A SLUMBERING VOLCANO

Cripple Creek Though Quiet Would Not Take Much to Make Trouble

Mine Owners in Full Control and are Deporting the Union Men by Wholesale

Cripple Creek, Colo., June 7.—Apart from a few small fights in connection with the rounding up and arresting of the union miners, no outbreak occurred in this districttoday. Two local militia camps, and a small army of armed deputies, under sheriff Bell are in full control of the camp. Though there has been no turbulence today there is an undercurrent of feeling which bodes ill. Secretary Hamlin, of the mine owners' association, declared today that 200 prisoners now held in the armory in Victor, will be taken over the hills and warned never to return. There is a minority element that wants to hang T. W. O'Connell, former marshal of Victor, who is under arrest, and suspended, and also Alfred Miller, charged with having started the riot which resulted in the killing of Roxie and several others at the mass meeting in Victor yesterday. No hanging will take place, however, in all probability, unless resistance is offered by the prisoners. It would require but little provocation to have a wholesale hanging.

Photographs of Charles McCormack, and Melvin Brock, who were killed by an infernal machine in the Vindicator mine on November 21st, 1903, and of other Vindicator miners were found in the pocket of Frank Cochrane, secretary of the miners' union of Victor. This discovery greatly agitated the officials of the mine owners' association, who declared that Cochrane shall be strung up until he discloses all he knows concerning the outrage. They believe he has information that will lead to the arrest of the perpetrators of that crime.

The coroner's jury visited the scene of the explosion today and an adjournment was taken until tomorrow, when the taking of evidence will be begun.

Colorado Springs, Colo., June 7.—A special train, consisting of an engine and two coaches, bearing fifty union miners deported from Cripple Creek by the citizens passed through this city tonight. The second car had all the blinds drawn and armed guards were on the platforms. The police and sheriff's officers were determined not to let the deported men stop here and arrangements were made with the Rio Grande road to carry them past this city. It is presumed they are headed for Denver.

Denver, Colo., June 7.—While early reports today from Victor and Cripple Creek where yesterday strife and bloodshed ruled, indicated that semi-peaceful conditions prevailed. Fears of another outbreak at any moment are general. Throughout the night squads of citizens reinforced by details of militia travelled over the district making arrests until now the "bull pen" is filled with two hundred or more prisoners. The marshals of Anaconda, Goldfield and Independence are among the prisoners. Together with the city marshal of Victor and the sheriff of Teller county this makes a total of five officials of the camps who have been deposed since the troubles of yesterday began. The fact that sheriff Bell, the successor of the deposed Teller county official, has expressed a determination to handle the situation without the aid of the troops other than the local companies, gives assurance to many that he will be able to do so.

A special to the News says that no one was killed in the attack last night on Miners' union hall, but four were injured. All are shot in the legs. There were about 60 miners in he hall. The soldiers were stationed in the streets and on the roofs of buildings across the street and fired volleys through the curtained windows of the union hall. After exhausting their ammunition in return fire, the miners came down stairs with hands up-lifted and bearing a white flag. They were surrounded by soldiers and escorted to the bull pen.

Victor, Colo., June 7.—Fifteen persons were killed in the gold camps' trouble last night, 13 by an explosion of dynamite in an infernal machine near Cripple Creek and two in a riot at a mass meeting here. The latest discovered victims are Robert Sinclair, who was killed in the dynamite outrage, and J. D. Davis who died in a hospital of wounds received at the mass meeting. At a meeting of the mine owners' association the Findlay dynamite assassination was discussed. The deepest indignation was expressed. Many of the members pledged their individual support to run down and punish the conspirators, and a large reward will be offered by the association, and also by the county commissioners.

The local committee of the Western Federation of Miners has given out the following statement: "No men who deserve to live would or could approve the awful deed. The fiends who planned and carried out the devil's crime should be detected and punished to the full extent of the law. The crime must be unearthed and the perpetrators punished. The committee and all local members of the federation are ready and willing to assist in uncovering the guilty ones."

Cripple Creek, Colo., June 7.—After a night of terror, comparative peace reigned in the gold camps today, but conditions are still of a volcanic nature and nobody believes the trouble is yet ended. A vigilance committee composed of mine owners and their employes and sympathizers has taken charge of the governmein of Teller county. A possee of 300 deputy sheriffs, armed with rifles and revolvers is now scouring the hills of Cripple Creek district with the object of rounding up every union man and everyidler in the camp where they will be taken to the county lines and warned not again to return to the county. The union men are also well armed and say they will resist any attempt at deportation. Many of them are desperate and serious trouble may occur.

After a bloodhound had followed the trail of the men or men, who exploded the dynamite at Independence, detective Sterling, of the mine owners' association, declared that he knew who caused the explosion.

Ten thousand people congregated this afternoon at Second and Bennet avenues, the citizens' alliance headquarters, to be addressed by the mine owners and business men, and armed squads were searching for several men. Lynching is freely talked of and almost every man is a walking arsenal.

The union stores are in charge of deputy sheriffs. Wholesale arrests of union men are to be made. Mounted armed men have been sent on a quick march to the extreme southern and northern ends of the district to guard all avenues of escape of the union miners who are to be arrested. Company "H," Clorado national guards, is under arms at the armory in this city, and will be called out should there be any rioting.

Chief of police Graham, of this city, was induced to resign this afternoon by methods similar to those used with sheriff Robertson. The mine owners and members of the citizen's alliance have declared their intention of forcing out of office county judge Frost, assistant district attorney Cole and justice of the peace Harrington, who are regarded as union sympathizers.

Denver, June 7.—The convention of the W. F. of M. today delegated to the executive committee full charge of the Colorado situation politically and otherwise with instructions to use their best judgment in the fall campaign. A telegram was received from Eugene V. Debs, saying: "Enemy is desperate. You are on top. Stand pat."

JOHN GENELLE DROWNED

WALKED OFF DECK OF TUG YALE DURING THE NIGHT

BODY WAS FOUND IN MORNING IN TWO FEET OF WATER

[Special to The Daily News.]

Nakusp, June 7—The town was shocked early yesterday morning when it was learned that John Genelle of the Yale Columbia Lumber Co., had met death by drowning during the previous night. Mr. Genelle was in charge of the tug Yale, one of the company's tugs at their lumber camps twelve miles down the lake from Nakusp. He retired at the usual time after supper to his sleeping apartment on the tug and it is supposed he got up during the night and in the darkness missed his footing and fell overboard onto some logs on which the body was found the next morning face downwards in about two feet of water. It is supposed he was rendered unconscious by striking on the logs and fell into the water and was drowned. The body was brought to Nakusp this afternoon and a coroner's inquest held here returned a verdict of accidental death.

Mr. Genelle was 38 years of age, was well and favorably known and made many friends by his good fellowship and kindness to all who had dealings of any nature with him. For many years he has been actively engaged in the lumber industry, having started with the firm P. Genelle and Co., growing up with the enterprise until it attained a business of considerable magnitude. He leaves an aged mother, a widow ad four children, four sisters and four brothers to mourn his loss. They have the deepest sympathy of the hole community in their bereavement. The funeral will take place from his residence here tomorrow at 10 o'clock. Rev. father J. Eannotte of Sandon will conduct the funeral services.

BOBBED UP SERENELY.

Rex Fee, Who Was Thought to Be Drowned, is Found in the West.

Winnipeg, June 7.—Rex Fee, a young man who disappeared from his family at Glen Soris, about a year ago, and who was thought to have been drowned, has returned. At the time of his disappearance he left his clothes on the bank of the little Souris river with a string of fish and the appearance at first was that he had gone in swimming and been drowned. The river was dragged and suspicion grew that he was not drowned, but that he had left. The case as put in the hands of the police, who, however, failed to produce results. It now appears that young Fee has been working in the west and southern Manitoba and spent last winter in Port Arthur.

STRUCK THE LEDGE

Continued from Page One.

Greenwood, June 7—Alexander Miller and associates, holders of the Helen, adjoining the townsite on the south, are wearing broad smiles today. They have been running a tunnel trusting to encounter the ore at a computed point. When the point in question was reached they were gratified to encounter a 14 inch vein of ore running very high in native silver. The ore appears to be the counterpart of the Elkhorn, adjoining the town on the north. High grade ore is now being taken out of several properties north, east and south of the town.

BLACK SEA FLEET TO BE SENT TO FAR EAST

Russia Has Obtained Turkey's Permission to Pass the Dardanelles on Condition That the Warships Never Return--Reported Sortie From Port Arthur of Squadron and the Sinking of Three Japanese Warships

BLACK SEA FLEET.

It Will Sail For Far East With the Baltic Fleet.

St. Petersburg, June 7.—The grand duke Alexis, commander-in-chief of the navy, according to an apparently reliable report which, however, is not officially confirmed, has obtained the permission of the emperor to create a third Pacific squadron from the ships of the Black Sea fleet, and permission has already been obtained from Turkey to take the ships through the Dardanelles, on the condition that they will not return. This squadron will be composed, according to report, of the battleships Rostislaw, Dvenadzat, Apostoloff and Triasviatitelia, and will be accompanied by torpedo boats and torpedo boat destroyers, and will sail for the far east simultaneously with the Baltic fleet. The Associated Press is unable to obtain any confirmation of the report.

A REPORT FROM CHE FOO.

It is Said that Three Japanese War Vessels Were Sunk.

Che Foo, June 7.—An impression prevails here that a naval battle took place last night in the gulf of Pechili. Passengers on steamers passing the Liao Tieshan promontory at the time did not hear firing, while reports come from Teng Chow of heavy firing being heard there from 11 o'clock last night until 2 o'clock this morning. Vessels from the Miao Tai islands confirm this report and so do the residents on the hills in the vicinity of this city, who heard the firing and saw flashes out at sea during the night.

The fact that the Russians were endeavoring on June 4th to clear the roadsteads off Port Arthur of mines indicates an intention upon their part to give battle outside the harbor upon the first favorable opportunity. A Japanese correspondent returning from Talienwan says there is a persistent rumor there that the Japanese battleship Yoshima struck a mine off that port recently and was sunk. Chinese arrivals from Talienwan are unable to confirm the story.

Preceding a sea attack on Port Arthur last night, the Japanese apparently made a determined effort to advance on the stronghold by land. A Chinese junk which left a point three miles south of Port Dalny early on Monday morning has arrived here. She reports having heard firing north of Port Arthur from 2 o'clock Monday moning until 2 o'clock that afternoon by which time she passed out of hearing distance. It would appear that the Japanese planned a land and sea attack on Port Arthur yesterday. The Russians on seeing this sent their fleet out to give battle and the result is not yet known. The St. Petersburg correspondent of the Matin says that a naval officer repeats the story already in circulation at Liao Yang, that the Russian squadron at Port Arthur has made a sortie and sunk two Japanese torpedo boats and a battleship of the Shikis type.

TAKE NO STOCK IN IT.

St. Petersburg Discredits Story of Assault on Port Arthur.

St. Petersburg, June 8.—The government, it is authoritatively said tonight, has no more information of the happenings of the neighborhood of Port Arthur. There is a lack of official news from southern Liao Tung, beyond the usual number of rumors throughout yesterday. Among them was the report from Che Foo and elsewhere that the Russian squadron had made a sortie from Port Arthur, and that the Japanese had begun a land attack upon the fortress. The general staff could neither confirm nor deny these stories any more than similar ones during the past 24 hours. However, it was pointed out, that while a preliminary shelling of the land defences of Port Arthur was not improbable, it is too early to expect news of a serious assault, which could not be pressed with any prospect of success until siege guns have been landed at Dalny, brought overland 20 miles, emplaced and all the arduous preliminary work of a systematic advance against the outer works of Port Arthur completed.

TO HELP PORT ARTHUR.

An Active Russian Force Operating in Liao Tung Peninsula.

St. Petersburg, June 7.—A very active Russian force is operating on the Liao Tung peninsula in the hope of impeding and possibly crippling the Japanese army commanded by general Oku, but its size and character are unknown. According to report viceroy Alexieff insists that Kouropatkin should not leave Port Arthur to its fate and the advance of troops may be due to his pressure. The strength of the main army at Liao Yang has not been appreciably weakened by the force sent south and the movement was not ordered by emperor Nicholas. The Associated Press is assured by a member of the emperor's suite that the stories that the differences between viceroy Alexieff and general Kouropatkin on this subject were referred to the emperor, who in turn submitted them to the council of war, which agreed on the advisability of an advance, are absolutely false. The Associated Press informant reiterated the statement cabled on June 3rd, that the emperor is not attempting to impose his views upon Kouropatkin, saying further that the emperor considered that the military situation has distinctly improved from the standpoint of the future. The foreign office has not received a report from the Russian consul at Che Foo in regard to the rumored sinking of a large Japanese battleship off Talienwan.

SAMSONOFF'S FIGHT.

A Pretty Description of a Brush Between Cossacks and Japanese.

Liao Yang, June 7.—The Japanese have drawn on their advance guards from Vafangow. They blew up part of the railway and the telegraph station on the night of June 3rd. The damage was soon repaired.

Samsonoff's Cossacks are harassing the Japanese towards Port Arthur. The Cossacks are searching the hills to catch detached parties unawares. Samsonoff's fight with the Japanese on June 3rd in the valley of Putziantan took place in an immense ampitheatre in the hills. Samsonoff threw forward skirmishers to feel the Japanese positions. The Cossacks and dragoons crept forward examining the steep hillsides, deep ravines and water courses likely to protect Japanese ambuscades. Finally the Japanese fire on the crest of the hills located them and the assailants swarmed up almost inaccessible cliffs without stopping to breathe. The Japanese first kept the shelter of the rocks, but the Russian fire searched them out and they flitted shadowlike across the rocks, as the Cossacks continued to advance, while the dragoons cleared the valleys leading from the amphitheatre. The Japanese cavalry retreated, unwilling to risk a collision at close quarters.

The Russian line encircled one great hill, on which was the principal Japanese position, like a living ribbon, creeping towards the summit. Colonel Sereta led the advance until he fell wounded, half way up the cliffs. The command devolved on lieutenant-colonel Chichesville, who continued the forward movement, clearing the Japanese from the heights. In the meantime a Russian battery placed an accurate shrapnel fire among the hill tops, hastening the Japanese retreat. Two Japanese sharpshooters on the summit of a hill seriously annoyed the Russians at a critical period of the advance. An officer of Tarilofki's company scaled the rocks, and, in the face of almost certain death, killed both the Japanese, returning unharmed. Soon after the Russians had occupied the hilltop and an intrenched village they received an order to retire. Just then the Japanese artillery reserve was brought into action and showered the retiring Russians with shrapnel, but failed to get the exact range. Besides colonel Sereda, 17 Russians were wounded in the day's encounter. The Japanese losses, owing to the accuracy of the Russian artillery fire, seemed heavy.

VESSELS CAN ENTER.

Admiral Togo Has Cleared Channel of Talienwan Bay of Mines.

Tokio, June 7.—Admiral Togo has succeeded in clearing the channel leading into Talienwan, He has been locating mines. On June 3rd and since then he has found and exploded 41. Yesterday a small steamer was able safely to enter the harbor. The work of locating other mines is now continuing and it is expected that the vicinity will be speedily cleared of them. Admiral Togo reports that a southerly gale and a high sea prevailed during his operations, but the men steadfastly continued the work.

A SKIRMISH REPORTED.

St. Petersburg, June 7.—The general staff today received the following despatch from lieutenant-general Sakharoff, the chief of staff of general Kouropatkin:

"There is no change in the situation at Feng Wang Cheng. A Japanese detachment evacuated a position which it occupied near the village of Chu Chi Tun, and retired southward, pursued by our cavalry. During a reconnaissance on June 3rd, in the neighborhood of Siamatszra, a detachment of Japanese infantry fired on our rear guard. Their approach was stopped by an advance of our troops. The firing lasted two and a half hours. We had two men killed and six wounded.

ROUTED THE COSSACKS.

Tokio, June 7.—A detachment of the Japanese force which landed at Takushan surprised and routed a company of Cossacks on Sunday at Kan Chia Tun, on the Kin Chou road, seven miles north west of Takushan.

MAIN FORES AT LIAO YANG.

Paris, June 7.—The foreign office has received advices this morning definitely announcing that general Kouropatkin with his main force is at Liao Yang.

KILLED A PREFECT.

Seoul, June 6.—(Delayed in transmission)—A telegram has been received here from the Japanese consul at Gensen, Korea, saying that the Russians, who were at Hamheung, have retired in the direction of Ping Yang. It is reported that retreating Cossacks killed the prefect of Kowen, who refeused to furnish them with provisions.

MOROCCAN IMBROGLIO

Spanish Government Sending Warships to Tangier to Protect Its Interests

Washington, June 7.—Senor Ojeda, the Spanish minister, who has spent much time in Morroco and is well acquainted with Perdicaris, who is held prisoner by Moroccan bandits, in conversation today said:

"My government does not, of course, credit the report that the United States desires a Moroccan port."

The minister admitted that the only object in sending warships to Tangier is to protect Spanish interests there in the event of trouble. His government, he said, did not take exception to the sending of American warships to the coast of Morroco for the purpose of assisting in the release of Messrs. Perdicaris and Varley, the British step-son of Perdicaris.

Tangier, June 7.—Anjera Moors invaded the residence of an Englishman here today and compelled his wife to give up the rifles of her husband, who was absent. The outrage took place in broad daylight. The British consul demands the arrest of the tribesmen, but the Moorish officials hesitate because the perpetrators are influential.

WILL GIVE THEM STRENGTH

Harbormasters and Pilots Seek Affiliation With A. F. L.

Duluth, June 7—The Duluth Harbormasters' and Pilots' Association at a special meeting last night, voted in favor of affiliation with the American Federation of Labor. The feeling is that the strike is lost, unless affiliation is affected with the Federation or there is some strong intervention from some other source.

Cleveland, June 7—"Things are coming our way rapidly now," said president Livingstone of the Lake Carrier's Association today, "and in fact, we are receiving applications from masters faster than we can place them."

Referring to the affiliation of the Masters' and Pilots' Association with the American Federation of Labor, Mr. Livingstone pointed out that the Lake Carriers' association holds contracts with all of the unions represented on lake boats, aside from the masters and pilots, whose rules specifically provide against sympathetic strikes. "The American Federation of Labor," said Mr. Livingstone, "is noted for its policy of living up to contracts. For this reason I do not believe that the Federation of Labor will sanction sympathetic strikes at this time."

District captain Howell said: "We are as sanguine as ever of winning notwithstanding the claims of wide spread dissatisfaction in our ranks sent out by the Lake Carriers. There are few boats getting outside."

A CORRESPONDENT KILLED.

Chinese Thought His Vessel Was a Pirate and Fired Into It.

London, June 8.—Ernest Brindle, the Daily Mail's correspondent in Manchuria, in a description of the death of Lewis Etzel, the correspondent of the Daily Telegraph, who was shot by Chinese soldiers while in a junk between Shwantaitze and Erdiko says:

"Our intention was to cruise along the Liao Tung coast. About 6 o'clock in the morning the junk was surrounded by four sailing boats, manned by Chinese soldiers, who without explanation, opened fire, their shots falling all over our boat. We were below reading and writing and Etzel, looking out received a feaful wound in the back of his head and expired in a few minutes. The soldiers, who were dressed like pirates, said they mistook us for a pirate boat they were seeking. They afterwards donned uniforms. I walked to Tien Chwang Tai to summon assistance. One of the Chinese crew was badly wounded and it is not likely he will recover."

LOST HIS POSITION.

Charles Patterson, Ex-Bank Manager, Believed to Have Killed Himself.

Winnipeg, June 7.—Charles Patterson, former manager of the Bank of Hamilton here, and at Brandon, was found dead at the home of Hon. Colin Campbell this morning, where he was staying. He had turned on the gas. It is believed to be a case of suicide as he lost his position two weeks ago.

ONE BROKER KILLS ANOTHER

Albany, N.Y., June 8.—Richard E. Pruesser, a well known broker of this city, shot and killed Niles McDonnell, a member of the Boston Metropolitan Stock exchange, early this morning. Both men were interested in the same company and had been on amicable terms until just before the tragedy. Pruesser had been drinking heavily.

SPEAKS WELL FOR HARVARD.

Cambridge, Mass., June 7.—Of the eight men from Massachusetts who have passed the preliminary examinations for the Rhodes scholarships six are Harvard men.

WANTED A GOLD BASIS.

Washington, June 7.—In answer to a summons from the state department J. Barrett, United States minister to Panama, came to Washington today and had a long conference with the Panama canal commissioners and afterwards saw the president, secretary Hay and assistant secretary Loomis, all with reference to the pending Panama currency proposition. It is believed that if Panama fails to adopt the gold standard, bidders on the contracts will so increase their bids in order to insure their own safety that the digging of the canal will cost the United States $25,000,000 more than it would cost otherwise.

MEDICOES IN COUNCIL

ONE THOUSAND DOCTORS DISCUSS MEDICINE AND SURGERY

IT IS THOUGHT RADIUM IS NO OF MUCH VALE TO PROFESSION

Atlantic City, N. J. June 7—The American Medical Association began its 55th annual session here today. Over 100 physicians are here, representing every section of the country. The new president, John E. Musser of Philadelphia in his address, asserted that a majority of the medical students were unfit to practice and advocated a closer scrutiny of the moral and physical capabilities of prospective doctors. Another item of widespread interest was the discussion of cutaneous medicine and surgery, and of radium and its therapeutic possibilities.

The subject was presented in a paper read by Dr. William Allen Pusey of Chicago who declared that the curative properties of radium were vastly inferior to the X-ray. He said that he did not believe the newly discovered element would be an important factor in the medical world.

Dr. L. Duncan Bulkley of New York agreed with Dr. Pusey, but stated that in his opinion sufficiently active radium might be effective in inaccessible cavities.

The committee on the collection of information re public school methods urged a thorough and systematic method of inspecting public schools and examining the school children. The sum of $7500 was contributed to the proposed memorial of the late Dr. Walter Reed, who lost his life while investigating yellow fever.

THE LAKE STRIKE.

Masters and Pilots Lose About Fifty By Desertion.

Cleveland, June 7.—"Up to the present time we have had just about fifty desertions from our ranks," said district captain Howell of the Masters and Pilots' association today when shown the Detroit despatch saying that 15 members of the organization had sent in their resignations from that city. Continuing Mr. Howell stated that the "proposition to affiliate with the American Federation of Labor was carried by a large majority. As a result we have taken out a charter from the latter body under the name of the International Pilot association."

Detroit, Mich., June 7.—Fifteen members of the local harbor of the Masters and Pilots' association, wrote their resignations from the association at noon today at the office of captain J. W. Westcott, local agent of the Steel trust fleet, and sent them to the officers of the harbor.

"The deadlock on the lakes is broken up," said Capt. Westcott, after the masters had finished their writing.

"The local harbor is broken up now, and I heard from Cleveland last night on the long distance telephone that 22 members of Cleveland harbor had resigned their membership."

Detroit, Mich., June 7.—Detroit harbor No. 45, Masters and Pilots' association, held a meeting tonight, for it was given out that upwards of a score of members who had submitted resignations to the Detroit harbor had withdrew their resignations. Detroit harbor tonight reconsidered its former action regarding affiliating with the American Federation of Labor and unanimously voted in favor of the step. Telegrams from Cleveland announced that the number of resignations from the Masters and Pilots' association had been exaggerated, and that the grand total was now 43.

A PESTILENT GRUB

Vancouver, June 7—Mr. Dale of Hammond, on the Fraser river, is authority for the following statement in regard to the strawberry yield of 1901, and the destructive grub that is doing so much damage. There are sixty acres of strawberries at Port Hammond which will yield a large crop this season. It is a fact, however, that the crop will not be more than two-thirds of what was expected on account of the prevalence of a new grub which attacks the roots of all plants which have been in the ground for two or three years. This is the same worm that is giving the farmers of Washington state so much trouble, and this is the first season that it has appeared in anything like damaging number in British Columbia.

"THE GLORIOUS TWELFTH."

Vancouver, June 17.—The Orangemen intend to have a monster demonstration here on the 12th of July, and a big excursion will be run from Victoria and other island points. The foundation stone of a new temple of their order will be laid here on that date, and from all the neighboring cities and settlements Orangemen will flock into Vancouver. The Nanaimo contingent has already chartered the Joan to carry them over the gulf; and there is no doubt that the demonstration will be a greater success than ever.

ONSLOW MAY COME TO CANADA

Toronto, June 7.—A despatch from Ottawa, to the Mail and Empire says: "The report is current that lord and lady Minto will vacate government house and leave for England in the second week in October No official announcement has been made as to lord Minto's successor, but a definite announcement is expected within a fortnight and surprise would not be felt if lord Onslow were to secure the position."

NEW TARIFFS PROMISED

To be Three in Future--Maximum, Minimum and British Preference

Fielding's Eighth Budget Speech--No Mention Made of Duty on Rough Lumber but "Dumping" to be Stopped

[Special to The Daily News.]

Ottawa, June 7.—Finance minister Fielding, in presenting his eighth budget today, referred to the prosperity which existed throughout Canada during the past year, although a temporary check was given to business in Ontario through heavy snow storms.

He said manufacturers had feared that the depression, which was strong in a high tariff country, would extend to a country with a low tariff, but it was true today that business was better in Canada with a moderate tariff than in the United States with a high tariff.

Taking up the financial position, he showed that the surplus for the year ending June 30th was $14,354,000. He went extensively into various departments, and particularly referred to the success which attended the administration of the post office.

Coming to the expenditure for the current year, he estimated that the revenue to the end of the year, June 30th, would be $71,129,000, and the expenditure $51-500,000, leaving a net surplus for the year of $16,500,000.

The expenditure on capital account for the current year, he estimated at $11,500,000. He calculated that the reduction of the public debt would be $7-700,000 for the year. The surplus for the eight years of liberal rule amounted to $58,400,000, making an average surplus of $7,385,000, compared with an average surplus of $544,000 during 18 years of conservative rule. The increases in eight years of liberal rule to the public debt were $14,111,294, and the decreases, $15,196,000. So that the liberal government had carried on the affairs of the country, engaged in large enterprises, spent money liberally, and at the close of eight years not one dollar had been added to the public debt. On the contrary it was reduced by $1,084,993, an annual decrease of $135,624, against an annual increase of $653,000 during 18 years of conservative rule.

As to the debt per head, Fielding estimates that on June 30th, 1904, the debt amounted to $46.96, against $69.08 in 1891, and $50 in 1896.

Mr. Fielding next referred to trade. He said that it amounted to $217,000,000 in 1895 and had grown to $467,000,000 in 1903. He quoted from Dr. Sanders' report showing that there were 171,000,000 acres of land suitable for cultivation in the west. Fielding also dealt with land sales, deposits in the bank, immigration and other signs of the prosperity of the country.

Touching on the surtax on German goods, he said that it worked for the advantage of Canada. Regarding the tariff, he said that seven years showed it worked satisfactorily and that it was certainly revenue producing. There was also in it a measure of protection. He said Canada would adhere to the British preference. There was but one opinion in Canada on this point. As far as Chamberlain supported that view, they were as one with him, but they did not want to interfere in what had become political strife in England.

Fielding said that the government would make some changes in the tariff this year, but there would be no general revision. This would be left until inquiry was made by the government. However, he would point out what line it would take when revision was made. There would be three tariffs in future. There would be a maximum tariff, a minimum, and the British preference. In regard to woolens, there is no increase in the duty, but instead of the British preference on certain articles there will be a minimum duty of 30 per cent. On twine cordage the duty would not be increased, but instead of the British preference of 16 2-3 per cent there would be a minimum duty of 20 per cent ad valorem. On tableware and china the British preference duty, now 20 per cent, will be reduced to 15 per cent. The duty on buggies will be at a minimum of $40 on open buggies, and $50 on covered buggies. The importation of stallions and mares valued at under $50 will be prohibited. The duty on molasses from countries where the British preference extends is abolished. Machinery for mining for alluvial gold is placed on the free list.

Fielding concluded by stating that a special duty would be placed on dumped or slaughtered goods. No mention was made of lumber.

The speech is regarded as a splendid effort.

STRIKE MAY EXTEND.

Saratoga, N.Y., June 7.—It is intimated that the strike at the south Glenfalls plant of the International Paper Co., soon may extend to the company's 33 mills in New York, Vermont, New Hampshire and Massachusetts. The company's mills in this vicinity at Fort Edward and Palmer Falls, employing a 1000 men, still are in full operation, but there is much uneasiness among the employes.

TARIFF CHANGES.

The telegraphic summary we publish this morning of finance minister Fielding's eighth budget speech contains some important announcements in regard to present and prospective tariff changes.

Some few changes are to be made in the tariff immediately but anything in the nature of thorough revision is to be deferred pending governmental investigation into the subject.

Apparently there is to be no duty imposed upon rough lumber as requested by the British Columbia lumbermen, though the statement made by Mr. Fielding that a special duty will be placed on dumped or slaughtered goods may have some bearing on this point.

Mr. Fielding is able to show a very handsome surplus, which will permit of a substantial reduction in the public debt.

Sunlight Soap brightens and cleanses everything it washes Quite as good for cleaning household utensils as washing clothes. 12B

EDITORIAL NOTES.

Thomas Earle, Victoria's tory representative at Ottawa, is making use of his franking privileges to flood this province with campaign literature. The chief feature of his literature is the strong denunciation it contains of the Grand Trunk Pacific scheme. Electors are eloquently called upon to defeat the liberal party and so prevent the construction of another transcontinental railway. Our tory friends would have us tied up to the C. P. R. forever. Canada is big enough and prosperous enough for two transcontinental railways and the liberal party will lose precious few votes because of its recognition of this fact.

The amendments to the Railway Act, introduced by the minister of justice, for the purpose of placing beyond any quibble the absolute control of the railway commission over freight rates, indicate that it is the honest desire of the government to make this particular piece of legislation, the most progressive measure introduced by the liberal government for several years, a really effective piece of machinery for controlling the greed of the transportation corporations. With the adoption of these amendments the machinery will be as nearly perfect as it is possible to make it and it will rest with the commissioners to use it to good purpose. In this connection we would remind those of our readers, who are interested in freight rate adjustment, that the commissioners will visit this province next month.

Ice Cream in Ten Minutes

The new BLIZZARD FREEZER will do it every time. Put the cream, milk, sugar, and flavoring into the can, a little chopped ice and salt into the tub, turn the crank ten minutes and it's done.

The Blizzard costs a little more than some others, but think of the time, patience and ice that it saves. Then, too, it runs easier, lasts longer, and freezes better than a cheaper machine. Get one now and keep cool.

VISITED SPYGLASS GROUP

Found Property Much Better Than Was Anticipated

R. G. McLeod and J. A. Magee of the Spyglass Mining and Development company have returned from a visit to the mine near the head of Poplar creek. Mr. Magee is managing director of the company and Mr. McLeod is secretary-treasurer. In speaking about the mine Mr. McLeod said yesterday: "We found very little snow; in fact there is no snow on the ledges where the tunnels are. We made a careful examination, following the vein up the hill for a distance of 2000 feet and took average samples of the paystreak and assays since made shows that it goes $2.80 in gold, 241 ounce in silver, three per cent copper and 24 per cent lead to the ton. Samples taken from the rest of the ledge, which is about four feet wide, show that the ore can be profitably treated on the ground. A force of men have been put to work under the formanship of Patrick Devine. The development work will be vigorously prosecuted from now on. Supplies have been sent in and soon the force will be icreased.

"While there has been several snowslides during the winter on the trail these can be avoided by building the wagon road on the opposite side of the creek from where these slides occur.

"Mr. Magee has gone on to the coast to ascertain what aid can be secured from the government towards the construction of a wagon road from Poplar to the Spyglas group. The Spyglass Company is willing to bear onsiderable of the expense of the construction of the road provided it can get some aid from the government.

"Mr. Magee is more than pleased with the property. This was the first time he had seen it and he declared that he had not the slightest doubt the Spyglass group making a mine of more than ordinary importance. While at the coast he believes he will be able to dispose of the balance of the underwritten stock. He expects some people from the east about June 15th, who, if the property on examination meets with their approval, will take all the stock which the company may have for sale."

THE SENIORS WON

The First Basket Ball Match of the Season in Nelson

Last evening a most interesting game of basket-ball was played on the public school grounds between girls representing the senior and the junior school girls.

At 7:20 the whistle blew with the senior team consisting of the following: Forwards Jean Clark, centre; Ida Rammelmeyer, right; Lulu Ellis, left; backs, Eva Mackay and Mable Swartz; facing the left goal, and the juniors consisting of: Forwards, Ethel Ritchie, centre; Nellie Annable, right; Nettie Graves, left; backs, Amy Swannell and Edna Ellis, facing the east goal.

From the start off the game waxed warm and the first goal was scored by Mable Swartz in 7 minutes. The play was very even for some time but the seniors gained somewhat by free throws for the basket, principally on account of fouls made on throwing in by the juniors. Eventually one of these reached the basket and one more point was scored. This was the last point made in the first half and the score now stood 3 to 0.

In the second half the juniors got the best of the grounds and the wind and the tables were turned as they again and again made rushes on the goal. In three minutes a fine throw was made by Nellie Annable from far out in the field and landed safely in the net. By this time the crowd of onlookers were well warmed up in the excitement of the game and every good play was loudly cheered and though, during the last few minutes of the game the juniors had the best of it they were not able to score, the game ending 3 to 2 in favor of the seniors. So much enthusiasm was shown by the players and onlookers that there will probably be another game arranged for the near future.

PLAY BALL AT SALMO

A Ymir Player Put Out of Business for Three Hours

[Special to The Daily News.]

Ymir, B. C., June 6—John Harris and C. F. Bone of Spokane, are visiting their mining interests here. Mr. Harris is managing director of the Silver Crown Consolidated Mining Co., operating the Shiloh.

Messrs. Thomas Flynn, Hector McLarty, and Frank Tait have taken supplies out to the Highland Chief property, adjoining the Hunter V. mine on the north. This is a bright looking prospect and the owners are looking forward to big things. A new company has been formed to take hold of this property composed of American and English capitalists.

A baseball game between Ymir and Salmo was played Sunday at the latter place. Everything went well up to the seventh innings, when R. C. Sheedy was treacherously struck on the head by a Salmo player and knocked into unconsciousness from which he recovered some three hours later at the Ymir hospital, where is now confined. For some time it was feared that his spine was affected but fortunately this was not the case and he will recover in a few days.

GLENFALLS STRIKE

Closing Down of Mill Will Cause a Shortage of Paper

Glenfalls, N. Y., June 7—A meeting of the labor union, which called a strike at the local paper mill of the International Paper Co., was held today to discuss plans for the strike. It is believed that the men desire to bring about the general closing down of the mill, which it is feared will create a shortage on the market. The entire product of the mill, 100 tons per day, was taken by one New York newspaper.

WINNIPEG NEWS NOTES

Winnipeg, June 7—City water rates will be cut in two on July 1st

The building permits to date this year aggregate $3,334,000.

The proposed Henley crew of the Winnipeg Rowing club is holding practice spins at Rat Portage, and satisfactica is felt at the progress made

NELSON, B. C.

SECOND WEEK OF TRIAL

CONDITION OF MINES AFTER THE EXPLOSION.

DRINNAN DECLARED NOT TO BE A HOSTILE WITNESS.

The first day of the second week of the trial of the damage action against the Crow's Nest Pass Coal company came to an end yesterday, and there is no visible sign that the plaintiffs are nearing the conclusion of their case.

Robert G. Drinnan, the defendants' superintendent, was in the witness box for nearly the whole day, and in answer to question put by Mr. Davis, gave a great deal of evidence in detail that will doubtless be of good service to the defendants when the argument of the case is reached. Shortly before the time for adjournment was reached, Mr. Drinnan was finally excused, and the plaintiff's called Hugh Dickson, a miner, who declared he had been coal mining since he was nine years old.

Mr. Dickson was tracing the condition of both the mines, when the hour for adjournment was reached.

In the hands of Mr. Davis, Drinnan's story ran along smoothly enough and it was only when Mr. Taylor started to re-examine, that over an hour was used up in obtaining a ruling as to the limit of counsel's questions. Mr. Taylor sought to go much further than Mr. Davis had done on cross examination, but finally the court rejected a formal motion to permit the plaintiffs to contradict Mr. Drinnan's testimony by sworn statements said to have been made by him at the inquest held just after the disaster. In effect the court held that Mr. Drinnan remained the plaintiffs' witness that his answers and his general demeanor in the witness box had not shown that he was in any case a hostile or adverse witness and that the plaintiffs having elected to call him as their witness, they could not be heard to contradict him. Towards the close of the day, and shortly before Mr. Drinnan finally left the box, the learned judge, in referring to his previous ruling said that he had been specially on the alert to see if Mr. Drinnan had proved himself adverse in any way, and that his evidence and his manner of giving it had been practically the same, both to Mr. Davis and to Mr. Taylor, under the circumstances an implied compliment to the witness.

When the court opened in the morning, Mr. Davis handed Drinnan a letter from inspector Dick written in April, 1901, to the witness notifying him of the presence of gas in No. 2 mine and instructing him not to use black powder without watering, in cretain sections. Subsequently the portions of the mine referred to became naturally damp and Dick said that watering could be discontinued. The witness from notes, explained the make-up of the map of the mine workings, which has been before the court since the trial commenced, pointing out by the colored shading where the workings were either damp or more than damp, i.e., had pools of standing water. The area so covered was defined in detail from point to point in No. 2 mine, while it included all of No. 3.

The witness said that the coal and coal dust taken out of the working faces in Alder's level and Beaver deeps would be wet when put into the coal cars and a good deal of water would go with the coal and trickle out as the cars went through the haulage ways. There were damp spots all through the old workings, where the water dropped from the roof. Out of both mines there was pumped daily an average of 187,200 gallons in the 24 hours, equal to a 16th of an inch rainfall.

Mr. Davis—What is average rainfall per year at, say, Victoria.

The witness—I think about 29 inches.

The court—No, 24 inches is the average.

Mr. Bodwell—Perhaps the witness was thinking of Vancouver.

The two classes of stoppings, permanent and temporary, and the coal cars in use at the mines at Coal Creek and at other mines were gone into, and the witness stated that there was more gas in McDonald's level than in any of the others. Some of the men had been prosecuted and fined for having matches in the mines. A general idea was given of the direction of the force of the explosion, coming out of No. 1 room McDonald's level and extending through the workings. He never heard of old working in pillar and stall mines or long wall mines being watered, or any watering being done except prior to firing. English mines were dry, dusty and gaseous and no watering was done. The daily reports of the fire bosses and overmen were identified by the witness.

Then the witness gave a detailed account of what was found on the joint inspection of the mines after the explosion by himself, the government experts, and the miners' committee, commencing with room 7 off the hoist entry. The finding of the various bodies at the different points, their condition and position, the appearance of the working faces, the position of cars, fallen timbers, evidence of fire, and the direction of the force of the explosion were all gone into minutely. Stress was laid on the fact that there was no evidence, but the contrary, of any recently fired shot just before the explosion, except in room 15, machine entry, where a shot had been recently fired. It was a bottom hole, well placed and had not blown out. It did not bear out the theory that the explosion had started from this point. Room No. 1 machine level, another suspected place, as a point of origin of the explosion, was gone into very fully, the witness having already sworn that in his opinion the initial point of explosion was probably in the face of McDonald's level. The working face was said to be a "winning working" and consequently damp, and for this reason more inclined to make gas.

At 12.30 Mr. Taylor commenced his re-examination of Mr. Drinnan and the witness remained in the box until after 4 o'clock, allowing for the usual lunch adjournment. A good deal of time was taken up during the afternon session by counsel arguing over the admission or rejection of certain evidence, Mr. Taylor fighting hard to be allowed to show what Drinnan had stated at the inquest, contradicting his statements on the witness stand, but this was finally not allowed by the court and the questions that were held to be admissable under the circumstances did not result in anything specially new being brought out.

At 4.10 Hugh Dickson was called by the plaintiffs and he testified that he had been a working coal miner since he was nine years old. He was at work in the Coal Creek mines on May 22nd, 1902, and had been working there since the previous October. He was working along the roadway opposite the mines at the time of the explosion and he detailed what happened at the mouth of the 1 and 2 tunnels when the clouds of smoke burst out there, and at the fan huose. The next day for a distance of 150 yards along the big trestle he found coal dust imbedded in the posts, forced in there by the explosion. He described the force of the explosion as it caught the two motor cars near the mouth of the tunnels, hurling them into the tipple. He was pretty well all over No. 2 mine the day of the explosion and he was proceeding to describe the existing conditions when the court rose for the day until 10 o'clock this morning.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory,

of the location.

Placer Mining.—Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 feet square; entry fee, $5, renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end of the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miners for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, $100 per mile for first year and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a mining recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, $10. Royalty at the rate of two and one-half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

HAS THREE CYLINDERS

A STEAM ENGINE THAT CAN TRAVEL 80 MILES AN HOUR.

IT IS OF A NEW DESIGN, CONSTRUCTED FOR SPEED.

The sensational high-speed experiments in electric traction that have been carried on during the last few months in Berlin are not the only efforts in this direction. Similar trials have been made in the same country with high-speed steam locomotives, and one of the new engines just completed a series of successful trips on the Goettinger-Hannover railroad, resulting in a uniform speed of eighty miles an hour. Says Prometheus:

"The sum of the resistances which must be overcome by the force of the steam in an engine running at a high speed is greatly increased through the lateral motion caused by the irregular movement of the two pistons. In order to do away with this defect and to obtain perfect symmetry and an equal distribution of forces, G. Wittfeld has designed an engine with three cylinders—one in the middle, driving the front axle, and one on each side, as in ordinary engines, driving the wheels on the rear, or second axle. The two connecting rods of these latter wheels work at the same constant angle, while the middle connecting rod is so inclined that the shrank-angle is niety degrees, thus insuring a perfectly smooth and steady motion even at the highest speed. The engine is compound, the middle cylinder receiving the full pressure; the two driving wheels on each side are connected by coupling-rods. Besides the driving axles, there are two independent four-wheel trucks—one at the front and one at the rear. . . .

"Both engine and tender are completely roofed and walled, with windows at regular intervals; the smokestack surmounts the roof by only 15 3-4 inches, and the two steam-domes are hardly visible, so that the spectator might believe that he was looking at part of a Pullman train rather than at a powerful engine with its tender. . . . .

"The front end of the engine is cone-shaped, to decrease the resistance of the air, and from this point the engineer manipulates the driving mechanism. He communicates with the firemen in the rear through a speaking tube and also by means of passageways along the sides of the engine. These passageways are continued through the tender, and the latter can be connected with the following car like any ordinary Pullman coach, thus enabling the conductor of the train to communicate with the engineer at any time and in kind of weather without the slightest inconvenience."

The engine, will be shipped to America to be exhibited at the St. Louis Fair.

THE SUN'S HEAT.

A Swiss Physicist States That It is Growing Weaker.

It is announced by a Swiss physicist that during the past few years the heat received from the sun has been growing less and less ,although the rate of this diminution reached its height a year ago and is now lessening. That the cold weather of the past year is a result of this diminution is not stated, but the inference seems natural. It is also suggested that the phenomenon is due to increased opacity of the atmosphere, which may possibly be caused by volcanic dust. Says a writer on the subject in Ciel et Terre (Paris):

"In the month of March, 1903, the Swiss physicist Henri Dufour announced the fact that the intensity of the solar radiation on the earth's surface had been decreasing considerably for some time. Basing his conclusions on observation made at Lausanne and Clarens with Crova's actinometer, M. Dufour found that the weakening intensity dated from the month of December, 1902, and that it had progressed up to the month of March, 1903, afterward gradually diminishing.

The existence of an exceptional opacity of the atmosphere for several months was confirmed by the measurements of M. A. Gockel, by the observations of M. Max Wolf at Heidelberg, and by those of Samuel Langley at Washington. Finally, this dimunition of the intensity of solar radiation on the earth's surface was also proved at Warsaw, where, since the month of December, 1900, systematic observations had been made with an actinometer of Angstrom-Chwolson.

"In a recent communication to the Paris academy of Sciences, M. Ladislas Gorcynski cites for the years 1901-03 data that prove this diminution; and also shows that a more considerable diminution began at Warsaw in May, 1902, and lasted during a series of months in this and the following years, reaching its highest degree in the spring of 1903. Toward the end of this last year the progress of the diminution of intensity, compared to that of 1902, appeared to cease, although the absolute values continued to fall relatively to those of 1901.

"The cause of this increase of atmospheric opacity to solar radiation is not yet clear. M. Dufour has suggested that it is connected with the Martinique eruptions. The extraordinary falls of dust which during the three years past have been observed in Europe also suggest this as a possible cause of the phenomenon in question. Nevertheless these are as yet only suppositions, whose exactness can not yet be proved without more complete positive data."

CERTAIN TO CELEBRATE

A VIGOROUS PROTEST AGAINST CLOSING RECREATION GROUNDS

REPRESENTATIVE MEETING AT THE CITY HALL LAST EVENING

As a result of the meeting of the dominion day celebration committee at Sharp & Irvine's office last Saturday evening, when the civic board of works anouncement was given out that the city recereation grounds would be closed for the season, a most representative gathering assembled in the city offices last night and such a vigorous protest was unanimously made against the action of the board of works that presumably nothing more will be heard of the proposition and the preparations for the celebration will advance speedily from this time on.

At 8 o'clock when mayor Mamilton called the meeting to order last evening the city hall was packed to the doors by an exceedingly representative crowd of public spirited citizens. Mr. Sharp acted as secretary for the meeting, and his worship lost no time in starting the discussion.

In turn different persons present pointed out that if the board of works insister on closing up the grounds for the season, it would mean no lacrosse here this year and that the celebration on July 1st and 2nd would have to be dropped. That the money, which would otherwise be spent here on the holidays would go out of the city, and that the celebration would not in any way interfere with the exhibition three months later.

The meeting was a unit in favor of keeping the grounds open and of celebrating dominion day in good fashion.

The following resolution was moved by John A. Turner, seconded by George Bartlett:

"That this meeting vigorously protests against the city council closing the recreation grounds on July 1st."

When the motion was put by the mayor, it carried unanimously amidst applause.

Then Charles Walmsley moved, seconded by Mr. Hawthorne: "That the mayor be requested to interview the other members of the city council and inform the celebration committee at the earliest possible moment if the recreation grounds would be available on July 1st."

The motion carried unanimously and his worship stated that he would interview the aldermen today and advise the celebration committee, of which he is chairman, of the result.

The celebration committee will be called together as soon as the mayor has reported and the feeling of the meeting was that the celebration program should be vigorously pushed ahead at once.

CORPUS CHRISTI DAY

How It was Celebrated at St. Eugene Mission

[Special to The Daily News.]

Cranbrook, June 6—Corpus Christi Sunday has been observed at the St. Eugene mission, located six miles from town, for many years past, but never before with such pomp and religious fervor as characterized the exercises yesterday. Fully 250 Indians, including those residing at the mission and visiting Indians from Creston participated in the services. In addition between 200 and 300 white people were present from Cranbrook, Fort Steele and Marysville. The exehcises of the day consisted of regular mass in the morning and the religious parade in the afternoon in which there were over 200 Indians in line. Volleys were fired by the firing squad as the devotees of the religious rites marched beneath the arches erected for the occasion, which was for the purpose of driving away the devils that threaten the moral and religious status of the Indian. The day was one of solemnity and ecclastical devotion on the part of the Indians, and there were some who participated so old and infirm that they were hardly able to follow in the line of march.

WILL BUILD FROM YAHK

Vice-president Whyte of the Canadian Pacific railway has announced from Winnipeg that his company will build from Yahk on the Crow's Nest line to the American boundary line. He said that the Canadian Pacific would not build to Seattle or Spokane but that Washington companies would build from those towns to the border to connect with the Canadian Pacific. The importance of this announcement lies in the fact that this is the first time the company has officially admitted its intention to enter the state of Washington. Another story says that under a new arrangement recently entered into by Mr. Corbin, the Spokane line will not be a branch line of the Canadian Pacific proper, but will be built by local and eastern capital and operated independently of the Canadian road, though with such rates and traffic arrangements as to enable it to compete with the American transcontinental roads for through traffic both east and west.

APPLICATION TO TRANSFER LIQUOR LICENSE

Notice is hereby given that I intend to apply at the next sitting of the Board of License Commissioners of the City of Nelson for leave to transfer the retail liquor license now held by me for the Royal Hotel Stanley street, Nelson, B. C., to Louella V. Roberts.

Dated at Nelson, B. C., May 26th, 1904.

SOLOMON JOHNS

IN CHAMBERS.

The following application have been disposed of before his honor judge Forin:

Woodcock vs. Benedum, Hannington applied to add administrator of C. T. Benedum deceased, as a party defendant. Order made.

Glover vs. C. N. P. C. Co., O'Shea for plaintiff, Macdonald, K.C., for defendants. Application to consolidate this and 17 other suits with the Leadbeater and other actions now consolidated. Order granted. Stay of proceedings granted except as to defendants who ask to have reserved the question of their right to apply for security costs. This right reserved need not be set out in order.

In re estate of Thomas Downy, deceased, Johnson applied for administration of estate. Order granted.

GOOD FUSE NECESSARY

Good fuse is absolutely essential for successful mining work. A poor quality of fuse will cause more misfires than the saving in price of such an inferior material over good fuse is worth, says the Denver Mining Reporter. This same remark applies also to the choice of an improper class of fuse, e.g., if a double tape fuse is used in damp ground, misfires are apt to be very common. A misfire always causes a delay in approaching to the face or causes men to be more careful in the picking down of the broken material; miners are somewhat timid in drilling into ground where an unlocated misfire is known to have occurred. It also causes a delay when the hole has to be recharged and fired again. It is poor policy to economize in the fuse department, and it is better as a rule to use a higher grade of fuse, when there is the least doubt regarding the quality, e.g., double tape fuse should never be used where the ground is damp, it is better to use triple tape. It is a poor idea, also, to use two different grades of fuse in a mine, that is to say double tape fuse in the dry workings and triple tape in the wet workings. It is almost inevitable that these fuses will become mixed and a misfire will be caused.

A CLOTH PEDLAR DEAD.

Winnipeg, Man. June 7.—J. D. Boyle, cloth pedlar, died in Brandon hospital today. He was found a couple of days ago on the prairie suffering from too much liquor. He had $500 on him at the time. He came from Stratford, Ont.

PENITENTIARY SUPPLIES

Sealed tenders addressed "Inspectors of Penitentiaries, Ottawa," and endorsed "Tenders for Supplies," will be received until Friday, 24th June, inclusive, from parties desirous of contracting for supplies for the fiscal year 1904-1905, for the following institutions, namely:—

Kingston Penitentiary.
St. Vincent de Paul Penitentiary.
Dorchester Penitentiary.
Manitoba Penitentiary.
British Columbia Penitentiary.
Regina Jail.
Prince Albert Jail.

Separate tenders will be received for each of the following classes of supplies:—

1. Flour (Canadian Strong Baker's).
2. Beef and mutton (fresh).
3. Forage.
4. Coal (anthracite and bituminous.)
5. Cordwood.
6. Groceries.
7. Coal oil (in barrels).
8. Dry goods.
9. Drugs and Medicines.
10. Leather and Findings.
11. Hardware, Tinware, Paints, etc,
12. Lumber.

Details of information as to form of contract, together with the forms of tender, will be furnished on application to the Wardens of the various institutions.

All supplies are subject to the approval of the Warden or Jailer.

All tenders submitted must specify clearly the institution, or institutions, which it is purposed to supply, and must bear the endorsation of at least two responsible sureties.

Papers inserting this notice without authority from the King's Printer will not be paid therefor.

PLUMBING

We are prepared to do all kinds of plumbing, steam and gas fitting on the shortest notice. Estimates given. E. K. Strachan & Co., Baker street, Nelson Phone 262.

MUSIC LESSONS

HAS YOUR LOVE of Music died out because you cannot play the Piano as you used to do? Six lessons in McDonald Smith's system of Touch and Technique will more than restore your powers without any hard practice at the keyboard, and this, should your age be 16 or 60. Or, is your playing going off from lack of time to practice? A few lessons in the system will improve your playing to a degree you would hardly credit, though you should touch no keyboard for weeks. Complete course, $10. F. J. Painton, Corner Hall and Silica

UNDERTAKING—EMBALMING

W. R. BEATTY, CRANBROOK, B. C., Undertaker and Embalmer. Telegraphic orders will receive special attention Will go anywhere at any time

NELSON'S NEWS OF THE DAY

John M. Harris is a guest at the Hume He is on his way to Sandon after a visit to Spokane.

The regular monthly meeting of the board of trade will be held at the rooms tomorrow evening.

The tram company started the cars yesterday on the transfer system, the cars meeting at Ward street. This system will be maintained until the Baker street roadway is repaired.

Corinthian lodge No. 23, A. F. of A. M., meets this evening for general business and the conferring of degrees. The grand lodge meets in Rossland on the 23rd and 24th.

R. G. McLeod and family leave for Spokane today. Mrs. McLeod and daughter intend to remain in Spokane for the summer. As soon as they are settled in a new home Mr. McLeod will return to Nelson.

The regular monthly meeting of the University club will be held in the Success club rooms on Saturday, June 11, at 8 p.m. W. J. Baird will read a paper on "Some Recent Advances in the Science of Psychology."

Captain J. C. Gore, superintendent of lake and river steamers of the Canadian Pacific, has returned from a 15 days' trip to Portland and Seattle. He enjoyed the trip very much but says he is glad to be home again.

D. C. Johnson, who has for some time past been ore buyer for the Le Roi smelter at Northport, has returned to his former employers, the American Smelting and Refining Co., and is now working for the lead trust with headquarters in Spokane.

At the mining rescorder's office on Tuesday certificates of work were granted to Mrs. Maggie Newitt on the Caledonia. To Francis Holland on the Good Hope. To A. G. Shaw on the Blake and to M. B. Muir on the Iowa. W. F. Edgar located the Big Horn on the summit between Porcupine and Hidden creeks.

A carload of butter arrived here from Ontario on Monday afternoon at 5 o'clock and yesterday by noon it had all been disposed of by the wholesaler to whom it was consigned. It was gilt-edge creamery butter, and hence commanded a ready sale. The wholesaler to whom it was consigned remarked, when the last box had been ordered, "There's not the least trouble in the world about selling good goods."

R. J. Salisbury, of R. A. Rogers and Co., Winnipeg, is here on a visit to Fred Starkey who is the agent for the firm in this city. In speaking of business connections in Winnipeg he said that his firm had more business there than it can handle. The trouble is to get the goods to do the business with. Immigrant are pouring into Manitoba and the Northwest by the hundreds, he says. He is greatly impressed with the way business is shaping itself in Nelson and the Kootenays generally and looks forward to a period here when the prosperity will equal that which now prevails in Manitoba. Mr. Salisbury and Mr. Starkey intend to make a tour of the Slocan before the former returns to Winnipeg.

Fred Starkey has returned from a business to the Boundary. The fact that the Great Northern intends to build a branch from Grand Forks to Phoenix and to extend its line from Curlew to Midway has greatly stimulated the Boundary and better times than ever are anticipated there this fall and summer. The sub-contractors on the Phoenix branch are assembling their horses, scrapers, carts and men and in a few days all will be actively at work. Work on the Curlew-Midway section is already in progress. Several hundred men will be employed on the work and these together with the regular forces that are employed in the mines and else where will make the Boundary district an extremely lively for the next seven or eight months.

This is band concert night, but unless better lighting facilities are provideil the band will either postpone their concert or play on the verandah of the Victoria hotel on Victoria street. Fred L. Irwin said yesterday that most of his musicians were comparatively new beginners and needed plenty of light to read their music by. He added that with proper light the band would make a good showing and the men did not like playing at a marked disadvantage.

The excavation for the wooden flume, flume which is to carry off the water from the Ward street sewer to a natural channel was completed last evening. The excavation extends along Latimer street from the intersection of Ward and Latimer almost to the corner of Kootenay and Latimer streets, a distance of 600 feet. The maximum depth of the trench is nine feet and the average six feet. The box for the flume which is to be two feet square, is partially laid. City engineer McCulloch expects that the work of laying the box flume will be finished this evening and the flow of water diverted from the Ward street sewer. Then the necessary repairs to the sewer can be made. The water ran down under the establishment of D. McArthur and Co. and the Hume hotel all day yesterday, but no further damage resulted. There is no danger of further harm unless there should be a storm, and then more damage might result. Mr. McCulloch has the situation so ell in rand that he feels he could divert the water from Ward street were it necessary to do so quickly in order to avoid further damage. The intention is to rebuild the brick manhole on Baker street at its intersection with Ward. Baker street will be replanked where it is washed out and a place left which can be opened and dirt dumped in by people who are grading and who have no place in which to put the earth. This will be cheaper than to go to the expense of making a fill at present. The hole on Ward street above Baker will have to be filled up as soon as the work can be done.

TRADE OF PROSPECTORS.

What the Men in the Hills Take Out With Them.

"Quite a number of prospectors are getting out into the hills," said a grocer yesterday while putting up an order he had just received for a couple of men who were to be gone for about ten days, in the hills.

"What do they usually take?

"Oh, they carry only necessities and dispense with all sorts of luxuries. They usually order flour, beans, rice, condensed milk, tea, coffee, butter, candles, bacon, dried fruit and matches. As to the quantity taken it runs from 75 pounds to 500 pounds. If a couple of men are going into places where they are obliged to pack their supplies the quantity taken varies from 75 to 100 pounds. If they are going for the purpose of doing assessment or development work in places where horses can be used to carry their provisions and camp equipage, why they will take from 250 to 500 pounds. While they do not care for luxuries what they do take they want to be of the very best. Yes; our trade at this time of the year and from now till the snow begins to fall from the prospectors amounts to a considerable."

HOTEL ARRIVALS.

FINE LOT OF IRON BEDSTEADS

D. J. Robertson and Co. are in receipt of a carload of iron bedsteads. There are some thirty or forty different styles in the lot, and all are the very latest makes. They are very handsome in appearance and have a patent locking device which is so arranged that the mattres can be put inside of the sides or on top of them. The colors of the bedsteads are varied but all are artistic. The prices vary so that those who desire a cheap or a dear bedstead can secure what they want. Call and inspect them, the firm takes pleasure in showing its goods.

DISPOSITION OF CASES

[Special to The Daily News.]

Victoria, June 7—Deadman Island case of the attorney general vs. Ludgate was stood over at sittings of the full court today, owing to the absence of Mr. Howay, one of the counsel. The case of Hopper vs. Dunsmuir also stood over. The case of King vs. Wilson was adjourned to the Vancouver court. In the second case Fred Peters appeared in court for the first time in over a year. He is still far from strong, but is recovering.
