VOL. 6 NELSON, B. C., FRIDAY, AUGUST 23, 1907. NO. 106

ASKED TO ACT

Premier McBride Called Upon by Board of Trade

COKE SHORTAGE SERIOUS

COAL COMPANY MUST LIVE UP TO ITS CHARTER AND SUPPLY B. C. SMELTERS WITH ALL COKE NECESSARY — KASLO BOARD JOINS NELSON.

There was a well attended meeting of the board of trade last evening to consider the coke shortage problem, a feature of the meeting being the attendance of representatives of the mining and smelting interests. J. L. Retallack was present on behalf of his own and associates' mining interests as well as those of the mine operators of the south fork of Kaslo river. George Alexander was also down from Kaslo in the interests of the mines he represents, and Mr. Guernsey, ore buyer for the Trail smelter was also present. Among members of the board in attendance were president F. Starkey, secretary Ebbutt, W. A. Macdonald, Leslie Hill, L. B. deVeber, W. W. Beer, S. S. Fowler, W. Irvine, T. G. Procter, A. R. E. Coleman, P. Lamont, E. Gigot, H. E. Douglas, H. Goodeve, J. A. Kelly, T. Morley, A. McDermid, F. J. Deane, E. W. Widdowson. F. C. Dillinger, assistant to the *chief traffic officer* of the Railway Commission was also present.

President Starkey in opening the meeting explained its object, pointing out the serious situation that had arisen by reason of the inability of the smelters to secure adequate coke supply. He had received so many complaints from sources that could not be questioned that he deemed it his duty to call a meeting of the board to ascertain if some action could be taken that might tend to alleviate the situation.

S. S. Fowler said he could not speak authoritatively as to the exportation of coke. There were reports to that effect, but he had no definite knowledge of such being the case. But he could speak with knowledge as to the inability of mine owners to market their ore and he believed that this was due to the lack of coke at the smelters.

Mr. Guernsey said there was unquestionably a lack of coke at the Trail smelter. Only three out of seven furnaces were working and they had no stock of coke in hand.

S. S. Fowler said he wished to be careful in any action he took in this regard. On a previous occasion he had supported the granting of the Crow's Nest *Southern charter upon the distinct* understanding that the fuel supply of local industries should be safeguarded.

If it could be shown that local industries were now suffering because of failure on the part of this company to supply the needed fuel and that coke was being exported to the detriment of local smelters, he would gladly support a resolution calling upon the government to intervene. He did not know what the actual facts were, but he did know that he and his partners were suffering financially because of existing conditions.

President Starkey pointed out that probably no one present had definite knowledge on the subject and that the only way to get at the facts was to ask the government to investigate.

George Alexander, speaking on behalf of the properties he representse, said that he could throw no new light on the subject under discussion. He had ore on hand that he could not sell. The smelters would not take his ore. He did not know why, nor whether shortage of coke was the sole or chief reason. He had been informed by Mr. Guernsey of the Trail smelter that they had no coke, that they were loaded up with ore and that until they worked some of this off they would not be in a position to take any more. For two months he had been unable to sell any ore. He was employing upwards of seventy men, who had to be paid and in the absence of some market for ore he had determined to close down. Mr. Alexander went on to say that there was the possibility of finding a market in Europe, but this was a long business and moreover one that he seriously deprecated. He believed in B. C. ore being smelted in B. C. Still a market had to be found unless every mine in the district was to close down, and if they sent their ore to Europe it might mean that the European ore buyers would completely capture the market and put the local smelters out of business altogether.

J. L. Retallack confirmed Mr. Fowler's statements and pointed out that he and his partners had been unable to sell any ore for the past two months. Out of some seven hundred tons they had disposed of four cars since the first of July. He was present to speak for the mine operators of the south fork of Kaslo river, who were large producers and who found themselves in a bad plight because of inability to dispose of their ore. He had recently met the manager of the Northport smelter who had informed him that that smelter must close down for lack of coke. He had personally visited the Trail smelter and there learned the same story. Mr. Retallack said there always had been a scarcity of coke. Smelters had never been able to accumulate an adequate supply to tide over emergencies and in his opinion there was no reasonable doubt of there being large exportations of coke to the American side. On these grounds he thought it would be timely to request the government to take action under authority of provisions in the Crow's Nest Southern charter.

T. G. Procter, on the subject of exportation of coke, said he could authoritatively state that the exportation of coke from B. C. collieries in the past thirty days had run between four and five thousand tons.

W. W. Beer thought that before the board took any action they should have before them written complaints from smelter managers as to coke shortage and definite figures as to coke exports.

Presiden Starkey mentioned the difficulty experienced in getting smelter managers to commit themselves to definite statements, but he had had personal conversation with Mr. Aldridge, of the Trail smelter, who complained of coke shortage and from the statements of the mine operators present he felt the board could have no reasonable doubt that a shortage actually existed. That was all that was necessary. If a shortage existed it was up to the government to take action under the provisions of the Crow's Nest Southern Act. It was for the government to ascertain the cause of this shortage.

S. S. Fowler then moved, seconded by Leslie Hill, that a committee be appointed to draft a telegram for submission to the premier re shortage of coke and asking for an investigation in accordance with the provisions of the C. N. S. Act. This motion was adopted and Messrs. Fowler, Deane and Starkey were instructed to draft the telegram, which they did to the following effect:

"Hon. Richard McBride, Victoria: Because of the evident injury to the mining and general interests of southern B. C. by reason of the coke shortage, the Nelson board of trade request your government to take immediate action under schedule A of chapter 73, statutes of 1907, to secure adequate coke supply."

Upon motion the secretary was instructed to telegraph this message to the premier and also to the boards of trade throughout southern B. C., asking for their co-operation.

Mr. Dillinger was asked by president Starkey to address the meeting, but that gentleman expressed ignorance of the topic under discussion and said he had no remarks to offer, save that he was at the service of anyone who had to complain of car shortage.

Adjournment ensued.

During the meeting it was stated that the Kaslo board of trade had already taken action in the matter and wired to the premier to the following effect:

"Hon. R. McBride, Victoria: Coke shortage due to exportation of coke to United States causing smelters and mines to close down, entailing great loss to all classes. Kaslo board of trade urgently request your government to immediately take necessary steps under Crow's Nest Southern Act, 1901, to ensure adequate supply of coke to smelters in Kootenay and Boundary. Unless matter remedied without delay result will be disastrous to mining and allied industries for a long time."

ANOTHER G. N. R. WRECK

(Special to The Daily News)

Grand Forks, Aug. 22—Passengers on the Great Northern this morning had a lively experience, and narrowly escaped a bad accident. The train was hooked on to an ore train of ten cars, and shortly after passing the the long trestle at the Oro Denoro a wheel broke on one of the front ore cars and all the except the end one left the track and were piled up in confusion. To conductor Hardy great credit is due. He noticed the first cars leave the track and promptly applied the air brakes thus lessening the impact on the passenger train, the occupants of which got off with a little jolting. Two brakesmen were flung out clear of the cars and escaped with bruises.

D. Whiteside of this city and Lorne A. Campbell of Rossland were among the passengers.

CIRCUMSTANTIAL EVIDENCE

BLOOD STAINED SUIT OF CLOTHES MAY HANG PRIOR.

CHARGED WITH MURDER OF LITTLE GIRL NEAR WOLSLEY.

Wolsley, Sask., Aug. 22.—Startling developments are expected in the trial of Sam Prior, charged with having murdered Rosie Moore, aged 7 years, near this town on the morning of August 2. It is learned today that the police have found a suit of clothes with which they will endeavor to connect the prisoner and if the evidence forms the proper chain they will have some strong testimony against Prior. The clothes have been sent to Dr. Charlton at Regina to have the stains analyzed.

Sam Prior was arrested on the morning the police went out to the Moore homestead because he was in the vicinity and was a suspicious looking character. It was a matter of some comment however, that about the clothes which he wore there was not the slightest sign of struggle or of blood which would connect him with the crime. In view of this it was thought that after the officers investigated the case, Prior would be allowed to return to his home in peace, but now another suit of clothes has been discovered and from the story current about town, it is being directly connected with the accused man.

Sergeant Dubuque has been down here off and on every week since the murder took place and it is learned that he has found the clothes all marked with blood stains. In the pocket it is said there was found a letter addressed to Prior and which bore the imprint made by a bloody hand reaching into the pocket. If this damaging evidence can be connected with the prisoner as it is thought it can there will doubtless be a strong chain of circumstantial evidence against him.

FAST TRAINS

Success of the Trans-Canada Service

TOURIST TRAFFIC GROWING

STREAM OF WORLD TRAVEL NOW IS BEING DIVERTED ACROSS CANADA WITH BENEFICIAL RESULTS TO COUNTRY IN MORE WAYS THAN ONE.

Winnipeg, Aug. 22.—On the last of the present month the trans-Canada limited, the crack summer train of the C. P. R., will be withdrawn for the season. This train was put on this year to accommodate the through tourist traffic of the company which has grown to such an extent during the past four or five seasons. Formerly it was not difficult for the regular trans-continental trains to handle all through business. Then the world awoke to the possibilities of Canada and its fame spead to all the civilized countries, immigration started, and with it the tourist movement. Tourists discovered that the route across Canada was not only a direct one from Great Britain to China and Japan, but that it was as fast and offered many attractions in the way of scenery. The result was that the imperial limited trains were put on to help out the situation. The first year the *limited trains wtre only* on for a couple of months but now the traffic has increased till they will probably be left on this year without a break. This year the company, more or less as an experiment, put on the trans-Canada trains and the results have more than borne out the claims of those who pressed for the service. The time was cut down ten hours for the run across the continent and the tourists have time and again expressed their appreciation of the service given. The service was well patronized and it is expected that next season the train will run for three of four months. The last train of the service will leave Vancouver September 1, while the last one from the east will leave Montreal August 31, completing their runs in each case. There will still be the fast transcontinental train, the "overseas" limited, which connects with the through steamship service for England and Japan.

ACCIDENT TO EMPRESS

Wilhelmshoe, Aug. 22—The empress Victoria Auguste, while visiting the park here yesterday slipped and fell, injuring a vein in her left leg, and making it necessary for her to remain in bed for some time. *All of her majesty's travelling* engagements have been cancelled. It was declared later today that her majesty in addition to injuring a vein in her left leg, had also sprained her ankle. Her attending physician is of the opinion that she will not be able to leave here before Sept. 13. It is declared at the palace that no announcement was made yesterday by express command of the empress, who was prompted by a desire not to create alarm.

MINNESOTA STRIKE BREAKERS

Eleveth, Minn., Aug. 22—Eight coach loads of strike breakers arrived here last night and it is expected that they will all go to work today at the Adams Spruce mine. As this mine had approximately 5000 men at work on Monday, the arrival of the recruits will mean that the mine will soon be turning out ore, as before the strike.

SANITATION MUST BE POOR

Harrisburg, Aug. 22—Dr. Arthur B. Moulton, assistant chief medica inspector of the state department of health, who is at Ridgeway, Pa., reported to heath commissioner Dixon that there were now 90 cases of typhoid fever, 12 cases of epidemic cerebro *spinal meningitis and 16 cases of in*fantile paralysis in that town.

CONSOLS IMPROVING

London, Aug. 22—Contrary to expectations the Bank of England's rate of dscluont was not changed at today's meeting of the directors of that institution.

Consols further improved at the opening.

BEARS ON GRAIN MARKET.

Improved Weather Conditions Affect Winnipeg Grain Exchange.

Winnipeg, Aug. 22.—The bears had an innings today on the grain exchange. Perfect weather conditions for the ripening of wheat and the general belief that damage by frosts will not be serious, were the bearish factors in price making today.

Thermometers this morning showed a clear sky everywhere and warm seasonable temperature. This fine weather and good receipts caused the bears to stampede on the curb, and by opening time prices were precipitated two cents. At the opening offerings were soon absorbed by the commission houses, which caused a rally of half a cent. This did not hold, however, as there was con*siderable profit taking by those who had* bought earlier in the week and some short selling by scalpers. There appeared to be wheat on tap by big holders which caused traders to be more friendly to the short side. The market was nervous and will be erratic until danger of the elements passes. Foreign markets sympathized with our advance yesterday on their openings, but at the close showed some easing up. New York says there is no export demand, which is confirmed by local exporters. In the American markets the undertone was weak all day, prices dropping as much as they advanced yesterday. Prices at the close were the lowest of the day with a weak tone and sentiment quite bearish.

BRITISH PREFERENCE

England Waking up to its Opportunities in Canadian Markets

London, Aug 22—Returns compiled by the statistical branch of the customs department at Ottawa from the trade returns of the last six months go to prove that the average rate of duty on dutiable goods under the preferential tariff, as revised at the recent session of parliament, is 21.15 per cent as compared with 21.72 per cent in the corresponding period of the previous year. The changes in the customs tariff introduced by the finance minister last winter would not seem to have made any large changes in the rate of customs taxation. These were more in the form of the tariff than in its substance, but the tendency on the whole is toward a reduction in the scale of taxation. The import returns for the six months, December to May, show that imports under the British preference amounted to $31,212,486, which represents a gain of $4,155,453 over the corresponding period of the previous year. The Canadian tariff in its present form affords to the British manufacturer a very substantial advantage over his rivals on the European continent, an advantage that will still be substantial when France, Belgium, Italy and Austria perchance have been admitted to the benefits of intermediate rates. As against these preferences, however, the American manufacturer possesses the advantage of proximity and of similarity of taste in domestic and industrial life. He can and does keep closer watch on the Canadian market and endeavors to adapt his products to the requirements of the firm with which he is doing business. Under these circumstances the British government is taking a very wise course in appointing correspondents in the various Canadian centers to enlight en British exporters as to their opportunities in this morket. The commissioner, Mr. Grigg, who was sent to the dominion to report on this proposal, proved to be a very alert and obse ving man, and it is to be hoped that no impediment will be offered to the adoption of the suggestions he has to offer.

CAUGHT IN A TRAP

Montreal, Aug. 22—Beneath the demolished frame work of two street cars, which met in a head oncollision last night, Miss Mabel Bethune, a passenger, was pinned for 20 minutes and her escort, Ewart McIllwrick, sat beside her for 45 minutes before the members of the street railway wrecking crew could clear away the debris with crowbars. The collision occurred between a Notre Dame and a special car. The vestibule of the Notre Dame car was was demolished and Miss Bethune and McIllwrick, who were sitting together behind the motorman, were both pinned beneath the framework, the dashboard and brake had been bent over and hemmed in the young woman, while the woodwork lapped over on her escort, pinning one leg so that he could not extricate himself. Neither were seriously injured.

EXAMINING THE OTTAWA.

(Special to The Daily News)

Slocan, Aug. 22.—Messrs. Coleman and Bissell of Pittsburg, Pennsylvania, owners and directors of the Ottawa mine, and professor Parks, mining expert, recently arrived in Slocan and went at once to the Ottawa, where a thorough examination was made. Mr. Coleman was accompanied by his wife.

William Cottrell and H. Banks are doing an assessment on the Morning Light, situated on Republic mountain. Mr. Banks has lately acquired an interest in the property.

Mr. and Mrs. Z. Hindle of Kaslo are visiting Mr. and Mrs. James Farrell of this place.

H. D. Curtis and family spent several days in Nelson this week.

Mrs. Wilson of Dawson city is visiting her brother, Harry Wilson, in Silverton.

COMMONS BY-ELECTION.

Ottawa, Aug. 22.—By-elections to fill vacancies in the house of commons will be held about the middle of September probably on the 18th or 19th. Nominations will be a week earlier. There are four vacancies. They are: St. Johs city and county, vacancy caused by death of Mr. A.A. Stockton, Northumberland, caused by the death of Edward Cochrane, Wellington, and London vacated by the resignation of Hon. Charles Hyman.

COUNTRYSIDE ABLAZE.

Kingston, Ont., Aug. 22.—Forest fires are raging about Reynoldsville, in north Frontenac. There is great danger and the farmers are fighting hard to suppress the flames. It is thought a careless smoker let a match drop in one of the large marshes around Fifth and Echo lakes and as a result the whole countryside is ablaze. Already much property has been destroyed.

"BLUE-NOSE" PICNIC

Calgary, Aug. 22—The "blue-nose" picnic which was held at Victoria park yesterday afternoon and was a great success. The city had granted a half holiday and over 6000 turned out to witness the sports. Two thousand people were present who came originally from the maritime provinces. Judge Travis, who made the opening address, roundly scored the council, and mayor Campbell in replying said he con*sidered it was rather out of place on such* an occasion.

FARM HANDS IN DEMAND

Winnipeg, Aug. 22—The provincial immigration authorities expect about 5000 men to arrive within the next week and at present they are busy apportioning the men so they will not be crowded in any special locality. The demand for farm hands this year is great.

COLD DOUCHE

Borden Cannot Convince His Own Party

HAS PLATFORM OF HINTS

UNKIND REMARKS MADE BY CONSERVATIVE PAPERS OF THEIR LEADER — GOVERNMENT OWNERSHIP MEETS WITH BUT LITTLE SUPPORT.

Montreal, Aug. 22.—Commenting on the Borden platform the Star (conservative) says: "He deals in hints rather than dramatically positive assertions. His platform contains several good ideas, but is it too much to say that he appears to be a trifle afraid of handling them himself?"

The Herald (liberal) finds that in eight out of fourteen planks there is no new issue raised and meets the proposal for government telegraph and telephones with the query, "why?"

The Witness (liberal) devotes the entire editorial page to articles dealing with various planks. Laying chief emphasis on the declaration for purer elections and expressing doubt of his ability to carry out the pledges which are accepted as sincere on public ownership. The Witness does not thing Borden can carr y the party.

The Gazette (conservative) approves *except for public ownership, concerning* which it is doubtful whether the need has arisen for such action.

CREDITORS ARE ALARMED.

Montreal, Aug. 22.—Detectives are looking for Frank E. Mosley, who was manager of the now defunct Mosley Shoe & Leather company. The detectives are acting on the complaint of Mosley's creditors that he has been found to be guilty of obtaining money on warehouse receipts for goods that did not belong to him. The total liabilities are about $200,000. Paul Gallbeta, leather manufacturer, has been victimized to the extent of $24,000 and James Robinson, wholesale boots and shoes, to the extent of $33,000.

FIRE IN MACLEOD.

Macleod, Alta., Aug. 22.—Riley's furnishing store, which was also occupied by J. Doney jeweler, was destroyed yesterday by fire. The insurance in force was small asd the loss is therefore heavy.

FROM FOUNDRY TO 'VARSITY.

Halifax, N. S., Aug. 22.—The chair of civil engineering at Dalhouise university recently made vacant by the resignation of professor Brydone-Jack, who has gone to Winnipeg, has been filled by the appointment of E. A. Stone, of the Canadian society of civil engineers, structural engineer of the Canada Foundry Co. at Toronto.

TORONTO ATHLETICS

Fine Showing Made at the Twenty-Fifth Annual Meet

Toronto, Aug. 22—Eight thousand people assembled at Hanlon's Point yesterday at the 25th annual meet of the Toronto police amateur athletic association. The feature of the meet was the splendid showing made by P. C. Latramoille of Toronto in the police championship events. Latramoille won six firsts ,one second and one third. His wins included the high jump, standing broad jump, running broad jump, 100 yard dash, hop step and jump, and the 120 yard hurdle race. Constable Desmarteau of Montreal, also distinguished himself by winning the 56-lb. weight throw and long throw, putting the shot and was third in the hammer throwing contest.

Tom Longboat made an effort to lower the world's four mile record in an exhibition contest, but did not get within 30 seconds of it, running the distance in 20 minutes and 52 seconds. He was paced by Tom Cole, Wm. Cummings, Dick Grant, W E. Madder and L. Marsh, all of them Irish Canadians, and his race against time was a popular one. He seemed to overtask himself in a race with Dick Grant, who took him over the second mile at a killing pace, but recovered himself later and made a grand finish.

GARMENT WORKERS STRIKE.

Montreal, Aug. 22.—Large extension of the garment workers strike is expected. Business agent Miller of the united garment workers, stated at gathering of strikers today that he had been informed clothing contractors had decided to lockout employees at noon tomorrow. This action if taken will involve nearly 5,000 workers.

VICTIMS OF MONTE CARLO

Husband and Wife Take Poison After Gambling Away a Fortune

London, Aug. 22—A tragic affair at the Hotel Stabia, Castellamare, is stated to have been the result of losses at the gaming tables at Monte Carlo. John Buckingham, an English engineer, and his wife, a young and beautiful American, arrived from New York on the Riviera a short time ago, and, ensnared by the fascination of the Monte Carlo saloon, played night after night until they had gambled away the whole of their fortune.

Leaving the scene of their ruin, they arrived at the Hotel Stabia, where they decided to commit suicide by poison. They procured a quantity of arsenic and laudanum and, when discovered by the hotel authorities on Wednesday, Mrs. Buckingham was dead and her husband was very ill.

His life was saved by the efforts of the doctors who were summoned but he is distracted with grief and remorse. He refuses food and declares that he is determined to join his wife. He has been sent to the Naples asylum where he is watched night and day. He has, it is alleged, made two attempts at suicide by jumping from a window.

NUN SWINDLERS

Winnipeg, Aug. 22—On inquiry at the archibshop's palace, St. Boniface, it was stated definitely that sister Maria Pia and sister Laura, as they called themselbes in Minneapolis, while soliciting alms for a Regina hospital, were pure swindlers and that they had no connection with the convent at Letellier, Man., from which they represented themselves as coming. It was pointed out that the women had not been particularly clever in their plan of fraud for it was well known that the Grey nuns were at Regina and interested in a Regina hospital, whilst the Letellier convent had nothing whatever to do with the latter, being carried on by the order of Notre Dame des Missions.

GERMAN CAPITAL.

May be Diverted to Canada by Pen of Press Correspondent.

Regina, Aug. 22.—Kurt Koecher, special correspondent of a combination of liberal newspapers in Germany, known as the associated press, spent yesterday in the city and left this evening on his way to the principal towns of Alberta and British Columbia. Thence he will proceed to Idaho and south Texas, east to the cotton growing states and north to New York whence he will embark for Germany early in November. Mr. Koecher was deputed to make such extended inquiries as the time at his disposal permitted with regard to Canada as a field of investment for German capital. He *expressed great in*terest in the many phases of western growth. German capital he said contemplated a considerable outlay in the enterprises of the dominion and it was partly on this account and in part to investigate the cotton states of America that he was making his tour.

NORTH ATLANTIC FISHING.

North Sydney, Aug. 22.—From all sources come reports of phenomenal catches of fish and the indications are that the present season will be a record one on the fishing grounds. All of the Gloucester fleet callisg here so far have had a full catch and the French trawlers eclipsed all expectations. One of the latter vessels now in port has on board twenty-five hundred quintals, which makes a total catch for this one vessel alone up to the present of 4,300 quintals of fish. Another vessel is also is the stream with 2,700 quintals on board. As a result of the successful efforts of the trawlers, the French concerns which own the fleet of trawlers now prosecuting the industry in these waters will send four more vessels of the same class to join the present fleet.

CANADA'S CASE AT THE HAGUE

Ottawa, Aug. 22—The reference of the Newfoundland fisheries dispute with the United States to the Hague tribunal will probably also involve a reference to the tribunal at the same time, of Canada's case in connection with the fisheries of the Magdalen islands. The points at issue are practically the same in each case. This reference of a Canadian dispute with the United States to the Hague tribunal may be a precedent for settling in the same way any other matters of differences arising between the two countries. It is believed by at least one member of the dominion government that the Hague tribunal is the proper one henceforth to arbitrate any disputes Canada may have with foreign countries.

IS BETTER UNDERSTANDING

HOPEFUL CONCLUSION OF J. R. GALVIN OF U. M. W. OF A.

SAYS MINERS AND OPERATORS PULL TOGETHER BETTER NOW.

Calgary, Aug. 22.—J. R. Galvin, district vice-president of the United Mine Workers in British Columbia and Alberta, has just returned from the meeting of the joint committee of miners and operators held in Banff. The joint committee commenced sitting August 12th and the proceedings were marked by the greatest good feeling. Those representing the operators were Messrs. Stockett, McNeill and Williams. The miners representatives were Sherman, Galvin and McDonald.

Mr. Galvin was of opinion that there would be enough coal mined to keep commerce and business moving but there would be a scarcity for domestic use.

"At the joint convention held at Banff which I have just left," said Mr. Galvin, "there was more harmony between us and the operators than ever before. Each side is getting on a basis of better understanding with each other. The men themselves understand their contracts better and they also understand the operators better."

PRIZE FOR IMPECUNIOUS PEER

New York, Aug. 22—Miss Gladys Vanderbilt, daughter of the late Cornelius Vanderbilt, will come into full control of the *fortune left in trust for her* at the end of the present month and will then be one of the richest young women in the country. The direct inheritance of seven millions left her has, by successful manipulation, now grown to eight millions. In addition Miss Vanderbilt will secure over two millions from the estate of her mother. This at the most conservative estimate, will bring Miss Vanderbilt's total fortune up to ten millions.

JAPS COMING

Eight Hundred More Ordered From Hawaii

FISHERY DISPUTE AGAIN

PROVINCE APPOINTS A SPECIAL COMMISSIONER — TROUBLE IS LIKELY TO OCCUR AND WILL BE AIRED IN THE PROVINCIAL COURTS.

(Special to The Daily News)

Vancouver, Aug. 22.—The province has taken an advanced step in its dispute with the dominion over the control of the fisheries by gazetting Hon. W. J. Bowser as commissioner of fisheries under the act of 1902. As the dominion has already given licenses to certain parties to operate in waters which the province has declared shall not be entered, it is probable that the assertion of provincial authority by the appointment of the commissioner will result in a fight in the courts.

Two more convicts escaped from the penitentiary guards at New Westminster this morning. The men were working on a quarry at Pitt lake and escaped in the prison launch, thus cutting off all means of pursuit. The prisoners were *Tom Brewer of Vernon, and Louis* Kelly of Quesnel.

J. B. Hobson, manager of the Guggenheim interests, stated on his return from New York that the syndicate's hydraulicking claims at Bullion would not be operated next year. He intimated that financial reasons were behind this move.

It is stated here that important negotiations are now going on between C. H. Pollen and J. A. Harvie of Cranbrook, and J. S. Dennis of the C. P. R., involving the delivery of the charter and the complete control of the Kootenay Central railway from the European syndicate now controlling it to the C. P. R.

A. P. Low, of the dominion geological survey, states that the brightest reports have been received from all six parties now working in the province, special attention being given to the iron interests of Vancouver island and the establishment of a plant there in the near future is thought certain. Mr. Low leaves for the east over the Crow's Nest Pass tomorrow.

The charterers of the Indiana have ordered that vessel to Hawaii to bring another shipment of eight hundred Jap*anese to this province.*

WON'T HANDLE U. S. BUSINESS

Montreal, Aug. 22—It will be known definitely at noon tomo row whether the telegraph operators of the Canadian Pacific Railway Telegraph company will leave their keys in sympathy with the strikers on the other side of the line or will remain at workA deputation of union men waited upon John F. Richardson, the superintendent, and issued an ultimatum that unless the company stopped handling business from strike affected areas in the United States the whole of the employees from coast to coast would leave their keys.

NORTHWEST POLICE.

Ottawa, Aug. 22.—Comptroller White of the R. N. W. M. P. left Ottawa today for a three weeks' inspection trip. He is going through to the Pacific coast and returning will take in most of the important police headquarters, going as far north as Edmonton.

MANITOBA HARVEST.

Portage la Prairie, Man., Aug. 22.—Yesterday morning R. A. Culbert of Rosedale, started threshing barley, the product of 130 acres being ready for *the shelter.* The grain was a good sample and turned out well.

Brandon, Aug. 22.—Wheat cutting commenced in this district yesterday when Thomas Jobb, two miles southeast of Brandon started on a sixty acre field that was ready for the binder. It will be another week before cutting is general.

DIDN'T KNOW IT WAS LOADED

Edmonton, Aug. 22—While A. T. Palmer was cleaning his revolver last evening, not knowing it was loaded, it discharged, the bullet entering the leg of his mother who was standing near. Mrs. Palmer was removed to the hospital and the bullet removed.

JOURNALISTS HOMEWARD BOUND

Winnipeg, Aug. 22—The party of provincial journalists left today for Montreal and the home land. They spent yesterday afternoon in examining into immigration conditions in Winnipeg under the tutelage of J. Obed Smith.

LOCAL WIRE TROUBLES

Some trouble developed yesterday among C.P.R. telegraph operators and for a time business was at a standstill. No particulars could be obtained here, but it is likely the trouble arose over the handling of American business. For a time it looked as if the keys would not be working here last night, but along towards midnight a certain amount of A.P. stuff came in, principally time-worn Canadian stuff, so that whatever the threatened trouble was, it was overcome. However, the temporary tie up seriously curtailed the night telegraph service.

We are now opening up a large shipment of

LIMOGES ELITE CHINA

These goods are assorted so that you can select any pieces you prefer and make up to your taste—EITHER A TEA OR DINNER SET. . . . .

Limoges Elite China Represents the Highest Quality at Lowest Possible Prices

A CARLOAD OF BRAN AND SHORTS has just arrived. These goods have advanced slightly but we offer them AT RIGHT PRICES. . . .

THE COKE SHORTAGE.

The action taken by the Nelson board of trade last night in requesting the provincial government to enquire into the causese of coke shortage and to take steps to ensure an edequate supply hereafter, will meet with general approval. The board makes no charges, it does not pretend to know why the shortage exists, but it calls the attention of the government to a provision in a provincial statute which affords the government ample excuse for holding such an enquiry as is suggested.

It is unfortunate that it should have been necessary for the board of trade to thus have to spur the government up to its duty, but it is one of the functions of a board of trade to watch closely over the industrial interests of the community in which it is located and to remind governments and other similar bodies of any dereliction of duty or lack of attention to the requirements of its particular locality.

This coke shortage problem is not a new one. It will be remembered that during the late provincial campaign it formed a subject of warm discussion on several platforms. At Rossland, in particular, the coke supply problem was discussed by the conservative candidate, Mr. Lorne Campbell, in the presence of the minister of mines, Hon. Richard McBride, and of the present attorney-general, Hon. W. J. Bowser. These gentlemen expressed very strong views on the subject and promised to back up Mr. Campbell in any legislation he might introduce, if elected, having for its object the overcoming of the coke shortage evil. Mr. Campbell was not elected and neither the minister of mines, nor the attorney-general has, apparently, given the matter a moment's thought since.

The telegrams forwarded to the premier by Kaslo and Nelson boards of trade, will, it is to be hoped, arouse the government to a sense of their duty and we hope for prompt and efficacious action.

In last night's discussion one thing was painfully obvious and that was the absolute lack of exact knowledge of matters vitally affecting the chief industry of southern British Columbia. A body like the board of trade should be in possession of data covering authoritatively the requirements of the smelters in the matter of coke, the quantity of coke manufactured in the province and the disposition of the manufactured product. No one could tell authoritatively what quantity, if any, of coke was being exported from the province. It seems to us that the board of trade should take steps to organize some system of collecting and compiling data and statistics affecting the industrial interests of southern B. C. Business men dislike committing themselves to any course of action, as to the grounds for which they are in doubt. It was quite clear last night that many of those present, who felt strongly on the subject of the alleged coke shortage, hesitated to commit themselves to any statement or comment that might be interpretated to mean that they accepted the exportation theory of the coke shortage. Now that is a matter of which it should be easily possible to secure exact knowledge. It should be known what are the exact daily or monthly requirements of the smelters in the matter of coke supply, what is the exact daily or monthly output of coke and what becomes of it from day to day, does it go to local smelters or is it, to any very large extent, exported to American smelters?

EDITORIAL NOTES.

The Slocan Review makes out a very good case for an improved mail service between Nelson and Sandon. We trust our contemporary has been at the pains to forward a marked copy of its last issue to the postmaster-general, as we feel sure that he cannot fail to take heed of the excellent arguments advanced in that issue in favor of a change in the present arrangements.

The other day we drew attention to the apparent inconsistency in the remarks of the governor-general on the subject of Canada's contribution to the navy. At Halifax he was reported to have declared in favor of some substantial contribution by Canada to the cost of the navy. At St. John, N. B., he was reported to have spoken in an entirely different vein. We were at once told by our sapient evening tory contemporary that earl Grey changed his tone at St. John, because of some dark and disreputable action of the infamous liberal government. The truth appears to be that earl Grey never made the remarks attributed to him at Halifax. He has since expressly denied having spoken along the lines of the report sent out from Halifax. Our tory friends are so hard pressed for amunition to fire at the hated grits that imagination is allowed to run riot working up missiles. The scandal factory has been working overtime of late and now recourse is being had to a more insidious form of attack. Happily truth will prevail and time exposes most of these tory fictions.

GOOD COKING COAL

A fine sample of coal, coal that cokes, comes from the latest coal find at the north fork of Granite creek, four and a half miles from the historic old town bearing that name, says the Similkameen Star. Coal was discovered several years ago in that locality by the well known prospector Pete Gunderson, who was afterwards killed in Collin's Gulch. Attention was drawn to coal indications through the agency of mountain beaver, which in their burrowings had uncovered coal in several places. The property is now owned by Vancouver and Otter Valley parties. Recently a 200 foot tunnel has been run which shows an excellent quality of coal in an apparently large body. Tests made in the open camp fire and in the stove show that it cokes readily and of a fine clean quality. If a good quality of coking coal proves to exist in large quantities, it means a big thing for the Similkameen country, enabling an abundant supply of coking coal to be had right at hand for the use of the smelters that will be built here. The coal at Princeton, although an excellent quality of steam and fuel coal, does not coke, so far as has been seen and this Granite creek article, within such a short hauling distance of Princeton makes it possible for a cheap supply to be had for the smelters that will undoubtedly operate in this immediate vicinity, especially if the Granite coal turns out as indicated.

CLOSE OF BEEF COMMISSION

Winnipeg, Aug. 22—The beef commission closed its business today. The chairman offered to receive evidence during the next two weeks in the form of statutory declarations, and if any traders were affected by that evidence, copies would be forwarded for any remarks to be made thereon. He felt that the commission could be closed with satisfaction. The commissioners had tried their best to get to the root of the whole business and he thought they had succeeded. The report might not be pleasing to everyone but it would be impossible to please all. They should try to give everybody a square deal. He particularly thanked the large cattle dealers for giving full information and throwing everything open in connection with their business. He announced that anyone who had any further evidence to give in Manitoba or Alberta could, within a fortnight, send in a declaration through the mails. If this evidence contained any reflections on any one it would be sent to the parties concerned and opportunity given for rebuttal.

BIG INCREASE

Winnipeg, Aug. 22 — Winnipeg clearing house returns for the week ending today were $11,337,947. In 1906 they were $8,206,265.

RENN'S PRACTICAL AUDITING

teaches the subject in a practical way, by describing the actual method of auditing a commercial set of books from the proper point of beginning through to the auditor's final report.

This book is especially designed for accountants who, though otherwise excellently equipped for auditing, lack experience. The aim is especially to impart the proper order of procedure to be followed; with this object in view, the text giving the directions is arranged in progressive sequence to keep pace with the work being done during the entire course of the audit. This feature makes it invaluable to the student as a guide to the best forms of professional practice.

You will find in it the information you are looking for.

CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY BETTER THAN THREE DOCTORS

Three years ago we had three doctors with our little boy and everything that they could do seemed in vain. At last when all hope seemed to be gone we began using Chamberlain's Colic, Cholera and Diarrhoea Remedy and in a few hours he began to improve. Today he is as healthy a child as his parents could wish for.—Mrs. B. J. Johnston, Linton, Miss. For sale by all druggists and dealers.

CERTIFICATE OF THE REGISTRATION OF AN EXTRA PROVINCIAL COMPANY.

"Companies Act, 1897."

I HEREBY CERTIFY that "The Morning Bell Mining and Smelting Company" has this day been registered as an Extra-Provincial Company under the "Companies Act, 1897," to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Columbia extends.

The head office of the company is situate at Spokane, Washington.

The amount of the capital of the company is Two hundred and fifty thousand dollars, divided into One Million shares of Twenty-five cents.

The head office of the company in this Province is situate at the City of Creston, and O. J. Wigen, a fruit and produce rancher, whose address is the City of Creston, B.C., is the attorney for the company.

The time of the existence of the Company is Forty-nine years from the 15th of January, 1907.

The company is specially limited under Section 56 of the said Act, and no liability beyond the amount actually paid upon shares or stock in the company by the subscribers thereto or holders thereof shall attach to such subscriber or holder.

GIVEN under my hand and seal of office at Victoria, Province of British Columbia, this 12th day of August, 1907.

S. Y. WOOTTON,
Registrar of Joint Stock Companies.

The objects for which the Company has been established and registered are restricted to acquiring, managing, developing, working and selling mines, mineral claims and mining properties, and the winning, getting, treating, refining and marketing of mineral therefrom.

TIMBER NOTICES

TAKE NOTICE that I, Donald Dewar, of Arrowhead, B. C., woods manager, intend to apply for a special timber license over the following described lands, situate on McDonald creek, Upper Arrow lake, West Kootenay.

No. 1.—Commencing at a post planted at the N. W. corner of T. L. No. 7200, running west 20 chains; thence south 160 chains; thence east 60 chains; thence south 110 chains; thnce east 40 chains; thence north 10 chains; thence west 20 chains; thence north 129 chains; thence west 60 chains ;thence north 30 chains to point of commencement.

Dated July 10, 1907.

No. 2.—Commencing at a post marked "R. T. Dewar's N. W. corner," beginning midway on the east and west line of T. L. 7307, on the south side, running east 80 chains; thence north 80 chains; thence south 80 chains; thence west 80 chains; thence north 80 chains to point of commencement.

Dated July 9th, 1907.

No. 3.—Commencing at a post marked "R. T. Dewar's N.W. corner post," and planted at the N.E. Corner of Location No. 2, thence east 80 chains; thence south 80 chains; thence west 80 chains; thence north 80 chains, to point of commencement.

No. 4—Commencing at a post marked "Donald Dewar's N.W. corner post," and planted at the N.E. corner of Location No. 3, thence east 80 chains; thence south 80 chains; thence west 80 chains; thence north 80 chains, to point of commencement.

No. 5—Commencing at a post marked "Donald Dewar's S.W. corner post," and planted at the N.W. corner of Location No. 3, thence east 160 chains; thence north 40 chains; thence west 160 chains; thence south 40 chains, to point of commencement.

DONALD DEWAR.

Dated July 9th, 1907.

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for a special license to cut and carry away timber from the following described lands in West Kootenay district:

No. 1 Limit—Commencing at a post planted about 6 miles up Snake creek from the Slocan river, and marked "A. L. McCulloch's southwest corner," thence 80 chains north; thence 80 chains east; thence 80 chains south; thence 80 chains west to point of commencement.

Located, April 27, 1907.

No. 2 Limit—Commencing at a post planted about 7 1-2 miles up Snake creek, and marked "A. L. McCulloch's northeast corner," thence 80 chains south; thence

NELSON LAND DISTRICT, DISTRICT OF WEST KOOTENAY.

TAKE NOTICE that Emily Wenmoth, of Hayfield, England, occupation, farmer, intends to apply for permission to purchase the following described land:

Commencing at a post planted on the north boundary, and 20 chains from the N.W. corner post of lot 7740, Pend d'Oreille river, B.C., thence 40 chains north; thence west 40 chains; thence south 40 chains; thence east 40 chains to point of commencement, and containing 160 acres, more or less.

EMILY WENMOTH.
A. G. LANG, Agent.

Dated 15th June, 1907.

NELSON LAND DISTRICT, DISTRICT OF KOOTENAY.

TAKE NOTICE that C. J. Coleman, of Clark's Forks, Idaho, occupation, telegraph operator, intends to apply for a special timber license over the following described lands:

Commencing at a post planted on the South Fork of the Salmon river on the west side of the stream, about seven miles from its mouth and about one mile and three-quarters from the river in a southwesterly direction and southwest (magnetic) of Stag Leaf mountain; "C. J. Coleman's N.E. corner post," thence south 40 chains; thence west 40 chains; thence south 80 chains; thence west 40 chains; thence north 120 chains; thence east 80 chains to point of commencement. The location joins the location of E. J. Keogh immediately on the south.

C. J. COLEMAN.
EDWARD J. KOEGH, Agent.

Dated July 31, 1907.

NELSON LAND DISTRICT, DISTRICT OF WEST KOOTENAY, B.C.

TAKE NOTICE that Fred A. Kribs of Portland, Ore., occupation timber merchant intends to apply for a special timber license over the following described lands:

Commencing at a post planted about 20 rods west and 350 paces north of the confluence of the South Fork of the Salmon river and Wilson creek, about 14 miles south of Salmo, B.C., thence west 80 chains; thence south 80 chains; thence east 80 chains; thence north 80 chains to point of commencement, and containing 640 acres more or less. Said point of commencement can be reached from said confluence of the South Fork of the Salmon river and Wilson creek by going west up a gulch about 20 rods to a point where a trail running in a northerly direction has been blazed or about 350 paces.

FRED A. KRIBS,
PHIL. BOSBY, Agent.

NOTICE TO DELINQUENT CO-OWNER.

To James Livingstone, or any other person or persons to whom he may have transferred his interest in the Alberta Mineral claim, situated on the First North Fork of Lemon Creek, in the Slocan City Mining Division of West Kootenay district, and recorded in the Mining Recorder's office at Slocan, B.C.

You, and each of you, are hereby notified that I have expended the sum of four hundred and ten dollars ($410.00) in labor and recording fees upon the above named mineral claim in order to hold the same under the provisions of Sec. 24 of the Mineral Act; and that if, within 90 days from the date of this notice, you fail or refuse to contribute your proportion of the aforesaid expenditure, which is two hundred and five dollars ($205.00) for the four years ending the 12th day of July, 1907, together with all costs of advertising, your interest in the said claim will become vested in the undersigned, under Sec. 4 of the Mineral Act, Amendment Act, 1900.

Dated at Slocan, B.C., this 15th day of July, 1907.

J. T. BEAUCHESNE.

ORCHARD INSECT PESTS

DR. FLETCHER'S SUGGESTIVE TALK TO FRUIT GROWERS.

PESTS RARE AS YET BUT MUST BE GUARDED AGAINST.

PART III.

However, I congratulate you people in this valley. Your climate and soil and conditions are such as will produce exceptionally good fruit, well formed, and of very fine appearance. The color of the trees indicates that they get (the apples and plums especially) all they need to produce the best fruit. That being the case you would do well to let that be the chief line of your farming until you see something better. Some of the apples I have seen about here, such as Northern Spies and others of the finer grades, are as good as the best produced anywhere in Canada, that being the case you have a special locality, and with proper knowledge and use of your possibilities I do not see what can hold back the development of your valley that is being so widely planted with fruit. A few years ago the planting of these slopes with fruit was hardly thought of, but now everyone knows they are the very best lands for the purpose and that fruit of the finest quality can be produced on them. Some of your best men engaged in the work, and the provincial and dominion governments stand ready to help you in your difficulties and protect you and enable you to do your work in the best possible way. They employ specialists for your assistance and whose services are free to you for the asking.

Mr. Anderson asked Dr. Fletcher to say a few words about underground insects.

I may say that of these, wire worms is one of the insects we have not yet found any practical cure for; wire worms and white grubs in grain. There are methods that have given some results, one is plowing the ground or breaking it up just when the insect is passing through the pupa or chrysalis or resting stage, which in the case of many wire worms is in the month of August, though as there are many different insects whose grubs are called wire worms, the season varies more or less. One that has given them great trouble on Vancouver island is a spring insect. The best information I can give you is that all the remedies so largely recommended and advertised in farm journals and so on are quite useless, so you can save your money. Two very popular remedies are salt and carbolic acid, especially the latter, on the ancient principle I suppose that a medicine is effective in proportion to the badness of its taste, or like a man who went to a dentist of the old school to have a tooth out, and the next time went to one of the painless kind. The latter had it out so that he scarcely knew it, and then charged him three dollars. "Why," said the man, "I got dragged half around the block by the other man for one dollar." But neither carbolic acid or salt has any effect.

Cut worms, except they come in great numbers as they did a few years ago in B. C., are comparatively easy to deal with. One pound of paris green sifted through 100 pounds of bran, just sufficiently moist to hold the poison, and this mixture spread on the land, is perfectly effective in my experience. How effective it is in a large way I may tell you in connection with the Alberta sugar beet growers last year when the outbreak was so great, and by the use of this remedy over 75 per cent were destroyed and the sugar crop absolutely saved. They also appeared in the northern wheat fields, where sometimes a hundred acre field of wheat might be seen stripped down; but wherever this remedy was used the result was satisfactory. Some people doubt its efficacy because they do not see the dead worms lying about with tombstones over them, but it must be remembered that the cut worms are night feeders, and paris green, though very deadly, is also very slow in its action, so the insects come out at night and eat the poison and go back to their holes and die underground, bury themeselves. As I said there are some fifty different varieties of wire worms and over three hundred different cut worms, so while these may be said to be the remedies yet the season will vary in different districts.

Another insect which is difficult to control in large numbers is the onion maggot. In small numbers, however, it is easily controlled by mixing any of the tar products such as cresolene with sand (or kerosene or even carbolic acid may be used) and spreading the sand along the rows about the time the young plants are coming up. Bluestone is also a very good remedy, one pound in four gallons of water sprinkled along the rows once a week from the time the onions come up for about a month.

For root maggot in cauliflower and cabbages the best remedy is pryethrum or white hellebore. If either be mixed with one gallon hot water and that diluted with another gallon of cold water, that is one ounce to two gallons of water and placed around the roots by drawing the soil away and pouring it in, then putting the soil back (about a teacup to each plant) the maggot is destroyed and the cabbage encouraged to grow by the moisture with most satisfactory result. An excellent way of preventing damage to tomato and cabbage plants by cutworms is to place strips of paper around the stems as the plants are put in the ground, the paper extending about two inches abouve the surface.

(Mr. Johnstone spoke of cases where this had been done but was not very satisfactory.).

This having been an unusually moist season, I understand, the explanation may be that the paper got soft. At Ottawa we use this method with thousands of plants and it prevents a large proportion of the loss. We have planted patches of 2000 each, one patch being wrapped with these strips of paper and the other not; in the patch that is banded, the loss has been about 5 per cent while the adjoining patch not banded, it has been so bad sometimes that it has had to be replanted. Those are definite experiments and those are the kind we have to have at the experimental farms, we cannot afford to "think."

A question was asked as to the Wooly Aphis.

I had not touched on that because I am not as frightened of it as some of you in this province seem to be. There are three insects known as wooly aphis. It does a certain amount of harm truly, but by no means so much as people think. It has two forms, one of which attacks the root, the other the leaves. The one on the leaves, the form in which it is apparent here, is not very dangerous, it is easily killed even when in large numbers by the application of keresone emulsion or whale oil soap, hot, which dsetroys the waxy covering of the insects and kills them. The root form is not prevalent to any extent in this country.

The apple aphis is a general term covering three different kinds. There is also what is known as alternation of generation, one generation appears in the spring on the trees, then the next generation flies to the grasses when they are grown and live there until the autumn when a third generation appears and returns to the apple trees. But there is one that stays on the trees all summer, which is more harmful and there seems to be a special development of this in B.C. In Ontario I generally say the best treatment is to leave it along, one man there saved $2000 by doing so, which it would have cost him to spray his ochard. Howeverr, here you cannot always afford to run this risk; where it remains all season spraying pays.

The oyster shell scale is a very destructive insect in neglected orchards but where orchards are making a vigorous growth as in this valley and where they are being taken care of and cultivated and sprayed with lime and sulphur in the winter and with Bordeaux mixture where necessary, this insect should never become a serious pest. I detected at Kaslo the parasite of this insect, a very minute fly of the wasp order which feeds on the inside of the scale. Burning of dead vegetation in the autumn was recommended to destroy eggs of cutworm and other insects.

One hundred pounds of bran and paris-green mixture to the acre was used in Alberta for cut worms.

For black aphis on currants the only remedy is to cut off the twigs and burn them, the insects being confined to the tips of the new shoots. Tobacco water was said to have been effective by one present.

In spraying potatoes, three times necessary, four times better, at intervals of a fortnight.

For white trip hopper on roses, presence shown by white leaf, use kerosene or whale oil soap.

For white mildew on rose trees, dust with sulphur.

There's no economy in buying "cheap" salt. At present prices WINDSOR SALT costs no more than imported salt. It is pure and never cakes.

HAD AN AWFUL TIME.

But Chamberlain's Colic, Cholera and Diarrhoea Remedy Cured Him.

It is with pleasure that I give you this unsolicited testimonial. About a year ago when I had a severe case of measles I got caught out in a hard rain and the measles settled in my bowels. I had an awful time an dhad it not been for the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy I could not have possibly lived but a few hours longer, but thanks to this remedy I am now stronger and well. I have written the above through simple gratitude and I shall speak a good word for this remedy always—Sam H. Gwin, Concord, Ga. For sale by all druggists and dealers.

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for special licenses to cut and carry away timber from the following described lands, situate in the West Kootenay district:

Location No. 1—Commencing at a post planted about 20 rods west and 350 paces north of the confluence of the South Fork of the Salmon river and Wilson creek, about 14 miles south of Salmo, B.C., thence west 80 chains; thence south 80 chains; thence east 80 chains; thence north 80 chains to point of commencement. Said point of commencement can be reached from the said confluence of the South Fork of the Salmon river and Wilson creek by going west up a gulch about 80 rods to a point where a trail, running in a northerly direction, has been blazed for about 350 paces.

Located March 9, 1907.

Location No. 2—Commencing at a post planted about 20 rods south and 80 chains west of the confluence of the North Fork of the South Fork of the Salmon river, and the South Fork of the Salmon river, about 20 miles south of Salmo, B.C., thence north 80 chains; thence east 80 chains; thence south 80 chains; thence west 80 chains, to point of commencement. About 700 paces north of said point of commencement will be found an earth slide about 50 feet in height, where the said South Fork of the Salmon River makes a turn, and where a small creek from the southwest flows therein.

Located March 16th, 1907.

Location No. 3—Commencing at a post planted about 20 rods south and 80 chains east of the confluence of the North Fork of the South Fork of the Salmon river, and the South Fork of the Salmon river, about 20 miles south of Salmo, B.C., thence south 40 chains; thence west 160 chains, thence north 40 chains; thence east 160 chains to point of commencement.

Located March 16th, 1907.

THE DAILY NEWS

PRINTERS AND PUBLISHERS

NELSON NEWS OF THE DAY

The city schools reopen on Monday.

A. C. Garde of the Argenta Mines is in the city on a short visit.

After a week's trouble the telephone line between this city and Spokane is again in working order.

The hay harvest in Fire Valley is now about ready for garnering. It it expected that this year it will amount to about 150 tons. Somewhat higher prices than those of last year are being demanded.

The temperature yesterday was warmer than it has been for some time past, rising in the afternoon to 83 degrees and never falling during the 24 hours under observation below 55.

The Ideal Amusement company is drawing fair audiences each day to the recreation grounds. The minstrel part of the show is drawing very well. Some extra acts are now being put on in a vaudeville show which will form a portion of the attractions.

Secretary Ebbutt of the 20,000 club, declaring that as he has often been asked by lady visitors to the city to point out a desirable direction for a short walk, suggests that the city open up by means of casual workmen, a few paths or trails on the bluff overlooking the city, known as the old city park.

G. B. Matthew and family have returned from their summer vacation on their houseboat, "The Ark," at Galena bay, having spent the past six weeks there. Gus states that it is no "pipe dream" to say that Kootenay lake offers inducements in the way of scenery and sport second to no other place on the continent.

T. Morley, who has been so long and favorably known among public spirited citizens of Nelson, and who is leaving shortly for Vancouver where he will assume charge of the provincial office of the Mason-Risch Piano company, was the recipient of an address and a farewell supper by his brethren of the Royal Arch on Wednesday night.

It is suggested that the Salvation army people do not confine their attention each and every night to the same section of the city. Just now they are before the Alan block, whose inmates wish to do nothing that would hurt any good to be effected, but who think that if their corner is left alone for six days out of the seven perhaps even an equal amount of service might be rendered on other corners.

WESTERN CANADA COLLEGE

Calgary's well known Educational Institution—Some Special features

Dr. McRae, principal of the Western Canada college, Calgary, was in town yesterday and gave some interesting data about that institution to a reporter of The Daily News. Though Western Canada college is but four years old, having been opened by premier Haultain in 1903, it is the largest residential school and college for boys west of the great lakes. The property consists of 20 acres, beautifully situated in the west end of the city, on which have been erected three separate buildings, a residnce house, gymnasium and academic buildings.

Last year there were 84 boys enrolled. Most of them were from Alberta and south eastern British Columbia, but there were some from Vancouver and Victoria. Five masters give all their time to their instruction.

There are several unique features in connection with this college.

It is the only educational institution of the kind in Canada that is incorporated as strictly undenominational. According to its constitution it is distinctly Christian, but there is no connection with any religious sect.

It is the highest college in Canada, being nearly 3400 feet above sea level.

The principal avers that there is no difficulty in inducing boys to study. The dry bracing air seems to be the cause. They are so invigorated that they work hard and play hard. It is a climate peculiarly suited to boys with whom damp, heavy winter weather does not very well agree and a number of boys have been sent there on that account.

In addition to the junior and senior forms, the preparation for classes for universities, etc., there is a new and interesting method of teaching two of the three "R's" writing and arithmetic. At intervals and for special periods, all write and calculate in measured periods. By this means, all in unison are a help to each other. This method has been attended by great success. In writing the improvement in three months has been little short of phenomenal. The old way of how to hold the pen, adjust the wrist and arm, etc. has all been superseded. A boy is allowed to hold a pen as he pleases—the real question is not holding a pen or following guide lines, but control. This system aims at full and complete control of the four chief movements of the wrist and arm. The principal believes it will in time be the one and only method, because of its extreme simplicity and its striking results.

W. H. MULLINS CO.

Gentlemen—The metal duck boat, "Get There," is all right. Am surprised and delighted with same. Don't want any more wooden boats. The "Get There" is all and more than you claimed for it.

LICENSE TO AN EXTRA-PROVINCIAL COMPANY.

"COMPANIES ACT, 1897."

Canada,
Province of British Columbia.
No. 391.

THIS is to certify that "Burton City Fruit Lands Company, Limited," is authorized and licensed to carry on business within the Province of British Columbia, and to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Colmubia extends.

The head office of the Company is situate in the City of Winnipeg, in the Province of Manitoba.

The amount of the capital of the Company is ninety-nine thousand dollars, divided into thirty-six shares of two thousand seven hundred and fifty dollars each.

The head office of the Company in this Province is situate in the City of Nelson and Robert Wetmore Hannington, barrister, whose address is the same, is the attorney for the Company.

Given under my hand and seal of office at Victoria, Province of rBitish Columbia, this 12th day of Jnne, one thousand nine hundred and seven.

(L. S.) S. Y. WOOTTON,
Registrar of Joint Companies.

The objects for which the Company has been estblished and licensed are:

(a) Buying, or acquiring by grant, purchase in exchange for the Company's shares or otherwise, and to sell, lease and exchange, mortgage or otherwise transfer or deal with or dispose of real estate, lands, tenements, hereditaments of every description or nature, and any and every right and interest therein, and generally to carry on a business of a land company.

(b) To carry on the business of immigrtion and colonization agents, make advances to assist settlers on lands purchased from the Company, and secure the repayment of such advances with interest, on such terms and in such manner by way of mortgage or agreement as may be mutually agreed upon, and generally to act as a land improvement company.

(c) To carry on trade as general merchants and forwarders.

(d) To issue in payment of any property acquired by the Company shares of the capital stock of the Company as fully paid up and non-assessable and otherwise;

(e) To carry on the business of manufacturers and dealers in power generators and motors of every description; to construct and operate all classes of vehicles, agricultural improvements, implements, machinery, boats, steamers, barges and ferries in which the said motors are used; to construct and operate boat lines and to carry on the business of carriers, cartage and parcel deliveries; to own and operate omnibus lines and vehicles and boats for hire; to sell, lease and supply powtr and supply electricity; to own and operate electric plants and generally to carry on any of the businesses incidental to the aforesaid purposes and objects of the Company;

(f) To acquire, hold, sell, mortgage, pledge and otherwise deal with mortgages and charges on lands, or any interest therein, and agreements for the purchase and sale of land, or any interest therein, and to invest and lend money upon the security of real and personal estate, goods and chattels, stock, bonds, bills of exchange, promissory notes or other kinds of security as an individual may, and to take and receive in respect thereof, mortgages in real or personal estate or other securities, and to sell or assign such mortgages or other securities; to collect rents, manage estates, and buy and sell property of all kinds on commission, and to act as valuators, financial agents, general and special agents and real estate brokers; to acquire and hold timber limits, timber licenses and timber lands and to sell and dispose of the same; to engage in the cutting and manufacture of timber and lumber and their products of any and every kind and description, and to carry on the business of timber and lumber merchants, by wholesale and retail, and to acquire, work, equip and operate sawmills, planing mills and other works and industries incidental to the business of manufacturing and dealing in lumber and timber and their products; to carry on the industry and business of mining in all its branches, and for that purpose to prospect for, open up and develop and operate all classes of mines and deposits of metals, minerals, rocks, clay, gypsum or other deposits or formations found in or on the ground; to purchase or otherwise acquire and take and hold shares, bonds, debentures and other assets or securities of any other corporation carrying on or interested in any trade, business, undertaking or industry of a character similar to any of the Company's business or undertakings, or with which the Company shall have business relations, and while holding the same to exercise all rights and powers incidental to the ownership thereof, including the power to vote on such shares; to assume and carry out the contracts and obligations and to guarantee the indebtedness of any such corporation, and to enter into contracts for any such purpose; to sell, lease or otherwise dispose of the Company's entire undertakings, property and assets, or any part or parts thereof, at any time, from time to time, and for such considerations as the Company may see fit, and to accept in payment, in whole or in part, or by way of security for the purchase money or rent, mortgages or liens thereon, all the shares, bonds or debentures of any other corporation, or other form of security whatever that the Company may deem proper, and also to sell, dispose of and assign any such securities to any purchaser or assignee;

(g) To engage in and carry on any other business which may be deemed desirable to be carried on in conjunction with any of the Company's businesses or undertakings; to do all acts, deeds and things necessary or convenient for the exercise of all or any of the powers of the Company, or that may be deemed conducive to its interests;

(h) To apply for and obtain in any other province or in any of the territories of Canada, a license to enable the Company to carry on its business therein in accordance with the laws or ordinances of such Province of Territory.

HOSPITALS CROWDED

MAJORITY OF PATIENTS WOMEN

Mrs. Pinkham's Advice Saves Many From this Sad and Costly Experience.

It is a sad but true fact that every year brings an increase in the number of operations performed upon women in our hospitals. More than three-fourths of the patients lying on those snow-white beds are women and girls who are awaiting or recovering from operations made necessary by neglect.

Every one of these patients had plenty of warning in that bearing down feeling, pain at the left or right of the abdomen, nervous exhaustion, pain in the small of the back, pelvic catarrh, dizziness, flatulency, displacements or irregularities. All of these symptoms are indications of an unhealthy condition of the female organs, and if not heeded the trouble may make headway until the penalty has to be paid by a dangerous operation, and a lifetime of impaired usefulness at best, while in many cases the results are fatal.

The following letter should bring hope to suffering women. Mrs. Robert Glenn, of 434 Marie St., Ottawa, Ont., writes:

Dear Mrs. Pinkham:

"Lydia E. Pinkham's Vegetable Compound is so well and widely known that it does not need my recommendation, but I am pleased to add it to the many which you have in its favor. I suffered untold agonies from serious female troubles for nearly three years, and the doctors told me that I must undergo an operation, but as I was unwilling to do this, I tried your Vegetable Compound and I am only too pleased that I did so, for it restored me to perfect health, saving me the pain of an operation and the immense bills attending the same. Pray accept my hearty thanks and best wishes."

Just as surely as Mrs. Glenn was cured of the troubles enumerated in her letter, just so surely will Lydia E. Pinkham's Vegetable Compound cure other women who suffer from female troubles, inflammation, kidney troubles, nervous excitability and nervous prostration.

Mrs. Pinkham invites all women who are ill to write her for free advice. She is a daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women free of charge Address, Lynn, Mass.

COBALT MINERS' STRIKE

WESTERN FEDERATION PUTTING UP VIGOROUS FIGHT.

MINE OWNERS EXPRESS DETERMINATION NOT TO YIELD.

Cobalt, Ont., Aug. 22.—The earnestness with which the miners' union is prosecuting the strike is shown by the efforts that are made to get the new men who come into the camp seeking work to join the ranks of the strikers. In these efforts the union officials have been far more successful than the mine owners like.

Representatives of the union meet all trains, and usually their persuasions are successful and the men decide to join the union. In some cases the men are sent back from whence they came, the union undoubtedly bearing the expense. There are other times when the men are not detected by the union officials and they get away to the mines they came to work for at once, and there it is hard for the union officials to get into conversation with them.

There is no question but that the union is well posted as to the number of men at work at the various mines and is in close touch with the entire situation. It is easy for them to keep a man employed at each mine if they care to do and in this way have ample knowledge of the working force at each. The efforts of the union to prosecute its side of the contest cannot excite the slightest criticism as to its lack of effectiveness and determination, for there is no lack that can be detected.

On the other hand it is admitted by those in a position to be most interested that the Western Federation is making a determined fight in tis case, attaching more importance to winning the Cobalt contest than would ordinarily attend a labor dispute in which not more than 3,000 men are concerned.

The Western Federation has never gained a very strong foothold in eastern Canada up to the present and this is the first time that the Federation has ever been put to a trial. Its success or failure in this instance will have much to do with its future career in the dominion. Appreciating this the officers of the union appear to be sparing neither work or expense to win a victory.

That it is an even fight up to the present is admitted. The mine owners have secured many men and are working their mines to a larger or smaller extent, but have not been able to secure all the men needed and are not getting out the ore that they desire to. The fight is costing both sides a lot of money but the determination of each to win is as great as ever. There is not the slightest indication from either of making concessions or ending the struggle. There has been talk of compromise, but this has come to nothing and serious consideration is not given to such talk.

The mine owners express just as great determination not to yield to the Western Federation as they did a month ago and the union officials talk just as stoutly of continuing the fight until they win.

All this is having its effect on the general business of the camp. The business men have felt the strain almost as much as the strikers. Business has dropped off in many lines to a considerable extent. Prospects for the summer that looked very bright last spring have proven not half as profitable as was anticipated.

Despite the falling off in business, the merchants are confident of a busy autumn, holding that the strike will be settled one way or the other within the next few weeks. They do not believe that the camp has received permanent injury through the strike, holding that the latter can delay not injure the mining of ore in this district and that when the contest has been ended one way or the other the camp will have a long period of prosperity.

One feature that has caused considerable annoyance has been the reports sent out, mainly from Ottawa, to the effect that the ore values in this camp have been discovered to be failing and that this is the reason why the mine owners have not been more anxious to end the contest. This report is absolutely untrue and that there is no foundation for such statements was proven to a certainty by the investigations of the expert mining engineers who were here a couple of weeks ago.

But it learned that persistent reports of this kind emanating from Ottawa, have been circulated in New York, doubtless by those anxious to depress the stock market, and the reports are working some injury to many enterprises in this district. That there is a big stock game being played is undoubted, but just who is at the bottom of the matter has not been made known.

It is remembered that last winter just before the big slum in Nipissing a certain very prominent financial representative of big New York interestse visited Cobalt and Toronto and reports were sent out to the effect that the options on the Nipissing property were not to be exercised. The game started then and has been in progress since, to a greater or less degree. The strike was not caused by those interested in this game but came along at the right time to play into the hands of the parties in question.

That there will be a climax to all this is anticipated. What that will be is unknown, but it is believed by many here that one large property at least will have been found to have changed hands during the summer and that its stock will go skyward again is undoubted. It takes no very shrewd guess to point out that this is Nipissing, the largest and undoubtedly the richest property in Cobalt. Many rich veins have been discovered on that property this summer, and it is in a shape to mine more ore than was ever believed probable from this property. Despite the evidences of great richness the price of Nipissing stock has been kept low and it takes decidedly strong combinations to work a miracle of that kind.

A big change is anticipated when the insiders who are playing the large game have executed all their moves. The richest silver mine in Canada, if not one of the very richest in the world cannot always be so handled that its securities will command so low a price in the market. That the insiders have been able to accomplish what they have excites comment already and the opinion is being formed that it will not be long before the game will be played along present lines.

Improvements in the tone of the market are looked for during the fall and that there will again be a steady demand for Cobalt securities in the good mines is the general expectation. How soon the improvement will come is the only question that is causing any concer. A speedy change would not cause any surprise in this section of the country. Men here regard the matter a little differently than outsiders because here full information is had concerning the exact worth of many of the best mines. Confidence in this cannot be shaken by labor troubles, prices in the stock market or any other thing, except a failure of the ore bodies and of this there is no sign up to the present and none is looked for.

Synopsis of Canadian Homestead Regulations

ANY available Dominion Lands within the Railway Belt of British Columbia may be homesteaded by any persons who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother, or sister of an intending homesteader.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

1. At least six months' residence upon and cultivation of the land in each year for three years.

2. If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

3. If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

COAL—Coal mining rights may be leased for a period of twenty-one years at an annual rental of $1 per acre. Not more than 2560 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY,
Deputy Minister of the Interior.

FERNIE HAPPENINGS

much appreciated and was one of the Successful Party

(Special to The Daily News)

Fernie, Aug. 22—The position of chief of the city police force has been filled by the appointment of A. Pennycuik, late sergeant of the R.N.W.M.P., who comes highly recommended and with a distinguished record in that force. He assumed his new duties some days ago and is thoroughly reorganizing the city police department.

The Italian band gave the second of their popular concert in the opera house Wednesday night to a crowded house and those who were fortunate enough to attend were treated to an unusually attractive program, which consisted of some of the best classical music and popular airs.

The ladies of the Altar Guild of the Catholic church gave a very successful garden party last night on the grounds of G. G. S. Lindsey, who lent them for the occasion. The grounds were tastefully decorated and illuminated by electric lights and Chinese lanterns and presented a fairy like scene in the brilliant moonlight, while a great variety of amusements were provided for the patrons. The whole affair was a great success and netted a goodly sum to the funds of the guild. The music by the celebrated Italian band was mmuch appreciated and was one of the principal features of the evening.

The town never in such a prosperous condition as at present, every industry in the vicinity working overtime. The tonnage of the mines is satisfactory and the lumber mills are reaping their share of the good times and the payrolls of the different concerns are larger than they have ever been..

REAL ESTATE CUSTOMS BROKERS FIRE INSURANCE

PRESBYTERIAN PICNIC.

The Presbyterian picnic at Procter yesterday was perhaps the most largely attended of any picnic held this season. The unsettled conditions of last week encouraged many to take advantage of the double steamboat excursion. The games were heartily taken up, and there was no possibility of anyone going home hungry. The most thrilling event was the married men's race in which two important government functionaries came in almost equal. A pleasant feature of the return journey was the semi-private presentation of an address and gift, expressions of goodwill to Miss Christina Macdougall, one of the teachers, who is about to leave Nelson to take up a course of study in the normal training school at Vancouver.

INSTALL TRAMWAY.

A contract was let yesterday to the Kootenay Engineering Works of this city by manager Olcott Payne of the Hewitt group of properties in the dry belt of the Slocan for a double continuous rope tramway, 5,600 feet in length, with a daily capacity of 240 tons. The tram is to be in operation within the next 90 days. It will connect the east portal of the No. 2 tunnel of the Hewitt mine with the mill at the Wakefield mine, which is also within the field of this company's operations, enabling the company to ship concentrating ore of a much lower grade at a profit than has heretofer been possible.

ON THE RECO TRAIL

The trail to the Reco is a busy one. Twice a day the Towgood packing outfit makes a round trip to the Reco mine, where J. M. Harris has a large force of men at work taking out ore. It is good to see this high grade producer on the shipping list again. A car of grey copper ore was sent forward last week and the packers have their string of 20 humping down two more cars. We a e officially informed that the Reco has at present the richest showing in the history of the mine, says the Sandon Mining Review. A new lead has been discovered and opened up with a paystreak of ten inches assaying $1000. There is a fortune in sight at the Reco at the present moment. Government road inspector Cameron has a crew of men at work on the Reco trail which is to be put in thoroughly good condition. We understand that a tonnage guarantee was exacted before these extensive improvements were begun.

FIREMEN'S TOURNAMENT

Big Races being got up for Fire Chiefs' Convention at Fair Time

has been interesting himself to some purpose in getting together a convention of fire chiefs of the province to be held here during the coming fair and also in preparing a program for their reception and entertainment.

He has received promises from all the fire chiefs in the province to be here personally and has in addition sent invitations to other fire chiefs in the neighboring states of the union. The object of the convention is to organize the service all over the province and to make a common code of signals and a common practice in matters pertaining to the better carrying out of fire drills and to the genera administration of the department in fighting fires. As a part of the program of entertainment there has been arranged two races, a wet test and a speed race, which are open to all the fire teams on the Pacific coast, and which is for the championship of the Pacific seaboard. For these races substantial prizes will be given.

Monday, Sept. 2, Labor Day, will be royally celebrated in Sandon. A chief feature of the day's programm will be a rock drilling contest for which handsome cash prizes are offered.

LOST—At Procter on Sunday afternoon, Aug. 18, two white and black setter bitches. Anyone knowing of their whereabouts will please send information to L. B. DeVeber, at the bank of Montreal, Nelson. 106-3

NELSON NEWS OF THE DAY

The Nelson choral society will take up for the autumn wo k the oratorio Sampson.

A concert will be given this evening at 7:15 by the joint bands of the city and of the Ideal Amusement company.

There will be a special practice of St. Saviour's choir this evening at 8 o'clock. All members of the choir are requested to attend.

A business meeting of the members of the local company of the R.M.R. will be held this evening in the armory at 8 o'clock.

The regular meeting of Nelson Encampment No. 7, I.O.O.F., will be held this evening at 8 o'clock. A full attendance is requested.

The bishop of New Westminster will hold confirmation services throughout the Slocan district next month and will visit New Denver early in his tour.

J. G. Potter of the Kootenaian came in from Kaslo last night on his way to the Boundary on a holiday trip. Mr. Potter says that great preparations are being made in Kaslo for the fruit fair which is to be held there on Sept. 24.

H. A. K. Drury, assistant engineer to the board of railway commissioners passed through the city yesterday. He has just returned from Keremeos where he passed 17 miles of the extension of the Great Northern railway from the boundary line to Keremeos.

A lacrosse game has been arranged for Thursday next between the intermediate teams of Nelson and Rossland, to be played in this city. The local team has been practising steadily for some time past and hopes to win. A special practice is called for Sunday next at which all interested in intermediate and junior lacrosse are requested to turn out.
