## HURRYING TOGETHER

### Occident and Orient Join at Portsmouth Peace Conference

**Komura Gets an Ovation in United States --No Wish to Transfer Japan Loan to Russia--A Meeting in Paris**

Paris, July 22.—M. Witte called at the foreign office today and held an exceptionally extended conference with premier Rouvier. At noon the two statesmen were still closeted, with indications of their meeting lasting for two hours.

It was assumed from the length of the meeting that a very complete exchange of views was going on concerning the coming peace negotiations and French-Russian interests in general. However, the official entourages declare both ministers observe great circumspection regarding details of their conversation.

It was pointed out that the report established regarding the tranfer of the Japanese loan to Russia as one of the conditions of peace was entirely unwarranted and likely to derange the prospects of a settlement. Such a transaction would arouse a protest from the investing public who subscribed to the loans, many of whom consider that the transfer would be contrary to their interests. They received certain guarantees from Japan and they fear that those given by Russia would not be equivalent.

A TRIUMPHAL PROGRESS.

St. Paul, July 22.—The journey of baron Kamura and the other Japanese peace commissioners eastward from Seattle has been somewhat in the nature of a triumphal progress. At almost every station throughout Montana hundreds of Japanese, of whom great numbers are employed by the Great Northern railway, have welcomed them with hearty "banzais" and with waving of Japanese and American flags and at Whitefish last night with an elaborate display of fireworks.

Baron Komura has enjoyed his trip exceedingly, the somewhat trying heat of yesterday having given away to perfect weather.

At Malta a little crowd of Japanese workmen greeted the commissioners by waving an immense national flag which they had made from white cotton cloth, the emblem (a rising sun) being painted on with red grease paint.

GOSSIP OF GRAND FORKS

Rich Lead Uncovered on the C.P.R. Claim—Progress of Telephone Line

(Special to The Daily News)

Grand Forks, July 22—The new pole line for the Vernon and Nelson Telephone company, that is being built from Cascade to Phoenix, reached Grand Forks yesterday. The line will be completed to Phoenix in a few weeks. The work is being done under the direction of Steve Irwin, an old employee of the company.

Thomas Wiseman, one of the owners of the C.P.R. claim, in this district, is authority for the statement that the recent development work done on this property resulted in uncovering over 100 feet of ore of the same quality as previously obtained. Recent assays of samples take from the old workigs on this claim showed returns of $28 in gold besides a good percentage of copper.

Owing to the exceedingly hot weather J. W. Jones, who has the contract for hauling several million brick to the Granby smelter from the brick yard, has decided to do all his teamig during the nocturnal hours until the weather gets cooler.

H. Burgess, who has acquired a small fortune in farming at Port Elgin, Ontario, arrived here a short time ago for the purpose of locating in this district. He has just returned from a visit to Greenwood and Midway where he spent some days looking over the country. He has finally decided to locate at Grand Forks and will purchase a farm near this place.

O. Johnson, who has successfully managed the Jem restaurant here for the last few years, left yesterday for Midway where he will open another restaurant, also to be known as the Jem.

A very pretty home wedding took place here yesterday at the residece of Thomas Wiseman, the contracting parties being Amanda Loskie of this place and W. Hillier, electrician for the Granby company at Phoenix. The ceremony was performed by Rev. J. R. Robertson. Both the bride and groom are exceedingly popular in this district, which fact was evidenced by the great number of handsome gifts received by the bride. The happy couple left on yesterday's train for Phoenix.

ROSSLAND ORE SHIPMENTS

Close on to 6000 Tons Last Week—Work Started on Crown Point

Rossland, July 22—Te principal feature of the week in mining circles was the leasing of the Crown Point group, owned by the War Eagle, to Eric Stevenson, a veteran miner of the camp, for a period of a year, under a royalty.

Mr. Stevenson has begun operations on the mine with a force of ten men and expects to do well on his lease.

The Crown Point shipped some very high grade ore and considerable of it during the early days of the camp but the vein faulted and although it was searched for during a considerable period it was ot found. Mr. Stevenson thinks he will be able to find the lost lead. While a portion of his force will search for the lost lead the balance will put in their time stoping from some good sized reserves of ore which were left in the mine when operations ceased.

The shipments for the week ending tonight were as follows: Le Roi, 1850; Le Roi milled 210; Centre Star 2250; War Eagle, 1230; Le Roi, No. 2, 60; Jumbo, 300; Spitzee, 60; total for the week, 5990 tons; for the year to date, 137,778 tons.

## MANSON IS THE CHOICE

GOVERNMENT CANDIDATE WINS OUT IN ALBERNI.

RETURNS SO FAR RECEIVED GIVE HIM GOOD MAJORITY.

(Special to The Daily News)

Victoria, July 22.—Although returns have yet to be received from a few isolated polling places the result of the Alberni bye-election is placed beyond all doubt by the substantial lead obtained by Manson, the government candidate, in the chief polling places already heard from. The returns so far received give Manson 243 votes and Aitken 178, a majority of 65 for Manson, and the returns yet to come in cannot wipe out this lead. The result has occasioned no surprise here. All the cabinet ministers, with the exception of Fulton, took an active part in the campaign and thoroughly impressed upon the electors that to be represented by a government supporter during the next two years would be more to their interest than to send down a man to fill a seat on the opposition side of the house. The liberals put up a strong fight, but they lacked organization and funds.

The returns by polling places are as follows.

| | Manson | Aitken |
|---|---|---|
| Alberni | 54 | 36 |
| Bamfield Creek | 9 | 3 |
| Ucluelet | 9 | 7 |
| Clayoquot | 10 | 12 |
| Wellington | 64 | 41 |
| Parksville | 27 | 17 |
| Nanoose | 7 | 9 |
| New Alberni | 11 | 8 |
| Uchucklesit | 7 | 8 |
| Texada | 39 | 20 |
| Clayoquot Cannery | 6 | 17 |
| | 243 | 178 |

## BISLEY PRIZE WINNERS

GREAT SHOOTING BY RICHARDSON OF VICTORIA.

CANADIANS MANAGE TO LIFT MANY GOOD PRIZES.

Bisley, July 22.—In the final stage of the Saint George's challenge cup match today, at 900 yards, 15 shots for each competitor, sergeant Richardson of Victoria, led the Canadians by a score of 66, and private Morrice, of Montreal, was second with a score of 62. Other scores were: Pte. Wilson, Ottawa, 61; sergeant Kerr, Toronto, 60; sergeant Crowe, Guelph, 59; Pte. McConnell, Ottawa, 53.

Sergeant Richardson comes 20th in the total scores, winning £5; Pte. Wilson, 48th, 12s; Pte. McConnell, 69th, 10s.

Captain Stuart won the first prize of 125s in the Brookwood match at 600 yards.

Sergeant Richardson put on 41 out of a possible 50, at the 800 yards range, in the final stage of the king's prize. At 900 yards he scored 36 and at 1000 yards, 40, making his total score for the three ranges 119, added to which is his total score in the first and second stage, 188, getting eight points short of top score, 315, made by the winner of the prize.

Sergeant Crowe's totals were—36 at 800 yards; 40 at 900, and 37 at 1000, together with first and second stages, 185, making a grand total of 298.

Pte. Morrice did well at 800 and 900, scoring 40 and 42, but at the 1000 yards went to pieces, only reaching 19. His total in the first and second stage was 186, and his grand total 287.

Sergeant Richardson came fifth in the king's prize, winning £20; sergeant Crowe 26th, £12, and Pte. Morrice 87th, £8.

Lieutenant Boult came first in the Stickledon competition, winning £20; sergeant Richardson, 14th, £1.

In the Wingrove competition corporal Brasha came 17th, winning £1.

HUNGARIANS THE ASSASSINS

Attempt on Life of Sultan Caused Death of 24 Persons.

Constantinople, July 22.—The commission appointed to inquire into the attempt on the life of the sultan yesterday has reported that the explosion of the bomb caused the death of 24 persons and wounded 57. In addition 50 horses were injured.

The preliminary investigation tends to show that the outrage was committed by two Hungarians.

STREET CAR COLLISION.

Thirty People Are Injured, Five Probably Fatally.

Portsmouth, N.H., July 22.—Thirty people were injured, five probably fatally, in a collision between two electric cars here tonight. The accident happened on a steep grade where the tracks curve.

One of the cars was bound for Haverhill and had on board 125 persons who were returning home after witnessing the blast. The other car carried 40 passengers and was bound to this city.

## TO RESUME OPERATIONS

### Former Montreal & Boston Properties Will Soon be Working Again

**Representative of New Company Now in Phoenix to Complete Arrangements--Ample Funds Provided**

(Special to The Daily News)

Phoenix, July 22.—Exactly two months ago today the last man was laid off at the Brooklyn group of mines in this camp, pending the re-organization of the Montreal & Boston Consolidated, only two being retained to keep the water out of the shafts of the mines. Since then the properties of this company have been taken over by the Untermeyer-Newhouse-Guggenheim interests of New York, and are to be operated under the charter of the Dominion Copper Co., which sold the mines under contract to the Montreal & Boston Consolidated a year ago.

Yesterday the first active step towards reopening the properties was taken when M. M. Johnson, the chief consulting engineer of the interests referred to, arrived here ,with T. W. Drummond, who will have immediate charge of the operations of the company here.

Mr. Johnson who made an exhaustive report on the properties last winter, was not prepared to disclose his plans for the future regarding the properties, but stated that it was the intention to resume shortly . The party was accompanied by H. J. Pemberton, manager of the M. & B. Consolidated.

From other sources it is learned that the $700,000 bond issue, authorized by the Dominion Copper Co. to take up the outstanding indebtedness of the old Montreal & Boston Consolidated and to supply a working fund of $250,000, had been over-subscribed in Toronto, and that the financial end of the new concern is now beyond question. Mr. Johnson is on the board of directors of the company and will have entire supervision of the operations both at the mines and at the smelter. W. C. Thomas, the new smelter superintendent, is expected to arrive daily from Salt Lake Clay, and assume his new duties.

Mr. Drummond has been assistant superintendent of the Highland Boy mine at Bingham, Utah, for some years under Mr. Johnson and is believed to be an excellent man for the position.

While nothing is given out, it is known that it is the intention to reopen the mines at once, also starting the company's two-furnace smelter at Boundary Falls, 20 miles distant by rail, thus taking up the work of mining and smelting where the Montreal & Boston left off on the 22nd of May last. As soon as possible Mr. Johnson is expected to formulate plans for a vigorous campaign of enlargement and exploitation of the company's mines and smelter, and as ample funds are available there will be no delay on that account. This will call for enlarging the output of the mines, increasing the blast furnace capacity of the smelter and the addition of converters.

Mr. Johnson will be a frequent visitor here in the future, and on this trip will remain two or three weeks, getting matters into smooth running order.

## WAS DEFECTIVE BOILER

CAUSE OF DISASTER TO THE BENNINGTON

FLAW HAD BEEN KNOWN TO EXIST FOR WEEKS

San Diego July 22—Examination of the Bennington above did not disclose any great damage. The vessel was covered with a grey coating the color of ashes. Escaping steam carried grey colored mud, which was smeared all over, even upon the sides of the vessel. There were broken gangways and displaced machinery, but no serious damage to the main deck was visible. It is said by those on board that the wreckage was all below, but just how serious will be fully known after a thorough examination is made. This cannot be made until the water is pumped out and the vessel righted.

Commander Young declined to make any official statement for publication. He said, however, to a reporter that he believed the disaster was caused by an explosion of boiler "D" on the port side, and that boiler "B," while not exploding, had been damaged allowing steam to escape.

He expressed the opinion that there was a weak spot in one of the boilers but said there had been no visible defects so far as he knew. The men who were injured say it has been talked of on the ship for at least six months that the boilers were defective, many of them had feared for a long time that just such an accident would happen. The upper deck amidships presented a mass of wreckage. The smoke stacks had been blown out of place and the superstructure is bent and twisted in all sorts of shapes. The plates on the sides are bulging out and leaks in a number of places are letting in water.

John Turpin, a colored ma, of the crew, who was on board the Maine when she was blown up in Havana harbor, was on board the Bennington and again escaped injuries.

Fireman E. G. Hopp gave the first statement as to the cause of the accident. He says that shortly before the explosion one of the boilers was found to be leaking badly and the boilermaker was sent for to repair the damage. Before the latter came the explosion occurred. Hopp saw men about him killed outright and he himself was stunned for a moment.

The dead will be given a military burial on Sunday afternoon at the military reservation at Point Loma.

Little or no progress in the work of rescue was made on board the Bennington this afternoon. The water has risen still higher in the hold and it was impossible to reach the bodies known to be hidden beneath the decks. It is believed that at least 15 bodies will be found in the vessel.

A fire tug with a powerful pump will be used to empty the hold of water and give the workers an opportunity to reach the dead.

Commander Young today requested the chief of police to arrest all members of the Bennington's crew who may be ashore without a pass. In this way commander Young hopes to arrive at a correct estimate of the missing as well as to prevent desertions.

Tonight's summary of the casualties due to the boiler explosion yesterday aboard the gunboat Bennington in San Diego bay, gives a total of 56 dead and 54 severely injured, total 110. A number of men are still missing. Some of these may be dead and probably a dozen of the injured will die of their wounds.

## ABDUL HAMID WAS COOL

BUT THE SULTAN'S ATTENDANTS WERE PANIC STRICKEN.

EFFECT OF THE BOMB THROWING IN CONSTANTINOPLE

Constantinople, July 22.—The bomb thrown by the man who attempted to assassinate the sultan yesterday at the conclusion of the ceremony of the Selamite, smashed the windows of the pavilion of the diplomatic corps. No one was hurt in the pavilion with the exception of a few attendants who were hurt by the flying glass.

The bomb fell short and exploded about 40 yards distant from the sultan. The latter was at the time on the top step of the flight leading from the mosque.

A panic immediately followed among the sultan's guests and the court dignitaries rushed up and implored Abdul Hamid to remain in the mosque. The sultan, however, insisted on proceeding and entered his carriage with a calmness not usually attributed to him and picking up the reins drove himself to the Yildiz palace amid the cheers of the admiring officials.

## GOOD NEWS FOR MIDWAY

BRANCH FROM CURLEW TO BE BUILT IN TWO WEEKS

DISTANCE ONLY 15 MILES AND ROAD ALREADY GRADED

(Special to The Daily News)

Greenwood, July 22—Word comes from Midway that the connection of that town with the Great Northern system at a very early date is practically assured. It is not known whether or not the branch running to Midway will be a part of the main line of the V., V. & E. railway.

A prominent official of the Great Northern has informed a local merchant that the line from Curlew to Midway would be completed within a fortnight. The work of laying the track will begin within a week. As the distance is only 15 miles and the road has been graded within the last few months, the task will not be a difficult one even in the time mentioned.

Already the circulation of the report has caused some excitement in Midway. Property owners who have held on through faith for several years feel that a better era is about to dawn for them. With the certainty of early construction westward by the Great Northern, and the probability of an answering activity on the part of the C.P.R., Midway looks forward to being a railway centre of no mean importance.

NEW METHOD OF COAL MINING

Hydraulic Machine Which Brings Coal Out in Good Condition.

Halifax, July 22.—Charles Forgie, manager of the Dominion Coal Co., will introduce several changes in the mines. At present demonstrations are being carried on at Dominion No. 3 with a hydraulic cartridge machine containing a row of telescopic pistons at one end and a small pump at the other. After the coal is cut out underneath the machine is operated parallel with and near the to pof the roof. The action of the pump forces the water along a tube where it comes in contact with the pistons. There it penetrates the coal in a downward direction, and as the pressure increases the coal begins to fall to the floor. The use of the machine does away with explosives and produces the coal in the best possible condition, with equal speed and greater economy than under the old system.

By the use of this apparatus and with the safety lamps which will replace the "clanny" in the mine, the probability of an explosion will be reduced to a minimum.

PHOENIX OPERA HOUSE

(Special to The Daily News)

Phoenix, July 22—This week the first start on the work of building the new opera house and Miners' union hall here was made, there having been some delay in getting the necessary streets grades. A force of men has started the excavations for the building and the first order for lumber has been placed. The opera house floor will be 45x100 feet in size, with a lodge and hall room above. From now on it is not expected that there will be any delay, and that the building will be rushed to as early a completion as possible, the total estimated cost being somewhere between $8000 and $10,000.

## HAS HALF A MILLION

### Oyama Well Equipped for Coming Struggle in Manchuria

**General Hazegawa, Supported by Japanese Fleet, Threatens Russian Communications South of Vladivostok**

Uridiapudze, Manchuria, July 22.—The Japanese armies at present occupy the position of an immense sickle with the handle reaching from a few miles south of Liaoyang and passing through Chantafu; the blade circling northward toward Kirin at the top of the Korean coast south of Possiet bay.

It is estimated that general Nogi has 80 battalions; general Oku, 60; general Nodzu, 36; and general Kuroki, 160. Averageing these at a thousand men each makes the strength of the Japanese 550,000 bayonets with 2000 field and mountain guns and about 100 siege guns.

The Japanese extreme left is guarded by general Tamarua's cavalry division. The Chinese in the Japanese service are in the centre screened by cavalry under command of general Okihara.

The rains thus far have been less heavy than usual and it will be possible to begin operations sooner than was expected.

Japanese cruisers are making demonstrations along the coast in the rear of the Russian forces in Korea, evidently intent on facilitating the advance of general Hazegawa's force by menacing the Russian line of communication.

## WAR OF THE RAILROADS

KEEN RIVALRY FOR TRAFFIC OF THE NORTHWEST.

C. P. R. INVASIONS OF SPOKANE AND PORTLAND.

Spokane, July 22—The rivalry among the great railroads in the northwest is becoming keener than ever. The Harriman policy for 20 years aimed at centering the oriental trade at San Francisco. For this purpose the Panama and Portland, Ore., routes were discriminated against and their trade dwindled. But San Francisco did not get the growing and rapidly expanding oriental trade for J. J. Hill and the Canadian Pacific captured it and owing to geographical position will retain it. Portland has great advantages as a point of export and two Harriman lines center there, but the Harriman people did not think it wise to build up its shipping business, lest it should interfere with the Pacific Mail monopoly. Now the Canadian Pacific and J. J. Hill are preparing to invade Portland and make use of its facilities for the shipment of grain and coal and lumber to the outside world. The Canadian Pacific cars will be rolling into Spokane next year over the best railroad route across the continent. From Boston to Spokane over the Canadian Pacific will be the shortest, the best and most direct route to the Pacific. From here to Portland a railroad can be built on a down grade along the north bank of the Columbia river. The Canadian Pacific people, it is now thought have agreed with D. C. Corbin, president of the international railroad, to continue his line to Portland, and thus tap the rich preserves of Harriman.

A railroad from Spokane to Portland that would tap the north bank of the Columbia river would be the most direct and best channel of trade to the Pacific ocean. Both Hill and the Canadian Pacific believe that a dozen years hence the United States will cease to export wheat. It won't even raise enough for its own consumption. In that time our population will increase 25,000,000 and our wheat production will diminish rather than grow. Other crops will be more profitable than wheat. The Canadian Northwest will then be the granary of the world and Europe and the Oriental nations must fall back on the Canadian Northwest. From Portland, Oregon, to the wheat fields of the Canadian Northwest is shorter than from New York to Chicago, and it is an excellent grade all the way. Between the Canadian Northwest and Vancouver or Seattle there are ugly grades and expensive railroad operating, and everything points to Portland as the coming grain metropolis of the world. This is why J. J. Hill and the Canadian Pacific are struggling to get into Portland over their own lines. At present Harriman controls the only direct line to Portland down the Columbia valley. Under the community of interest plan Hill and the C. P. R. are shut off from encroaching on Harriman's preserves, but independent capitalists have projected and are building a new route to Portland, which in the natural sequence of events will fall under the control of either J. J. Hill or the Canadian Pacific.

It must also be remembered that the Crow's Nest coal fields are among the best and most extensive in the world. The day the Canadian Pacific enters Spokane the entire fuel supply of the empire, drained by the Columbia river, will come from the Crow's Nest. The quality of the coal more than offsets the duty, and Portland and Oregon will buy coal from Canada and not from Wyoming or Washington. J. J. Hill sees this and already he has built a line to tap the Crow's Nest coal fields.

Hill does not like the design of the Canadian Pacific on Spokane or Portland. A line to Portland or an alliance with Harriman would give Hill infinite trouble. The Canadian Pacific's fixed charges are so low and its capitalization so light that it is able to do business cheaper than almost any other railroad. Besides it rests on both oceans and touches the Great Lakes at a dozen advantageous points, and it sails its own fleets on both oceans and the Lakes. Its facilities for profitable business are therefore the best of all the great railroads. Besides there are no leakages or grafts on this wonderful system.

As long as J. J. Hill lives there will be no grafting off his Great Northern railroad. The stockholders will get what the railroad earns, but after Hill who can tell whether it is the deluge or not, one son, Louis Hill, bids fair to do great things, but the gods don't make the sons of great men great. If they did there were little chance for the poor man's son, but in all human probability the policy that has upbuilt the Canadian Pacific will be perpetuated for centuries. It is really a national railroad. Every Canadian likes to own a share of its stock or bonds.

Sir William Van Horne and sir Thos. Shaughnessy have guided its destinies during almost a generation and they guided it because they pursued a policy that aimed apparently at the best interest of all the people of Canada, rather than at increased dividends.

But J. J. Hill and sir Thomas Shaughnessy have grown great in the railroad business, cutting out curves and diminishing railroad grades and finding capable men to win or create traffic or operate the lines with the maximum of efficiency and at the minimum of cost. It is curious that sir Thomas Shaughnessy is of American birth and J. J. Hill a Canadian, but the parents of both were born in Ireland. The two men are somewhat alike but J. J. Hill has far more traits of the Irishman than sir Thomas. Hill is fiercely intolerant of stupidity, incapacity or of inattention to business. There is no resting place for a fossil in the Hill system. Every employee must be capable and efficient or he severs his conection with Hill. Hill can be the most excellent of good company when he wants to be, but he can play the bear as effectually when it suits his purpose.

Shaughnessy on the other hand is the most painstaking and tolerant of great executive officers that probably lives. He has a kind thought and a cheering helpful word for every employee of the vast transportation system under his control. His aim is a correction rather than punishment and this wonderful system as a consequence is run with amazing success and harmony.

There is no doubt but that J. J. Hill fears the competition of the Canadian Pacific.

Its purchase of the Soo made an immense inroad into Hill's territory, and its entrance to the Inland Empire of the Columbia river country has aroused something like resentment in J. J. Hill's mind. As a result Hill has invaded British Columbia, and is spending millions to get the traffic of its coal mines and its copper. All this of course is hailed with delight by the people, but the real truth is there is not a line of electric or steam railroad built in this wonerful country that is not or will not soon prove a profitable investment.

CANADA CUP.

Trials For Selection of Defender Are Starting.

Rochester, N.Y., July 22.—In a blow of 18 miles an hour that held full and strong, Iroquois, the Herreshoff designed candidate for the defense of the cup today defeated her two rivals Kee-Lex II, and Rochester, by a substantial margin.

The starting gun for the next race will be fired at 10 o'clock on Monday morning. This was the first of the trials.

BURSTING OF A FLY WHEEL

Destroys a Rail Mill and Injures a Dozen People.

Cumberland Md., July 22.—The flywheel at the Maryland rail mill burst this afternoon, a section with a spoke, weighing over a ton, going through the roof, striking the main girders and causing the roof to collapse, tearing down half the mill.

The last trick was about to be completed. About 25 men were caught under the roof but none were killed, although at least a dozen were injured, three seriously.

THE CITY'S CASE.

No Decision Given and Judge Leaves For the Coast.

At the conclusion of the Providence cases yesterday afternoon, Mr. justice Irving said: "I am sorry to announce that my time has been completely taken up with the consideration of these cases and I have been unable to prepare my judgment in the case of the Power company against the City of Nelson. I will endeavor to hand down my decision at the earliest possible moment."

His lordship left for Victoria on last evening's C. P. R. train.

## NO PEACE IN SIGHT

### Autocracy and Orthodoxy Against all Zemstvo Reforms

**Moscow Congress Votes for Representative Institutions--Procurator of Greek Church Condemns all Such Progress**

Moscow, July 22.—The final meeting of the zemstvo congress today adopted a motion made by prince Doltorouki that the bureau be granted power to call to the next congress representatives from the outskirts of the empire and from places where zemstvos are not held, and also from various agricultural and financial societies. The bureau is further authorized to enter into an agreement with various organizations. After arranging for financial support by taxing delegations, a proposal to invite peasants to the congress was adopted.

The congress unfavorably received the suggestion that workmen's organizations be invited, and referred the matter to the bureau.

On motion of prince Shakofaskoy it was decided to organize assemblies throughout the country and submit to them the conclusions of the congress respecting the scheme of minister of interior Bouligan.

St. Petersburg, July 23.—"Russia is not yet ripe for parliamentary institutions. The nation lacks both leaders and education in local self-government."

This is the view of Constantine Petrovitch Pobiedonostoff, procurator general of the holy synod, who for two generations was one of the moving spirits in Russia's internal policy, and in his old age, and in a flood of western ideas, holds steadfastly and honestly to his faith in autocracy and orthodoxy.

M. Pobiedonostoff, who received the Associated Press representative at his home in the Tsarskoe-Selo today, appeared to be in no wise shaken by the attempt made on his life, and discredits that event, saying that his assailant passed so close to his front that he almost brushed him, and then drew a repeating pistol but was instantly seized by another passenger from the train.

"The causes for the attacks on me," said the procurator general, "lie in ignorance and dishonesty; ignorance of the fact that for 10 years I have had no influence in legislation, and dishonesty of the most dastardly sort, because of unpopular measures and policies with which I had nothing to do, being intentionally credited to me."

Passing to a frank discussion of the present reform movement, M. Pobiedonostoff declared that reformers were largely theorists who were attempting to fit the cloth of western institutions to a nation having its own peculiar and distinctive ideas and institutions.

"Whatever the outcome of the present movement may be," he said, "there will be more agrarian disorders and uprisings, like that headed by the rebel Cossack Yemelian Pgatichieff, and more mutinies and rebellions."

BALFOUR WILL NOT RESIGN.

Majority of Ministers Opposed to Any Such Course.

London, July 22.—The despatches of the Associated Press indicating that the British cabinet decided at yesterday's cabinet meeting not to resign are definitely confirmed.

The advisability of an autumn dissolution is still under consideration by the cabinet and it seems that the majority of the ministers are opposed to it, especially now that the chief government whip has received an assurance that there will be no further slackness in attendance by the absentees who were responsible for Thursday's defeat of the government.

NANAIMO STRIKE SITUATION

Nanaimo, July 22—Ralph Smith, M.P., has received a telegram from the deputy minister of labor, W. L. Mackenzie King, stating that the United Mine Workers had accepted the department's offer of intervention, but the colliery company had wired that the only question at issue between the Western Fuel company and some of its miners was the recognition of the United Mine Workers of America, which the company will not accede to and that it feels that nothing can come of intervention.

John L. Howard, president of the company is in town but has nothing to say for publication. The United Mine Workers distributed their first strike pay yesterday, several thousand dollars being paid out to the strikers.

MEMORIAL DAY.

Russians Remember St. Petersburg Riots of January 22.

St. Petersburg, July 22.—Today was widely observed by the working classes and liberals of St. Petersburg and many other parts of the empire as a memorial day for those killed in the disturbances of January 22, six months ago. No reports of serious disorders were received. Many factories in St. Petersburg were closed all day.

We are just unpacking a shipment of

### THE PROVIDENCE LITIGATION

The result of Mr. justice Irving's decisions in the Providence Mining Company cases, delivered at the close of the trials yesterday afternoon, is to restore the control of the company's affairs to those representing the majority interests, from whom it had been improperly taken by entirely discreditable means.

It would have been a grave misfortune if on account of legal technicalities, the learned judge had been obliged to come to any different decision.

Without discussing all the legal aspects of the case, it must have been quite apparent to anyone following the evidence given, that in October of last year, when disputes as to the management of the mine and the control of the company came to a head, a friendly settlement was made, by which the control of the company passed into the hands of six out of the nine directors constituting the board. These six men represented a majority of the stock then issued, and apparently the agreement was unanimously entered into, after much discussion, in absolute good faith. Pursuant to the understanding then entered into, a formal meeting of directors was called for May 25th, and due notice was given to all the directors. At the meeting held on the 25th the Chicago men, with one exception, were present, having come out west for the express purpose. A program providing for the next six or twelve months' operations was agreed upon, the meeting adjourned and the eastern men returned home. Hardly were their backs turned when three of the local drectors representing the minority interests called a "clandestine" meeting with "indecent" haste, and proceeded to undo everything accomplished at the regularly held previous meeting. Then a determined fight was made to oust the majority interests by means and in ways that can not be said to reflect credit on those who employed them, no matter what their motives may have been.

Mr. justice Irving's findings set aside all these improper proceedings and those representing the majority interests have been restored to full control of the company's affairs.

The litigation just terminated, whilst disclosing much that was very objectionable, will not be without its useful lessons. American investors will realize that the British Columbia courts provide adequate protection for their interests and that no toleration is shown in this province for schemes to deprive non-residents of their just rights in the control of mining undertakings in which they have been induced to embark their capital.

## Eyeglass Comfort

Our Finch mounting resembles a spectacle without the unsightly temples, for which are substituted four discs, firmly, yet comfortably grasping the nose, giving the appearance of an eye glass and the comfort of a spectacle. Eyes tested free by our graduate optician.

### EDITORIAL NOTES

Discussing the question of the indemnity Japan is likely to demand of Russia, Mr. Eltzbacher in the Nineteenth Century estimates that Japan has borrowed £116,500,000 for the purposes of the war, and it will take £30,000,000 to establish provision for its wounded and bereaved victims; commercial losses may be placed at £15,000,000, and £20,000,000 may be accounted for under the head of "miscellaneous." This makes a total of £181,500,000. "Germany took from France four times more than the actual costs of the war, and, following Germany's precedent, Japan is perfectly justified if she claims a round £200,000,000 from Russia, and employs the balance above her actual outlay and losses for the peaceful development of Japan and especially of Korea, where railways, harbors, telegraphs, roads, schools, industries, etc., have to be created, and where good government has to be introduced."

One of the leading London weeklies, whose foreign intelligence is usually reliable, states that from a special source, which of course it cannot indicate, it has received information which goes to prove the truth of the reports as to the czar's complete breakdown under the stress of domestic disorder and imperial disaster. His mental state today is very much what it was inaccurately said to be before the war. He has now become a victim to his nerves; he trusts no one, not even himself, and his decisions and indecisions are both excused by him on the ground that his account now is with God alone. That revolution must come is the belief of many who have had the opportunity recently of witnessing the condition of things prevailing alike in the palace and throughout the country. When it comes the opinion of those in a position to know is that the Finns, the Poles, the Georgians, and the powerful Asian tribes will seek to throw off the Russian yoke. In that event the limits of Russia will, in the near future, be sharply contracted, not only in the far east, but to the southwest and northwest as well. There is no suggestion that Russia will become a republic; that is politically unthinkable.

The Toronto Globe's Ottawa correspondent says that the long-talked-of changes in the dominion cabinet may be loked for about September 1st. They are said to involve the retirement of Mr. Fitzpatrick, sir Richard Cartwright and Mr. Scott. Mr Fitzpatrick will likely succeed chief justice Routhier at Quebec, although he could, if so desirous, become chief justice of the supreme court. But he and his family prefer to live in Quebec. If Mr. Aylesworth can be persuaded to enter the cabinet he will be the new minister of justice. For a constituency, if he has no objection on the score of distance, Gaspe is at his disposal. Mr. Lemieux was elected to Gaspe as well as Nicolet, and will choose to sit for the latter when the protest filed against his return has been withdrawn. When Mr. Scott goes out Mr. Lemieux will be appointed secretary of state, and either Mr. Hugh Guthrie or Mr. Leighton McCarthy solicitor general. Mr. Arch. Campbell's name is freely mentioned as sir Richard Cartwright's successor.

Vancouver News-Advertiser: — The success attending fruit culture in the Nelson district, for long considered simply a mineral country, is another instance of the wonderful resources of this province and the new industry should do much to assist in building up that part of British Columbia.

### WINS KING'S PRIZE.

But English Winner Did Not Touch Record of Pte. Perry of Canada.

Bisley, uJly 22.—The king's prize, at the annual meeting of the National Rifle Association, was won today by armorer sergeant Comber of the Second East Surrey Regiment, with a score of 315. This is materially lower than last year's aggregate when private Perry of Canada carried off the trophy with a score of 321.

King Edward himself was present on the range to see the final stage of the contest for his gold medal which he personally presented to the winner.

In the king's prize competition sergeant Richardson, of Canada, won $100 with a score of 307, and sergeant Crowe, also of Canada, won $60 with a score of 299.

### EDINBURGH DEGREES.

Conferred Upon Eminent Transatlantic Professional Men.

Edinburgh, July 22.—Among the degress conferred at a special graduation ceremony at Edinburgh university today, that of Doctor of Laws was conferred on professor Cameron of Toronto university; professor Sheppard of Montreal, and professor Wm. Williams Keen, the eminent surgeon of Philadelphia, all of whom are attending the celebration of the quarter centenary of the Royal College of Surgeons.

Professor Keen ,speaking in behalf of the American recipients of honors, remarked that transatlantic graduates all regarded Edinburgh as their academic Jerusalem.

James Band, proprietor of the Grove hotel, Fairview, has had that favorite summer resort nicely fitted up. It is conveniently located within half a block of the street car line and good meals and the best of liquors and cigars make it a popular house of call. Drop in any time when passing and sample some of those choice thirst quenchers always on tap.

### LORD CURZON SERIOUSLY ILL.

Simla, July 22.—Viceroy Curzon, who has been in ill health for some time, is now confined to his bed.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder is better than other powders, as it is both soap and disinfectant. 34

## NEWS OF SANDON CAMP

### LONE BACHELOR IS SHOWING UP FINE AND WILL BE BIG MINE

### SEVERAL LEASEHOLDERS ARE DOING REMARKABLY WELL

(Special to The Daily News)

Sandon, July 22—The Surprise mine is being worked again by the owners. Operations will commence by continuing the Last Chance tunnel and driving a considerable distance to gain depth on the Surprise vein. It is understood that the property will be operated through the Last Chance workings.

About 14 men are now being employed on the Mountain Con mine by the owners. An exceedingly rich strike of high grade carbonates and galena was lately made in the mine and Messrs McLeod and Thompson claim to have more rich ore in sight htan they can ship out this season.

The Lone Bachelor group under lease to Harry Lowe and partners of Three Forks, is showing up in good shape. There is plenty of good galena which was recently reported, in sight, and the lessees have just encountered a large body of high grade carbonates. They have one car of oe ready for shipment and several will shortly follow. Five men are being employed taking out ore. This promises to emeboe a great mine.

The Wonderful is again being operated under lease by Hendrickson brothers. The leasing system is becoimng a great factor in the development of the camp as shown by the many recent rich strikes, and most of the parties leasing properties here are doing extemely well. Altogether the outlook for the camp is very good.

### OVER THE HALF MILLION.

Boundary Mines Are Still Cutting Their Own Record.

(Special to The Daily News)

Phoenix, July 22.—The Boundary ore shipments now run over the half million ton mark for 1905. The following is the output for this week: Granby mines to Granby smelter, 11,342 tons; Mother Lode to B. C. Copper smelter, 2,912 tons; Emma to Nelson smelter, 297 tons; E. P. U. to B. C. Copper and Trail smelters, 50 tons. Total for week, 14,601 tons; total for year to date, 506,844 tons.

The Boundary smelters treated as follows this week: Granby smelter, 11,540 tons; B. C. Copper smelter, 2,102 tons. Total for week, 13,642 tons; total for year, 517,982 tons.

### BEERBOHM TREE'S COMEDY

"The Highwayman or Captain Swift," was first produced in London by Beerbohm Tree and enjoyed an extraordinary run, both there and in New York, where it was *subsequently introduced by Maurice Barrymore.* For the first time in Canada this play is now being produced by the Sherman-Platt company who will appear in it both tomorrow and Tuesday nights. Captain Swift will be taken by Mr. Hayden Stevenson and Mrs. Seabrooke by Miss Georgia Francis.

On Wednesday and Thursday the company will produce "Moths" and on Friday and Saturday "Henrietta."

BUY IT NOW

Now is the time to buy Chamberlain's Colic, Diarrhoea and Cholera Remedy. It is certain to be needed sooner or later and when that time comes you will need it quickly. Buy it now it may save life. For sale by all druggists and dealers.

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal.

## The Leckie Boot For Boys

We make a great Boot for Boys —"strong as a horse," as the little chap would say.

A bit stylish too—just as stylish as a Boy cares for.

When a Mother picks up one of our Boy's Boots she knows, at a glance that she has struck her ideal at last. She'd be willing to pay more money than she's been paying for eastern made boots, but she don't have to.

All reliable dealers have them.

## NEED NOT FEAR B.C. LAWS

### M. F. MADDEN SAYS OUTSIDE INVESTORS ARE FAIRLY TREATED

### PROVIDENCE MINE DEVELOPMENT WILL PROCEED AT ONCE

Mark F. Madden of Chicago president and managing director of the Providence mine at Greenwood, was seen last evening by a reporter of The Daily News and asked the intentions of the company with regard to the future work. He said: "We shall immediately equip the mine with thoroughly modern machinery and carry on the development work that is already well begun. The mine will be operated with due regard to economy as well as efficiency.

"Our first aim however, will be to find out exactly what we have. The past operations, on which I don't wish to make much comment now, have ot shown us that very definitely. But we believe we have a mine and we shall not spare any money required to prove it.

"In the short time M. Dermody has been in charge he has found the lead south of the break. That is really the most valuable part of the mine, and it is on that that most of the future development will be done.

"I don't want to comment at all on the case just concluded. But I would like to say as emphatically as possible, that my experience has proved to me that outside investors need have nothing to fear from the courts of British Columbia. I shall be pleased to assure my friends in the east of that fact. I can assure them all that the laws of British Columbia are just and are justly administered.

"Naturally I am pleased at the success of my first venture in mining for my own sake and that of my friends who have come out here at different times to see me through did so at sacrifices to themselves that can hardly be measured by money. I am very glad that I am now able to prove to them that money can safely be invested in British Columbia."

Mr. Madden and Mr. Heeney will remain in Nelson until tomorrow evening.

### THE POWER OF STEAM.

**Many May See But It Takes Genius to Realize.**

When James Watt saw the steam causing the kettle lid to jump up and down he said "There must be power in that steam that it can lift such a weight."

There was.

Millions prior to him had seen the same phenomenon and regarded it as an unexplained mystery.

Recent scientific research has put its finger on the "cause" of Dandruff, Falling Hair, and consequent Baldness, and has unearthed a tiny germ which eats the life from the roots of human hair.

Newbro's Herpicide destroys this germ and consequently restores the hair to its natural state.

Sold by leading druggists. Send 10c, in stamps for sample to The Herpicide Co., Detroit, Mich.

CANADA DRUG & BOOK COMPANY Special Agents.

## REPRIMAND JUVENILES

MAGISTRATE WARNS BOYS AGAINST VICIOUS HABITS

TWO OLD OFFENDERS IN TROUBLE—BOTH CONVICTED

The adjourned session of the provincial police court was held yesterday morning at 10:30 in chief Bullock-Webster's office. Stipendiary magistrate E. A. Crease and W. A. Jowett, J.P., presided.

The cases of Mark Hartman and Louis Whitmore, charged, on the information of J. A. Kelly, with damaging a cherry tree, were called. Two penitent lads pleaded guilty. Charles Archambault and Louis Jacquemin, charged with stealing cherries, also pleaded guilty.

The magistrate questioned the lads on their knowledge of crime and its punishment, and found that they were thoroughly aware that they were doing wrong at the time. They were then given much wise and kindly advice as to their future conduct. The magistrate warned them of the inevitable serious consequences of persistence in violating other people's rights or appropriating other people's property. They were then allowed to go with a warning as to the treatment they would receive for a repetition of the offence.

The body of Joseph D. Downes, alive, was produced by the provincial police force. The charge of stealing roses from the garden of J. A. Kelly on July 12th, was read and the prisoner entered a plea of "Not Guilty." J. A. Kelly, the first witness for the crown deposed that on July 12 he saw the prisoner climb his fence, bite a large number of roses off a bush, gather them in his arms and decamp.

At this point the proceedings were informally interrupted by the prisoner himself with the cheerful suggestion "I guess 30 days will do me."

The suggestion seemed good to the court and Nelson's ex-pound keeper returned to his old quarters.

Another old offender, who has not graced a Nelson courtroom for several years, was then called. Miss Margaret Duffy, who once managed a restaurant and slot machine in Nelson, was accused by James Band of the Grove hotel, in Fairview, of having been drunk and disorderly in his premises on July 12. She admitted the facts and a conviction was recorded. She was remanded for judgment until Monday to give her an opportunity to leave Nelson and its suburbs.

### CHURCH SERVICES

Anglican—St. Saviour's church, corner of Ward and Silica streets. Fifth Sunday after Trinity; holy communion, 8 a. m.; morning prayer and holy communion, 11: children's service, 2:30 a.m.; evensong, 7:30. Rev. Archdeacon Beer of Kaslo, will preach at both services.

Catholic—Church of Mary Immaculate, corner of Ward and Mill streets. Low mass at 8 a.m.; high mass at 10:30 a.m.; evening service, 7:30 p.m. Rev. Father Althoff, priest.

Salvation Army—Barracks on Victoria street, west of Josephine. The following services will be held today: Knee drill, 8 a.m.; holiness meeting, 11 a.m.; a praise meeting at 3 p.m.; Salvation meeting at 8 p.m.

Baptist church—Stanley street, near Mill. Morning service at 11 a.m.; evening service at 7:30; Sunday school, 10 a.m.. Rev. E. H. Shanks, pastor. Morning topic, "The Lord's Touch"; evening subject, "The Water of Life"; anthem, "The Great White Throne."

Presbyterian church—St. Paul's, corner of Victoria and Kootenay streets. Morning service, 11 a.m.; 12.30 Sunday school; 7:30 evening service. Rev. J. T. Ferguson, pastor.

Methodist church—Corner Silica and Josephine streets. Morning service 11; Sunday school, 2:30 p.m.; evening service, 7:30. Rev W. W. Baer, pastor.

### ONE DOLLAR SAVED REPRESENTS TEN DOLLARS EARNED

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. This being the case he cannot be too careful about the unnecessary epxense. Very often a few cents properly expended, like buying seeds for the garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic, Cholera and Diarrhoea Remedy. It costs but a fe wcents but a bottle of it in the house often saves a doctor's bill of several dollars. For sale by all druggists and dealers.

### SCULLING CHAMPIONSHIP

Stansbury Wins from Townes and Both are Coming to New Westminster

Sydney N.S.W. July 22—The world's sculling championship was wrested from George Townes by James Stansbury on the Parramatta river today in a race over the championship course. Stansbury won by two lengths. The stakes were $2500 a side.

New Westminster, July 22—On receipt of the Associated Press report that Stansbury had defeated Townes for the single sculling championship of the world, manager Keary cabled Stansbury offering him the inducements which it was previously understood he would accept to defend the title here during the first week of the Dominion fair which opens on September 27. Townes will also be allowed the same amount of expenses as if he were still champion.

### LEAVE FOR PORTLAND

Crew to Represent Nelson in Regatta Starts This Morning

The crew chosen to represent Nelson in the exposition regatta at Portland leaves this morning by way of Spokane. The members are Harry Bishop bow; Roy Sharp, 2nd; Archie Bishop, 3rd; F. Nott stroke. Their average weight s only 133 pounds. The boys are all in good form and promise to give a good account of themselves. They will not take a shell as they have kindly been offered the use of one by the Potland Rowing club.

The regatta will last two days, July 28 and 29 that is, next Friday and Saturday. As the boys will arrive in Portland on Monday night they will have plenty of time to get used to the course before their first race. Crews from Portland, Victoria and Vancouver will also compete.

### CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY—THE BEST IN EXISTENCE

T. M. Wood, manager of the White county News, Beebe, Ark., is a representative southern business man, who does not hesitate in expressing his good opinion of a well known remedy. He says: "It gives me pleasure to recommend Chamberlain's Colic, Cholera and Diarrhoea Remedy, having used it myself and in my family with the best results. In fact I believe it to be the best remedy of the kind in existence." Sold by all druggists and dealers.

## NEW YORK FASHION LETTER

New York, July 22—There are many forms of summer neckwear seen nowadays, the ostrich feather and marabout scarfs and cravats which take the place of winter furs; the scarfs and stoles and little capes of chiffon, lace, etc., but the tulle ruche in particular has caught the Parisian fancy. It is merely an extravagant ruche of tulle worn close about the throat in pierrot fashion and finished at the ends by long loops and ends of ribbon, but it is not an inexpensive trifle if bought at a good place and well made, for it requires a surprising amount of tulle.

Even if a woman can make it for herself, the amount of material required brings the cost up to a considerable sum, and the scanty ruches of inferior tulle sold cheaply are neither smart nor practical, for they are much more perishable than the ruche of better quality. The latter are perishable enough and in their freshness lies their chief charm. Many women own a dozen of these ruches, matching various frocks and hats, for the ruche should be a part of the costume with which it is worn, but a fluffy white ruche will do duty with many summer frocks and almost always frames a face becomingly. Scarfs of tulle shirred and frilled and of three yard length are also made to match costumes, and scarfs of antique muslin are delightful accompaniments for thin summer frocks.

This antique muslin has become a mania and every woman who has a bit of it is pressing it into sevice as trimming. Unfortunately the idea is abused, as are most fads, and one sees in evidence dirty, worn pieces of embroidery which, though they may have been exquisite at one time, are not worthy of resurrection.

Antique linen is another fad, but this does not, like the antique muslin, actually mean old material, nor is the work on it old work. If one has the old hand spun linen, so much the better, but many of the French models in this material are by no means old. The linen selected must be as nearly as possible like the old linen, thick, coarse, firm, but very even and soft, without stiffening. Worked in open English open work embroidery or in a mixture of plumetis (satin stitch) and open work, this linen is used for everything from frocks and coats to parasols and hats.

Exquisite robe patterns in the embroidered linens are offered at prices reasonable, in view of the work lavished upon them, and now these prices are dropping to the bargain point. More expensive, of course, are the frocks embroidered to order, and a compromise is often effected by using the all over by-the-yard embroidered linen, combined with embroidered motifs and trimmings or with plain linens.

Take for example a charming French frock of all over linen embroidery of the English type. The linen is absolutely without stiffening, and the bodice front is softly draped, the drapery being caught up on the left shoulder by a knot of strawberry velvet. A line of inset lace borders the left front, running from shoulder to girdle, and inside it are set buttons of strawberry velvet. Short puff sleeves finish about the elbow in a close fitting cuff of lace and a fold of velvet. The full skirt has a lace trimmed flounce. The frock is not ornate in line and general effect, yet it is dressy enough and smart enough for any daytime social function.

Another pretty gown of which the same may be said, is made with a long coat of all over embroidery or linen, trimmed in plain linen, and is worn over a skirt of sheer Indian linen.

The colored linens especially in the new blues, crushed pinks and light yellows are much used by the Parisian makers, but on this side of the water white and the pale mastic and biscuit shades have the preference. Openwork English embroidery frocks of elaborate character are made up over silk, but in the smartest models there is an interlining of fine unstiffened muslin, the effect being much better than that of linen and silk in juxtaposition. In bodice and skirt costumes a separate princess slip of silk is often used and the muslin lining is made with the embroidery outside.

Guipure, Irish crochet and heavy embroidery motifs are applied to plain linen or to linen embroiderd all over in single eyelet holes, and with these heavy trimmings lighter laces are often mingled. A handsome frock of the this description consists of a skirt, fitting closely over the hips with a front panel of heavy inset guipure narrowing at the waist and hips, and widening as it descends.

Around the sides and back are set two shaped flounces, each headed by a narrow line of guipure in trailing garland design. These flounces lay so loose to the skirt that the effect is almost that of a double skirt trimmed by lines of lace, and the flounces are much deeper at the back than where they start, at either side of the front, so that the lines of lace curve upwards sharply towards the back. Heavy lace is set into the tops of the short sleeves in tabbed cap fashion and form the pointed yoke of the blouse, while below the yoke a line of narrow lace is set. Soft Valenciennes may be used to soften the lines at throat and elbow, still leaving the whole effect one of most elegant severity, of elaboration far removed from fussiness.

A linen bolero and skirt plain in line, with heavy raised embroidery borders and fine trailing raised and openwork embroidery running from these borders into the body of the skirt and cont, is a useful and attractive costume and all sorts of coat and skirt costumes in embroidered linen are well liked provided they are smartly made and have the necessary note of elegance. Better a frock of plain linen than a shoddy and pretentious one of embroidered linen but the embroidered linen gown at its best is the height of the mode for certain occasions.

ESTELLE CLAIREMONT.

CHOLERA INFANTUM

Child Not Expected to Live from Hour to Hour, Colera, and Diarrhoea Remedy.

Hour, but Cured by Chamberlain's Co-Ruth, the little daughter of E. N. Dewey of Agnewville, Va., was seriously ill of cholera infantum last summer. "We gave her up and did not expect her to live from one hour to another," he says. "I happened to think of Chamberlain's Colic, Cholera and Diarrhoea Remedy and got a bottle of it from the store. We kept on giving it and before she had taken half of one small bottle she was well." This remedy is for sale by all druggists and dealers.

It will pay you to keep Chamberlain's Colic Cholera and Diarrhoea Remedy in your house. It only costs a quarter. Sold by all druggists and dealers

CIVIL ENGINEER
DOMINION AND PROVINCIAL LAND SURVEYOR

Agent for obtaining Crown Grants, mine surveying, etc.

Room 16, K.W.C., Block P. O. Box 1 Nelson, B.C.

Synopsis of Regulations for Disposal of Mineral on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on the gross output.

Quarts—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notice, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper in the Yukon territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products of the location.

Placer Mining—Manitoba and the N.W.T. excepting the Yukon Territory—Placer mining claims generally are 100 feet square; entry fee, $5; renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N.W.T., excepting the Yukon Territory—A free miner may obtain only two leases of five miles each for a term of twenty years renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or may receive entries for bar diggings or bench claims except on the Saskatchewan River where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental $100 per mile for the first year and $10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1000 to 2000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a Mining Recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1000 feet in length, and if the party consists of two, 1500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and a half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 1920 acres for such period as he may decide, the length of which shall not exceed three times the breadth. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well, will be sold to the prospector at the rate of $1 an acre, and the remainder of the tract reserved, namely 1280 acres, will be sold at the rate of $3 per acre, subject to royalty at such rate as may be specified by Order in Council.

W. W. CORY.

Deputy of the Minister of the Interior.
Dept. Interior, June 30, 1904.

## MADDEN FACTION WINS

OBTAINS SWEEPING JUDGMENT IN PROVIDENCE CASES.

MAJORITY SHAREHOLDERS NOW CONTROL COMPANY.

The Madden or Chicago faction won a decisive victory before Mr justice Irving yesterday, when on the conclusion of the trial of the third and fourth actions, which were heard together, his lordship gave judgment in all four suits, sustaining the position taken by the eastern shareholders in all four cases. With the exception of holding that W. A. Macdonald, K.C., was the solicitor of the Providence Mining Company and as such could not qualify as a director, all the findings of the court are in favor of the Madden faction, and the discomfiture of the local party is complete.

In giving his judgment his lordship regretted the fact that he could not spare a little more time in rendering his decision. It was clear, however, that matters at the mine required immediate attention in the best interests of the shareholders, and therefore he decided to announce his findings at once. There were a good many discreditable things in the evidence and he would have liked to have set them out in his judgment and commented upon them at some length, however, the public had been made pretty well aware of what had occurred and they could form their own opinion.

Here and there in his judgment, the learned judge stepped aside to comment, as will be seen in the appended extracts given, and his findings of fact speak for themselves. It was stated that when Mr. Macdonald consented to act as a director in October of last year his position as solicitor for the company was well understood and he only consented to act upon the understanding that his appointment, which was with a view of arriving at a settlement of pending differences, should be unanimous and any technical objections waived. The court has held, however, that he was not eligible. The holding in this respect, will have no material effect upon the general result, which, as stated, is entirely favorable to the Madden faction, and leaves them in control of the Providence company, and the mine. The Dimond fraction deal has been turned down and generally, the position of affairs will be very much the same as it was on May 25th last, before the revolutionary tactics employed by the local and minority party at the directors' meeting on June 12th, were adopted.

When the court opened at 9.30 yesterday morning, the trial of the third Providence case was continued, counsel agreeing to dispose of the fourth and last action with the evidence taken in the third, and any additional evidence deemed necessary. This meant that the end of the trials was in sight, and put court and counsel in high good humor, counsel vieing with each other in removing all obstacles and so ensuring an early closing of the struggle which has been in progress since Tuesday last.

Mr. Martin called Henry B. Fuller, who said he was a former secretary and director of the Providence company. He was present at the directors' meeting of May 25th last. The local directors at that meeting made a strong protest against several of the resolutions then carried. The local men were in the minority, and could not prevent the resolutions being adopted.

No formal vote was recorded against the resolutions. After identifying some letters from Scully of Chicago, one of the directors, to witness, Peet and Scully, Mr. Fuller admitted to Mr. Davis that when the meeting of June 12th was held, several protesting telegrams from absent directors were read. The chief objections raised at the meeting of May 25th were to the purchase of machinery and the issuing of stock to pay for it.

W. M. Macey told Mr. Martin that on July 7th in Greenwood, Fitzgerald, one of the Chicago directors said to witness that the object of issuing the stock to pay for the machinery was to obtain control of the company for the Chicago men. This was said openly before the others. He the witness was a partner of W. M. Law's.

J. B. Heeney on being re-called denied hearing Fitgerald make the statement credited to him by the previous witness, although present at the meeting.

After some argument the fourth and last case was gone into very briefly. This was an action by Law and the local directors against Madden and the other Chicago men, to restrain the sale of the 2000 shares of stock for machinery and to restrain Madden and Macdonald from acting as directors. Mr. Martin appearing for the plaintiffs, and Mr. Davis for the defendants, other than the Providence company for whom R. W. Hannington appeared.

Mr. Martin called John P. McLeod, barrister of Greenwood, on some formal points, and Mr. Davis called no witnesses.

Counsel then addressed the court briefly and at the conclusion of their argument Mr. justice Irving announced that he would at once give judgment in all four cases.

In Madden vs. Law, the first case heard, his lordship, after reviewing at length the evidence adduced and noting that the padding of the pay roll and the issuing of bogus cheques was admitted, said:

"I find in this case the following facts: There was a payment of $12,500 falling due on the 1st of December, 1902, on account of the purchase. That on the 15th October, 1902, Caulfield wrote the letter of that date in which he tells Madden to make no report. That Caulfield was a party to the letter of the 18th October in which he proposes a dishonest and swindling scheme to Madden. That he went to Chicago. That there was no notification by the other directors to Madden that he was to go there on public business. That while there he discussed the terms of the letter of 18th October. That his expenses for that trip which he alleges were $294.65 were never submitted to any properly summoned meeting of a board of directors but that he and his two partners for reasons of their own, determined not to pass them in the usual way, such as would be authorized by section 120 of the memorandum, but by padding the pay roll. They were all three, parties to that scheme. It was done to deceive the auditor and the shareholders.

"The letter of the 3rd November, written by Mr. Madden does not, in my opinion, justify the position taken by them, nor do their excuses satisfy me that that was the reason the fradulent padding system was adopted. I call attention to the fact that it was a different account, one alleging that it was for sentimental reasons and the other because the Chicago people were suspicious."

In the second case, that of Madden vs. Dimond, his lordship, after reviewing the case as produced to him, went on to say: "Now, then, it is proper, I think, to observe here, that where a charge of fraud is made that it is necessary that the person upon whom the onus is should sheet that home, and the opposite side prove it up to the hilt. The English law presumes that every man is innocent until he is proved to be guilty and that presumption is not confined to criminal cases but to charges such as this of fraud and in approaching a case of this kind one must remember that there is this presumption of innocence. It is not necessary that presumption of innocence should be disproved by absolutely direct evidence, it is sufficient if proved by satisfactory evidence, beyond all reasonable doubt.

"I find the following facts in this case: That the purchase was made by Caulfield, Peet, Macey and Law with a view to keeping out of power the Madden party; that Gaunce knew this was the object and that Dimond also knew this was the object, before he sold the mine. The sale would not have taken place unless the proxy had been secured so as to control the vote.

"In the case of Burland vs Burland, Mr. Martin contended that the court could not interfere with matters of internal policy, it could only interfere in a case in which the company was harmed either in money, property or some other advantage. If it were prejudiced in respect to those things then the court could interfere and not otherwise. He referred to the language of lord Davey at page 97. I call attention to the fact that lord Davey says, that "if it appears . . . . adifferent construction would arise."

"What I cite that for is to show that lord Davey was not professing to exhaust all the cases in which the court would interfere. But taking the proposition laid down by Mr. Martin that the company must be prejudiced in respect to money, property or other advantage to permit the court to come in, I ask this question: Is not the right of the company to have an investigation of a charge of fraud brought against its officers, under the circumstances mentioned, one of these advantages to which the court is entitled? It seems to me that a court will set aside resolutions where the directors have acted fraudulently and that the law will not permit them to conspire with outsiders to balk an investigation of that kind.

"It seems to me that there was a conspiracy shown here between these four directors and the outsiders to get the control of votes in the company for the very purpose of baulking the enquiry into that criminal charge, and that justifies this court in taking the matter up. And I also, in that connection, call attention to the case of Fraser vs. Walley in showing that the directors in a case of that kind are not justified in creating shares when they are likely to be removed. And, as the expressions used in that case are so peculiarly appropriate to this case, I quote them and say that this meeting was "a clandestine meeting, held with indecent haste and was a fraud on the company."

In the third case, of Rudolph vs. Macey after stating the facts, his lordship said: "Now, the question, I think, for me to consider—was the issue of stock for the purchase of machinery a mere device for increasing the stock? Was it a mere device for abusing the powers vested in the company?

"The meeting of the 12th June, rescinding these resolutions was called on a three days' notice. That is apparent from paragraph 11 of the statement of defence. I call attention, in this connection to Cannon vs. Trask. Only three directors were there as opposed to the seven at the previous meeting. At that meeting on the 12th June they rescinded all motions including one for investigation of a charge against two of themselves.

"Mr. Martin contends that this is also a mere question of policy but for reasons that I gave in dealing with the first case, I cannot accept that. It is a case in which the court has jurisdiction and it seems to me that the resolutions of 12th May were bona fide, having regard to Mr. Heeney's evidence and the necessity of getting that machinery, and that the meeting of the 12th June, called when men could not reach there, was an abuse of the powers of the directors."

In the action of Law vs. Madden, the last of the four the court held that W. A. Macdonald as a director fell within the sweeping clause of 99F of the articles of association, and that, therefore, his office was vacant. In Mr. Madden's case it was different, he came under the saving clause of other sections and would not be disturbed. The learned judge held also that no fraud had been established by Law and the other other plaintiffs in this action, giving in detail some of the reasons why he came to the conclusions he did.

"I would have liked, under other circumstances to have taken more time over these judgments." said Mr. justice Irving in concluding, "but as I understand that the mine is more or less tied up and there is more or less difficulty in getting on with the thing, I determined to give judgment at once.

"There are a good many things that have been mentioned in here which are not creditable to some of the witnesses and I would have liked to have pointed that out. At the same time every one here could see just as well as I could what these things are."

As already stated the result of the findings of the court is a complete victory for the Madden faction, and carry with them the costs of all the litigation. The majority shareholders now have control of the Providence company and mine, and the majority directors, with the exception of Mr. Macdonald, will hold office.

Why Gin Pills?
Gin Pills are called Gin Pills because each pill possesses all the curative qualities of one and a half ounces of the best Holland Gin. As a cure for Kidney trouble however, they have all of the good qualities of Gin, with none of its bad.

The Bole Drug Co., Winnipeg, Man.

## CHANGES IN THE CABINET

CARTWRIGHT, SCOTT AND FITZPATRICK ARE RETIRING

ONLY FIVE OF LAURIER'S ORIGINAL CABINET WILL REMAIN

The forecast of dominion cabinet changes to take place in September, made by the Toronto Globe's Ottawa correspondent, referred to in another column, gives an illustration of the way in which the historic figures of the formative period of confederation are passing from the scene. When sir Wilfrid Laurier formed his cabinet in 1896 the members were sir Richard Cartwright, sir Oliver Mowat, Mr. Fielding, Mr. L. H. Davies, Mr. Blair, Mr. Paterson, Mr. Mulock, Mr. Tarte, Mr. Borden, Mr. Fisher sir Henri Joly, senator Scott, Mr. Fitzpatrick, Mr. Geoffrion and Mr. Dobell—the two latter without portfolio. Mr. Sifton came in shortly afterwards. When the cabinet changes go into force the premier will have only five of his original colleagues left, namely, Messrs, Fielding, Paterson and Fisher, sir William Mulock and sir Frederick Borden.

Of the retiring ministers, sir Richard Cartwright and Mr. Scott will act as senators, but they will no longer take a place in the forefront of the battle. Sir Richard is in his 70th year, and for 42 years he has been in public life. He sat for Lennox and Addington in the Canadian assembly from 1863 to 1867. After that he sat in the parliament of Canada from time to time for Lennox, for Centre and for South Huron and for South Oxford, till he became senator last year. Sir Richard was finance minister of Canada in 1873-78 and became known abroad as well as at home as a master of finance. Since 1896 he has been minister of trade and commerce.

Hon. Richard W. Scott secretary of state is in his 81st year. He is a barrister by profession having studied law in Ottawa in the late forties of the last century. Mr. Scott began his professional career at Bytown or Ottawa and was mayor of what is now the capital some 53 years ago. Mr. Scott became a member of the legislature for Ottawa in 1857 and was defeated in 1863. After confederation he represented Ottawa in the Ontario legislature between 1867 and 1873. He was speaker and commissioner of crown lands during his career in the legislature. In November, 1873, he was called to the federal ministry by Mackenzie, and became secretary of state, with a seat in the senate. He went out with his chief in 1878, and came back with Laurier to the same post in 1896. During the long period of opposition he was one of the leaders of the liberal party in the senate. Perhaps Mr. Scott's most memorable legislative work was to hammer into shape the Canada temperance act of 1875, popularly known as the Scott act.

Mr. Fitzpatrick, the retiring minister of justice, is one of the ablest and one of the most forceful personalities in Canadian public life. His friends say that the only thing that makes the political arena even tolerable to him is an occasional bout with some legal foeman worthy of his steel. The minister of justice is 51 and was born in Quebec of Irish Catholic parents. He was called to the bar in 1876 and had become so much a leader of the bar that he was chosen in 1885 as Riel's chief counsel. Among the other famous people who have called in the eloquent Fitzpatrick when hard pressed were Honore Mercier, Thomas McGreevy, and Ernest Pacaud. Mr. Fitzpatrick became solicitor general in 1896, coming to Ottawa from the Quebec legislature in which he had held a seat for six years prior to 1896. When Mr. Mills died Mr. Fitzpatrick became minister of justice. He has of late made no secret of his wish to get back to his lawbooks.

## NELSON'S NEWS OF THE DAY

The cricket club is trying to get up a match with the Calgary players.

The Kokanee leaves on the excursion up the lake at 2 o'clock this afternoon.

Archdeacon Beer preaches at St. Saviour's church this morning and evening.

The thermometer rose to 92 yesterday afternoon registering 52 at 3 o'clock this morning. The average temperature was thus 72 degrees Fahrenheit.

Despite the hot spell Nelson's gardens are looking well and the Crimson Rambler, an American variety of climbing rose, is a notable attraction to many a home.

W. J. Doull, jr., formerly of the West Kootenay Power and Light company, passed through Nelson last eveing on his way to Montreal.

F. C. Caldwell, manager of the Pontiac mine near Kaslo, spent yesterday in the city. He reports development work proceeding satisfactorily.

The band concert on the harbor, given by the boat club on Friday evening was so much appreciated that it is likely to be repeated at a early date.

Two gold bricks the result of the regular monthly cleanup of the Juno mine were brought to Nelson yesterday and deposited in the Royal Bank. Later they will be forwarded to the mint in Helena.

C. D. Goepel returned to Nelson last night from San Francisco. He will remain here representing the Standard Explosives company of Montreal, of which G. C. Tunstall, jr., is the general agent.

William Fowler of Greenwood, and his bride arrived in Nelson last night and are at the Hume. Mr. Fowler was once the owner of the Providence mine, and sold it to the Chicago people represented by M. F. Madden.

A good deal of time and trouble has been expended upon the macadamizing of Ward street between Vernon and Baker streets and the stretch of roadway is a credit to the city and would be so to a city of much larger population .

A lawn social will be held tomorrow evening on the grounds before Father Althoff's residence under the auspices of the ladies' aid society of the Roman Catholic church. The city band will be in attendance. Strawberries and ice cream will be served.

Chief justice Hunter notified registrar Bowman yesterday that he would arrive here on Monday night and would take up the celebrated Sandon mining case on Tuesday morning. Besides hearing the argument of counsel the chief justice has intimated that he will hear any evidence offered on the work directed to be done by the court. The hearing will probably last at least three days.

### GUN CLUB SHOOT

The Gun club shoot was held yesterday afternoon under difficulties. After the first round the guns became too warm for comfortable handling. The scores were as follows:

First event 25 birds—Ink, 18; Tierney, 17; Brassfield, 13; Macdonnell, 11; Porter, 10.

Second event, 25 birds—Ink, 15; Tierney, 13; Porter 12; Macdonnell, 11; Porter, 11.

### PRICE OF METALS.

New York, July 22—Bar silver, 58 7-8; casting copper 14 3-8; lead, $4.50.

London, July 22—Silver, 27, 3-16; lead, no quotations.

### REOPEN MILL AT TROUT LAKE

Canadian Timber and Sawmill Company Preparing to Resume Operations

The property of the Canadian Timber and Sawmill company of Trout Lake has been freed from indebtedness. Arrangements have been made for planing the timber already cut and disposing of it. There are excellent prospects of the resumption of active operations by the company.

Leslie Hill of Nelson, acting for the shareholders of the Canadian Timber and Sawmill company, recently paid a vsit to Trout Lake to confer with Mr. Kennedy, manager of the property. Arrangements were made for the planing of the lumber now on the wharf and marketing of it as advantageously as possible.

Mr. Hill says that money has been raised by the shareholders in England to clear all the indebtedness of the company ad also to make necessary repairs and improvements to the mill if it is found advisable on investigation to do so.

Mr. Kennedy has been instructed to examine the mill and machinery and report on the cost of equipment. Future operations will depend on the report and on market conditions.

### FRUIT SHIPMENTS

Manitoba Demand for Small Fruits is Practically Unlimited

Several shipments of fruit will be forwarded to Winnipeg this morning by members of the Kootenay Fruit Growers' association. The fruit will arrive in time for the last day of the air. It will then be disposed of by the directors, the Nelson shippers receiving the full market value.

The strawberry season is practically over in the Nelson district. The fruit shipments being made now consist mainly of raspberries, huckleberries, gooseberries, cherries and currants.

J. A. McDonald and company shipped all the strawberries they could procure and are now shipping other fruits. Mr. McDonald said yesterday that the Manitoba demand for raspberries currants and other fruits, like the demand for strawberries, is more than he can supply.

### RECIPE FOR

Picnickers Sandwiches — Clark's Potted Ham with hard boiled eggs, chopped fine, spread between buttered bread. Delicious and sustaining sandwiches.

ROYAL—S Inglis, Greenwood; F. Culver, Silverton.

### SAWMILL READY FOR WORK

T. H. Tretheway manager of the Molly Gibson mine arrived in Nelson last evening from Spokane on his way back to the mine. He states that the sawmill is already on the ground and that in a day or two a beginning will be made of cutting lumber for the building to cover the concentrating plant. As soon as sufficient lumber is cut the mill will be built. There will be no delay in installing the necessary equipment.

Mr. Tretheway has been absent from the mine since the new strike was made and reported. He therefore knows nothing of any later discoveries. The ordinary development work is being steadily prosecuted.
