if packs are light. There is not a drop of water up the slope, unless one swings away over to the left where the going is not so good. From timber-line the glacier is soon reached,, and then, unless one wishes to fall into a crevasse, there is no more trouble till the centre ridge is reached.

"From the top the view is magnificent. Purity, Sir Donald, the Hermit range and a host of others show up to the east; away to the north is Sir Sandford; to the west of this few peaks are more conspicuous than Mt. Copeland. Further around and across a precipitous valley, adorned with three hanging glaciers, is an area of white peaks several of them higher than Begbie, while immediately to the south we could see the steamer putting out across the Arrow Lakes.

The thing that most impresses one is the desirability and practicability of a trail which will bring the mountain somewhat nearer the citizen and tourist. I am glad to hear that the Revelstoke Mountaineering Club is agitating for such a trail. They should have little trouble in getting it through. The mountain is worth it. There is no more beautiful peak in the whole mountain region, the view from the top is splendid, and it is well to remember that the peak is just a little higher above Revelstoke than Sir Donald is above Glacier."

Railway Time Table

The following is the new summer timetable of the C. P. R., showing times of arrival and departure of train at Revelstoke.

Money to loan on real estate.—H. N. Coursier.

Watch CAMROSE Grow

KEEP YOUR EYE ON CAMROSE

Watch CAMROSE Grow

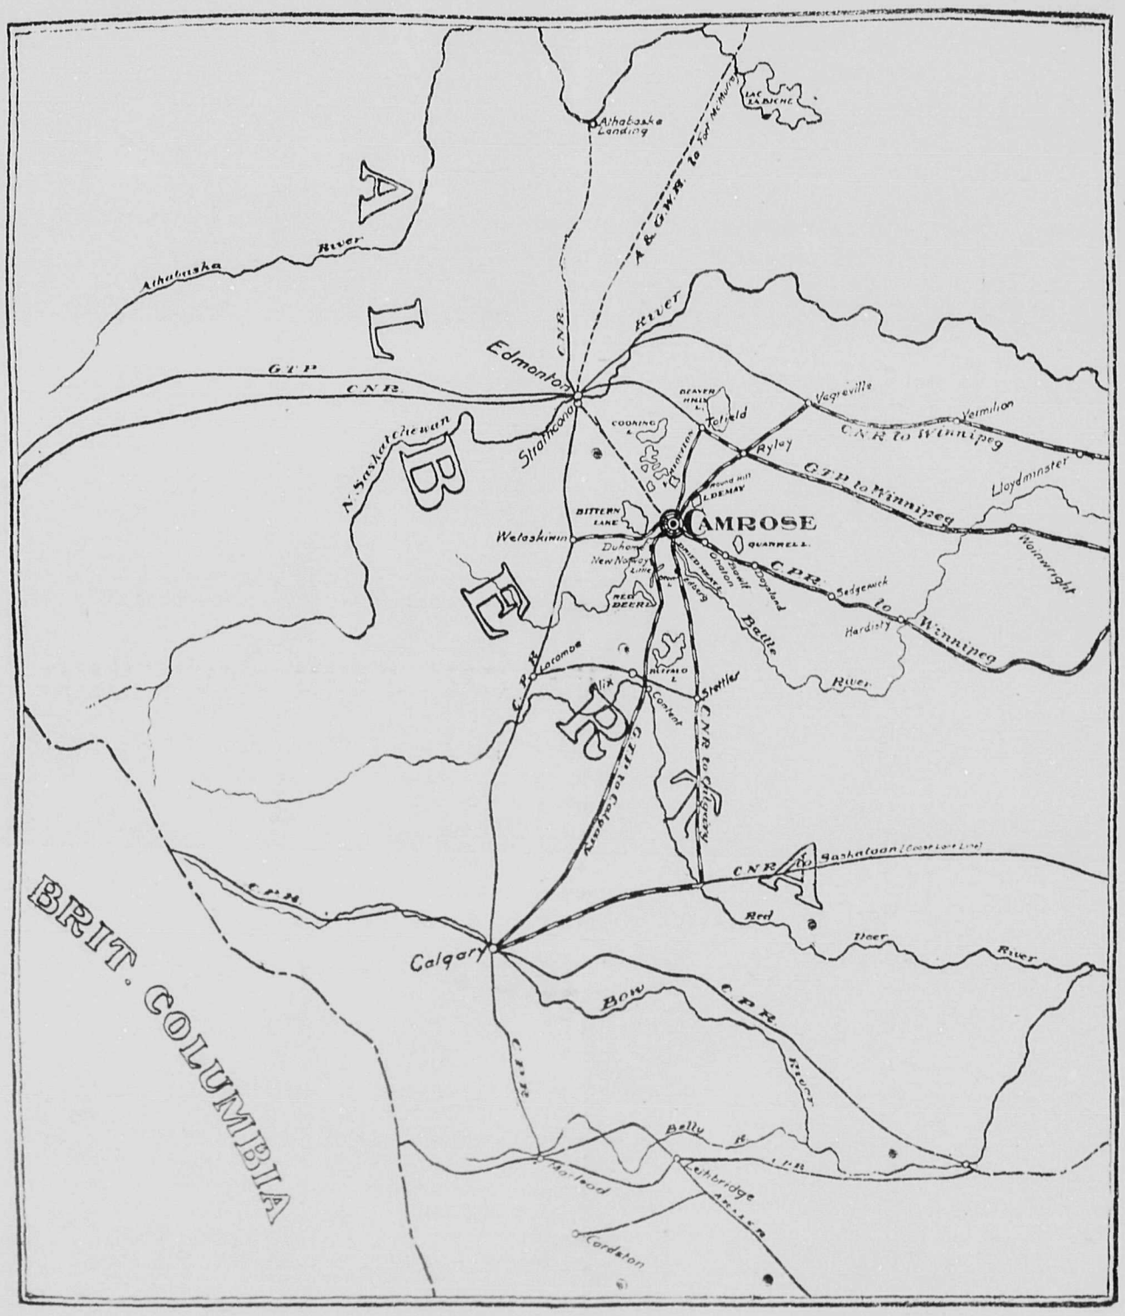
The Spokane of Alberta

Study the Location of Camrose

Camrose has advantages and facilities that are unequalled in any other city in Canada today. Located in the centre of a rich agricultural district, at the junction of the 3 great transcontinental lines—the C.P.R., C.N.R., and G.T.P., it at once becomes a natural distributing point.

In addition to these advantages Camrose has five coal mines in actual operation one mile from the city, where coal can be bought for $2 per ton. With an abundant water supply and cheap fuel Camrose is destined to become an important manufacturing and industrial centre.

No better evidence of the future of Camrose as a city of great commercial importance could be given than the fact that several of the largest wholesale firms in Canada have already located there and are erecting imposing wholesale structures.



Your Opportunity is Right Now

to make a judicious investment. Large fortunes have been made in new cities in small investments, and the man who puts his money into real estate in Camrose is always sure of coming out at the big end of the financial horn.

"Now" is the watchword of the wise. The Grand Trunk Pacific Addition is the best buy on the market. Buying lots at the present prices means big profits in the near future. Two years to such a town as Camrose means development unconceived. Two years to the G.T.P. Addition means prices trebled.

Buy Now and Save Money.

GRAND TRUNK PACIFIC ADDITION

Lies within Three Blocks of the G.T.P. Depot, the closest in sub-division on the market. Its location is ideal, lying high and dry and level, in the west end of the city, the best residential section. Lots are 25 x 120 feet, and are being offered now at $175 for inside lots and $200 for corners. TERMS: One-third Cash, balance in 3 and 6 months. Experience teaches that men who made their wealth from real estate were those who bought early. Buying Now means large profits in the near future. Buy while the Buying is Good.

Inside Lots now Selling at $175, Corner Lots at $200

REID & YOUNG

LOCAL AND GENERAL

We learn that the King of Siam purposes visiting America and Canada this year, but will only bring forty of his wives with him.

The city council have arranged to create a new office in the city, that of a park commissioner. The only reward for this service will be its honor and glory.

It is probable that the fight between Jack Johnson the champion heavy weight and Sam Langford, will take place in August at Cheyenne, Wyoming, for a side bet of $20,000.

The municipality of Point Grey has the honor of having the lowest tax rate among the organized districts of B. C. The rate is 4.45 mills on the dollar on improved land and 8.5 mills on wild lands.

J. T. Telfer has, we think, secured the record for size and weight in eggs. He owns a black Minorca hen which laid an egg this week weighing nearly six ounces and three and one half inches long.

Today is the last day of the time limit given by the city for property owners to cut thistles and other noxious weeds growing on their lands. After today the city will do the work and charge the same to the property.

Col. Peters, D. O. C. at Victoria, will inspect F. Company, R. M. R., on Monday evening. A good turnout is looked for. Col. Peters, we understand, is very particular in military details and it is to be hoped that the local company will make a good showing.

The Ladies' Guild of St. Peter's church held a very successful lawn social on Thursday night. In spite of the afternoon rain and the damp ground, a large crowd attendea and the many attractions provided were well patronized. Tea, coffee, ice cream and other refreshments were served, and the City Band played a well selerted programme. A handsome sum was realized. The rectory grounds were very prettily decorated with electric lamps.

There was a contest not long ago between a Japanese using the familiar abacus, which we see in all the banks here, and a bank clerk skilled in the use of an adding machine. The Japanese won out handsomely. How many white people know how to use that device for the purpose of making calculations? We have sometimes thought that it might not be a bad plan to teach the use of the machine in schools.

It is estimated that the gate receipts of the great Johnson-Jeffries fight were $320,000 The purse was $101,000, with $10,000 bonus for each fighter. The cost of the arena approximated $30,000. The estimated attendance was 18,500. Johnson's share of the purse will be about $60,600; his bonus $10,000 and his picture rights $50,000, making a total of $120,500. Jeffries is to receive $40,000; a bonus of $18,000 and $66,666 for his motion picture rights, or a total of $177,066.

R. H. Trueman will be in the city and his studio will be open on July 13th and 14th only.

There will be an exceptionally good programme of pictures at the Edison Theatre tonight.

The Revelstoke Cricket Club have arranged for their tour of the Okanagan and will start on August 21st.

Economy and Gem sealers, crocks, demijohns, jelly glasses, rubber rings at Bourne Bros.

A Jap named Togo was fined $25 and costs for tin-horning yesterday. After paying the fine he was ordered to leave the city.

T. F. Sinclair is making rapid progress with the sewering of the eastern section, four blocks being already finished.

T. T. Sinclair has been awarded the contract for the laying of the new pipe line for the extension of the city water system, at 38c. per lineal foot.

Now that the city has ordered all its citizens to cut noxious weeds on their property, it is up to the city to do likewise and remove all grass and weeds, etc., from the sidewalks in the business sections. It does not look well for a city to allow the grass to grow under its feet.

The automobile is getting quite common in the city now. We learn on good authority that it will not be very long before the aeroplane makes its appearance here. An order has been placed with the Bleriot Co., of London, and it is stated that the monoplane will be here in time for the Fall Fair this year.

We regret to announce the sad intelligence of the death of Mrs. C. Mitchell, which occurred on Wednesday night after a brief illness. Much sympathy is being expressed for the bereaved husband, as Mr. and Mrs. Mitchell have been in long residence in the city, and made many friends. The funeral took place yesterday afternoon.

A local C.P.R. official has informed us that the two brakemen who were with the late Conductor Davis on train north extra 440, when he was killed were both experienced in their work, and although they had not been very long on this part of the road they had seen long service on other railroads.

A narrow escape from drowning was had this week by young Genelle, who while playing on the river bank at the Chinamen's garden fell in and was only rescued by a Chinaman after a close call. Genelle was nearly all in when brought to land.

SOCIAL AND PERSONAL

Conductor Hopgood, of Kamloops, is in the city today.

Mr. and Mrs. R. Howson are visiting at Vancouver.

Miss Marshall is the guest of Mr. and Mrs. McVity.

Mr. Pool, of the Molsons Bank staff, is spending his holidays at the coast.

Mrs. Chas. Carlson, of Albert Canyon, was a visitor to the city yesterday.

J. G. Allen and Mrs. Allen, of Vancouver, are in the city visiting their friends.

Miss McLean and her two nephews left this morning for a visit to the St. Leon Hot Springs.

Mrs. T. P. Newbigging will receive at present along with Mrs. W. S. Cameron, on the second Wednesdays.

Mrs. C. Holten entertained a number of friends last night at bridge. Mrs. J. P. McLennan was the prize winner.

Mr. Joseph Martin, M. P., for East St. Pancras, London, England, sailed today on a visit to British Columbia.

H. L. Godsoe, who was a former resident of this city, has been appointed manager of the Wine and Spirit Co., vice Alex. Grant, who has resigned to take up a similar position in Kamloops.

Dr. Longstaff, the well known mountaineer and explorer, is staying at the Alpine clubhouse with his sister. He is greatly delighted with his surroundings and wonders that the building is not crowded the summer long. The idea at the foundation of the club, the spreading of the knowledge of Canada's mountain region by means of clubhouse and camps at central mountain points together with the publication of the annual journal which goes to the ends of the earth, strikes him as most original and most valuable.

FIELD NOTES

The C.P.R. are shortly to build a hospital here, this will be so much better for Dr. Gordon and people, as well as a nice addition to our thriving town.

Brewster Bros. have built handsome new stables, carriage houses, etc., across the river, and are thoroughly equipped lor all demands for driving or riding parties.

A particularly sad event last week was the finding of the body of Mr. Jack Lawson (barber of Field) on a trail near Leanchoil. We have no particulars. The Provincial Constable wired his parents in Caladonia Ont., and received instructions to ship the remains to them there.

Friday, July 1st, was a gala day in Field. The morning train, No. 2 brought the Golden sportsmen, as well as a large crowd of Golden citizens. In the forenoon the baseball match was played, and was a fast game throughout, and we think that the Golden baseball team received a great surprise to find that they had been beaten, when the game ended the score stood 27-9 in favor of Field. The football match in the afternoon was much more exciting, and the Golden football team started out to win. This also ended in a score of 1-0 in favor of Field. During the afternoon and at intervals there were horse races, ladies and gentlemans' races, children's races and various others to numerous to mention. In the evening the ladies basket ball game between Field and Golden teams was played. The Golden team is a very fine one and in this game the Golden team won, the score was 5-1. The ladies here have just been practicing a very short whi,e. They are going to form a regular team and will play Golden on Labor Day. The day's sports ended with a ball in the Mt. Stephen House, and the prizes were given out at the close.

The next important event will be the lawn social to be given by the ladies of the Roman Catholic church on the lawns of Mt. Stephen House, on July 18th.

Lumber Corporation

The Dominion Sawmills & Lumber Ltd., is the title of a British Columbia corporation which is now raising $4,000,000 on the London money market by an issue of 6 per cent. first mortgage debentures which will be secured on some 140 square miles of timber situated on the main line of the C.P.R. near Three Valley, a few miles west of Revelstoke. The authorized capital of the company is $5,000,000. The price of the debenture issue is 95 and the debentures if not previously redeemed, will be repayable on July 1, 1935, at a price of 106.

Standing timber on the 90,000 acres owned by the company is estimated to total 2,250,000,000 feet and in the statement of the assets of the company this is valued at $3 per thousand feet, giving a total value of £1, 386,986. The appraised value of the mill, plant, etc., at Three Valley is £58,589. The manufactured stock of the company is figured as being worth £30,000. S. A. Mundy, president and managing director of the company, considers a manufacturing profit of $7.50 per thousand ft. a conservative basis of valuation of the property as a going concernf The estimated manufacturing profit on the total amounts to £3,467,465. On the basis of an annual production of 50,000,000 feet the profit would be £77,054. It is anticipated that in due course the output of the company should be increased to show an annual profit of £184,931.

Among the directors of the company on the London board are Lord Desborough, Cecil Ward and F. C. Selous, the last two being well-known in British Columbia. On the Canadian board are Elihu Stewart, formerly Dominion superintendent of forestry, of Ottawa; Alexander McRae, president of the Globe Lumber company, of Revelstoke; W. E. Hodges of Vancouver, and S. A. Mundy of Three Valley. The trustees of the debenture issue are the Brazilian, Canadian & General Trust, Ltd., of London.

June Timber Revenue

Victoria, July 9.—The revenue of the provincial timber department during the month of June totalled $144,436.59. Making up this total, the 659 timber licenses issued for lands west of the Cascades, produced rentals of $96,664.50, while 297 licenses east of the mountains contributed to revenue $34,240. One hundred and fifteen coal prospecting licenses were issued, yielding $11,500; timber transfers amounted to $681; coal transfers, $120; penalties, $1,125 and miscellaneous receipts, $106.
