LEFT ON THE PRAIRIE

Kansas Refused to Allow Colorado to Deport Miners to Her Soil

They Were Put Off Cars, Intimidated by a Volley, and Compelled to Shift for Themselves

Syracure, Kansas, June 11.—Ninety-one deported Victor, Colo., miners sent out on a special train in charge of militiamen, were left destitute on the prairie today, without food or water, near the Kansas state line. The miners had been sent out of Victor yesterday. When the special train bearing the deported men was within half a mile of the Kansas line it was stopped by sheriff Bradick, of Hamilton county, and 40 deputies who notified lieutenant Cole that under no circumstances would the train be allowed to cross the Kansas line and, further, that the deported men were not wanted in Kansas.

Lieutenant Cole assured the sheriff that the train would proceed no further. Then lieutenant Cole ordered the miners to quit the train in a hurry and told them they were not wanted in Colorado and had better go east. Half a dozen of the soldiers fired a volley in the air to intimidate the men and the train started west with the militiamen, leaving the miners to make their way to some habitation as best they might. Sheriff Bradick called for the leaders of the unionists and notified them that they must not cross the Kansas line.

After a long weary tramp they straggled into Holly Colo., a small town near the Colorado-Kansas boundary where they were furnished with food at the big Salvation army station located there. Despite the emphatic command of lieutenant Cole they, after rest, again took up their journey west, and started overland for Lamar, Colorado.

Denver, Colo., June 11.— A special to the Times from La Junta, Coloaro, says: A militiaman, while in this city, struck a Santa Fe ticket agent named Bachrack over the head with a six shooter, inflicting a very bad scalp wound and threatened to kill him.

C. L. Seeley and M. M. O'Neil, were brutally treated by the militiamen when they passed through for the state line. Mr. Seeley is a newspaper correspondent and endeavored to get an interview with some of the militiamen, but they walked him off the platform at the point of a rifle. Mr. O'Neil, a business man, was standing on the platform, when five of the militiamen attacked him, pushing him and striking him with the points of their guns and because he did not run to get out of their way, he was beaten, thrown into the waiting room and put under guard.

Cheers were given for the miners by the crowd gathered around the station, while a change of engines on the military train was being made.

Supplying the wives and children of the union men in Cripple Creek district with provisions and taking care of the deported men are serious problems before the executive board of the Western Federation of Miners, at the present time. At the meeting of the board today it was decided that commissaries shall be established at Cripple Creek, Victor and Aanaconda. Whether the miners win or lose in the present strike the board is determned that their wives and children shall not suffer. Secretary Haywood, of the federation, said that the men deported to the Kansas line, who are now at Holly, will be brought to Denver at the expense of the federation, if they wish to come. He sent money to Holly today for their expenses.

BACK FROM COLORADO

FRANK PHILLIPS OF THE W. F. of M. ON THE SITUATION.

THE CITIZENS' ALLIANCE AND THE FEDERATION.

Frank Phillips secretary of the Nelson Miners' union, who was a delegate to the Western Federation of Miners' convention at Denver, Colorado, returned last evening to the city, after a three weeks' attendance at the convention. Interviewed last night as to the present situation in Colorado, he said:

"The convention was called at Denver, in place of Butte, because the president of the federation, Charles Moyer, was under arrest and confined to jail in Telluride. A lot of routine business was transacted at the convention, but the chief matter before the gathering was the situation in the Cripple Creek district. The trouble there has been in progress for the last ten months; the miners organized a sympathetic strike on behalf of the millmen of the state, to enforce the eight hour law passed by the people by a majority of over 40,000 votes last year. The struggle has now finally reached a stage in which the citizens' alliance is arrayed against the federation. The mine operators were willing to come to terms with the men, but the alliance stepped in and prevented this, and have since regularly organized a war of extermination against union labor.

"The reason why the citizens' alliance are taking such an active part in the matter is on account of the co-operative general stores started up by the federation, and practically maintained by union labor. The federation's move was made imperative by the unfair action of the citizens' alliance in the first instance. The avowed intention of the alliance from its first inception was to drive the unions out of existence, and this was never denied by the prime movers of the alliance. This has brought about a very acute state of affairs. In order to gain their end the agents of the alliance have endeavored to induce the miners to commit overt acts of violence so that the military power could be evoked. The officials of the federation have constantly advised all their members to observe the law strictly, so that no excuse could be given for usurping the civil power as wanted by the alliance

"Some days previous to the fatal explosion at Golden Circle depot, the federation in session decided to send a special committee of three from the floor of the convention to investigate the situation in the Cripple Creek district after hearing statements from the delegates of that section. The committee consisted of Gillis, of Montana, Allen, of south Dakota and Seamen, of Rossland, B. C. The committee interviewed the secretary of the mine owners' association at Cripple Creek and had a very satisfactory consultation with him. They also ascertained that the alliance would thwart any and all endeavors to effect a reconciliation between the operators and the federation and they returned to Denver, but before they could present their report the explosion at the Golden Circle depot took place where several men were killed. As an application was pending in the supreme court at the time for the release of president Moyer, no worse thing could have happened for the federation than the occurrence at Golden Circle depot, and the result was that his release was denied, and he is still confined in the "bull pen."

"The citizens' alliance at Victor, called a public meeting directly after the explosion. The secretary of the mine owners' association was addressing the gathering and was saying: "How long shall this thing be allowed to go on," when a union miner interrupted him, and was immediately shot. There are several accounts given out as to who started the shooting, and at present no one seems to know. A few of the union men got away from the meeting and went to their hall, which was immediately surrounded by citizens' alliance men and militia, and the windows were all smashed and the building riddled with bullets. Later the books and records of the union were stolen. The men were all placed under arrest some of them were subsequently deported and others are being held to stand their trial on a charge of murder.

"Sheriff Robinson was called to the headquarters of the citizens' alliance, and ordered to sign his resignation which was already made out. To induce a ready compliance a rope was placed on the table with a hangman's noose all ready. The sheriff signed. A justice of the peace, and five others were similarly treated, and all resigned.

"A new sheriff appointed by the alliance took a local bloodhound to the cabin from which a wire led to the station at Gilden Circle, and from which it was supposed the explosion was started. The dog at once took up the scent and led the party to the residence of a detective in the employ of the alliance. The hound was called off and put on the trail a second time with the same result, and the animal was retired from service, later two imported bloodhounds were brought in and these followed a new trail for 12 miles, where they lost the scent, but fresh buggy tracks showed that whoever they had followed had driven away at this point. Whilst on this 12 mile hunt the alliance party came across a man and they tried to scent the hounds up to him, but the dogs refused. The man said, 'The hounds are not prejudiced against a union man.'

"For this remark he was thrown down and severely kicked, his body showing most brutal treatment. I saw the marks and talked with the man myself.

"I met several miners, dressed in their working clothes, who had been arrested as they came off shift from the Portland mine, a fair proposition, and they said they had been deported without warning and without any assigned cause. They had been robbed of every cent of money on them. These men telephoned back to their families and told them of their whereabouts. The wives sent word back that they and their children were literally starving, the alliance even refusing to give them bread although they had money to pay for it. The Neall Mercantile Co., friendly to union men, were forbidden by the alliance to furnish the wives and children of all union miners with food of any sort, and threatened that if food was so supplied their store would be wrecked as the co-operative stores had already been.

"I saw big, brawny men standing around headquarters in Denver with the tears streaming down their cheeks asking if they should stand idly by and see their wives and children starve to death. When I left Denver, Haywood, the federation secretary, was moving Heaven and earth to get supplies to the women and children but I don't know whether he has been successful.

"Acting sheriff Bell, of Victor, and the president of the citizens' alliance, broke down the door of the union co-operative stores with a pick. Other members broke the windows, and scattered the contents of the stores about with the points of their bayonets. Flour and strawberries were mixed up together, and coal oil poured over both to make the destruction complete, and

(Continued on Sixth Page.)

HOW KUROKI IS CHECKMATING THE RUSSIANS

Made a Pretended Forward Movement in Order to Discourage Kouropatkin From Sending a Force in the Direction of Port Arthur--Taking of Siu Yuen an Important Event in the Big Game That is Being Played

TAKING OF SIU YEN.

Japanese Have Secured a Place of Strategical Importance.

Tokio, June 11.—The taking of Siu Yen, reported by the Japanese army, is of great strategical importance, being situated about 40 miles north of Kai Ping and 45 miles southeast of Hai Cheng, It comands perfectly the roads to both places. Saimatsze is also an important point, as it controls the roads to Liao Yang and Mukden. By following this route the Mao Tien Ling pass, a strongly fortified and almost impregnable Russian stronghold will be avoided on the advance of the Japanese army northward.

SUBMARINE BOAT INCIDENT.

The United States Will Be Called on For An Explanation.

St. Petersburg, June 11.—The Novoe Vremya in discussing the report that the submarine boat Protector had been shipped from New York for Japan, expresses the hope that the United States government will make a detailed explanation of why the boat was allowed to leave the United States.

Washington, June 11.—The United States government has received no information regarding the reported sale to the government of Japan of the lake submarine boat Protector. The boat was understood to be preparing to compete with the Holland boat Fulton, for endurance, speed and availability as a torpedo boat under water and awash. The Fulton has had its trials, but the Protector has not yet appeared on the course and the naval trial board does not know where she is, or whether she will be presented at all, although the lake people have not notified the department of her withdrawal from the contest. It make little difference from an international point of view what becomes of this boat, in the opinion of the state department, since Hamilton Fish, when secereary of state, laid down an opinion to the effect that a torpedo boat capable of being carried on the deck of a ship might properly be regarded as an article of merchandise, and so might be sold to a belligerent without violation of neutrality, but subject to the risk of seizure on the high seas.

GENERAL KUROKI'S PLAN.

Endeavoring to Prevent the Russians From Going South.

St. Petersburg, June 11.—The view of the general staff is that, as the Japanese column which reached Siu Yen was not followed by either of the main armies in Southern Manchuria, the Japanese have no present intention of advancing on Hai Cheng, but have sent forward a force as a feint and to discourage, as much as possible, the dispatch of a heavy Russian force down the Liao Tung Penninsula. Neither does the general staff believe that the enemy's column at Saimatsze, is of a serious character. The opinion being that general Kuroki continues to dangle before general Kouropatkin's eyes a double objective, but that he is not yet strong enough to risk a whole advance. This belief is based on calculations that the enemy has not more than 130,000 men all told in southern Manchuria. No fresh news has been received in regard to the situation around Port Arthur. Private advices from Liao Yang indicate that the Russian forces at Vafandien are prepared to retire northward if seriously threatened.

IMPORTANT CONFERENCE.

The Russian Emperor Decides to Substantially Increase the Navy.

St. Petersburg, June 11.—A conference was held at the palace today between the emperor, grand duke Alexis, the Russian high admiral and vice admiral Evlyn, chief of the admiralty, at which it was decided to carry out without change the naval program provisionally adopted before the outbreak of the war. The program covers a decade. The ships will be divided between the Black Sea and Baltic fleets and no provision is made for the Pacific fleet. The construction of the new vessels will begin immediately. The ships will probably all be laid down in Russia, though France may possibly get a contract. The proportion of battleships and cruisers will be practically the same as proposed by the general board at Washington for the United States navy.

FIGHT AT SIU YEN.

Associated Press Man Gives Good Description of It.

St. Petersburg, June 11.—Describing the fight at Siu Yen, a correspondent of the Associated Press says that the Russian forces were south of the town guarding the Siu Yen-Taku Shan road. The artillery was strongly posted on the hills along the road from Siu Yen to the Yanda Poodsa, with a mixed company guarding the flank, and another company posted on Loodupfy hill. The Russian transport train was at the village of Kouloons, guarded by Cossacks.

The Japanese first apeared upon the road between Uhausa and Siu Yen and moved on the Russian position in close formation. They were met with an excellently directed artillery fire and forced to retire with a heavy loss.

Meanwhile the Japanese infantry advanced upon the hill occupied by the Cossacks to whose assistance three companies were successfully brought up. After a gallant fight of two hours, the Russians retired, but it was a barren victory for the Japanese. The Russian artillery was turned on the hill vacated by the Cossacks and the Japanese found the position untenable and were forced to flee.

The Japanese brought up a mountain battery and enfiladed the Russian flank. A sharp artillery duel ensued. The Japanese battery, however, was quickly silenced and followed out of range by the Russian shells. The Japanese finally turned the position held by the Cossacks on the hill east of Siu Yen and forced the Russians to retire. The movement was executed in an orderly manner and covered by their artillery, the Russians retired to Modyanka and thence through the hills to the Hai Chang road.

LAYING FOR THE SIVOUCH.

A Japanese Cruiser Watching a Russian Gunboat at Ka Chen.

New Chwang, June 10.—(Delayed in transmission)—Messengers sent to ascertain the truth of the reports that the Russians are moving large forces in an attempt to relieve Port Arthur, returned here last night without having learned anything. A Japanese cruiser has been seen near Ka Chen during the last three days, and is believed to be watching the Russian gunboat Sivouch which is bottled up here, to prevent her making a dash for the open sea and attempting to reach a neutral port and there disarm.

SENDING TROOPS FROM MUKDEN

Kouropatkin is Reversing Kuroki's Flanking Movement.

St. Petersburg, June 11.—The correspondent of the Associated Press hears that general Kouropatkin is reversing general Kuroki's flanking movement north of Siamatsze by sending troops from Mukden to turn Kuroki's right wing. A rumor is current at the admiralty that the Japanese battleship Yoshima is on the rocks near Port Arthur. The source of the report is not exactly traceable. The Yoshima is a firstclass battleship of 12,200 tons displacement.

SCRAP AT PORT ARTHUR.

Battle Fought Within Seven Miles of Inner Forts.

Che Foo, June 11.—The Chinese arriving from Port Arthur state that a battle was fought on June 9th within seven miles of the inner forts of Port Arthur, and that the Japanese fleets supported the Japanese army from the coast of Liao Tung peninsula. Conditions in Port Arthur are said to be unchanged.

NEWS FROM PORT ARTHUR.

Sent to Che Foo to the Office of the Russian Consul.

London, June 11.—The Daily Mail's Che Foo corespondent says: "The Japanese consul has discovered that a wireless telegraph apparatus was attached in the night time to the Russian consular flagstaff here and that the consulate is in communication with Port Arthur.

JAPANESE MOVEMENTS.

Liao Yang, June 11.—The Japanese are constructing a railway from Feng Wang Cheng to Shakaded Si, 30 miles to the southeast of the mouth of the Yalu river. The movement of the Japanese along the sea is being closely watched. They are proceeding from Taku Shan to the southwest, following the coast, evidently reckoning upon the co-operation of their fleet.

JAPANESE LOSE A COMMANDER.

Vafangow, Liao Tung Peninsula, June 9.—(Delayed in transmission) — The Japanese lost a prominent commander in the last fight, and, according to reports from Chinese sources, they are displaying signs of despair, shaking their fitss in the direction of the Russian forces.

MORE MINES DESTROYED.

Tokio, June 11.—Admiral Kataka reports that on Wednesday and Thursday last he discovered and destroyed 16 mines in Tallen Wan bay. A landing made at Takukao showed that the pier was undamaged and that two large reservoirs were intact.

WHAT A PAPER THINKS.

St. Petersburg, June 11.—A leading paper in concluding an article on the military situation in the far east inclines to the belief that fighting has already occurred in front of Port Arthur and that the Japanese sustained a reverse.

ARE HARD TO BEAT.

The Closed Pool Rooms Will Use Wireless Telegraphy.

Memphis, Tenn., June 11.—A local paper publishes an interview with one of the promoters of a pool room here, which has been closed, in which he says the place will be re-opened on Monday and that wireless telegraphy will be used to transmit the results. After this announcement it was learned that a representative of the Wireless Telegraph company was in the city and that his visit was to make arrangements to erect masts and install instruments at this place as a station in the circuit, which the company proposes to build. He said the company would make arrangements for a line from St. Louis to New Orleans and that the stations would be located at Cairo, Memphis, Helena, Greenville, Vicksburg, Natchez and New Orleans.

MAKES A STATEMENT.

Western Federation of Miners Gives Its Side of the Situation.

Denver, Colo. ,June 11.—The executive board of the Western Federation of Miners, today issued a statement regarding the situation at Cripple Creek, in reply to the statements made by general Bell and secretary Hamlin, of the Cripple Creek district mine owners' association. It is as follows:

"The cause of the strike of the Western Federation of Miners in Colorado, is one of long standing and involves failure on the part of the mine managers to live up to their own written agreements. As far back as 1884, as a result of the strikes at that time, the mine owners agreed that eight hours should constitute a day's work, that the minimum wage should be $3, and that there should be no discrimination against union men in the hiring and discharging of labor.

"At the outset of the present trouble manager MacNeill, of the Standard mill at Colorado city, peremptorily discharged 45 men, members of the Western Federation of Miners, for no other reason than that they had become unionists. All of these were old employees of from two to six years' standing. The millmen are affiliated with the Western Federation of Miners and are entitled to all the protection that goes with such membership. Today the only questions involved are the enforcement of the eight- hour day, the right of men to organize in the unions and to prevent discrimination against union men of all kinds.

"The responsibility of lawlessness connected with the contest rests entirely on the shoulders of the mine operators, the citizens' alliance and their allies, backed up by the ready power of the state government. The responsibility has been placed on these persons and organizations, by district judge Stevens, who denounced the military usurpation in Telluride in strong language from the bench; by district judge J. Walter Dixon, republican, who openly condemns governor Peabody, and severely criticizes his acts in violently deporting men from the state without trial or other chance of hearing; by ex-governor Chas. S. Thomas, who plainly points to the mine owners' association and its citizens' alliance as being responsible for the outrages committed on the persons of helpless and innocent miners; by the recent democratic state convention, which denounced the line of policy pursued.

"The events of the present week in Criple Creek district justify every accusation contained above. The following crimes on citizenship have followed swiftly upon one another. The resignation of sheriff Robertson, of Teller county, forced by a mob at the point of a pistol and a coil of rope; the forced resignation of coroner Soram, of Teller county; of the city marshal of Victor and numerous aldermen and justices of the peace in the district; the assault upon the dormitory of the union hall in Victor; the forcible entrance into the four union co-operative stores and the destruction of their contents; the destruction of the Victor Record by an armed mob, the killing of a citizen outside the city by an armed mob under militia command; arrest of the men at their work and their incarceration within military lines by an armed force under military command; hundreds of men confined in unsanitary "bull pens"; the forcible shutdown of the great Portland mine, employing union men, by order of the military commander and on the plea of military necessity, and the deporting of the union men.

"The photographs of marked miners, referred to by general Bell, who, he claims, were marked for death, must be regarded as an invention of his own brain. The photographs were for the purpose of publishing a scab list with the pictures of men, accompanying their descriptions, so that members of organized labor all over the country would become thoroughly acquainted with those men who have committed treason to themselves and their class. The pictures are nothing more than those which the committee having charge of the strike in the district, have publicly used for many months.

"The charges that miners are not allowed to vote on questions of strikes are utterly absurd; as a matter of fact, according to the constitution of the Western Federation of Miners, it is absolutely impossible for the executive board to call a strike of its own violation. The present strike is a result of a direct vote of the unions in the district, which left them entirely in hands of properly delegated authorities for adjudication and settlement.

"The twelfth annual convention recently held in Denver appointed a special investigation committee consisting of Malcolm Grillis, of Butte, Mont., H. B, Seaman, of Rossland, B. C., and F. E. Allen, of Dillon, Wyo., which committee made a personal investigation by a visit to the Cripple Creek district last week, and reported to the convention that the constitution of the Western Federation of Miners had been observed in the minutest detail during the entire portion of the contest. Absolutely no deaths have occurred during the contest for which the Western Federation can or ought to be held responsible. Some fifteen men were killed through the incompetence of men employed and the culpable negligence of the management. These men were unfamiliar with the work and were such as this mine and other mines in the district have been compelled to employ at the behest of the mine owners' employment agency. We are unfortunately forced to abide by the acts of an unbridled millitary despotism that is driving our members from pillar to post. Their fortitude under the circumstances is the marvel of the age, and shows that the Western Federation of Miners is composed of the highest type of American citizenship."

The telegram sent to president Roosevelt asking him to investigate conditions in Colorado is appended to the statement.

A BLOODY STREET FIGHT

SIX MEN ENGAGED AND ONLY ONE ESCAPED UNHURT.

THE RESULT OF FRICTION OVER SELECTION OF A TEACHER.

Waco, Texas, June 11.—As a result of friction over the selection of a teacher for a public school at Elk, a small town ten miles north of Waco, a bloody street fight has occurred there. R. B. Torrence, his son, Rives Torrance, and K. McAden, a son-in-law of Torrence, were on one side, and Dr. Holton, his son, and professor G. W. Perkins, on the other. The elder Torrence was killed almost instantly, his body being riddled with bullets. Dr. Holton and the junior Holton both received dangerous wounds, while professor Perkins and Rives Torrence were seriously shot. McAden, escaped uninjured. Shotguns and pistols were the weapons used. All the participants in the fight are prominent. Officers have gone from Waco to Elk.

SCHAEFFER IS CHAMPION

He Beat Cure After the Latter Had the Lead

Paris, June 11—The billiard match between Schaeffer and Cure of 3000 points, 18 inch balk line, two shots in, tonight was won by Schaeffer by 12 points. The winner ran out with a run of 63. He received a tremendous ovation. Under the conditions of the match, which was for the world's championship and $3000 a side, Cure and Schaeffer played 3000 in blocks of 500 each night. At the end of the first night's play the score was Schaeffer 500, Cure 407. Cure on the second night ran his score up to 1000 to 961 for Schaeffer. On the third night Cure, by a record run of 225 in a match of this class, brought his score up to 1500 to Schaeffer's 1145. On the fourth night Cure still further increased his lead, the aggregate score at the end of the play being 2000 points for Cure, and 1623 for Schaeffer. At the end of the fifth round Schaeffer, by magnificent play, had brought himself within five points of his opponent, the score standing Cure 2500, Schaeffer 2495.

ATTEMTPED ROBBERY

Custodians of Moneay Saved it by a Rapid Run

Johnstown, Pa., June 11—A desperate attempt was made today by four masked men to rob superintendent Ramsay and secretary Howard of the Johnstown Water company, of about $8000 in cash, which they were conveying to Dalton, near this city, to pay off the 400 men employed there. The two men made a plucky run for it and fortunately escaped but not until both their horses had been killed and about 25 shots had been exchanged between them. The local police were notified of the affair and several policemen and others left for the scene, and a hundred armed men are scouring the country for the highwaymen.

LACROSSE IN THE EAST.

At Montreal—Shamrocks, 6; Nationals 0.

At Brantford—Tecumsehs, 1; Brantford, 1.

At Toronto—Chippewas, 6; St. Catherines, 3.

New York, June 11.—The Orilla lacrosse team, of Orilla, Ont., today defeated the Crescent Athletic club on the grounds of the latter at Bay Ridge in one of the finest games ever witnessed in the United States. Score 3 to 0.

SENATOR COCKRILL INJURED

Washington, June 11—Senator F. Cockrill of Missouri ,was run into by a boy riding a bicycle today and thrown violently to the ground. His right collar bone was broken, his left side badly bruised and he was otherwise injured.

ABNER M'KINLEY DEAD

Somerset, Pa., June 11—Abner McKinley, brother of the late president, was found dead in his chair at his home at 8 o'clock this morning. His death came without warning to his family.

A CASE OF SMALLPOX

London, June 11—A case of smallpox has been discovered at Carling Heights where 3300 officers and men from all parts of the district are now under canvas.

VANDERBILT'S MARIGOLD WON

Paris, June 11—W. K. Vanderbilt's Marigold won the summer handicap at the Longchamps races.

DEFENDS HIS PARTY

Senator Henry Cabot Lodge Discusses Reciprocity With Canada

Says His Party is Not Opposed to Plan, But Wants to Know Terms Dominion Will Grant

Newton, Mass., June 11.—The annual meeting and dinner of the Middlesex club was held this afternoon at Auburndale. The principal speaker at the dinner, which was attended by 125 members, was senator Henry Cabot Lodge. He spoke at some length on the issues of the coming campaign, dwelling particularly on reciprocity. He said that reciprocity with Canada had been used by the opponents of the republican party as an argument against the whole protective system.

The Massachusetts representatives in congress are not, he asserted, opposed to reciprocity. The republican party is not opposed to reciprocity with Canada, but we wish to know what kind we will get. We are opposed to Canadian reciprocity, if it is going to open our gates to Canadian products without an adequate return.

Boston, Mass., June 11.—Reciprocity with Canada and Newfoundland was discussed by congressman August P. Gardner, of Hamilton, Henry B. Blackwell and Eugene N. Foss, of this city at a dinner at the Massachusetts club today. Congressman Gardner thought that the United States should not seek to acquire foreign markets at the risk of losing the home market. He also asserted that there was no chance that Canada would grant reciprocity in manufactures The other speakers strongly advocated closer trade relations between the United States and the two British colonies.

BIG DISPLAY OF FORCE

A NUMBER OF AMERICAN WARSHIPS ASSEMBLING NEAR TANGIER

WILL COMPEL PRISONER'S RELEASE AND PAYMENT OF INDEMNITY

Paris, June 11—Information has been received here from Lisbon concerning the plans of the American battleship squadron. Rear admiral Baker expects to leave Lisbon on June 16th for Gibraltar, where the squadron will remain until the Morocco incident is settled. On the arrival there of the Illinois and Missouri, the squadron will consist of six of the most modern battleships, besides the two squadrons of cruisers and gunboats now at Tangier. Although admiral Baker does not expect that the necessity will arise for taking the battleships to Tangier, yet he will remain at Gibraltar for the purpose of meeting any possible contingency arising at Tangier. The present force is considered ample to impress the Moroccan government with the necessity of securing the release of Messrs. Perdicaris and Varley, but if disorders occur ashore among the natives the battleships may go to Tangier. They have an equipment of about 2400 men which would give them a large landing force if necessary for the preservation of order. It is also foreseen that the claim for an indemnity against Morocco may have to be settled after the Perdicaris incident is closed, this indemnity covering redress for indignity upon the prisoners and the heavy expense involved in sending ships to Tangier. Although no information has yet been received concerning the claim, the officers of the squadron anticipate that its collection may require the continued presence of the American ships in Moroccan waters.

Washington, June 11—The following cablegram has been received from rear-admiral Chadwick, dated Tangier today: "The minister of foreign affairs of Morocco expects on June 13 to lay before Raisuli what has been proposed. The attitude of the Moorish authorities appears to be satisfactory."

THE WOMAN'S CONGRESS

Lady Aberdeen Has Been Elected President—Other Officers

Berlin, June 11—Mrs. May Wright Sewell of Indianapolis, the retiring president of the Woman's International Congress, gave a reception at her hotel tonight in honor of the newly elected officers of the congress who are: countess of Aberdeen, president; Frau Marie Stritt of Dresden, first vice-president; madame Jewelsiegfried o fParis, second vice-president; Mrs. Wm. Sanford of Toronto, treasurer; Miss Gordon of Scotland, corresponding secretay; Miss Kramer of Holland, recording secretary. The next quinquennial international counciconcil will be held in Toronto.

A FAST TWO MILES.

Shrubb, the English Runner, Beats the World's Record.

Glasgow, June 11.—A. Shrubb, the English runner, covered two miles in 9 minutes and 5 3-5 seconds, beating the world's professional record of 9 minutes and 11 1-2 seconds, held by W. Lang, of Manchester, England.

EARL GREY TO SUCCEED MINTO

London, June 11.—It is announced that earl Grey, lord lieutenant of Northumberland, has been appointed to succeed the earl of Minto as governor general of Canada.

TYPOGRAPHICAL UNION LABEL NELSON, No. 340

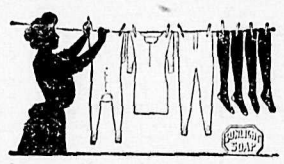
SMELTER FOR EAST KOOTENAY

East Kootenay, although frequently promised a smelter, at last is to have one. The Federal Mining and Smelting Co., a strong corporation, which has large mining interests in the Couer d'Alene section, is about to erect a smelter for the reduction of the ores of the Sullivan group of mines, which it recently acquired. The district has long languished for the lack of reduction works. The ore of the section, so far as the larger mines opened, are concerned, is principally of a low grade, running high in lead and comparatively low in silver, and will not stand a long haul as well as the ores of the Slocan, which run higher in silver.

The location of a smelter at a central point, like where the plant of the Federal Mining and Smelting company will locate its plant, will be of great benefit to the development of the section, and particularly beneficial to properties which are being developed, as it will give them a market for their ores with the advantage of a short haul to the reduction plant.

The management states that the initial plant which is to be erected immediately, will be but the beginning of a large metallurgical industry, which the company intends to establish there. It will be of sufficient capacity, it is said, to not only handle all of the Sullivan ore, but that of the larger mines in the vicinity, like the St. Eugene and North Star.

The Sullivan company had rather an unfortunate experience in the matter of a smelter. It attempted he erection of one in 1902, and through the blundering of some one it was a failure after a large sum of money had been expended. There will be no failure like this on the present occasion. A competent smelter builder has been engaged and as the company has ample capital there will be no danger of the plans miscarrying on the present occasion.



You won't harden or shrink woolens with Sunlight Soap. The purity of the oils and fats and the absence of free alkali prevent that. 2B

EDITORIAL NOTES.

The people of Canada consume in a year some 200,0000,000 pounds of sugar, or about 36 pounds per head, 180 pounds for the average family of five. The value of the sugar imported in 1903 is set down at $7,535,890. This is the value at which the customs authorities rated it. It cost the consumers a great deal more than that, of course. This sugar is brought to Canada from many countries, twenty or more, and a noteworthy fact is that nearly one-half of it—$3,118,296 worth— came from Germany, the land of beet sugar. The British West Indies, Guiana, United States, Belgium, Dutch East Indies, Spanish and American West Indies were in the order named our next largest sources of supply. Fully half of the sugar consumed in Canada is made from sugar beets, and Canada can grow just as good sugar beets as Belgium or Germany. The question naturally arises, why should we send abroad every year seven and a half millions of dollars for sugar which could be produced at home.

The plan for the importation of coolie labor into the Transvaal is not a pretty one, says the Victoria Progress. The coolies are contract laborers, not slaves, but the difference between a slave and a contract laborer in charge of a taskmaster, who believes in slavery, is so fine that we do not care to try to point it out. In the long run we believe the new policy, which has been dictated by the greed of men, whose principles are $$$$$, will be found a mischievous one, and hurtful to the proper establishment of free institutions in South Africa. It was not by coolie labor that the empire has been built up, and coolie labor will not maintain it.

CARPENTERS ELECT OFFICERS

The Nelson Carpenter's union on Wednesday evening elected the following officers for the ensuing six months: President, James Laidlaw; vice-president, W. H. Baer; secretary, E. Kilby; treasurer, J. Young; conductor, J. L. McDonald; warden, W. Fisher; auditors, Scott Thompson, C. W. Whitmore, J. Laidlaw; to represent the union in the Trades and Labor Council, J. Laidlaw, J. Collins, W. H. Baer.

MET A FEARFUL DEATH

FRANK BUTLER, A BRAKEMAN WAS KILLED YESTERDAY NEAR YMIR

FELL THROUGH TRAP DOOR IN CAR AND WAS BADLY MANGLED

[Special to The Daily News.]

Ymir, June 11—Frank Butler, brakeman on the Spokane Falls and Northern train running between Nelson and Northport, was instantly killed this morning about two miles from Ymir.

Shortly after passing the Porto Rico Lumber camp, Butler and Sid Brown left the baggage car with the intention of going to the front part of the train so as to uncouple a flat car at the P. R. L. Co.'s siding at Ymir. Adjoining the baggage car was an empty self-dumping ore car, and to cross this car it was necessary for the men to jump down into it. They both landed safely and proceeded to cross it. Butler was in front and no sooner had he stepped on the trap door than it gave way with him, precipitating him on to the track, where the train passed over him, cutting and crushing him to pieces. Sid Brown, who was within a few inches of him when he fell through the door (which had been insecurely fastened, showing gross carelessness on someone's part) at once rushed back and put on the air brakes, stopping the train, but too late to save him.

The body was found a few hundred feet behind the train, frightfully disfigured. One foot was cut off completely, the neck nearly severed, and there was a great gash down one side of the body. It was brought to Ymir, and taken to the undertaking establishment of Wm. Clark.

Butler had been employed on the road for the last three months. His people reside in Spokane. Dr. Arthur, coroner, was summoned from Nelson and arrived here this evening on a special train. He decided that no inquest was necessary.

WILL RESUME OPERATIONS

Air Compressor to be Installed on the Betts and Hesperus

[Special to The Daily News.]

Grand Forks, June 11—The Betts and Hesperus mine on Hardy mountain, is preparing to resume active operations on the arrival of the air compressor and other machinery which has been shipped from Chicago, by Burt Rae, the manager of the company, who went east several months ago for the purpose of making the purchase. Mr. Rae is expected in Grand Forks in a few days, as is also the machinery which will be installed at once. Harry Shaffer, the foreman at the mine, is getting everything in readiness for the start and in a short time work will be carried on on an extensive scale The property is a promising one and the completion of the Phoenix branch of the V., V. and E.will give it unexcelled shipping facilities, as an ore chute can be constructed at little cost from the mine to the railway. The property is only four miles from the city and is owned by the Betts and Hesperus Mining Co. of Chicago.

The Rev J. F. Betts, who has been pastor of the Methodist church for the past three years, left yesterday with his family for Vancouver, where he has been assigned the Fairview Methodist church of that city. His successor is Rev. Elihu Manuel of Vancouver.

Work on the Phoenix branch of the V., V. and E. and the Granby spur is progressing rapidly. Every section is now under way and if the present influx of laborers, which runs from 75 to 100 a day continues the contractors expect to complete the work on contract time.

NOW FOR THE DEFENCE

PLAINTIFF'S CASE CONCLUDED YESTERDAY.

THE TRIAL WILL LAST ANOTHER TEN DAYS.

The plaintiffs' case in the big damage trials against the Crow's Nest Pass Coal company, which has been in progress at the supreme court sittings for the past fortnight, was practically closed yesterday when the hour for the day's adjournment, 1 o'clock, was reached. Counsel stated that on Monday some formal matters would be proved but that all the important evidence was now in. The defendants' case, any evidence the plaintiffs may call in rebuttal, and the argument of counsel will probably take the next ten days, and then, after a day or two's adjournment, the two adverse cases from Poplar of Rutherford vs. Morgan, and Hanna vs. Morgan, which are to be tried by jury, will then be disposed of, and they are expected to occupy from two to three days.

Mr. Bodwell continued his examination of William Blakemore yesterday, when the court opened in the morning, and by 11.35 the cross examination was concluded and Mr. Taylor took up the re examination of his witness, which just filled in the time of the court until the hour for the day's adjournment at 1 o'clock.

Mr. Bodwell's cross examination yesterday was almost entirely directed to the technical aspect of the case from a scientific standpoint. The witness had already quoted several authorities for different conclusions he had come to, and these were overhauled and compared with other authorities which differed and the witness was asked to say why preference should be given. Professor Donald M. Stewart, on coal mine explosions was described by Mr. Blakemore as a "standard" authority of such eminence, that he, the witness, would not like to differ from him. Other authorities quoted by Mr. Bodwell, admittedly good ones, were relegated by the witness to second rank, or at least below that of "acknowledged" or "recognized standard," and there was a pretty play of words in consequence, until Mr. justice Martin remarked quietly that he recognized the distinction made by the witness, an everyday one, and the discussion moved on to another branch of the subject. The different effects of carbonmonoxide and carbondioxide gas, the latter from a gas and the former from a coal dust explosion, were gone into at length and the facts elicited from the witness in chief concerning the re-entry of the rescue party up into portions of No. 3 mine, 20 minutes after the explosion were gone over time and again, and authorities were quoted him to show that he had erred in some, at least, of his conclusions. The witness was asked to assume a different state of facts from that already proved and reconcile his theory but as Mr. Blakemore's qualifications were lengthy not much progress was made. Whenever counsel asked a question, generally assuming a new state of facts, the witness would retort by asking what was meant by this, that and the other phrase, and the matter would end up by the question being put all over again. The witness frankly admitted that his labors in the witness box the day previous had tired him out, and in consequence he was a little "clouded." He admitted that if certain facts were proved, they would destroy his evidence on some important points. His deductions, he said, were in a measure his own based on his experience and what he had read and gathered in conversation, he was unable to discriminate exactly as to what was purely his own. So far as professor Stewart's theory was concerned he had adopted it about three weeks ago when he saw the professor's book for the first time. The professor merely carried the dust theory a litte further on. He had decided in his own mind that the disaster at Fernie was caused by a dust explosion on the occasion of his visit after the accident at the time of the inquest, and he had not changed his opinion since.

Confronted with his printed article sent to England shortly after the explosion in which he said that it was time the water sprinkling theory was dropped as a means of preventing coal dust explosions in mines, the witness said that he was not in possession of all the facts when he wrote the article, and appealed to other portions of it to sustain the views now expressed.

"Did you ever state," said counsel, impressively, "that you were ready to enter into an arrangement to cripple the business of the C. N. P. C. Co.? "

"Two years ago," replied the witness, "I was applied to by a competing company who wanted me to act for them, and I may have said at that time that a company run on business lines would destroy or cripple the C. N. P. C. Co.'s business in B. C., just as one business rival might drive another out of the field."

On the previous day the witness had been closely questioned on three personal matters. He had been asked at length about his interest in the Tuttle hotel at Fernie and had denied specifically that he had or had ever had any personal interest therein. He was further interrogated as to the manner in which he had left the company's service, the insinuation being that he was really discharged, but that at his own request he had been permitted to resign. He was also asked if he had not taken one-half of the commission on the insurance of some of the company's premises. He had denied the first statement emphatically and said that as regards the second, the man who had charge of the insurance had offered him half of the commission—a matter of $50, and he had taken it.

When Mr. Taylor began his re-examination yesterday these matters were taken up. Mr. Blakemore said that Mr. Hechmer, the company's solicitor, then and now, had charge of the insurance and had come to him, the witness, unsolicited and suggested that he share the commission and he accepted one-half of it. He, the witness, subsequently told senator Cox, the president of the company, of the transaction and the senator laughed and said it was a matter of no consquence and until the question was brought up yesterday he had never heard of it again. The premium paid was the regulation one. Since then he had been informed that the insurance had been taken away from the regular agent and was handled by an official of the company, who got all of the commission. Referring to the manner of his leaving the company's service, Mr. Blakemore said it was absolutely untrue that he was discharged. He had sent in his formal resignation on June 7th, 1902, —a letter produced—and had subsequently received a letter dated July 12th following—letter produced—from Robert Jaffray, the vice-president and managing director, in which Mr. Jaffray acknowledged the receipt of his resignation and added that after conferring with the directors, "we accept your resignation with regret and with every wish for your ultimate success."

Mr. Taylor—As a matter of fact why did you resign the management.

Mr. Blakemore—On account of friction and disagreements with Robert Jaffray and the executive committee composed of Mr. Jaffray, Jr., a son of the vice-president and William Fernie.

Then the witnes was briefly taken over some of the ground covered by Mr. Bodwell and numerous extracts were put in from the British Royal commission report on explosions in coal mines, so frequently referred to during the trial, some of the evidence then taken, the article written by the witness after May 2nd, 1902, and several authorities already quoted, all of which went to explain and sustain the theories advanced by Mr. Blakemore in chief, the main ones being, that the explosion at Nos. 2 and 3 mines was a dry coal dust one, and that want of removal and proper watering had been the chief causes of the accident which resulted in the killing of 128 employees.

At 1 o'clock the court adjourned until 10 o'clock Monday morning, when the case for the defence will be commenced.

CHURCH SERVICES

Anglican—St. Saviour's church, corner of Ward and Silica Sts. Second Sunday after Trinity. Holy communion 8 a. m.; Matins and litany, 11:00 a. m.; Sunday school, 9:45 a.m.; evensong, 7:30 p.m. Rev. F. H. Graham, rector.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

of the location.

Placer Mining.—Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 feet square; entry fee, $5, renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end of the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miners for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, $100 per mile for first year and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a mining recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, $10. Royalty at the rate of two and one-half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Department of the Interior, Ottawa, February, 1904.

JAMES A. SMART,
Deputy of the Minister of the Interior.

We Shall Buy a Million

Bottles of Liquozone and Give Them to the Sick.

We have purchased for $100,000 the American rights to Liquozone. We thus control the only way to kill germs in the body and end a germ disease. We want the sick to know this product, and at once. So we make this remarkable offer. We will buy a million 50c bottles and give them to a million sick ones. Will you—if you need it—let us buy one for you?

Costs $500,000

We publish this offer in every great newspaper in America. The cost of the offer, we expect, will reach $500,000. We pay that price because it seems the only way to quickly let the sick know what Liquozone does.

The greatest value of Liquozone lies in the fact that it kills germs in the body without killing the tissues, too. And no man knows another way to do it. Any drug that kills germs is a poison, and it cannot be taken internally. Every physician knows that medicine is almost helpless in any germ disease.

Liquozone does in germ troubles what all the drugs, all the skill in the world, cannot do without it. It cures diseases which medicine never cures.

Acts Like Oxygen

Liquozone is the result of a process which men have spent over 20 years in perfecting. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 14 days' time, these gases are made part of the liquid product.

The result is a product that does what oxygen does. Oxygen gas, as you know, is the very source of vitality. Liquozone is a vitalizing tonic with which no other known product can compare. But germs are vegetables; and Liquozone—like an excess of oxygen—is deadly to vegetal matter. Yet this wonderful product which no germ can resist, is, to the human body the most essential element of life.

Germ Diseases

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, wherever they are, and the results are indirect and uncertain. Liquozone kills the germs, wherever they are, and the results are inevitable. By destoying the cause of the trouble, it invariably ends the disease, and forever.

Asthma — Hay Fever—Influenza
Abscess—Anemia — Kidney Diseases
Bronchitis — La Grippe
Blood Poison — Leucorrhea
Bright's Disease — Liver Troubles
Bowel Troubles — Malaria—Neuralgia
Coughs—Colds — Many Heart Troubles
Consumption — Piles—Pneumonia
Colic—Croup — Pleurisy—Quinsy
Constipation — Rheumatism
Catarrh—Cancer — Skin Diseases
Dysentry—Diarrhea — Scrofula—Syphillis
Dandruff—Dropsy — Stomach Troubles
Dyspepsia — Throat Troubles
Eczema—Erysipelas — Tuberculosis
Fevers—Gall Stones — Tumors—Ulcers
Goitre—Gout — Varicocele
Gonorrhea—Gleet — Woman's Diseases

All diseases that begin with fever—all inflammation—all catarrh—all contagious diseases—all the results of impure or poisonous blood.

In nervous debility Liquozone acts as a vitalizer, accomplishing what no drugs can do.

50c Bottle Free

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on your local druggist for a full size bottle, and we will pay your druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquozone is, and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligation whatever.

Liquozone costs 50c. and $1.

CUT OUT THIS COUPON
for this offer may not appear again. Fill out the blanks and mail it to the Liquid Ozone Co., 458-460 Wabash Ave., Chicago.

MARBLE ROCK LIME

Manufactured by

The Idaho Lime Co.

SPOKANE, WASH.

The price is right. The quality guaranteed. For sale in BULK, BARRELS, or SACKS by

W. G. GILLETT
NELSON, B. C.

A FEW WORDS ON SAMPLING

Any one or two single pieces will very seldom give a correct average of your ore, neither will it do to break a rock and send one half to one assayer and the other half to another, and expect them to agree, as the values are never evenly disseminated, hence a variation; the better way is to take what you consider to be a fair representation of the parcel, of a number of pieces (the more the better) and break them all down to the size of corn or smaller, then thoroughly mix and take your sample from it.

E. W. WIDDOWSON
ASSAYER AND CHEMIST
YMIR, B. C.

APPLICATION TO TRANSFER LIQUOR LICENSE

Notice is hereby given that I intend to apply at the next sitting of the Board of License Commissioners of the City of Nelson for leave to transfer the retail liquor license now held by me for the Royal Hotel Stanley street, Nelson, B. C., to Louella V. Roberts.

Dated at Nelson, B. C., May 26th, 1904.

An attractive, large assortment of all silk, fine ties at 25c., 35c. and 50c.

BROWN & CO.

Blue Ribbon's leaden packet preserves indefinitely the rich delicious flavor of this wonderful tea. Carefully sealed in pound and half-pound lead packets. Try the Red Label. Only one best tea. Blue Ribbon's it.

IT IS IMPORTANT

that the walls of a room should be free to breathe so that the imprisoned inmates may do so. Dr. De Wolfe, late Commissioner of Health for the City of Chicago says: "The free passage of air through the walls of living-rooms is an important element in proper ventilation. The practice of re-papering rooms by layer upon layer of wall-paper, made adhesive by glue or paste, which adds a decomposing material to the nasty process, can receive nothing but condemnation from sanitarians. The perfect wall for domestic habitation is of material which resists decomposition in every form, and which permits the passage of air. Paper does not supply these conditions."

CHURCH'S

ALABASTINE

is the only preparation that possesses all these advantages. Sanitarians endorse it. Anyone can do plain tinting. Easy to do nice decorating with Alabastine. Send 2-cent stamp for book of instructions. ALABASTINE is sold by Hardware and Paint Dealers everywhere—Never sold in bulk.

The ALABASTINE CO., Limited, PARIS, ONT.

NEW [illegible] FASHION LETTER

Nev[illegible] more [illegible] and due co[illegible] be paid to her wants [illegible] tume. The [illegible] less addicte[illegible] ing and other [illegible] sports [illegible] tivating a taste for [illegible] promenades a[illegible] cross country walks. [illegible] of these healthful diversions she must [illegible] ly clothed and in the case of a woma[illegible] perly means not so much in conformity with the practical requirements, than handsomely and effectively. The growing tendency in favor of outdoor sports and exercises has done more than anything else to develop the possibilities of walking skirts and suits. There was a time when walking skirts were worn by business wo-

[illegible] practical reasons [illegible] it was [illegible] skirt [illegible] acces- [illegible] ing the hard and stiff lines. All [illegible] nged. The value of the walk[illegible] has been more readily recognized [illegible] advantages are more [illegible] the same time [illegible] the w[illegible] handsome, attractive and [illegible] without the necessity of cur[illegible] the essential features, which [illegible] skirt so eminently prac[illegible] outdoor sport. [illegible] offend the ar[illegible] and se[illegible] do they [illegible] themselves [illegible] duty. In acc[illegible] al drift of fashion towar[illegible]

[illegible] present day there is scarcely a material that is used for any other kind of dresses that is not also used to some extent at least, for walking skirts.

There was a time when only the darkest colors or black were considered appropri[illegible] walking suits. That limitation no [illegible]d. Even white will be [illegible] season, especi[illegible] model will be [illegible] or the loose styles [illegible] plain or with a touch of gold in them, will be used for trimming and in some cases a velvet collar and cuffs of colored material will be added to give a touch of brilliancy.

For more serviceable wear medium or colors either plain or in checks or striqes will beu sed extensively. Particularly small checks will be in great demand, in light and delicate materials of the thinnest substance, as well as in heavier tailer's woollens. Then there will be soft cheviots, chiffon cloths, siciliennes and various silks and cloths. Madras and linen not to forget batiste and kindred materials will also be extremely popular.

The fact that short walking skirts will be worn a great deal will not be without nifluence upon the styles of footwear. That is perfectly natural. If the skirts are short and a display of the shoes cannot well be avoided, care must be taken to make the footwear as attractive and neat as possible. It would never do to wear a pair of unsightly shoes or slippers with a pretty walking suit. It would completely spoil the general effect. Patent leather shoes with the uper part of material corresponding in color, if not in texture, with the material of which the suit is made will be extremely fashionable. The style will undoubtedly be quite becoming to many women and add considerably to the general smartness of the general effect, but not every woman will find it advisable to follow the fashion. Shoes of white or light colored material may be very becoming to women with small well shaped feet, but women who are compelled to wear hsoes larger than number three should not try the experiment of wearing light colored shoes. The shoes to be worn with walking shoes should be of a substantial character and equipped with stout and serviceable soles. Slippers do not go well with such suits.

Among the many new or semi-new materials for summer wear that have come out this year and are shown in the shops are some fine weaves of grass linen, which are remarkably silk like and lustrous. They wash well, stand considerable wear and will undoubtedly be quite popular. The material is not very expensive and can be made up in a variety of styles most becoming and attractive.

Another new and very handsome meterial is silk Egyptian gauze, in spite of its name a genuine American product. Trimmed with Oriental lace and hand embroidered and edged with beading run through with black liberty satin over a ground of cream taffeta one of those gauze dresses, made of strawberry colored material, attracted considerable attention by its charming and harmonious effect.

Black gowns will not be worn much this summer. For young or middle-aged women dresses of very thin black material are very becoming, especially if white lace is used for the yoke and sleeve puffs. Persian embroidery and black velvet applique also go well with such material. The dresses should be made quite full and over black lining. There is nothing more unbecoming and vulgar than one of those diaphanous dresses in black over a white lining.

If any one doubts that the wave of extravagance which characterizes women's fashions this summer, extends beyond gowns, waists and jackest and other outside garments and has actually reached the mysterious and invisible part of a woman's outfit, let him go to one of the fashionable shops and gaze in admiration at the display of petticoats. Some of these garments are more elaborate and more extravagantly trimmed with all kinds of costly material than a great many gowns, and their cost runs into the hundreds of dollars. There is scarcely any rich and beautiful material used for dress wear that is not also used for petticoats. There are petticoats of silk and satin, of brocades, Indian linen, silk muslins, the most delicate batiste, the thinnest lawns and trimmed with all kinds of laces and the most exquisite needlework. Of course, not all petticoats are made so extremely elaborate or of such costly materials, but it may be said that even the plainer lingerie petticoats of the present season are far more elaborate than ever before. Embroideries and lace insertions or trimmings are used to a great extent. The excuse given for this is, that the shortness of the outer skirts now in vogue makes it necessary to pay more attention to the appearance of the petticoats and compels the women to trim and ornament them more lavishly than before.

In most cases the upper part of the petticoats, between the waist line and the knees, is rather plain and simple. The petticoats must fit snugly down to the knees and, for that reason, must not be encumbered with trimmings that might destroy the tightness of the fit. The lower part, consisting of flaring flounces makes up for the simplicity of the upper part. There the wearer's fancy and extravagance may run riot. Some of the petticoats are so arranged that the lower part is attached to the upper part by means of hooks and buttons and can be taken off and exchanged for another lower part.

It is quite remarkable that the war in the far east has not influenced fashions this year more than it has. Whether it is lack of interest in the war, because this country is not directly influenced, or some other reason, it would be difficult to decide, but the fact remains that while in former years every war caused a perfect wave of military styles to sweep through the realm of feminine fashions, the present war has scarcely caused a ripple. It is true a mild interest in military coats and dress trimmings has been revived, but that is about all, excepting perhaps, two novelties in hats, that may be attributed to the war. There are two new styles in rough straw, called gunboat and torpedo. However, these hats, notwithstanding their warlike names scarcely suggest any military style and are not even original enough to be odd. The handsome ones have trimmings of narrow velvet and steel buckles. Some of them are shaped of tulle and ribbons and are decorated with a paradise plume in front or on the left side.

ESTELLE CLAIRMONT.

INTERESTING ENTERTAINMENT

Miss Pauline Johnson, the noted Mohawk Indian authoress, and entertainer, accompanied by Walter McRaye, impersonator of the French Canadian "Habitant" characters, will appear in the Nelson Opera House Thursday, June 16th, in a charming program full of laughter and comedy. People who remember Miss Johnson in her more sombre Indian work, will be delighted with her dainty comedy sketch, "The Success of the Season," said by the Ottawa Citizen, "To be the cleverest thing seen on a platform in Ottawa." Mr. McRaye's "Habitant" sketches are full of quaint humor. This will be the literary treat of the season. Tickets on sale at McDonald's.

The regular weekly assembly will be held in Fraternity hall next Monday evening. Music will be furnished by Milward's orchestra.

A PLANT FOR SULLIVAN

FEDERAL COMPANY WILL AT ONCE CONSTRUCT A SMELTER

IT WIL BE IN OPERATION WITHIN A FEW MONHS

E. F. Roberts of the Federal Mining and Smelting Co., who has charge of the Sullivan mine in East Kotenay, is at the Strathcona. When seen yesterday by a reporter of The Daily News Mr. Roberts stated that the Sullivan mine had been secured by the Federal Mining and Smelting Co. and the intention was to operate it to the limit of its capacity. Mr. Roberts further stated that his mission was to proceed to East Kootenay for the purpose of erecting a smelter and reduction works for the treatment of the ore from the Sullivan group. While the initial capacity of the smelter will not be very large the intention to build up a large plant, so that not only the ore of the Sullivan group can be reduced, but that of the other large mines in the vicinity of the Sullivan.

F. D. Weeks, a metallurgist of ability, is to have charge of the construction and operation of the plant. There will be employment for 100 men during the period of construction and after the smelter and mine gets in full operation the force will be increased to 250. The smelter will be in operation this fall.

The Sullivan group consists of three claims, the Shylock, Hamlet and Hope, situated on St. Mary's river, west of Fort Steele. The ledge is 26 feet wide of solid galena and assays 47 ounces in silver and 75 per cent lead to the ton. A great deal of development work has been done and there are large reserves of ore. It is one of the biggest mines in East Kootenay. The Federal Mining and Smelting Co. owns the Empire State mines at Wardner, the Standard and Mammoth at Canyon creek and the Tiger-Poorman, all in the Coeur d'Alene region, Idaho. For a time the company owned the smelter at Everett, but a short time since sold it to the American Smelting and Refining Co.

BEFORE UNIVERSITY CLUB

Baird Lectures on "Some Recent Advances in the Science of Psychology."

There was a large attendane at the University club's meeting last evening to hear an interesting paper given by W. J. Baird on "Some Recent Advances in the Science of Psychology." In the paper he stated that psychology began as a branch of metaphysics in seking to explain the ultimate origin and essence of mind. Three theories were advanced, the materialistic, explaining mind as a function of matter, the evolutionary as a result of processes of minimum changes from animal life, which in turn came from plant life, having its origin either as an act of spontaneous creation; the spiritualistic, as a spiritual essence being brought from some unknown source and placed in the physical organism.

After interesting in the investigation of the essence of mind began to wane phychologises turned their attention to psychical processes themselves and classifications of these irrespective of their source, but unfortunately they adopted the deductive method and consequently grouped in error until almost the present time. In recent years, however, psychologists have changed their methods and employing now, induction, have made the subject an experimental science. Some examples of the nature of experiments were given to indicate that it is posible that the subject may be established on a scientific basis.

Several members took part in the discussion which followed. The only important point of difference which appeared, arose from the fact of the subject being called a science, to which place in the minds of some of the speakers it had no right.

THE SHIPMENTS SHRINK

THE BOUNDARY MINES SENT OUT ONLY 12,000 TONS.

SHORTAGE CAUSED BY BREAKING DOWN OF A FLUME.

[Special to The Daily News.]

Phoenix, June 11.—The Boundary ore shipments for the current week are less than for some time past for a similar period. This is due to the fact largely of the flume at the Granby smelter breaking late last week and the loss of nearly two days' tonange in both shipping and smelting before aditional power from Cascade was utilized.

The Greenwood smelter, owing to increased custom shipments, also took less of the company's Mother Lode ore than usual. The shipments in detail were as follows:

Granby mines to Granby smelter	7,950
Mother Lode to Greenwood	2,948
Emma to Greenwood and Granby	980
Ore Denoro to Granby	188
Brey Fogle to Granby	33
Total for week	12,009

Total for year to date, 362,810 tons.

The Granby smelter this week treated 9,835 tons or a total of 265,569 tons this year.

McGREGOR'S MISSION

Will See Gompers to Compel Carrier's to Carry Out Contracts

Washington, June 11—Captain J. M. McGregor of Detroit, president of the International Pilot's Association, has gone to New York to ask president Samuel Gompers of the American Federation of Labor, for assistance in the difficulites between the lake carrier's association and the pilots. The lake carrier's association, it is alleged, refuses to employ the members of the pilot's association, although the lake carrier's association recognizes and contracts with the Seamens' union, comprising the dock union, as well as the firemens' and oilers, and the longshoremen organizations. All these organizations, including the pilot's association, are affiliated with the Federation of Labor. By reason of the tie-up on the lakes growing out of the pilot's, the contracts between the carrier's association and the seamen, cooks, firemen and oilers and longshoremen organizations are not being carried out. The pilots will present these facts to president Gompers and ask the federation to proceed against the carriers for enforcement of the contracts. This is the mission of captain McGregor.

MADAM MELBA DECORATED.

Tokio, June 11.—King Edward has conferred upon Madame Melba the decoration for science, art and music. She is the first woman upon whom it has been bestowed.

DECIDED TO RETURN IT

PALMA TROPHY WILL NOT BE KEPT IN THE STATES.

NATIONAL RIFLE ASSOCIATION ACTS IN A DIGNIFIED WAY

Washington, June 11.—By a unanimous vote the executive committee of the National Rifle association, which met here today, decided to return forthwith to England the Palma trophy which the American team won at the Bisley shoot last September, because of the charges made that the American team violated a rule of the contest is using a rifle different from that used by the regular army of the United States. It was also decided to withdraw the Palma trophy from this year's competition. The committee, it was realized early in the day, would reach this conclusion, but it was not until the afternoon that the vote was taken and result prepared, announcing the decision. There was a great deal of consideration over these resolutions and the rough draft was revised several times before it was acceptable to the committee. The resolutions, it was desired, should be an appropriate expression of the dignified proceedings of the ommittee. The resolution is as follows:

Whereas, this committee has carefully considered all the facts and correspondence in conenction with the controversy which followed the Palma trophy competition of 1903, and

Whereas, We regret the evident differences of opinion which have been made a matter for publication, and while we find the captain of the American team made no secret whatever of the exact character of the rifles, believing their use perfectly proper, which difference of opinion would never have had existed had he officially submitted the rifles for approval, in accordance with the instructions given him by the president of the association, and

Whereas, Prolongation of the arguments as to what is or is not in conformity with the regulations, patterns of rifles, etc., might be continued indefinitely, with no prospect of good resulting therefrom, and

Whereas, It is the unanimous sentiment of this committee that the existing controversy cannot continue without working serious injury to competitive military rifle shooting, the world over; therefore, be it

Resolved, That we ratify all statements made in the presence of the association to the secretary of the National Rifle association of Great Britain, dated March 7th, 1904, and instruct the president to withdraw the Palma competition from the program for the current year, and to cause the Palma trophy to be immediately returned to the National Rifle association of Great Britain to be held by that organization for future competition.

Telegraphic orders will be sent to New York where the Palma trophy is now kept, that it be packed and shipped immediately to England.

KILLED BY HIS DAUGHTER

Norton, Kansas, June 11—A. C. Jenkins was shot and killed by his 11 year old daughter today. Jenkins was insane and had often threatened to kill his whole family. He was whipping his wife today when his daughter killed him.

NOTICE TO CREDITORS

In the Matter of the Edgewood Dairy Company, Limited.

NOTICE is hereby given that the abovenamed company was by special resolution passed at an extraordinary general meeting of the company held at Nelson, B. C., the 9th day of February, 1904, and confirmed at a general meeting of the shareholders of the company held at Nelson, B. C., the 25th day of February, 1904, agreed to be wound up voluntarily, and Frederick William Laing of Nelson, B. C., accountant, was appointed liquidator for the purposes of such winding up.

The creditors of the above company are required on or before the 20th day of June, 1904, to send their names and addresses and the particulars of their debts or claims, and the names and addresses of their solicitors, if any, to the said liquidator, Nelson, B. C., and if so requird by notice in writing from the said liquidator or by his solicitors, to come in and prove their said debts or claims in the usual way at such time as shall be specified in such notice, or in default thereof, they will be excluded from the benefit of any distribution made before such debts are proved, and after the said 20th day of June, 1904, the said liquidator will proceed to distribute the assets of the said company amongst the parties entitled thereto, having regard only to the claims of which he shall then have had notice, and he will not be liable for the proceeds of the estate, or any part thereof so distributed, to any person of whose claim he had not notice at the time of the distribution thereof.

Dated this 11th day of May, 1904.

F. W. LAING,
Liquidator for the Edgewood Dairy Company, Limited.

Reliance Gold Mining & Milling Co., Ltd.

NELSON'S NEWS OF THE DAY

The third in the series of band benefit dances will be given on Friday evening.

The regular weekly assembly will be held in Fraternity hall tomorrow evening with Milward's orchestra in attendance.

Bishop Dart of New Westminster, arrived here last evening and left yesterday morning for a tour through the Boundary.

Mrs. W. G. Gillett has left for a visit to her old home in Newfoundland. She expects to be away from four to six months.

George H. Ennis, now of Toronto, formerly of this city and at present representing the Canadian Lumberman of Toronto, is in the city on a business visit on behalf of his publication.

J. F. Delaney of New Denver, yesterday received a wire from his brother-in-law, Dr. Ward of Peterboro, Ont., announcing the death at Peteboro of his mother, Mrs. John Delaney.

On last Monday, June 6th, at the residence of C. D. McNabb, Cranbrook, Miss Elizabeth Robinson was married to William Johnston of McAdam, N. B. by Rev. W. G. W. Fortune. The newly married couple will make their home in this city.

Captain J. W. Troup has sold his little steamer Idler to Messrs. Morel and Mortelette. This steamer used to ply on Trout Lake before the Canadian Pacific placed the steamer Victoria on the lake. The price realized was a good one. The sale was made through McDermid and McHardy.

William Law, secretary of the Union Meat Co., doing business in Greenwood, Phoenix and Grand Forks, as an independent meat concern, is in the city and will leave for the Boundary in the morning. The Union Meat Co. owns a big cattle ranch near McLeod, and intend establishing branches in all the towns of the Kootenay.

Ben Ross of Bergen, Norway, left the Hunter V. mine at Ymir on March 24th last and came to this city with some other miners. He stopped for three days at the Klondike hotel and then disappeared, leaving his clothes and blankets at the hotel. None of his friends have heard of him since, and his wife in Norway is very anxious to obtain some news of him. Any one having information on the subject is requested to communicate with A. D. Wheeler of Ymir.

Fred Starkey of this city and R. G. Salisbury of Rogers and Co. of Winnipeg, have returned from a visit through the Slocan. They report that the Payne, Slocan Star, Ivanhoe, and Rambler Cariboo are working to their full capacity. A strikes of importance was recently made in the Rambler Cariboo at a depth of 800 feet. A long tunnel is being driven in to tap the main ledge of the Rambler Cariboo at depth. They report that merchants and people generally are looking hopefully for better times in the immediate future. They did an excellent business.

The change in the train and mail service which come into force after midnight tonight are worth noting. The Crow boat will in future leave at 4:30 a.m., but the Crow, Spokane and Kaslo mail will close as usual at midnight. The train for Rossland and the coast will leave at 7:15 p.m. and the mail will close at 6:15 p.m. The Slocan train will leave at 10:45 a.m., the mail closing at 10 a.m. The boundary mail will close as usual at 7:30 a.m.; and the train from Slocan will reach this city at 5:15 p.m. The Coast-Rossland-Boundary train will arrive at 10:15 p.m.

BACK FROM COLORADO

(Continued from First Page.)

captain Moore told the crowd to help themselves of what was left. The militia then took possession and turned the store into a commissary for themselves.

"All over the Cripple Creek district the alliance issued a card almost identical with the union card, and in order to remain there a man must hold one of these.

"Burns, the manager of the Portland mine threatened to obtain an injunction against the alliance, who said, that if he moved in that direction they would deport him.

"Before the convention adjourned we unanimously decided to fight this thing to a finish, and every delegate present pledged himself and his union to supply all necessary funds to accomplish this desired end. We, have left the whole matter in the hands of the executive board, and are fully satified that they will protect the best interests of the federation. The federation have offered a reward of $5000 for the arrest and conviction of the perpetrators of the Golden Circle outrage.

"President Moyer was practically continued in office, no successor being nominated. Most of the old board were reeleted."

Mr. Phillips said that after his exciting experiences across the line he was glad to get home safe. "Some delegates said that a British delegate could not be arrested," concluded Mr. Phillips, "but I think that over there, they can arrest anyone they please."

EXCHANGE OF COURTESIES

Lisbon, June 11—King Carlos, accompanied by his staff and the minister of marine, was entertained at breakfast today by rear-admiral Baker on board the United States flagship Kearsage. His majesty, on his arrival alongside the Kearsage, was received with full honors ,salutes being fired by the American and Portuguese fleets. The breakfast was attended by the admiral and his staff of captains. The admiral toasted his majesty as a king and a fellow sailor. The king responded with a felicitous speech and a toast to President Roosevelt and the American navy.

CANADIAN HORSE WON

Buffalo, June 11—Fort Hunter, the Canadian 3-year-old, won the Buffalo Derby at Kenilworth today. The Derby has a guaranteed cash value of $6000, of which $750 goes to second and $250 to third. Six horses started in the even, the Wilson stable at Montreson and Dolly Spanker, ruling favorite at evens.

WERE AFRAID OF TROUBLE

Dowie Could Get no Accommodation in London Hotels

London, June 11—John Alexander Dowie arrived here this morning from Holland and made a tour of the hotels accompanied by his wife and son and escorted by deacons in search of accommodations. Everywhere he met with refusal, as the hotel managers were afraid of a repetition of the rowdyism which marked Dowie's former stay here. Ultimately, being unable to find lodgings, Dowie proceeded to the Zionist headquarters. These have been connected with the police telephones, in anticipation of a possible onslaught by the mob.

The followers of John Alexander Dowie assembled in Hyde Park tonight, but their leader did not appear. A considerable number of police were present and there were few sightseers. Little interest was manifested in the proceedings, which were orderly.

LATER—According to the weekly dispatch Dowie last night secured rooms at the Hotel Cecil.

DOMINION DAY CELEBRATION

Everything is Looking Well for Two Good Days of Sport

The Dominion day committees are working like beavers and everything is looking well for the celebration. Posters were sent all over the country yesterday, and also show cards, announcing in big red letters that there would be two days' celebration on July 1 and 2 and mentioning some of the larger features. Invitations by the hundred have also been sent to the leading citizens of the Kootenay towns to come here and enjoy themselves. A meeting of the general committee will be held on Monday evening. The final details of the program will then be arranged. Those who desire to have features placed on the program should attend as this will be the last opportunity, as the program must be printed so that it can be sent out to help advertise the celebration.

MAY POSTPONE FIGHT

Champion Jefferies Has a Badly Crippled Knee

San Francisco, June 11—Advices from the training quarters of James J. Jeffries state that the condition of the champion's crippled knee is improved somewhat, but he will not be able to leave his cottage today. Possibly he may do some more work tomorrow. If he does not rapidly recover the use of his leg, he may be compelled to request a postponement of the fight, but he does not anticipate that this will be necessary. When asked if they would consent to a change of date, the backers of Munroe said they did not desire their man to fight a cripple.

Harbin Springs, June 11—The doctors who are attending Jeffries' injured knee left here today. They said Jeffries must be careful and take good care of his injured member. Delaney said: "Jeffries' knee is weak and he cannot do anything except gymnasium work, and he must cut out all road work. He will not leave here until the last moment. There will be no postponement of the fight."

FRANCE AND THE VATICAN

No Immediate Signs of Softening of the Strained Relations

Rome, June 11—The pope today discussed at length with the papal secretary of state Merry del Val, and others the France-Vatican situation. His holiness took occasion to speak on the report of Mgr. Lorenzolli, papal nuncio at Paris, in which the nuncio states that not the least step has been taken by the French government in the direction of approaching or even softening the strained relations which exist. The nuncio adds, however, that there are many signs which indicate the fall of the Combes cabinet to be not improbable, making it appear to be the best policy to wait, as the new government would certainly correct the present state of affairs. The pope seems to favor the adoption of the nuncio's suggestion.

EGGS WILL GO UP

Wholesale merchants say that advices from the east indicate an upward tendency in the price of eggs, and it is thought there will be a sharp advance shortly; in fact, in some parts of eastern Canada the price has already advanced.

Your Eyes

Are you paying attention to them? If they are troubling you why not get expert advice about them? You will be relieved of a great many pains by wearing a perfectly fitted pair of glasses. Rebate Checks!

Our rebate Check system is even more successful than we anticipated and our Cash business is very materially increased since we adopted it. Remember we give a check with each cash purchase and we give ONE DOLLAR in goods free for every Twenty-Five dollars worth of checks returned.
If your groceries cost you $25.00 last month, they will only cost you $24.00 this month if you buy from us.
We guarantee to sell as cheap as the cheapest, quality the best. Insist on getting REBATE CHECKS and save them, they are worth money to you.

Late Springtide and Rush Orders

A June rush has resulted from the late Springtide. We welcome the occasion for the opportunity it gives us to show the completeness of our Stocks and the excellence of our service. Whatever your wants in Watches, Jewelry and Diamonds, and however promptly you want them, we can satisfy you in stock, terms and service. Our Diamond offers are specially interesting in view of the rapidly advancing market.
