ULTIMATUM TO TURKEY

Powers Will Enforce the Promised Reforms in Macedonia

Joint Naval Demonstration Agreed Upon but Delayed Owing to New Suggestion by Lord Lansdowne

London, Nov. 11.—Final arrangements for a combined naval demonstration against Turkey have been delayed pending the receipt of replies from the powers to a suggestion from lord Lansdowne, the British foreign secretary, that the demands be extended to include not only financial but judicial control over Macedonia by the European powers, and the extension of reforms to the vilayet of Adrianople, which, though disturbed like Macedonia, was not included in the present Austro-Russian reform scheme.

In making this proposition, lord Lansdowne hopes to obviate the necessity of again resorting to a joint naval demonstration and by one coup to permanently settle the Balkan question. To this latest proposal, it is stated, that Italy and France probably will agree readily, but there is little hope of Austria, Russia, and Germany concurring therein.

At the foreign office it was said to the Associated Press today that the refusal of any power to agree to this new proposition will make no difference in the attitude of Great Britain, which country in any event, will join in the proposed demonstration against Turkey.

The next step, it was said, will be an ultimatum in which it will be stated that in the event of a refusal by the Porte to accede to the demands of the powers a demonstration will begin immediately. The Associated Press was informed that the command of the combined fleet would fall upon Austria, Russia being in no position at the present time to assume command as she would be unable to participate in the seizure of a Mediterranean port without passing the Dardanelles, which would be contrary to the treaty of Berlin under which the allies will operate.

Paris, Nov. 11.—A Russian warship now off the island of Crete and another at Pireaus, Greece, have been assigned to participate with the French ships selected, but which have not yet started, in the naval demonstration against Turkey as a result of the Porte's refusal to agree to the financial reforms determined upon by the powers for Macedonia. An Austrian admiral probably will assume command of the international squadron, but this depends upon the rank of the officer Great Britain assigns to the command of her warships.

Germany, while not opposing the principle of the demonstration ,says she has no available warships in the Mediterranean. This is considered to be a diplomatic move to retain German prestige in Turkey. The demonstration will not take the form of closing the strait of the Dandanelles as reported, since this would interfere with neutral commerce. The actual form yill be determined upon by the admirals, but it is considered likely that the international squadron will occupy a Turkish port or an island and withhold the customs until the sultain accedes to the financial reforms. The demonstration is not expected to have serious consequences, such as disrupting the political relations of the powers with Turkey, as it is chiefly designed to give the sultan grounds with the Mussulman element for yielding to the demands of the Christian powers.

WAR ON TAMMANY.

Hearst Will Place Ticket in Feld in King's County—Mayoralty Contest

New York, Nov. 11.—Congressman William R. Hearst will follow up his fight against Tammany Hall by placing a full county ticket in the field in this and King's county next fall.

According to the Tribune today W. R. Hearst will, if his contest for the mayoralty is prolonged in the courts beyond the first of next year, take the oath of office as mayor, announce his appointments and demand possession of the mayor's office in the city hall.

As mayor McClellan has decided to fight his adversary at every point, the contest is likely to be prolonged and this city may have no government on New Year's day.

PHOENIX MAIL SERVICE

Improvement to Be Effected Along Lines Requested at Once.

(Special to The Daily News)

Phoenix, Nov. 11.—Information has been received here that, in response to the repeated requests of the business men of Phoenix, seconded by Duncan Ross, M.P., of Greenwood, the post-office department has at last decided to inaugurate the carrying of mails on the Great Northern, or V., V. & E. railway as that branch is known, between Grand Forks and Phoenix, thus saving to the businessmen of this community an entire day in the transmission of mail matter between United States points and Phoenix and vice versa. As soon as the department can secure tenders for the work of carrying the mail also to Greenwood, that city will be served in the same way as regards communication by mail with American points. Mr. Ross states that it may take three weeks or a month to put the new service into effect, but it has been decided to do it. It is now more than eight months since the Phoenix Board of Trade sent resolutions to Ottawa on his subject, and urged doing what is now to be done, for the greater convenience of the community in general.

FRENCH CABINET CRISIS

M. BERTEAUX REPLACED IN WAR OFFICE BY M. TROUILLOT

SHUFFLE OF PORTFOLIOS TIDES OVER FRIDAY'S TROUBLES

Paris, Nov. 11.—After a cabinet council which was held tonight to consider the situation created by the resignation on Friday of minister of war Berteaux, it was announced that the following rearrangement of premier Rouvier's cabinet had been made:

Minister of the interior M. Etienne to be minister of war, minister of marine Thomson to be minister of interior, minister of commerce Dubief to be minister of marine. M. Trouillot, former minister of commerce in premier Combes' cabinet, to be made minister of commerce.

At a morning session of the cabinet M .Etienne, yielding to the united request of premier Rouvier and his colleagues, accepted in principle the ministry of war, and the portfolio of minister of the interior was tendered to deputy Sarrien. It was thought that M. Sarrien's influence with the radicals and socialists would add considerable strenth to the cabinet, but when the ministers reassembled tonight premier Rouvier announced that deputy Sarrien had declined the tender. M. Trouillot was then offered the portfolio of commerce which he accepted.

This combination, however, is not a definite one, and the council of ministers will reassemble tomorrow when a final rearrangement will be determined upon.

BUDGET OF OTTAWA NEWS

MR. JUSTICE MEREDITH PROMOTED TO COURT OF APPEALS.

KING'S BIRTHDAY HONORS GIVE RISE TO COMMENT.

(Special to The Daily News)

Ottawa, Nov. 11.—Mr. Justice Meredith has been promoted to the Ontario court of appeals. Mabee, K. C., may get Meredith's place.

The cabinet discussed yesterday the bill passed by the legislature of Quebec imposing a tax of $300 on commercial travellers from outside Canada. The opinion of the minister of justice is that the legislation is constitutional, but dangerously near the line which calls for disallowance. In that case there will be no interference with the bill as it is considered within the province's right to pass it.

A similar bill from British Columbia was discussed and the minister of justice took the same view in regard to it. The only ground upon which these bills could be disallowed is that of public policy, and the government is loath to interfere with what comes legally under the jurisdiction of the provinces.

British Columbia was asked some time ago to repeal its commercial tax and the hope is expressed that it will do so. The information from Quebec is to the effect that the legislature will repeal the bill at the next sitting of the legislature. The dominion government regards such laws as objectionable and believes they do the province no credit.

The Canadian Gazette says that application will be made to the railway commission for a recommendation to the governor general in council for sanction of an agreement, dated 19th day of April, 1905, between the Canadian Pacific Railway company, the British Columbia Electric Railway company, Ltd., Vancouver & Lulu Island Railway company, and lord Strathcona and Mount Royal and Richard B. Angus (as trustees) respecting the operation of the Vancouver & Lulu Island Railway company by the British Columbia Electric Railway company.

Supt .Constantine, who last spring started to cut a trail into the Yukon from Alberta, reports that the first usmmer's operation resulted in 94 miles being graded, cleared, bridged and corduroyed from St. Johns. Next summer will see the greater portion of this overland trail made and the following summer there will be a good pack trail connection between Edmonton and Dawson through the mountains. It is expected a railroad will replace this trail within a few years.

The mounted police party will leave Dawson about December 15 to carry mails to the detachments at Fort McPherson and Herschell island at the mouth of the Mackenzie river. The United States government has been notified that it can communicate with the fleet of whalers frozen in there.

Collingwood Schreiber, who has returned from the west, says that the G. T. P. between Touchwood Hills and Edmonton will not interfere with any other existing railways. He would have gone to Fort Simpson but could not get a steamer.

There is some comment in government circles over the absence of certain names in the recent list of Canadians who have received honors from the king. Were the theory correct that these honors came direct from his majesty, without recommendation or solicitation, no one would have a right to comment or complain, but the government of the day of Canada has always been held responsible for the list. That being the cast there has been considerable talk as to why the chief justice of Ontario, Hon. Chas. Moss, has been refused knighthood. His name was said to have been brought before the government in the usual way. Then there is the chief justice of the supreme court of Quebec, who also has been ignored. Next to the chief justice of Canada comes the chief justice of Ontario. The position is nowadays supposed to carry with it knighthood, and reasons are being canvassed as to why chief justice Moss did not get the honor. It may be that he has declined it as other men prominent in the legal profession as well as in the political arena in Canada have already done. This, however, is denied.

ROSSLAND'S ORE OUTPUT

THIS YEAR'S RECORD WILL NOT BE FAR SHORT OF 1904

LE ROI NO. 2 STOCK ON THE UPWARD TURN.

Rossland, Nov. 11.—The ore shipments for the season to date have reached a total of 287,963 tons, and the outlook is that they will be about 300,000 tons by the end of the present month. If the same ratio of production is kept up for December as prevailed during the balance of the year the aggregate output for the year will be about 327,000 tons. This will be only a little short of what it was last year, when the tonnage reached 342,325 tons.

According to the London Financial Times, of October 26th, Le Roi No. 2 shares are advancing, and on that date they were quoted at £1 10s asked, which is a higher price than Le Roi shares commanded. The Le Roi No. 2 is generally in a very good shape, and a rich shoot of ore of considerable magnitude has been uncovered in the workings. Besides this the work of extending the crosscut from the 1350 foot level of the Le Roi into the Josie ground has made about 50 feet since the work was inaugurated on November 2. It is anticipated by mining men that the extension of this crosscut will lead to the development of some extensive ore bodies of a high grade.

Since the Le Roi ore began to be sent to the Trail smelter the Great Northern have raised the switching charges from $2.50 to $5.00 per car. The charge is considered exorbitant by the Canadian Pacific railway company and some time since the matter was brought to the attention of the Canadian railway commission. That body is now looking into the matter and the outlook is that the charge will be reduced. The commission recently wrote to H. P. Brown, the local agent of the Great Northern, asking for his reasons for charging the $5.00 rate.

The shipments for the week were:

Le Roi	1,890
Centre Star	1,620
War Eagle	1,350
Le Roi No. 2	240
Jumbo	300
Total for week	5,400
Total for year to date	287,953 tons.

BOUNDARY ORE SHIPMENTS

(Special to The Daily News)

Phoenix, Nov. 11.—Boundary ore shipments for the last week were:

Granby mines to Granby smelter	13,433
Mother Lode to B. C. Copper	5,568
Brooklyn-Stemwinder to Dominion Copper Co. smelter	330
Rawhide to Dominion smelter	300
Emma to Nelson smelter	260
Skylark to Granby smelter	20
Last Chance to Trail smelter	20
Total for week	19,931
Total for year to date	771,997 tons.

Boundary smelters treated as follows this week:

Granby smelter	14,262
B. C. Copper smelter	3,700
Total for week	17,962
Total for year,	788,293.

HAMBURG LINER AGROUND

New York, Nov. 11.—The Hamburg steamer Graff Waldersee while leaving the harbor for Hamburg ran aground on the flats off Red Rock today. Efforts to float the big liner were unavailing tonight and another attempt will be made at high water tomorrow. The agent of the Hamburg-American line said tonight that the cause of the steamer's grounding was the fact that a tug with three barges crossed the liner's bows in the channel and to avoid a collision the ship was forced into the flats.

A LA CHARLOTTE CORDAY

Moghiloff, Central Russia, Nov. 11.—The wife of municipal councillor Gzersky, today, under the name of baroness Merendorf, obtained entrance to a reception given by governor Klingenberg, and fired two shots from a revolver at the governor, wounding him in the abdomen and arm.

NO OUTBREAK LAST NIGHT

Fears of Fresh Massacre of Jews Proved to be Unfounded

All Was Quiet in St. Petersburg and Moscow--Appeal Through Churches for Cessation of Strife

St. Petersburg, Nov. 12.—(3.20 a.m.)—The groundless nature of the rumors that a Saint Bartholomew massacre was to take place last night was demonstrated when the hours passed without the slightest development of mob spirit. The only sign of any thing out of the ordinary was that the Jewish stores shuttered up earlier than usual in several streets and localities in which rumor assigned as the scenes for looting and Jew baiting. Students in uniform avoided these quarters and the frequent military patrols indicated that the authorities realized the necessity of preventing any outbreak in the capital. Prince Ivon, the Moscow Zemstvoist, and one of the leaders of the constitutional democratic association, has issued a reassuring announcement, declaring that the rumors of organized "Black Hundreds" were almost entirely myths.

In an effort to pacify the country and to terminate the fraticidal strife count Witte has enlisted the aid of the church and an encylical will be read in all the churches of the empire in place of the usual Sunday sermons. It reminds Russians that wrath and hatred will change the nature of men and make them, like wild beasts, forget the laws of humanity and commit crimes, causing eternal remorse.

"Thus Cain killed his brother Abel," the encylical says, "and went through life groaning under the burden of a great sin. Russian brothers, let us remember what punish at our Lord visits upon fraticides. Let us think upon the teachings of the Lord upon the cross. Let us rember we are brothers and sons of one great mother church and one common Russia, called to work together for the common welfare. Let not the blood of our brothers cry aloud to heaven for vengeance."

The law giving freedom to the press which will remain inoperative until the douma meets, has been completed and will be promulgated early next week. It sweeps away all the old restrictions, leaving newspaper editors and proprietors subject only to laws against lese majeste, inciting insurrection, libel, etc. Papers can still be confiscated under the new law, but the censor must immediately place his reasons for so doing in the hands of the public prosecutor, who may summon the proprietor and editor before a legal tribunal for trial.

A special to the Russ from Odessa, published this afternoon, says that the reports that it was contemplated to massacre the Jews today created a great panic. A general exodus was only prevented by measures taken by governor general Kaulbars.

The despatch describes the atrocities which occurred at Odessa more horrible than the massacre of St. Bartholomew. Only the rich Jews who were able to buy off the police, escaped the horrors of last week.

Odessa, Nov. 11.—The prisoners in the jail at Kishineff revolted in a body last night and demanded their freedom. On their request being refused the prisoners set fire to the jail. Troops were hurried to the scene and fired a volley into the mutineers, two being killed and many wounded.

AN APPEAL TO THE EMPIRE

London, Nov. 11—Queen Alexandra has contributed $10,000 and has initiated a movement for the relief of the unemployed in England.

Her majesty says: "I appeal to the people of the empire, men and women, to assist in alleviating the suffering of the poor and unemployed during the winter. For this purpose I head the list with $10,000. All contributions should be sent to earl De Grey. (Signed) Alexandra."

IN ANTHRACITE REGION.

Miners Will Only Renew Agreement After April 1st Upon Specific Terms

Shamokin, Pa., Nov. 11.—A canvas of the Lackwanna, Schuylkill, and the Lehigh coal districts shows that the miners, through their delegates to the United Mine Workers convention, will refuse to be bound after April 1st next by a renewal of the award of the anthracite commission, appointed by president Roosevelt, unless the operators in addition agree to the union becoming a signatory party.

A committee representing union miners will be instructed to wait upon the operators and request a conference. They will explain to the operators that the conference is asked for that a mutual agreement maw be reached as to the terms of employment after April 1st. The convention will take a stand for an eight hour working day, uniform pay for all classes of employees not rated as miners and specific terms of employment, but these will be held subject to a joint discussion.

STEMWINDER SHIPMENT

THREE HUNDRED TONS SENT OUT ON FRIDAY

INCREASED ACTIVITY AT DOMINION COPPER CO.'S MINES

(Special to The Daily News)

Phoenix, Nov. 11—Increased activity at the various mines of the Dominion Copper company is now noted in this section, the force of men being employed being gradually augmented. Shipments of ore have been made from the company's Brooklyn, Rawhide, and Stemwinder mines, the 300 tons going out yesterday from the latter being the first ore that has been shipped direct from the property itself. That sent out last winter was mined years ago and was from the dump.

The new compressor for the Rawhide has been shipped by the manufacturers, and a force of men was sent today to the Sunset mine, also owned by the same company, to open up that property, it being located in Deadwood camp and adjoining the well known Mother Lode mine.

It is said that more activity will shortly prevail at the Oro Denoro mine in Summit camp, which has been operated only partially of late. R. H. Anderson, formerly in charge of the Le Roi and B. C. mines, as foreman, will have charge of the Oro Denoro. The lower ore quarry is to be opened up, and ore shipments will be made over the Great Northern, which crosses the property just below the line of the C.P.R. So far this year the Oro Denoro has sent out not quite 300 tons of ore to the Granby smelter over the C.P.R.

Yesterday was the monthly pay day in this camp, when approximately the sum of $50,000 was paid out in wages by the Dominion Copper company and the Granby Consolidated.

ALUMINUM WIRE ARRIVES.

Material for Power Transmission Line Received From Manufacturers.

Preparations for the completion, equipment and operation of the city's power plant are proceeding steadily and quietly in spite of the uncertain process of the law, and the dangers of delay that still threaten.

The aluminum wire for the power transmission line arrived in Nelson yesterday. A. L. McCulloch ,city engineer, cut off a couple of feet of the wire as a sample and took it to his office in the city hall. The cable, formed of seven strands, is about half an inch thick but very light.

L. A .Campbell, manager of the West Kootenay Power & Light company, has shown a friendly, almost paternal interest in the success of the city's undertaking . He is apprehensive now that aluminum is unsuitable for the purpose of conveying power. He has lately assured several members of the council that the material will not bear the strain of a span of 100 feet.

The city engineer, on the other hand, has received from the manufacturing company a table of deflections for spans of from 500 up to 2000 feet. For shorter distances ,their pamphlet states ,the deflection is insignificant. The pamphlet is accompanied by copies of signed statements by managers of power plants in California and elsewhere, where aluminum is used for long power lines. All testify that their lines are satisfactory and that the aluminum wires have successfully borne the strain of long spans, many of them of more than 1000 feet.

Excellent progress is being made on the clearing of the right of way and preparation for erecting the pole line.

NEW ENGINEER FOR V., V. & E.

Alex. Stewart of Seattle May Be Given Charge of New Work in West.

Seattle, Nov. 11.—Alexander Stewart, resident engineer of the Great Northern may be given jurisdiction over the western half of the Great Northern's line and entrusted with much of the new work in the west that the Great Northern either has under way or in contemplation. If the change is made Mr. Stewart will have charge of the construction of the Victoria, Vancouver & Eastern. That work has necessitated a visit to the coast at least once a month on the part of chief engineer Hogeland, and as the Great Northern is putting the road through to beat the Canadian Pacific into the rich new country, the constant attention of a high engineering authority is deemed necessary. Mr. Stewart is the most available man in the Great Northern service and is particularly well qualified for the work.

CALGARY IN DOUBT.

Calgary, Alberta, Nov. 11.—Until the recount it will be impossible to say definitely whether Cushing or Bennett was elected in this city. The vote stands at present as follows:

Cushing, 906, Bennett 875, and Macdonald 343, and between 300 and 350 contested ballots.

The liberals claim that of the contested ballots a large majority belong to their man; on the other hand the conservatives claim a similar state of affairs.

The scrutiny will be held on Tuesday next and until that is completed neither Cushing nor Bennett can feel sure of election.

RUSS AND JAP LOANS.

New York, Nov. 11.—A London cable says: 'Financial circles regard the Russian situation as hopelessly obscure. The new Rusian loan, for instance, cannot possibly be floated now before February. Today the banking delegates at the recent St. Petersburg conference returned to Paris where an immediate conference will be held with Rouvier.

"After this conference has fixed the date for the Russian loan, it will be decided whether Japan's conversion loan is to be floated now or in January. On this market, interest in the Japanese loan is assured, but as Paris wants to take £20,000,000, the date of issue in this case also depends on Rouvier.

"It is recognized as most important that Paris should take a large part of this loan, because Japan will then be able to remit the proceeds to Tokio with a minimum of disturbance at the monetary centres . It is probable that the English and American participation in this loan will be small, apart from conversion of existing bonds.

TO PROTECT THE BALLOT

MASS MEETING OF CITIZENS HELD IN NEW YORK

INVESTIGATION BRINGS TO LIGHT MANY ILLEGAL ACTS

New York, Nov. 11—Attorney general Mayer announced tonight that cases of illegal acts in the recent election had been reported to both his and superintendent Morgan's office in such a number that he had appointed Jay J. S. Jones of Brooklyn, and James Lehmoire of New York, as special deputy attorney generals to assist the regular staff in the investigation and prosecution of election cases reported.

It was learned that as a result of the investigation, evidence had been procured which would be taken to the grand jury next week. The investigation is understood to have resulted in revelations of the most sensational character, as to the ignorance and incompetency of the election inspectors. It is said to be the opinion of all the state officials that the irregularities that developed were not so much of fraud as of pure and simple ignorance.

Five thousand persons crowded Durland's riding academy tonight while hundreds more clamored in vain for admission to the meeting, held under the auspices of the Citizens' Protective league, to protest against the alleged illegal practices at the city elections last Tuesday.

Hamilton Hall presided, and among those who spoke were Bird S. Coler, J. G. Phelps Stokes, Rev. R. S. McArthur and Col. Ambrose C. Dunn.

Resolutions were presented in favor of ballot reform, embodying the principles of the Australian ballot, with the grouping of candidates separately under the offices for which they are nominated, instead of under party emblems; the passage of a corrupt practice act, in amendment of the primary elections law, and the appointment by the chairman of the meeting of a committee of 70 to aid in securing a fair count of the ballots cast last Tuesday and the punishment of all implicated in the frauds against the ballot.

An offer was made in Wall street to bet $10,000 against $50,000 that W. R. Hearst will be seated as the next mayor of New York.

Mr. Hearst has announced an additional reward of $10,000 for evidence for the arrest, conviction and imprisonment of the first Tammany district leader to be convicted of frauds against the ballot at Tuesday's election. This in addition to the other rewards, aggregating $17,000, for proof of crimes against the ballot and registration laws in the election. This makes the total of rewards he has offered $27,000.

RAILWAY NEEDS OF WEST

Comments of Wall Street Journal Upon E. H. Harriman's Prediction

New York, Nov. 11—The Wall street Journal remarks that a great deal of interest has been aroused by E. H. Harriman's statement that North America faces an era of competitive railroad building. Is he right?

Thousands of stockholders and bondholders of Union Pacific, Southern Pacific, Burlington, Great Northern, Northern Pacific, Missouri Pacific, Rock Island, Canadian Pacific want the question answered. There are as many opinions on the point as there are railways involved.

Canadian Pacic is pushing the Spokane & Northern into Spokane. Its credit stands behind the Soo line, which has already struck the Great Northern to the north of the twin cities. Ultimately the Soo line may attempt a western extension, but this is a contingency not yet a fact.

Great Northern is building into Victoria, B.C., and Portland, Ore. At the first point it strikes the Canadian Pacific; at the second the Harriman lines. Burlington is headed southwest. Whether it is now to be pushed or later is a question upon which Mr. Hill can afford to make epigrams. It is a matter of no importance.

It is not needed to mention the pushing of the Grand Trunk Pacific and the Canadian Northern across the prairies, where for 20 years the Canadian Pacific has reaped all fields and garnered all wealth and trade.

The Wall street Journal notes other points where the other lines come into conflict, and adds: "This is no brutal, unthinking war of conquest. It is based upon the fact that the west has outgrown its railways. New lines are needed. This is the basis of the facts in the case."

NEWSDEALER A "TRADESMAN"

Hamilton, Ontario, Man Fined for Selling Papers on Sunday

Hamilton, Nov. 11—The police magistrate has decided that Louis Birk comes under the class known as "tradesmen" and is, therefore, liable, under the Lord's Day act and must desist from selling newspapers on Sunday. He fined him $20 and costs. Henry Carscallen, who appeared for Birk, stated he would make an application for a writ of certiorari, and asked that no distress be made in the meantime.

The judgment was a lengthy one; the concluding paragraph is: "But to say that a person whose regular and ordinary vocation is such as I find defendant's to be, namely that of buying and selling magazines and newspapers on a comparatively large scale, is of the class or kind known as a tradesman, will not, I think, be contrary to what some men of ordinary sense and judgment would assent to, and in my opinion the defendant is a person ejusdem generis with "tradesman" and within the legal meaning and interpretation of the said statute."

NO MEETING TO BE HELD

Le Roi Directors Refuse to Comply With Shareholders Request.

London, Nov. 11.—The Le Roi Mining company, in a circular just issued, replying to the demand of ex-manager McMillan for a meeting of the shareholders, refuse to call any meeting here until the War Eagle and Centre Star companies hold theirs in Canada.

EARTHQUAKE IN UTAH

Salt Lake City, Nov. 11—A slight earthquake shock occurred at 3:26 p.m. today. No damage was done.

NO BOGUS REFORMS

Russian Social Democrats Dream of a Universal Socialist Utopia

Complete Overthrow of Present Regime Prelude to Establishment of a Democratic Republic

St. Petersburg, Nov. 11.—Perhaps the most interesting phase of the confused situation in Russia, caused by the sudden loosening of all the political forces, is the attitude of the social-democrats, who claim the honor for the overthrow of the despotism and are determined that they shall not be cheated of the fruits of victory by a bogus liberal leader, who took part in the real contest. Not only a democratic republic, but a universal socialist Utopia is their dream.

Their far reaching program, as announced in two newspapers, which have just been launched, the Novaski Shizn (New Life), and Nashala (The Beginning), in which their aims and views will be set forth, will repay careful consideration on the part of foreign students of the present political struggle in Russia.

The staffs of the papers are composed of 40 of the most brilliant writers in Russia, including Maxim Gorky and Kieff, author of "The Red Laugh."

Political visionaries these men may be, but they have embraced the doctrine of international socialism with their whole hearts and are bound to exercise great influence on Russian thought in the present chaotic conditions. They openly scorn the teachings of history, claiming that the world is entering on a new stage of social and political evolution. After the complete overthrow of the present regime in Russia, they propse to erect upon the ruins a new politico-social edifice which will form the nucleus of the future utopian system of international democracy. The next step will be the levelling of all social ranks. They already speak with contempt of their present allies as the bourgeoisie to whom the overthrow of absolutism was the final goal.

Gorky says: "For the proletariat the political revolution is only one stage on the road to social revolution. The bourgeoisie are content with half measures and half reforms. We unite with them for the purpose of securing guarantees of political freedom, but later we will demand guarantees from them and we will be entitled to them. All the former despotic governments of Europe were overthrown by the people under the leadership of the bourgeoisie. They resulted, however, in setting up constitutional monarchies, which are the paradises of the bourgeoisie, perhaps, but economic hells for the workingman. Russia is the only country owing its evolution to an organized army of workmen who were able to oppose the forces of the government with a weapon which has paralyzed the nation's heart. The greatest credit for the victory thus far achieved belongs to the noble minded body of students who years ago began to realize their historic measures."

REFUSES DIRECTORSHIP

A Dawson despatch says governor McInnes refuses to endorse the Alaska-Yukan exposition to be held in Seattle. Govenor McInnes says in his position as governor he cannot take such an important and responsible step as accepting a directorship because it was virtually committing the government on something of which he is not fully aware. He says that a promise was made him that a letter would be sent him setting out the full scope of the fair and its purposes and formally inviting the Yukon territory and him to take part, but this was not sent and he was thus left in the dark. He says after being fully informed, and Ottawa assents, he will be pleased to accept what position the fair is then willing to honor him with, but now it is unwise for him to accept.

WENTWORTH BYE-ELECTION

Hamilton, Nov. 11.—Although with the great majority premier Laurier has one would not expect the bye-election to be as keenly contested as at the general elections, the political pot in Wentworth is already bubbling in a manner that indicates the coming fight will be a hot one. The liberals have a splendid organization.

NO MORE CHEAP RATES

Ottawa, Nov. 11.—Civil servants travelling on government business will hereafter not secure reduced rates on railways. A circular issued by the deputy ministers orders that the full fare be paid and charged up. For civil servants going on vacation or on personal business the cheap rates will still be available.

DESTRUCTIVE EARTHQUAKE

Salonica, Nov. 11—An earthquake, having its centre in the peninsula of Athos, today destroyed the great church of the Russian monastery on Mount Athens. The damage was $125,000.

SMOKED FISH

RECEIVED DAILY
BY EXPRESS

Salmon, per lb . . 17½c

QUEEN ALEXANDRA'S APPEAL

We publish this morning a London cable announcing that queen Alexandra has initiated a movement for the relief of the unemployed in England and that she has made an appeal to the men and women of the empire to aid in the work of alleviating the suffering of the poor during the winter months.

Queen Alexandra's appeal will not be made in vain. There will be generous response from all over the empire.

This is not the first occasion upon which queen Alexandra has manifested an earnest interest in the welfare of the poor and afflicted of England. Her name is associated with many works of charity. She has ever displayed a sympathy for those in distress, which has gained for her a large place in the affections of Britons throughout the empire. Now that she has personally taken the lead in a movement to assist the unemployed of England we may be sure that she will receive encouragement from all parts of the king's domains, and we hope and believe that Canada will do her part.

Here in British Columbia poverty such as is at present all to prevalent in the big cities of England is altogether unknown and quite inconceivable to people who have not lived in the big centres of population in the old world, or in the cities on this continent like New York, Boston and Chicago. The misery and suffering occasioned thousands of helpless women and children by the inability of the men to find work are the cruellest features of an economic condition that makes the boasted progress and civilization of the twentieth century a very questionable achievement.

Whilst we in this favored province of British Columbia do not know by experience or contact of the abject poverty, and its attendant miseries, to which so many thousands of men, women, and children of the old land are condemned through no fault of their own, we can give heed to the cries of distress and respond to the appeal of our queen to assist her in the alleviation of the very poor.

A little money goes a long way with the very poor of England. Comparatively small sums contributed in various portions of this province would relieve the worst distress of a surprisingly large number of poor families in London and other large cities.

With queen Alexandra at the head of the movement and personally responsible for the proper distribution of the funds subscribed, we may be sure that every penny will be wisely expended.

If some better means be not devised The Daily News will gladly receive and acknowledge contributions to queen Alexandra's fund for the relief of the unemployed. There are doubtless many people in the Kootenays who would gladly give something toward this fund who may not care to forward individual subscriptions to England. For that reason, and in order that no small amounts may be lost to the fund, The Daily News is prepared to receive and acknowledge all contributions and to see that the same are forwarded to the treasurer, earl De Grey .

It would be a gracious act for the clergy of Nelson and the surrounding towns to make some fitting reference to queen Alexandra's appeal in their respective churches today.

EDITORIAL NOTES

The Sandon Mining Standard comments favorably upon the activities of the Canadian Metal company in the Slocan. It says that the prices bid by the company for silver-zinc ores are such as will stimulate development. They are the best ever offered in British Columbia for this class of ore.

In granting the application made by Mr. E. V. Bodwell to have the city of Nelson's appeal restored to the list, the full court intimated that it appeared to be a matter of public interest, and should be disposed of as soon as possible. This is a hopeful augury for the outcome of the hearing on November 22, and with this view of the case in mind the court should not hesitate to admit the new evidence obtained by the city, evidence that will speedily dispose of the West Kootenay Power & Light company's contentions.

NEARING BEATRICE LEAD

Camborne Camp Greatly Interested in Work Now Underway

Every shift at the Beatrice mine brings the miners nearer the lead, and it is but the question of hours until a shot will expose to view the vein of rich, silvery galena that the contractors have for the past two months been driving for, says the Camborne Miner.

On the size and richness of the lead when tapped depends to a large extent the future of the mine. Should these features of the lead be similar to that which exists in the upper levels—and it is confidently expected that such will be the case—the Beatrice mine will before long be ranked with the largest producers of silver-lead ore in the province. A program of extensive development has been drafted out and it will *soon be definitely known* whether it will be followed or not. Needless to say, Cambornites are awaiting with interest the news of the lead being tapped, as operation of the Beatrice on the scale proposed will have a beneficial effect on the camp in general.

From the small quartz lead encountered two weeks ago, a grab sample was taken and forwarded to Portland, to determine the gold values in it, and returns have just been received which place the amount of gold per ton of ore at $34.72. This is somewhat of a surprise to the management as the appearance of the ore did not indicate any such values. Lumber is about to be hauled to the mine for the construction of ore chutes.

ONE OF LIFE'S TRAGEDIES

New York Stevedore Loses Hope in His Old Age and Suicides

Hartford, Nov. 11—A passenger, who registered as J. C. Moore, but who is believed to have been J. C. Rulon of New York city, is thought to have jumped overboard from the Sound steamer Hartford of the Hartford & New York Transportation company, during last night. His coat and two letters were found in his state room today and an open window, overlooking the water, gave a clue to his disappearance.

One of the letters was addressed to captain E. M. Rulon of Evmore, Va., and the other was to captain S. D. Rulon of *the same place. They* were *identical in* language and each was signed "Brother John."

The letters said: "I take the boat tonight and half way down the sound I am going to jump overboard. My body will never be found and there will be no funeral expenses. I have made a failure of life and am too old to begin anew, as no one wants old men in their employ. My only regret is that I have to leave Blanche but I am going to make one last appeal to you. Try and not forget her. I am insured in the Royal Arcanum for $3000 and it is payable at her wish."

Rulon was apparently a master mariner, as a license bearing his name was found in a pocket of his clothing.

New York, Nov. 11—John C. Rulon, a master stevedore, had an office at 80 New street, this city. Other occupants of the building said today that he had not been seen at his office for two days. Mr. Rulon lived at a boarding house in Brooklyn and left there Wednesday night saying he was going to New Haven on business. He was formerly a sea captain.

MAMMOTH ORE RETURNS

The returns from the last shipment of ore from the Mammoth group, consisting of 361 sacks, or about 18 tons, which was recently sent to the Canadian Smelting Works at Trail, have been received. The net returns from the shipment were $2121.82, after deducting the freight and treatment charges. The gross returns were $2787.66.—Camborne Miner.

DRANK LINIMENT AND DIED

London, Ont., Nov. 11—A coroner's jury has brought in a verdict that two Delaware Indians died recently from drinking the contents of a bottle purchased from Tyrill Duncombe's drug store, St. Thomas, and that Duncombe was to blame for selling the same. The evidence went to show *that Duncombe gave the Indians the bottle* for liniment, but analysis showed that it was principally wood alcohol, colored with arnica to look like whiskey. There was no label on the bottle.

NO HOPE FOR CANADIAN CATTLE

London, Nov. 11—Speaking at a meeting of the Lincolnshire cattle breeders today, Hon. Ailwyn Fellowes, president of the board of agriculture, said as long as he was head of the agricultural department, nothing would induce him to ask the house of commons to alter the law to admit Canadian cattle. He considered the law one of the greatest safeguards which the owners of live stock had in this country.

IN TORONTO THE GOOD

Toronto, Nov. 11—The grand jury at the criminal assizes yesterday made its presentment to Mr. justice Clute. It deplored the large number of crimes of a serious character and suggested that the lash be not spared in punishment of assaults upon females. It deplored that cases of murder and manslaughter were increasing.

FEED THE BRUTE

What a lot of good cooks there would be if all the young ladies really believed in the old addage "the way to a man's heart is through his stomach." But good things to eat are not monopolized by mere man by any means. Our sweethearts, wives and sisters have quite as much discrimination in what they eat as in what they wear.

J. J. WALKER

JEWELER OPTICIAN

The up to date girl of today is an adept in the use of the chafing dish. It is not difficult to use and it is hard to find a more delightful way of entertaining.

To begin gracefully in the art of chafing dish cookery it is necessary to know how. Armour, Limited, Toronto, will send a little cook book free to any one asking for it and mentioning this paper. The cook book tells how to use the chafing dish and a number of choice recipes that are quickly and easily made. It is really issued to show a few of the many ways of using Armour's Extract of Beef. While Extract of Beef is not really necessary for successful chafing dish cookery, it improves and makes digestible every known chafing dish preparation. Try it the first time a few friends drop in for an evening.

MINISTERS AT GRAND FORKS

Granby Smelter's Contribution to Treasury —Hon. R. F. Green's Promises

(Special to The Daily News)

Grand Forks, Nov. 11—Hon. Richard McBride, premier and Hon. R. F. Green, chief commissioner of lands and works, arrived here yesterday and were taken at once to the Granby smelter and shown through the plant by superintendent A. W. B. Hodges.

In the evening various deputations from the board of trade, city council and other local organizations, waited on the ministers.

The chief commissioner promised immediate aid in the rebuilding of the bridge at Carson and on Front street.

At an informal meeting of conservatives held during the visit of the ministers, superintendent Hodges being present, surprised the audience by stating that the Granby smelter paid an annual tax to the provincial government of $35,000, derived *from various* sources.

The ministers left by special conveyance today for Phoenix.

STOCKS AND GRAIN

The stock market was rather weak today, opening around yesterday's closing figures, which were about the high for the day, and closed weak at about the low mark. Metropolitan was the most interesting stock on the list, opening at 119 1-4, broke to 116 and closed weak at 116 1-8; B.R.T. opened at 75 5-8, closed 74 3-4; Reading opened at 141 3-4, sold to 142 1-2, closed 139 1-4; C.P.R. opened at 171 7-8, advanced to 172, broke to 170 3-4 and closed at 171; St. Paul opened at 175 7-8, sold to 174 1-8 closed 174 1-4; Sugar opened at 140, broke to 138 5-8, closed 137 7-8; Amalgamated opened at 81, gained a quarter, closed at 80; U.S.S. common opened at 36 3-4, closed 36 1-4, preferred opened at 102 1-4, closed 101 7-8; R.I. opened at 28 3-4, closed 28 1-2; U.P. opened at 130 1-2, advanced to 130 1-8, broke to 129 1-4, closed 129 3-4; Missouri Pac. opened at 98 1-2, gained an eighth, broke to 97 and closed 97 1-8; L. & N. opened at 148 1-2, broke to 147 5-8 and closed at 147 3-4; Atchison opened at 84 3-4, closed 83 1-2; Southern Pacific opened at 68 1-4, advanced to 68 3-8, broke to 67 1-2 and closed 67 3-4; Penn. opened at 141 3-4, sold to 142 1-4, broke to 138 1-4 and closed at 139 1-8. The cause given for the selling off of the stocks today is a very poor bank statement.

Grain—Liverpool closed 1-2 lower. Our market was weak during the early part of the day, opening at 85 1-4, closed at 86 1-8 for December option; May wheat opened at 88 1-4, closed 88 3-8.

Reported by Sharp & Irvine, Nelson, Nov. 11.

SUNLIGHT SOAP

$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

is equally good with hard or soft water.

If you use Sunlight Soap in the Sunlight way (follow directions) you need not boil nor rub your clothes, and yet you will get better results than with boiling and hard rubbing in the old-fashioned way.

As Sunlight Soap contains no injurious chemicals and is perfectly pure, the most delicate fabrics and dainty silks and laces may be washed without the slightest injury.

Your money refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

UNION STEAMSHIP COMPANY OF BRITISH COLUMBIA Limited

TELEG. ADD., "UNION" CODE: A. B. C.

EN-VOYAGE S. S. "CASSIAR.."

Messrs. J. Leckie Co., Ltd.,
Vancouver, B. C.

Gentlemen: I take pleasure in stating the following fact, viz:

About a month ago I had two men start with me, mining, the one bought a $10 pair of —— boots, and the other a pair of YOUR make of Logging or Miners' Boots, for which he paid $5 in a retail store in Vancouver. The $10 Boots did not stand up to their work at the counters, and the sole at the instep separated, neither did they keep the man's feet dry; while the Boots of YOUR make have given proper satisfaction in workmanship, material, wear and comfort.

I am, gentlemen,
Yours truly,
F. W. McCRADY, C. & M. E.
Supt. Cuba Silver Mining Co.

CAUSE OF BAD WRITING

FALSE STYLE IN VOGUE, AND THE MANY FADS IN FORCE.

OPINIONS OF EX-SCHOOL MASTERS ON FAILURE OF SYSTEM.

The subject of penmanship as taught in public schools is engaging a great deal of attention in British Columbia at present. The topic is hardly a new one. The charge has frequently been made against Canadian public schools that their graduates can neither read, write nor spell. But the origin of the latest discussion is an investigation undertaken by the board of school trustees of the city of New Westminster, fired with a sudden zeal for general educational reform.

The contagion has spread to other cities at the coast, and the merits and defects of school writing, are now the subject of animated discussion at school board meetings, and in the correspondence and editorial columns of the daily newspapers.

It is too early yet to forecast the result of the agitation. The authorities of the educational department may safely reply that due emphasis is regularly laid upon the importance of good writing in every departmental circular and in every inspector's report. Teachers may retort that they are doing their best to train their pupils in the style of writing authorized by the department, and that they are giving to the subject all the time and attention possible without neglecting the other branches of learning prescribed in the curriculum. The most that can be expected probably is that a little more attention may be given to writing for a time, and possibly that a slightly larger proportion of school time be devoted to it than is the case at present.

The fact remains, and will remain, that the business and professional men, who employ public school graduates, are extremely dissatisfied with their writing.

The recently published report of the provincial board of entrance examiners, in referring to the subject of writing, evidently endorsed the general complaint. It stated:

"Handwriting has been defined as "a series of marks by means of which the thoughts of the writer are communicated to the reader." Evidently then the first requirement of writing is legibility, whatever style may be used, otherwise no thought can be communicated; then cleanliness, accuracy of slope, general neatness of margin require attention. The papers sent in by several schools could not well be surpassed; the writing and neatness were all that could be desired; of some, however, an opposite opinion must be expressed. One fact was very noticeable, namely, that the writing went by schools rather than by individuals, showing that constant attention had been given in some cases, and quite neglected in others. A few pupils have apparently striven to make their writing illegible by use of a back-hand, with all letter forms alike, as far as possible; others put in papers smeared and dirty, while in a few individual cases the writing can only be characterized as disgraceful. Teachers should persistently refuse all such work in the daily exercises, for habits of bad or illegible writing, gained in early years, become a hindrance to a pupil's success in after life, or can only be broken with great difficulty.''

But, unless the majority of the school teachers are guilty of gross negligence in the matter, and that would be a painful conclusion, there must be an explanation of the poor results obtained by the present system.

There are among the citizens of Nelson many ex-school masters and mistresses, who, while not anxious to appear publicly as critics, have given the subject serious consideration. Their unanimity on certain points is significant. They unite in condemning the style of writing taught.

When vertical writing was introduced into Canadian schools, about 15 years ago, it was defended in the following words, reiterated by all its chief advocates: "Oblique writing may be very legible, or it may be very rapid. It cannot possibly be both at once. Vertical writing is easy to master, is perfectly legible, and may, with very little practice, be performed rapidly. "

How completely the last claims have failed of realization, the almost unanimous judgment of the employers of vertical writers may declare.

The board of examiners in their report and recommendations ignore the necessity for rapid writing, and perhaps over-emphasize the desirability of "accuracy of slope and neatness of margin." A boy or girl who desires employment in an office or factory, where he has to write ,learns quickly that rapidity is urgently required, and its importance second only to legibility.

The fault—at least the chief fault—with the system now taught, is that it is not really writing but drawing. As such it may have an educational value as a training for art, but it can never produce writers whose work is at once rapid and legible.

Next to the vicious system followed, the chief cause of the general failure is probably the inadequate share of school time that is given to the subject. For this defect the teachers are certainly not to blame. It is hard to fix any blame on the educational authorities. They have been driven by public opinion.

Twenty years ago the curriculum of Canadian common schools included reading, grammar and composition, writing, spelling, arithmetic, geography and British history; reading included elementary literature. Teachers and pupils then thought a good day's work was provided, but not more than could be fairly covered.

Since that time Canadian history, drawing, anatomy, physiology, hygiene and temeperance, and lastly nature study, have been added—the last including elementary natural history, brush drawing, clay modelling and a few other things.

These additions to the curriculum have not been accompanied by any lengthening of school hours, shortening of holidays, or addition of years to the period of compulsory school attendance. Neither have they been accompaneid by any noticeable development of the average child's capacity for understanding and assimilating.

Under these circumstances the wonder is not that writing has steadily deteriorated, but that reading, writing, spelling and arithmetic have not all been abandoned long since in deference to the popular demand for more ornamental acquirements.

EXPERIENCED NO HARDSHIPS

Mrs. Hubbard, Jr. ,Tells of Her Trip Into the Labrador Wastes.

New York, Nov. 11.—Mrs. Leonidas Hubbard, Jr., has sent the following message to the World from Chateau Bay, under date of November 1st:

"Our undertaking has been successful. I went away prepared to meet many hardships. I met none. It was a splendid trip ,which gave me pleasure and more than pleasure, the privilege of offering tribute to one whose life and spirit in which he lived were beautiful beyond anything that life has shown me.

"When we left Northwest river on June 27th our first objective point was Seal lake, which we reached Monday July 15th. On the George river we met two bands of Indians, and yet another at Indian House lake. All camps received us in a grand manner.

We had no illness in the party. We left George river on October 22, reaching Rigolette, Nov. 1, being fortunate enough to connect there with steamer King Edward which was due at Quebec Nov. 18."

This is the first message beyond a bare announcement of safety from this intrepid woman, who has returned from the Labrador wastes where her husband perished in 1903, after having following step by step his trail in the frozen wilds and settled once for all the manner of his death.

GERMANY'S NAVAL BUDGET

Berlin, Nov. 11—It is estimated that increasing the size of the battleships of the German navy and the addition of six large cruisers, will add to the naval budgets during the next eleven years $200,000,000.

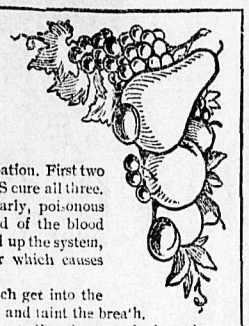
Good Complexion



When Pimples and Blotches Disfigure the Skin

it means bad blood, bad digestion or constipation. First two are the result of the last. FRUIT-A-TIVES cure all three.

When the bowels don't move regularly, poisonous matter remains in the intestines. Instead of the blood taking up wholesome nourishment to build up the system, it absorbs part of this poisonous matter which causes pimples and blotches on the skin.

Gases are formed by this matter, which get into the stomach, upset digestion, coat the tongue and taint the breath.

Fruit-a-tives purify the blood—correct digestion—and clear the complexion—because they cure constipation.

"I am on my second box of Fruit-a-tives now, and can honestly say they are the best medicine for Constipation and Stomach Trouble I ever used."

MRS. F. CODY, OTTAWA, ONT.

These wonderful little tablets are pure fruit juices—prepared according to the secret formula of an Ottawa physician who discovered the method of using fruit to cure disease. Fruit-a-tives act directly on the liver, increase the flow of bile, and thus cause the bowels to move regularly and naturally every day.

Fruit-a-tives

or Fruit Liver Tablets.

At all druggists, 50c. a box. Manufactured by Fruit-a-tives Limited, Ottawa.

JAPAN'S KOREAN POLICY

PROTECTORATE WELCOMED BY THE SEOUL PRESS.

ENTIRE CONFIDENCE IN JAPAN'S INTENTIONS.

Yesterday's despatches announced that marquis Ito had arrived at Seoul from Japan, and that his arrival was a preliminary to the declaration of a protectorate over the Korean empire by Japan.

It is interesting in this connection to note the feeling of the Seoul newspapers with regard to Japan's interference in the affairs of Korea.

The Seoul Press says:

Japan's policy with regard to Korea—a policy which, by the way, is at present being very severely criticised and handled by the local press—is entirely misunderstood, not only by the natives but by certain foreign residents—at least, the "ways and means" Japan is using to carry out that policy is being brought into question. No reasonable person could conscientiously entertain any grave doubt sor misgivings as to what Japan's true intentions were towards Korea at the outbreak of hostilities with Russia in the beginning of last year, or even during the last eleven years—since the Japan-China war. Are we right in considering that the cause of the present war with Russia was partly, if not principally, on account of Korea? Are we not well within the limits of truth when we say that the Japan-China war was waged mainly to free Korea from the yoke of China and establish her on an independent basis? Korea was able to cast off the Chinese mantle soon afterwards and proclaim her independence—but thanks were due entirely to Japan's interference—she never would have become an independent state otherwise; yet we are not aware that Japan in spite of her "success of arms" made any unlawful claim upon Korea during the meantime or took undue advantage of the situation—though she might have done so had she willed, but she restrained herself. We therefore place the same amount of confidence in Japan's dealing with this unfortunate country now, after a second glorious war, as we did eleven years ago. Japan gave Korea ten years wherein to recuperate and improve the state of affairs relating to her internal government, to try and maintain her own independence as an eastern nation—but at the outbreak of the present war what was the result? Korea was as corrupt internally, and as unhappy, as she has been from time immemorial! The very fact that Japan has decided to step in and try to improve matters is not to be wondered at —let alone to be regretted. No other Eastern nation was, or is, capable of undertaking this task. . . We place implicit faith in Japan and her intentions with regard to this country, and feel confident that in due course of time not only Korea herself ,but that all her western friends and well-wishers will be absolutely satisfied and reconciled to the condition of affairs Japan has brought about.

CHURCH SERVICES TODAY

NEW YORK FASHION LETTER

New York, Nov. 11—If you are looking for a costume that will do duty for a number of occasions, order a two piece princess dress of as good uality velvet as you can afford, but by all means be satisfied with something else unless a tolerably good grade of velvet is procured. Have the skirt made circular and faced about six inches at the bottom with cloth to give it weight and insure it from sagging at the sides. This frock will be the conventional princess style up to the bust, the fullness at the waist being held in with tucks or shirring, but at the bust line, which, by the way, is cut heart shaped, the bodice meets an elaborate yoke of lace and chiffon. Over this is a tiny bolero extending only a few inches beyond the yoke. This little coat can only be worn in very mild weather or under a carriage wrap. Consequently the jacket intended for street donning with the velvet suit is a double breasted affair, square shouldered and reaches just below the hip line. It is trimmed with braid or dull gold galloon. The princess dress with its elaborate lace guimpe is the very thing for dressy indoor and restaurant dinner wear, and the coat turns it at once into a conventional afternoon calling costume. If one wears her gowns for several seasons, a black velvet two piece princess model will be the most economical purchase, but when a few months' wear is all that is needed any one of the many shades of dahlia is a charming color to select.

There are many ways to furbish up a frock that is just beginning to lose its first freshness, and nothing is so useful for this as ribbon—ribbon of all colors and kinds and widths—for with a wide ribbon one can make a most dainty bolero, finished at the edge with a ruching of chiffon, which will restore much of the "new" look to a blouse, or again, there is the ribbon fichu, which is quite new and very pretty. It is made of rather wide ribbon, with silver fringe at the ends; it is threaded through rings covered with buttonhole work and sewed on around the shoulders. There are three lengths of ribbon in all, making six fringed ends. The first length comes over the shoulders, just about half way between the upper to the front, the under one comes half way between the upper one and the middle of the bodice, then in the centre comes a simply tied bow. Ribbon and lace frocks are making great strides in favor. These frocks have been trying for a place for some years and nothing could be daintier or lighter looking, but they entail a terrible amount of hand work. This, however, should be a recommendation to the home dressmaker. Probably the straight up and down style will not be quite so acceptable as it was a few years ago, and it will be rather more difficult to obtain the other effects, such as the waved, the diagonal or that in which the points are dovetailed into each other. Still no doubt this will be achieved, and if well done the result will be a very charming frock at little expense beyond the labor.

Directoire coats are stunning and the variations in them are innumerable. One swagger model is in brown cloth with rather deep pointed revers and collar of velvet embossed with cloth outlined with gold braid. A deep gauntlet cuff carried out in this way is the sleeve finish. The skirt worn with this coat is perfectly plain. Still another style of the directoire coat shows a vest of white cloth embroidered in black, dull red and glistening threads of gold. Beautiful, too, are the long redingotes of the directoire period in velvet. There is a new bottle green shade in an exquisite velvet coat of this description. I examined the other day which had revers of old rose, edged with mink.

With a directoire coat one must be careful in the choice of a hat and never buy in a gay, speculative mood thinking, "Oh, it will do." Indeed, as regards millinery, one should never buy in the dark, as it were, but always wear the costume which it is intended to complete. And suggestive of this momentous question there is something of a cavalier tendency difficult to define about the headgear at present in fashion. This may possibly be traced to the sparringly trimmed and more visible crowns, together with the tendency of trimming, and if it were not for the poise of the bandeau one trembles to think what would be the climax, an ugly bedraggled effect being almost inevitable.

The blouse coats also are eminently chic and eminently elegant, but quite different in style and effect. They are uniformly extended below the waist line and finished with smoothly fitted girdles at that point but vary extensively as to the cut of the front and trimming.

Fancy sleeves make a feature and one of the blouse coats referred to is made with those of three-quarter length, which fall over under sleeves of chiffon. Another includes those that are full puffs above the long deep cuffs, these last consisting of row upon row of narrow black velvet, chiffon, lace and tiny edges of fur. Happily, however, there are many coats that are simpler in style and consequently of less cost, and among others must be noted those of caracule, in box style, which are trimmed only with a rich and handsome black braid that is put on about an inch within the edge and stitched down quite flat, just as it would be upon cloth.

The French girls have given us rather a pretty idea in hat pins, the head of it being of artificial flowers to match those worn on the hat, and the autumnal blossoms have been utilized. Jewelled pins must harmonize with the ribbon or velvet of the trimming.

Short skirts with velvet bodices are to be worn; also lace skirts with silk bodices. This is an economical fashion and permits of the home dressmaker making use of things she has on hand. But it will also lead to terrible combinations, and we may expect some frightful examples of mixed fabrics and swearing colors when the amateur couturiere blossoms forth.

ESTELLE CLAIRMONT.

Armour's Extract of Beef in the Kitchen.

Armour's Extract of Beef gives a rich flavor of roast beef to hash, stews, ragouts and potpies. It restores to left-over meats the full flavor lost in the first cooking. With Armour's Extract of Beef in the kitchen a soup or sauce is made ready for the table in a few minutes that it would take an hour or two to prepare with fresh meat, and it would not be as good and would cost more.

Don't forget that a 2-ounce jar of Armour's Extract of Beef will go further than an 8-ounce bottle of Fluid Beef. It is therefore less expensive. Use a quarter teaspoonful to make a cup of beef broth, etc., etc. Sold by all Grocers and Druggists.

ARMOUR LIMITED - TORONTO.

ARMOUR'S TOMATO AND BEEF CATSUP

An appetizing relish for steaks, chops, roasts, pork and beans, and fish of all kinds. It is just a little bit better than others.

Sold by all Grocers.

NOTICE TO DELINQUENT CO-OWNERS

To Chas. E. Sealey, R. E. Lemon and D. D. Robertson, or to any person or persons to whom they may have transferred their interests in the Climax mineral claim, situated at the head of 8-Mile creek, adjoining the Alpine group on the south side, and recorded at Nelson in the district of West Kootenay

You are hereby notified that I, Beckford A. Shatford, F.M.C. No. B33656, have caused to be expended the sum of ($512.50) five hundred and twelve dollars and fifty cents in labor and improvements on the above mentioned claim in order to hold said claim under the provisions of the Mineral Act, and if within 90 days from the date of this notice you fail or refuse to contribute your proportion of such expenditure together with all costs of advertising, your interest in sold claim will become the property of the subscriber under section 4 of an Act entitled "An Act to Amend the Mineral Act, 1900."

Dated at Slocan City, this 4th day of Oct., 1905.

B. A. SHATFORD.

NOTICE

Synopsis of Regulations for Disposal of Mineral on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal—Coal lands may be purchased at $1 per acre for soft coal and $20 for anthracite Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on the gross output.

Quartz—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper in the Yukon territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products of the location.

Placer Mining—Manitoba and the N.W.T. excepting the Yukon Territory—Placer mining claims generally are 100 feet square; entry fee, $5; renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N.W.T., excepting the Yukon Territory—A free miner may obtain only two leases of five miles each for a term of twenty years renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or may receive entries for bar diggings or bench claims except on the Saskatchewan River where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental $100 per mile for the first year and $10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1000 to 2000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a Mining Recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1000 feet in length, and if the party consists of two, 1500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and a half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the lands to be prospected, an area of 1920 acres for such period as he may decide, the length of which shall not exceed three times the breadth. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well, will be sold to the prospector at the rate of $1 an acre, and the remainder of the tract reserved, namely 1280 acres, will be sold at the rate of $3 per acre, subject to royalty at such rate as may be specified by Order in Council.

FRUIT AND FARM LANDS FOR SALE

In the Famous Kootenay Valleys

I can sell you choice fruit lands in 10, 20, 40, 80, or 160 acre blocks at

Ground Floor Prices

I do not offer for sale any fruit land that I have not personally examined. I guarantee every block to be as good as represented, and having sold a large portion of the land now being brought under fruit cultivation in this district, I would be safe in offering any man his money back with 10 per cent interest, who is not satisfied with his purchase. Not one would do it, because they can double their money.

I have one 13 acre lot near Nelson party improved.

One 5 acre lot near town.

One 20 acre lot on wagon road at a bargain if bought soon.

One farm with good house and outbuildings, and many choice places.

YMIR STOCK ADVANCES

SHARES GAIN 30 PER CENT IN VALUE DURING THE WEEK

RISING PRICE IN NELSON CLOSELY FOLLOWED BY LONDON

Ymir Gold Mines shares are rising rapidly. For several years the stock was depressed owing to the failing out of dividends and the apparent failure of the ore supply. Although the mine had more than paid for its operation and equipment, the uncertainty about its future made it an undesirable investment.

The recently published report of Gilman Brown's examination and his belief in the extent and value of the mine, following upon manager Hand's discovery of new veins in a part of the mine formerly ignored, have had the natural effect of restoring public confidence, and improving the feeling of the stockholders.

H. E. Croasdaile stated yesterday that a considerable demand for shares in the Ymir Gold Mines, Limited, had developed and that the price of the shares on the London market has risen during the last week from 5s. 6d. to 7s. a share, an increase of nearly 30 per cent.

As manager Hand has stated that work in the direction recommended by himself, and endorsed by Gilman Brown, will be continued all winter, there is every ground for confidence that the advance in the quotation of the company's shares has only begun, and that a continued rise will be justified by the developments of the next six months.

The price in Nelson is even higher than that on the London market. In Nelson yesterday afternoon 1000 shares were bought at 7s. 6d.

NOVEL ENTERTAINMENT

St. Paul's Ladies' Aid Prepare Potato Supper for November 17

Novelty is an essential of attractiveness. The Ladies' aid of St. Paul's church has decided to offer to the people of Nelson something entirely new and distinctive in the way of church entertainments next Friday evening, Nov. 17.

A Potato Supper! Potatoes boiled, baked, fried, escalloped, au gratin, lyonnaise, Saratoga chips, creamed potatoes and any other kind that may desired by unaccountable individual taste, will be served to order. The plot was formed months ago and the secret has been carefully preserved by the Ladies aid. The potatoes will be all from the ladies' garden, the church lots, where they were planted, hoed, watered tended; and finally dug up by the ladies themselves.

Candy will also be offered for sale—all home made by the Ladies' aid. A sale of work will be conducted in the afternoon and evening. The vacant store on the corner of Ward and Baker streets has been secured for the occasion.

In honor of the event the poetess laureate of the aid, has composed the following:

Come to the corner store one and all,
We'll serve potatoes large and small;
Served them cooked to please each one,
Or sell them by bushel, peck or ton.
For fifty cents a luncheon you'll buy,
Or for the same the supper you'll try;
Bring your friends on the day we name
And see if you won't be glad you came.

ON PAYNE MOUNTAIN

Work Being Done on Several Properties With Good Results

The rumors current the last few days that the Payne has been leased for a term of three years to Walker Smith, and will be worked on a rather extensive scale, revives interest in this old mine and adjacent properties. The Payne company ceased operations about a year ago, at which time the upper workings were leased to Walker Smith and the lower portion of the mine and the concentration plant to B. P. Little. The mill has been running steadily most of the time and there is enough ore in sight to keep it running until the end of the year, at which time Little's lease will expire.

Within the last week a new shoot of mixed lead and zinc ore, from two to four feet wide, has been uncovered just below No. 5 level, that will furnish mill feed to the end of the year. About twenty men are employed by the lessees.

On the Tramp Planet, adjoining the Payne on the south, John Bow has discovered a nice shoot of high grade galena and is developing it.

Still further south Bigney & Little are continuing work on the Majestic with good results. These parties leased this property two years ago, and have steadily kept development work moving ahead, and have now three levels, aggregating over 800 feet, besides raises and winzes, opening up a large area for stoping. The vein is wide, from 12 to 16 feet, and a peculiarity of the ore is that it mostly occurs in "kidneys," extending crosswise of the vein. Stoping is now going on between levels 2 and 3, where a streak of clean galena from 8 to 16 inches thick shows along the back of the stope, besides many scattered kidneys and stringers. It is necessary to mine the full width of the vein to get all the ore. Only sufficient has been stoped so far to pay development costs, and the lessees say it will be their policy to continue this plan for some time longer. So far no zinc has been encountered. Four or five men are employed and a new cabin has just been completed and made snug for the winter.

There are a number of other good things on Payne mountain, says the Sandon Mining Standard. A large tonnage has been shipped and increasing development shows that all the ore does not occur in Payne ground only. We look to see other ore shoots opened up that will rival the Payne. When it is remembered that the Payne has paid in dividends one million and a half dollars, and the showings on the other portions of the mountain are good, then it must strike one that property here is a good speculation. The Pyane lease will revive interest, as undoubtedly money will be forthcoming to carry out a comprehensive plan of development, in which adjoining properties cannot fail but be brought into public view for investment.

OUTLOOK IN THE SLOCAN

EDITOR HUSTON TAKES HOPEFUL VIEW OF SITUATION.

INTERESTING TALK ON RECENT DEVELOPMENTS

Geo. Huston, of the Sandon Mining Standard is in town, and to a representative of The Daily News, talked very hopefully of the future prospects of the Slocan. Mr. Huston gleans his news from practical observation on the ground and has made a special study of the lead and zinc problems of the Slocan camps.

Asked as to the outlook for the coming winter ,Mr. Huston said:

"In my opinion the outlook is better than it has been for years. Things are on a rock bottom basis. Our mining people see that they must get in and solve their own problems, in ore treatment and markets; they are beginning to realize that before fresh capital can be induced to come in, that the invested capital must show a return. This makes for more extensive development, something which the camps sadly need. Comprehensive plans are on the tapis by the leading mines to this end. Before the end of the next summer, there should be several hundred men at work around the Sandon district alone."

"What about the leasing system?"

"The system is what is needed. I do not mean, the ordinery run of leasing, but leasing under intelligent supervision. The Payne company have started the ball rolling in good shape. They have leased the mine for three years and have drafted into the provisions that the mine must receive development 200 feet below the present workings. Leasing on a good proposition should carry compulsory development. No doubt this will rule in future. We are preparing data for the introduction of hand jigs into the camp which will stimulate the output."

"How about magnetic separation?"

"Magnetic separation is receiving a thorough test at the Kootenay Ore company's works at Kaslo. The preliminary work is mainly experimenting, but I am glad to say that the experiments have given successful results. The finished product is A1 in zinc, running from 47 to 53 per cent. The manager of the Slocan Star has put in the summer studying the work in the states. This mine has some of the finest zinc in the camp and with treatment can turn out large quantities, ranging in zinc content from 50 to 55 per cent, with a small silver value. This in addition to a silver-lead production. The price to be got will more than pay for the installation of a plant, the development and all expenses, leaving the lead clear. When we consider that not long ago this mineral went down the tail race, it is easy to see what strides are being made."

"What about markets and competition for zinc?"

"According to all signs, and the prices bid, the plant at Frank will run the foreign competition a hard race and I should not be surprised if the outside competition is run out of the country. This company has spent a great deal of money and have a most complete up-to-date plant. The sympathy of all the producers in our camps is with them, and their competition will put the outside zinc firms on their mettle. They must come up to the scratch or get out. On the silver-zincs they already have the outside people knocked out, and will soon be in shape to start on the ores carrying no silver but high grade in zinc. Considering the fact that as a rule the price of spelter rules higher in the states than in Europe, and the ores are admitted free, the showing that the Candian Metal company is making is a most creditable one, and one Canadians should be proud of."

"Do you look for prices of lead and silver to stay up?"

"I certainly agree with Mr. Buchanan that they will. We will see £16 for lead before the end of November. As for silver, the awakening of China will take care of the price. We are likely to see an expansion of railway building in the Orient. You can't pay freight bills with the present currency. They will have to have silver. The Oriental people don't use paper money."

"There are a number of promising properties which will swell the production, of which little is heard. A number of leases of company owned mines to practical people have been made. The Slocan is not by any means a gutted proposition. New strikes are the order of the day, even with the limited development going on. With continuous extensive development in full swing it will be one succession of new strikes and the situation will seem like the early days. I for one have never lost faith in the Slocan. It is the richest camp lying out doors."

STRIKE ON SLOCAN STAR

Fine Body of Clean Ore Encountered on No. 4 Level of Silversmith

The following is a detailed description of some new work in the Slocan Star mine which is of interest to the camp, says the Sandon Mining Standard.

The Star has only three men stoping ore and about 20 on development work. On the No. 4 level of the Silversmith, which is the farthest working of the mine and virgin ground, a fine body of clean ore has been encountered. It averages two feet in width, carrying good values in lead and silver. From the face of the drift to the surface is 250 feet, from where the ore shows below. No. 5 level, 225 feet below, will be pushed ahead into the new ore body. The size of the strike has not yet been determined, as it was only recently uncovered and considerable work is necessary to thoroughly explore it. The opening up of the new vein means much for the mine and camp, as the Star never yet had a small ore shoot. The veins are always large, well defined and continuous. The mine is looking as well today as at any time in its history. In all the new development there is ore in the face of the workings. The utilization of the zinc resources, with the new ore bodies discovered, and in addition the development work to be prosecuted below the present levels, will make this property a steady producer and the backbone of the camp.

After thoroughly checking the things mentioned above as to correctness, the Mining Standard cannot see that there are any clouds on the future outlook of the Sandon camp.

DEER IN SLOCAN VALLEY

A. McQuarrie Sustains Reputation for Skill by Securing Fine Head

A. McQuarrie of Taylor and McQuarrie has the record for the season among city sportsmen. Two weeks ago he bagged the only mountain goat of the year—except those shot by J. Fred Hume and his Chicago friends in East Kootenay. Yesterday he brought in the head of a mule deer from the Slocan river valley.

The deer was shot by Mr. McQuarrie late Friday afternoon on the McDermid & McHardy ranch on the western slope of the Slocan valley. When dressed the animal weighed 180 pounds. Mr. McQuarrie will have the head, which is a very fine specimen, dressed and mounted.

GENERALS TO EXCHANGE SHOTS

Paris, Nov. 11—A duel is expected to take place between general Brugere, commander in chief of the army and general Percin, chief of the military staff under general Andrea, former war minister, as a result fo general Burgere's declining to return the salute of general Percin in the Bois de Boulogne.

POET OF THE MASSES

ESTIMATE OF RUDYARD KIPLING BY REV. F. H. GRAHAM

HIS MERITS DISCUSSED BY MEMBERS OF UNIVERSITY CLUB

Whatever critics may say of the crudities of his style, or moralists of the atmosphere he creates, it is generally admitted that Rudyard Kipling has found a larger audience than any other writer of his time. That fact may or may not be taken as a proof of excellence; it certainly testifies to his understanding of human thoughts and feelings. He may not be a genius but merely the commonplace human, magnified and glorified, but it cannot be denied that he has given full expression to the common ideas at least, of his race and generation.

The announcement that a paper on the works of Kipling would be read by Rev. F. H. Graham at the University club meeting last night, attracted the largest audience in the history of the club. There were present Rev. J. T. Ferguson, in the chair, C. M. Fraser, secretary, J. S. Colbath and Mrs. Colbath, C. Cummins and Mrs. Cummins, W. H. Jones and Mrs. Jones, Mrs. Pearcy, Misses Clarke, Baildon, Thomas and Moffatt, judge Forin, A. L. McKillop, Dr. E. C. Arthur, A. L. McCulloch, W. Blakemore, O. Newling, Rev. F H Graham and W J. Baird The minutes were read and approved and Rev Mr. Graham was called upon.

In introducing his paper on "The Poetry of Kipling," Mr. Graham expressed the opinion that we are too near the poet in time to make an impartial estimate of the value of his work, as compared with that of the other poets. But, he held, whether he is finally assigned a position among the greatest, the epoch-making poets, or not, he is sure of a prominent place among the poets whose appeal is world wide.

Kipling differs from all other writers in the extent of the reading public to which he appeals. He is read by many who read no other poet. He is hated by the superior person and the literary genius. But he is admired by the masters of genius. Popular writers detest him because he has ousted them, and surpassed them in public esteem and favor.

To be rightly appreciated he must be rightly understood. He has a wide knowledge of humanity and finds his material in man's work, and the situations of man's life.

His patriotism is shown in his view of an ideal state, suggested in "The Five Nations," and "Dykes." His resource best exemplified in such poems as "Bell Buoy." He interprets life truly and consistently. In "The True Romance" and in "The Explorer" he shows his deeper feelings. Kiplings poems are valuable because he has adhered to the truth in regard to the subjects of which he writes. He has shown that romance may be combined with truth in all situations of daily life.

The paper was followed by all with close attention and there were general expressions of appreciation.

W. Baird, in opening the discussion expressed his opinion that Kipling's poetry was inferior to his prose. He thought that offences against the purity of the language were a fatal bar to Kipling's admittance among the great poets.

Judge Forin thought Kipling and Robert Louis Stevenson, of later days, produced the works most suitable and congenial to tired people.

A. I. McKillop thought Kipling had too much common sense for a poet, but admitted the forcefulness of many of his writings.

O. Newling considered Kipling's chief merit to be that he reached the masses more effectively than any other modern writer.

W. Blakemore praised his descriptive power, but thought his poetry inferior to his prose.

Dr. E. C. Arthur and W. H. Jones confessed a lack of appreciation.

Rev. J. T. Ferguson closed the discussion with a comparison of Kipling and Walt Whitman. He thought the lack of beauty in much of Kipling's work would lower his rank as a poet.

At the December meeting of the club W. Blakemore will read a critical essay on George Meredith's "Ordeal of Richard Feverel." In January judge Forin will contribute a paper on "Social Unrest."

NELSON'S NEWS OF THE DAY

At the evening service in the Methodist church today Mrs. Christmas will sing a solo.

Harry Heavener, formerly of the Nelson police force, arrived from Rossland yesterday to spend a few days in the city.

Charles Dempster arrived from Rossland yesterday with his sons, Arthur and Reggie, and is at the Strathcona.

W. H. Paul of Denver, Colorado, representing the Empire Zinc company, was in town yesterday.

George B. McMillan left for Spokane yesterday morning on business. As soon as he can set his local interests in order he will leave for Mexico.

Alexander Sharp, M.E., consulting engineer and general adviser on mines to P. Burns and company, returned to the city last evening and is at the Strathcona.

A rehearsal of Pinafore will be held in St. Saviour's mission room tomorrow, Monday, afternoon at 3:45 sharp. The cast of characters has not been decided yet. All the children are requested to attend sharp on time.

Col. J. G. Holmes of Victoria, D.O.C., arrived from Rossland last evening. He will inspect the local company of the R.M.R. No. 2, in the Nelson armory tomorrow evening.

A special meeting of the Kootenay Fruit Growers' association is called for Wednesday afternoon, Nov. 15, in the city hall at 1 o'clock sharp. The object of the meeting is the consideration of the questions of incorporation and co-operation.

The Honiton lace table cover, which was raffled at the Queen's hotel, was won by W. H. Smyth, holder of ticket No. 22. The cover was made by Mrs. Hagerman, was awarded first prize at the Nelson fair and is valued at $59.

At the Baptist church this morning Mrs. Shanks will sing as a solo "Angels Ever Bright and Fair," by Handel, and the choir will sing an offertory selection. In the evening Miss Irwin will sing "Jesus, My Refuge," by Dankt, and the choir will render "Come Let us Worship.

The footrace at the recreation grounds yesterday afternoon resulted in an easy win for Renwick by about four feet, in 10 1-5 seconds. A large crowd waited from 2 to 3 o'clock to see the contest. Joe Thompson acted as starter, and T. M. Bowman, A. J. Dill and W. H. Smyth as judges. Very little money changed hands.

A meeting is called for Monday evening at 8:30 in the board of trade rooms to form a new conservative organization. The reason assigned by its promoters is that the two executive committees of the old organization exceeded their powers as delegates in forming a union without reference to the original bodies. The new association is to oppose government by dictator or clique.

A meeting of Toronto university graduates was held last evening after the adjournment of the university club. A communication has been received by secretary C. McLean Fraser from A. H. U. Colquhoun of Toronto, inviting correspondence from any graduate, to the commission which is investigating affairs at the university under authority from the provincial legislature. The notice of the meeting was short and the attendance small. It was therefore decided to call another meeting two weeks from last night.

At St. Paul's church this morning the choir will render the gospel hymn, "No Night There." In the evening the anthem "Abide With Me," Meredith, will be the chief musical feature.

The Daily News' Midway correspondent telegraphed last night that the order of court issued to the sheriff of Yale to place the V., V. & E. people in possession of the right of way disputed by the C.P.R., does not cover the land at present in dispute and consequently there was no change in the situation there.

HUME—D. Galt, W. P. D. Pemberton, Rossland; Mrs. Hamilton, J. R Greenfield, R. E. Jameson, E. G. Richardson, W. S. Broderick, Vancouver; W. A. Wilson, Regina; J. A. Taylor, J. J. McManus, Toronto; M. L. Smith, Procter; R. W. Clark, Montreal; A. Lucas, Kaslo.

LAKEVIEW—John Morton, Ferguson.

CONSUMPTION OF COPPER.

London Expert Opinion Concerning Stocks and Values.

A certain amount of nervousness has found expression lately with regard to the possible over-production of copper, says the London Financier. Under these circumstances a communication just received from a gentleman of considerable authority on the Metal Exchange is interesting.

He speaks as follows: "Consumption in Europe has never bee so good as now, and stocks were never so low. The continued decline in our supplies is getting alarming. There are now only 8000 tons in stock in England and France, of which 6000 tons are in bar copper (standard) in England. Out of this over 3000 tons are already sold to consumers, leaving barely 3000 tons as counters for the world's copper market, and most of this will disappear into furnaces during the next three months. Our market is considerably oversold, as shown by the large backwardation. We are very bullish."

To this testimony concerning copper prices in Europe may be added the following cable information from New York, received by a city office from its agent: "Copper very firm; consumption very good. Spot copper scarce, extremely. We look for an advance unless you grow weaker."

REVELSTOKE IMPROVEMENTS

Y. M. C. A. Building Contract Let—A Change in Electric Lighting System

(Special to The Daily News)

Revelstoke, Nov. 11—The Y.M.C.A. building contract was let on the evening of the 9th inst. to John Kernaghow for $6.00. This does not include the excavations or foundation, which are now completed, or heating plans. There was $3000 difference between the highest tender and the one accepted. Work will be begun at once and the building opened in February next.

The Revelstoke Townsite association has decided to donate $50 towards Mr. Deutschman's trip to Boston to attend the celebrated Sports club meeting in that city, where he will deliver an address on the marvellous caves discovered by himself near Rogers Pass, and tributary to this city as an outfitting point. The C.P.R. is also assisting Mr. Deutschman.

Word has been received from the minister of the interior by the parties concerned that their application for a mill site on the Columbia river, where the channel now is, but which it is hoped will make a back water by the diversion work now in hand by the dominion government, has been refused. There were numerous protests made against this application by citizens, who claimed this piece of water, if the river is successfully turned, should be kept for recreation purposes.

Under the provisions of the bylaw voted on last June to expend $20,000 for extensions of water and light service, work has commenced upon the installation of the new electric light plant, and last night at midnight the lights were shut off for two weeks. To run the extra dynamo now to be put in considerably more power will have to be supplied and repairs made involving new wheels and gates. Meters will now be used and the old flat rate abolished.

A painful accident occurred here yesterday. F. A. Julian, who recently completed the contract for reducing the grade at the Green Slide on the Arrowhead branch of the C.P.R., was catching a freight train to his home at Greely creek, but failing in his attempt to board it he slipped and fell, the rear wheels of the caboose passing over his leg, almost entirely severing it. He was at once removed to the hospital for treatment.

CUNLIFFE PAYS THE PRICE

Pittsburg, Nov. 11—Edward G. Cunliffe, the Adams Express robber, was today sentenced to six years in the penitentiary.

DAN PATCH LOWERS RECORD

Memphis, Nov. 11—Dan Patch went a mile today without a wind shield in 1:58, lowering the record by 1 1-4 seconds. Two runners accompanied the pacer.

Conservatives of Nelson

A meeting of conservatives will be held at the board of trade rooms on Monday night at 8:30, for the purpose of considering the advisability of organizing an association that will be free from machine or clique rule.

All conservatives who think for themselves are cordially invited.

Notice to Curlers

The annual meeting of the Nelson Curling club will be held at the board of trade rooms on Tuesday, Nov. 14 at 8 p.m., for the purpose of organizing for the winter's curling and the election of officers of the club.

G. A. HUNTER, Secretary.

KOOTENAY STANDARD CIGAR

IF you are a judge of cigars and know the delicate flavor of a genuine Havana, try a

KOOTENAY STANDARD

manufactured by

J. C. THELIN
NELSON, B.C.

We Challenge You

To duplicate a Wallace tailored suit or overcoat in fit or workmanship. Now don't take our own word for it but come and see for yourself. Remember they are tailored by experts and sharp-eyed inspectors follow its fashions at every turn.

Why some men insist on paying fancy prices for suits and overcoats not a whit better than Wallace suits and overcoats is beyond us to explain.

Fancy tweed and fine worsted suits $10 to $20; plain and fancy overcoats $10 to $20.
