Smelters Resume Work—Innocent, Though 13 Years in Prison.—Chinese Head Tax—Alpine Deaths.

PHOENIX, B. C., Sept. 18.—While all the coke wanted is not yet in sight at all the district smelters, there is some improvement at some of them, with the result that the shipments of ore and treatment at the smelters begins once more to turn over the thirty thousand ton per week figure.

SAN FRANCISCO, Sept. 18.—After having served thirteen years in San Quentin penitentiary, it developed yesterday that William Evans, one of the convicts, is an innocent man. Proof positive that he did not commit the crime for which he was sentenced is now in the hands of the proper authorities.

VANCOUVER, Sept. 18.—Ninety-seven Chinamen, out of 493, checked by the customs officers from the Empress of Japan, which arrived this morning, will pay the head tax of \$500, making a total sum of \$48,500.

GENEVA, Sept. 18.—Seventeen deaths and thirty injured make the casualty roll of the Alps thus far in the mountain-climbing season of this year.

OTTAWA, Sept. 18.—For 7 months of the fiscal year, ending July 31st, the total immigration to Canada was 153,595, compared with 116,302 for the same time last year. This is an increase of 37,303. By ocean ports the immigration was 126,458, an increase of 39,820. From the United States 27,238, a decrease of 2,516.

TORONTO, Sept. 18.—H. L. Borden left for British Columbia on Saturday night on his tour of the western provinces, having arranged to commence at Vancouver on September 24.

OTTAWA, Sept. 18.—The Dominion government has under consideration a proposition to amend the regulations in regard to immigration so that all immigrants must have a certain amount of money in their possession before being allowed to land.

HEAD-ON COLLISION

WHITE RIVER JUNCTION, Vermont, Sept. 17.—A fearful head-on collision between the southbound Quebec express and a northbound freight train on the Concord division of the Boston and Maine railroad occurred four miles north of the Canaan station early Sunday morning, due to a mistake in a train dispatcher's order, and from a demolished passenger coach there was taken out 22 dead and dying and 27 other passengers, most of them seriously injured. Nearly all those who were in the death car were returning from a fair at Sherbrooke, Que., 60 miles north.

The conductor of the freight train was given to understand that he had time to reach a siding by the night operator at Canaan station, receiving, according to the superintendent of the division, a copy of a telegraph order from the train dispatcher at Concord which confused the train numbers 30 and 34. The wreck occurred just after the express had rounded into a straight stretch of track, but owing to the early morning mist neither engineer saw the other's headlight until too late.

GREAT AID TO RAILWAYS

Electric Device for Preventing Collisions, Derailments, Etc

MONCTON, N. B., Sept. 13.—The system of electric signals installed by the Standard Signal Company of Toronto, on the Intercolonial Railway between Moncton and Paines Junction, for the purpose of a practical demonstration was given its first test yesterday afternoon in the presence of officials of the company and of the Intercolonial.

The system is intended to automatically assist in the running of trains and to prevent rear-end collisions and collisions on single track, derailments, broken rails, misplaced switches or open draw bridges. Three trains were used in the test and the signals worked perfectly, the trains being brought to a standstill immediately upon entering the block in which another train was moving. The tests consisted of a train following another, head-on, and a train standing on the track while another was approaching.

OPERA HOUSE

"The Denver Express," with a strong dramatic story, nicely told, plenty of neat, up-to-date specialties and a wealth of beautiful scenery and mechanical effects, the "Denver Express" certainly contains every element of the successful melodrama. No more beautiful stage picture can be conceived than the first act setting, representing a valley in the heart of the Rocky Mountains at sunrise, and no more startling sensational effect was ever introduced than the attack of the redskins on a band of emigrants which occurs at the climax of the act. The wonderful railroad effect and the fight for life in the last act are also features worthy of special attention. The "Denver Express" will be at the Opera House on Thursday, September 19th.

EDITORS MEET

Alberta Press Association at Cranbrook—B. C. Embraced—Important Resolutions.

CRANBROOK, Sept. 17.—The fourth annual convention of the Alberta Press Association opened in the opera house here on Friday last. Owing to severe storms in southern Alberta many members were unable to attend, but when the convention opened some score or more editors of Alberta and British Columbia papers were in attendance.

Cranbrook had made elaborate preparations for the entertainment of the visitors.

The convention was called to order by President Simpson when an address of welcome was delivered by alderman Fink, in the unavoidable absence of mayor Findlay, and replied to on behalf of the association by D. H. Elton, of Cardston, Alberta.

The president's annual address followed a forcible plea for greater co-operation among publishers. Brief talks by two veteran newspapermen, Dr. Watto, of Fort Steele, and A. B. Grace, of Cranbrook, followed. T. B. Thomas of the Camrose, Alberta Mail, gave a breezy address on "What makes a country weekly pay." Next came a short talk by F. J. Deane of The Daily News, Nelson, on "Moral courage of editors."

The hour being late the election of officers was then proceeded with, resulting as follows: Hon. president, F. E. Simpson, Cranbrook; president, D. H. Elton, Cardston; first vice-president, F. J. Deane, Nelson; second vice-president, A. D. Watt, Edmonton; third vice-president, J. A. Ker, Leduc, Alberta; secretary, B. Thomas, Camrose, Alberta; executive committee, W. L. Amy, Medicine Hat; Bob Edwards, Calgary; F. G. Foster, Medicine Hat; E. J. Fream, Innisfail, Alberta; A. B. Grace, Cranbrook.

The place of the next annual meeting was the next item on the program. F. J. Deane invited the convention to Nelson. T. B. Thomas put forward Camrose as the meeting place. On a ballot being taken Nelson was selected.

On a motion to change the name of the association it was agreed upon to change from the Alberta Press Association to the Alberta and Eastern British Columbia Press Association. The convention then adjourned.

In the evening the visitors were entertained at a smoking concert in the opera house by the business men of Cranbrook.

The twenty-five editors and their families, in charge of F. E. Simpson, arrived in Revelstoke on Sunday night and left Monday on No. 96 for Calgary and return, via Crow's Nest. Mr. Simpson stated that the convention had been in every way satisfactory, and said that much material good would result when the newspapermen throughout the west were in co-operation.

Much of the time of the closing session, on board the s.s. Kuskanook, was taken up with the discussion of questions affecting the business interests of publishers, and steps were taken looking to the formulation of plans that will unite the publishers of the west in mutual efforts for the protection of their business interests. In particular attention was paid to the foreign advertising question and the best methods of protecting publishers from the agency "graft."

An important progressive move was made in arranging that the secretary of the association should hereafter act on behalf of all publishers, members of the association, in cases of fraud and non-payment of accounts by advertising agencies. It is hoped that hereafter the frauds too frequently worked upon the unsuspecting publishers by mushroom agencies will be prevented. Among other resolutions of interest to publishers, the following of special moment were adopted:

"Whereas the press of Alberta and eastern British Columbia covers a territory in which it is daily becoming more necessary that there be efficient dissemination of views and thoughts loyal to the Dominion and Empire, a necessity occasioned more particularly by the immigration of persons of all nationalities, and whereas such views and thoughts properly disseminated must assist most materially in the rapid development of such territory on lines tending to promote a fit and proper national spirit.

"Therefore, be it resolved that the newspapers of this territory, being the factor in creating and moulding public sentiment, here as elsewhere throughout the civilized world, should receive every encouragement from and the hearty co-operation of the C.P.R. telegraphic service.

"And be it further resolved, that the C.P.R., a corporation vitally concerned in this development and to a very large extent controlling the news service of the west, should supply at reasonable figures a more adequate and more intelligent service, facilitating the circulation of Canadian and British news in particular, the present service being unanimously considered both prohibitive in price and lacking in the aforesaid essentials."

The Albertan editors were delighted with what they saw in British Columbia and this province will hereafter have no warmer friends and advocates than the Alberta members of this rapidly growing press association.

REVENUE GREATEST YET

Million and a Quarter Received from that Source

The total revenue from timber for the fiscal year which ended June 30th last, amounted to \$1,271,220, by long odds the highest figure which has been reached in the history of the province. Never before has the activity been so great and it is expected that if the present activity keeps up the revenue from all sources connected with timber for the present fiscal year will amount to fully \$1,500,000. Licenses are being issued as fast as the department can prepare them. In one month recently over \$1,000 were issued. Last month over 800 were issued and it is thought that the total for the present month will be greater than the present figure. The department has sufficient applications in for timber licenses to keep them busy for the next three or four months. The licence fee levied for timber lands east of the Cascades is \$115 per square mile or 640 acres, and \$140 for timber land west of the Cascades.

In the fiscal year ended the total collections for timber licences amounted to \$893,349.77. This represents about 7,150 licences issued which would represent timber land to the extent of nearly four million and a half acres staked.

The revenue from timber licences was the greatest during the month of May of the present year, when \$120,000,820 was collected from this source alone. In November, 1906, \$105,358.80 was collected from the same source. Last June the provincial exchequer was enriched by \$100,881, also from timber licences.

The second source of revenue in connection with timber comes from timber royalties.

For the fiscal year, ending June 30, \$252,877 was collected. The heaviest revenue for the year was in July, 1906, when some \$51,737 was received. In January of the present year the returns show \$41,136.

From timber leases the revenue for the year amounted to \$95,219.90.

At the present time the timber boom has not in the slightest degree fallen off. There are more cruisers in the woods than there were two months ago. The demand for timber lands is greater than ever and every day sees the influx of fresh capitalists looking for timber lands.

The movement in capital to this province is also strikingly demonstrated by the activity in connection with coal lands. The applications for coal licences have been very great during the fiscal year just ended and while within the last month the number has somewhat fallen off, it is expected that towards the close of the present month it will again commence.

For coal lands staked in East Kootenay 225 licences were issued. For coal lands in the rest of the province the number was 183. The revenue to the province from this source at the rate charged, \$100 per licence, amounted to \$40,800.

RECORD VOYAGE

The big Cunarder Lusitania has broken all records for trans-Atlantic travel, having reached New York last Thursday morning after a voyage of five days, 54 minutes, beating the Lusitania's and Teutland's records by nearly half a day. The log of the Lusitania gives her time of passage as 5 days and 54 minutes, and her time of arrival off the Sandy Hook lightship at 8.05 a.m. Her average speed was 23.01 knots per hour and the day's runs were in miles 536, 575, 570, 593 and 483 to the lightship, a total distance of 2,782 miles.

She will restore to Great Britain the distinction of possessing the swiftest ships on the ocean. The Lusitania's dimensions are—Length, 790 ft.; breadth, 88 ft.; depth (moulded), 80ft.; gross tonnage, 45,000 tons; load draught, 37 ft. 6 in.; When launched the Lusitania, as a mere shell, weighed 16,000 tons. When ready for sea, with 7,000 tons of coal for her boilers on board, she weighs 45,000 tons.

In order to reach the great sustained speed of 25 knots the Lusitania is propelled by turbine engines of 70,000 indicated horse-power, consuming over 3,000 tons of coal a day.

The Lusitania carries over 550 first-class, 500 second-class and 1,800 third-class passengers.

ON APEX AND CUPOLA

A resident of Banff, at present in this city, states that the Masonic lodge there is about to hold a mountain top meeting. The place selected is the top of Mt. Cascade and the time will be some time this month. It is stated that worshipful brothers from all over the country will assist at this novel meeting. This is not, however, altogether a new departure for the Masons of Banff, in as much as some time ago they held a similar meeting on the top of Tunnel mountain. It proved a great success and encourages them to repeat the feat this year.

EFFECTS OF BAD WEATHER.

Climatic conditions during the past week have been anything but encouraging and it seems as if the summer will end in a fiasco. Unusual and more or less severe weather has prevailed all over Canada, and Revelstoke has certainly had her share of the whims and fancies of nature. Bright or gloomy weather has much to do with the temperament of a community, which in like manner visibly affects the commercial life of the city. Everybody probably realizes that his or her mental condition depends to some extent upon the character of the weather. In gloomy weather we are of course apt to be depressed and in fair weather, exhilarated. When the atmosphere is stimulating the mental and physical energies are enhanced. Starting from those generally recognized facts, a well known scientist at Washington has made a study of the effects of the weather on human conduct, the results of which are rather surprising. He shows by a system of tabulation that misdeeds involving violence, such as assaults, are more common in bright weather, and that the same is true of suicides. On the other hand mental errors such as mistakes in bank figures are more common in rainy weather. The scientists inference is that the excess of energy produced by a bracing condition of the air is responsible for more violence than is the "ugly temper" caused by bad weather, because the latter while lowering the spirits, diminishes the activity of men.

THE WHITE DEATH

British Columbia is to have the most advanced appliances for fighting consumption of any State, province, or country in the world if only funds are available to do the work proposed. By the establishment of a sanitarium at Kamloops the first great step has been made. The money subscribed has nearly all been turned in and Dr. Fagan is now on the ground preparing to receive the first patients. As to the best methods of destroying or coping with the fatal scourge, much has been suggested, and there appears

to be no reason why if a perfect hygienic system were adopted, it should not become a hideous memory of the past in two or three generations. Heredity and contagion are both fertile sources for contraction, and to overcome these difficulties legislation should be made to compel the registration of all tuberculous persons who are in the advanced stage of the disease, for in its incipience it is almost impossible to detect its existence. Compulsory medical examination at intervals of five years between the ages of seven and thirty-five would go a long way in giving and insuring a clear bill of health. Open air treatment is perhaps the best possible remedy, and if properly regulated should have beneficial results. Thorough ventilation in the sanitarium at Kamloops will be the aim of Dr. Fagan and an open grate in which a fire is kept burning is one of the best ventilators and for this reason open grates will be installed whenever possible. The strict observance of the salutary authority of Canadian public health officers in quarantining families or persons suffering from smallpox or diphtheria has saved many lives and checked not a few epidemics in every province and city. Tuberculosis being transmitted from person to person by contact, it is thus clear that stricter supervision will soon have the effect of lessening the number of victims. Another important side of this question is the arrangement for medical inspection pupils in all schools. By this means the parents of children who have unwittingly contracted the first stages of tuberculosis or those whose physical condition is at a low ebb could be warned of their danger and possibly be saved from an untimely grave. Stupidity among children is not so common as is supposed. Tests have showed that "dull children" have had some affection of sight or hearing and incorrigibles often physically defective. Thus if a periodical examination of all school children was held, it would detect any signs of physical degeneration which might dull the nerves and brain faculties and also detect signs of tuberculosis and thus check what might be a chain of untimely deaths. Cost has been brought up as a bar to the carrying out of these precautionary measures, but it is high time that the public ceased wondering whether or not it is wise to expend money in saving life.

CORRESPONDENCE

Editor MAIL-HERALD. SIR.—For a year past I have heard of nothing but Revelstoke, and I seem to know both the town and its people. I used to hear occasionally of Montreal or Toronto, but not a word of late; its all Revelstoke now. The fact is, sir, we have had two Revels over here for nearly a year, and I can assure you we have had sounds of revelry by night, and day too, during that time.

The MAIL-HERALD keeps me well posted up with your news, and our P.P.C. albums are full of views of your beautiful town and its still more beautiful surroundings. Your issue of August 7th is just to hand, and contains much interesting information of the continued progress and prosperity of your town. I note, too, that the distance from Bolton to Revelstoke is perceptibly diminishing, and that the latest "Over-seas Mail" has beaten the record by 13 hours. All this, together with the many friends and relations I have among the Revels—for so I must describe them after my experience of the two who have been here—has prompted me to send my hearty and sincere congratulations on your success, which is after all only the just reward for the labor, energy and perseverance displayed by the colonists for more than half a century. Our school children over here, however, will soon begin to complain of the increasing difficulty of learning Canadian geography. Thus, according to a young Reveler's notebook which I saw recently, the peaks in the Rockies are Begbie (near Revelstoke), Hooker and Brown; the most noted canyon is the Albert Canyon (a few leagues from Revelstoke); the chief river is the Columbia, flowing by the fine city of Revelstoke; and among the many large and important centres of population may be mentioned Revelstoke, Vancouver, etc., etc.; while the Canadian Press, admirably represented by the MAIL-HERALD, published at Revelstoke circulates over a sphere of some 4,000 miles radius, and is read with pleasure and profit by friends and relations of the Revels even at Bolton, Lancashire, England, Europe, Earth, which is the way some of our letters come addressed; whereas our replies bear the simple inscription, "Box 676, Revelstoke, Canada." For a place 6,000 miles distant this speaks volumes. "Not to know Revelstoke is to argue one's self unknown," at least this was the impression left after reading the young Reveler's notebook, every page of which was adorned with Maple leaves, and contained one or more appropriate lines from the owner's favorite recitation, "My Own Canadian Home—Revelstoke." While your climate, sir, can

inspire such intense enthusiasm for your mountain city, Revels never need fear extinction. We shall always be happy to see any who come our way, and if we ever travel west there is no destination so likely for us as under the shadow of Mount Begbie, in the city of the Revels. Yours faithfully, A. BOLTONIAN. From N. B. Stringfellow, Kildgway's Endowed School, Bolton, Lancashire, England August 29th, 1907.

McKINNON & SUTHERLAND Revelstoke, B. C. LIBRARY VOTING CONTEST 100 VOLUMES AND CASE

LIBRARY VOTING CONTEST

100 VOLUMES AND CASE

BELOW will be found the names of some of the progressive firms in Revelstoke who make this most popular and liberal offer: This elegant library and handsome case will be given by vote to the Lodge, Society, Church or School in Revelstoke securing the largest number of votes in the following manner: The business men listed below will give with EACH TEN CENT PURCHASE one vote. The contest begins Sept. 9th and ends Feb. 9th, 1908. A ballot box has been placed in the Canada Drug & Book Store where the votes are to be deposited. At the close of the contest the church, school, society or lodge having the largest number of votes will be awarded the library. Current accounts when promptly paid will be entitled to votes. Remember, votes can only be secured by trading with the merchants listed below. Each week the MAIL-HERALD will announce the standing of the contestant. The library and case are now on exhibition in the show window of C. B. Hume & Co.

Table listing participating businesses for the library contest: C. B. HUME & CO. (Groceries, Drygoods, Crockery, Men's Furnishings, Boots and Shoes, House Furnishings); BOUBNE BROS. (Coupons given on Hardware only); CANADIAN DRUG & BOOK COMPANY, LTD. (Cigars, Tobacco, etc.); P. THE LATEST FALL STYLES

REID & YOUNG

Y. M. C. A. SOCIAL.

One of the best and most successful socials ever held in the Y. M. C. A. took place last evening in the parlors under the auspices of the Ladies Auxiliary. During the afternoon tea and refreshments had been served while special attention had been given to the amusements for the little folks, with candy stalls and fish ponds. In the evening the parlors were filled to their capacity, tea, coffee and other dainties being well patronized. An able reception committee did the honors to the visitors. The chief amusements of the evening were the bowling basket ball and swimming races, these latter causing keen interest, all available space round the swimming pool being taken by onlookers. Some good diving and exhibition swimming was done by several members of the association. Music was supplied by the Independent Band, which had its customary crowd of admirers. The bowling match, married vs. single men, attracted considerable interest, the married men coming out on top by the small margin of 14 pins:

Married	Single

METHODIST CHURCH

The annual meeting of the Methodist church Sunday School Board was held on Wednesday evening, Sept. 11, at the close of Prayer meeting. The officers of the school gave verbal reports which were very satisfactory. The Library has been renewed and abundance of Sunday school periodicals, among the best published in America, are distributed each Sunday.

The finances of the school are in splendid condition. The important work done at the meeting was the election of officers and teachers for the ensuing term. Miss Atkinson was elected as superintendent to supply that office left vacant by the resignation of Mr. R. Howson. Mr. Alfred Hadler was elected assistant superintendent. An excellent staff of other officers and teachers were nominated by the superintendent elect, and appointed to the several classes.

A welcome is extended by the pastor to any of the young people not attending any other Sunday school, to come to his Bible class on each Sunday afternoon at 2:30.

A very pleasing event happened near the close of school hour on last Sunday, when Miss Atkinson, on behalf of the Sunday school and those interested in its welfare, read a beautiful address, and Miss Manson presented to Mr. and Mrs. Howson, ten volumes of Hugo's works, as tokens of appreciation for the untiring services of the past years.

Taken by surprise, Mr. Howson replied very feelingly, expressing the ardent wishes of himself and Mrs. Howson for the welfare of the church.

RE-OPEN MONARCH MINE

The Canadian Concentrating & Smelting Co. intend re-opening the Monarch mine at Field, and will at once erect an aerial tramway. The company has a carload of tramway timbers all ready framed, on the way from Vancouver.

After the location of the upper and lower terminals have been decided upon, rock work will be at once started for the foundations and as the tramway is installed the company will ship ore to one of the Kootenay smelters.

For the present the zinc ore will be held at the mine pending the completion of the concentrating plant, the machinery for which has been purchased and will arrive during the next few months.

A. Wheeler, the secretary of the company, is now at the mine in order to push operations in the construction of the tramway.

LESS LOG PRODUCTION

Andrew Haslam, supervisor of log scalers, has furnished figures which show that the log production of the British Columbia coast fell off 13,000,000 feet during the month of August as compared with July. The reduction of output was caused principally by the poor demand for anything except number one timber. The August returns were 41,175,291 feet, and for July they were 54,000,000 feet in round numbers. However, the production for August of this year was much better than that of last year.

WEATHER FORECAST

Wednesday, Sept. 18.—For 24 hours: Unsettled; cloudy and rain; frosty, cool nights; moderate winds; temp. max. 52 deg., min. 40 deg.

Local and General.

Saturday was the 148th anniversary of the capture of Quebec.
