Nelson Daily Miner.

Daily Edition No. 1167 — Nelson, British Columbia, Thursday, October 17, 1901 — Eleventh Year

DO NOT WANT AN INQUIRY

Injunctions Asked to Stop Montreal Bribery Investigations.

Remarkable Surgical Operation.—To Attack Ice Bridge.

Montreal, Oct. 16.—The harbor board today decide to ask the government to place the Lord Stanley in the St. Lawrence river this winter to endeavor to keep the Cape Rouge ice bridge from forming. Success would mean two weeks of additional navigation in spring at Montreal

A. C. Lariviere, the well known carriage builder, is dead.

Miss Thomson, of St. John, will play Miss Young of Montreal tomorrow for the ladies' golf championship of Canada. This mornings' contest in the semi-finals between Miss Thomson and Miss Marlor, Montreal, was one of the most interesting of the tournament. Miss Thomson only winning out after two extra holes had been played, defeating Miss Marlor only after that lady had held the victory well in hand.

Suit was entered today by Ryan & Macdonnel, contractors, against McKenzie, Mann & Co., and Daniel Mann personally, for sums aggregating $195,154.97. In July, 1899, Ryan & Macdonnel took over the contract which Messrs MacKenzie, Mann & Co. had received from the government of Nova Scotia for building the Inveress & Richmond railway in Cape Breton. If the work were not finished by December, 1900, defendants were to take over plant and continue work This they did. Plaintiffs allege that they were not able to carry out their contract because of delays caused by the defendants.

Fire tonight did $10,000 damage to the cheese warehouse of A. A. Ayer & Co. The building contained $500,000 worth of cheese. Further damage done by smoke and water cannot be estimated until an examination is made but will be considerable. Building and contents were fully covered by insurance.

Some time ago the nine year old son of R. Mitchell of this city was injured in a railway accident. In order that the railway accident wounds might be skinned over his sister Matilda, seventeen years of age, offered herself as a subject and today at the general hospital, 60 square inches of cuticle was removed from her body and grafted upon her brother's body. The operation was one of the most extensive ever performed.

An injunction is to be taken out against the investigation ordered by the city council into the charge made by Alderman Clearihue that an attempt has been made to bribe him in connection with awarding the recent electric light contract. This action has deepened the impression that it is necessary to get to the bottom of the matter.

JEWEL MINE SHIPPING.

A Cook Found Dead--Profits From Fruit Growing.

(SPECIAL TO THE MINER.)

Grand Forks, Oct. 16.—Chas. Hulett, a cook employed at one of the construction camps of the Republic & Grand Forks railway near this city was found dead in bed yesterday. A verdict of death from natural causes was returned by the coroner's jury.

The Jewel mine, Long Lake camp, has constracted to deliver 150 tons of ore to the Granby smelter.

John Lane, of this city, has been awarded the contract for building all the bridges and trestles on the Republic & Grand Forks railway between the boundary line and Curlew lake, a distance of 19 miles.

W. S. Stout, general manager of the Dominion Express company, was here yesterday on a tour of inspection.

The ranch and fruit farm of W. H. Covert near this city is one of the show places of the Kettle river valley. Mr. Covert estimated that the gross revenue from the sale of his fruit, grain and root crops, this season, will be about $17,000 Inside of five years he expects to have over 11,000 bearing [illegible] this year have [illegible] Prunes, 3c per lb.; apples, 5c; pears, 8c, and plums, 10c. All his output has been sold locally.

Provincial Library

NEW MARKET RACES.

London, Oct. 16.—At the Newmarket races today the Americans, both owners and jockeys, had a most successful day. Kearsarge, (Maher) won a maiden (entry) two-year old stakes, of five sovereigns each for starters with 100 sovereigns added, distance five furlongs. W. C. Whitney's Spectrum, (J. Rieff) won the select stakes of 20 sovereigns each for starters with 200 sovereigns added. Dundonald, (Jenkins) won the autumn handicap of 10 sovereigns each for starters with 200 sovereigns added. J. R. Keene's Charoenac (Maher) won the Kennet plate of 200 sovereigns; E. Corrigan's Lute, (Thorpe) was second and Frank Gardner's Monsieur De Lorme, (Jenkins) third. All the winning horses and jockeys in this race being Americans.

U. S. SCHOOL POPULATION.

Washington, Oct. 16.—About 21 per cent. of the total population of the United States attended public schools and about two per cent. of rest private schools, according to the annual report of the commissioner of education. The grand total in all schools, elementary, secondary and higher, public and private for the year ending July 1st, 1900, was 17,020,706 pupils, an increase of 282,345 over the previous year.

MAKING A NEW RECORD.

New York, Oct. 16.—The new French liner La Savoie bound from New York for Havre was reported by cable as passing the Lizard head on the southwestern coast of England at 7.50 o'clock this evening. She is making a fast trip and it is estimated that she will cut down her fastest time, six days, 13 hours and two minutes, which beats the record between New York and Havre by about one and half hours.

HIS DESERTS OR NOTHING.

Kingston, Oct. 16.—Lieut.-Col. Hudon refused to accept the South African medal. He says that officers, his junior, who had seen little or no service were decorated with the C. M G. or raised a grade, while he, who fought at the front was not remembered except by receiving a medal such as was given to ordinary soldiers. Lieut.-Col. Hudon commanded C battery, which marched through Rhodesia and participated in the relief of Mafeking.

FATAL GASOLINE EXPLOSION.

Bangor, Me., Oct. 16.—A terrific explosion presumably of gasoline in the second floor kitchen of Nathaniel Ludd's restaurant on Harlo street this afternoon brought also immediate death to Miss Henry, whose apartments adjoined, and Mrs. Mary F Corrigan, the second cook, and fatally burned John Barry a waiter. The explosion wrecked two floors and falling debris caused minor injuries to a number of people.

OBSTREPEROUS STUDENTS.

Vienna, Oct. 16 —The Neus Abendblatt reports that there has been rioting in Kicheneff, Bessarabia, where 1,000 students attacked and wrecked the house of the governor, the headquarters of the police and the office of the official gazette. Many encounters took place between the students and the police and 11 persons were killed and 36 injured.

CIRCUS MAN ON TRIAL.

Ballston, N. Y., Oct. 16.—Jos. C. Banks of Waterloo, N. Y., was arraigned in the Supreme court on an indictment for murder in the first degree in shooting and instantly killing Herbert G. Tackabery, of Ottawa, at Saratoga Springs, on August 16th. Banks was superintendent of a circus and Tackabery a discharged employe, and it is thought that jealousy was the cause of the quarrel and shooting. Banks pleaded not guilty, and asserts the shooting was in self defense

TORONTO'S MANY VISITORS.

Toronto, Oct. 16.—During the two days of the Royal visit the railways brought twelve thousand visitors into the city besides 11,000 volunteers. This does not include regular traffic.

RUSSIAN DIPLOMACY

M. Lessar Using Li Hung Chang to Accomplish His Ends.

Russia Seeks to Legalize Her Occupation of Manchuria.

London, Oct. 17.—The new Manchurian convention which has been the subject of negotiations between M. Paul Lessar, Russian minister to China, and Li Hung Chang, is on the same lines as the convention which Russia withdrew on April 15th, says the Pekin correspondent of the Times, but it is more cleverly worded so as to save China's face. The correspondent continues. In consequence of previous disclosures a jealous secrecy has been observed; but the important negotiations by which Russia seeks to legalize her occupation of Manchuria have been entrusted to Li Hung Chang, who can be better trusted to serve Russian interests than any other Chinese statesman. Prince Chang is indignant because he has been kept in ignorance and both the Yang-Tse viceroys have protested against the negotiations. The same powerful opposition that was employed before is again endeavoring to prevent the signature of the convention but Russia's promise to restore the railway from Shan Hai Kwan to Nieu Chang is a po erful lever in the hands of M. Lessar.

TRIENNIAL CONVENTION.

Change in the Name of the Church Up For Discussion.

San Francisco, Oct. 16.—Considerable routine business was transacted at today's session of the Triennial Episcopal convention, a new bishop was elected and in the house of deputies there was an animated debate on the proposition to change the national name of the church. This question did not come up as a direct issue but, on a motion to consider a report of the house of bishops creating a joint commission to which the subject should be referred. There was much division of sentiment in regard to the matter. A proposal to refuse to consider the question in any form was strongly supported, but this, it was argued, would fail to show proper respect to the house of bishops. Finally, the reference of the subject to a joint committee was agreed upon.

No further action will be taken until the meeting of the general conventin in 1904. The house of deputies unanimously elected Dr. Cameron Mann, of Kansas City, to be missionary bishop of North Dakota. The Huntington amendment to article 10 of the constitution adopted yesterday by the house of deputies, was not concurred in by the bishops.

The rooms of the Women's Auxiliary were closed this evening in respect to the memory of the honorary secretary, Mrs. Mary A. E. Twing, of New York, whose funeral was held from St. Luke's church. There was a reception at the Japanese mission this afternoon and tonight Bishop Howe of Alaska addressed a missionary meeting at the Cathedral church of Good Samaritan.

STAY IN NEWFOUNDLAND.

St. John's, Nfld., Oct. 16.—The Duke of Cornwall and York by a telegram from Canada, makes large alterations in the programme for his reception in St. John's next week, virtually compressing the whole affair into a few hours. The royal yacht Ophir will arrive Wednesday afternoon, October 24th, but the Duke will not land until 11 o'clock the next morning, when the functions will be hurried through. The state banquet will be given in the evening and the Ophir will sail for England Friday morning.

CONSPIRACY ALLEGED.

Sarnia, Ont., Oct. 16.—The trial of the case of Miss Victoria Middleton against Dr. Williamson, both of Sarnia, opened here today. Miss Middleton asks $15,000 damages and alleges grievous offences. The doctor alleges the case is a conspiracy.

JAPANESE ACTIVITIES

Preparing for Military Review.—A Mysterious Voyage.

Russian Encroachments in Corea.—Slave Girl Becomes Empress.

Victoria, Oct. 16.—The autumn manoeuvres of the Japanese army, according to advices brought by the Empress will take place on November 1th and on the following day there will be a grand review of 15,000 troops before the Emperor.

The Japanese Daily Mail publishes a statement to the effect that Russian officers have been urging Corea to fortify the coast of the peninsula, and have offered to supply money for the purpose without interest.

The Emperor of Corea has invited the foreign representatives to an entertainment to be given on October 23, when Lady Om will be introduced as the new empress. Lady Om was a slave girl rescued from the captured pirates by the Corean court. The Tokio Asahi is authority for the statement that a pirate ship has left Formosa under command of Mr. Okamura a former officer of the Japanese army, with a crew of ten Japanese including one former officer of the navy and ex-gendarmes and sub-officers of the navy. There are also some Chinese on the vessel which the Asahi says it is the intention to throw overboard as soon as the vessel gets to sea.

It is said by papers received by the Empress of Japan that as China has no longer any ports in the north it has been proposed to amalgamate the northern and southern armies and navies. The southern viceroys have objected on the ground that they have not the necessary money and in consequence the forces have been greatly decreased.

VICTORIA GOSSIP.

Big Gold Finds in Klondike—Hermann's Valet Arrested.

(SPECIAL TO THE MINER.)

Victoria, Oct. 16.—The funeral of the late Gunner Clinnick, shot in barracks at Work Point on Sunday night, took place yesterday afternoon from the Station hospital. The gun carriage was covered with wreaths sent by officers and ladies, by R. E. R. G. A., and sergeant's mess of which deceased was a member. The band from the flagship attended and the burial took place in the new Military cemetery.

The preliminary hearing of Sapper Gill today seemed to bear out the ugly rumors that his act was due to the belief that Mahoney had involved him during a drunken spree in an unatural offence. To one of the guards who arrested him Gill said he would rather die than be dishonored. It is said that Gill was constantly annoyed by fellow soldiers by constant reference to this. Gill was committed for trial.

On the arrival of the San Francisco steamer this morning, the police acting on advice from San Francisco chief of police arrested Bessie Vincent, aged 16, and Sadie Creek, or Hay, aged 17, who were in charge of a Vancouver Dupont street procuress, Blanche Lewis. The girls will be returned to San Francisco.

At the outer wharf this morning, the negro valet of Hermann, the magician, was arrested for stealing a purse from a woman.

Captain Joly and Captain Nanton, son and son-in-law of Lieuenant-Governor Joly, both in Girouard's staff, have been made majors.

Walter Morris, one of the best known cannerymen of the province, died at 2 o'clock this morning from typhoid fever. He opposed C. E. Redfern for mayor two years ago. He was a very prominent Methodist and temperance man

One of the C. P. R. officials down to meet the R. M. S. Empress yesterday, stated that the contract for the ironwork for the new ferry boat to run between Vancouver and Victoria had been let to the Bertrams of Toronto. The hull will be on the lines of the Toronto, of the Richelieu and Ontario fleet.

Ernest Stevens, the boy who a couple of weeks ago shot Jacob Hazenfratz with a pea gun, inflicting a wound which is was at first thought would result fatally, was today committed for trial on the charge of attempted murder.

Advices from the north are to the effect that big money is being made on Big Salmon river. Five men have been taking out an average of $1,700 a day and on one occasion took out $10,000 in three days. A big strike has also been made on Conglomerate creek in the Klondike and miners declare that a second gold run has been discovered.

On his return to Dawson, Governor Ross, gave an interivew to the Yukon Sun in which he said that Hon. Mr. Sifton, would visit the district early in the spring.

LOST AN ARM.

(SPECIAL TO THE MINER.)

Kaslo, Oct. 16.—Alex Matheson, was brought down from the Arrowhead-Lardo railway this aftrnoon in an open boat with an arm severely lacerated by the tracklaying machine. Dr. Harkin found amputation at the shoulder necessary. Matheson when in the act of reaching for a lever had his arm caught in a revolving shaft and was drawn round by it several times. The arm was shattered from the wrist to the shoulder.

FIND ON THE WONDERFUL.

A quite remarkable strike has been made on the Wonderful near Sandon. A few days ago some loose earth slid down into the old sluiceway exposing a large ledge about 40 feet above the No. 2 tunnel. This ledge is 12 feet wide and has a foot of carbonates on either side. The ore has been struck from the No. 2 tunnel thus proving it to a depth of 50 feet. Mr. Warner has spent most of the summer exploring the surface and though he has found ore in many places, it was not till now that he was sure of coming on the main ledge of the property. Men have been put to work stripping the ledge and sacking the carbonates. A crosscut will be run from No. 2 tunnel. On the Wonderful ore has been found in many places and there are considerable bodies that will have to be concentrated but no mill has yet been erected. This is the mine from which a large quantity of ore was taken by means of sluicing and it therefore has the distinction of being, so far as known, the only mine in which silver ore was procured by hydraulic operations.

AN EDUCATIONAL CENTRE.

The public school trustees have outlined a progressive scheme for the schools of Nelson. After the new year the schools will be under full control of the city, which will have to bear all the running expenses less a per capita grant on the basis of average attendance from the provincial government. The school board will then consist of five members who will be elected at the same time as the municipal council. All the present board will then retire but are eligible for re-election. The new school building in course of erection will be completed in time for opening of school after the Christmas holidays. Of the four rooms the high school will occupy one while two of the others may for the present be devoted to public school purposes.

Dr. Arthur yesterday speaking of the plans of the board said that the members were anxious to make Nelson high school such as would attract pupils from all parts of the upper country and he thought that by this means the attendance would soon be enough to warrant the division of subjects taught into departments with a specialist at the head of each. In his opinion he would favor giving especial attention to science and even the practical knowledge of mining so that students of special branches would be attracted. Another matter he discussed was the establishment of a normal shcool in Nelson. The cost of sending a man up to take charge of the normal class at Nelson would be greater in the aggregate than requiring so many teachers to go to Vancouver or Victoria to reside for several months.

MEMORIAL FOR M'KINLEY.

Washington, Oct. 16.—President Roosevelt accepted today honorary membership in the William McKinley National Memorial Arch association and gave his approval to its purpose of erecting by national popular subscription, a memorial arch at Washington approach to the memorial bridge.

BREAD RIOTS IN RUSSIA

Municipal Buildings and Residences Burned by Peasants.

Bandit Mussolino Captured After a Two Year's Chase.

London, Oct. 16.—The Lemberg papers report bread riots a Tarsskova, Eastern Russia, says the Vienna correspondent of the Daily Mail. In Samara the starving peasants stormed the municipal buildings and the residences of wealthy persons setting some on fire. Troops were summoned and 14 peasants killed. Similar riots in which several persons were killed occurred at Andowesk, where two landowners had been murdered, and also at Pestrowandels, in the same district.

NOTORIOUS BANDIT TAKEN.

Rome, Oct. 16.—The notorious brigand Mussolino has been captured after a fierce resistance at Urbino. He had long occupied Calabria and is credited with having committed twenty-five murders. Owing to the sympathy shown him by the peasantry he had always escaped, despite the reward offered for his arrest. His career as an outlaw began two years ago when he was liberated from what he considered an unjust imprisonment. He vowed to kill the fifteen witnesses who were responsible for his conviction and he is said to have actually despatched twelve of them.

DECEIVERS ON TRIAL.

London, Oct. 16.—When the hearing of the charges against Theodore and Laura Jackson (Ann Odelia Diss de Bar) was resumed in the police court today the woman entered the dock dressed in spotless white. She placed her hands together before her face and closed her eyes in the attitude of prayer. The crowded court room was silent.

The hearing was devoted to testimony of the behavior of the male defendant towards a young woman who was the victims of the pair. The alleged deceptions were seemingly accompanied by hypnotic influences. As the prisoners left the dock they were hissed by the spectators. Jackson cried, "Keep quiet, you reptiles." The testimony was of such a character, that the London press, which usually prints verbatim reports of sensational trials, say that in this instance they are unable to do so.

INSURGENTS DEFEATED.

Colon, Oct. 16.—The situation on the isthmus of Panama is unchanged. News has been received here that the government has defeated the insurgents recently at Panoneme, killing a large number. Panoneme is now in the hands of the government. The government loss in the engagement was 40 killed and wounded, among the latter being Colonel Navia. By a recent decree all import duties in this department were doubled, ad valorem duties now being 20 per cent. All liquor duties have also been doubled.

BELFAST MAY CHALLENGE.

London, Oct. 17.—In response to an inquiry as to the report that he was the chairman of a syndicate of fourteen organized to challenge for the America's cup, John Erskine of Belfast says: The report is prematurely published and without my authority. I regret that I cannot afford further information just now.

REDUCING SPAIN'S ARMY.

Madrid, Oct. 16.—In the chamber of deputies today the minister of war, General Weyler, read a telegram from the captain general of Seville announcing that order had been restored there and that the city had resumed its usual aspect. General Weyler also introduced a bill reducing by 40,000 men the army enlistment for 1902.

KILLED BY FALLING CEILING.

Berlin, Oct. 16.—A terrible accident occurred in the Palmengarten, Leipsic, during a concert. A piece of the ceiling fell, killing a young woman outright and severely injuring several others.

LEARNING TO SHOOT STRAIGHT.

The South African war has demonstrated that the rifle is the most efficient weapon. Machine guns, small and large cannon are useful, under certain conditions, but to the rifle is credited the most effective execution as it kills and wounds more of the enemy and inflicts the most damage under a majority of conditions Its increased range and its capacity to kill at over a mile has changed the entire system of warfare so that men can no longer make frontal attacks in close order. The war has demonstrated, too, that other conditions being equal it is the best marksmen who win, for with the increased range there has come a necessity for hitting the enemy at a greater distance and hence the modern soldier must be a better marksman than his predecessor of a few decades since whose weapon was only effective at from 200 to 300 yards. This being the case it is no wonder that Tommy Atkins at the commencement of the hostilities in South Africa was at some little disadvantage as the Boers shot somewhat straighter than he did.

Lord Salisbury recognized from this that there was a necessity for better training in this direction and advised the British all over the empire to form rifle clubs in order that they might hit the mark. This good advise has been followed all over the empire and nowhere to a greater extent than in Canada. There are but few of the native born who do not know how to shoot and how to shoot straight. The majority have hunted more or less in their boyhood and manhood with both rifle and shotgun and of some it may truthfully be said that they have been raised with guns in their hands. The Canadian contingents, which went to South Africa, showed, if anything, that they were better shots than the Boers. The rifle clubs serve, however, to make still better marksmen of those who are fairly good and to greatly improve those who are only ordinary. By means of these clubs Canada will add largely to the number of her sharpshooters, as numbers have become interested through them who otherwise would not have done so. In case of an invasion Canada would have a larger number of citizens who are good shots than ever before and would be that much better fitted to cope with the invaders.

Nelson has a rifle club which is developing some good shots, which has just held its second annual tournament, which was an unqualified success. This was so much the case that it is intended to enlarge its scope and at the next annual meet the shooting will be participated by riflemen from the states to the south of British Columbia. This will give the event an international character, put the provincial participants on their mettle a some good scores should be made at this and future tournaments. We will learn something from them and they will learn something from us and the friendly rivalry is certain to greatly increase the good feeling which already exists between the two great branches of the same common stock. The practise will be beneficial, as it is simply carrying into effect the good old axiom, "In time of peace prepare for war."

LIGHT AND POWER.

In considering the question of the electric power for the city the matter of furnishing power for industrial enterprises, which is important, has been partially lost sight of in the prominence which is now being given to the question of electric lights. Nelson is already the wholesale centre of the Kootenays and Yale and this in time will naturally make it a manufacturing point of importance. Already a number of small manufacturing plants have been established here and these will grow and as the city increases in size others will follow. An important factor in the economy of these enterprises is cheap power. Electric power owing to its cheapness is preferable to steam energy. The municipality by augmenting the present electrical plant or by the construction of a larger plant would place itself in a position to furnish such power to any who might care to use it. For instance, if it could do so it probably could secure the contract for furnishing the Nelson tramway with power for propelling its cars. It would be to the interest of the city to sell the power to street car lines, factories, foundries and all who might need it a slightly above cost, for the reason that in so doing it would be adding to the importance of Nelson by fostering industries within the corporate limits. Naturally it could afford to furnish power cheaper than could a private corporation, because the latter would certainly endeavor to earn large dividends for its shareholders. The city should, as soon as it can with advantage do so, erect a plant at some point on the Kootenay river so as to place itself in a position to furnish all the lights and power that in the future may be needed. Such a plant would not only yield a profit but would add more than any other venture in which the city could embrak, to the material advantage of the city.

There is an indirect benefit about cheap lights and water which is sometimes lost sight of. They make living cheaper in a city which has such advantages, make it a more desirable residence place, tend to increase the population, and are favorable to the investment of capital because capital is certain of larger returns in place so favored. Nelson is in position to fully control these utilites and should not for a moment neglect the opportunity.

EDITORIAL NOTES.

The Toronto World has the following words in favor of public ownership: "The principle of public ownership may be ridiculed by corporations and light-weight politicians, but facts speak for themselves. The city which has had most experience in the direction of public ownership is the strongest advocate of the principle. In Glasgow they kown whereof they speak. The city's recent installation of a great municipal telephone plant more than offsets all the arguments that are urgd against municipalization. The municipalization of the telephone in Glasgow follows as a matter of course upon the success of the principle of public ownership applied to electric and gas lighting, the operation of street cars, public laundries and various other services."

It seems that the field is open for the Mackay company to construct a Pacific cable without any legislation by the congress or any action on the part of the executive department, says the Minneapolis Tribune, U. S. Attorney-General Knox has decided that any ocean cable can obtain, under the general law, the same landing rights on any American islands that have been secured by the Atlantic cables on the American coast. There is no reason, then, if the commercial company is in earnest, why it should not go ahead with its plan. Probably congress could pass special obstructive legislation, but it is hardly conceivable that it should do this. There could be no ground for such action, except obvious favoritism to other private companies that desire subsidies, or the intention to build a governmentt cable. It would be offensive to assume that any member of congress wishes to obstruct the building of a private cable without subsidy It is quite possible to understand that some members of congress might honestly prefer a government cable to a private cable. The experience of the world, however, points the other way, and the majority of congressmen are not likely to ignore this. Statistics show 15,000 miles of ocean cable owned by private corporations to 20,000 owned by governments. It is probable, therefore, that the Commercial company will have an opportunity to prove its willingness to provide cable service between the Philippines and the United States.

WOMEN AND JEWELS.

Jewels, candy, flowers, man—that is the order of a woman's preferences. Jewels form a magnet of mighty power to the average woman. Even that greatest of all jewels, health, is often ruined in the strenuous efforts to make or save the money to purchase them. If a woman will risk her health to get a coveted gem, then let her fortify herself against the insidious consequences of coughs, colds and bronchial affections by the regular use of Dr. Boschee's German Syrup. It will promptly arrest consumption its early stages and heal the affected lungs and bronchial tubes and drive the dread disease from the system. It is not a cure all, but it is a certain cure for coughs, colds and all bronchial troubles. You can get Dr. G. D. Green's reliable remedies at W F. Teetzel & Co. Get Green's Special Almanac.

If you don't like Blue Ribbon Tea it's because you never tasted it.

MINING NEWS.

W. H. Blakemore, managing director of the company opening up the great iron deposits at Kitchener arrived in Nelson yesterday, and leaves this morning for Rossland. In conversation with a Miner reporter Mr. Blakemore stated that the working force on the property had just been doubled. It was the intention of his company to push the work of developing the ledges with all possible vigor while the present fine weather lasted and through as much of November as the snow would permit. When the snow sets in all work would be shut down for the winter, but it is hoped that this will not occur before the last of November. The development work so far done on the property consists principally of diamond drilling and open cuts, which have proved the continuity of the veins of iron. At present two shafts are being sunk on a ledge of solid iron ore twenty feet in width, which runs from 65 to 75 per cent. in pure metallic iron. One shaft is down 30 feet and and the other, which was started but a few days ago, is down ten feet. A. R. Heyland is surveying the whole property on which application will be made for a crown grant on the completion of the survey. On the mountain on which this property is located over forty claims have been staked this season on all of which veins of iron have been found. There is a large number of prospectors at work in the vicinity, and considerable work has been done on several groups of claims near Kitchener.

There is a probability of a bond being taken on the Harris and Fisher groups on White Grouse mountain by an American syndicate.

At Kitchener a number of town lots have been sold and several new stores put in.

Eugene Croteau, secretary of the Cascade Gold Mining company, was in town yesterday from Rossland. The Cascade company owns three mineral claims located six miles from Hamill creek station on the Columbia & Western railway. Mr. Croteau reports that recent developments on the Cascade group have given the most satisfactory results and reveal that it has the makings of a mine of more than ordinary importance. A five foot ledge has been drifted for a distance of 75 feet and at a depth of over 100 feet by means of a drift tunnel and shaft. Careful sampling made at the Granby smelter shows that the ore will average $26 to the ton, principally in gold. An upraise is being made from the tunnel to connect with the shaft and when this is completed there will be sufficient ore in sight to keep up the shipments all winter at the rate of 20 tons per day. A wagon road is being made and will be completed in ten days from Twenty-Mile station. This road was built by the government at a cost of $6,000. When the road is finished the shipments will be commenced and kept up continuously. The smelters have offered a very low rate, for reducing this ore on account of the large quantity of limestone in it. The haul to the smelter from the station will cost $1 per ton and it is thought the ore can be hauled from the mine to the railway for $2.50 a ton. There are a number of other claims near the Cascade of considerable promise.

The Bayonne claim in the Ymir district, upon which the strike of free milling-gold ore was recently made, has been sold for $40,000 to eastern parties. About six weeks ago a nine-foot ledge of free gold ore was encountered on the property and the showing was so remarkable that it attracted attention at once. But little development work has been done on the property, and the price reported to have been paid for the mine is about the highest paid for a claim in that district for the amount of work done. If the ore holds good in the nine foot vein, as it has been found on the surface, the owners will have a rich proposition. The government has granted $900 for the building of a wagon road to the Hog Horn mine, and a large force of men will be put to work at once. As soon as the grade is completed a trial shipment of ore will be sent out from the mine.

Certificates of work were issued yesterday to Joseph Caron on British Chief, Joseph Caron on Black Prince, Joseph Caron on Princess fraction. Locations, Crowning King, at head of Clearwater creek, south of Trout Lake, by J. J. Budd; Last Chance at head of Clearwater creek, north of Trout Lake, by Walter F. Fee; Great Western, at Summit of Clearwater creek, by J. J. Budd; Fredricton, Asherott, Toronto fraction, Clinton, Bradford and Lilly, on Morning mountain by L. L. Merryweather. Transfers, bond on Canadian Girl, Yankee Girl and Yale fraction to Neil Cochrane assigned to Eugene Croteau.

CRIMINAL ASSIZE.

Bloomfield and Rowlan Acquitted of Robbing Charles Johnson.

The trial of Fred Bloomfield and Frank Rowlan for assault with robbery upon Charles Johnson was continued yesterday at the assizes and occupied the whole day. Crown witnesses were called to show that the prisoners knew that Johnson had received some money the night before, that they had been seen on Lake street about 1 o'clock on the morning in question when they had asked two men if they had seen "the Swede," and the circumstance of Bloomfield's having a soft hat in the morning whereas he had had a stiff one the night before.

The defence was an alibi. Each of the prisoners went into the witness box and told where he had been the night previous to the robbery and the morning it. Rowlan said they had had a drink at the Bodega saloon shortly after 11 o'clock on the night of the Saturday in question. He and Bloomfield had gone to several saloons after that and separated about 1 o'clock in Sunday morning opposite the Tramway company's office Bloomfield said he was going home. He had met a man named Goldstein and walked about with him, then about 3 o'clock he had met Bloomfield, who said his father had found fault with him for being out so he had not stayed at home. Together they had then gone to the Sherbrooke hotel, the manager and cook of which were called to corroborate this.. It was during the time that Rowlan said he had been with Goldstein that a crown witness said he had seen the two on Lake street. The crucial point of the evidence lay in whether this witness were correct when he said he had seen them on that street.

The addresses of the deputy attorney-general and S. S. Taylor for the prisoners and of the summing up the judge were completed only a few minutes before 6 oclock. The judge's remarks were much commented upon for their thoroughness, fairness and logical arrangement.

It was not until 8.30 that the jury agreed upon a verdict, the court in the meantime having taken a recess. They returned a verdict of not guilty and the accused were discharged from custody.

WAS MOST SUCCESSFUL.

A Good Sum Realized For the Hospital—Thanks For Courtesies.

The members of the Ladies' Hospital Aid society are to be congratulated on the success of the tea, musicale and dance which were held at the Phair on Tuesday afternoon and evening. The afternoon tea and musicale netted $38, while the ball given in the evening will add the very respectable sum of $235 to the treasury of the Kootenay Lake General hospital. The four decked cake, the prize for the most graceful waltzers, was won by Mrs. Dr. LaBau and Mr. Wetmore. The ball was such an unqualified success that the society desires that the names of the committee on arrangements shall be published. Here they are although the ladies fair who make up the committee were reluctant to have them published, but it was thought best that so much light should not be hidden under a bushel, Mrs. Dr. LaBau, Mrs. Harry Connon, Mrs. Goepel and Dr. Isabel Arthur. The ladies desire to thank most heartily Messrs. Phair and Gibson of the Phair hotel for donating the dining room and parlors of the hotel and for the many courtesies shown them by these two gentlemen.

The Lake Manitoba is a new and commodious palace steamship which has just been built in Great Britain for the Elder-Dempster Co., and is to be the latest addition to the Beaver trans-Atlantic line of steamers and is a considerable improvement on the steamers belonging to that line. Her sea-going qualities, speed and manouevring properties were demonstrated recently to a party of invited guests, who at the invitation of Messrs. Elder-Dempster Co., and Messrs C. S. Swan & Hunter, the builders, accompanied the vessel on her trial runs. For further particulars concerning this steamer and the Beaver line apply to H. L. Brown, C. P. R. ticket agent in this city.

NIGHT WAS HER TERROR.

"I would cough nearly all night long," writes Mrs. Charles Applegate, of Alexandria, Ind., "and could hardly get any sleep. I had consumption so bad that if I walked a block I would cough frightfully and spit blood but, when all other medicines failed, three $1.00 bottles of Dr. King's New Discovery wholly cured me and I gained 58 pounds." It's absolutely guaranteed to cure Coughs, Colds, La Grippe, Bronchitis and all Throat and Lung Troubles. Price 50c and $1.00. Trial bottles free at Canada Drug & Book Co.

Lipton's Tea is a winner. Purest finest flavor, and first package tea put up.

Wall Paper Landlords who frequently have occasion to repair houses for tenants are invariably finding that paper is cheaper and infinitely more satisfactory than kalsomine, paper costs less and wears longer without becoming soiled. It secures and holds a better class of tenants: in fact a good tenant will insist on having paper. There is Wall Paper and Wall Paper, our Wall Paper and the other kind. You will pay no more, much less, in fact, for our up-to-date papers than for inferior and older designs elsewhere. Our Fall Sale is worth the attention of every householder.

THOMSON STATIONERY Co. Ltd

NELSON, B. C.

THE CITY

Work has been commenced on the sidewalk on Ward street from Water street to the Grand Central hostel.

The tug Hecrules came in with a load of limestone and the Surprise with a barge load of lumber yesterday.

The steamer Nelson, which has been at the shipyards for the past few days undergoing repairs, was put on the run between Nelson and Kaslo yesterday.

Mrs. Gordon Grant of Victoria, who spent Sunday and Monday in the city in the interests of the W. C. T. U., has arranged to return tomorrow and will be glad to meet all ladies interested in temperance work at the Baptist church at 8 p. m. She will also explain the work of the Loyal Legion to the children at 3.30 in the Methodist church.

Staff-Captain Taylor of the Salvation Army, of which he is the second in command in the Pacific division, will arrive from Spokane tomorrow to conduct the special services at the barracks tomorrow evening. Cadet Lewis, who has been transferred to Nelson, arrived in the city yesterday from Revelstoke. Captain Southall, the new officer in command for this city was formerly in command at Rossland.

The Retail Grocers' association will hold its meeting tonight at which the wholesalers are invited to meet them so that both sides can come to a mutual understanding. A number of the retail merchants from nearby towns are expected in today to attend the meeting, and the various grievances complained of by both wholesalers and retailers will probably be thoroughly threshed out. The Retailers' association has prepared a statement of its case which will be presented tonight.

With the closing of the open season for trout fishing a number of fishermen who have been making a profitable living from supplying the markets of Nelson, Rossland, and other towns with trout from the lake are thrown out of their chosen occupation for a while. The past season has not been an extra good one as far as fishing around Nelson is concerned although a number of good strings of fish have been caught. Some of the largest trout that have been secured have been taken in the water to the northward of the C. P. R. dock, which seems to be a favorite both for the rainbow and lake varieties of trout.

GOOD COFFEE MAKER

Experience With the Berry.

"I have gained twenty-five pounds since I left off coffee and began drinking Postum Food Coffee in its place.

I had become very thin in flesh and suffered tortures with heartburn, was a nervous wreck with headache practically all the time until one dreaded day when the good doctor told me I must quit drinking coffee, as he had nothing left to try to relieve me.

I could not drink tea and had tried everything else, even Postum, but put it by at the first trial, because it was tasteless.

Forced to it again, I determined to see if it could not be made palatable and found at once that when I followed directions and boiled it long enough, that I not only liked it but gave it to my husband for several days without his finding it out. I have the name of making splendid coffee, and we always used the best, but of late I have given Postum to guests many times in place of coffee and have never been detected yet.

Our four children have not drank coffee for three years, and all have gained health and flesh since using Postum. One son, who was always sick, has been greatly benefited by its use, and as above stated, I have gained twenty-five pounds since taking up Postum. I am healthier today than I have been for years and give Postum all the credit. Please do not use my name in public."

This lady lives in Burlington, Iowa, and the name will be furnished by the Postum Cereal Co., Ltd., Battle Creek, Mich., to those interested.

Rev. E. S. Rowe, of Victoria, has written that he expects to visit the Kootenays shortly on a holiday trip. While here he will preach and deliver one of his popular lectures on social topics.

George Neelands returned to Nelson yesterday from Granite creek where he has been on a couple of weeks' shooting trip. He brought with him the skins and heads of five magnificent caribou.

The sock social at the Congregational church last evening was a great success and was well attended. A choice programme was given which with the supper was a delight to young and old.

The anniversary services of the Methodist church will be held on Sunday and Monday, November 10th and 11th. Rev. James Turner, who organized the church ten years ago and is well known throughout Kootenay, will spend the Sunday in his old charge.

The special examination of the plaintiff in the case of Felt vs. Dickenson took place yesterday and occupied most of the day. At the conclusion of the criminal trial Justice Irving heard a motion in the case and an order was made allowing the plaintiff to amend his statement of claim upon his paying all costs of the adjournment of the case to next sittings of the court. R. W. Hannington appeared for the plaintiff, J. A. Macdonald for the defendant, Dickenson, and Robt. Hodge for the defendant R. Wilson Smith and others represented by him.

Word was received from Republic, Wash., yesterday that Sheriff Lowery had telegraphed there that he would arrive the next day (today) with Michael Smith in charge. Smith is the man who stole the money from where it was concealed in a hen house near Republic, and fled to British Columbia, was arrested at Robson and was released when he had made restitution and owing to hitches which arose over his extradition. When he was released he imbibed too much liquor and as a consequence took the wrong train and instead of speeding towards Victoria, as he thought, was conveyed without his realizing it to Northport. Sheriff Lowery, who was on the same train, placed him under arrest as soon as the train was on American soil, and now Smith will have to answer to a charge of grand larceny.

PERSONAL

J. J. Warren, manager of the White Bear at Rossland, was at the Hume yesterday.

Robert Hodge, barrister of Rossland, is in the city in attendance upon the Supreme court.

Ralph Harrow, who represents George Hetrmann of San Francisco, is a guest at the Phair.

Eugene Croteau, secretary of the Cascade Mining Co., of Rossland, was among the guests at the Hume yesterday. He left on the evening train for home.

U. S. Senator George Turner came in from Marysville, East Kootenay, last evening where the Sullivan Group Mine, in which he is interested, has a smelter under construction. Senator Turner leaves for Spokane today.

P. Walsh, the railway contractor, is at the Phair. He came from the Lardeau and reports that less difficulty is now experienced in getting men to work on the Lardeau railway and that good progress is now being made with construction.

F. E. Michaels, superintendent of the Spokane Falls and Northern Telegraph company, arrived here yesterday. He is on a tour of inspection of the line and has visited Rossland, Republic, Grand Forks, Northport and other poits. He says the line is in good shape for the coming winter. Mr. Michaels leaves today for Spokane.

Barry and daughter, Columbia.

REHEARSAL FOR TONIGHT.

A full dress rehearsal of the scenes from the operas of Il Trovatore and Faust which are to be given tonight at the opera house was held last evening. The performers have gone to great pains in the preparations for this entertainment and the results from all appearance will well repay them as far as appreciation is concerned. In the Miserere scene from Il Trovatore, Mrs. Parry gives a most artistic and sympathetic rendering of the difficult parts assigned to her. The scenery, including three changes, is perhaps the best combination ever presented to a Nelson audience. Messrs. Miller & Dervant have taken especial pains in providing the society with appropriate costumes. The spinning wheel used in the scene from Faust is of local manufacture, and is mechanically perfect. The whole production being under the auspices of the Nelson Operatic society will undoubtedly add another triumph to their many successes.

HAROLD STRACHAN'S FUNERAL.

The funeral of the late John Harold Strachan was held yesterday afternoon to the Nelson city cemetery. The funeral party left the residence of City Clerk Strachan at 2.30 o'clock and proceeded to the Baptist church where the coffin was carried and placed in front of the pulpit. The pall bearers were R. Robertson, J. Bowman, W. E. Ellis, F. C. Ingram, J. A. McDonald and W. Enstead.

The floral tributes were numerous and beautiful, the one from the city hall staff and police department was especially fine. The following is a partial list: Members of the family, wreath; E. K. and Emma Strachan, spray; Mrs. Steel and Mrs. Ingram, cross; May Symes, cross; Keith Symes, wreath; City hall staff and police department, wreath; Mrs. Oakes, wreath; Mr. and Mrs. Thos. M. Ward, wreath; Mr. and Mrs. McAstocker, spray: Miss Hancox, wreath; Dolly McLeod, bouquet; Rose and Baby Willie Strachan, flowers; Archie Symes, flowers; Mr. and Mrs. A. J. Miller, bouquet: Gertie Smith, Lulu Ellis and Blanch Jackman, flowers.

In the service that followed Rev. J. B. Morgan preached an eloquent sermon, taking as his text Jesus Wept. Several of the hymns that had been favorites of the young man while he had been attending the church were sung by the large congregation present, among whom were the mayor and members of the city council, the civic employees, the Sunday school class which Mr. Strachan had taught, and a large number of the business men of the city who had been intimately acquainted with him, and who attended as a last token of respect.

After the singing of Abide With Me, his friends went forward to take a last look at the remains before being hid from view, and then they were borne to the hearse and the journey to the cemetery commenced. At the grave side Mr. Morgan delivered the funeral address.

A FIREMAN'S CLOSE CALL.

"I stuck to my engine, although every joint ached and every nerve was racked with pain," writes C. W. Bellamy, a locomotive fireman, of Burlington, Ia., "I was weak and pale without any appetite and all run down and I was about to give up, I got a bottle of Electric Bitters and, after taking it I felt as well as I ever did in my life." Weak, sickly, run down people always gain new life, strength and vigor from their use. Try them. Satisfaction guaranteed by Canada Drug & Book Co. Price 50c

Special Features of the

Florence Hot Blast

Our New Idea Deflector Fire Pot greatly increases the heating capacity of the stove, and in connection with the deflector ring forces the heat to the floor. The base is hot, the floor being warmer than with a base burner.

The Hot Blast Attachment takes in the cold air through a duct at the rear of the fire pot, the heated air being discharged in a circle at the top of fire pot, over fire, thus consuming all the gases and products of combustion. It can be operated in connection with the front draft door, or independently, by a screw register in the rear of base, insuring complete control of the stove with nearly perfect combustion.

The large Hot Air Circulating Flue on the back takes the cold air from the floor and ejects it intensely heated, through the top adding greatly to the heating capacity.

Where the stove is operated according to directions we guarantee it to consume all the gas contained in soft coal, thus deriving the benefit of all the heat in the fuel consumed, causing a truly remarkable saving of fuel over any other stove on the market. The stove will hold fire from 24 to 48 hours without attention.
