HUNTING FOR THE NEEDFUL

Wilson and Green are Busy in Montreal

Chief Justice Hunter May be Promoted

[Special to The Daily News.]

Ottawa, July 13—It is understood that the dominion government will invite the international congress of geologists to meet here in 1906.

There is some talk of appointing to the supreme court in the place of the late Mr. Justice Armour, a judge west of lake Superior. The name of chief justice Hunter of Victoria, British Columbia, is being mentioned in this regard.

The name of Mr. Justice Nesbitt, recently appointed to the supreme court of Canada, is spoken of as the probable successor to Mr. Justice Armour on the Alaskan boundary commission.

Charles Wilson, K. C. and R. F. Green have been at Montreal for several days, presumably negotiating for campaign funds. They have not yet had an interview with the government, but senator Templeman will arrange for one some time this week.

In committee of the house today on the Nicola, Kamloops and Similkameen railway bill, Mr. Borden, leader of the oppisition, said that it was an invasion of provincial rights to declare it a work for the general advantage of Canada. Others of the opposition members took the same view.

Sir Wilfrid Laurier said in reply that the policy of the dominion government as far back as 1882 was to declare such roads as connected with leading trunk lines, to be worked for the general advantage of Canada, and the present government, generally speaking, did not change that policy. The reason why this bill was declared to be for the general advantage of Canada was that it connected with the Canadian Pacific.

The bill passed, and was read a third time. It was in charge of W. A. Galliher.

BULGARIA'S BIRTHDAY.

Nuveiling of a Memorial of the Siege of Plevna—The Incident Recalled.

Sofia, July 13.—Today Bulgaria celebrated the anniversary of her birth as a nation by the unveiling near the battlefield of Plevna, of the splendid nation mausoleum recently completed. The structure, the foundation stone of which was laid some time ago, stands upon the spot where czar Alexander II. narrowly escaped capture by the Turks.

The siege of Plevna was one of the most memorable in history. Soon after the severe battles at Shipka Pass, following the outbreak of the Tuco-Russian war of 1877, Osman Pasha, the Turkish commander, with 56,000 men, was for the third time assaulted by the Russians at Plevna. On September 6th, and for three days following, the 250 guns of the Russian batteries poured a tremendous fire upon the redoubts commanding the town. Then followed an assault which proved to be one of the bloodiest struggles of the century. Of the 60,000 Russians who charged the redoubts, 18,000 were either killed or wounded. The Turks also suffered dreadfully.

As it was found that the position held by the Turks was impregnable, general Gurko, the Russian commander, decided on a siege. The work of investment was intrusted to general Todleben, who, by the beginning of December, had Plevna shut in by the Russian lines. Soon afterward Osman Pasha attempted to cut through the nvesting lines, but was driven back into the town. By degrees the Turks were reduced to almost starvation and obliged to capitulate.

What followed is matter of history. Just as the Russians had made clear the way to Constantinople the European powers interposed and forced a peace. By the terms of the treaty signed in Berlin on July 13th, 1878, Bulgaria was constituted an autonomous principality, and it was in celebration of this event that the great mausoleum, dedicated to czar Alexander II.—the savior of Bulgaria, as the Bulgarians term him—was unveiled today in the presence of prince Ferdinand and the chief military and civic dignitaries of the principality.

With a view of exciting general interest in the monument, prizes were offered to the architects of the country. The design of M. Koltscheff was adjudged the best, and he was also entrusted with its erection.

BANDITS ON TRIAL.

Two Youthful but Desperate Men to Be Disposed of By the Courts.

Union, Mo., July 13.—The term of the circuit court which opened here today will likely be made notable by the trial of the Union bank robbers, George Collins and William Rudolph, the latter of whom created a great sensation last week by his daring escape from St. Louis jail, where the two were confined awaiting trial. Not since the extermination of the Coffeyville gang which flourished several years ago has this section of the country produced two more desperate criminals than Rudolph and Collins, neither of whom is more than twenty-one years old.

On December 27th last the two young men rode into Union, terrorized every one in the town, entered the bank and stole $14,000 in currency and $110,000 in securities. They fled to Rudolph's home, and when surrounded by deputy sheriff's escaped after killing one of the posse.

In Rudolph's home the official found a scrap of paper on which were scrawled "George Collins, Hartford.' The police of Hartford, Conn., were notified and they found that Collins' stepfaother, whose name was LaPlant, lived there with his two sons. The house was watched, and on March 1st two men who left it were followed to a resort. This place was surrounded, and just then a carriage drove up and from it stepped Collins and the two LaPlant boys. Collins was captured after a desperate struggle. Two detectives went into the house and there found Rudolph, who fought them with the ferocity of a maniac. He was subdued however, and was locked up, together with the others. In LaPlant's house $8,685, mostly in gold, was found, with three revolvers and a set of burglars' tools. Both Rudolph and Collins declared they would never stand trial and the former's sensational escape from prison was no surprise as the two men, despite their youth, are regarded as the most desperate criminals with which the Missouri authorities have had to deal in many years.

WILL WORK SIX FURNACES

GRANBY SMELTER PLANT TO BE FULLY EMPLOYED.

PLENTY OF COKE IS ASSURED FOR ALL BATTERIES.

[Special to The Daily News.]

Phoenix, June 13.—There now seems to be every probability that there will be six furnaces in operation at the Granby smelter in about six weeks, or by the first of September. In fact, the two additional furnaces now being installed by the Granby company are expected to be completed and ready for placing in blast before that date, making, for the present, a complete battery of six furnaces.

H. N. Galer, of Grand Forks, assistant manager of the Granby company, who has been making a visit of inspection to the company's mines here, stated that all the machinery of every kind for the two new furnaces is now on the ground, and the work of erection is well under way, so that there seems but little doubt that in the course of six weeks they will be ready for operation. Mr. Galer was also asked about the probable coke supply by that time, and said:

"At present we have a good supply of coke, considering the amount coming in from Fairfax, Washington, and more is arriving every day, so that for the present we are all right for four furnaces. I notice that Mr. Tonkin, manager of the Crow's Nest Coal Co., is reported to have stated in Rossland a few days ago that by the first of September he will have a continuous supply of coke for all the smelters in the province, and will even have to look for an outside market for the surplus. Should this prove to be the case, we will have no trouble in keeping all the six furnaces in blast for an indefinite period, as we can readily get ore enough for twice that number at our mines, and we have all the power we need. The only thing required is plenty of coke, about 300 tons daily for the six furnaces. Of course, the operation of these furnaces will also require a larger force of men in our employ at both mines and smelter."

CAR SHORTAGE.

Boundary Shipments Said to Be Kept Down on That Account.

[Special to The Daily News.]

Phoenix, July 13.—A few days ago the C. P. R. completed the work of putting in one sidetrack for the accommodation of the Oro Denoro mine, on the Phoenix branch, and shipments were started from that property to the Sunset smelter at Boundary Falls.

Another sidetrack is also being laid at the same mine to facilitate shipments from other parts of the ore quarries on that property. This all means the gradual increase of the force employed there.

During the last week there has been some complaint by the mines on the Phoenix branch because of shortage of cars and power on the part of the C. P. R. It is understood that neither the Granby mines, Snowshoe nor Athelstan could ship as much as desired on that account. Superintendent Ross, of the Kootenay-Boundary branches of the C. P. R., is expected in this section shortly, to more familiarize himself with the requirements of the situation, after which an improvement will doubtless be effected, he having taken but one flying trip through here since he was appointed in charge.

THE CITY FATHERS.

Just Routine Business Transacted at Last Night's Council Meeting.

At the meeting of the city council last evening but little business of importance was transacted.

The city clerk stated that the Chinese laundrymen on Water street were protesting against their water rates and did not see why the laundrymen along Cottonwood creek should escape free, when they had to pay full rates. The white residents along the creeks were also kicking against the wash water from the laundries which is not run off into the creek, but accumulates in pools on the ground near the wash houses.

Ald. Irving enquired whether a by-law regulating laundries had not been passed by which the Chinamen were all to go on Water street.

Ald. Selous did not think it would be possible to enforce this without a great deal of difficulty, and thought that the easiest solution of the problem would be to have a drain run from the laundries into the centre of Cottonwood creek. This would do away with the annoyance complained of. It was decided that this should be done, as the best solution for the present.

A letter was read from the board of the Kootenay Lake General Hospital regarding the usual grant from the city to that institution.

The mayor stated that the matter had been referred some time ago to the finance committee but as there had been no meeting of the committee since it had stood over. As it was necessary for there to be a meeting of the committee this week to discuss the treasurer's report the matter was allowed to stand over till then.

A letter was read from T. J. Scanlan asking for $100 as compensation for the loss of his horse which was drowned through backing off the city wharf into the lake. He claimed that as the wharf had been in an unsafe condition at the time, it was the duty of the city either to have stopped traffic on it, or else be responsible for any accidents occurring. The matter was left in the hands of the mayor and city solicitor to ascertain the extent of the city's responsibility in the matter.

An application was made on behalf of the Tennis club for free water on their grounds, the same having been granted to the other athletic organizations of the city. On motion of Ald. Irving, seconded by Ald. Hamilton, this was granted.

A payroll for the past fortnight amounting to $142.45, chiefly for work on streets, was passed without comment.

Notice of the introduction of a by-law was given by Ald. Irving, its title being "A by-lay to prevent the growth of weeds within the city limits."

A. Allan, keeper of the cemetery applied for a ten day's vacation, which was granted.

The auditor's report and treasurer's statement for the six months ending June 30th, was then brought up and referred to the finance committee for consideration. The council then adjourned.

PLENTY OF MONEY COMING

MINNESOTA CAPITALISTS IN THE LARDO COUNTRY.

ARE ATTRACTED BY REPORTS OF POPLAR CREEK.

[Special to The Daily News.]

Kaslo, July 13.—Dr. F. H. Hocking, of Granite Falls, Minn., arrived here on the steamer Kaslo this morning on his way on a prospecting trip into the now famous Lardo district.

Dr. Hocking comes as the representative of a number of Minnesota capitalists who are seeking mining ventures of merit in the Kootenays and who have been attracted by the phenomenal finds on Poplar creek.

The doctor said today: "Some of my people are already interested in the Handy group on Lynch creek and we are so well pleased with the future prospects that we are again in the market for meritorious investments in the same territory. The developments on the Handy group have been especially gratifying and ample funds are being provided by my people for the opening of those properties now controlled by us, as well as for the purpose of prospecting any new ventures offering. This is certainly a delightful country and you seem to have untold treasures of wealth laid up in your hills and valleys. It seems to me to be a tourist's paradise, and from all accounts is equally as attractive to the sportsman."

UNIONS EXPELLED.

Labor Troubles in New York's Building Trades Not Yet Over.

New York, July 13.—Some twenty thousand skilled mechanics in the building trades returned to work today under the modified plans of the employers' association. This number will be increased to fifty thousand by Wednesday as unions with that membership have voted to accept the terms of the employers. One of the terms abolishes walking delegates, and refers all disputes to a joint board of arbitration.

The united board of the building trades held a long and stormy meeting today. The four unions which accepted the plan of arbitration offered by the building trades employers' association, and which sent their men back to work today were expelled from the board.

These four unions are mosiac and caustic tile layers; the Hexagon labor club of tile layers' helpers; the electrical workers, and the united cement masons.

THE USUAL WAY.

Rioting at Belfast Over the Celebration of the Battle of the Boyne.

Belfast, July 13.—The Orangemen are engaged today in their annual celebration of July 12th in their customary way.

About 100,000 men participated in the celebration here. The entire police force was on duty and the troops were confined to barracks to be ready in case of emergency. At Rostrever, county Down, there are 1,700 police and soldiers in the town and vicinity, which gives the place the appearance of being in state of siege.

The procession of Orangemen returning from today's demonstration here were attacked by nationalists and a serious riot ensued. There was an exchange of missiles, many windows were broken, and a number of policemen and civilians were injured. Strong re-inforcements of police restored order.

Similar rioting occurred at Carrick Hill.

JOINED THE LIBERALS.

The Macleod Gazette Changes Owners and Politics.

Winnipeg, July 13.—The Macleod Gazette, for the past twenty years the leading conservative paper of southern Alberta, has changed owners and politics. The new editor says: "Under the new management the Gazette will support the liberal government, the new proprietors believing that the policy of the present government has done and is doing more for the advancement of the Northwest territories and the town of Macleod than has ever been done in the past."

GERMANY IS RELENTING

Advocacy of Chamberlain Has Good Effect

A Friendly Discussion is Now Suggested

London, July 13.—A white paper was issued by the foreign office tonight giving the correspondence between Great Britain and Germany in connection with the German-Canadian tariff discussion.

The general tone of the correspondence indicates a greater willingness on the part of Germany to discuss the question in a friendly way.

After colonial secretary Chamberlain's public advocacy of a retaliatory tariff policy on June 27th, Germany suggested an interchange of ideas with a view to a friendly settlement.

This suggestion was accepted by lord Lansdowne although the British foreign secretary in closing his note reiterated Great Britain's refusal to admit Germany's right to treat Canada or any other colony granting special tariff concessions to the mother country, as a separate customs territory to be made to suffer by retaliation for privileges granted to the United Kingdom.

The unionist free traders held another meeting tonight under the chairmanship of sir Michael Hicks-Beach, formerly chancellor of the exchequer, in a committee room of the house of commons.

A unionist free food league was formally organized and it was announced that a large campaign fund was accumulating. The league will immediately start an educational crusade. An appeal was made to premier Balfour to set an early day for a full fiscal debate.

FISHERY TROUBLES.

French Fishermen Attack Colonial Custom's Office in Newfoundland.

St. Johns, Nfld., July 13.—The cruisers Lavoister and Charybdis, the flagships of the French and British squadrons respectively in these waters sailed today for the treaty shore of Newfoundland to investigate an alleged attack by French fishermen on a colonial custom's office which is causing serious altercation. Admiral Douglass with the British cruisers Ariadine, Retribution and Tribune, will arrive here August 17th for a three days' visit meeting the British and French squadrons in these waters.

WEATHERED THE STORM.

A. E. Ames & Co. Have Made a Fresh Start.—Doing Business Once More.

[Special to The Daily News.]

Toronto, July 13.—A. E. Ames & Co., the King street stockbrokers, re-opened their doors this morning.

Their suspension, which was precipitated by an overload of securities carried on a declining market, occurred on June 3rd, just about six weeks ago, since then they have made rapid progress towards straightening out their affairs.

SOUTHWESTERN MINERS.

Pittsburg, Kas., July 13.—The deliberations of the convention of southwestern miners which opened here today will be followed with much attention owing to the general expectation that the miners will make a demand for a general advance in wages and improved conditions of labor. The convention comprises delegates from Missouri, Kansas and Oklahoma. The mine operators who recently organized under the name of the Southwestern Interstate Operators' association have representatives here in an endeavor to bring about an amicable adjustment of the differences between the miners and mine owners.

SMELTER CITY ITEMS.

Trail, July 13.—The idle handroasters at the smelter will resume in the course of the next few days, and another lead furnace will be blown in very soon afterwards. This will mean more activity on the hill, requiring more men, and resulting in more business down town.

Arrangements are being made among local players to start a football club in Trail. As there are a number of good players in town who have never figured on the grounds here a good team can be easily secured. Practice will likely begin this week.

A STRIKE THAT FAILED.

Providence, R.I., July 13.—The strike of the iron moulders in several foundries in this city which was inaugurated in September last has been officially declared off. The demands were union recognition, and a new scale of wages. No concessions have been made by the master moulders, and few of the strikers have been reinstated.

A GOOD START.

Worcester, England, July 13.—The visiting Philadelphia cricketers began a match today with a Worcestershire eleven. The home players went to the wickets and at lunch time they had scored 178 runs for two wickets in their first innings.

GOSSIP OF GREENWOOD.

[Special to The Daily News.]

Greenwood, July 13.—Four members of the Greenwood tennis club went to Phoenix on Saturday, where they beat a similar number of members of the Phoenix club. In the doubles, Smith and Boucher (Phoenix), beat Gray and Hodges, and Wilmot and Merritt (Greenwood) beat Spier and Morkill, whilst for Phoenix Boucher beat Gray. The Phoenix players will probably visit Greenwood next Saturday to endeavor to turn the tables.

At baseball yesterday in Greenwood, the local men played a team from Phoenix. The match was a good one, seven innings having been played. The score was 10 to 9 in favor of Greenwood.

Father Bedard has accepted the tender of H. Munro for the erection of a Roman Catholic church building at Phoenix, the work to be completed by September 15th. The contract price is about $2,000. Extras and furnishings will add at least $500 more to the cost.

His lordship bishop Dart preached at both morning and evening services at St. Jude's, church of England, Greenwood, yesterday. In the evening a confirmation was held, the bishop confirming four adults, two ladies and two men.

C. Elting Merritt has joined F. W. McLaine in the real estate and insurance agency business in Greenwood.

P. S. Stanhope, who owns a number of mineral claims and other property in the Boundary district, has left on a three-months' trip to England.

R. Stewart, for some time in charge of the Yale-Columbia Lumber Co.'s sawmill at Deadwood, now that that mill has been closed down, is to be transferred to the same company's establishment near Robson.

J. W. Ellis, for several years foreman printer in the Boundary Creek Times office, has decided to remove to the coast.

Robert Wood has returned from Ottawa, with its larger engine, will be ago to support an application for a cash subsidy in aid of the Midway-Vernon railway.

FOR FIRST-CLASS FISHING

NEARBY PLACES WHERE TROUT ARE FOUND.

CAN BE EASILY REACHED BY THE SPORTSMAN.

While the fishing resorts along Kootenay lake are well known to the majority of local fishermen there are a number of other resorts seldom visted, within easy reach of the city which within another week will furnish first class sport till late in the fall.

Among the least known of these are the streams running into the Salmon river, and the pools of that river itself between the summit south of Cottonwood creek down to Waneta, along the line of the Nelson & Fort Sheppard. A train leaves the Union station at 7.20 in the morning, and returns to the city at 6.35 p. m, and as none of the fishing places along the line are more than an hour and a half ride from the mountain station, a pleasant day's sport is available without getting up too early, or returning home too late.

The first fishing point reached by this line is Cottonwood lake, five miles south of the city. This pretty little lake contains a large number of small trout, but as it is within easy walking distance of the city the small boys keep it well fished out. Two miles further on, however, the railway passes Whitewater creek, and if the fisherman gets off there and is undeterred by a rough walk, good sport is assured at the lake about three miles up the creek.

From Summit to Hall creek there are a number of pools on the small creeks that come down from the mountains, where from the middle of July till the end of August one is reasonably certain of catching a good basket of brook trout. Hall creek is swarming with small trout, and occasionally fair sized fish are caught. The trout in this stream are extremely gamey and to the thoroughbred sportman who likes to fight for his fish through water or willows, there are secluded pools along this creek which while difficult to reach will afford excellent sport.

A very good plan for a day's fishing is to take the train to Porto Rico siding, about six miles past Hall, and fish up the Salmon river and Hall creek to Hall siding, catching the evening train for home. This affords nearly ten hours' fishing, with easy walking for the ordinary man just out for a pleasant day's sport. The stream keeps close to the track, and there are many cool, deep pools within a few yards of the rail, where trout of tempting size may be seen swimming around in the clear green depths.

Porto Rico creek, which empties into the Salmon at Porto Rico siding affords good fishing a little later in the season, but at present is chiefly noted for the size of its mosquitoes. A good trail leads from the railway to a pool on the stream about a mile from the river, and those who fish the stream generally follow the trail up to its junction with the stream and fish down to the river.

The pleasantest place to fish of the whole section however, is in a deep pool, three-quarters of a mile west of Porto Rico. At this point the Salmon river turns off at an acute angle, its forward course being blocked by a jagged dyke of rock, the rock is crowned by a number of big trees and in their shade the angler can stretch himself, and drop his line into a pool in which the water swirls endlessly with a swift silent movement. The fish in this pool are probobly the biggest in the river, and looking down from the flat ledges which hangs over the water, fish fully two feet in length can be seen swimming about, or ocassionally darting to the surface to catch an unwary insect, and dropping back with a splash that sends a thrill of anticipation through the onlooker. The scenery from the summit of the rock is as pretty and romantic as could be desired. The river rushes swiftly over a rocky shallow just above the point, the rapids dying away in the pool, which is probably twenty or thirty feet deep. Across from the big rock the mountain rises up abruptly, but not too steep for graceful evergreens to lodge in every crack and cranny. No matter how hot the sun is outside the shade of the trees it is pleasantly cool on the rock, which is carpeted on its summit with a foot or two or soil, and soft dry moss.

Past Ymir there is no fishing in the river itself for fifteen or twenty miles, the slimes that come down from the Ymir stamp mill driving the fish away. In Porcupine creek, two miles below the town, however, there is good fishing tand the same may be said of all the creeks, from there on down to the Columbia. With the exception of the big pool referred to, however, it is hard to catch fish of more than half a pound weight, but the fish are of the best quality.

The fishing is not yet at its best, but is improving steadily and within another fortnight will leave nothing to be complained of.

A CATASTROPHE AVERTED

CHRISTIAN ENDEAVORERS HAVE NARROW ESCAPE.

TENT HOLDING EIGHT THOUSAND PERSONS COLLAPSES.

Denver, Colo., July 13.—The big tent where the Christian Endeavor conference was held for the last four days was blown down today while over 8,000 people were inside. A dozen persons were injured but none seriously.

The presence of mind of A. M. Ramsay, of Chicago, who sprang to a chair and called to the people to hold up the canvass and poles, undoubtedly prevented many from suffocating.

Many women fainted and were extricated from the folds of the canvass with much difficulty.

When the majority were extricated from the tent they held an impromptu prayer service in the open air.

The conference was in full progress at the time of the accident. The sides of the tent had been raised to admit air and this enabled a sudden wind to life up the canvass as if it were a balloon.

More than one thousand people who were seated near the walls escaped the folds, and immediately organized a rescue corps.

AGAINST LYNCHING.

Justice Brewer, of U. S. Supreme Court Gives a Strong Opinion.

Milwaukee, Wisconsin, July 13.—"Any man who participates in the lynching or burning of a negro is a murderer pure and simple." This opinion was given by associate justice Brewer, of the United States supreme court, who is here.

"Of course," explained judge Brewer, "there may be extenuating circumstances which might vary the degree of the crime, but the principal participants in the crime can be held by any court in the land for murder, in the same degree as if the crime were committed by an individual.

"There is going to be a reaction against these atrocities with which the newspapers of late have been filled."

PRINCE OF WALES.

Takes Breakfast With Admiral Cotton on the U. S. Flagship Kearsage.

Portmouth, July 13.—The price of Wales visited the United States European squadron this morning and breakfaster with rear admiral Cotton on the flagship Kearsage. The fleet dressed ship, manned sides, and fired a royal salute as the prince boarded the American flagship.

The prince was received on the quarter deck of the Kearsage by admiral Cotton and his officers. The party descended to the admiral's cabin for breakfast, at which president Roosevelt and king Edward were toasted. Admiral Cotton subsequently escorted the prince of Wales around the ship after which the prince landed, with the warships firing another royal salute, and took the train for London.

HOPPER V. DUNSMUIR.

Another Appeal in the Celebrated Will Case at the Coast.

Victoria, July 13.—The full court is now hearing another appeal in the great will case of Hopper v. Dunsmuir.

Some days ago, counsel for the plaintiff applied to justice Drake for an order striking out the statement of defence on the ground that defendant refused to answer questions put to him on examination concerning the value of the estate of the late Alex. Dunsmuir. Mr. Justice Drake declined to strike out the defence, but ordered the defendant to answer certain of the questions. The plaintiff is now appealing from this refusal to strike out the defence.

REMOVED THE BABY.

Maud Had a Special Reason for the Murder of Her Little Sister

Bloomington, Illinois, July 13.—Maud Jordine, aged 17, was arrested today for the murder on Thursday last of her two year old sister Mabel. The baby was found hidden in some bushes near the Jordine home, terribly mutilated. It is alleged that Maud had a special interest in the removal of the baby.

IMPORTED LEAD.

Gross Irregularities Alleged in U. S. Assay Office.

Washington, July 13.—The United States treasury department today confirmed the report that gross irregularities had been charged in connection with the assay of imported lead ores at El Paso, Texas. The investigation is now in progress.

A FAVORITE BEATEN.

Chicago, July 13.—John A. Drake's Runnels, a horse that has hitherto shown marked speed, was defeated at Washington Park today by Elsie L. The race was at 6 1-2 furlongs. Bad News and Silk Maid were the only winning favorites.

THE END IS APPROACHING

The Pope Rapidly Sinking This Morning

His Doctors Say He Cannot Again Revive

Rome, July 14.—7.30 a. m.—The pope has passed a somewhat restless and agitated night. He awoke at 5.30 o'clock but shortly after dropped again into a heavy sleep.

Rome, July 14.—4 a. m.—"While there is life there is hope" was all the consolation that Dr. Lapponi would give tonight in admitting that pope Leo's condition was "very grave."

The pontiff has suffered another relapse and now lies at this time in a more critical condition than any time since the middle of last week. The semi-comatose condition into which he fell at midnight, and the confused state of his, heretofore lucid, mind, on his awakening at an early hour this morning, accompanied by still greater depression than during yesterday, are regarded as symptoms of the gravest nature and as pointing to an imminent dissolution.

Even in the early evening medical opinion was less pessimistic, and Dr. Mazzoni thought the end was not within sight. He expressed the belief that unless the disease took an unexpected turn there was no reason to apprehend death for two or three days. This statement, however, did not relieve the anxiety of those who knew that powerful stimulants are being constantly administered.

Some attribute the pointiff's weakness tonight to the excessive mental and physical efforts undertaken yesterday in receiving visitors, hearing mass, etc.

Never before has the patient's weakness progressed as it did yesterday for the first time since his illness the pontiff asked to have the shutters almost closed as the light hurt his eyes, and at the same time, contrary to his custom, he begged to be left as quiet as possible. Late last evening nine cardinals, including Satolli and Martinelli, were admitted to the sick room, but the pope would not even speak to them, merely giving them his hand to kiss.

Dr. Rossini was reported to have said in an interview yesterday: "The pope's pulse reaches 90 pulsations and over. Just calculate how many times it has pulsated in 93 years and you understand that in his present condition all his organs and the pulse must end by getting so tired that they will stop for ever."

Rome, July 13.—At the American embassy it was stated that no request, official or otherwise, had been received up to yesterday, for information regarding the pope's condition.

King Edward has instructed the British ambassador, sir Francis Bertie, to telegraph him twice daily the state of his holiness.

The Tribune last night printed a statement that the pope's ailment was cancer of the liver. Dr. Mazzoni characterizes the statement as a stupid falsehood without an atom of foundation.

SHAMROCKS DID NOT RACE.

New York, July 13.—Shamrock III. had no opportunity for the anticipated first test since the increase in her sails by stepping her taller mast.

Both of sir Thomas Lipton's racers left the Erie basin early today and were towed to Sandy Hook, where they lay for the remainder of the day in drizzling rain, the wind too light for racing. Sir Thomas expects to race the Shamrocks tomorrow.

U. S. SECRETARY OF WAR.

Oyster Bay, July 13.—At the conference today between president Roosevelt and secretary Root, it was decided to appoint Robert Shaw Oliver, of Albany, to be assistant secretary of war, vice Wm. Cary Sanger, resigned.

ORANGE CELEBRATIONS.

Harrisburg, Pennsylvania, July 13.—Four deaths from tetanus of boys have occurred in Harrisburg since yesterday, resulting from slight wounds on the Fourth of July, by toy pistols.

ENGLISHMEN WON.

[Special to The Daily News.]

Parry Sound, Ontario, July 13.—The English university lacrosse team played the Thistles, of Parry Sound, today, and won by ten goals to one.

GOOD FOR SILVER.

Washington, July 13.—The directors of the United States mint today purchased 75,000 oz. of silver for account of the Philippine coinage at 53.85 cents an ounce delivered in Philadelphia.

CHAMPIONSHIP TENNIS.

London, July 13.—The White Star liner Oceanic which sails from Liverpool for New York Wednesday, will have among her passengers the brothers Doherty, who will compete in the American tennis championship.

WON THE WALDEGRAVE.

Bisley, Eng., July 13.—In the Waldegrave competition today, Major Oxley won with in aggregate of 99 points.

HUDSON'S BAY COMPANY.
INCORPORATED 1670.
THE GREAT STORES OF THE GREAT WEST
MAIL ORDERS PROMPTLY FILLED

Picnic Goods

First, last, and always! It is quality that counts. You can deceive yourself into thinking otherwise, but it doesn't pay in the in the end. Libby's Canned Meats stand at the top notch for quality. We have just put into stock the following new goods:

PRIOR'S VALEDICTORY.

Ex-Premier Prior's decision not to be a candidate in the forthcoming provincial elections has naturally given rise to a good deal of comment in Victoria, where he has always been regarded as the strong man of the conservative party.

The colonel's own statement in the matter is as follows: "No, I lost my job and have nothing to do with politics now. I do not intende to run in Victoria at the coming election, and shall keep religiously out of the campaign, retiring into my shell. I hall not do any speechifying for anybody One reason is that several members of the conservative party did all they could to get me out, and if I was to run and the party met with defeat, they would blame me and put all the responsibility on my shoulders. I shall not say anything against the present leaders, but will simply remain an interested spectator. However, I earnestly hope that the conservative party will win, and as far as Victoria is concerned three seats, at least, are sure to be carried by the conservatives."

Reading between the lines it is not difficult to conceive that the real reason of the colonel's retirement from the political arena is attributable to dissatisfaction with the present state of affairs in the party, of which, until recently, he was easily the most important unit.

There is a certain grim humor about his remark that he will not say anything "against the present leaders." Doubtless he might say a great deal, but to give colonel Prior his due, he has always played the game and because he has been shabbily treated by the men who today parade as leaders of the conservative party he is not going to do the cry-baby act.

It may be taken for granted that colonel Prior realizes the fate that is in store for his party under the self-assumed leadership of McBride and he prefers to stand to one side until after the deluge.

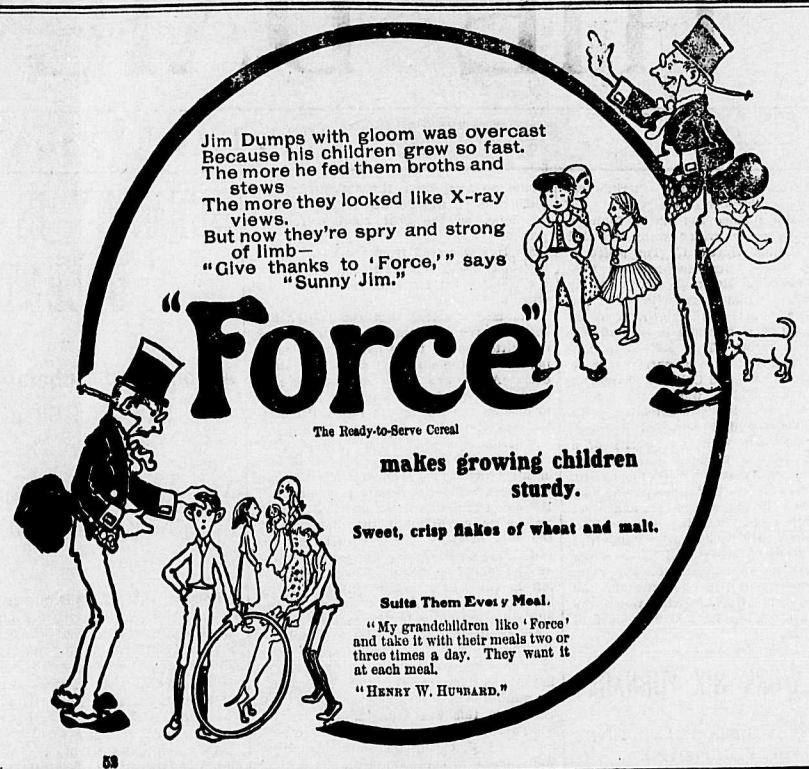
He thinks that at best the conservatives will only carry three seats in Victoria. One would like to know why he assumes that his party will not vote the straight ticket. Is it to be inferred that attorney-general McPhillips is to be knifed?

LET US HAVE LIGHT.

A few weeks ago certain charges were openly hinted at regarding the persuasive methods that were necessary in order to factilitate the passage of business through certain departments at James Bay. Although the accusations were boldly made and excited some comment at the time, there does not appear to have been anything more said or done with reference to them. The air was surcharged with rumors of crookedness on the part of ministers and officials then and these may have been lumped in with the bunch, but whatever else has happened, the charges appear to have fallen flat. Probably that result was due to the new government coming in at a critical time and the attendant excitement drove all these minor corrupt acts into the background. If they have any foundation in fact, these forgotten accusations, they should be pushed home now. It is the duty of the government to ascertain whether there was any justification for the charges made and if so they should sift them to the bottom. So long, however, as some of the offices at Victoria are filled by their present incumbents there will be precious little said about questionable practices. It is a pity that the charges were not more specifically made. Something like the blunt outspoken directness of the Manitoba Free Press is wanted in this province. The Free Press openly charged one of the minister's with crooked work, with levying toll or blackmail, and says that it is prepared in any court of justice to produce the evidence which makes it conclude that its charges are true. It is about to have the opportunity of producing its evidence for the minister concerned has brought an action for criminal libel against the editor of the Free Press.

Would it not be a wise move for the British Columbia government to look into the charges made a few weeks ago and get them settled before the election campaign commences in right down earnest? If they are not true everyone in the province will be glad to know it, but since they have been made there is nothing gained by trying to hide the truth, even if unpalatable.

The Brooklyn Eagle is a persistent journal. It still maintains that the Americanization of Canada is proceeding at so rapid a rate that in a very brief period of time the British sentiment will be entirely obliterated and the country will become not only American in spirit but in name as well. Some months ago many other American newspapers expressed the same thought but they are now changing their tone. The recognize the fact that so far from the immigrants from the United States influencing the Britishers it is the latter who will exercise a more powerful influence upon the Americans. The latter come to Canada to better themselves, like many another has done before. They can get land as good or better than their own, at a much less cost. They will be subjected to influences that will make them realise the advantages offered by the British form of government. In any case they will be swallowed up. The British now in the country and the British immigrants coming in ensure the predominance of British sentiment in the western territories. Many of the so called Americans are Canadians and other British subjects who have temporarily resided in the states. Canada can take just as many immigrants of that class now coming in as brother Jonathan can spare.



WILL RIVAL BUTTE.

Chicago Man's View of Boundary Outlook—New Property Starting Up.

Grand Forks, July 13.—Charles Magee, of Chicago, president of the Hesperus Gold & Copper Mines company, has been here for the past fortnight on business in connection with the commencement of development work on the company's properties on Hardy mountain, five miles from Grand Forks. The group acquired by the company is the well known Betts and Hesperus whose rich surface showing of high grade ore has been frequently referred to in these colums.

In engaging in a mining enterprise he has displayed the same thoroughness and grasp of details that have won him success in other pursuits. He is a retired contractor. With a view to familiarizing himself with the methods of mining and becoming acquainted with the resources of the district, Mr. Magee has recently visited the leading camps and visited the three Boundary smelters. On his tour he was accompanied by T. H. Rea, formerly of Rossland, who was instrumental in interesting Chicago capital in the Betts and Hesperus.

Interviewed here Mr. Magee said: "We are now developing the Betts and Hesperus which is a better propositon than represented to me by Mr. Rea. There is a reasonable quantity of ore in sight and we are now starting a glory hole on the surface. A big ledge traverses the two claims and we have pay ore above the average value, exposed in the shaft. We are not in the stock-jobbing business. We are here to engage in legitimate mining and believe we can make a shipper out of the group at an early date. It is our intention to send an experimental shipment to the Granby smelter very shortly. Our success will naturally tend to stimulate the investment in the Boundary of Chicago capital, millions of which are available if the propositions are meritorious."

"Grand Forks seems to me to be the natural smelting centre of the Boundary. It has a future not second to Butte and here the ores promise to last longer. You must have more railways and more smelters if the Boundary is to lead in copper production. These utilities will soon be provided as capital is beginning to realize the vast wealth of the district. It is not difficult to forsee the expansion which the next few years will bring forth. Instead of three smelters you will have plants treating an aggregate of twenty or thirty thousand tons of ore per day, because there is no limit to the ore that can be mined at a profit averaging $2 per ton.

"The Boundary has been unknown in the United States until quite recently but you will soon have millions of capital here seeking investment. Scores of idle claims have surface showings that justify the belief that they will become producers. All that is needed is money."

CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY.

The uniform success of this remedy has made it the most popular preparation in use for bowel complaints. It is everywhere recognized as the one remedy that can always be depended upon and that is pleasant to take. It is especially valuable for summer diarrhoea in children and is undoubtedly the means of saving the lives of a great many children each year. For sale by all druggists and dealers, who will refund your money if you are not satisfied after using Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is everywhere admitted to be the most successful remedy in use for bowel complaints and the only one that never fails. It is pleasant, safe and reliable.

IN NORTHERN ALBERTA.

Edmonton, N.W.T., July 11.—Four hundred and fourteen homestead entries during the month of June for the Edmonton district alone will give some idea of the prosperity of the northern portions of Alberta. Even this, though, is but an indication, for there are a great number of new settlers arriving here every week who are buying up land already owned by the people of the country. A great majority of these newcomers are Americans, and nearly every one of them has sufficient means to make him a settler of value to the country.

MAHER RECOVERING

London, July 11—"Danny" Maher, the American jockey who was injured in an automobile accident near Caterham yesterday afternoon and was taken in an unconscious condition to the hospital, is reported to be better this morning. His chauffeur, who was injured at the same time, is in a precarious condition.

A STEAMER BURNED.

Toronto, July 11.—The steamer White Star, belonging to the Oakville Navigation company was destroyed by fire yesterday while at dock at the foot of York street. Loss, $40,000.

APPEAL TO PRIVY COUNCIL.

Washington, July 11—The published report from London to the effect that Mr. MacMaster, of Montreal, one of the leading lawyers of the Canadian bar, will represent the United States before the privy council of England on the application for leave to appeal from the decision of justice Carron, of Quebec, in the Greene and Gagnon case, is confirmed here.

A Pallid, Pasty and Puffy Face

INDICATES
KIDNEY DISEASE.

It is almost needless to remind sensible men and women that a pallid pasty and puffy face indicates kidney disease. In addition to this, there is pain in the loins, loss of appetite, nausea, frequent sickness, unnatural thirst and constipation.

Dr. Pettingill's Kidney-Wort Tablets should be used at once by men and women who note any of the above-mentioned symptoms, which are true evidences of impaired and weakened kidneys. These marvellous curing Tablets go direct to the root of kidney weakness. They arrest the course of the disease, heal and build up the tissues that now pass away cell by cell in the urine.

Do not be induced to use liquid kidney medicines; they contain deadly alcohol which feeds the disease. Kidney-Wort Tablets are purely vegetable; no alcohol or irritating poisons in them. All druggists.

KIDNEY-WORT TABLETS

RESCUE ALL FROM THE
PERILS OF KIDNEY DISEASES

THE MOAT HOUSE MURDER

THE EXECUTION WILL END A CAREER OF CRIME

DOUGAL'S DEED WAS A VERY REVOLTING ONE.

London, July 13.—Samuel Herbert Dougal, known as the "Moat House" murderer, is to be hanged tomorrow in Chelmsford prison.

The execution will close a career of crime that was surrounded by as many circumstances af mystery and sensation as the brain of a novelist ever invented. The deed for which he will pay the death penalty was the murder of Miss Camille Cecile Holland, a woman of independent means who not only gave him her affection, but trusted him so far as to buy the lonely Moat farm, where they might live together in peace. He betrayed her trust, and with scarcely conceivable baseness, drove her out into the stillness of the night to blow out her brains, that he might become possessed of her property, which he succeeded in doing by forging her name to her checks.

Dougal's was a decidedly varied career, and one full of incident. He was a man of smart military appearance, pleasant of speech, and polite of manner, attractions which enabled him to win the affections of undiscerning ladies both in America and England, whom he lured to their ruin. Of his early life, prior to his joining the army, little is known. As a member of the Royal engineers he was stationed for a considerable time in Nova Scotia. When he first landed in Halifax he was accompanied by a wife, who suddenly became ill and died. She was buried the following day. Three weeks after the death of his wife Dougal sailed for England, and returned five weeks later with another woman whom he introduced as his wife.

It was stated in Halifax that this woman had a considerable fortune. She seemed on arrival to be in excellent health, but shortly afterwards she had fits of vomiting and coughing. In two weeks the woman was dead, and on this occasion also the remains were buried on the following day. When Dougal finally left Halifax he persuaded a young woman to accompany him and she afterwards returned to that city with a story of betrayal. The man was next heard of at Aldershot and in various other parts of England. Later he went to Ireland and there married again.

Shortly afterwards he was appointed to some minor office at Dublin Castle, and among his duties was that of banking money. While employed in Ireland he forged the checks of two well known members of the aristocracy. For this crime he served twelve months in prison. In 1894 he again turned up with a young woman whom he had met through the agency of a matrimonial advertisement. The two lived together for a considerable time in a country house on the outskirts of the village of Watlington, in Buckinghamshire. Dougal devoted his time to chicken farming and all went well until another woman arrived on the scene and caused a breaking up of the establishment.

Ultimately in 1898 he made the acquaintance of Miss Holland, daughter of a Liverpool merchant, who, as the evidence at the trial disclosed, was possessed of considerable means in her own right. How precisely Dougal first secured an introduction to Miss Holland is not known. It is said to have been through a matrimonial agency. Certain it is that Miss Holland conceived a genuine affection for Dougal, and by mutual consent they agreed to live together as man and wife, Miss Holland at the same time concealing from her relatives all knowledge of her acquaintance with Dougal, and indeed, of his mere existence.

Together they went to live at Moat farm, an exceedngly lonely spot at Clavering. Soon after commencing their tenancy Dougal began to fill up the ditch leading from the farm yard to the moat. This work was not completed on the day when he determined to take the unhappy woman's life and it afforded him a ready made grave in which to bury his victim. Miss Holland was seen alive for the last time on May 19th, 1899. Not only was she not seen again, but no trace of her was discovered until four years afterward, when the remains of a woman were found in the Moat farm ditch. It is one of the remarkable features of the case that during all these years Dougal had been able to act as her "double' in forging her signature to checks and carrying on correspondence with her bankers and brokers. To the few inquiries made Dougal explained that Miss Holland had gone to the continent. Later he brought his real wife to the Moat farm introducing her as first as his widowed daughter. Divorce proceedings against Dougal's real wife, interrupted after a decree nisi had been granted, by an affiliation order obtained by a village girl against him, first brought the attention of the police to the continued absence of Miss Holland.

Dougal was first arrested on a charge of forging Miss Holland's name. Meanwhile the police were at work endeavoring to solve the mystery of her disappearance and in their perseverance in their search for the body they won general praise. They succeeded in linking together a chain of circumstantial evidence which could not be broken by the best efforts of the counsel for the defence, and which connected Dougal with the authorship of the crime as securely as anything short of the direct evidence of eye witnesses of the tragedy could have effected.

HIS LAST HOPE REALIZED.

(From the Sentinel, Gebo, Mont.)

In the first opening of Oklahoma to settlers in 1889, the editor of this paper was among the many seekers after fortune who made the big race one fine April day. During his traveling about and afterwards his camping upon his claim, he encountered much bad water, which together with the severe heat, gave him a very severe diarrhoea which it seemed almost impossible to check, and along in June the case became so bad he expected to die. One day one of his neighbors brought him one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy as a last hope. A big dose was given to him while he was rolling about on the ground in great agony and in a few minutes the dose was repeated. The good effect of the medicine was soon noticed and within an hour the patient was taking his first sound sleep for a fortnight. That one bottle worked a complete cure and he cannot help but feel grateful. The season for bowel disorders being at hand suggests this item. For sale by all druggists and dealers.

CANADA AND THE STATES

TRADE RETURNS BETWEEN THE TWO COUNTRIES.

WASHINGTON FIGURES FOR THE FISCAL YEAR.

Washington, D.C., July 13.—The remarkable success which has attended the United States export trade recently shows no exception in the case of British North America, with which the trade of the eleven months ended with May shows an increase of approximately $12,000,000 over the same period of the previous year, according to the bureau of statistics, which bureau confidently predicts that the increase for the twelve months will considerably exceed the figure named.

This is a larger increase than in any year in the history of our commerce with Canada, except in 1898, when the increase was slightly greater than that of the last fiscal year.

During the eleven months ended with May the total value of exports to Quebec, Ontario, and the northwest was $98,000,000, against $87,000,000 in the corresponding months in the previous year; to Nova Scotia, etc., the total was $7,000,000, against $5,500,000 in the eleven months in 1902; to British Columbia, $6,500,000, compared with $7,000,00 in the corresponding months of the preceding year, and to Newfoundland and Labrador, $2,500,000, against a little less than $2,000,000 in the same months of 1902.

The total exports to British North America from the United States for the full fiscal years seem likely to be about $125,000,000, against $112,000,000 in 1902, $107,000,000 in 1901, and $97,000,000 in 1900.

Not only has the growth in exports from the United States to Canada been greater in the year just past than in any preceding year, with a single exception, but that growth has been greater than to any other country execept Germany. To Germany the increase in the eleven months of 1903, from which figures are now available, was $21,000,000; to Mexico the increase was $2,000,00; to Argentine $1,500,000; to all of South America $2,500,000; and to all of Africa $4,000,000. Thus the actual increase in our exportations to Canada in the fiscal year just ended will be greater than to any other ountry except Germany.

Meantime the imports into the United States from Canada have grown, but not with equal rapidity. The total imports for the year just ended will amount to about $55,000,000, against a total of $48,000,000 imported from British North America in the fiscal year of 1902. Comparing 1903 and 1893, the growth will amount to about $17,000,000, the total imports from British North America for 1893 having been about $38,000,000, while the growth in our exports to British North America during that same period will be about $77,000,000. Thus the total exports to British North America from the United States are a little more than double the imports into the United States from that section, and the growth in exports between 1893 and 1903 has been twice as great as the growth in imports.

The most important articles which form that exportation of $125,000,000 to British North America are, stating them in the relatve order of value: Manufactures of iron and steel, coal, breadstuffs, raw cotton, manufactures of cotton, agricultural implements, chemicals, lumber and manufactures of wood.

The following table shows the total exports from the United States to, and total imports into the United States from, British North America, in each year from 1893 to 1903, the figures for the months of June, 1903, being estimated:

Fiscal year.	Exports	Imports
1893	$ 48,626,508	$38,186,342
1894	58,313,223	31,326,731
1895	53,981,763	37,006,163
1896	61,086,046	41,212,000
1897	66,028,725	40,722,792
1898	84,889,819	32,242,301
1899	89,580,458	31,604,135
1900	97,337,494	39,931,833
1901	107,746,519	42,902,478
1902	111,708,275	48,787,573
1903	125,000,000	55,000,000

NORTHERN TREASURE.

Seattle, July 11.—More than $500,000 in golden treasure reached the city today on the Pacific Coast Steamship company's steamer City of Seattle from Skagway.

The vessel had thirty-one passengers and $530,000 in Klondike gold consigned to the assay office and local banks.

On the last trip the Cottage City brought $400,000 in Alaska gold and the steamer Dolphin $580,000, and with the City of Seattle treasure the total amount of gold from the Klondike during the past week will exceed $1,500,000.

No man or woman will hesitate to speak well of Chamberlain's Stomach and Liver Tablets after once trying them. They always produce a pleasant movement of the bowels, improve the appetite and strengthen the digestion. For sale by all druggists and dealers.

NELSON'S NEWS OF THE DAY

Register your vote.

The court of revision will meet this afternoon at 2.30 at the city hall.

R. M. Atwater, manager of the Ymir mine, arrived in the city last evening.

A son was born to the wife of William Waldie, Carbonate street, on Sunday.

A daughter was born to the wife of Rev. F. H. Graham, Silica street, on Friday, July 10th.

H. B. Gilmour, of Vancouver, was among the guests who registered at the Hume last evening.

The lady that left an article of attire at the city hall yesterday may secure the same from the city clerk.

City solicitor Wilson left yesterday morning for Macleod, Alta., and will be away from the city for about a week.

Mrs. S. J. Tonkin, of Wilkesbarre, Penn., mother of J. H. Tonkin, of Fernie, passed through the city last night on the way to visit her son.

J. A. Poyntz, of Kaslo, was married last evening to Miss L. Beckett, of Alymer, Ont., at the residence of Mrs. Smith, Silica street, by Rev. Dr. Wright.

The appeals from the court of revision's decisions on city assessments will be heard on July 20th before the county court. At the same court a number of applications from aliens for naturalization will be heard.

In chambers yesterday morning before judge Forin only one application was heard. This was in the Leadbeatter test case against the Crow's Nest Pass Coal company. The plaintiff applied for leave to deliver an amended statement of claim. An order was made and the defendants were given thirty days in which to file an amended statement of defence.

At the record office Monday, Elizabeth Gilliam recorded the location of the Melbourne and Minto claims on Donaldson mountain; R. J. Baker and A. H. Smith located the Morning Glory claim on the south fork of Porcupine creek, and L. J. D. Berg, the St. George, near the west fork of Forty-Nine creek. Certificates of work were issued to P. White on Fourth of July, R. J. Baker on Violet and J. J. McDonald on Golden Crown.

One of the first fruits of the lead bonus is foreshadowed in the advertisement in another column of The Daily News from the management of the Antoine mine asking for tenders for the driving of a 1,600 foot tunnel. This property, which is situated in the Surprise basin, above McGuigan, has been quiet for some time, as are most of the mines in that vicinity, but the coming of the lead bonus makes their working profitable again, and it is likely that another month will see the basin at its busiest.

A special dispatch from Kamloops was received at this office on Sunday morning, stating that the C. P. R. round house had caught fire shortly after midnight. The cause of the fire is not yet known. Two engines were destroyed, one of these being the switch engine. The fire was still burning when the dispatch was sent out but all other rolling stock had been safely removed. The wires between this city and Kamloops were all down last evening and it was not possible to find out what the total damage was.

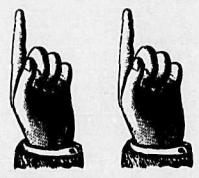
BAKER STREET, NELSON, B. C.



Register your vote.

E. W. Monk, of Greenwood, who has been appointed as manager for the Hamilton Powder company in place of George Tunstall, who leaves shortly for the south, arrived in Nelson last evening, and is stopping at the Phair.

Richard McBride, premier of the province, passed through the city yesterday afternoon on his way to Rossland from East Kootenay. Owing to the boat being late his stay in Nelson was very limited. He will return here on Wednesday.

The Kokanee left for Lardo yesterday afternoon taking in a large quantity of groceries, machinery and general supplies, this being the first day that through connections were made to Trout Lake since the freshet. Among the goods sent in was a large shipment to Poplar creek, and quite a few passengers took the opportunity to get in to the scene of the recent rich finds.

The Souris lacrosse team, champions of Manitoba, are to play a match at Pincher Creek the last of the month. Frank Tamblyn, whose old home was in Souris has written to the management to see if games can be arranged for in Nelson on August 3rd and 4th, and a letter to the same effect has also been forwarded from the Nelson club. If the negotiations are successful a splendid exhibition will be assured.

The management of the telephone company state that the holes dug for poles on a number of the residential streets and never used or filled in, referred to Sunday's issue of The Daily News, was the work of the city authorities entirely, and that they have nothing to do with the matter. Whoever is responsible, should see that the present dangerous condition of the streets in question is at once remedied.

A special meeting of the license commissioners for the city was held yesterday afternoon at the city hall. Those present were the mayor, and commissioners Kirkpatrick and Starkey. Applications for all the city hotels and liquor establishments were presented, accompanied by the necessary fees, which totalled $3,735. All the applications for renewals were granted, a condition being, however, that all water rates charged against the property on which such license applied should be settled before the license became effective. Fifteen retail licenses were issued.

Three carloads of settlers' effects from Washington passed through the city yesterday, accompanied by a large party of American farmers on their way to Edmonton to take up land. They had driven up from southern Washinton to Cascade city, and had been under the impression that they could drive their stock and belonging to Nelson, B. C., having confused this city with Nelson, Wash. At Cascade City they had to entrain, and will go by rail to Edmonton from which point they will strike off to secure satisfactory homestead. None of the party had been in the Northwest before but were confident of their ability to secure good land.

TO AVENGE THE KING.

Bucharest, Roumania, July 13.—It is said that the Servian authorities have unearthed a conspiracy to avenge the late king Alexander. A lieuatnant of a frontier garrison has been arrested charged with making threats against colonel Masclin. A search of the lieutenant's quarters disclosed evidence that twelve officers had formed a league to take vengeance upon the regicides.

THEIR LAST CELEBRATION.

Toronto, July 13.—The Orange celebrations were held in many parts of Ontario today and all were attended with success.

BOUNDARY FALLS SMELTER.

[Special to The Daily News.]

Greenwood, July 13.—A third Connersville blower with direct connected Erie City engine was last week received at the Montreal and Boston Copper Co.'s smelter at Boundary Falls. This blower is a No. 8, and it is larger than the others already in use, and has a more powerful engine to drive it—one of 125 horse power. The first blower put in at these works is a No. 7 and the second a No. 7½, and each is driven by a 75 horse power engine. The No. 8 blower, with its larger engine, will be equal to providing sufficient blast for two furnaces, so that after it shall have been installed the works will have blast power for four furnaces. No. 3 furnace has not yet arrived from Spokane, but is expected daily, having been shipped last week.
