AN EMPIRE IN ITSELF. MONTREAL, Aug. 7.—In an interview here, B. E. Walker, general manager of the Canadian Bank of Commerce, declared that the press of Canada should realize how much greater are the wants of British Columbia than the provinces of the plain.

The Pacific province, he said, is an empire in itself, and to develop its resources a great deal of money has to be spent. The legislature, he continued, should not be parsimonious when money is required for British Columbia which will become the revenue-producing province par excellence of the Dominion.

At the conclusion of the preliminary hearing in the Featherstone trial which was adjourned to South Wellington, the prisoner was committed for trial on a charge of murder. The case will come up for trial at the Nanaimo assizes in October. Special bargains in Carpets and Linoleums at C. B. Hume & Co's. IT'S ON THE FIFTEENTH.

THE LATEST TELEGRAMS

Severe Floods in Texas— Captain Showed the White Feather—Negroes Lynched—Painted and Feathered.

FORT WORTH, Texas, Aug. 8.—Many lives are reported lost as the result of a flood. Five hundred persons are homeless, and the death list is growing hourly. The disaster is probably the worst since the Galveston flood. The floods were caused by the Colorado river being forced out of its banks by heavy rains.

DALLAS, Texas—Aug. 8.—The first reports of the damage caused by flood are declared to be much exaggerated. The Colorado and Concho rivers are subsiding. The loss of life is declared not to be very large.

MADRID, Aug. 8.—It is now asserted that the captain of the wrecked Sirio showed the white feather and was one of the first to rush for the life boats. "Everyone for himself," he cried and thereupon began to make battle for the possession of a boat. The crew with knives between their teeth and the officers with revolvers in their hands saved themselves.

SALISBURY, N. C., Aug. 8.—Three alleged negro murderers were lynched here last night. One of the ringleaders of the mob has been captured and troops are guarding jail to prevent his rescue. The soldiers have orders to shoot to kill.

CHICAGO, Aug. 8.—The president and cashier of the looted Milwaukee Ave. State Bank, have fled to Canada. Theodore Stensland, vice president, was arrested yesterday.

SYRACUSE, N. Y., Aug. 8.—The villagers of East Syracuse having viewed with disfavor the attentions paid by Edward Connors to Mrs. Frank Rice, wife of a railroad man, last night dragged Connors out of Rice's house, stripped him, painted him with green paint in lieu of tar and then feathered him. They threatened to do the same with the woman but listened to her plea for mercy. Rice was away on his train at the time.

WEDDING BELLS.

A very quiet wedding took place on Monday afternoon at the Roman Catholic Church, the contracting parties being Mr. Hector McKinnon, a well known C. P. R. engineer, and Delia, eldest daughter of Mr. Joseph Morgan of this city. The marriage knot was tied by the Rev. Father Pecouli, and the bride, who was charmingly gowned was attended by her sister Emma Morgan, the bridegroom being supported by Mr. Joe McKinnon. The presents were handsome and numerous. The happy couple left on Monday evening by No. 97 on their honeymoon which will be spent at the coast cities, and a large number of friends gathered at the depot, with showers of rice, to witness their departure. The MAIL-HERALD joins in wishing the bridal pair a prosperous and happy married life.

NAKUSP.

From Our Own Correspondent. Mrs. F. W. Jordan and children and Mrs. Walter Scott have returned from St. Leon springs.

Miss Olive Wanderburgh is at present on the sick list. Norman Thomas, C. P. R. brakeman here, met with an accident at Roseberry, one of the car wheels passed over his heel crushing it. He was removed to the New Denver hospital and is reported to be doing nicely.

The steamer Kootenay which has been laid up for repairs is almost completed and will soon be on her run again. Miss Moore, of Victoria, has been engaged by the school board for the ensuing term.

MALAKWA.

From Our Own Correspondent. Mrs. T. Dempsey is visiting her mother Mrs. M. Lofhus. Mrs. E. Erickson returned from Revelstoke on Monday. Miss S. Johnson is visiting her sister Mrs. E. Erikson, as is also Miss H. Johnson from Tacoma.

Haying is finished. The crop is good and saved in fine condition. Fire Warden J. Dunn has been particularly busy this week. Two fires started, one of which took some amount of work to subdue.

Some hundreds of poles for telephone and other purposes are being loaded here. Now that the efficiency of the telegraph has been demonstrated to the satisfaction of the C. P. R. officials we think it would be in order to ask for the installation of an apparatus here. Some means of knowing when a train may be expected would save lots of wasted time and energy.

Bargains! Bargains! Bargains!! on anything in Furniture, Carpets, Linoleums, Curtains, etc.—Now is your time to furnish cheap, at John E. Woods.

THOUGHT IT WAS A GOOD JOKE

UTICA, Aug. 7.—While his two children, Edith and Eva, 8 and 6 years of age, respectively, looked on and enjoyed what they thought was a joke on the part of their father, Curtis E. Moore, a carpenter of this city, banged himself in his home.

The little girls sat on the bed while their father was preparing to end his life. As they sat there, Moore said: "I am going to die girls. I am going to heaven and I won't come back."

He then tied one end of a small rope around a beam and tied the noose around his neck, while standing on a box. He then stepped from the box and strangled to death.

The children laughed at their parent but when he began to writhe at the end of the rope and did not speak in answer to their questions they became frightened, and one of them slipped from the bed and blew out the lamp.

They covered up their heads and awaited their mother, who presently came in and, colliding with her husband's body, fell in a faint and is now in a serious condition. Moore killed himself because of financial difficulties.

EATEN BY CANNIBALS.

CHICAGO, Aug. 7.—Miss Beulah Logan Tutthill, a Methodist missionary stated at a Methodist camp meeting, how she saw eleven persons killed and devoured by cannibals. Miss Tutthill who has been connected with missionary work since she was seventeen years of age has spent most of the time in the Caroline Islands. On her way home to Sydney, N. S. W. Australia, the vessel was wrecked on a sand bar, two miles from the Cannibal Islands. The shipwrecked party managed to secure a boat that had been washed ashore, and while attempting to launch this, one of the look outs descried a horde of savages coming down the beach fully 200 of them, in full war paint armed with shields, spears and heavy clubs. They stole down upon the boat and attacked it with a rush. The sailors made no resistance. They concealed themselves in the hope of escaping, but one by one, eleven men in all, were found, dragged out and killed with a blow on the back of the head with a war club. Then they dragged the bodies up the beach and prepared for the feast, beating upon tom-toms and strange drums. "The rest is too horrible," she says, "how they cooked their human food, how they danced about their victims, how, at last, they tore the smoking human flesh to pieces with their nails and teeth in a mad orgy."

THE MODERN NEWSPAPER.

The "Scotsman," that most popular and progressive of Great Britain's newspapers, which has just taken possession of its new home in Edinburgh, may be taken as a good example of what sheer energy and enterprise will do. The "Scotsman" was first published in 1817 consisting of a journal of about 12 short columns, printed by contract and sold for 20c a copy, and as the circulation increased, the premises had to be enlarged accordingly and the present "Scotsman" building is the largest and most magnificent establishment devoted to the production of newspapers in the world, and perfectly equipped in all detail. The building itself is a massive handsome pile of Renaissance style, measuring 350 feet long and 120 feet wide, and constructed at a cost of \$2,500,000, including the site; it is well situated in the centre of the busiest part of Edinburgh and contains every conceivable appliance which is essential for the conduct of a large newspaper. The machinery is entirely driven by electricity and the linotype machines, of which there are 30, are of the very latest type. Electric light is used throughout. A complete system of pneumatic tubes for letter delivery and an elaborate system of telephones have been installed. The floor space amounts to over two acres. The printing outfit consists of five Hoe presses, two quadruple machines, two four-reel and one two-reel. The larger machines have a capacity of 24,000 16 page papers per hour or 48,000 8 page papers in the same time. The total capacity of the five presses is the enormous output of 216,000 eight page papers per hour. Besides the presses the various other machines for the production of an up-to-date newspaper are of the latest type. A foundry, zinc block mounting room, stereotyping room, carpenters and mechanics shops are all on the ground floor. Besides printing its own paper the "Scotsman," which has a weekly issue of 900 columns, publishes the "Evening Dispatch" and the "Weekly Scotsman."

TO ABOLISH MOSQUITOES

A matter of great interest was introduced in the last meeting of the Island Association, Toronto, by Mr. W. H. Lockhart Gordon, who has been communicating with mosquito extermination societies in the States, with a view to finding some means of abating the plague of these pests, which frequently detract to a great extent from the pleasures of our popular summer resorts. The new system, which is not definitely stated, is not outlined sufficiently to enable the public to know the cost, but Mr. Gordon thinks it will be very small. There is at present an ingenious contrivance, however, that has proved its success, namely a hoop suspended from the ceiling with electrical connections, which causes sudden death by burning to the insect that touches it.

TERRIBLE SHIPWRECK

Four Hundred Drowned off Spanish Coast.—Crazed Passengers Kill Each Other.—Captain Shoots Himself.

CASTAGERA, Spain, Aug. 6.—A terrible marine disaster occurred Saturday evening off Cape Palos. The Italian steamship Sirio from Genoa, for Barcelona, Monte Video and Buenos Ayres with 600 passengers was wrecked off the Hornos Islands. The steamer was threading a difficult passage through the islands at full speed when she struck. A terrible scene of confusion and panic ensued. A number of fishermen who made attempts at rescue were drowned. Italian emigrants with knives in their hands, and without regard for the women and children, fought with the greatest brutality, for the possession of life buoys and life belts. Many were killed and wounded. When the captain saw the vessel was lost and the emigrants had captured the boats he committed suicide by shooting himself with a revolver, the other officers then lost their heads and there was nobody to direct the work of rescue. Eye witnesses give awful pictures of the brutal panic on board. Women and children were slashed and cut with knives by the men, when they tried to get into the boats. One report states that a group of emigrants approached one of the boats that was full and about to be launched, killing several of the occupants with knives. Just as they themselves were about to occupy the boat, another armed body of emigrants tried to take the boat and a fierce fight ensued. Many survivors were brought ashore seriously wounded with limbs badly fractured. Before the captain shot himself he declared that the steamer had 615 passengers when she left Genoa and more were taken on at Barcelona. The crew numbered 127. Reports state that when the ship struck she immediately slid off and sank. Many heart-rending scenes were witnessed, many went insane when their friends were lost, children were drowned under their parents' eyes. The Arch Bishop of San Pedro went down with the vessel, blessing the drowning passengers. The survivors are camped in the town of Cape Palos and their condition is most deplorable; they are without food, money and clothing, and also the medical assistance is totally inadequate. The government has started a public subscription and food and clothing are beginning to arrive.

The mangled bodies of women and children are continually being washed up on the rocks, and the scenes of grief are terrible when the bodies are identified. Whole families have been wiped out. The Austrian consul at Rio de Janeiro was saved but lost a very large sum of money when the Sirio sank.

SERIOUS BUSH FIRE.

Blue Mountain District Devastated—Ranchers Burnt Out.

WESTMINSTER, Aug. 6.—One of the worst bush fires which have ever been experienced in this vicinity occurred this week. From a small blaze in the surrounding bush, a large conflagration was caused by steady winds which had been blowing in the direction of the settlement. The fire originated near Mr. Brown's nursery, the flames quickly spreading and even jumping the roads which are all 60 ft. wide. Everything in the path of the fire was as dry as tinder and before a gang of fire fighters could be organized the flames had made most dangerous headway. The most serious property loss was sustained by Smith Bros., whose handsome residence, barns and outhouses were completely destroyed. Nearly the whole chicken farm of Mr. Page was burnt and many other settlers lost everything they possessed. In many places holes were burnt in meadows to a depth of over three feet. Considerable damage was done to timber, fences and crops, and as water is unavailable people are praying for rain. Men, women and children have all heroically answered the call to fight the flames which threatened at one time to devastate the whole district and as it is several square miles have been completely burnt out.

FOREST ABLAZE.

Great Fires Raging in Kootenay Woods.

ROSSLAND, Aug. 6.—The woods in section along the Columbia & Western Railway between Cascade and the Bulldog tunnel are ablaze in places. The flames reached Farron where they destroyed the station, round house and water tank and a large boarding house, inflicting a loss of about \$5,000. The residents and railway employees at Farron made a strong fight against the flames, which after destroying the buildings passed on towards the Bulldog tunnel. The fires now extend along the road for about 20 miles and the entire C. P. R. force from Cascade to Robson is endeavoring to save the trestles. The long spell of dry, hot weather has aided the rapid spread of the blaze.

WEDNESDAY, AUGUST 8, 1906

CANADIAN DEFENCE.

The statement on army reform in England, as made in the House of Commons by Mr. Richard B. Haldane, secretary for war, will greatly interest any Canadians who may be thinking about militia matters.

Our war minister at Ottawa has allowed the session to close without affording any explanation, which contrasts strongly with the debate in the British Commons.

Great Britain has reduced the permanent corps by 20,000, while our standing force has been steadily increasing.

Sir Frederick Borden is still piling up the expenditure on our standing army, an expenditure which is the least needed and most expensive of any of our whole system, and yet he declares that no man should be given the right of the franchise in Canada until he has put in at least three annual trainings in the Canadian Militia, that the permanent force is not a success and that Switzerland can give us a few wrinkles in a cheap and efficient form of patriotic service.

If the minister had sufficient strength of purpose he could increase our possible defence force by 10,000 for every 1,000 man available, and that without costing the country one cent more and still be able to relieve the overburdened citizen soldier.

Great Britain cannot compare with Canada in the number of wealthy men and men of leisure, yet Britain maintains permanent corps manufacturing "red tape" to keep them busy, while the militiaman and volunteer is made responsible for all stores, has to give his own regimental instruction and is severely censured if he does not know and do everything as well, or even better than the professional soldier.

In Great Britain the regular army provides an adjutant for each regiment and a drill sergeant for each squadron. Canada needs no standing army, in imitation of the Mother country who has her wide spread possessions to look after. But what we do want is a small, efficient corps of competent instructors, as in Switzerland, to do duty among our militia regiments, in which capacity, one of them would do as much good as the whole company of permanent corps do in their expensive barracks. It is high time the men and women of Canada began to think of their fatherland. We want defence, not defiance. Military authorities, such as Lord Dunsford, think we have no defences, or what there is, is entirely inadequate, which practically amounts to the same thing. However small a standing army is, the expense is considerable. Our militia forces in the Boer war were in every way successful, which proves the case in question. If the money expended on the increase of the standing army be paid to a company of thoroughly effective and competent instructors who would be sent to the four corners of the Dominion, and there endeavor to excite patriotism by the organization of a militia and volunteer corps, then at the call to arms, and may it be kept from us for many a long year, Canada could produce as fine and effective a body of troops, untrained by red tape or mechanical routine, as could be found in the universe, men accustomed to out of door life, men who can ride and shoot, and who are accustomed to the woods make the best fighters.

Please every smoker—the "Maroon Vuolta."

A Correspondent Tells of the Beauties of the Famous Marble Caves, Situate East of Revelstoke.

Within a three hours' ride of Revelstoke there is one of nature's gardens yet little known to the public, out which in beauty of location, grandeur of scenery, and weird and eerie spots cannot be surpassed in America.

The Deutschman Caves are known to a few, but those who have seen them and the surrounding scenery go into raptures over their beauty. On July 26th a sight-seeing party consisting of Mr. Hemus, photographer, Christ Church, New Zealand, Mr. Coley, Rev. J. R. Robertson, Charlie Gordon, Joe Howson, Dr. and Mrs. Morrison, started out to explore the subterranean depths of these caves.

Taking a camping outfit and enough of the "substantial" to last four days, the party took the east bound morning train, and by 12:30 o'clock were out at Ross Peak tank. A cayuse had been wired for to Glacier, but all of them were out on trips with tourists, so that Manager Flindt could not send one until fifteen thirty. In the meantime lunch as prepared and at 15 o'clock, no cayuse being in sight, each one shouldered his swag and "hit the trail." The path winds up an easy grade to the caves 2 1/2 miles away, an ascent of 2,000 feet, along the faces of great slides, grass grown and bright with flowers.

Arriving at the picturesque little cabin the Government is building for Charlie Deutschman, we were welcomed by that big-hearted good-fellow in true western style, and sat down to a supper of Rocky Mountain strawberries, fried Armour dough babies and apples. Next morning each one was given a candle and "follow the leader" was the order.

Cave No. 1 is a plunge down into a water carved passage 8 to 15 feet wide and from 20 to 150 feet high. Down, down you go, the rocks on either side all carved into fantastic shapes resembling all the animal kingdom in natural history. Every hundred feet or so a ladder takes you down to greater depths until the roar is heard of the cavern river, rumbling like distant thunder through the echoing halls.

A turn, and the Congar, with foam crestled mane rushes past and into a black cavern beyond. In this cave one can get some idea of the immensity of time. Countless years must have been taken to chisel out from the solid lime and quartzite formation these wondrous waterways. Leaving Cougar Creek with its sub rosa exit, we climbed up into "The Gallery."

This passage is a succession of pot holes, like great wickets cauldrons, one below the other, you ascend until at the end of the gallery you can look down into a part of the first entrance 85 feet below.

Cave No. 2 is farther down the old waterway. This ancient channel is wider but not as high as No. 1. Side galleries running to right and left tempt the explorer to stray, but the black emptiness and silence that follows where the main party has gone on, gives a weird lovel-of-society feeling that keeps the crowd together. The walls are grooved and polished; at different points, stalactites of lime carbonate hang white and spectral from the ceiling, the beautiful crystalline showing to advantage with their strange surroundings at intervals wide shelves project from the walls, of harder rock. A peculiar shaped rock called "The Dragon" gives its name to the chamber at end of passage. Far below is the rushing stream, at least 50 feet below its original bed.

Our third experience was, on emerging into sunshine, Mr. Robertson, Joe and Charlie went down the "Wiggle Hole" a form of exercise for light weights only. A rock-ribbed, strait-front crest-shaft that leads down to the "Dragon," but is so narrow that when the brave trio came back they looked like rock rabbits on a drogue in expedition. After a rest Mr. Deutschman led the way, like Guy, to "something cool." This proved to be the "Ice Cave." The entrance is under the shadow of a mighty ledge of rock where Cougar Creek emerges for a moment and then plunges deep down again into the main adit, about 300 feet below Ice Cave. The cave is over ice and so slippery that Charlie cut steps for safety. The breach of the ice name—"O Hetch," where at that in comparison? Down the walls of the cave hang frozen cascades, with a most peculiar ice crystal, each one as large as a honeycomb cell. The guide put his candle behind one ice pillar giving a most beautiful effect. Mrs. Morrison being the first lady to enter the Ice Cave was given three cheers by the party. We then returned to camp to enjoy another of Charlie's lunches. After "feeling better" the next visit was to "The Pit." If there ever was a place where the discoverer of these wonders needed courage with a big C it was here. All unaided and alone, Deutschman let himself down through a rocky manhole landing on the narrow ledge of a yawning gulf 250 feet deep. With our party, Charlie slid down, then with a rope around the waist, Mrs. Morrison went down the 30 feet or so and standing in a little pot hole looked down into space. The guide threw stones down and for seconds we all could hear them "tink, tink" as they fell down the black abyss. One at a time, others were lowered down on the rope, to feel the sensation like sitting on the edge of a cloud. Coley, Hemus and Morrison had a sudden longing for sunshine just then and left reluctantly (?) before their turn came.

The great Auditorium was not visited, as there is such a large space of danger in being lowered down hundreds of feet. It is even more wonderful, according to reports than those seen. Mr. Coley, who has been in India in caves there, and Mr. Hemus who has seen most of the wonders of Australia and New Zealand, both say

climbed up the mountain west of the Caves. The ascent is steep but no underbrush to impede travel. Every hundred yards from one to two heavy ironwood whistlers would "chirp" and sit up to inspect the visitor, while squirrels and rock rabbits were on every side. The whole mount in side is a garden and paradise for the botanist, with a pink houth, American laurel, Mt. Rhododendron, false heather, anemone, but crocus, and stranger of all the spring flowers of the valley just coming into bloom. A great glacier, its sides secured with deep crevasses, crowned the summit, while all around were snow-fields with streams pouring forth on all sides. Across a patch of snow, a brown and white mother ptarmigan was leading her fluffy, dainty, little "ptarmier" chicks, not the least alarmed at the party's appearance, while the male bird sat up to be photographed. The scene from Ptarmigan Look Out Point is magnificent, 20 great glaciers are in sight and snow fields by the sea. Away below, Congar Creek winds, like a belt of silver across a cloth of green, down the valley to the Illecillewaet. Across the valley is the Great Glacier, its 30 miles of ice gleaming fair and beautiful. Mounts Sir Donald, Cheops and Begbie assume their proper heights, while domes, minarets and towers pierce the "blue untrod" 50 to 80 miles away. A lunch, a sleep, then down to camp. Next morning Mr. Hemus and the other friends took flash light views of the caves. Then we all packed up once more, loaded a cayuse left for us and said "good-bye" to Mr. Warren and Mr. Deutschman. No one could be more than two days during our stay. Mr. Deutschman being the chief, and giving us the finest of mountain fare. His kindness was appreciated by all. D. W. we went to Glacier, had lunch there and home at 17:30, tired but happy.

Trueman's Studio Is now open under new and competent management.

MR. HEMUS, recently of Sydney, Australia, will meet you and guarantee you our usual satisfaction.

Commencing at a post marked "G. J. Hammond's north east corner," about 1 1/2 miles south of Fossil Hill, thence west 80 chains, thence east 80 chains, thence south 80 chains, thence east 80 chains to point of commencement, containing 640 acres. Dated this 11th day of June, 1906. G. J. HAMMOND, Per Ralph Syde, Agent

INEXPENSIVE **HEAT**

Furnace

It is not the price you pay for a furnace that makes it cheap or expensive, but the fuel it afterwards consumes.

A common furnace may cost you \$5 or \$10 less than a "Sunshine," but if it eats this up the first winter in extra fuel, what do you gain? Nothing, but all the annoyance and extra work that go with a poor furnace.

The "Sunshine" is in use from Halifax to Vancouver, and we have hundreds of testimonials from pleased users.

Sold by enterprising dealers everywhere. Booklet free.

The Old Château Loudenne

On the banks of the Gironde, amid 500 acres of vineyards, stands a palatial 18th century building, purchased in 1875 from Vicountess Marcellus for \$140,000 and the whole improved at a cost of \$350,000. The property of W. & A. Gilbey, who on three occasions were awarded Gold Medals by the French Government and Agricultural Societies for the best cultivated vineyard in the Médoc, this estate is specially noteworthy as the home of

Gathering Grapes at Chateau Loudenne

John E. Wood's Furniture Store

The C. P. R. fully recognizing the prospects for a phenomenal crop will put into commission 100 additional engines and over 8,000 new cars, to be exclusively used for handling the crop.

Dr. McAbee has returned from a trip to the Northwest and says Golden has the finest co-course he has seen. Several Calgary firms are coming to the race meet to be held on August 20th and 21st.

Dr. McAbee intends taking a trip to California with his Arab steed and the local sports expect to see him do great things there.

Golden is proud of its electric lights. The plant, the installation of which is due to the enterprise of Messrs. F. W. Jones and M. Carlin, is probably the best of its size in the province and has proved a great convenience. Advantage has been taken of it to light up the streets as well as the stores and residences. We are to have a fine new saw mill. The Columbia Lumber company will start construction this fall of a large band mill with all the most up-to-date ideas and equipment and the plant will have double the capacity of the present mill. The progress of the Columbia River Lumber company means the progress of Golden.

Work is still progressing steadily on the construction south from Golden of the Kootenay Central Railway. The grading already done will be connected with the town and main line by driving piling across Phantom Lake and filling the trestle work in by means of work trains. A fine new bridge is to be built across the Kicking Horse river a little east of the present bridge and it is reported the railway station will be moved to the junction at that point. As soon as the trestle work is filled in a start will be made with laying the ties and rails.

Business conditions are showing much improvement here.

F. C. Lang's fine mineral collection at the Government office continues to be a source of interest to all our visitors, who are loud in their praises of the taste shown by the mining recorder in the work of his office.

The copper mine on Warren Creek, recently bonded by New York parties, is to be operated soon. They are well pleased with it and are arranging to let a contract for 1,000 feet of development tunnel. J. Lade, of Camborne, has just been over here figuring on the work.

J. C. Green, our popular hotel-keeper, has been on a trip to the coast.

G. B. McDermot's fine ranch has lately been attracting several visitors from the Northwest who are amazed at the success of George's fruit-growing experiments. His apple-trees loaded with fruit are a sight worth seeing.

Dr. Taylor intends building a fine residence.

NOTCH HILL NOTES.

From our own correspondent.

A peculiar incident occurred last Thursday which might have had a tragic ending. Chas. Castle, who was sitting in his store waiting for the arrival of the passenger train west, was startled by the report of a rifle and the crash of glass behind him. Hastily opening the door he peered out into the darkness but there was no one to be seen. On examining the wall opposite the window a bullet was found, embedded in the wood, from a 22 calibre rifle. Mr. Castle offers no explanation of the incident.

The Misses Simpson have a snug little camp at the landing at Mr. Henstridge's ranch, and these ladies have set the example to many others. Three girls are encamped at the mouth of Adams river, while A. Barnes and family of Kamloops have pitched tents not far distant.

W. Henstridge has taken a tour on horseback to Enderby and will remain away for a week or two.

The Government Hatchery people have formed their camp at Scotch Creek and are preparing the traps in readiness for the salmon run.

The residents at Blind Bay paid a surprise visit to Mr. and Mrs. Treyner at Express Point. A flotilla of boats ferried the party across, who provided all the good things of life, and a most enjoyable afternoon was spent. Many indulged in bathing as the day was tropically hot.

IT'S ON THE FIFTEENTH.

The fishing at St. Leon is reported to be exceptionally good just now, many good catches being made.

This week has been a record for the number of visitors making a stop over at Revelstoke, every hotel being full.

The Lude brothers have secured the contract for driving 1,000 ft. on the big tunnel on the Record group, Ferguson.

Two canoes have been shipped from here during the last week, for the Big Bend country, for timber locating purposes.

Rev. Fred Palmberg will hold divine service in the Swedish language at the Methodist Church to-morrow (Thursday) evening at 8 o'clock.

C. Red, a negro, has been sentenced by Police Magistrate Gordon to three months' imprisonment for theft from a Chinaman in this city.

All interested in getting up sports for Labor Day are requested to attend a meeting in the Band Room on Thursday evening, Aug. 9th at 8 p.m.

All interested in getting up sports for Labor Day are requested to attend a meeting in the Band Room on Thursday evening, Aug. 9th at 8 p.m.

The salmon canneries are very busy just now. A large school of sockeyes have been reported making towards the Fraser river, and the fish are said to be strung out for a distance of 25 miles.

To insure a successful time on Labor Day it is necessary for the whole town to take an interest. Everybody attend the meeting Thursday night, and if you have nothing to say help the matter along by your presence.

A Canadian, Eddie Durman, of Toronto, and the Australian sculling champion, George Towns, of Sydney, N. S. W., will meet for the world's professional championship next spring. The race will be held in Australian waters.

According to Mr. Law, government analyst, Vancouver is being threatened with a very grave danger in that the milk coming from the Fraser river islands, and served in the city is literally alive with germs of various sorts. This is caused by the cows drinking stagnant water, which, at this season, is the only sort obtainable.

The largest land deal in the Boundary for some time has just been completed when Hunter Bros. purchased the Sidley ranch on Anarchist mountain. The price was \$10 per acre cash for 2,980 acres of crown granted land. The purchasers also bought 8,500 acres timber and range land recently acquired by Sidley from the C. P. R. The lands purchased contain the finest body of timber for many miles in any direction.

A report comes from Rossland of a find of a new quartz lead 20 feet in width. The ledge has been stripped for 200 feet and a shaft 10 feet deep has been sunk. The ore is a quartz, carrying gold, silver and galena. The value is, as yet, unknown, as the ore has not been tested.

In the course of their regular practice last night the members of the Independent Band received a pleasant surprise in the shape of a freezer of ice cream, and cake from Rev. and Mrs. C. A. Procunier. It is needless to state the kindness of Mr. and Mrs. Procunier was much appreciated by the boys.

Frank T. Shutt, chemist of the Dominion experimental farms, is now in British Columbia for the purpose of visiting a number of the more important agricultural areas of the province, the object being to make a closer study of the soils, climatic conditions and methods of farming. After leaving Vancouver and the lower Fraser, Mr. Shutt will proceed to the Kootenays, which district is being rapidly prospected by fruit growers, who are anxious for an expert opinion of the soil.

The British Columbia Medical Association concluded its seventh annual convention on Thursday last at New Westminster. Some very able and interesting papers were presented during the convention nearly all a technical nature and of great value to medical men. The unanimous opinion of the doctors was that the patent medicine habit has now reached such a stage as to be a positive harm and the association decided to lend its support to secure any legislation which will abate the evil.

Social and Personal

W. Bews left yesterday morning for the east.

Mrs. J. M. Doyle is visiting in Calgary.

Miss Woodland has left for a visit to Golden.

R. Smith, surveyor, started on a trip south on Monday last.

Mrs. Atkins is spending a few days at the Hot Springs.

Geo. S. McCarter went south to Nakusp this morning.

Mrs. Elson has returned from a short holiday at St. Leon.

Mr. and Mrs. F. B. Wells have left on a trip to the Big Bend.

W. Sawyer, of Vernon, was in the city this week renewing acquaintances.

Mrs. Paget and daughters left on Monday for a visit to the Hot Springs.

Mr. Jacobs, editor of the Mining Record, of Victoria, B. C., spent a day or two in the city.

Mr. and Mrs. Jessop left yesterday for a short visit to St. Leon Hot Springs.

Mrs. A. McRae and family returned to the city on Sunday evening from a holiday visit to St. Leon.

Mrs. Anderson of the Beatrice mines, Camborne, was in the city yesterday.

Geo. Goldsmith, owner of the Scott group near Canberne, was in the city yesterday.

E. A. Bradley left on Sunday morning on a month's business trip to Buffalo and New York.

W. F. Ogilvie returned on Monday evening from a visit to the famous Beatrice mines near Camborne.

Miss Dent entertained a number of her friends at her home on Monday evening.

W. Houston, of Golden, has returned home after a two weeks' visit to Revelstoke.

Mrs. Peter Campbell, of Golden, who has been on a fortnight's visit her has returned home.

The Full Court at Victoria have delivered judgment dismissing the appeal taken by the Canadian Timber and Saw Mills Ltd. of Trout Lake against the verdict of the jury which, over a year ago at Revelstoke, Judge Leamy presiding, gave the plaintiff Henderson \$478 damages for wrongful dismissal. Henderson was general manager of the company and was dismissed without notice. The defendant company have been ordered to pay all costs of the action and the appeal.

G. S. McCarter acted for Henderson, and A. Wheeler, of Nelson, appeared for the company.

THIS SPACE RESERVED FOR

KINCAID & ANDERSON

REAL ESTATE and Financial Agts.

The stork visited the home of Mr. and Mrs. Lundell on Fourth street, on Monday night, with a little son.

Mrs. L. T. Solloway and family, of Harwood street, Vancouver, are spending the summer at Bower Island.

LACROSS.

Arrangements are being made to bring the Calgary lacrosse team here to play an exhibition match with the local team on Labor Day.

C. P. R. RECORDS.

Van Horne Travels 134 Miles Under Two Hours.

During the last few days Sir William Van Horne has been smashing railway records. His special train came in from Brandon to Winnipeg, a distance of 134 miles, under two hours, an average of 67 miles an hour. At one time the speed indicator registered 79.3-4 miles per hour for a stretch. A distance of 30 miles west of Portage la Prairie was covered in 23 minutes, an average speed of 78 miles per hour. Last week Sir William established the long distance speed record for western lines, his train making the run between Moosejaw and Winnipeg, 400 miles, in eight hours flat.

THE MINES.

A despatch from Quatsino, Vancouver Island, states that the biggest strike of Bog Iron in British Columbia has just been found to the north of the west arm of Quatsino Sound. Messrs. Jacobson and Jackson are now busy locating the property and they report that the areas is immense, and that the iron body on the west arm on which development work has been done already, is only a spot compared with the extent of the new find. It may be remembered that Provincial assayer H. Carmichael reported that he had found magnetite in large quantities, also great masses of marble rising in abrupt cliffs from the deep water, one deposit being bigger than the provincial parliament buildings.

RAIL AND STEAMER

The two C. P. R. mail steamers "Empress of Britain" and "Empress of Ireland" have both made very successful trips, crossing the ocean in 5 days 23 hrs. and 5 days 21 hrs., respectively. The passengers speak in terms of high favor for the comfort and steadiness of both vessels.

E. Austin, superintendent of locomotives on the Kootenay division C. P. R., has been appointed superintendent of locomotives on the division west of Revelstoke on the main line.

The C. P. R. are adopting a device which eliminates the objectionable smoke emissions from engines operating in the yards in city limits. Locomotive No. 2150, a six-wheel switch engine, has been equipped with the device with splendid results, smoke emissions being reduced from several minutes to about 20 seconds at each firing.

AUGUST CLEARANCE SALE

The object of this Sale is to find new owners for our entire Stock of Clothing, Hats, Boots and Shoes and Haberdashery before the opening of the Fall Trade. We don't believe in carrying over goods. They're a poor claim for patronage.

What would you think if next year you bought a Suit of Clothes from us identical to the one some fellow got this season, "you would feel pretty cheap wouldn't you, and you would not have a very good opinion of us."

Now, to obviate things of this sort, we are willing to accept a loss—a most severe one. Hence, THIS GREAT SALE!

J. G. MACDONALD.
