Government Will Rush Work on Road to Summit of Mount Revelstoke

Chief Superintendent of Dominion Parks Arranging for Construction—Two Gangs to Work From Both Ends of Road—Work Starts Tomorrow—Route of Road Being Inspected Today—Enthusiastic as to Beauties of Scenery

Work will be started tomorrow by the Dominion government on the Mount Revelstoke automobile road and will be pushed to completion with the utmost dispatch.

P. C. B. Harvey, chief superintendent of Dominion parks, arrived in the city yesterday and will himself supervise the work. Today he is making an inspection of the route, accompanied by F. E. Maunder, superintendent of the Yoho and Glacier parks. Tomorrow William Fleming with a gang of 50 men will commence work on the upper end of the existing road and later work will probably be pushed from both ends.

It is Mr. Harvey's intention to complete the road from the upper end of the present automobile road to the summit this summer. Four and a half miles have already been constructed by the provincial government and nine and a half miles of road will probably be built this year to extend the present road to the summit. This will bring the end of the road to an elevation of 6,050 feet

Mr. Harvey is enthusiastic as to the beauties of the park and is impressed with the importance of completing the road as soon as possible. Next year any improvements that may be needed to the stretch of road built this year will be made and other roadways may be constructed.

Last year Mr. Harvey ascended the mountain and made a report to the Dominion government as to the suitability of the country for a national park and the wonderful scenery that he encountered is impressed vividly upon his memory. "Mr. R.F. Green, member for Kootenay," said Mr. Harvey, "has been urging the prompt commencement of the work and speedy completion of the road, and in consequence I am here to get the work started at once. The Revelstoke national park is unique. There is nothing like it anywhere in Canada. The scenery is superb. There is no other place where from one spot a more magnificent or diversified view can be obtained. From one point can be seen regiments of splendid mountain peaks clothed with glaciers, the pass of the Jordan, the Eagle pass, the broad Columbia valley, and the city of Revelstoke lying at the foot of Mount Begbie. I have been talking of the wonders of the park wherever I go and have been urging people to visit Revelstoke to see for themselves. When the road is completed I have no doubt that great numbers of tourists will come to Revelstoke to enjoy the beauties of the scenery"

Mr. Harvey will be in the city until the work on the new road is well underway after which he will visit Waterton lakes park in Alberta. He will return to supervise the road construction from time to time.

PREPARING FOR CELEBRATION

Arrowhead Putting on Gala Attire for Great Orange Celebration on Monday

B. R. Atkins who was at Arrowhead on Sunday, says that the town is making great preparations for the Orange celebration which will be held there on Monday, July 13, under the auspices of Arrow Lakes L.O.L.. No. 2383, and main line Central County Orange Lodge No. 690. The town is already putting on gala attire and will give visitors a hearty welcome on Monday.

Orangemen from the main line and Arrow Lakes districts will royally celebrate the 224th anniversary of the famous Battle of the Boyne and the program for the Arrowhead celebration is the best ever prepared. In the morning the Orange parade will be held followed by speeches by J. H. Armstrong, R. W. Grand Master of British Columbia; Rev. W. C. Calder, Rev. M. Phillips, and J. M. Toombs, Past Grand Master of Manitoba. Afterwards water and land sports of all descriptions will be held and excursions will be run to Halls Landing and Arrow lake summer resorts.

Special excursion rates are arranged on C.P.R. trains and steamers from Kamloops, Golden, West Robson, Slocan City and intermediate points to Arrowhead and return. Tickets will be good going Saturday, Sunday, Monday and returning on Tuesday following. A special train will leave Arrowhead at 7 p. m. for Revelstoke.

TWO MORE BEARS CAUGHT

Basket of Fine Speckled Trout Taken from Half Way Creek —Traps Lifted

Two more bears, making six this season, were secured by Hart Munro in his traps up the Jordan on Sunday.

Hart Munro, Frank Tillman and Jarvis Armstrong, left town at 5 o'clock a.m. on Sunday for the Jordan trail and returned at 7 o'clock in the evening. Besides the exercise derived from a 28 mile walk they secured the two black bears, a yearling and a three year old, and in an hour with rod and line caught a basket full of speckled trout in Half-way creek. Although the water is still rather high for fishing, their catch was an unusually good one, several fish measuring 15 inches in length being secured.

As the hot weather of the past week is beginning to cause the bears to lose their winter coats, Mr. Munro has taken up his traps until next season. Mr. Tillman secured some good photos of both bears while Jarvis acted as official executioner.

The formal opening of the Girls' Club new club house at Vernon took place last week, and many guests enjoyed the hospitality of the club at the two "house warming" events. On Wednesday afternoon, despite the heavy rain, about forty guests were entertained at a reception.

Council Lets Contract--- Pavement Construction to Start Within Ten Days

Warren Construction Company is Successful Tenderer —Price Eight Hundred and Fifty Dollars Below That of Only Other Tenderer—Box Drains to be Replaced With Vitrified Pipe—More Fire Hydrants to be Installed

The tender of the Warren Construction company of Portland for the laying of bitulithic pavement on McKenzie avenue and First street, was accepted by the city council at a special meeting last night. The tender of the Warren company was $852.09 lower than that of Henry J. Kaiser, of Vancouver, who was the only other tenderer. The figures were:

Warren Construction company, $59,189.63.

Henry J. Kaiser, $60,042.29.

The city engineer's estimate of the cost of the work was $60,678.83.

According to the terms of the contract the work must be started within 10 days. Alds. Smythe, Bell and Pradolini voted for accepting the tender, Ald. Needham voted against and Ald. Bourne declined to vote. Mr. Bourne said that he did not think the city was securing proper competition but he did not see what could be done if the pavement was to be laid this year. Ald. McSorley was absent

"Gentlemen, we have done good workd for the town. Revelstoke is work for the town. Revelstoke is continent," remarked Ald. Smythe, when the contract was finally let.

Mayor McKinnon said that the only point on which he was doubtful was as to the advisability of laying the pavement on the upper end of McKenzie avenue where there were wide frontages.

The advisability of installing additional hydrants and of replacing existing box drains before laying the pavement was discussed by the council. It was decided that Ald. Needham with Chief Foote of the fire brigade should investigate the hydrants question. The box drains will be replaced with vitrified pipe.

A.C.F. Haddon addressed the council regarding his position on the city hall staff, and after the representatives of Warren Brothers, the Warren Construction company and of Henry J. Kaiser had been called into the council chamber and notified of the awarding of the contract the council adjourned at 11:15 o'clock.

Champion Wrestlers to Meet at Revelstoke

Connolly and Sutherland Meet on Friday—Clapham at Arrowhead

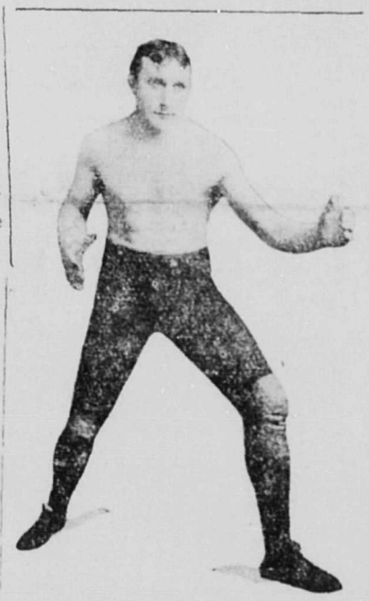
Sam Clapham the light heavyweight champion wrestler of England, will challenge the winner of the bout between Pat Connolly of Vancouver and Bob Sutherland of Kelowna.

Connolly and Sutherland meet in the Revelstoke opera house on Friday for a two falls match at catch-as-catch-can, and one of the best bouts ever seen in Canada is expected. Orders for seats have been pouring in from all quarters and W. A. Smythe expects a bumper house. Wrestling is said to be a most exciting sport to watch and as the game is something of a novelty in Revelstoke the interest is exceptionally keen. Sutherland, two years ago at Vancouver, wrestled with Connolly for three hours and 15 minutes, each securing one fall, and the fans say that it will be exceedingly difficult to pick the winner of Friday's match.

Sam Clapham, who intends to challenge the winner, is the light heavyweight champion of England and a wrestler of international reputation. On Monday afternoon next at Arrowhead, he meets Hugh Taylor of Nakusp, during the Orange celebration in catch-as-catch-can style wrestling under Police Gazette rules. The match is under the auspices of L.O.L., No. 2382 and takes place in the K. of P. hall.

This is the second tour of Canada by Mr. Clapham, who was one of Hackenshmidts' trainers before his bout with Gotch. In addition to challenging the winner of Friday's match he is ready to meet anyone of the same weight as himself, which is 175 lbs. He is also ready to wrestle one at a time the whole police force of Revelstoke including the jailors and undertakes to throw everyone of them within one and a half hours.

Sam Clapham commenced wrestling when he was thirteen years old, and when seventeen annexed the north of England amateur championship, afterwards entering the professional ranks and defeating in his first two matches Ravitts the American and Hector, the Italian ju-jitsi, in less than five minutes each. In his open challenge to any man in England, which was issued following the two matches mentioned, seven men accepted, Clapham won six clear-cut decisions and drew with the remaining challenger. Later, before the National Sporting club of London he won the light heavy weight championship of England and was presented with the Lord Lonsdale belt, in token of same, which he now holds.

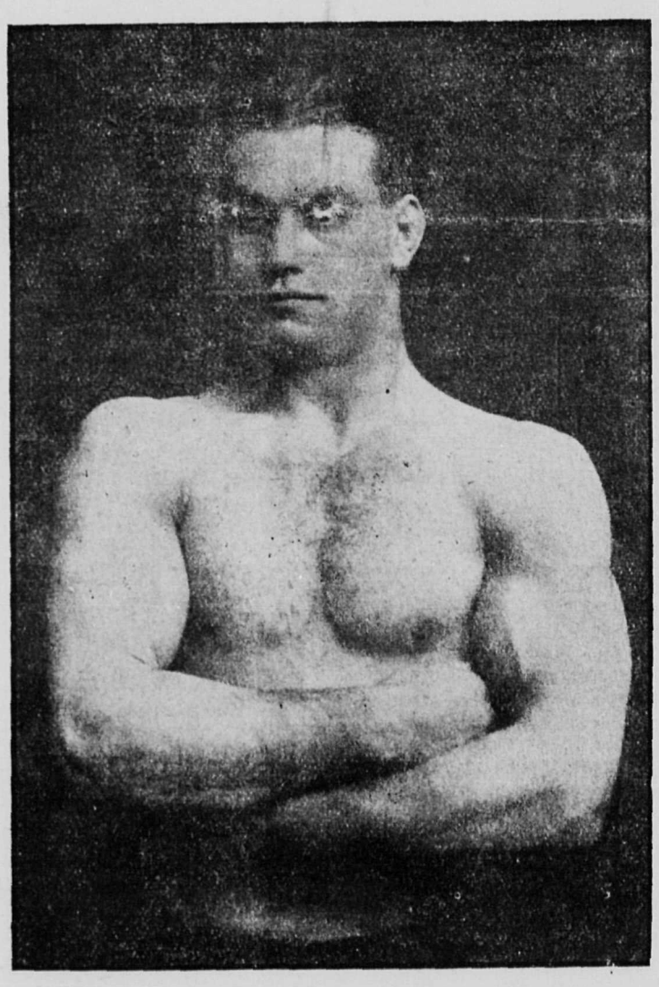


Pat Connolly of Vancouver, heavy weight champion wrestler of the world, who meets Bob Sutherland of Kelowna, in a two falls match in the opera house on Friday.

Clapham has wrestled with the best men in the world, namely Frank Gotch, Hackenschmidt and Mahmout, the powerful Bulgarian. The English champion was Hackenschmidt's training partner prior to his last bout with Gotch.

Some interesting notes in connection with Clapham's physical development are: With a weight of 175lbs. he has a bicep larger than that of Frank Gotch; a chest measurement of 47 inches; an expansion of seven inches, and an 18½ inch neck. He claims to be the best developed man of his weight in the world.

The accomplishments of the versatile English champ do not end with wrestling, however, as he is recognized as a well posted physical culturist and an expert in matters relative to the anatomy of the muscles. He studied medicine and surgery for three years at a famous English college, and put in fifteen months under an eminent osteopathic physician of London.



: : SAM CLAPHAM : :

Light-Heavyweight Champion of England who will challenge the winner of the match between Pat Connolly, Heavyweight Champion of the World, and Bob Sutherland, of Kelowna.

Entertainment Closes Galena Bay School Year

Galena Bay, B. C., July 6.— The most interesting event in the school year, the annual school closing examination, took place on Friday, June 26. The school room was tastefully decorated for the occasion with maple branches and wild flowers. In the afternoon parents and friends gathered to view the pupils' work and listen to spelling, reading, and poetry, which was uniformly good, the children in all cases showing steady progress during the year under the tutilage of Mrs. M.B. Hyham. The honor rolls of in order of merit, were awarded to Henry Shaw, Ethel Ashburner and Lizzie Dedoosseaco.

At the end of the session, tea, cake and strawberries were partaken of.

The National anthem and suitable songs were sung as a fitting close to an enjoyable afternoon and the gathering broke up with expressions of appreciation to the teacher, and good wishes to the pupils who have shown a keen interest in their studies during the past term.

New Mill at Nelson to Cut in September

The driving of piles to support the new mill which is being erected at the waterfront on the site of the old Yale-Columbia mill at Nelson, for J. S. Deschamps, the Rossland lumberman, who has a contract to cut lumber for the Forest Mills, Limited, of British Columbia in Nelson, has been started and work on the construction of the mill will go right ahead until completion. The new plant will have a capacity of 40,000 ft. per day.

There are already 3,000,000 ft. of logs at the site and Mr. Deschamps hopes to be able to commence cutting on or about September 1. At present he has enough work in sight at his mill at China Creek to keep that plant in operation for another year.

Armstrong and Lumby, the two towns at the northern end of the Okanagan valley, which celebrated Dominion Day, were thronged from early until late with crowds of visitors, who enjoyed to the fullest extent the good program of sporting events put on at each place.

Locally Grown Cherries of Fine Flavor and Quality

The ranch of H. G. Garner, on the Greely creek road, above the power plant and one and a quarter miles from the city, is just now well worth a visit. On the ranch are 95 cherry trees laden with fruit that is a credit to the Revelstoke district and a striking demonstration of the fertility of the country and of its advantages for fruit growing. Mr. Garner specializes in the Bing and Royal Anne varieties and in appearance and flavor the cherries are excellent.

Mr. Garner, who expects to pick over 100 crates of cherries this year is supplying the local market and says that his product is in keen demand. On his farm, which is known as the Adair homestead, there are over 300 fruit trees all of which are thriving and giving prospect of a heavy crop.

The current issue of the British Columbia Gazette contains notification of the following appointments: Robert Neil Campbell, of Harper's camp, to be a justice of the peace; Harold Hustin Hincks, of Langford, Vancouver island, to be a notary public; Richard Evelyn Mitchell and George Pilmer, both of Victoria, to be clerks in the department of agriculture from the first day of April, 1914; Viva Josephine Foxmaule Babington, of the city of Victoria, to be a stenographer in the department of agriculture from the first day of April, 1914.

HALCYON NEWS

Halcyon, B. C., July 7.—The hot weather for the past week has brought the lake up.

W. F. Palmer and family and J. Milton and family, arrived on Thursday from Kamloops. They expect to remain three weeks.

William Boyd arrived on Thursday after spending two weeks at the coast visiting Vancouver, Victoria, Seattle Tacoma and Portland.

Mrs. Boyd is expected home today.

A large number of Halcyonites, spent Dominion Day at Nakusp. Going down on the s.s Piper and returning the same evening. They all report a fine time.

Harry Carpenter of Revelstoke, spent a few days last week at Halcyon taking the baths.

Reid Johnston and William Barr leave on July 9 for Skagway, to spend their holidays. The former will return to Kelowna where he has been appointed Canadian Pacific railway operator.

Halcyon is forming a baseball team ans shortly expect to arrange a match with Wigwam or some other town.

Official notification of the coming into effect of the act to regulate theatres and kinematographs has been given to theatre managers in the city by Provincial Constable Rothwell. The new act came into force on July 1 and under the regulations a license of $75 is collected annually from motion picture theatres by the provincial government; it is payable half yearly. All operators of motion picture machines are now charged a license of $1 and must be over the age of 18 years and of strictly temperate habits.

What is Doing in the Province

With a majority of 832 votes over her nearest competitor, Miss Dora Jordan has been elected queen of the Chako Mika carnival at Nelson.

The Cranbrook Agricultural association issued their annual prize list this week. The list contains some good prizes and portrays some interesting events to be pulled off on September 15 and 16.

While there are no definite clews on which to base their theory the police of Vancouver fear that C.J. McQueen a young bank clerk who recently disappeared, may have been murdered by a gang of Russian bank robbers.

H. B. Biggar, of the engineering staff of Surrey municipality, and lately assisting W. S. Vivian in the assessors and collector's department at Cloverdale, was the recipient of a presentation at the Cloverdale municipal hall, on the occasion of his departure for Spokane, owing to the ill health of Mrs. Biggar.

Marked activity is being displayed by the Empire Lumber company in developing its timber limits at Cowichan lake. A tug has been constructed for service in connection with the company's logging camps at that point. Two new yard engines, also, have been secured. With these additional facilities it is expected that the daily output from this date forth will be between 35 and 40 cars.

Suddenly stricken ill at the end of his run from Nelson to Grand Forks on Thursday evening, Engineer John E. Kennedy, for the past 16 or 17 years, a locomotive engineer out of Nelson and Trail for the Canadian Pacific railway, was taken to the Grand Forks hospital, where he died on Saturday night at 8:30. Mr. Kennedy was in Trail before going to Nelson, having for years run on the old narroR guage line to Rossland. He is survived in Nelson by his wife, his step daughter, Mrs. David Wade, and two little children, aged about five and three years.

H. R. MacMillan, chief of the forest branch of the Provincial government, states that as yet only a few small and unimportant fires have been reported as a result of the recurrence of dry and hot weather. out any material rainfall he feared that the department would have some serious conflagrations to combat. The rangers in the various districts are this year better equipped than ever before to cope with any emergency that may arise, and with the co-operation of the settlers and those who frequent the timber areas they were very hopeful that there should be few, if any, disastrous fires this summer.

Milton P. Chamberlain, for some time a resident of Syringa creek was found dead in his shack at that settlement with his head practically blown from his body by the discharge from one barrel of a double-barreled shotgun. The body was found by Edward Arnold of Syringa creek and the matter was reported to the provincial police and Provincial Constable Hugh King with Coroner Hartin and an undertaker visited the scene of the tragedy. Chamberland was found lying at the side of his bed. His dog, which he had apparently stabbed to death, was dead on the bed, and in one corner of the building was found the charred remains of any identification papers that he had. The case is believed by the provincial police to have been a deliberately planned suicide. He had used the only shell that he possessed in firing the shot, but a loaded 30-30 Winchester rifle was also found in the shack. The body was brought to Nelson.

Seven well-dressed men in a speed launch visited Kaslo about 11:30 o'clock on Thursday night and after touring the city for some time attempted to break into the Bank of British North America and the post-office buildings, according to information which reached Chief Provincial Constable Black. Apparently frightened while at their work by Chief of Police Tranter the men dashed for safety, five escaping by the launch in which they had visited the city and two others of the party making for the hills in the vicinity of the city. Chief Tranter called Provincial Constable Williams and the police gave chase to the desperadoes. Later in the day one man was arrested in the vicinity of the city, but was let go on proving an alibi. The search for the men occupied the whole day, the hills at the rear of Kaslo, and the main lake being scoured by by the Kaslo police and others. The theory is put forward that the men came up Kootenay river and the main lake from Bonners Ferry, Ida.

Announcement has been made by the Portland Rowing club that it will be represented in the race for the diamond sculls of the west in Nelson during the Chahko Mika week.

The corn which was supplied by the farmers' institute is showing up well around Fruitvale. It is hoped that it can be successfully grown in that district, as it will make a good addition to the other fodder crops for winter feed. Nearly every rancher is going in strongly for pig raising.

The permit for the new immigration depot for the Dominion government at the foot of Thurlow street, Vancouver, north of the Canadian Pacific railway tracks, to cost $300,000, was taken out from the building inspector's office last week. It will be a four storey, reinforced concrete structure.

Ivy Holland, an old-timer who has been at Ainsworth for the past 25 years, and who has been acting peculiarly for some at intervals is now insane and is wandering around armed with a gun and carrying lots of ammunition. Provincial Constable Williams has been trying to get him all the week, but this is practically impossible while the man stays in the bush.

The dredger for work in the south channel of Nanaimo harbor has arrived at Nanaimo, and is now tied up The dredger will remain in Nanaimo until the work is completed, Major G.B. Hughes, the son of the minister of militia who was recently appointed Dominion district engineer for Vancouver island is now in Nanaimo supervising the dredging and rock crushing operations.

Hon. W.R. Ross, minister of lands, has received an invitation from the director of the United States geological survey to attend a conference of the district engineers of the water resource branch, to be held at Washington during the week commencing December 7 next. There is also a request that Mr. Ross should submit a paper dealing with the water resources of this province.

Residents of Abbotsford and vicinity are getting worked up over the possibility of oil being found there A company operating under the name of the Abbotsford Oil and Gas company, limited, is drilling for the fluid There is no doubt in the minds of the people about the gas part of the concern; that part of it being proved to the satisfaction of all before the commencement of the well.

A charge of murder has been laid against B. M. Burdett, of South Vancouver, and Mrs. Sheldon, a midwife of Lytton, and formerly of Burnaby, in connection with the death of Mrs. Burdett in the general hospital at Vancouver. The charge was laid as the result of a post-mortem examination by the crown. Mrs. Burdett died of bloodpoisoning, following an alleged illegal operation, said to have been performed by Mrs. Sheldon at her home at Lytton.

The receipt of a grant of $2,500 from the provincial government towards the building fund of the Northern British Columbia Agricultural and Industrial association, at Prince Rupert, has now enabled the directors to call for tenders for a section of the proposed exchange buildings for which plans have been prepared by Architect J. Gilmour. The city made a grant of $5,000 and this with the money from last year's fair and the government grant will provide ample funds for the first wing covering 10,000 square feet. In conversation with a press correspondent, Manager L. Bullock-Webster stated that a large number of Vancouver manufacturers have applied for space to exhibit their wares. The annual exhibition will be held September 30 to October 2.

Some of the people of Wycliffe who filed on homesteads May 1 are already on their land and the others are making preparations to be there shortly.

Judging from the number of birds and deer which are at present being seen the sportsman can look forward with confidence to the advent of a successful season among the game.

The Kaslo Horticultural and Fruit Growers' association have decided to market their fruit through the Kootenay Fruit Growers' union again this season.

Rev. S. Everton, who has been assistant principal of Okanagan Baptist college at Summerland, has been appointed to the principalship upon the retirement of Dr. Everett Sawyer, who has had to resign on account of eye trouble. Dr. Sawyer, however, will still be connected with the college in the position of Forward Movement secretary.

Crown Timber Agent E. W. Beckett was in the district last week making a tour of the timber limits in the upper portion of the Chilliwack valley. While there he travelled over nearly all the limits and found everything to be in good shape. The warm weather of the last week made everything like tinder, but care is being exercised by nearly everyone in the handling of fires.

Stockholders of the British Columbia Copper company, who have elected not to exchange their shares for those of the Canadian Copper company, are organizing to protect their rights. A circular letter has been sent to the shareholders announcing that the committee is calling for a voluntary assessment of two cents a share to create a fund to put the organization on a permanent basis.

The new electric sterilizer, purchased for the Vernon Jubilee hospital by the Women's Aid Society, and the Girls' Auxiliary, with part of the net proceeds of "The Fair of Nations," has arrived and is now being installed. The purchase of the sterilizer, an $800 machine, will leave the Aid societies with a handsome cash balance on hand, the disposition of which has not been decided upon.

Mrs. George Parker, of Boundary lake, has a curiosity in the shape of a night blooming cactus or to be more correct Phyllo Cactus. This plant is probably the only one in the district or for that matter the only one in the Fraser valley. The peculiarity of this plant is the fact that the flowers remain closed during the daytime, but open as soon as it becomes dark. After a few brief hours of glory, the flowers close and die.

An enormous grizzly bear was killed on White mountain, south of Kelowna, last week by the Forestry service crew, which was engaged in putting up a telephone line. Mr. Larsen, a member of the crew, put two shots into the brute the first day it came to the trail. The animal took to the brush, but having only one gun in the party, no pursuit was made, though a blood trail was plain. The next morning four men with three guns took up the trail, and after going about 200 yards came upon the wounded grizzly, which showed fight at once. Alex. Crawford, with two shots into the head, stopped the rush of the brute, however, and it soon died. The hide measures eight by six feet, the skull between the ears is thirteen inches across, and the claws are three and a half inches long!

WILLIAMS & LLOYD, Wholesale Jewellers (Dept. 147), 89, Cornwallis Road, London, N., England.

Perpetual Timber Supply Object of Government

A perpetual timber supply, resulting from systematic methods of cutting is commonly, and correctly, supposed to be the chief purpose of making forest reserves.

Another purpose, scarcely, if at all inferior, is that of regulating the run-off from the water-sheds of rivers, on which, on account of the fact that the land is unsuited for farming, through its being too poor in quality or too rocky, or being at too high a level and so exposed to frosts, trees form the most profitable crop.

Forests maintained for this latter purpose are called 'protection forests' Possibly the best example of such a forest, and certainly the largest protection forest in the world, is the Rocky Mountains Forest Reserve in Alberta, which now has an area of 20,896 square miles.

Fortunately the Dominion government early recognized the value of such protection forests, and by the creation of forest reserves in the west the great rivers of the plains having their source in these water-sheds were saved from the disastrous floods, the low water stages, and the filling up of the river-beds with eroded soil, so characteristic of the rivers originating in the denuded water-sheds of the eastern United States.

In this latter region many areas in the Appalachian mountains, which cover a large part of Pennsylvania, Virginia, the Carolinas and other states were very severely cut, and have been repeatedly swept by fire, so that the forests have been entirely destroyed. When rain falls on such an area, the water runs off almost immediately; if on the other hand, the area were covered with forest, the soil would be more spongy and able to retain water, and the water would be hindered in running off by the tree roots and the debris on the ground. Moreover, the water, in its rapid run-off, gradually takes with it the soil, and, where the soil covering the rocks is thin, it is apt to be washed away entirely. Hence there is lost any possibility of growing a new forest on the now bare rock. The soil carried away eventually found its way to the larger rivers and harbors, and did actual harm by silting these up. The increased irregularity of flow in the streams— excessively full in the spring and as scanty in midsummer—greatly lessened the value of the water-power situated on them. Accordingly an agitation sprang up to take steps to reafforest such areas as above referred to, and after some years the Weeks Bill was finally passed in 1911 setting aside $11,000,000 for the purpose of conserving the navigability of navigable streams, by buying up and ultimately re-afforesting the denuded areas on important water-sheds. At present over five and a half million acres in the Appalachians have been purchased or approved for purchase.

The right of the federal government to expropriate such lands by purchase hinged on the power of promoting navigation, given by the Constitution. In Canada the Dominion government was also given the regulation of navigation by the British North America Act of 1867, and it has been suggested that, in those parts of eastern Canada where waste water-sheds clearly exert a detrimental influence on the navigability of rivers, the Dominion government should co-operate with the provincial governments in there establishing and conserving forest growth. Such a water-shed is that of the Trent river issued by the Commission of Conservation, as the result of repeated fires about 150,000 acres are practically desert land. The Trent valley canal which passes through this region has already cost the Dominion government upwards of $10,000,000, and, as the above report points out, the re-establishment of a forest cover on this denuded water-shed for the conservation of water-supplies is one of paramount importance to the canal. The remedy for the many evils following deforestation as pointed out in this report is the carrying out of a policy of conservation under Dominion, provincial or municipal control.

The work of stamping out tuberculosis in cattle is about to be made national in character in the Dominion. By a recent federal order-in-council regulations have been authorized which will empower the department of agriculture to enter into an agreement with cities for the definite object of eradicating bovine tuberculosis from all dairy herds supplying milk to cities. This has been under contemplation with the minister of agriculture for two years, and its adoption will be the means of very materially assisting the work so thoroughly set about by the government in this province.

Mrs. Good Housekeeper!

Have you tried

CAN O' WAX

For sealing your jellies and preserve jars

DIRECTIONS—Melt a stick of Canowax in large cup. Pour over jelly after same is hard in the glass. For preserves, dip top of jar in liquid wax below the ring. A coating of pure white wax will form making jar air-tight.

For the Laundry

Makes clothes white without rubbing

DIRECTIONS—Cut one stick in small pieces and put in boiler. Makes clothes white as snow.

Two and a Half Hours on Operating Table

Specialist Could Not Remove Stone In The Bladder

GIN PILLS PASSED IT

JOLIETTE, P.Q.

"During August last, I went to Montreal to consult a specialist as I had been suffering terribly with Stone in the Bladder.

He decided to operate but said the stone was too large to remove and too hard to crush. I returned home and was recommended by a friend to try GIN PILLS.

They relieved the pain. I took two boxes and went back to the specialist. He said the stone was smaller but he could not remove it although he tried for two hours and a half. I returned home and continued to take GIN PILLS, and to my great surprise and joy, I passed the stone.

GIN PILLS are the best medicine in the world and because they did me so much good, I will recommend them all the rest of my life". 170

SYNOPSIS OF COAL MINING REGULATIONS.

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be issued for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon If the coal mining rights are not being operated, such returns should be furnished at least once a year.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to the Agent or Sub-Agent of Dominion Lands.

THE MOUNTAIN ROAD

The announcement that work is to start immediately upon the extension by the Dominion government of the automobile road to the summit of Mount Revelstoke will be highly welcome. The completion of the road is necessary to make the beauties of the mountains accessible to tourists and to render the park of the highest value to Revelstoke, and this fact has been recognized by Mr. R. F. Green, member for Kootenay, who has been not only one of the chief factors in obtaining the reservation of the national park but also in securing the early construction of the road.

At a period when the demand for labor is less keen than usual the expenditure if $16,500, which is the amount set aside in the estimates for the construction of the Mount Revelstoke road, will be particularly appreciated, for with inconsiderable exceptions the money spent on road construction will go into the pockets of those actually working upon the road. By them it will be spent in Revelstoke and it will provide an appreciable stimulus to the business of the city.

The opening of the San Francisco exhibition will vastly increase the tourist traffic across the North American continent and a great proportion of the tourists will not only visit the exhibition but will be anxious to see all points of interest on their route. If the wonders of the Revelstoke National park and the accessibility of the heights of the mountain are made generally known a large proportion of the tourists travelling to San Francisco on the main line of the Canadian Pacific railway will stay in the city, and a foundation would be laid for the creation in Revelstoke of a great tourist centre.

REVELSTOKE A ROSE CITY

The profusion of roses to be seen in some of the gardens of Revelstoke is a remarkable indication of the prolificness of the soil and of the favorableness of the climate for vegetation

Bing and Royal Ann Cherries

Ripe, luscious fruit of highest quality

Grown by H. G. Garner on his ranch on Greely Creek road, 1¼ miles from Revelstoke, for sale at Hobson's and Bell's grocery stores or at the ranch. Orders received by mail to

H. G. GARNER
P.O. Box 744
Revelstoke, B.C.

All products of the soil of the temperate zones come to perfection in the Revelstoke district, but the Queen of Flowers appears to particularly delight in the peculiar conjunction of soil and climate. The glowing sunshine paints the petals with hues of the most delicate tint while the abundance of moisture and fertile soil encourage the growth of a riot of bloom.

The abundance of roses obtainable in Revelstoke and the extraordinary perfection to which the blossoms attain offer an opportunity for valuable advertising and for beautification of the city. Portland is noted as the city of roses and its rose festivals have won for it the widest publicity. Revelstoke with a little care might become known as the Canadian City of Roses.

The first step toward this ideal would be to encourage the cultivation of rose bushes and to do this the plants must be made easily obtainable. If lovers of flowers, the Woman's Canadian club or some other organization which has the welfare of the city at heart were to obtain, through a local florist rose bushes in wholesale quantities and were, by personal solicitation or otherwise to ensure that the bushes were purchased and planted by every householder, in a year or two every garden in Revelstoke would have become a bower of blooms.

The planting of roses along those streets where a space remains between the sidewalk and the houses might also be encouraged and would be an important factor in increasing the attractions of the city. Rose shows would add a spirit of emulation and would increase public interest as well as provide an agreeable diversion for the summer. Finally, when roses became plentiful, a carnival of roses might be organized tha would attract tourists and make known the name of Revelstoke from ocean to ocean, and pleasure and profit would result.

MUST ACKNOWLEDGE AUTHORSHIP

Tha Mail-Herald has received for publication a letter signed "Parent" criticising the proposal that a bylaw be passed by the city council exacting a license fee from Chinese peddlars of fruit and vegetables. The letter is well written, interesting and entirely unobjectionable and would be published by the Mail-Herald but for the fact that it does not bear the signature of the writer. The Mail-Herald will in no case publish letters to which the name of the writer is not attached for publication. To this rule no exception can be made.

The Mail-Herald will be glad to give publicity to letters offering suggestions of value to the community, or which discuss temperately topics of general local interest. But to secure publication the writer must be willing to acknowledge himself as the author of the letter, by signing his name for publication. If he is not willing to do so the Mail-Herald will not publish the communication, however interesting or however otherwise worthy it may be of publicity.

Bradstreets expresses the opinion that the automobile habit has come to stay and is sharply dissimilar from the bicycle craze of some years ago. It certainly does not show any signs of weakening, even the past year or so of financial depression having failed to affect it materially. But Bradstreets does not go on to say why its fate should be different from that of bicycling, unless it is that people are too lazy to keep up for long the physical exertion which the latter required. The decline of the bicycle was a most remarkable phenomenon that has never been accquately explained and the chances are that with the steady improvement of roadways it will come in for much of its old-time popularity. It still has a very strong hold in France.

FROM THE SANCTUMS

PULPIT AMD POLITICS.

Some people in Toronto are objecting that Protestant ministers are using their pulpits as places from which to address political arguments to their hearers. When Catholic priests in Quebec did a like sort of thing, much ado was made over the matter, and there was talk of tyranny and undue influence and protest, and even lawsuit. The principle behind the clerical action was the same in each case. The circumstances may not greatly affect it. The wise preacher will think long before he decides to mix political matters with his greater message.—Montreal Gazette.

WASTEFULNESS OF WAR.

The coming celebration of the hundred years of peace between Canada and the United States is bringing out a great deal of valuable information regarding the wastefulness of war. It is one of the most encouraging signs of the times that business men are now looking upon war from an economic standpoint. Heretofore, war appealed to the passions, prejudices, and patriotism of the people of the world; lately, bankers and business men are putting war to the acid test of economics and are finding out that war is one of the most wasteful and useless undertakings imaginable.—Montreal Journal of Commerce.

THE FIRST STOP.

Rimouski, the little town on the St. Lawrence, which has become a familiar name in the last few days, is remembered by many thousands of colonists as the first place at which they came into actual touch with their new country. On a clear day both banks of the river have been in sight to the emigrants for some hours, but opposite Rimouski the steamer comes to a stop for the first time since leaving Europe. A quaint little beam-engine tug brings off the letters for the ship and takes off the few passengers who may be destined for that port of the country. The "patois" of the French-Canadian is heard here for the first time by the emigrants and when the journey is renewed up the great river to Quebec they feel that they have really arrived in Canada at last.—Westminster Gazette.

TO CORRESPONDENTS.

We shall try once more to get correspondents of The Colonist to understand certain things, and if we do not succeed this time, we shall give it up.

At least on twenty occasions we have stated in the most prominent way that letters will not be printed in this paper except over the proper signature of the writers. For 10 years no letter has been printed by this paper unless so signed. Yet every day brings one or more letters which do not comply with this rule. Once more and for all, we will say that correspondents may just as well save themselves the trouble of writing letters, intended for publication, unless they wish them to appear over their signatures. We shall doubtless receive letters tomorrow telling us that other papers print over assumed signatures; but that makes no difference. No daily newspaper that we know anything about undertakes to return communications when they are not used, still less does any paper undertake to return MS of letters that have been printed. Before us is a letter which the writer expects to see appear in press over initials. After it has been printed he wants the copy returned to him. It consists of about 300 typewritten words. If he put a sheet of carbon in his typewriter he would have had a copy of what he wrote; but he seems to be under the impression that the editor of a newspaper, the foreman of the composing room, the proof reader and one or two other people have so little to do that they can keep track of his piece of paper and see that it gets back to him. We have had cases where a person has written a few lines of poetry, something that could be copied in five minutes or less, and yet two months or more after they have sent the lines in have asked for their return, and have made the lives of several people miserable by asking for them, and wondering why they cannot get them. Keep these following rules in mind.— The Colonist will not print letters except over the proper names of the writers. The Colonist does not undertake to return unused communications, and will not undertake to preserve them.—Victoria Colonist.

A. G. Larson, the well known coast mining engineer, formerly of Rossland, has been making an examination of the mines in the Franklin camp.

In future horses or cattle found in Penticton tied to telephone posts or in such a manner that they may stand in the way of pedestrians on the street or sidewalks, will be impounded.

An accident occurred on Wednesday morning at Lorne creek near New Hazelton where a new steel bridge is being put in the place of the wooden structure for the G.T.P. As a result one man was killed and one so badly injured that he was brought to the hospital for treatment.

SPORTING NEWS

LACROSSE CLUB IS ORGANIZED

Officers Elected — Arrangements Under way for Match with Vernon

An enthusiastic and well attended meeting of adherents of Canada's national game assembled at the city hall on Monday evening and organized the "Revelstoke intermediate lacrosse club." The chair was taken by H. Manning, who impressed upon the gathering the necessity for playing a clean game. Players should not imagine, he said, that their sticks were axes with which to cut one another down. Rough play had been the greatest foe to lacrosse in Canada. The following officers were elected:—

H. McKinnon, Hon. Pres.
H. N. Coursier, President.
H. Manning, Vice-president.
H. Cooke, Secretary Treasurer.
Earl Dickey, Capt. and Manager.
Executive, J. Maley, Donald Calder, H. Cooke and Thomas.

The club will hold practices every Tuesday and Friday and arrangements will be made to send a team to Vernon to play the Vernon team.

Kamloops is Opposed to New Ball Schedule

Yesterday's Inland Sentinel of Kamloops says:

"No little surprise is felt, and in some quarters a feeling of disgust has been created, in consequence of a suggestion that is being urged respecting the championship of the Interior Baseball league. Kamloops Kelowna, Revelstoke and Vernon comprise the league, and the first named of these teams has had the good fortune so far to outdistance the others that the pennant seems within its grasp. The proposal is, however, now being mooted that after the next contest a fresh series of games should be started, and that Kamloops as the winners of the first series should, unless again victorious, meet the winners of the second series in three games to decide the championship.

"It is said that this scheme is being strongly urged, and even that some sort of coercion is being exercised to carry it through. Certain of the other teams are reported to have declared that they will drop out of the league if the project is not put into operation. The president of the league Mr. Macdonald of Vernon, is arranging to call a meeting at Salmon Arm to discuss the proposal, which the Kamloops representatives can be trusted to resist to the utmost. The Kamloops men have achieved their present position only by sheer hard work and meritorious play and there is a strong feeling that this attempt to filch the fruits of well deserved victory from them is not—playing the game.

"On Wednesday next the Kamloops team will take the field as reconstituted after the departure of Baird and Hewitt. These two players will be missed but Manager Wells is of opinion that the recruits obtained are of a high standard and that the combination will not suffer greatly. This opinion, however, does not lessen his regard for the players who have left for Edmonton. He is, indeed, quite enthusiastic about the qualifications of R. Hewitt. This player, he declares, has a good arm, fine speed, and a useful curve, so that under skilful tuition he would develop into a player of brilliance. Mr. Wells did as a matter of fact write to Mr. Chas. A. Comiskey, president of the Chicago White Sox, advocating the merits of Hewitt and soliciting the good offices of the Chicago president in his behalf. However, before any arrangement in this connection was possible Hewitt had accepted the Edmonton offer. No sooner had he done so than he received an offer from the Beavers so that his play in the Interior League would seem to have attracted attention away from home."

The annual Greenwood fair will be held on Sept. 24 and 25. Subscriptions will be received next week and the prize list will be issued early next month.

Anson Cornell of Columbia University, is expected to arrive at Kamloops in the small hours of Tuesday morning so as to be able to take his place as short stop in the game against Kelowna on Wednesday. On this occasion, by the way, Peters will pitch for Kamloops.—Inland Sentinel.

Match Against Vernon Being Played Today

The baseball team left this morning for Vernon where it will play against the Vernon team this afternoon. Killeen will pitch for the Revelstoke team and it is expected that the team will give a good account of itself.

FIVE RUNS IN LAST INNING

Fire Hall and C.P.R. Tied Until Final Inning—Game Exciting

The most exciting ball game of the season was played on the Y ball field on Monday evening, the Fire Hall beating the C.P.R. by 8 to 4.

At the end of the fifth innings the score was tied, each side having three runs to its credit. An extra inning had to be played. The fans were wild with excitement. The Fire Hall started a slugging bee gathering five runs in their half of the inning, while the C.P.R. could only register one. The following is the score by innings:—

C.P.R.—0 1 0 0 2 1—4.
Fire Hall—0 2 1 0 0 5—8.

Batteries—Nicholls and Goodwin; Burridge and Bruce.

The teams lined up as follows:—

Fire Hall—Burridge, Bruce, McLeod Haug, Calder, McCarter, Mulholland, N. McLeod, Maley.

C.P.R.—Nicholls, Goodwin, Daniels, Lyons, Lee, Webster, Watson, Corsan Cocorochi.

Trap Shoot Prevented By Shortage of Pigeons

Owing to a shortage of clay pigeons resulting from a fire in one of the large factories in the United States no trap shoot was held last week by the Interior league.

HARTLEYONIANS SUFFER DEFEAT

Hartley, Dabell and Bourne are Highest Scorers—Victory by Innings and Run

The Revelstoke cricket club scored another victory over the Hartleyonians at the beginning of the week, winning by an innings and one run. For Revelstoke Dabell made 36 and Bourne 35, each playing splendid innings.

In the Hartleyonians second innings Hartley hit up 42 in dashing style. In the first innings Robbins made top score with 14.

The scores were as follows:

THANKS TO MAIL HERALD

Malakwa Appreciates Fair Report—Hopes to Arrange Another Match

To the Editor of the Mail-Herald:—

Sir,—On behalf of the local ball team I wish to thank you for your fair report of the July 1 game and to publicly thank the Y.M.C.A. for their courteous treatment extended to us during our stay. The Review was inclined to be sarcastic in commenting upon it but considering the source we should worry. They printed the posters with "boost amateur sport" in big type at the bottom!

For five of our men this was their first game in four years. We have but ten men from which to select nine and live so far apart it is almost impossible to get together. We work just as hard as the Y but are handicapped by local conditions.

We hope to arrange for another game later in the season which will result in a change of our line up as well as the score.

EARL SWAN, Secretary
Malakwa, B.C., July 7.

Archie Bishop is Champion of Northwest

The feature of the second day's shooting at the Calgary Gun club tournament was the winning of the two championships. The first was the Alberta championship which went to Crabbs, of the Northern gun club of Edmonton. This title was held by Archie Bishop last year and he was down a few birds on his first day's shooting and consequently it cut him out of the honors.

In the second half of the handicap, a hundred bird event, for the championship of the Northwest, Archie showed rare form and won the event with a score of 96. He broke 49 out of his last 50 birds getting a straight on trap number two. He shot splendidly throughout the day and well served the coveted honor.

Nelson Makes Sweep at Coeur d'Alene Regatta

By winning all three rowing events the senior singles, doubles and fours, Nelson, B. C., crews made a clean sweep of all six rowing events in the second annual aquatic carnival on Coeur D'Alene lake. In the single shell event, T. DesBrisay, champion sculler of the Northwest, defeated V. Allen of Vancouver. In the doubles, Victoria was second, Portland third and Vancouver fourth. In the senior four's event, one mile and a half, Coeur D'Alene was second, Victoria third, and Vancouver fourth. Time, 7 minutes, 40 seconds.

Norman Ross of Portland won the under water and 100-yard swims.

The municipal council of Summerland and the Okanagan Telephone company, have arrived at an amicable settlement of their differences in regard to the location of a new line to be erected by the company. The dispute reached such a degree of bitterness at one stage that the whole construction crew of the company was arrested for "loitering and breaking up" a street, after their refusal to cease work when ordered by the reeve

Hosmer has been one seething hot bed of excitement for the past week, and a riot almost broke out on several occasions. The shutting down of the mines so suddenly caused the merchants to realize on every assignment they held, thereby taking almost every cent coming to the men whose credit was then cut off. The balance of their wages they are unable to secure until next week and many of them have not a cent to live on in the meantime.—Fernie Free Press.

Local officials of the forestry department are preparing to construct a building for lookout purposes on Little White mountain, about 22 miles from Kelowna. The existing trail, made last year, is being improved, so that lumber can be taken in, and the actual erection of the station will soon be begun. As the site is above 7000 feet above sea level, it is above the timber line on bare rock, and it will be necessary to anchor the building down to ensure safety from the violent gusts of wind to which it will be exposed.

Notes from the Mines

A vein of solid steel galena has been exposed on the Treasure Mountain, Summit camp.

On Copper mountain enough positive ore is now blocked to provide a 2,000 ton smelter with ore for the next ten years.

R. H. Stewart, manager of the Consolidated company at Trail, was over to the Princess camp in the Similkameen district last week.

There is a good showing of ore in the Florence Mining company's mine above the Princess creek landing between Ainsworth and Woodberry creek The vein fills the whole face of the adit and galena occurs freely in the quartz. The Florence company is a Spokane organization.

Seven thousand six hundred and twenty-two tons of ore from the mines of the Kootenay and Boundary were treated at the smelter of the Consolidated Mining & Smelting company at Trail during the past week, making the total tonnage treated for the year to date 173,861 tons.

W. F. Brewer of Hazelton has taken a bond on the Silver Pick a promising galena property on Nine-mile mountain. The claim, which is located a mile and a half from the Silver Cup, is to be developed this season. The owners are Ben Peterson and Sperry Cline. The price has not been made public.

As the result of the recent re-building and enlarging of one of the copper furnaces at the Consolidated Mining and Smelting company's smelter at Trail, the company's mines in Rossland will likely be called upon for an increased shipment of ore. Four copper furnaces are now running at the smelter. Heretofore the mines have sent down from six to seven hundred tons per day. The four furnaces will now accommodate three hundred tons additional per day, and this ore must come from Rossland mines.

Dr. C.W. Drysdale arrived in Rossland on Wednesday and is commencing his season's work for the Geological Survey of Canada. Mr. Drysdale spent last summer and part of the winter in Rossland in connection with the report on this camp. Since then he has been engaged in Ottawa, in completing this report. In addition to his own thorough investigations of the Rossland mines, and the geological formation in this district, the report contains much of the field work done by both R.W. Brock, deputy minister of mines, and Dr. G.A. Young.

O. Lachmund, general manager for the B.C. Copper Co., was over to Princeton last week accompanied by R.G. Hargraves, purchasing agent for the company, who will probably be located in Princeton permanently.

There are more men working in the mines in the vicinity of Sandon than at any time for the past 12 years and before fall it is expected the number will be doubled. This is also true of Four mile. Men are being put on at the Standard as fast as room can be made for them.

The Coalmont Colliers ship five cars of steam coal weekly and are increasing their force to keep pace with the development necessary for an enlarged output and the building of a tramway and tiple. The company is also said to be interested in projects which will mature shortly. That a revival has take place in Coalmont requires only a visit to confirm.

The Hedley Gold Mining company has declared the second quarterly dividend of three per cent for the year, amounting to $60,000. This makes a total of $120,000 distributed in dividends so far this year and $1,272,000 distributed in dividends since the mine was taken over by the present company in July, 1909, and is equivalent to 106 per cent on the capitalization.

Rich Strike of Ore on Fish Creek Claim

R. W. Drew of Beaton, William Boyd of Halcyon and Jack Kennedy have made a rich strike of silver-lead ore on one of their claims on Fish creek, about 2½ miles from Camborne upon which they have been working for over a year. A tunnel was run in to crosscut the ledge at a depth of about 50 feet.

The ore body was found to be 11ft. 1in. between well defined walls, of good concentrating ore. Work was prosecuted on the vein and last week a rich streak of clean galena ore, about 10in. in width, which ic is said will run up to $100 a ton was encountered. Mr. Boyd went up to Beaton in his launch with Harry Carpenter of Revelstoke and returned with a sackful of the ore, 100 lbs. of which has been sent to Trail smelter for assay. They regard the showing as very promising and it is thought probable that the 10-in. streak will develop into a big body of shipping ore. 6

ARCHIE BISHOP IS NEW WEED INSPECTOR

Archibald Ward Bishop has been appointed provincial noxious weed inspector for what is described as the Kootenay lake and Arrow lakes district. His territory will include the West Arm, the Kootenay river valley to Thrums and the Eagle river valley to Malakwa.

Fred Adie has been appointed inspector for what is described as the Waneta district, including the section of territory between Cascade and Thrums, and Waneta, Trail, Rossland Columbia Gardens, Fruitvale, Ymir, Brilliant, Castlegar and West Robson sections.

By a vote of 378 for, to 93 against the ratepayers of Nanaimo endorsed the proposal to borrow the sum of $30,000 upon the security of the sewer rentals for the purpose of extending the sewerage system to parts of the city not provided for in the original sewerage scheme.

Arthur Shaw of Lumby had a thrilling adventure at Shuswap Falls the other day while out picking strawberries. He was suddenly surprised by a huge cinnamon bear which made straight for him. He took refuge in a tree, the bear following. Fortunately, however, Mr. Shaw's rifle was strapped to his horse's saddle nearby and George Finlaison, who was with him, at once secured it, and shot the vicious assailant before any harm (except for a big scare) was accomplished.

The Pacific Board has decided to lay a second cable from Bamfield, the cable station on the west coast of Vancouver Island, to Port Alberni, an underground cable from Port Alberni to Parksville, and a submarine cable from Parksville to Nanaimo, the latter to make connections with the cables from Nanaimo to Vancouver. This will give the Pacific Cable Board an all cable route direct from Australia and New Zealand to the mainland. The Bamfield station works lines through Port Alberni direct to Vancouver and Montreal without manual transmission.

P. Harwood returned last week to Vernon from a trip through the lower Okanagan, Similkameen and Nicola districts, through which he drove Col. Vickers, of Kamloops, who is looking over the country for the militia department with a view of securing a permanent camp site. They visited, after leaving Victoria, Kelowna, Penticton, Fairview, Keremos, Hedley, Princeton, Coalmont and Nicola, returning by way of Kamloops. Col. Vickers made a thorough inspection of the country surrounding Vernon.

WORLD NEWS TERSELY TOLD

The British Columbia Court of Appeal had unanimously dismissed the Hindu appeal and upheld the validity of the steps the immigration officials took in preventing the landing of the Komagata Maru passengers.

The body of Joseph Chamberlain, the Unionist leader who for many years occupied a prominent position in British politics, was buried in Hookley cemetery in the constituency he long represented in the House of Commons. A memorial service was attended by the lord mayor of Birmingham, 6the members of the city council and other civic dignitaries.

The elections for president, vice-president, deputies and senators were held in that portion of the republic controlled by the Huerta government Indifference was manifested everywhere. President Huerta it is reported, received a virtually unanimous vote of confidence. The returns indicate the re-election of all the present members of the Chamber of deputies and the senate.

Baron Lucas, a representative of the government, formally announced in the House of Lords that Liptons Limited had been removed from the list of contractors for the British army. This step was taken as a consequence of the recent scandal in connection with the army canteen contracts, for which several army officers and civilian employees of Liptons limited were convicted on charges of receiving and giving bribes.

A sensation has been created in London society by the tragic outcome of a midnight river party arranged by Sir Denys Anson, the young baronet who a month ago succeeded to the title on the death of his uncle, Sir William Anson, a leading constitutional lawyer and member of parliament for Oxford University. Young Anson, on Thursday, engaged a river steamboat to take himself and a party of friends up the river from Westminster, which they left at midnight. On the return journey from Kew, about 3 o'clock on Friday morning, the host jumped or fell overboard, and was drowned. A man named Mitchell, a member of the orchestra which was playing, jumped after Anson and was also drowned. Count Benckendorff, son of the Russian Ambassador to London, went overboard in a vain search for the two men.

Thirteen persons were drowned Saturday in Lynn canal by the capsizing of the gasoline launch Superb, which, while bound from Skagway for Juneau, with 13 persons aboard, was struck by a heavy sodtherly gale.

Three men and a women were killed when a dynamite bomb, said to be the most powerful ever used in New York, exploded with tremendous force in an apartment tenanted by Industrial Workers of the World. The upper part of the six-storey tenement house, in which the bomb was being made, was wrecked. A score of persons were seriously injured, and the most of the property damage was done in a wide radius from the scene of the exdlosion.

A family of four was wiped out by blows from an axe in their homes in the German settlement of Blue island a suburb of Chicago. The victims were Jacob Neslesla, a German laborer, aged 52 years; his wife, their daughter, aged 25 years, and the latter's infant child. Whether the butchery was the work of a maniac or of a person seeking revenge was not disclosed in the first cursory investigation. It was learned that the young mother had been living away from her husband for a year and efforts to find him were begun.

Now that the bodies of the murdered Archduke Francis Ferdinand and his wife, the Tuchess of Hohenberg, repose beneath the castle chapel at Artsletten, a bitter controversy is raging over the manner in which the funeral was conducted. Moderate opinion inclines to the belief that the court officials made the ceremonial too painfully correct, while the friends of the duchess are indignant at the emphasis laid on her inferior birth. According to reports published in the leading Vienna papers, the reception of the bodies at Poechlarn, across the Danube, was attended by scandalous proceedings. A violent thunderstorm upset all the prearranged ceremony, and the coffins were hurriedly carried to the waiting room of the station, where they were placed on the stonepaved floor, where they remained for two hours or more. The torrential rain drove everybody into the waiting room and, says one account, "All the ordinary rules of behavior seemed to have been forgotten, and the scene might be described as resembling the turmoil and noise of a country fair."

Tenders Called For Kamloops Drill Hall

The new drill hall to be erected at Kamloops by the Dominion government will be a larger and more elaborate structure than was at first planned, according to the detail drawings and specifications received from Ottawa, says the Kamloops Standard.

Acting on the urgent request of J. T. Robinson, during his recent visit to Ottawa, the government agreed to erect a "Class D" building, a type which is generally reserved for larger cities. The announcement to this effect made several weeks ago was very favorably received here and the news that the plans have again been enlarged to accommodate an extensive heating plant at an addition cost of $5000 will be no less welcome.

The total length of the new building is 199 feet and the overall width is 82 feet. The foundations are of concrete and the building proper is of red brick. A considerable amount of structural steel will be used in the gallery surrounding the main hall and for the roof spans. In the basement are located the furnace which controls the one pipe low pressure steam circuit system, which is to be installed throughout the new building. In addition to the furnace room ample accommodation is provided in the basement for the housing of large quantities of stores.

An attractive feature of the new building are the shooting gallery and bowling alleys, both of which are situated in the basement and extend the full width of the building.

On the ground floor stands the main drill hall which is 129 feet in length. On this floor also there are ten rooms which will be used as orderly rooms and for general regimental requirements. The drill shed proper will extend to the roof and on the second floor will be found the officers assembly room and ante room, the sergeant's assembly room and spacious accommodation for the men. These rooms will be tastefully finished in burlap dado.

New Issue of Postage Stamps Expected

About July 15, there will be placed on sale throughout Canada, another set of superb stamps to celebrate the centenary of Sir. George E. Cartier, well known as the Father of Canadian Confederation.

Some very beautiful stamps are expected as they are line engraved and printed by the American Bank Note company, which in itself is a guarantee of the finest of work.

It is understood the stamps in shape and perforation will be similar to those issued in 1908 to celebrate the founding of the City of Quebec. The 1c stamp will bear a portrait of the King and Queen. The 2c will portray the monument to Cartier. The 5c shows the house in which Cartier was born. The 7c has a portrait of the Prince of Wales; this is the second time the Prince's portrait has appeared on postage stamps, the other occasion being on the 3 of Newfoundland. The 10c shows the famous Victoria Bridge inaugurated by Cartier in 1880. The 20c stamp shows one of the magnificent trains of the Canadian Pacific railway, with the inscription "All aboard for the West." The 50c shows the coat of arms of Cartier, with the motto "Franc et sans dol." and the inscription, "O Canada, mon pays mes amours."

A FEW "DON'TS"

By Fire Brigade No. 2

"Don'ts" which every citizen would do well to remember and thus save loss to themselves and expense to the city.

DON'T pile kindling wood between th back of the stove and the wall, you will have a fire some day if you do.

DON'T have your heating stove sitting too close to the wall, you will go out some day and leave the drafts on and when you come back your house will be on fire.

DON'T leave a heating stove alone with drafts open more than 1 minute at a time it is as treacherous as a wild beast.

DON'T have the wall paper come to close to the stove pipe hole in the chimney cut it back two inches and spend 25c. for a tin collar and you may be hundreds of dollars ahead.

DON'T leave an oil stove burning alone but a few minutes. The Brigade have put out many fires caused by carelessness with these heaters.

DON'T forget to look at the brick chimney where it goes through the garret and roof. Sometimes there is abreak which will eventually cause trouble.

DON'T forget to have the stove pipes and chimneys cleaned when you know they are dirty.

DON'T forget to have a little insurance; this is useful if you should neglect any of the above.

Walter J. Simmons, messenger at the Imperial bank at Fernie, disappeared rather suddenly one day this week. He left a note for his father saying he was going away to make his fortune.

The advent of summer was heralded by a snowstorm on Sunday last, about an inch of the beautiful being in evidence in the city, states the Fernie Free Press. There was quite a perceptible snowfall at higher altitudes and the adjacent peaks presented the appearance of a glorious Christmas cake.

Summerland has been selected as the meeting place of the first convention of Women's Institutes of the Okanagan valley and vicinity. The gathering will be in session for two days, September 2 and 3, and delegates from eight institutes, from Salmon Arm to Keremos, will be in attendance. Three institutes in this district have been but comparatively recently organized, namely those at West Summerland, Oyama and Peachland.

In consequence of non-attendance for two successive sessions, the seat in the Dominion senate of Hon. W.J. Macdonald, of Victoria, B.C. becomes vacant. He was not present during the session which has just closed or during the previous session. His seat is thus automatically vacated. He was the senior member of the senate, according to the date of his appointment having been a member since Confederation. There are now five senate vacancies caused by the deaths of Seantor Cox, Senator Gibson, Senator Coffey and Sir George W. Ross, and the vacation of his seat by Senator Macdonald.

The heavy beard of the outdoor man "sun-cured" and wiry, is the "acid-test" of a razor—and here it is that the

Gillette Safety Razor

most clearly shows its "class". Wherever a man may choose to use it, afloat or ashore, the Gillette gives a clean, cool, comfortable shave, without pulling, gashing, or even irritating the skin.

Be sure your **vacation outfit** includes a Gillette Safety Razor. It will save your face and temper, and help you to keep clean and respectable wherever the trail may lead.

Your Hardware Dealer, Druggist or Jeweler will gladly show you a wide range of Gillettes—Standard Sets at $5.00—Pocket Editions at $5.00 to $6.00—Combination Sets from $6.50 to $25.00.

BRIEF LOCAL NEWS

T. C. Lee of Kamloops, was at the King Edward on Sunday.

A concert and social will be held in St. Francis hall on Friday, July 17.

The Orange lodge will attend service at the Presbyterian church on Sunday evening. The members will assemble at their lodge rooms at 6:30 p.m.

This morning the union picnic of the Methodist and Presbyterian Sunday schools left the Canadian Pacific railway station on a special train at 9 a.m. for Albert Canyon.

Tickets for the Orange celebration at Arrowhead on Monday, can be bought, which will be good going Saturday, Sunday and Monday, returning the following Tuesday.

A fire in the roof of the Climax hotel gave the fire brigade a run this morning. The blaze was caused from the chimney and was extinguished without the services of the brigade being required.

A meeting of the Revelstoke Agricultural association will be held at the city hall this evening at 8 p.m. The business will be revising prize list, report of decoration committee, and complete preparations for Victoria and New Westminster exhibits.

The provincial police authorities have been requested to locate the present whereabouts of Henry Edward Dowding, who left London, England, on July 4, 1911, en route for British Columbia, with the intention of taking up land. Since his departure his wife has not heard from him, and is now seeking assistance in her search.

Mr. and Mrs. Vernon Chapman and Jessie Chapman of Golden, passed through the city on Sunday on their way to Nelson where they will visit relatives. Mr. Vernon Chapman who was a prominent member of the Golden Conservative association and very popular in the city, has been editor and manager of the Golden Star for the past three years, during which time he greatly improved the paper and developed a thriving business. He has resigned his position and will take a holiday before again engaging in newspaper work. His brother, Jesse, also severed his connection with the Star and after a rest will again take up typographical work.

Provincial constables have had a new duty added to their daily task. They have been notified by the department of agriculture that they have been appointed inspectors under the Provincial Noxious Weed Act and that in all cases of the non-compliance with notice served they must institute proceedings. The list of noxious weeds includes Canada thistle perennial thistle, sow thistle, blue thistle, Russian thistle wild mustard or charlock, stinkweed, ragweed, blue burr or stickweed, and such others as may be specified by order in council in two numbers of the gazette. Provision is made for recovering the expenses attending the eradication and destruction of noxious weeds. In unorganized districts the cost is entered on the assessment roll the same as taxes, and in municipalities it will be entered on the municipal assessment roll and be recoverable the same as taxes. The provisions of the act are very strict and it should be the duty of every occupier of land receiving notice to take the required action at once.

AT THE THEATRES

The program for Thursday and Friday at the Empress theatre is sure to draw large audiences as excellent pictures are advertised. Truth in the Wilderness, in two parts, is a splendid American drama; The Gold Creek Mine is an educational feature, and there is an excellent comedy, as well as other fine dramas. The Runaway Princess in three parts is the chief feature for Friday. This is said to be one of the best reels ever produced and the bill includes in addition two good comedies.

L. O. L. CHURCH SERVICE.

L. O. L. No. 1658 will attend service at the Presbyterian church on Sunday evening. Members requested to be at lodge room at 6:30. Visitors welcomed.

Jl.11.n.p. J. P. HUME, W. M.

The new Grand opera house, on Dunsmuir avenue, Cumberland, is nearing completion, which will be a modern building in every respect. The contractors are doing all in their power to have the opera house finished by the 15th of July, the date set for the opening when the Allen players, a noted stock company now at Victoria will commence a week's engagement.

Fifteen hundred tons of rock in the inner harbor of Victoria were blown out by a dynamite charge exploded to remove the Shoal Point obstruction that long has been a menace to shipping. The upheaval caused a great waterspout of which moving pictures were taken for exhibition here and in northern cities. Boats half a mile up the harbor were swamped by the disturbance of the water.

John P. McConnell, former editor of the Vancouver Sun, a morning paper, has issued a writ out of the supreme court against the Burrard Publishing company, owner of the Sun, and F.C. Wade, K.C., president of the company. Mr. McConnell is suing for $30,000 damages and an injunction from the court to prevent Mr. Wade continuing to dictate the policy of the paper.
