Prov. Legislative Assembly MAY 19 1904 VICTORIA, B. C.

PROTECTION A KEYNOTE

Platform on Which Republican Party Will Stand in This Year's Fight

If There is to be a Revision of the Tariff Work Must Not be Done by the Democrats

New York, May 14.—The draft of the republican platform of 1904 which will be submitted to the committee on resolutions of the national convention by senator Lodge, the prospective chairman, as the basis of its deliberation, is completed, says a despatch to the Tribune from Washington. Although subject, of course to minor modifications and rearrangement in committee, it may be accepted as the declaration of policies on which the republican party is ready to fight this year's national campaign. It is a notably terse platform, nowhere open to equivocal interpretation, sharply contrasting with anything of the disorganized fusion compromise the opposition can present for the popular approval. The platform will review the foreign relations of the United States under president Roosevelt's administration.

Among the achievements will be enumerated the accomplishment of Cuban reciprocity and the ratification of the treaty with Cuba, which incorporates the Platt amendment, the course of the administration in the Venezuelan affair, the Alaskan boundary dispute and the treaty with China.

The president will be praised for his successful enforcement of the Sherman anti-trust law, which was enacted by a republican congress and first applied by a republican president.

The section which deals with protection is almost a replica of the Massachusetts plank. It will read substantially as follows:

"The protection, which guards and develops industries, is a cardinal principal of the republican party. We insist upon the maintenance of this principle, but we recognize that particular tariff schedules are neither sacred or immutable. Rates of duty may be altered when changed conditions demand their alteration, but no revision should be undertaken, unless it is clear that the benefit will more than compensate for the disturbance of business which inevitably attends a revision of the tariff schedules, nor can such revision be entrusted with safety to any other than the party of protection. To entrust it to the democratic party is again to invite the democratic disaster and panic of 1893."

NO DECISION WAS GIVEN

KID McCOY AND JACK O'BRIEN FIGHT FOR SIX ROUNDS

IT WAS A SCIENTIFIC EXHIBITION WITH HONORS EVEN.

Philadelphia, May 14.—"Kid" McCoy and Jack O'Brien, tonight fought one of the most scientific six-round bouts ever seen in this city, at the Second Regiment armory. At the close of the bout it would have been a difficult task to pick the winner. McCoy had the best of the third and fourth rounds, while O'Brien had the "Kid" in trouble at the close of the fifth round and also in the sixth round. McCoy was visibly in distress at the end of the sixth round. He repeatedly ran away from O'Brien and only attempted to counter when O'Brien led. There were no marks on McCoy, while O'Brien's left eye was bleeding. O'Brien landed the greater number of blows, but McCoy's had more steam behind them.

The men shook hands at 10.40.

Round 1.—McCoy forced O'Brien around the ring but the latter drove with a left to face and repeated in a moment later with another. The men came to a clinch. O'Brien landed a left on the face and a light left on the stomach. They fiddled for a second and McCoy landed a left to the face. They again rushed to a clinch. O'Brien drove his left to the face, and the Kid broke ground. O'Brien crossed McCoy with his right and then landed a left and right to face as the gong sounded.

Round 2.—O'Brien was right after McCoy, but missed a left lead to the face. They rushed together and both landed left. O'Brien slipped twice to his knees, but was up instantly. McCoy brought his left up to the head. O'Brien landed a left to the Kid's head and brought his right over to the jaw. McCoy landed a right on O'Brien's stomach as the men came together. They were clinched as the bell rang. There was no damage done in this round.

Round 3.—McCoy missed a left and O'Brien swung the right to the jaw. They clinched and McCoy forced O'Brien's head back with the heel of his glove. He was hissed. McCoy appeared to be the fresher of the two men.

Round 4.—They rushed together. Both men were fighting hard. O'Brien landed a left to the face and McCoy a left to the stomach, and a right to the jaw. McCoy landed a left to the face. McCoy landed two hard lefts on O'Brien's wind, and O'Brien lost some of his steam. This was McCoy's round.

Round 5.—The pace was beginning to tell on both men. O'Brien landed a left to McCoy's chin and received one in the same place a moment later. There were more misses than blows in this round.

Round 6.—McCoy tried a left and right again, but missed. O'Brien got a left to McCoy's stomach and they clinched. O'Brien drove a hard left to the Kid's face. The Kid continually held on and seemed to be in distress. McCoy ran away from a vicious left, but O'Brien landed a right on the head as the round closed.

LEDGE IN THE STREET

A VEIN ON SPITZEE FOUND BY THE CITY EMPLOYEES

SHIPMENTS FOR THE WEEK WERE BELOW THE AVERAGE.

Rossland, May 14.—The situation at the Le Roi mine is affording ground for much speculation. The management maintains an attitude of reticence on the subject and the only information known are the obivous facts that the mine is employing about 125 men, shipping approximately 250 tons of high grade ore daily, and that the smelter is running four furnaces out of a total of six. It is understood that concentration is receiving more attention than at any previous juncture. The deep-level development is giving much satisfaction. The winze is being sunk in a fine body of ore at the 1350 level and continues in solid ore of a good grade. It is believed that the extension of the main shaft to the 1500 foot level will follow the present development.

The Jumbo mine resumes shipments tomorrow and after next week will send out 60 to 70 tons daily. The mine is to be equipped in the next few weeks with a compressor plant for which arrangements are practically completed.

The excavating for the White Bear concentrator is making excellent headway. The plant is located within a few yards of the mine headworks to reduce the costs of handling the ore. On its completion it will be the largest plant in Canada utilizing the oil process for the recovery of values from pulp.

The Spitzee mine is giving gratifying results. The management states that commencing in June, the property will earn small profits, although the production will be subsidiary to a general plan of development. The company starts Monday on prospect work at the corner of Kootenay avenue and Monita street, a permit having been granted by the city. At this point on the Derby claim of the Spitzee group, the city employees cut a fine vein while laying water mains last year. The showing is now to be investigated on a good scale. The original Spitzee showing was disclosed by the Canadian Pacific railway cuttings, and it seems strange that another good strike should be made by accident.

Shipments for the week ending tonight, and year to date are:

Le Roi	1,504
Centre Star	1,427
War Eagle	989
Le Roi No. 2	440
Le Roi No. 2 (milled)	350
Spitzee	60
I. X. L. (milled)	125
Total for week	4,895
Total for year to date	147,546 tons.

KASLO'S CELEBRATION

NELSON VS. NEW WESTMINSTER'S LACROSSE CHAMPIONS

THE INTERMEDIATES WILL PLAY AT ROSSLAND

"Nelson is a good lacrosse town, and it will be better this season than ever," said an onlooker at the lacrosse practice on the recreation grounds yesterday afternoon.

"Yes," added Frank Musselmen, the Nelson club's manager, who was standing also watching the players. "There is plenty of enthusiasm this year and the fact that we are sending out two teams on Victoria day is proof of what I say. What other city in the province of the size of Nelson can do as much?"

"I am very hopeful of the result of our match with New Westminster at Kaslo on the 24th," continued Mr. Musselman, "If our boys all turn out to practice steadily this next week and get in proper trim we should make a great fight at Kaslo. This next week we want the boys to practice regularly every night after dinner, say at 6:30. We have a good bunch to choose from for Kaslo, and all other things being equal, preference will be given to those who turn out to practice regularly.

"Some of the players are certain, but speaking generally the team will be selected from the following: captain Blackwood, Archibald, Thompson, McNichol, "Snowball," McNab, Peard, Knox, Williamson, Fox Hatcher, Jeffs A., Jeffs C., Perrier A., and Miller. There are some more names to be considered this coming week but under any circumstances we will have one of the strongest combinations for Kaslo that Nelson has ever put in the field.

"The New Westminster team with two exceptions will be the same players they had last season. It is a little early in the season to speak of the coast team's form this year. They are probably in good shape but we will tackle them this year more hopefully than ever before."

The intermediates of this city who will play Rossland at the Golden city on May 24th, will be selected from the following and some others: Greyerbeihl, Deacon, Steele, McBeth, Davidson B., Davidson W., Bell, Ball, Wallace, Guay, Stewart, Johns and H. Perrier.

The team for Kaslo will leave on the early boat on Victoria day and will be accompanied by the Nelson band.

ADMIRAL KAKATORE ATTACKS PORT DALNY

He Boldly Enters the Harbor With Squadron and Opens Heavy Fire on Enemy, Assisted by Land Force of 20,000--Thought Place Has Been Taken--100,000 Japs Will Storm Liao Yang

RUSSIA WANTS PEACE.

War Party Urging Czar to Make Terms With Japan

New York, May 14—"I learn on excellent authority that there is a strong possibility of peace," cables the Berling correspondent of the Times. "What makes the news doubly interesting is the fact that the war party has urged the czar to end the struggle. The basis of settlement is to be the independence of Korea, under the protectorate of Japan, and Manchuria to remain Chinese territory. In a secret treaty between China and Japan the integrity of Manchuria has been guaranteed by Japan. I also learn that Russia wishes to come to an understanding with Japan independently of England."

Chicago, Ills., May 14.—A special from Che Foo to the Daily News says: "When the Daily News despatch boat Fawn, arrived off Dalny early this morning, a heavy bombardment was in progress. As the channel was thickly mined by the Russians, and the Japanese admiral Kakatora had strict orders that noncombatants' boats were to be excluded, it was impossible to get within the roadstead, hence an accurate report of the proceedings is impossible. As far as it was possible to ascertain, the armored cruiser Yakamo, four other cruisers, one gunboat and one battleship, having cleared the channel, entered the harbor shortly after daylight and began a heavy fire which was still in progress at noon. It is estimated that 20,000 Japanese troops are investing the town and there is every reason to believe that they delivered the assault this afternoon and are now in possession the city. It is understood that the landing of the second army was completed yesterday at Pitsewo. There are now 50,000 Japanese troops on the peninsula."

ROAD IS CLEAR.

A Patrol Reaches Shan Hai Kwan From Port Arthur.

Shan Hai Kwan, May 14.—A patrol which left Port Arthur on May 10th, arrived here today, apparently confirming the report that communication with Port Arthur has been restored. There are only vague rumors here of Japanese movements. It is stated that the heavy losses sustained by the Russians in the battle on the Yalu were due to the inability to control the soldiers. They were ordered merely to develop the enemy's strength, but they rushed headlong against a superior force, and were crushed back by sheer weight of numbers.

ITS FLAG WAS FLYING

Pflug Says Japanese Fired on the Red Cross Train

St. Petersburg, May 14.—In an official despatch from Mukden, under date of May 14th, major general Pflug reports that the exhaustive inquiries regarding the allegation that the Japanese fired on a Red Cross train bound from Port Arthur on May 6th, prove that the Red Cross flag was flying on the train as it left Tain Jua and that not a shot was fired from the train, which was carrying only Russians who were ill. The Japanese, general Pflug says, opened fire spontaneously and only ceased when the train was beyond range.

REJECTED BY FRANCE.

Colonel Marchand Will Offer His Services to Russia.

Paris, May 14.—General baron Rebillot, a friend of colonel Marchand, whose resignation from the army was accepted yesterday, says that the latter will probably offer his sword and services to Russia. Such an offer by the hero of Fashoda, adds a dramatic effect to his retirement from the French army. The Russians have a high opinion of his military genius and it is understood that general Kouropatkin personally is desirous of securing Marchand's services.

RUMORS OF SHARP FIGHT.

Encounter Said to Have Occurred Near Liao Yang.

New Chwang, May 13.—Delayed in transmission.—There is a persistent rumor here of a sharp fight between the Russians and Japanese near Liao Yang, which it is impossible to confirm officially. The censor here is passing almost nothing in the form of news, and correspondents are threatened with expulsion. The Russian agent is watching the telegraph offices on the railroad between New Chwang and Shan Hai Kwan, and reporting all messages filed to the local censors.

KOUROPATKIN'S ARMY A BLUFF

It is Growing Steadily Smaller—French Confidence Shaken

Paris, May 14.—French confidence in Russia's prowess is much shaken as a result of the recent developments concerning the weakness of general Kouropatkin's land forces. The early Japanese successes were accepted as preliminary, it being believed by the officials and public here generally, that Kouropakin was concentrating a vast force, approximately 400,000 men, which would eventually annihilate the small Japanese army. The military experts of the Figaro and other leading journals have sought to demonstrate that Kouropatkin's success was a mathematical certainty on the ground that his force was four times greater than that of the Japanese. But the reports of the last ten days have shown a constant shrinkage of Kouropatkin's army until now it is generally accepted in official circles that he has not over 200,000 men, including those bottled up at Port Arthur, and in other garrisons. The announcement that the Russian commander has put off taking the offensive until July, in order to secure re-inforcements adds to the belief that his strength has heretofore been greatly over estimated.

However, the officials and the public generally continue to believe that general Kouropatkin is working out a strategic plan, attracting the Japanese far inland, where ultimately he will overwhelm them, but the feeling of confidence is steadily diminishing.

Official advices received here today say there is an enormous congestion of military forces near Irktusk, Siberia, owing to the inability of the troops to cross lake Baikal, the floating ice still preventing the passage of the boats and a detour round the foot of the lake requiring seven days. Therefore a large force is held back until it is possible to cross the lake. It is the belief here that these troops may sufficiently augment Kouropatkin's strength to permit him to take the offensive.

PRISONERS TORTURED.

Three Japanese Soldiers Terribly Mutilated by Russians.

Tokio, May 14.—5 p.m.—A correspondent, who is with general Kuroki, has made the charge that the Russians mutilated the Japanese dead at the Yalu river. He says that when the detachment of the fourth regiment of the imperial guards, which occupied Kasan, received the counter attack from the Russians, three Japanese soldiers fell into the hands of the enemy and were taken prisoners. The mutilated corpse of one of them was afterwards found, according to the correspondent, in a tree on the bank of the Yalu. "The dead man's face had been stripped of its skin, his stomach had been gouged out," continues the correspondent, "and his feet had been cut off." The mutilations were horrible. It is believed that the other two men met the same fate, but when the corpses of the three were rolled over the bank only that of the one caught on a tree, the others falling into the river."

RUSSIAN EXPERT'S VIEWS.

Japanese Will Hurl 100,000 Men Against Liao Yang.

St. Petersburg, May 14.—The army organ is disinclined to believe that Hai Cheng is the Japanese objective. It says the division of guards now marching in that direction probably will swerve northward toward Liao Yang, followed by the forces now at Su Yang Chow, and, combining with the division reported to be at Somaitzi, make a combined attack on Liao Yang. The Novoe Vremya's expert estimates the forces advancing against Liao Yang at 100,000 men with 50,000 horses and 270 guns, and believes the Russians are retiring upon their base.

"It is a critical and anxious moment," the paper continues. "General Kouropatkin is allowing the enemy to take the offensive, watching for a favorable moment to strike a decisive blow."

RUSSIA IS HELPLESS.

Sure to Be Beaten By Japan in Present Struggle.

New York, May 14.—Lieutenant-general sir Henry C. Wilkinson, K.CB., (retired), who arrived from Liverpool on the Campania today and who expressed strong pro-Japanese sympathies said, in an interview, that Russia is practically helpless in the present struggle. He was equally sure that Russia will not be able to recover her lost prestige. He said that the sentiments he expressed were those of the officers of the British army and navy, who knew how well Japan was prepared for war, and how helpless Russia was and is.

PROTECTING THE BRIDGES.

Nizhina, Novgord, May 14.—Steamers on the Volga are stopped and searched before they pass the bridges, on suspicion that Japanese agents may be on board with the intention of blowing the bridges up, which would impede the progress of trains bound for Siberia. Sentries on the Syrzian bridge recently fired on two steamers for not stopping when ordered to do so.

RUMOR FROM PARIS.

Port Arthur Has Fallen—10,000 Men Killed.

London, May 14.—A telegram from Paris says a rumor is current there that Port Arthur has fallen and that 10,000 men were killed during the engagement. Nothing confirmatory is obtainable in London.

JAPANESE TAKE DALNY.

Chicago, May 14.—A special cable to the Daily News from Che Foo, says: "Admiral Katsoka's fleet, the third Japanese squadron, began a fierce bombardment of the defences of Dalny this morning. The land batteries were speedily silenced. Russian troops were again seen in the neighborhood, and were driven out of their positions by shells. Under the cover of the fire from the ships, troops were landed and a combined attack on the city undertaken. There is every indication that the town is now in the possession of the Japanese."

SHOWING THEIR COLORS

Chinese are Becoming Distinctly Hostile to the Russians.

St. Petersburg, May 14.—Disquieting news regarding the attitude of the Chinese is contained in despatches from officers at the front was discussed by the general staff today. In addition to giving further details of the cutting off of Port Arthur, and confirming the report of the Japanese advance upon Liao Yang, these despatches state specifically that the Chinese have commenced hostilities against the Russians. Major general Kurkevitch reports that the Chinese attacked his outposts on the Feng Wang Cheng road leading to Saimitisi.

General Pflug telegraphs that, according to reports of patrols and missionaries, the Chinese at Tapadziatsi, 160 miles northwest of Mukden, and just outside the Russian sphere of influence, are preparing to rise against the Russians and Christians generally. As showing the extent of the hostile attitude of the Chinese, attention is particularly called to the fact that the distance in an air line from the point where the Russian outposts were attacked and Tapadziatsi, is 200 miles. The authorities say that this matter affects not only Russia, but the whole civilzed world, as it is feared that the rising will spread to other parts of the empire. The hostile attitude of the Chinese is attributed to the action of the Japanese in spreading reports of their successes and magnifying their victories at Port Arthur and on the Yalu. This propoganda has been active recently in all parts of China.

So far as the railway is concerned, while it is admitted here that a Chinese outbreak will be a new source of danger, preparations have been perfected by general Kouropatkin to insure the protection of this artery which is vital to the supply of his army. It is a matter of satisfaction to the authorities that the Koreans are proving more friendly than the Chinese, as shown by the reports of destruction by them of the telegraph wires used by the Japanese in northern Korea.

A CHANGE IN THEIR TONE.

Berlin Papers Prophecy Continued Defeat For Russia.

Berlin, May 15.—The newspapers of all parties have suddenly begun vieing with one another in praise of Japan's military genius, and prophecying the continued defeat of the Russians. Several morning journals openly declare that the Russian cause is lost, one intimating that Russia will prefer to make an attempt to recover her prestige in another sphere. evidently meaning southern Asia, rather than to continue the struggle in Manchuria indefinitely.

A SEVERE ENGAGEMENT.

Reported That 1500 Russians Were Slain in Encounter.

Shan Hai Kwan, May 14.—9.30 p.m.—A report of a severe engagement in the hills around Haiu Yen last Thursday has been received here. It lacks verification, but according to it, the Russians lost 1500 men killed and wounded and the Japanese occupied the town of Haiu Yen. The Japanese loss is not given.

A SMALL BRUSH.

Tokio, May 14—A detachment of Japanese troops have occupied Kwan Tien Sien, 60 miles northeast of Feng Wang Cheng. On Thursday last a detachment of Japanese attacked and dispersed 300 Russian cavalrymen, and captured a wounded officer and two men. The Russian cavalry was retiring from Tuch Li Chan.

JAPANESE OCCUPY SUOYIN.

Shan Hai Kwan, May 14.—Japanese troops from Feng Wang Cheng occupied Suoyin, 60 miles east of Liao Yang, on the main, road, Thursday. Their number is not known. The country is hilly.

BULLETIN FROM KUROKI.

Washington, May 14.—The Japanese legation received the following cablegram from Tokio, dated today:

"General Kuroki, commandant of the first army corps, reports that on May 7th a detachment of our troops occupied Kuan Tien Cheng. On May 11th another infantry detachment pursued the enemy's cavalry which was retreating from Shan Hai Kwan and captured two privates and one lieutenant, the latter is the son of general Honvall."

ALTRUISM AND EGOISM

W. BLAKEMORE'S PAPER PROVOKES INTERESTING DISCUSSION

SAID ALTRUISTIC SPIRIT IS THE CAUSE OF TRADES UNIONISM

The paper on "Altruism and Egoism," which William Blakemore read at the University club meeting last evening induced a most animated discussion. Considering the effect of altruism and egoism as it has appeared to mankind since the time of primitive man, he believes that altruism as an overpowering principle of life has emerged from a negligible quantity in primitive man to become a most widespread and ever increasing influence in the world of today, citing as an example of the embodiment of an altruistic spirit the great development and advance of trades unionism in the civilzed countries as we see it at present. Instead of the life for self, exhibited by primitive types of man, in which the tendency to overcome and destroy the weak was predominant, we have today men spending their time to ameliorate the suffering of the distressed and the afflicted by making laws for the poor, providing charity, erecting hospitals, asylums and other buildings for the protection and care of those who are not able to look after themselves.

R. J. Clark in discussing the paper ridiculed the idea of primitive man being influenced by egoism alone and attacked Mr. Blakemore on his positivist leanings as shown by the consideration in his paper of the "altruistic germ." He said he thought that trades unionism itself was egotistic since in advocating the cause B and C is really advocating his own cause much more than that of B and C.

W. J. Baird, who followed in the discussion, went more in detail into the philosophical side of the question and spoke of the views of certain philosophers, particularly Plato and Aristotle, on what constitutes altruism and egoism, as well as in what light they should be viewed.

Rev. J. T. Ferguson, who was present for the first time, gave it as his opinion that the genesis of altruism is too ill defined to make it possible to make its growth a debatable subject. It is impossible to recognize now, as it has always been, what the predominant motive in a man's life is. As an instance he stated that the late Cecil Rhodes, who seemed to have the egotistical side extraordinarily developed, was recognized by his most intimate friends to be most kind and noticeably inclined to avoid all tendency to bring glory to himself.

C. M. Fraser said the two ideas were too much interwoven to be opposable. Dr. Arthur thought that egoism is the governing principle of life, while W. F. Hansford took the opposite view. President McKillop said that perfect egoism must include altruism.

Mr. Blakemore then concluded the discussion, which was one of the most interesting in the history of the club.

PRANK OF CROWN PRINCE

Emperor Committed Him to His Room for Three Days.

New York, May 14—By order of the kaiser, crown prince Frederick William says a Times despatch from Berlin, has been confined to his quarters for three days for competing in the recent dangerous riding competition on the Berlin race track, when, mounted on an Arabian horse he out-distanced a dozen brother officers and tied with captain Von Holving, of the first Uhlans of the guard for the Kaiser's cup, but gallantly refused all claim to the prize.

GOLD GOING ABROAD

Over Fifty Millions Sent to Europe Since April 7th.

New York, May 14—An engagement of $2,500,000 gold at the assay office for shipment to Paris on Tuesday's steamer was announced today but the name of the shipper was withheld. This brings the total thus far announced for Tuesday up to $10,500,000, of which $3,500,000 is by shippers whose names are refused. Including this total of $10,500,000 for next Tuesday the aggregate amount of gold shipped to Europe from this port since the 7th of April is in excess of $50,000,000.

CHILD EDUCA...

James Hughes of Toronto Thinks It should be Most Thorough.

Chicago May 14—James Hughes of Toronto adlressed the National Congress of Mothers in Handell hall, in the university of Chicago today. In explaining his subject "Education for the art of Life," Mr. Hughes said that the child should be so educated that he would achieve the best not only for himself but for his race.

JOHN BULL GROUP BONDED

Cranbrook, May 14—C. A. Jarnigan of Spokane, J. M. Ely and W. F. M. Rickets of Pullman, Wash., while here a day or two ago purchased the John Bull group, a copper proposition, which has a showing to make it a promising prospect. Mr. Jarnigan represents John R. Cassin and Co of Spokane, who took up the Alamo, Ore., property known as the Alamo. Development work will be prosecuted this season, Henry Bradford, Frank Tracy and W. A. Meacham are the sellers.

BIG LUMBER DEAL

Fernie, May 14—Coward and Son, lumber firm of Fernie has purchased one of the largest stocks of seasoned lumber in the Kootenays, from what is known as the Cedar Valley Co., Ltd., which operated near Fernie a year ago. This will no doubt help out the seasoned lumber depression now on in that town, caused through the big fire of two weeks ago. It is understood that the firm will at once take steps to place part of it on the Fernie market.

DAILY PAPER AT SEA

Marconi's Experiments Insures the Success of Such Publications

During Recent Voyage He Had Communication With Shore Over Distance of 1,700 Miles

New York, May 14.—William Marconi, the inventor, who arrived on the steamer Campania from Liverpool today declares that he maintained constant communication with shore stations during the voyage. The success of these tests, he says, insures the publication of a daily newspaper at sea. A new set of instruments, which had been prepared especially for use in the trials made during the voyage, enabled the operators, the inventor says, to communicate with the eastern shore for a distance of 1700 miles. In the meantime before signals with the eastern shore failed, the station at Glace Bay on the west shore had been picked up and communication was continued uninterruptedly. Mr. Marconi was accompanied by several assistants and will continue his experiments at the Glace Bay station in Cape Breton.

MISS BARTON RESIGNS.

Mrs. General Logan Becomes Acting President of Red Cross.

Washington, May 14.—Miss Clara Barton sent in her resignation to the Red Cross Society today as president, and it was reluctantly accepted. Mrs James Logan became acting president. The ceremony took place in Mrs. Logan's residence. Miss Barton in a letter, reviewed briefly the work of the organization and said: "It is a proper time to remind you of the years and occasions on which your worthy president has sought to lay her weary burdens down year after year she has framed and offered her resignation to the presiding boards and committees. These have been resolutely met by appointments for life.

"It is an unspeakable joy to me that the toil-worn, weary mantle that drops from mine, falls upon the shoulders of my vice-president, the woman so cherished in our own country and honored and trusted in others."

The resignation was accepted and the executive committe united in a letter to Miss Barton saying:

"We deeply regret the circumstances and conditions which render it expedient that you should take this step and retire from a position which you have so long ably and satisfactorily filled."

The letter pays tribute to Miss Barton's devotion to the cause of humanity through the Red Cross, and says it is now right that she should have relief from her responsibilities and declares that she has made the organization illustrious.

MUNITIONS OF WAR.

Japanese Have Captured Considerable in the Past Few Days.

Antung, May 8, via Seoul, May 14.—Chinese coming through the lines report that the Russians have retired from Kae Li Man to the west of Feng Wang Cheng, but their reports have not been confirmed. Light skirmishing between Russians and Japanese outposts are occuring daily. News of the landing of the second army and the cutting of the railroad above Port Arthur has been received with great satisfaction at Japanese headquarters. The captures made by the Japanese during recent days include three thousand rounds of artillery ammunition, 300,000 rounds of rifle ammunition, 2,600 rifles and more than 100 ammunition supply carts.

NOTE WAS NOT SENT

Why Vatican's Protest Re Loubet Was Not Forwarded.

Rome, May 14.—Contrary to the assertion that the St. Petersburg government had rejected the vatican note protesting against the visit to Rome of president Loubet, of France, it now appears that the Russian government never received the note, as Goubanoff, the Russian minister accredited to the Holy See, upon receiving the note went to cardinal Merry del Val, the papal secretary of state, and pointed out to him the inopportuness of sending it to St. Petersburg as Russia is the ally of France, against whose chief of state the note was addressed.

LOAN STORY DENIED.

Berlin, May 14.—The National Zietung which maintains close relations with high financial circles in Berlin, denies, upon trustworthy information, the statement printed in London that Russia has opened negotiations with Berlin banks for a loan of $175,000,000.

HARVARD TEAM BEATEN.

New York, May 14.—The Harvard lacrosse team was defeated by the Crescent Athletic club on the grounds of the latter at Bay Ridge today, the score being 8 to 6.

TYPOGRAPHICAL UNION LABEL NELSON, B.C.

SLOCAN IS PROSPEROUS.

The dominion lead bounty, the development of the zinc resources and the leasing system are having a distinctly stimulating effect in the Slocan, and which in the immediate future promise to create a further revival of magnitude there. In the vicinity of Sandon, which is in the heart of the Slocan, there are now 450 men employed in the mines, and it is stated on what is considered good authority, that the force will be increased to 750 within the next 60 days. The Slocan, after passing through trials and tribulations, is getting its second wind, so to speak, and, as it is one of the richest silver-lead districts in the world, and provided with zinc resources that promise to make it a large producer of that metal, there is no reason why it should not repeat and even improve on its really good performances in the way of paying dividends. Its mines, large and small, have yielded larger profits for the amount invested and the quantity of work done than any other lode mines in the province, and now that conditions are favorable again, there is no reason why history in regard to dividend paying should not repeat itself. One convenience that is badly needed and which would play an important part in the development of the zinc resources of the section is a zinc reducing plant, and steps should at the earliest possible moment be taken for the establishment of one. No matter, however, whether such a plant is provided or not there is evidently a long period of activity and prosperity ahead of the Slocan.

You won't harden or shrink woolens with Sunlight Soap. The purity of the oils and fats and the absence of free alkali prevent that. 2B

LOSS WILL BE IRREPARABLE.

Nelson A. Miles, lieutenant general of the U. S. army, thinks that the results of the crossing of the Yalu by the Japanese will result, unless general Kuroki's forces are crushed, in the losing by Russia of every coaling station in the far east. In part general Miles says:

"The position into which Japan has now pushed her army, the basin of the Yalu river valley, the center of the triangle radiating between Vladivostock, Harbin and Port Arthur, necessitatees the dislodgement or destruction of Kuroki's army by the Russian forces, or Vladivostock and Port Arthur are both doomed and it is only a question of time when that result must follow. And with the loss of those two positions Russia would lose her coaling stations, docks, supply depots and safe harbor for any fleet that she might move from the Baltic or elsewhere to Asiatic waters. The reports, as given, of individual heroism, or fortitude of small detachments of troops, show most commendable spirit, as well as excellent discipline on both sides. But the test of two powerful armies of nearly equal strength of numbers and equipment is yet to be made in one general land battle without the assistance of any auxiliary forces. When that engagement occurs we shall be better able to judge of the probabilities as to results during the next twelve months."

ROUND OR FLAT.

Scientific circles in Hamilton, Ont., are torn from center to circumference by a controversy as to whether the earth is round or flat. The debates on this question have grown to such an extent that the advocates of the two sides of the question occasionally have as high as three and a quarter columns of space in the Hamilton Herald devoted to the question. It is an old question and one which was scientifically established in favor of the roundness of the earth some time since. The antispherists quote to a considerable extent the utterances of one John Hampden, who favored the flat theory some 34 years ago. Following are some of the arguments of the much mistaken Hampden:

"The Newtonian or Capernican theory, from the first hour of the invention, has never dared to submit to an appeal to facts."

Again: "Defenders it never had; and no threats, no taunts or exposure, will ever rouse the energies of a single champion." "Cowardice always accompanies conscious guilt." "The earth, as it came from the hands of the Almighty Creator, is a motionless plane, based and built upon foundations, which the word of God expressly declares cannot be searched out or discovered." "The stars are hardly bigger than the gas jets which light our streets, and, if they could be made to change places with them, no astronomer would detect the difference."

"Furthermore, the north pole is the center of the flat earth, and its extreme southern limit is not a south pole, but a circle, 30,000 miles in circumference. It is not gravitation which makes water run down hill, but the impetus of the water behind pressing on the water before."

Monkey Brand Soap removes all stains, rust, dirt or tarnish — but won't wash clothes. 26

KEEPING UP THE PACE

BOUNDARY HAS PASSED THE 300,000 TON MARK FOR THE YEAR.

SHIPMENTS FOR THE PAST WEEK REACHED TOTAL OF 14,724.

[Special to The Daily News.]

Phoenix, B. C., May 14.—This week's Boundary mines ore shipments bring the tonnage for the year over the 300,000 figure. The several low grade shippers sent out the following amounts of ore for the last seven days:

Granby to Granby smelter.....10,440
Mother Lode to Mother Lode 3,104
Emma to Mother Lode and Granby 1,015
Oro Denoro to Granby 165

Total for week 14,724
Total for year to date 300,829 tons.

This week the Granby smelter treated 10,413 tons making a total of 232,264 tons to date this year.

INTERESTING QUESTION

Is Preserved Beef Contraband of War—Will Japan Seize it.

[Special to The Daily News.]

Victoria, May 14—Speculation is rife in shipping circles as to the ultimate fate of the 500 tons of American preserved beef that went out on the Empress of China, consigned to a well known firm in Shanghai, to be forwarded to the headquarters of the Russian army in Manchuria or in Southern Siberia. Some hold that the beef is contraband of war and that Japan, being a belligerent, will be entitled to intercept it when the Empress reaches Yokohama. Others, as stoutly maintain, that beef is not contraband, and that the Japanese are not molesting a British vessel bound from a neutral port to a neutral port. There is no doubt on one point —that the Japanese know all about the shipment, and have known ever since it left the packing house, or indeed as soon as the order was placed. What they propose to do about it, however is known only to the Imperial Japanese council. Recent developments would seem to have enormously increased the difficulty of getting that consignment up country, supposing the Japanese did not intercept it.

HAVE EARNED THEM

American Scientists Honored by a British Chemical Society

London, May 14—Honors are being given to American scientists by the Society of Chemical Industry of Great Britain, and two notable men have been selected as worthy of the honor. One is professor Ira J. Remsen of John Hopkins university, whose research work in the laboratory of that school has evoked universal recognition. As one of the first men to isolate saccharin, he is to be awarded the medal of the society for applied chemistry. The other is W. H. Nichols, who has been elected president of the society for 1905.

It is reported in scientific circles that, owing to new developments in his radioactive investigations and the discovery of some new features, sir William Ramsay has cancelled his lecturing tour in the United States and has determined to remain in his laboratory until definite results have been obtained.

BIG MEETINGS AT ST. LOUIS

St. Louis, May 14—St. Louis expects to entertain one of the largest crowds in the history of the city during the coming week. To the number of individual visitors at the world's fair will be added thousands of delegates who come to attend the first of the series of national and international conferences to be held here during the summer. On Monday the International Press congress will begin its sessions. This gathering will be attended by famous journalists and newspaper workers from all parts of the United States and from most parts of Europe. Canadian journalists will hold a meeting during the week and there will also be meetings of the National Editorial Association, the trade press associations and the state organization of editors. The second big gathering of the week will begin on Tuesday. This will be the biennial convention of the General Federation of Women's clubs. The advance guard of delegates to this meeting has already put in an appearance and it is expected that by Monday there will be hundreds of women here from every state and territory in the union. A contest for the presidency of the federation is on and there will be other features of the gathering that will undoubtedly cause it to be one of the most notable in the history of the organization.

FATALLY INJURED

Joseph Pounder's back is Broken and His Spinal Cord Ruptured

[Special to The Daily News.]

Grand Forks, May 14—Joseph Pounder who was so seriously injured last Saturday near Laquins sawmill by falling off a car on to a pile of rocks, was yesterday operated on to definitely ascertain the nature of his injuries. Dr. E. R. Northop, assisted by Dr. Kingston, performed the operation, and found the patient to have sustained a broken back, his spinal cord also ruptured as well as several ribs fractured, making the nature of his injuries so serious that there is no hope for his recovery.

Young George Gaw, son of ex-alderman Robert Gaw, who drives the Union Meat Company's delivery wagon, had a thrilling and miraculous escape from death yesterday afternoon. He was crossing the C.P.R. track just ahead of the east bound express and as the train was rounding a curve and out of sight he failed to notice its approach until it was too late and the engine tore along just as the horse had got clear of the track and caught the wagon square, hurling it into the air, and piling the boy and vehicle in a heap in the ditch. After the first shock was over the boy picked himself up with nothing more than a bruised face.

ALIEN SURVEYORS ON G. T. P.

Sir Wilfrid Says the Company Will Get Rid of them.

[Special to The Daily News.]

Ottawa, May 13—During the discussion on the Grand Trunk Pacific bill in the house of commons last night the opposition made a vigorous protest against the employment of American engineers in the surveys of the proposed road. Sir Wilfrid Laurier in reply said that C. M. Hayes, general manager of the Grand Trunk had written saying that there were not more than four per cent of them employed on the survey, whose discharges were asked for and if the final answer is not satisfactory the alien labor act will be brought into requisition and the men deported.

A BLOODY BATTLE

Turks Lost 700 and Armenians 900 Men in the Fight

Geneva, Switzerland, May 14—The Gazette de Lausanne has received a telegram from Bittlis, Asiatic Turkey, confirming the reports of fighting between the Turks and Armenians. According to these advices about 700 Turks and 900 Armenians were killed. The locality of the fighting is not given, but probably was in the Sassoun district of Armenia.

ROOSEVELT AND YOUNG

Ishpeming, Mich., May 14—Congressman H. O. Young was renominated for a second term at the Republican congressional convention of the twelfth district of Michigan held here today. The convention also selected two delegates to the Chicago convention and instructed them for Roosevelt.

A DOOMED WHALE

The rare spectacle of a whale pursued by swordfish was witnessed here by those who came to the beach yesterday. There were two swordfish following the leviathan. The whale, which was about 30 feet in length made swiftly for the shore in its efforts to get away from its tormentors, which, no doubt, frequently jabbed their swords into it, for the monster leaped entirely out of the water at intervals in its mad plunges. The three came in quite close to the wharf before the whale saw that there was no escape shorewards, when it turned out to sea again, and continued up the channel. The combatants were in sight for a long time, and were watched with eager interest by the assembled crowds.—Los Angeles Times.

Fresh Meats

We keep on hand daily all kinds of fresh meats, fish and choice lard. Prompt and careful delivery.

West Kootenay Butcher Co.
Ward Street, Nelson, B. C.

Ladies' Shoes

We have just put in stock the famous JULIA MARLOW, VICTOR and WALKER-PARKER high grade shoes for women. They are made from the very best of stock that can be bought and are guaranteed to give satisfaction.

Bar stocked with the choicest liquors and cigars.

Train stops long enough for you to drop over and see us.

JOHN BREAU, Proprietor

We Offer $1,000

For a Disease Germ That Liquozone Can't Kill

On every bottle of Liquozone we publish an offer of $1,000 for a disease germ that it cannot kill. We do that to convince you that Liquozone does as we claim.

Please note what that means. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is, therefore, almost helpless in any germ disease. *Liquozone alone can kill* germs in the body without killing the tissues, too.

Acts Like Oxygen

Liquozone is the result of a process which, for more than 20 years, has been the *constant study of scientific* and chemical research. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 14 days' time, these gases are made part of the liquid product.

The result is a product that does what *oxygen does. Oxygen gas, as you know,* is the very source of vitality, the most essential element of life. Liquozone is a vitalizing tonic with which no other known product can compare. But germs are vegetables; and Liquozone, which—like oxygen—is life to an animal, is deadly to vegetal matter.

We Paid $100,000

For the American rights to Liquozone—the highest price ever paid for similar rights on any scientific discovery. We did this after testing the product for two *years, through physicians and hospitals,* in this country and others.

That price was paid because Liquozone does what all the skill in the world cannot do without it. It does in germ diseases that which is impossible with drugs. It carries into the blood a harmless yet powerful germicide, to destroy *at once and forever the cause of any* germ disease. And no man knows another way to do it.

Liquozone is new in America, and millions who need it don't know of it. For that reason we are spending $500,000 to give the first bottle free to each of a million sick ones.

Germ Diseases

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever,

Asthma	Hay Fever—Influenza
Abscess—Anemia	Kidney Diseases
Bronchitis	La Grippe
Blood Poison	Leucorrhea
Bright's Disease	Liver Troubles
Bowel Troubles	Malaria—Neuralgia
Coughs—Colds	Many Heart Troubles
Consumption	Piles—Pneumonia
Colic—Croup	Pleurisy—Quinsy
Constipation	Rheumatism
Catarrh—Cancer	Skin Diseases
Dysentery—Diarrhea	Scrofula—Syphilis
Dandruff—Dropsy	Stomach Troubles.
Dyspepsia	Throat Troubles
Eczema—Erysipelas	Tuberculosis
Fevers—Gall Stones	Tumors—Ulcers
Goitre—Gout	Varicocele
Gonorrhea—Gleet	Women's Diseases

All diseases that begin with fever—all inflammation—all catarrh—all contagious diseases—all the results of impure or poisonous blood.

In nervous debility Liquozone acts as a vitalizer, accomplishing what no drugs can do.

50c Bottle Free

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on your local druggist for a full-size bottle, and we will pay your druggist ourselves for it. *This is our free gift,* made to convince you; to show you what Liquozone is, and what it can do. In justice to yourself, please accept to-day, for it places you under no obligation whatever.

Liquozone costs 50c. and $1.

CUT OUT THIS COUPON

for this offer may not appear again. Fill out the blanks and mail it to the Liquid Ozone Co., 458-460 Wabash Ave., Chicago.

NOISES OF LONDON TOWN

MAX PEMBERTON GIVES A VERY RACY DESCRIPTION OF THEM

A RECAPITULATION OF THE PRINCIPAL SLEEP KILLERS.

Max Pemberton has given some exceedingly racy opinions on the subject of the growing evil of London noises.

"Don't," said the well known novelist, by way of a beginning, "take my view as the official one of the committee for the abatement of the noises of the London streets. It is perfectly true that I jointed the council—in consideration that it involved no financial responsibility—but I have been so busy that I have had no time to attend to the matter.

"As, however, the noises of London seem to be growing worse, I mean to arouse myself and see what can be done.

"I hear that a correspondent of the Morning Post objects to the noisiness of motor cars. That is a view which seems to me absurd. Why, the steady hum of a motor along a street at night is absolutely soothing as compared with the jingling rattle and smash of the heavy horse drawn van.

"So far as the noises born of heavy traffic are concerned, I think the best way to deal with the question would be to establish a system of local veto. That is to say, I would give the various districts powers to prohibit heavy and therefore noisy traffic, at night along any street other than the main thoroughfares.

"From traffic the next step seems to me to be German bands. We are haunted by them in this neighborhood—Hampstead—and four of them visit this section twice a week regularly each.

"Sometimes two arrive at once, and begin to play different tunes together. Even that is not so bad till the trebles drop out in the middle of a bar to collect funds. That leaves those blaring bass instruments that curve right around the players' body to do their worst.

"The barrel organ is another scandal, and the bad part of the problem is that the moment one attacks them scores of sentimental people rush into print and say that we mean to destroy the only delight of the joyless lives of the slum children!

"We really don't want to do anything of the kind. All we want to do is to confine the barrel organ to the slums.

"What about the suburban piano? Well, I think that it is an evil which is rapidly dying out. The pianola has slain one-third of the horror, because it obviates the necessity of a man's six daughters each practising for four hours every day.

"Bridge, I think has killed another third. Do you ever go to a house where the piano is played after dinner? I don't. Once the musical daughter used *to be inflicted on the diner, but now we* play bridge.

"The remaining third of this particular evil is, I am sure, kept alive by the pernicious influence of the musical comedy.

"Then there is the music of the house dog. The confirmed howler is painful enough, but the habitual barker is, I think worse.

"Really, people who own habitual barkers, should be compelled in their own interests to keep the brutes within doors. They have to pay for the licenses and surely they are entitled to the full benefit of the midnight bark.

"Discursive cats are really not quite so bad. There is a certain amount of interest to be extracted from following the midnight feline altercation. One can study the conversation from the first low 'yowle' up to the piercing note of the crescendo.

"All the same I would compel the owners of cats to keep them chained up at night.

"There is really no excuse for people who keep crowing cocks. Every owner of such a noisy rooster should be compelled to wear a tuft of cocks' feathers round his neck as a badge of infamy.

"Really though" pursued Mr. Pemberton "the more one considers the matter the more one sees that people who should know better frequently violate the silence of the night.

"Who among us has not a neighbor who entertains largely and keeps his guests to a late hour? Who does not know the clarion call of the cab whistle at 3 a. m., followed by the shouted 'Good-bye, meet you tomorrow somewhere or other?"

"Hosts who permit this sort of thing should be forcibly deprived of the privilege of hospitality for a month or so.

"I don't believe, however, in the theory that we moderns object to noises because our nerves are worse. If they are worse it is probably due to the noises, but the real reason is, I think, to be found in the fact that while we sleep with our windows open our forefathers slept with them hermatically sealed."

CHARIVARIA FROM PUNCH.

It is rumored that, encouraged by the success of the Anglo-French arrangement, the sultan of Morocco is about to come to terms withe the Pretender, the basis of the agreement being that the sultan is to have England and the Pretender France.

Mr. Justice Grantham has been fined £20, by a pickpocket without option of imprisonment.

The Germans have fought an eight hours' battle with the Herreros. The trades unionists claim this as a victory.

With reference to the edition of Dickens' works which a New York publisher is preparing for millionaires, we understand that the same is not for reading, but merely to brag about. A complete set, as already announced, will cost £26,000. It is possible that later on a popular edition at £13,000 will be produced.

We understand that next year the Motor-Boat Races at Monte Carlo are to take place in the evening as the effect of the illumination when a boat catches fire is so much prettier in the dark.

FOOD FOR THE MIND.

The British Medical Journal (April 10th) directs attention to an interesting paper recently read by Dr. B. Laquer regarding nervous diseases. He condemns the consumption of exciting literature before the age of puberty, and instead of theatre, music-hall, concert-room, and *newspaper, he recommends twelve to* thirteen hours' sleep, steady moderate sport, every inducement to the observation of nature, and everything which tends to improve the senses, the whole of the muscles, and to render the subjects children of the country and not of the town. According to Dr. Laquer, artistic education tends particularly to upset the physical balance, and its commencement should, he holds, be delayed to the age of sixteen in girls and of eighteen in boys. He agrees with Dunin's view that the three main characteristics of the physically unstable are abnormally increased self-analysis, fear, and lack of will-power. To combat these he recommends books of travel, sober histories, and biographies, particularly those of men of action. Humorous books are also recommended; the English humorists selected by Dr. Laquer are Dickens, Jerome, and Mark Twain—a juxtaposition which is perhaps in itself sufficiently amusing. The reading should be moderate in amount, its theme frequently changed, and the habit of concentration encouraged by writing abstracts of the works read.

TOURISTS ASSOCIATIONS

They are Springing up All Over the Dominion

All over this glorious country tourist associations are at work, says the Vancouver World, In this province Vancouver, Victoria and Nelson are served by useful bodies of this description, while down by "the sounding Atlantic"—it is no more noisy than the Pacific as it rolls in from Flattery—the organizations at Halifax and St. John are continuing their glad task of advertising the provinces of Nova Scotia and New Brunswick as resorts for summer visitors. We have received from the secretary of the New Brunswick Tourist Association at St. John, a profusely illustrated booklet of forty pages. It is as good as the one issued by the Vancouver association—and that is a compliment indeed. Anyone contemplating a trip to New Brunswick should write to the secretary of the Tourist Association at St. John—Mrs. R. E. Oliver—and obtain a copy of the pamphlet. It is distributed gratuitously and no monetary benefit is expected by the association for the work it is prosecuting The organization is supported by the voluntary subscriptions of St. John citizens, who recognize the great natural charms New Brunswick country offers to tourists and sportsmen, and wish to make these charms known.

As the "old home and tercentenary celebration" is to be held in St. John from June 20 to June 27, it is likely that a number of British Columbia people will make the journey across the continent this year. All of them should certainly secure a copy of this delightful booklet which tells visitors how they may spend the summer days in the "city of Loyalists," breathing in the invigorating air, and lingering amid the breezes that are wafted from the bay of Fundy. Natural features of rugged beauty, and scenes of historic interest will tempt tourists to prolong their stay—the beetling cliff, the rounded hill, the worn and tilted rocks, telling of mighty upheavels and the forces that *worked in the long ago; the wonderful* "reversing falls" at the mouth of the St. John river, and how they were formed; scenes of historic interest telling of aboriginal dwellers of the past, of the struggles for mastery between the French and English, and the making of the country by the loyalist forefathers; the varied incidents and relics which tell of the efforts to carve homes out of the wilderness, hew down bluffs into streets, build wharves and ships for commerce, and rear the edifice of a stable city government. These are of surpassing interest to intelligent visitors telling of human effort and progress in the triumph over rugged nature.

BOARD OF TRADE NOTES

Matters of Minor Detail at the Monthly Meeting on Thursday Evening

Want of space in yesterday's issue of the Daily News prevented the publication of some of the minor transactions at the monthly meeting of the local board of *trade, space being given to the lumber ques*tion as the most important one before the meeting.

In addition to the lumber question the special committee of the board re aid to the Tourist association, reported that the city council had reconsidered their refusal to grant the aid asked and had agreed to grant a sum equal to one-half the amount raised by the association. *This was considered a satisfactory arrange*ment by the board and congratulations were indulged in by the members.

The committee appointed to interview Mr. Busteed regarding the installment of telegraph operator at Poplar and the erection of a larger freight shed at that place, reported that the C.P.R. had agreed to grant the board's request in each case.

R. G. McLeod was unanimously elected a member of the board without ballot.

A letter was read from the postal department, Ottawa stating that the Slocan-Lardeau mail would in future be sent by the C.P.R. steamers as requested. The secretary was instructed to acknowledge the letter with thanks.

H. B. Munro of Greenwood, who has been appointed B. C. representative at the St. Louis fair, wrote asking for certain information. The board sent the Greenwood man copies of the Daily News issued on the first of the year, conaining the information asked.

The agent of the Great Northern railway will be requested to urge upon his company the extreme desirability of placing a Pullman car on the Spokane-Nelson route for at least the summer season in order to accommodate the tourist trade.

The meeting then adjourned.

A REALISTIC ACTOR.

Harold Begbie, in the Pall Mall Magazine, presents Beerholm Tree as "the master juggler in personality," and tells two interesting stories of the way in which Mr. Tree absorbs himself in his parts. When he was acting Hamlet, he found himself in that scene on the ramparts where he awaits the approach of the ghost, gasping for breath and drenched with the dew of apprehension.

"What a fool I am!" he cried to himself. "My back is to the audience, my face is hidden, the scene is in darkness. Why should I waste so much mental force? Why not stand at rest, with detached mind, awaiting my cue with a *cool pulse?*"

But a trial to this end convinced him of its folly. He had a difficulty to get back into the character of Hamlet; and, moreover, he discovered that the scene did not grip the audience with the same intensity. What was the effect of this terror on the ramparts, but a telepathic effect from the stage to the audience? It was, in other words, a brain-wave from the actor to the men and women filling the silent house.

The second story told by Mr. Begbie supports the same mystical thesis. When Mr. Tree was playing Mark Antony he was so lost in the part that his grief for the murdered Caesar affected the actors gathered round the bier, and from them flowed into the house. But towards the end of the piece, at a time when he was feeling unwell and worn out, he checked something of his fervor, and spoke with quieter pulse and with intenser *self-consciousness.*

"What was the result?" he exclaimed. "The crowd on the stage was unmoved, and the crowd in front was unmoved also. I could feel the loss of sympathy between my fellow-actors, my audience and myself."

BROWN & CO

MEN'S CLOTHING

Gentlemen, your attention; a glance may save you money. Saving you money is one of the important features you find in our men's clothes. Perfect in fit, correct in style, in all wool materials of new designs and colorings. In short the best values in the west.

CLEANING HOUSE TIME

is near at hand. The question of what to do with your walls to have them sanitary, neat and attractive, has to be decided.
You will not want to use kalsomine, because after it has been on a short time it rubs off on everything that comes in contact with it; and then when you wish to do it over again comes the nasty muss of washing off the old coat, which costs as much as to put it on in the first place. Wall-paper with its mouldy paste is unsanitary, and stops wall respiration. The Doctor says, "Walls to be healthy must breathe."

CHURCH'S COLD WATER

ALABASTINE

is a porous cement and admits of the free passage of air. It is permanent, and sanitarians endorse the use of it. Anyone can do plain tinting, and with the aid of instructions we give, and designs we furnish, an ordinary workman can do very nice decorating. Cheaper than paint or paper. ALABASTINE is for sale by all Hardware and Paint Dealers—in packages only. For book of tints and further particulars, write mentioning this paper to

NEW YORK FASHION LETTER

New York, May 14—With the approach of the summer season the question concerning colors that will be most fashionable becomes more buring and important. The manufacturers of textiles are fully aware of the fact that novelties are always in demand and they never let an opportunity escape them to spring some new, and if possible, extraordinary shades and colors upon the market. Many of these new shades enjoy a transitory glory for part of the season or at the best one whole season and then disappear never to return. It is a peculiar thing about new colors, some of them become popular in a single week and hold their popularity well for several seasons, while others, perhaps more beautiful, and at first equally popular, do not last the season. It would be an interesting task to study that problem and determine the reason which makes one color popular but not another. The investigation would probably lead the student of the problem deep into the mysteries of science. Every season has its novelty colors and shades, but only ultra fashionable women worry about the latest novelties in couleurs de mode. The others, and they are in the very overwhelming majority may select one of the other of the new fashion colors, if they suit them, but if not they content themselves with wearing some of the old colors, just then at the height of their popularity.

The test for the coming season has been made in Paris and in the opinion of experts it has resulted in a victory for the old colors which were fashionable last year. There are but three important new shades, lavender blue, Parisfal blue and capuchin red. All three are worn to a limited extent by the ultra fashionable women of Paris, but they have aroused but little enthusiasm and it is not expected that they will become more popular here than they are on the other side of the ocean. These new shades have several drawbacks which no sensible woman of fashion can afford to overlook. In the first place these shades do not become every woman, and a woman might better be out of the fashion than wear a fashionable color that does not become her style of beauty. Another objection, at least in the eyes of the more conservative woman is, that these shades are too conspicuous and attract more attention than is desirable. A third objection is that these new shades are so "difficile" that they do not go well with other colors. If a woman, therefore, wishes to wear a gown of one of these new shades, she will be compelled to wear not only a hat but perhaps a parasol and gloves of the same color. The consistent carrying out of a uniform color scheme is always an awkward thing and connected with great expense. Of course, there are a few women who do not have to consider the point of cost, but most women, even among the members of fashionable society, do consider that point more or less.

Speaking of the capricious notions of fashion a writer in La Nouvelle Mode calls attention to an interesting novelty. "Fashions latest freak," says the writer, "is the use of coarse guipure laces, hitherto reserved for furniture decorations, for the purpose of making the most fascinating blouses imaginable. Last year this coarse filet was seen as a trimming, now mounted on mousseline de soie, it fashions an entire bodice, sometimes jointed or eked out with a tiny fronconne of mousseline to hide the seams. These blouses are worn over very tight fitting bodices of white taffetas. The filet, though course, looks quite charming in this guise. From the lace sleeves emerge full bouffants of mousseline, with narrow, flat tucks going around them. It is a useful blouse to take when traveling, being substantial, uncrushable and very cool, especially when worn over a decollete corsage. The belt should be the same depth all around and cut quite on the bias and should be plaited into a buckle in front.

Picturesqueness seems to be the keynote of new fashions, particularly in hats and coats. There are more peculiar and original shapes of hats to be seen in the shops at present than ever before, but they all have one feature in common; they are invariably picturespue and, for that reason, unusually attractive. The picturesqueness of the hats does not altogether depend upon oddness of shape, as it seemed to be the rule during the past few seasons. The shapes are most graceful and materials used for them as well as for the trimmings and the combinations of colors add to a great extent to the beauty and charm of the general effect.

The new straws, or at least many of them, show delicate tints and combinations of tints, unsual and yet harmonizing. Strange to say even colors heretofore considered incompatibles, are used together with pleasing effect. There are quite a number of new shades of green, among them novelties in moss, sage, tea and new leaf greens. There is also a great variety in browns, purples and pinks. The blues are in a class by themselves and show a greater variety than ever. The materials used are in most cases very delicate of structure, suggesting lace effects, many of the hats being trimmed with the lightest and daintiest chiffons and other delicate materials and look extremely dainty and fragile.

Stout women will find it worth their while to investigate the merits of a new suggestion that has come over from Paris. The plan is, to wear belts of the same color as their skirts and waists, instead of one strongly contrasting in color. The idea is, that by effacing the waist line of demarcation they apparently lengthen their waists. The plan seems to be logical and is well worth a trial.

The waistcoat has received more attention recently and promises to be quite popular this season. In some of the costumes recenaly imported the waistcoat is used to produce a contrasty effect by the brightness of its color. These bright waists are used with skirts of rather sombre color and do not become visible until the front of the bolero is thrown back. The waistcoats are not always real waistcoats but are sometimes only simulated, being attached to the coat. The simulated waistcoats are in some cases only an edge or border, usually of bright color, extending below the edge of the coat. In other cases the border is set a considerable distance in, so as to produce the effect of a real waistcoat.

There is a variety of materials which is used for these waistcoats. They are made of cloth, silk, satin and even coarse linens, in combination with silk or wool. Plain waistcoats of pique or of the new French duck which has a fine cord but is heavier and softer than pique, are also shown in some of the recently exhibited models.

The driving and automobiling season has fairly begun and some new and quite fascinating styles in driving and automobiling coats are seen on the fashionable avenues. One of the striking features in auto coats is the extensive use of leather. Some short coats are made entirely of leather, while in other coats all the seams, pockets and cuffs are bound or piqued with leather of a bright color. Leather is also used for belts, straps and buckles and in many cases adds a great deal to the chic appearance of the arrangement.

Unless a woman intends to make a special feature of automobiling and devote herself to it exclusively for the greater part of the season, she does not need a very extensive outfit, but certain things she must have. She must by all means have an appropriate coat and suitable headgear. It will be well to provide for one light and one heavier coat, as automobiling on cool evenings makes protection from the cold draft highly desirable. Light weight waterproof materials are used to great advantage, as they give protection both against cold and rain.

After all it seems that white will not be worn as much this season as was expected. That does not mean that it has gone out of style, but merely that it has been somewhat overdone last season and a reaction in favor of colors has set in. The change will probably be gradual and one and delicate tints will open the way for more brilliant colors in the future.

ESTELLE CLAIRMONT

LARGE PRODUCER OF LEAD

Idaho is the largest producer of lead ores of any state or territory in the United States. In 1903 there were mined in Idaho and mainly from the great Coeur d'Alene district, a total of 887,000 short tons of lead ore, with a value exceeding $8,250,000. Utah was second in lead production, having from lead ores 57,000 short tons and Colorado is third with about 51,000 tons of refined lead. The non argentiferous districts, including Missouri, Kansas, Wisconsin, Illinois, and Iowa, produced 77,000 tons of metallic lead from galena ores during 1903.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory,

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end of the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products of the location.

Placer Mining.—Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 feet square; entry fee, $5, renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miners for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, $100 per mile for first year and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a mining recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, $10. Royalty at the rate of two and one-half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Department of the Interior, Ottawa, February, 1904.

OFFICE UPSTAIRS, CLEMENT BLOCK, BAKER STREET, NELSON, B. C.

SEEKING FOR POINTERS

MANY OLD COUNTRY MAYORS ARE COMING TO AMERICA.

COMING TO SEE HOW THE CITIES HERE ARE RUN.

London, May 14.—The steamship St. Louis which sailed from Southampton today, carries an imposing delegation of English ,Scotch and Irish mayors, exmayor and chairmen of borough councils, and other varieties of city fathers, who are going to see how some of the municipal American cities are governed and to pick up points for the possible improvement of municipal government in Great Britain. Incidentally they are visiting their wives and daughters along with see the St. Louis exposition and to have a good time generally.

The visit is the outcome of an interview lord Lyvedon had last year with the mayor of Philadelphia, the commissioners of the district of Columbia and the governor of Missouri. They assured his lordship that an organized municipal city would be welcomed heartily to the United States, and pointed out that such a visit would materially promote the friendly interests of England and America. There are about 200 members in the party. Prominent among them, in addition to lord Lyvedon, who heads the party, are sir Thomas H. Brooke Hitchcock, ex-sheriff of London; sir Thomas D. Gisle, bart. ex-mayor of Dublin, and sir Alfred D. Newton, bart., ex mayor of London.

The party will stop at New York, Philadelphia and Washington en route to St. Louis. After a week spent at the exposition the itinerary will be resumed and the return to New York will be made by way of Canada so that the "city fathers" may inspect the methods of government of some of the larger cities of the dominion.

LIFE-SAVING SERVICE.

Citizens at the Coast Interested in Forming One.

[Special to The Daily News.]

Victoria, May 14.—H. D. Helmcken, K. C., Jas. A. Douglas and E. Pierson were granted an interview with premier McBride and the members of his government, when they sketched in outline the program and intentions of the lifeboat and life saving association organization, which has been decided on here since the calamitous disaster to the Clallam. It is not intended to make the scope of this association merely local—indeed its chief usefulness is to be along the west coast of Vancouver island, that graveyard of Pacific shipping. For Victoria and vicinity it is hoped to have a suitable lifeboat added to the equipment of the new federal government steamer attached to the William Head quarantine station. For the west coast work there are planned a number of stations, each with steam or other power lifeboats, and the most modern wrecking and salving appliances. The delegation was not very specific as to the aid desired from the government at the present juncture. It will probably have to come in the form of a grant included in the estimates to be voted by the legislature at its next session.

CHURCH SERVICES

Anglican—St. Saviour's church, corner of Ward and Silica streets. Sunday after Ascension. Holy communion 8 a. m.; Matins and holy communion, 11 a.m.; Sunday school, 2:30 p.m.; evensong, 7:30 p.m. Rev. F. H. Graham, rector.

Methodist—Regular morning and evening services at 11 and 7:30; Sunday school at 2:30 p.m.; prayer meeting, Thursday, 8 p.m. Strangers welcome. Rev. W. W. Baer, pastor. Today Rev. R. J. McIntyre of Sandon will preach morning and evening.

Catholic—Church of Mary Immaculate, corner of Ward and Mill streets. Low mass at 8 a.m.; high mass at 10:30 a.m.; evening service, 7:30 p.m. Rev. Father Althoff, priest.

KEEP FINDING THE GOLD

GROUND STAKED FROM EAGLE CITY TO THE BOUNDARY LINE

MILES OF PLACER GROUND THAT MAY YIELD MANY FORTUNES.

[Special to The Daily News.]

Victoria, May 14.—Advices from the north contain the interesting information that the strike made recently opposite Eagle City caused a stmpede that ended in all the ground on the right limit of the Yukon being staked clear to the boundary. In fact quite a number who held free miners' certificates were unable to stake on the Canadian side of the line. When the news of the prospects on the bar opposite Eagle was spread in town, there were many who laughed long and loud at the idea of such riches being so near at hand, and (to them) in so unlikely a place. But "gold is where one finds it," and each returning prospector had such good reports of the panning done, that the entire town and garrison as well turned out to become mine owners. A barbed wire fence might easily be strung now for more than ten miles along the shore, the stakes being sufficiently close together for that extravagant distance. Good prospects have been obtained along the entire shore of the river to the boundary line.

From Dawson the word comes that the big hydraulic plant put in at enormous cost sime years ago by Cecil Cole on Last Chance, to elevate water to Treasure Hill, will once more be started up. After remaining idle for two years, the ground has been taken up by Albert Trabold on a lay which also includes the use of the pumping plant. It is known that some of the richest ground in all the Klondike is found on Treasure Hill, which is now the property of the Treasure Hill Mining company.

MADE GOOD SCORES.

Result of the Shoot of the Nelson Gun Club Yesterday.

The Nelson Gun club had a very pleasant day at the traps yesterday. Only six members turned out, but the shooting was very good. The first to come off was the regular weekly button event, at 25 birds. The scores were:

C. D. Goepel (gold)	22
Peter Nelson (silver)	18
Geo. Tierney (bronze)	17
J. Irwin	14
C. D. Blackwood	12
Nels Nelson	11
Second Event—10 Birds—	
C. D. Goepel	9
Nelson	9
Irwin	8
Nels Nelson	5
Tierney	4
Third Event—	
Goepel	6
Nelson	6
Blackwood	4
Tierney	2

The shooters are practicing for the tournament which is to take place at Kaslo on May 24th on the occasion of the celebration there. Some good prizes have been put up, and, as clay pigeon breakers from several localities have promised to compete, the competition will be keen.

KEEPING EVERLASTINGLY AT IT will bring success. Courage and endurance are helped along by a plug of Pay Roll chewing tobacco, which is good to the last and a good laster. All stores sell "Pay Roll," and the tags are valuable for premiums.

MUSIC LESSONS

HAS YOUR LOVE of Music died out because you cannot play the Piano as you used to do? Six lessons in McDonald Smith's system of Touch and Technique will more than restore your powers without any hard practice at the keyboard, and this, should your age be 16 or 60. Or, is your playing going off from lack of time to practice? A few lessons in the system will improve your playing to a degree you would hardly credit, though you should touch no keyboard for weeks. Complete course, $10. F. J. Painton, Corner Hall and Silica.

NELSON'S NEWS OF THE DAY

W. Thomlinson of New Denver, is at the Hume.

Henry Lye, insurance adjuster, Vancouver is at the Strathcona.

Alexander Sharp, M.E., and Mrs. Sharp of Rossland are at the Strathcona.

The provincial government have proclaimed Monday, May 23rd a public holiday in B. C.

J. P. Cosgro, master mechanic at the War Eagle-Centre Star mines, is at the Strathcona.

C. W. McAnn, K. C., Kaslo, who will take the Crown business at the assizes, this week is registered at the Hume.

Manager Watson of the bank of Toronto, Rossland, and Mrs. Watson are visiting Mr. and Mrs. Fred Starkey in this city.

A. V. Mason, manager of the Nelson Tramway company leaves this morning for Ottawa, he will be away for three weeks.

The Nelson band will give a benefit dance in Fraternity hall on next Friday evening, May 20th. An orchestra of 15 pieces will be in attendance.

James H. Young, police commissioner, and Dominion Express Co., agent at Rossland is at the Strathcona for a short visit. Mr. Young will return to Rossland this evening.

McDermid and McHardy have added to their ore cabinet a particularly fine specimen of silver ore from the Elkhorn mine situate almost in the city limits of Greenwood.

The Busch cushion, for which all the tickets have been sold, will be raffled at the Queen's cigar store on Wednesday evening at 7 o'clock. Ticket holders are requested to attend.

About $100 was realized by the dance in the drill hall on Friday evening in aid of the library fund. Those who kindly lent dishes, glass, etc., can obtain them at the drill hall any time tomorrow.

R. W. Drew, chief clerk in the office of H. E. Macdonell, and family will leave shortly for Montreal. Mr. Drew will remain away for three weeks, while Mrs. Drew and children will stay for the summer.

Mr. Ritchie of Victoria will give his famous lecture entitled "Beautiful Canada," with lime light views on Friday evening, May 20th at the Salvation Army barracks on Victoria street.

Since advertising to close their school in October, the Nelson business college reports quite a number of young men and women as taking advantage of this passing chance to procure a business education.

Manager Parrish of the Le Roi mine has returned to Rossland greatly improved in health. Mr. Parrish goes to Spokane shortly and is then expected to return to Rossland permanently.

A. H. Buchanan, manager of the bank of Montreal here, left for Spokane yesterday morning to relieve manager Finucane, who is going east to be married. Mr. Buchanan will remain in Spokane for the next three or four months.

The local officers of the Northwest Coal and Coke company are in receipt of a cablegram from Mr. Ernst, the president of the company, who is in London, in which he requests that some of the directors meet him in Ottawa shortly in order to close up the arrangements for the starting of operations on the coal holdings of the company in Alberta. The cablegram was read at a meeting of the stockholders held in this city early in the week and gave general satisfaction. Some of the directors will meet Mr. Ernst in Ottawa as he directs.

The Rev. P. H. McEwan, superintendent of Baptist missions in British Columbia, will conduct both services in the Nelson Baptist church tomorrow. Mr. McEwen's home is in New Westminster, but he is on a tour through the interior visiting the various churches.

The smoke which covers the valley from Procter to Robson is caused by the farmers who are burning the rubbish from the many clearings that are being made for the planting of orchards and gardens on the farms that extend along the valley on both sides of the arm of the lake and the river. Some of the clearings are extensive. The acreage planted this year will be large.

George Hodge has a nice walk in front of his residence that he is very proud of and which it is his daily custom to clear of stones and lumps. Each evening he performs this task and of late he has found numerous stones, large and small, and he had begun to think that they were placed there by design rather than accident. Davey Woods, who cleans the streets, makes occasional visits to the front of Mr. Hodge's house and when he finds stones in the roadway he throws them to the right or to the left, and as a result many landed on the Hodge walk. A day or two since Mr. Hodge caught Mr. Woods in the very act of throwing a rock on his walk, and shouted to him, in not the most gentle tones, to look out and see what he was doing. For a while the air was pretty warm, but when Mr. Woods understood the situation he agreed to throw no more stones on the Hodge boulevard. He explained that they were placed there inadvertently, and not with malice and aforethought.

LUMBER CO. INCORPORATED

[Special to The Daily News.]

Ottawa, May 14—William Irwin, contractor of Peterborough; George McCormick, M. P., lumber manufacturer, Orillia; George Fowler, M. P., barrister at law, Sussex, N. B.; hon. Elliot Grassette Stevenson, Detroit, Mich.; lieutenant-colonel John Irvine Davidson, wholesale merchant, Toronto; John Alexander McGillivray, Uxbridge, and hon George Foster, have incorporated the Kamloops Lumber Co. with chief place of business at Toronto.

SUCCESSFUL ARBITRATION

New York May 14—Arbitration has settled the wage scale of 7,000 union painters here and the agreement has been signed. It grants an increase of 50 cents a day, making the scale $4 and $4.25 for plain and decorative work respectively.

WILL APPEAR MONDAY

Few traveling attractions carry such a thorough scenic equipment as "A Thorough bred Tramp." Everything used in the play is carried, including a very realistic street scene in the city of Ouray, Colorado, a baggage room, two moving trains a mountain canyon and a cave in the Rockies. The play itself is one of the strongest in this class of drama, the tramp part without doubt being the cleverest ever written, and while the comedy element predominates there is enough of the dramatic to more than satisfy theatre goers whose tastes lean to the stronger drama. It will be given in the Nelson opera house on Monday evening.

Professor Hepburn will give an assembly on Monday evening at the usual hour.

Do not pass J. H. Wallace's window without noting the prices of boy's clothing and footwear.

IT IS WITHOUT FORTS.

Lord Dundonald Recommends Fortifications for Vancouver

[Special to The Daily News.]

Ottawa, May 14—It is understood that lord Dundonald, officer commanding Canadian militia, has recommended fortifications at Vancouver harbor. At present there are no fortifications of any kind there, and if a hostile ship entered the harbor there is nothing to cope with it. What is suggested is nothing very elaborate or expensive.

Arrangements for the fortification of Partridge island, at St. John, N. B., are completed. Guns have been ordered from London, England, and will be delivered This season. They will be large enough to meet the attack of any ship.

The Lion Brand in boy's clothing are the best fitters made. J. H. Wallace has them.

Hazelwood Ice Cream at J. A. McDonald's Baker St.

We buy for spot cash and take our discount.
Why? Because we have to.
We sell at close prices.
Why? Because we need the money.
We hope you will not all come at once.
Why? Because we are short in some lines for ten days. Still if you need anything in the better lines we can suit you.

WE HAVE JUST RECEIVED

A Carload of Potatoes

Fresh from the pit which will assure our customers of first class spuds until the new ones come in. These are positively the best potatoes in town. Try them.

We are receiving daily shipments of green vegetables direct from the growers.

We have also received today another consignment of Australian Creamery Butter in 56s and 1 lb. bricks, which we think is even better than the last shipment. If you like good butter this is your opportunity.

J. A. Kirkpatrick & Co., Ltd

Base Ball and Lacrosse Goods

We have the largest stock of baseball and lacrosse supplies ever brought into the Kootenays. For baseball, we have mitts, gloves, balls, bats, masks. For lacrosse McBrearty, Kervin, Lally's and Victor Sticks, regulation balls, nets, etc. Goods the best, prices the lowest.
