"NOT GUILTY"

Haywood Acquitted By Boise Jury---Moyer Released

PETTIBONE TO STAND TRIAL

BUTTE UNION FINDS $25,000 FOR IMMEDIATE RELEASE OF MOYER — GREAT DEMONSTRATION PLANNED AT DENVER IN HONOR OF HAYWOOD'S RETURN.

(Special to The Daily News)

Boise, Idaho, July 29.—By consent of counsel of both sides Charles H. Moyer was today admitted to bail in the sum of $25,000. In the morning the defense will apply for bail for Pettibone. The trial of the latter was set for hearing October 1st by judge Wood. The Butte union has deposited $25,000 in the First National bank here and the bank will be security for Moyer who will be released in the morning. The frafting of bail for Moyer is because of the acquittal of Haywood. On Wednesday Haywood and family will leave for Denver, they will take John H. Murphy, the Federation attorney with them. He has been very ill and is in the hospital. Mrs. Carruthers, Haywood's mother is also in the hospital having had a nervous collapse at the close of the trial.

Boise, Idaho, July 29.—At 8 o'clock *on sunday morning the jury in the* Haywood murder trial returned a verdict of "not guilty."

Charles H. Moyer, president of the Western Federation of Miners and co-defendant with William D. Haywood, acquitted yesterday of the murder of ex-governor Steunenberg, was ordered released on $25,000 bail today by judge Wood, who presided at the Haywood trial. The attorneys for the Federation expected to have the bond ready tonight but the arrangements had not been completed at a late hour and Moyer will stay in jail tonight.

He will probably be released tomorrow and will leave for Denver, his home. No application for bail was made in the case of George A. Pettibone, the third of the alleged conspirators, but the motion was made for a speedy trial and his case was set down for Tuesday, October 1.

Counsel intimated today that they might apply for bond for Pettibone later but it is noe believed that the state attorney will consent. It has been generally claimed that the state has more incriminating evidence against Pettibone than against any of the others, while it has been generally conceded that the case against Moyer is the weakest.

Haywood today continued to receive congratulatory telegrams from all sections of the country. They came from officials of labor unions, from local unions of the Western Federation and from socialist organizations. The messages nearly all expressed the sentiment that "labor triumphed over the oppressive measures of capital."

Haywood spent the day at the cottage occupied by his family and received many callers. He expects to leave for Denver Thursday. The matter of releasing Moyer on bail and fixing the *time for Pettibone's trial came up be*fore judge Wood at 10 o'clock this morning, but was postponed until 2 p. m. to allow further conferences between counsel. Strenuous efforts were made to cesure the consent of the state attorney to release Pettibone but without avail. Moyer and Pettibone were brought into court at 2 o'clock. The latter's wife was present and broke down when the order was made releasing Moyer and holding Pettibone. It was said tonight that Pettibone may be taken back to Canyon county jail at Caldwell. The prisoners were brought to Boise six months ago on a change of venue from Canyon to Ada county.

Attorney Darrow of Chicago made the formal application for Moyer's release and objection was interposed by senator Borah, representing the state. When it came to fixing the amount senator Borah named $20,000, and that was *reasonable, said Darrow.* Judge Wood said he would approve the bond and would make it continuous so Moyer could remain at his Colorado home until wanted. As to Pettibone, Mr. Darrow urged that the earliest possible date be fixed for his trial. The next term of court begins September 1st and judge Wood said he would like to clear the calendar as far as possible before going into an extended trial. October 1st was then set as a date agreeable to all concerned.

The bond for Moyer is to be given in an unique way. The Butte local of the Western Federation of Miners is the richest in the organization and carries a deposit of from $100,000 to $140,000 in the bank. Arrangements were made by wire today to have the Butte union make $25,000 subject to draft by the First National bank of Boise. Some of the Boise banks will sign the bail bond as surety. A telegram tonight said the arrangement at Butte had been completed.

Discussion of the verdict in the Haywood case was widespread today, the consensus of opinion being that the jury had done its duty at it saw it, and should not be criticized. Editorial comment of the local papers is to this effect. The Daily Statesman says: "The Statesman in common with the great mass of the people regrets that the trial of William D. Haywood for the murder of former governor Frank Steunenberg resulted as it did. The verdict came as a great surprise, as it had long been supposed such a conclusion would not be reached, even the defense, according to the best information available, hoping for nothing more than a hang jury. But the case has been decided by an Idaho jury under the facts as they found them and the law as laid down by the court, and it is the duty of all, as in all cases, fairly and fully submitted to our constituted tribunals of justice, to accept the result in that spirit of loyalty to our courts which is the necessary attitude of mind on the part of citizens of the republic if our rights are to be protected and peace and order and good will are to reign."

The Evening Capital News says: "There was bound to be keen disappointment whatever the verdict might have been, but the jury that tried the case was one whose honor, integrity, ability and good citizenship no one doubted, and now they have expressed themselves, it will come with little grace on the part of those whose minds, made up to the contrary verdict, to complain of their decision as it would for those who are now pleased to have denounced the verdict had it been the other way. There is but one thing to do, and that is to let the case die from the public mind as quickly and quietly as possible."

The jurors continue to publicly discuss the part they played in trying to get a verdict.

Samuel Gilman, the last man to vote for acquittal said: "There has been published one statement that I want to correct. One of the jurors is quoted as saying that the jury had to spend a long disagreeable and tiresome night in order to convince two jurors that the defendant was not guilty. I want to say that they never did convince me. I believed that he was guilty and I still think that he is guilty, and I want the world know it. I simply acquiesced in the verdict of acquittal because I felt that I could not do otherwise after I found the entire eleven othe jurors consenting to the verdict, but not because that it was right; kindly make the correction for me."

S. A. P. Burns, juror No. 11, said: "I was firmly convinced when we left the court room that the first ballot would show a vote for conviction. I still retain the belief that Haywood was guilty and only changed my vote because it struck me that if the evidence presented left eight men unconvinced of the guilt of the defendant it would be impossible to convince twelve men in another trial and that it would be better to settle the question by acquescing in their decision."

Denver, Colorado, July 29.—Secretary-treasurer Haywood's return to Denver will be made the occasion of a great *demonstration in the city by the Western* Federation of Miners, and other labor organizations. The date of his arrival is not yet announced but he is expected the last of the week. Arrangements are being made to run special trains from Cripple Creek and other places to bring members of the Federation and others to Denver to join in the celebration. It is announced that one feature of the celebration will be a parade of Federation members, the first in this city in three years. Telegrams of congratulation of the outcome of the Boise trial were received today at Federation headquarters from all parts of the country and from abroad. Some of Haywood's union coworkers are proclaiming him to be the logical candidate for the presidency on the socialist ticket. As candidate for governor of Colorado last year when in prison in Idaho he received 16,338 votes.

Phoenix, July 29.—Upon receipt of the news yesterday that William D. Haywood, secretary of the Western Federation of Miners, who has been on trial for his life for the assassination of ex-governor Steunenberg, of Idaho, had been acquitted of the crime by the jury at Boise, arrangements were immediately made by the members of Phoenix Miners' Union No. 8 for a celebration of the event to take place last night.

Bonfires were lighted on the surrounding hills of the city, the Phoenix fire brigade band was secured and a monster parade was organized. The parade was perhaps half a mile in length and went through the principal streets of the city. The occasion was a propitious one for a parade, as the Garnby mines, owing to coke shortage again, were closed yesterday for the first time in several weeks.

After parading the streets, the marchers stopped at the miners' union opera house, and that building was crowded to the doors for two or three hours, while a number of congratulatory speeches were made and an interesting musical program by local talent was given. Phoenix miners' union is understood to have close to a thousand members and to be growing steadily. They express great satisfaction with the outcome of the trial of the general secretary of the organization.

SOCIALIST CONGRATULATIONS.

Chicago, July 29.—The nationalist secretary of the socialist party, J. M. Barnes, has sent this telegram to William D. Haywood:

"Greetings and congratulations; your vindication brings inexpressible joy to your comrades and fellow workers everywhere. The verdict is a complete rout for the conspirators and a signal victory for the working classes. Greetings to your companions the 'undesirable citizens', Moyer and Pettibone."

It was reported that Haywood would go to Duluth, Minnesota, to take charge of the strike of the iron ore miners.

BRYAN'S COMMENT.

Peoria, Ill., July 29.—W. J. Bryan is quoted as making the following comment on the Haywood verdict: "I am glad to learn a verdict has been rendered and that it was 'not guilty.' I watched the trial and did not see how any one could be found guilty on Orchard's testimony. Every crime he charged was one he himself suggested and it was known he was in communication with the mine owners and attempting to induce the defendants to engage in crime. The manner in which the prisoners were taken from Colorado was hardly in keeping with a fair prosecution."

BRITISH OPINION.

London, July 29.—Commenting on the trial of William D. Haywood at Boise, the Chronicle today says: "The state of society revealed by the trial is more terrible than any civil war, because it is more treacherous and is likely to be more lasting. From beginning to end it reveals a condition of brutal rapacity confronted with a savage display of violence, a condition that gives America's boasted civilization a very dubious look."

The Daily News says: "From the outset the question has been complicated by the fierce prejudices of a kind of smouldreing class war. The whole movement, both in the evidence at the trial and its accompaniments in public excitement, has illustrated the insecerity of authority in America and he profound skepticism concerning the identity of law and justice.' Both editorials refer to president Roosevelt's "undesirable citizen" statement. The News calls it one of his frequent public indiscretions, and the Chronicle predicts that it will cost him dear.

Boise, Idaho, July 29.—Judge Wood, in the district court this afternoon, ordered Charles H. Moyer, president of the Western Federation of Miners, admitted to bail in the sum of $25,000. It was announced that the bond would be ready some time tonight. Cash bail may be given.

The trial of George A. Pettibone, one of the alleged conspirators, was set for Tuesday, October 1. No application for bonds was made in behalf of Pettibone, the conference of counsel having been fruitless in this respect.

Haywood expects to leave for Denver Thursday. Moyer may leave Wednesday if there is not a hitch in the bail proceedings.

MONTREAL'S DEBT

Montreal, July 29—The consolidated debt of the city at the end of the present year will be in round numbers, about 35 million dollars. This, remarks Le Canadian, is certainly the largest debt per head of population of all towns in America.

COREY MAY LOSE HIS JOB

PRESIDENT OF STEEL TRUST TO BE ASKED TO RESIGN.

HAS BEEN DEVOTING TOO MUCH TIME TO LOVE AFFAIRS.

New York, July 29.—Persistent and apparently authentic rumors are circulating on Wall street today to the effect that William Ellis Corey, who recently returned from his European honeymoon with his chorus girl bride, will be asked to resign from the presidency of the "steel trust" at the meeting of the directors tomorrow. Alleged business dereliction, coupled with the international scandal due to Corey's matrimonial alliance with Mabelle Gilman, are said to be the reasons for the prospective action of the steel magnates.

Since the first of the year Corey has spent but three of the seven months at his office. Prior to his marriage to Miss Gilman he was absent from duty *much of the time, courting the fair ac*tress, and his honeymoon was extended far beyond the limits originally set. When he sailed for Europe with his bride last May it was understood that he would be back at his desk at 71 Broadway by the latter part of last month. Judge Gary, chairman of the executive committee, was forced to twice postpone his summer vacation by reason of Corey's failure to return at the expected time.

Many of the steel magnates who upheld Corey during the storm of criticism which rained upon him at the time of his marriage, threatening to sweep him from his $100,000 position, have now turned against him as a result of his apparent inattention to the affairs of the great corporation. While Corey professes to be certain of holding his position, it is almost certain that a warm fight will be waged against him at tomorrow's meeting by *the disgruntled* ones who are seeking for his scalp.

That Corey is preparing to spend a great deal of his time in attempting social conquests is evidenced by the fact that he has leased a mansion on Fifth avenue, in the heart of the wealthiest section, from where he will carry on a campaign to make his wife a leader in New York society. This it is pointed out by the dissatisfied directors, won't help the United States steel corporation.

The loss of his $100,000 job will not serve to financially embarass Corey, who has won a fortune estimated at from $10,000,000 to $30,000,000 on Wall street within the last few months. By speculating on a tumbling market he is credited with amassing a sum large enough to make him independent of any little $100,000 a year berth.

It was these vast profits that enabled Mr. Corey to secure a divorce from his first wife at a cost of $4,000,000 and marry a second in the midst of splendor that was the talk of two continents. It was out of this vast Wall street fortune, beside which his steel trust salary was a mere bagatelle, that he settled $2,000,000 upon the original Mrs. Corey; gave $1,000,000 as a wedding gift to Mabelle Gilman Corey; spent $500,000 in wooing her—one of the most expensive courtships in all history; gave $200,000 for her French chateau; $300,000 as a present to the chorus girl's mother, and $200,000 for the honeymoon.

Both Corey and his wife indignantly deny the repeated rumors that the latter is again to go on the stage. "An absolute, malicious lie," Corey brands the report. The story that Mrs. Corey has induced her husband to build a theatre for her, in which she can appear privately whenever the whim prompts her, is also branded as a fabrication.

Gossip as to Corey's probable successor, in case his resignation should be demanded at tomorrow's meeting, points to Alva C. Dinkey, president of the Carnegie steel company. It is alleged on Wall street that when the Carnegie concern was absorbed by the trust, an agreement was entered into that the latter should take its presidents from the former. Past appointments indicate the truth of this, as both Schwab and Corey were Carnegie executives before being elevated to the head of the United States Steel corporation.

Directors of the corporation admit that Corey is today the ablest and most statement many directors who have votes at tomorrow's meeting openly disagree.

his retirement, whether now or later, is certain unless he mends his ways.

Corey and his wife are making their home at Sherry's until such time as the furnishings of their Fifth avenue house have been completed and put in condition for their occupancy.

"All *this talk about my being ousted* is moonshine," declares Corey. In this competent steel authority in the world, and if he could be induced to give the same undivided attention to the affairs of the trust as before be became involved with Miss Gilman, it is likely that he could hold the presidency to his death. Much money and a wild infatuation for an actress, which has apparently not yet been cured by matrimony, has seriously impaired Corey's usefulness to the world's greatest trust, and

CLOSER BOND

Russia and Japan Conclude an Entente Cordiale

NEW GUARANTEE OF PEACE

EACH COUNTRY WILL RECOGNIZE RIGHTS OF OTHER IN ALL ITS COLONIES—RECENT EVENTS IN KOREA UNTOUCHED—FISHERY CONVENTION.

St. Petersburg, July 29.—The signing yesterday atthe foreign office here of the treaties of commerce, navigation and fisheries between Russia and Japan will be followed shortly by the publication of a political entente. The foreign office today confirmed the dispatch to the Associated Press from Tokio on this matter, and admitted officially that a general political agreement between the two states was in course of *preparation, that the negotiations to this end* had almost reached their conclusion and that the signatures would be affixed to the document in a few days. This entente is conceived along the same general lines as recent similar agreement between France and Japan. Under its terms Russia and Japan will mutually guarantee their rights and territory. The negotiations looking to this entente have been conducted with complete secrecy because of Japan's dislike of publicity, but it was learned today that foreign minister Iswolsky's desire to settle pending questions in the far east and inaugurate a new policy of peaceful colonization and development in the Russian provinces bordering on the Pacific was met in a spirit of moderation and conciliation on the part of Japan, which enabled satisfactory progress to be made an dassured a successful outcome. The relations between Russia and Japan are on such a satisfactory basis that the recent occurences in Korea exercised no influence upon them. Russia, who considers herself bound by the treaty of Portsmouth is content to give other nations whose hands are free, a chance to champion the Koreans.

The commercial treaty between the two countries is of a temporary nature. It expires in 1911. No provision is made for a tariff agreement but in place of an understanding the powers agree mutually to apply the most favorable nation clause.

They stipulate further that the subjects of each shall enjoy equal commercial opportunity without hindrance or discrimination and that neither shall be subject to special imposts.

The most important feature of the convention consists of an article excluding Kwantung province from the provisions of the treaty. *The fisheries convention is to* last for 12 years. There has been much dissatisfaction over the question of fishing. The convention includes the Okhtesk, Yellow Sea and Behring straits areas. It includes all sea animals, with the exception of sea otters. The coast is to be mapped into sections, the fihing rights for which will be auctioned publicly to the highest bidder. The Russian government is obliged to furnish the Russian consul at Vladivostock with two months' notice of in*tention to hold such auctions.* The Japanese concessionaries are given the right to cure fish on the beach. Russia makes unusually liberal concessions to Japanese fishing on the Russian coast and the Amur river, and it is claimed that under these conditions Japan will dominate the fisheries of the Pacific. The convention bestows upon Japanese subjects the right to fish along the entire coast with the exception of 34 inlets and rivers, to repair their fishing vessels and occupy the sheds for the drying of fish in the sun or by the fire or other necessary buildings. The Japanese are to pay the same taxes as Russians and the export of fish to Japan is declared to be free from all export duty. The Japanese concessionaries are allowed to employ Japanese labor along the coast except at the mouth of the Amur river, where they are obliged to employ Russians. In view of the cheap price of coolie labor it is believed that the Japanese will be able to beat down all competition at the public auctions at Vladivostock and become possessed of nearly all the fishing concessions.

HEAVY TAX LEVY IS MADE

RATE FOR YEAR IS STRUCK BY THE CITY COUNCIL

BUILDING BYLAWS ARE TO BE ENFORCED

The principal matters coming before the city council last night were the striking of a rate of taxation for the current year and an interpretation of the building bylaws. The first question showed that the increased cost of city government, owing, it was stated, to the cost of the power plant and of the schools, necessitated a tax of nearly four per cent. This came principally upon the land, only 50 per cent of the improvements being taxable and on this a levy for school purposes of two mills being made. It was proposed, in order to cut down the tax on land, that the levy on improvements should be ten mills instead of two. This proposal was only rejected by the casting vote of the mayor.

The other question was that of the building bylaws, there being a refusal to accept the interpretation of the bylaws as made by the city official. The matter was threshed out at some length and ended in a compromise being adopted which, by the intention, if not the letter of the bylaws, in so far as providing better fire protection, will be carried out.

There were present mayor Gillett, aldermen Hume, Selous, Annable, McMorris, Irving and Rose.

Immediately after the reading of the minutes A. Carrie addressed the council on behalf of himself and John Burns, on the interpretation of the building bylaws. He had been stopped in building the new addition to the C.P.R. telegraph office by the city engineer because he was not putting up a fourth wall to the addition on the side of the building added to. Mr. Carrie declared this unnecessary, that it had not been the practice here and if a division wall had to be put in, such an interpretation of the bylaw would prevent the extension of any store.

John Burns said that it had been the practice for the last few years to build a brick or stone addition without putting up a party wall. During the last year of the incumbency of the late city engineer building permits had been dropped. He had, however, got such a permit with regard to the new addition. He had also deposited a plan at the city engineer's office.

The city engineer said the bylaw called for main walls of a certain thickness. He had called Mr. Carrie's attention to this but Mr. Carrie had thought the interpretation incorrect. *He had therefore stopped* the work to allow the matter to be cleared up. If a room were to be extended the bylaw, as it stood would work a hardship unless the new part were allowed to be built with three walls with a fireproof ceiling and floor.

Mayor Gillett elicited that if a room were extended in the way suggested that the place of the old wall would have to be taken by fireproof pillars and beams and a wall would have to be built up to the floor level.

It seemed to be the opinion of some of the council that the bylaw hardly covered the case. The council did not wish to create a precedent for a loose interpretation which might work mischief at a later date and consequently the city engineer and the architect were invited to retire and see if a modus vivendi could not be arrived at.

The council then took up the report of the finance committee. The payments of the regular accounts were authorized. The application for an increase of salary by the driver of the fire department was not considered.

The committee recommended a tax of 37 mills on land and 2 mills on 50 per cent of improvements. Twenty mills would go for interest and sinking fund, 12 for general purposes, and five for school purposes. The city clerk explained that there were $500,000 debentures, interest and sinking fund to be met out of the general revenue $150,000 out of power plant returns and $60,000 for the new school debentures, not yet sold.

Ald. Selous thought the rate excessive, climbing up close to 4 per cent and thought that more taxation should be placed on improvements. He moved that ten mills be taxed on improvements as well as upon the land, for school purposes. This would make the rate on land 30 mills.

Ald. Annable seconded and the motion was lost on the vote of *the mayor, alder*men Selous, Annable and McMorris voting aye and aldermen Rose, Hume and Irving voting nay. The recommendation of the finance committee was then adopted.

City engineer Lawrence reported that Mr. Carrie had consented to put in a fireproof floor and to make certain fireproof partitions and he would, therefore, issue a permit in the morning.

The city engineer reported that the proposed extension of the Latimer street sewer would cost $500. Building a sewer to the new addition to the C.P.R. telegraph office would cost $600. Building a sewer between Gore and Innes street would cost $162. The water being used by the Chinese gardeners at the southern end of the city Mr. Lawrence recommended be taken into the city reservoir. He would not recommend the raising to grade of the Victoria street sidewalk. Repairing should be done.

The city engineer's report was adopted as far as regards the sewer on Gore and Innes streets and a further extension of 3 0f0eet to accommodate other houses was also included. The repairing of the Victoria street sidewalk towards Hendryx, was also authorized.

The question of the renewing of the planking on the city wharf was then discussed, a work which will cost at least $1600. The matter was left to the city engineer and the mayor to report at the next meeting of the council.

A letter was read from Messrs Macdonald and Hall saying that the dairies reported by the medical health officer for selling milk below standard could be successfully prosecuted.

The letter was filed, Dr. Rose being of the opinion that a check sample of milk should be given to the dairyman when the samples were being taken with a view to a test of the quality being made.

Dr. Rose presented for the Yale-Kootenay Ice company a petition for a lease of 225 feet more of the city's water front. The company has now 75 feet for which it is paying $25 a year, the lease expiring in 1910. There were some 70 or 80 [illegible] men of the city interested in [illegible] pany and they desired to fill [illegible] the comfront and put up bunkers [illegible] in the water the asked for lease w[illegible] and stables. If *people would be kic*[illegible]ere not given the the coming winter [illegible]ing for coal during

Ald. Annable [illegible] bunker accor[illegible]shaw no reason why coal tained at [illegible]mmodation could not be obAld. S[illegible]e C.P.R. yards.

able [illegible]ous thought the request unreasonag[illegible]nd aldermen Irving and McMorris eed with him. The further discussion [illegible] the application was deferred until the next meeting of the council.

The rate bylaw was then read and passed *up to the final reading and recons*deration.

City clerk Wasson was granted one month's leave of absence.

The council then adjourned.

ORE HANDLER'S STRIKE

MEN PROPOSE ARBITRATION OF THE POINTS AT ISSUE

COMPANY OFFICIALS DEFER THEIR ANSWER TO REQUEST

Duluth, July 29—No settlement of the ore handlers' strike is in sight tonight. What tomorrow may bring forth is another story. The men have written a letter to the officials of the Duluth, Messaba and Northern railway proposing arbitration and the officials of the company will sleep on the proposition. This afternoon the Associated Press received information that no answer would be given tonight. Tomorrow the men will undoubtedly get an answer of some sort.

Denver, July 29—James Kerwin, acting secretary of the Western Federation of Miners, received th following telegam from acting president C. E. Mahoney, who is now in charge of the Minnesota iron workers' strike:

"Conditions over range look favorable. Very few men working. Armed thugs in employ of Steel trust seeking to create violence."

At Federation headquarters it is said that 20,000 men are on strike.

SENATOR BORAH'S TRIAL.

Washington, July 29.—A resolution requesting that president Roosevelt instruct the attorney general to issue an order for the immediate trial, on the pending indictment for alleged implication in alleged timber land frauds, against senator Boran of Idaho, one of the attorneys for the prosecution in the Haywood trial, was unanimously adopted at a meeting of the central labor union here tonight. It declared in the resolution that the indictment of senator Borah marks a stigma which should be removed immediately and that a speedy trial would give him an opportunity to prove whether he is an undesirable citizen. A telegram of congratulation was also sent to William D. Haywood, secretary-treasurer of the Western Federation of Miners upon his acquittal.

EVADING RATE LAW.

Washington, July 29.—Recently information was received by the inter-state commerce commission that certain western and southwestern roads were engaged in alleged evasions against the rate law by issuing passes to persons not entitled to them under the law. In the case of the Missouri, Kansas and Texas railway system, the information was specific, the allegation being that the officials of that system were issuing passes to so-called "bondsmen." An order therefore has been promulgated by the commissioner requiring the officials of the system to answer the charges made and state the ground on which such action is justified. The commerce commission will fix a time the companies may be heard.

COURT OF CRIMINAL APPEAL.

London, July 30.—The house of commons at 6:35 this morning, after an all night sitting, passed the third reading of the bill establishing a court of criminal appeal and providing for the right of appeal against convictions for crime, similar to that now in existence in civil cases.

SQUANDERING HIS WEALTH.

Montreal, July 29.—The transfer of two papers from liberal to conservative control is announced by D. B. Russell. The five daily papers in St. John, N. B., have been heretofore liberal in politics and though Russell declined to be interviewed he admitted that John McKane, of New Castle, N. B. a wealthy conservative, had purchased the Telegraph and Times. The purchase price is not stated, but Mr. Russell remarked that the money had been paid over.

EVIL RECORD

Government By the Lash and Bullet

FEARFUL STATE OF CONGO

QUESTION TAKEN UP IN HOUSE OF LORDS—INTERNATIONAL CONFERENCE OF POWERS MAY BE RESULT OF INDIGNATION OF PUBLIC.

London, July 29.—"The system of government in the Congo independent state is one of unrestrained tyranny, enforced by the lash and the bullet, by cruelty and murder." These words were spoken by lord Monkswell who read the Congo question in the house of lords today, and moved for the papers. The attendance in the house was small.

Continuing, lord Monkswell said: "The Congo goernment was a powerful engine of greed which impudently and insolently violated the limitations under which its rights over this territory have been granted."

The speaker quoted authorities to support his statement and added that especial responsibility attached to Great Britain as because of her determined action, the king of Portugal and not the king of Belgium would at this moment have been the ruler of the Congo.

The archbishop of Canterbury declared that the Congo was one of the most disheartening and humiliating of contemporary questions. He said that it was a ghastly irony to read today the words of the address presented to king Leopold by thecity of London in 1884, congratulating his majesty upon his "bloodless victory." He declared the British government should be reminded of the sense of responsibility of all Englishmen in this matter.

A general debate on the Congo question followed and a number of bishops were among the speakers.

The earl of Minto advocated another international conference in the matter of *the Congo and failing in that the ap*pointment of more British consuls in the upper Congo.

Lord Fitzmaurice, under secretary for foreign affairs, speaking for the government, said they were not blind to the fact that this matter was attended with grave difficulties.

The government had asked the Congo, he said, not to disregard the experiences of previous governments or native states and had instanced the early history of British East India. The present system, the speaker said, was certain to have evil consequences. Lord Fitzmaurice admitted that the house of lords had a right to ask what progress was being made, but he said it was an international question. If the house took any sudden rash action it would run the risk of injuring the cause it had at heart.

At the conclusion of lord Fitzmaurice's address, lord Monkwell withdrew his motion.

TO BUILD TO GERRARD.

During his recent tour of the Kootenays vice-president McNicoll, of the C. P. R., was greatly impressed by the inadequate facilities for handling freight via the Arrow lake and Nakusp-Slocan branch and he emphatically expressed the opinion that the extension of the Arrowhead branch to Gerrard should no longer be delayed. He intimated that immediately upon his arrival in Winnipeg on his way to Montreal he would consult with Wm. Whyte relative to the immediate placing in the field of a survey party to locate a route between Arrowhead and Gerrard. If Mr. McNicoll's views pervail with Mr. Whyte, work on the new extension may be underway before the snow flies. The construction of this piece of railway will put new life into the Lardeau district and materially assist in the rapid handling of freight. The line offers no engineering difficulties of moment, an easy grade being obtainable the entire distance.

ANGLO-RUSSIAN ENTENTE.

London, July 29.—It is announced that negotiations between Great Britain and Russia have resulted in an agreement amicably adjusting all outstanding differences on the Indian frontier and in Persia. Both powers hvae consented to the delimitation of their spheres of interest in these regions. Sir Arthur Nicolson, the British ambassador at St. Petersburg is at present in London arranging final details of the matter.

THE VERDICT AT BOISE.

The acquittal of William Haywood, ...cretary of the Western Federation of ...iners, on the charge of complicity in ...e murder of ex-governor Steunenberg, ...as an outcome of the long trial at ...oise that will occasion very little surprise. The state signally failed to adduce evidence in corroboration of Orchard's confession that would carry sufficient weight with an unprejudiced jury to lead them to find a verdict of guilty, ...ntailing, as it would have done, the death penalty upon the accused.

From the conduct of the state's case it would appear that those entrusted with the prosecution had been more concerned in convicting officers of the Western Federation of complicity in Coeur d'Alene and Colorado crimes than in bringing home to the actual perpetrators their guilt. The state had the benefit of Orchard's confession and for twelve months they had all the resources of the state and of the Pinkerton detective agency with which to work up a case. As a matter of fact, the state failed to adduce corroborative evidence of Orchard's confession in any vital particular. Some corroborative evidence was adduced, but it was not of such a nature to convince any ordinary jury of the bona fides of Orchard's awful revelations.

The acquittal of Haywood will be the occasion of great rejoicing on the part of labor organizations all over the American continent. The state's attitude towards him from the time of his illegal arrest was such as to arouse sympathy and to make of him a martyr. But the state's failure to establish clearly and unmistakably the guilt of some persons or organization in connection with the terrible record of crime in the Coeur d'Alenes and Colorado must be regretted by every law abiding citizen. Whilst very few men would care to hang a dog on Orchard's confession, it cannot be denied that the crime he said he committed, were committed and that a relatively large number of men have been done to death without cause or provocation. It is not reasonable to assume that Orchard killed for the mere love of slaughter. The facts disclosed during the progress of the trial indicate an organized conspiracy on the part of some persons or organization and the officials of the state of Idaho must stand condemned for not having clearly exposed the criminals, in view of the unrivalled opportunities at their disposal to get at the facts.

EDITORIAL NOTES.

One of the kindliest tributes to sir Wilfrid Laurier's work at the imperial conference appears in the Ottawa Journal, an independent conservative newspaper, in the form of a contribution from the pen of Mr. John S. Ewart, K. C., a pronounced and very active opponent of the Laurier administration. Mr. Ewart says, in part:

"Sir Wilfrid, taking out his chalk on the first day of the conference, put this across the records: 'Upon one thing we are all agreed, and I believe that if we can keep this in view we can never go astray, that is to say, that if the British empire remains as it is now—a proper and always permanent recognition of the principle that every community knows best what does for itself—we cannot go wrong.'

"The colonial secretary concurred 'in the principle which the prime minister laid down, that is to say, the freedom and independence of the different governments which are part of the empire.' And Mr. Asquith and Mr. Winston Churchill spoke to the same effect.

"Two points principally remain in one's mind as one rises from perusal of the records of this 1907 conference. The first of these is the facility with which all suggestions of imperial federation, all proposals for even a commencement at it, are turned aside by the principle of colonial self-government, if, as sir Wilfrid says, 'we can keep this in view.' Show us, if you can, how Canada can be a completely self-governing community and yet in some respects be under other control than her own. If you cannot then tell us, plainly, whether you want Canada to be self-governing or not.

"And the second point is the wonderful way that sir Wilfrid keeps his eye on the ball (as the golfmen say) and keeps control of his clubs. He is an extraordinary expert player at that great game of politics. Mark his patience. Exerting far more influence at the conference than all the others, he remained silent while the others spoke more than 600 pages of the 622 of debate. He made but one long speech (on preferential trade), one short one on the all-red route, and the rest of his remarks consisted of little more than reminders of the chalk marks.

But let us not forget that sir Wilfrid had the enormous advantage not only of Canadian training in ideas of self-government, but in the fact that he was well assured that Canada agreed with all he did. There is no reason to think that had Mr. Borden been at the conference his attitude would have been in any particular different from sir Wilfrid's, and sir Charles Tupper has very generously published his approbation of sir Wilfrid's actions.

"Nevertheless, sir Wilfrid was for the moment in command. He did his work magnificently. Canada does well to honer him for it upon his return to his native land."

EDITORIAL NOTES.

There was an election in the county of Hants, Nova Scotia, the other day, of which we are fated to hear less than was one time fondly hoped, remarks the Montreal Herald. The election followed a vacancy caused by the elevation of Mr. Drysdale, who represented the riding in the legislatue, to the Bench. Mr. Drysdale's majority in the general election was about fifty. Hants is a riding in which the parties are of about equal strength, the majorities never been large. Into Hants, therefore, were flung scores of Conservative orators, loaded to the brim with all the "scandal" literature evolved by ingenious party managers out of the past two sessions' work at Ottawa. The hope was that they would elect their man, that the result and the cause of it would be trumpeted abroad, and that workers and candidates everywhere would take heart. Alas! the Liberal candidate was elected by about two hundred. Vanity of vanities; when wil something really good turn up to cheer the tired wayfarers?

SOLD BOOZE ON SUNDAY

Frank, July 29—Isaac Beresford, proprietor of the Sanitarium hotel, was fined $50 and costs for having his bar open last Sunday night. His bartender, John Hislan and four guests were also fined $10 each and costs by inspector Belcher of the R.N.W.M.P.

BEST MEDICINE IN THE WORLD FOR COLIC AND DIARRHOEA

"I find Chamberlain's Colic, Cholera and Diarrhoea Remedy to be the best remedy in the world," says Mr. C. L. Carter of Skirum, Ala. "I am subject to colic and diarrhoea. Last spring it seemed as though I would die, and I think I would if I had not taken Chamberlain's Colic, Cholera and Diarrhoea Remedy. I haven't been troubled with it since until this week, when I had a very severe attack and took half a bottle of the twenty-five cent size Chamberlain's Colic, Cholera and Diarrhoea Remedy and this morning feel like a new man." For sale by all druggists and dealers.

THE GIBSON BATHING GIRL

A series of Charles Dana Gibson's splendid drawings, entitled "The Gibson Bathing Girls" will be given with the New York Sunday World, beginning with July 28. Each Sunday a Gibson picture on separate sheet of plate paper, size 10x15 inches, will be given to every reader of the Sunday World. Each picture is ready for framing and fit to decorate any home. Begin Sunday, July 28, and get the set.

Minard's Liniment Cures Diphtheria

Digby, N.S.
MINARD'S LINIMENT CO., Ltd,
Gentlemen—Last August my horse was badly cut in eleven places by a barbed wire fence. Three of the cuts, small ones, healed soon, but the others became foul and rotten, and though I tried many kinds of medicine they had no beneficial result. At last a doctor advised me to use MINARD'S LINIMENT and in four weeks' time every sore was healed and the hair has grown over each one in fine condition. The Liniment is certainly wonderful in its workings.

TREATING COBALT ORES

NEW METHOD DEVISED BY SALT LAKE SMELTING COMPANY

WHICH IT IS CLAIMED WILL SAVE 98 PER CENT OF VALUES.

New York, July 29.—It is claimed that that after a series of elaborate tests covering a period of several months, the Salt Lake Smelting and Refining company has succeeded in extracting on a commercial basis 98 per cent of silver, Cobalt and by-products that have heretofore provided a stumbling block in the treatment of Cobalt ores. The importance of these chemical tests must in the future have an important bearing upon the coming development of that camp, as previously the smelters, while allowing for the silver contents of the Cobalt ores, made but a nominal allowance for the cobalt, arsenic and nickel found in them.

R. J. Evans, general manager of the Salt Lake Smelting and Refining company, and his head expert, Charles A. Gage, have been in New York during the past few days submitting the results of the tests on the Nipissing ores they have been working on. The directors of the Nipissing Mining company are understood to be ready to make an appropriation of $65,000 for the immediate erection of a plant to be constructed along the lines suggested by Mr. Evans and Mr. Gage.

Should this plant show up as expected, a much larger outfit will be authorized later. Before leaving for Europe, Mr. Newhouse is said to have left instructions for the immediate construction of such a plant, it being his opinion that if the directors did not sanction the company making such an expenditure, he would be willing to pay for such a plant out of his own pocket, so sure was he of the results claimed.

When questioned about these tests, Mr. Earle, the president of the Nipissing company, said there were still additional tests to be made before the directors would feel satisfied to take definite steps in the way of ordering an experimental plant.

The process employed in securing the separation of the metals is explained as being very simple. The ores are smelted, and the subsequent separation is obtained electrolytically. The test was made at Salt Lake, the shipment representing a 414-pound lot of Nipissing ores. The smelting company recovered 97 per cent of the silver, 90 per cent of the cobalt, and at least 85 per cent of the arsenic and nickel contents of the ore. The cobalt specimen which was brought to New York is the first electrolytis cobalt ever refined in this country. The cost of the treatment, they assert, is not prohibitive, so that even medium-grade ores may be treated in that fashion.

If this process turns out to be all that is claimed for it, it means a big increase in the values of the ores of the Cobalt companies. On the high-grade ores it will mean an extra profit of from $250 to $400 a ton, while on the lower grades the profits will advance from $20 to $50 a ton.

The smelting of the Cobalt ores up to the present time, according to Hiram W. Hixon, in an adress at Toronto, and the recovery of the valuable metals, has proved a difficult problem. Miners, being suspicious of smelters who will not pay the full market value of the metals, have attempted to treat their own ores, with the hope of recovering greater profits. The success of this plan is doubtful, as the many conflicting interests will naturally become restive unless immediate returns are obtained, and cash returns follow the shipment of ore.

The nature of the problem will not admit of such results, and the time necessary for the treatment of the ores, as well as their great value, necessitates the locking up of a large amount of working capital. This is not satisfactory to the average mine promoter, who wishes to earn dividends.

Mr. Hixon's experience in the custom smelting business suggested a system of smelting these ores, based on well-established principles, which is herewith submitted:

"The ore should be sorted," he says, "and the metalic silver separated for direct smelting by cupellation with lead or melted in crucibles and poured into bars to be sold to refiners. The ore should be ground in a dust-proof ball mill to such a fineness that it can be accurately sampled.

"The ground ore should be roasted in a suitable furnace to expell the arsenic and sulphur. The gasses from this roaster should pass through a long sheet-iron dust chamber to cool it, and then be passed through a bag house, where all the dust and votalized arsenic will be recovered.

"The roasted ore should then be brisquetted with a strong bond of red clay and lime water and dried or frozen, after which it should be smelted in a blast furnace with about an equal weight of galena or galena or lead concentrates containing about 50 or 60 per cent lead. The necessary iron and lime would have to be added to the charge to produce a slag of the proper composition.

"The sulphur from matte formation would be supplied from the galena, and the arsenic remaining in the ore will form some speiss. The base bullion resulting from this smelting to be sold to lead refiners, or refined to separate the silver.

"As regards the percentage of metals that could be recovered by all these various smelting and resmeltings, it is not possible to make any statement based on actual results. The smelters who bought these ores have not seen fit to give out any information, but the fact that they have allowed nothing for nickel, cobalt or arsenic is significant. To make even an attempt at a partial recovery of each of the metals looks like a long, tedious process, and the most complicated, from a metallurgical standpoint, that has been presented for solution. Under these conditions any association of miners attempting to smelt their own ores is hardly likely to succeed."

It will be noted from these remarks that the success of the new process means a new era for the Cobalt camp in the way of receiving an income from ores that are now yielding nothing.

SAYS THIS IS BEST

A leading health journal in answering the question, "What is the best prescription to clean and purify the blood?" prints in a recent issue the following:

Fluid Extract Dandelion one ounce;
Compound Salatone, one ounce;
Compound Syrup Sarsaparilla, four ounces.

Shake well and use in teaspoonful doses after each meal and at bedtime.

A well-known physician states that these are harmless vegetable ingredients, which can be obtained from any good prescription pharmacy.

This mixture will clean the blood of all impurities. In just a few days the skin begins to clear of sores, boils and pimples. It puts vigor and energy into run-down debilitated men and women. For many years Sarsaparilla alone has been considered a good blood medicine. But while it built up and made new blood, the impurities remained within and the good accomplished was only temporary. Sarsaparilla, however, when used in combination with Compound Salatone and Extract Dandelion, works wonders. This combination puts the kidneys to work to filter and sift out the waste matter, uric acid, and other impurities that cause disease. It makes new blood and relieves rheumatism and lame back and bladder troubles.

SUPREME COURT OF CANADA.

Argument of Counsel to Be Limited to Three Hours.

The new rules of the supreme court of Canada, recently promulgated, which will be effective at the October sittings of the court, make a novel provision with regard to the time to be occupied in future by counsel in argument before the court. By new Rule 38, only three hours on each side will be allowed for argument, and no more without special leave of the court. The time thus allowed may be apportioned between counsel on the same side at their own discretion. One interpretation of this rule is that the appellant's counsel, who has the burden of the attack upon the judgment appealed from, will have less time accorded to him to open his case than the respondent's counsel, because the appellant's counsel must reserve some portion of the three hours thus allowed him for reply. In the English courts and in the courts of the province of Ontario there is no rule limiting the length of addresses by counsel who, as officers of the court, are presumed not to unnecessarily prolong their arguments or waste the time of the court.

JAPANESE BOND SALE

New York, July 29—Final payments were received today by the New York banking representatives of the imperial Japanese government on the new Japanese loan of 1907, for $23,000,000, which was subscribed by New York, London and Paris capitalists. The proceeds of this issue are to be applied to the redemption of the 6 per cent sterling loans issued in 1904 for an aggregate of $110,000,000. The bonds are payable in March, 1947, but the Japanese government reserves the right to redeem part or all of them at any time after March 12, 1922, on giving six months' notice.

TAKE THE POSTMASTER'S WORD FOR IT

Mr. F. M. Hamilton, postmaster at Cherryvale, Ind., keeps also a stock of general merchandise and patent medicines. He says: "Chamberlain's Colic, Cholera and Diarrhoea Remedy is standard here in its line. It never fails to give satisfaction and we could hardly afford to be without it." HAGUE PEACE CONFERENCE

Editor Stead Criticises Course of English Delegates

London, July 29—Wm. T. Stead, editor of the Review of Reviews, who has been conducting a publication at the Hague devoted to peace conference matters, when interviewed on the progress of the peace conference, delivered a serious indictment against the British delegates. He said: "Until last Saturday when, under the pressure of angry protests, the British government instructed its delegates to make a belated declaration of adhesion to the American plan of obligatory arbitration, the British delegation has done nothing for peace, nothing for arbitration, nothing, in short for anything that British people believed they had been sent to the Hague to do. Their action, and still more inaction has been the amazement and despair of all friends of peace. I do not exaggerate in the least when I say that as far as every principle the British government is supposed to have at heart is concerned, it would have been much better to have had no delegates at all than the men who have shown skepticism where they ought to show enthusiasm, who have repelled where they ought to have attracted, who have been a wet blanket upon every aspiration of peace crusaders, and who have succeeded in utterly destroying England's reputation as the leader of the peace loving nations of the world. As members of a conference striving for peace ideas, they are about the most incompetent set of beings that ever achieved an unmitigated failure.

"Great Britain having abandoned her trade and national position, the leaders have fallen into the hands of the United States, and we taught the Americans that the Germans are warmer friends and stouter allies than the British.

NOTICE is hereby given that sixty days after date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase the following land, on Kootenay lake shore, in West Kootenay district: Commencing at a post marked "T. G. Procter's S.W. corner," planted at the S.E. corner of lot 1683, thence north 20 chains; thence east 5 chains; thence south, following meanderings of lake, 20 chains; thence west to point of commencement.

Dated this 11th day of April, 1907.
T. G. PROCTER
J. W. SMITH, Agent.

NOTICE is hereby given that 60 days after date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase the following described lands situate in West Kootenay district: Commencing at a post marked "R. H. Ross," placed half a mile north of Summit creek, adjoining Angus Curry's north and south line on the west side, running 40 chains north; thence 40 chains west; thence 40 chains south; thence 40 chains east to place of commencement.

Located the 4th day of April, 1907.

Synopsis of Canadian Homestead Regulations

ANY available Dominion Lands within the Railway Belt of British Columbia may be homesteaded by any persons who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother, or sister of an intending homesteader.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

1. At least six months' residence upon and cultivation of the land in each year for three years.

2. If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

3. If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

COAL—Coal mining rights may be leased for a period of twenty-one years at an annual rental of $1 per acre. Not more than 2560 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY,
Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

NELSON NEWS OF THE DAY

There were several minor matters disposed of in chambers yesterday morning.

The band concert on Sunday afternoon was much enjoyed by the large crowds of people at the park.

Mrs. W. Shaw and son and Miss R. Flynn of Toronto, are visiting their brothers here, Messrs G. and R. Flynn.

Two ladies caught 22 trout in one hour and a quarter, averaging over a pound each, above Bonnington on Sunday evening.

Sunday and yesterday were the warmest days yet experienced this summer, the mercury rising to 85 degrees on Sunday and to 87 on Monday.

Miss S. L. Twiney, accompanied by Miss Lucille Twiney of Minneapolis, left yesterday for a fishing excursion to the north fork of the Kettle river.

There was a meeting of the entertainment committee of the 20,00 club yesterday afternoon to arrange for the promenade smoking concert on Aug. 8.

S. S. Taylor has wired and written to the railway commission with regard to the protest made by Nelson against the freight rates into the city, but so far has had no reply.

The secretary of the 20,000 club will in future keep a list posted in his office of persons enquiring through the mail about fruit lands. This list will be available to any members interested in real estate.

The legal vacation starts tomorrow and will last for one month. Judge Forin is not leaving the city and chambers will be held as usual. There may be a sitting of the county court, if the parties so desire, to take the case of Lindsay vs. Brydges.

In order to show his interest in the work of the 20,000 club and to encourage the interest of others, C. Burt has offered to donate $100 to the club's funds if 20 merchants will each subscribe $5. The check is in the hands of the secretary who means to keep it if there is half a chance.

A. J. Macmillan, chief clerk in the Winnipeg car service department of the C.P.R. has been appointed car distributor for the western district, which includes the main line fom Swift Current to Laggan, the Crow's Nest and Edmonton branches. He takes up his work th's week. W. B. Harris, at present car distributor in the western district, will become fuel agent with headquarters in Calgary.

A public meeting was held at Thrums on Saturday night to arrange for the new school for the district which has been recently authorized. James Tarry presided It was decided to erect a frame building 24x18 feet and a site about a mile above the station and about in the centre of the district, was selected and all other details settled. Messrs. Powers, F. Tarry and A. Coutts were elected trustees and the trustwith D. Morrison, J. Hall'day and P. G. Ebbut form the building committee. Work will commence at once so that school may eb opened early in the fall. Things are going strong at Thrums, particularly since W. J. Collins sold his ranch at what must be about record price for this district, viz., $367 an acre.

Fourteen men are now employed on the Cambrian mine at Moyie, says the Leader. This is the mine owned by the Black-Mackay company, the name of which is to be changed by due process of law to the Cambrian Mining Co., Ltd. The boiler and hoist are installed and the pile driver is ready for use. The pile driver is built on a raft and the frame towers to the height of 60 feet. Piles will be driven out into the lake for a distance of 250 feet, at which point there is 60 feet of water. Here a water tight casing will be built and sunk to bed rock, and the work of sinking the shaft proper proceeded with. The steel shoe for the casing is here and timber for it is on the way from Nelson. The driving of the piles will be started next week and there will be no slackening in the work from now on. When the shaft is ready for sinking three shifts will be employed.

WIRE WOUNDS

My mare, a very valuable one, was badly bruised and cut by being caught in a wire fence. Some of the wounds would not heal although I tried many different kinds of medicine. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better, until after three weeks the sores healed and best of all the hair is growing well, and is NOT WHITE as is most always the case in horse wounds.

Weymouth. F. M. DOUCET

MINING RECORDS

Cetificates of work have been issued on the Winnipeg to J. C. English; on the Silver Bell, Empire, Red Fox, Jackson and Black Prince, all for work done on the first named, to J. Williams; on the J.C.P., to R. J. Steele. W. Bennett has recorded the location of the Mountain Belle, between Barnett and Stewart creeks; E. Peters the Bank Roll on Wild Horse creek and W. R. Brown the Hart on Sproule creek.

ELECTRIC CHAIR FOR ASSASSIN

New York, July 29—In the electric chair at Sing Sing prison this week Salvatore Gouvernale, the assassin of two New York policemen, will expiate his crime unless governor Hughes should see fit to interfere with the carrying out of the sentence of death passed upon the Sicilian murderer.

Gouvernale was convicted of killing policemen Selleck and Sechlor in a hall way where they had chased him to arrest him for firing a shot at another Sicilian in Washington Square. As the officers entered the dark hallway Gouvernale turned and fired two shots, each inflicting a mortal wound. Lieut. Fogarty overpowered the assassin and lodged him in jail.

Since he has been incarcerated in the death cell at Sing Sing the assassin has broken down and for weeks has been in a condition bordering on collapse due to the most abject terror. The braggart air he maintained during the trial has deserted him. The man who went on the stand and testified that he shot the two policemen in self defense because he thought they were going to kill him, and whose nonchalance was the cause of much newspaper comment, has entirely lost heart now that he is face to face with death. Gouvernale is small and effeminate in appearance and does not look the hardened criminal who would shoot down human beings in cold blood.

BANISH LIVING STATUES

London, July 29—The order of the council prohibiting the exhibition of living statuary in the music halls became effective today and as a result hundreds of stage women are out of employment. Numerous protests have been made and it is possible that the order may be later annulled. The crusade against living statues has been waged for months by the clergy and church people, who allege that the exhibitions were grossly immoral.

Minard's Liniment Cures Colds, &c.

THE DOCTOR AWAY FROM HOME WHEN MOST NEEDED

People are often very much disappointed to find that their family physician is away from home when they most need his services. Diseases like cramp, colic and cholera morbus require prompt treatment and have in many instances proven fatal before medicine could be procured or a physician summoned. The right way is to keep on hand a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. No physician can prescribe a better medicine for these diseases. By having it in the house you escape much pain and suffering and all risk. Buy it now; it may save your life. For sale by all druggists and dealers.

BERLIN'S "RIPPER" SCARE

Berlin, July 29 — The recurrence of a "ripper" outrage has caused another wave of nervous fear and dread to break out in the city. A woman, on opening the door of a flat, surprised a man in the act of striking down an 11 year old girl. The woman screamed and the man succeeded in getting away. This occurred in the vicinity of the previous outrages. The residents of this section are in such a state of nervous excitement that they fell upon and beat a harmless man because he had offered children a piece of candy.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Cumberland, B.C.," will be received at this office until Monday, August 19, 1907, inclusively, for the construction of a Public Building, Cumberland, B.C.

Plans and specifications can be seen and forms of tender obtained at this department and on application to the Postmaster at Cumberland.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by a accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The department does not bind itself to accept the lowest or any tender.

By Order.

FRED GELINAS, Secretary.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

JAMES D. WIGHTMAN,
W. A. CALDER, Agent.

22nd June, 1907.

OLIVER WILL VISIT B. C.

MINISTER OF THE INTERIOR NOW ON HIS WAY WEST.

HE WILL INVESTIGATE LAND MATTERS IN RAILWAY BELT.

Hon. Frank Oliver, minister of the interior, passed through Winnipeg last week on his way to this province. Before visiting British Columbit he will spend a few days at Edmonton.

The object which the minister has in view in connection with his present trip to the west, as explained by him to the representative of the Winnipeg Free Press, is to secure information regarding Dominion lands in the province of British Columbia. Many years ago when the arrangement for the land grant to the Canadian Pacific was made, a strip of twenty miles wide on each side of the railway through the province of British Columbia passed eventually from the province to the Dominion. This land was long thought to be, for the most part, valueless.

In recent years, as the lands of the prairies have been more largely taken up, and as attention has been called to the value of the lands in certain portions of British Columbia for fruit growing operations, the strip in the province belonging to the Dominion has increased in importance and a demand for it has arisen. Ranchers have become anxious to rent large tracts as grazing lands for cattle and sheep, and farmers and fruit growers have desired to homestead quarter sections, and to buy adjoining quarters or more. Occasionally there has been a clash between the rancher and the homesteader. The rancher paid two cents per acre as rental for the lands which he used. The homesteader paid the market price for the lands which he bought, part of the country was in the dry belt and there were many questions connected with irrigation, in reference to which information was sought by the government. Beyond the Cascades, part of the country was very wet and all the conditions were different. The number of immigrants entering the district was not excessive, but they were numerous enough to render it essential that the department of the interior should have exact information regarding the conditions prevailing in all parts of the province. The climate was attractive in the Sunset province, and in the years to come there would be an increasing movement into all portions of the country where there was arable land.

Mr. Oliver recently completed a tour of the northern states, visiting a number of the agencies maintained by the department. He had made inquiry into immigration matters in New York city, where an officer of the Dominion government is stationed to prevent the entrance into the Dominion by way of New York of undesirable immigrants. He found that the American officials were giving every assistance to the Canadian officers in this work and that all undesirables were being turned back at that port of entry. The American authorities did a similar work at Quebec and received similar assistance.

"How does the immigration into the United States compare with the immigration into Canada?" Mr. Oliver was asked.

"Immigration into the United States is a very different problem from immigration into Canada," was the reply. "The immigrants who come to the United States do not go on the land, and have no intention of doing so. A large proportion of them do not leave the state of New York. Hundreds and thousands go to Chicago and to other large cities of the north. There are no cheap lands of value in the United States, to which they can go, and they are creating a condition of congestion in all the large cities of the country. For that reason the United States has adopted a policy of restriction, rather than a policy of encouragement. In Canada very different conditions prevail. Here the large body of immigrants go directly to the unoccupied lands of the west and regain at once to add to the real wealth of the country. For this reason we are pursuing the policy of encouraging the movement of the better class of European immigrants to the new lands of Canada.

"When I was in Washington, I met, among others, Oscar Straus, who, as secretary of the department of commerce, has also charge of the immigration work. Mr. Strauss said to me that fifty years ago the United States was in the same relative condition in which Canada is now, and at that time the United States pursued the policy which Canada is now following. The United States had then large quantities of available public land which the immigrants could secure, and which it was to the public interest to have brought under cultivation. All of this lands has now been exhausted and there is none left even for the surplus population of the country. For this reason the attitude of the country toward immigration had undergone a complete change.

"From Washington we went to Jamestown where we attended the exposition. Jamestown is, from the point of view of historical interest, on of the most pleasant cities to visit on the continent. It was the site of the first settlement on the coast, and many of the more important events of the civil war and in the war of the revolution occurred within a few miles of it. The exposition itself is all that could be desired and was visited by large numbers of people. we were considering the question of the establishment of an exhibit there. In view of the fact that the exposition is located in the southern state of Virginia, which is itself looking for immigrants, we decided that it would be unwise to incur the expense of maintaining an exhibit.

"In certain of the states of the south, there is a movement in the matter of immigration very similar to that which we are conducting in Canada. The negro population on which the country has depended for labor is not altogether satisfactory in this regard, and it appears several will begin a work similar to ours in connection with the reception and distribution of immigrants."

"What is the prospect for immigration from the United States to Canada in the future?" was asked.

"The bulk of the people who have come to the Dominion have been from the west," replied Mr. Oliver. "That is from Iowa, Kansas, Nebraska, Minnesota and the Dakotas. Last spring at an early period numbers of people came from all of these states to the west. At the time of their leaving spring had opened at their homes. They came west and found the season very late. Then there occurred the tie-up on the railways. Reports regarding this condition, and in reference to the severity of the preceding winter, were sent back to the friends of the immigrants, with the result that there has been a falling off in the movement toward the Dominion. Then there are very clever railway and land men in the United States who never miss an opportunity to turn things their way, and every possible use was made by them of the reports which had come from Canada with reference to the winter and the spring. A number of these men got together and arranged to attempt to divert the people who were coming to our country to the south, to the Panhandle of Texas. Owing to the fact that the two cent rate had gone into effect in the northern states, the railways are not granting the same very low rate in the north which were granted last year. In the south the two cent rate has not gone into effect and the railways are granting very low rates into Texas. For these reasons and others we do not expect that the movement from the United States will be as great as it was.

"The American settlers contributed very largely to the progress of the west during the past few years. Those who came to Canada did not become because the land in their own country was poor. They came because they could here obtain a large amount of land at a very low price. The opportunities to do this, while still great, are not as great as they were and for that reason, also, we will find it more difficult to secure large numbers of the American people as colonists in the future. The class of Americans who came to us were, however, of the best type. We got very few people from the cities. They were uniformly from the country, men of means who had been reared on the land, who were actively engaged in farming and who desired to continue to farm. There is a large surplus population in the rural districts of the United States, however, and large numbers of these people will continue to come to Canada as long as there is good land which can be offered to them either as homesteads or for sale at a low price."

TRADES AND LABOR CONGRESS.

Twenty-ThirdAnnual Session to Convene In Winnipeg, September 16.

The following convention call has been issued from the office of the secretary-treasurer of the Trades and Labor Congress of Canada:

To the officers and members of Trades and Labor Councils, National Trade Unions, Federal Labor Unions and International Local Trade Unions in the Dominion of Canada.—

Greeting:

Fellow Labor Unionists and Brothers,—

The twenty-third annual session of the Trades and Labor Congress of Canada will convene in the Legislative Council Chamber, Broadway, City of Winnipeg province of Manitoba, beginnig at 10 o'clock, Monday, September 16th, 1907, and will continue in session from day to day until the business of the convention has been completed.

Last year, notwithstanding the fact that the convention was held in the extreme west of Canada, namely, at Victoria, the convention, both in point of numbers and enthusiasm, excelled anything in the history of organized labor in Canada.

With the convention in Winnipeg, the future capital of the British Empire, and fairly accessible, both as to transportation and time, all past records should be broken. The approaching convention is expected to be a climax of the great work of organization for the past twenty-five years in Canada. Your body cannot afford to be unrepresented.

While the organization of the workers has gone on most successfully, the efforts of our opponents have never been greater or more pronounced, and the necessity for close touch amongst all branches of labor in every part of Canada has never been more marked. Matters affecting the every-day life of the toiler will be the subject of discussion on each day of the convention, and the importance of your organization entitles it to be heard in the consideration of all these great questions.

The laws passed during the last session of the Dominion Parliament, as well as those enacted by the various provincial legislatures, will afford much room for discussion, and will require the exercise of the best thought in the world of labor. See to it therefore, that your delegates are on hand.

One of the most important questions to come before the convention will be the policy of the congress towards immigration. The advent of thousands of immigrants, and the promise of thousands more, have brought the immigration question to the forefront, and today it ranks as one of the most difficult problems confronting organized labor, affecting, as it does, our wages, our hours of labor, in fact every condition that surrounds us in the sale of our labor. As every province has its own problems in this regard, every province should be well represented at the convention.

So too, the reports of the Provincial Executives as to the progress of the political action, determined upon at the Victoria convention, will be of great and enduring interest. The movements and utterances of the representatives of the liberal and conservative parties indicate very clearly that we will have a general election for the Dominion parliament in1908. This means that the Winnipeg convention of the annual parliament of labor will be the only chance that the representatives of labor, through their Dominion legislative labor body, will have of reviewing the work done by the provincial executives with respect to independent political action and taking such steps ts they deem necessary to complete this work. Therefore, it is of paramount importance that at least every Trades and Labor Council, from Halifac in the east to Victoria in the west, should be represented by the very best men.

Don't be content to say that there will be enough there without you. Have your delegates present. This is growing time, and organized labor must keep up with the procession. It is useless for you to inveigh against unjust laws, or the methods of the employers, unless you do your part in passing upon the ways and means to better yourself. Isolation from the general labor movement not only weakens your organization, but helps to destroy the movement itself.

Yours faithfully,
ALPHONSE VERVILLE, M. P., President, Montreal.
JAMES SIMPSON, Vice-President, Toronto.
P. M. DRAPER, Secretary-Treasurer, Ottawa.

MASTER OF THE MINT

Ottawa, July 29—Dr. James Bonnar of London, England, who has been appointed by the imperial government to be Master of the Ottawa branch of the Royal Mint has reached the capital and will spend a few weeks here making arrangements for the carrying out of the work of the new mint, which will be opened probably before the close of the year. The building which is a very handsome structure facing on Sussex street, is now nearing completion. Dr. Bonnar is a close personal friend of the British premier, and is a man of fine scholastic attainments. He is a son of the famous hymn writer.

THE GIRL FROM 'FRISCO.

The Brandon, Man., Daily Sun says: The pride of New York company presented the musical comedy "The Girl from 'Frisco at the opera house last evening to a good sized audience, and those present were exceedingly well pleased. The play is a mix-up of comedy and fun, which kept the audience in good humor from start to finish. Mr. Frank Harcourt, as the honest detective, made a hit and had many recalls for his clever comedy. Special mention might be made of Mr. Charles Foreman and Miss Irene Langford. Their singing was of the very best, in fact, the singing of the whole company was good.

The play is well staged and together with the pretty costumes of the choruses and the special scenery made it the very best attraction of the character that has ever played in Brandon.

Minard's Liniment Cures Garget in Cows

'FRISCO BRIBERY CASES.

San Francisco, July 29.—The bribery case against Theodore V. Halsey, formerly agent for the Pacific States Telephone and Telegraph company did not go to trial today. Judge Dunne announced his decision to draw an entirely new panel of sixty names from the jury box and the case was continued until next Wednesday morning. Sheriff O'Neill was instructed to return the panel into court tomorrow at 2 p. m., when those who have valid excuses for not serving will present them to the court and be excused.

In judge Lawler's court, the $10,000 bond of Louis Glass was renewed in the case on which the trial jury disagreed yesterday. Glass was released from custody as soon as bail was fixed. The Pacific Surety company continues as surety. In order that there may be no question as to the validity of the order naming next Monday, August 5th, as the day of beginning the re-trial, judge Lawler vacated his order of yesterday, Sunday, and made a new order to the same effect.

LIMITATION OF ARMAMENTS.

The Hague, July 29.—It is asserted that after a long conference in which sir Edward Fry (Great Britain) baron Marschal Von Bierstein (Germany) Von Burgois (France) count Tornielli (Italy) and Noelidoff (Russia) participated, the British delegation has consented to suppress in their proposition for the limitation of armaments the words "Urgent necessity," which were objected to by Germany. Thus the proposition becomes simply a repitition of that adopted by the peace conference in 1899 and in this innocuous form it is likely to be unanimously adopted at the present conference.

FOR SALE—Several blocks of fruit lands from 80 acres to 1000 acres, near to transportation, excellent land, well watered and very easily cleared in the vicinity of Kootenay lake. Price from $6 to $25 per acre. Will also guide mountain climbers, land seekers and fishermen. Apply or address Lindsay's boathouse. 84-52

CAPITAL, 500,000 SHARES--Par Value $1.00 per Share

15c — FULLY PAID AND NON-ASSESSABLE — 15c

FIRST ALLOTTMENT OF 50,000 SHARES AT FIFTEEN CENTS PER SHARE

Our option on this small block of Underwrites' Stock expires August 10th, 1907. Subscriptions Post marked at later date will be returned.

Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical will smile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble,' somebody was "crazy;" but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises.

We desire to conduct, first of all, a successful Mine Development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We, therefore, desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying Mining Companies by and through this investment.

THE PLAN.—The plan involved in this proposition is that of uniting or consolidating the investments of a limited unmber of persons into one sum, and under one management, to be used in acquiring and developing Mining properties in this wonderful region.

THE PRINCIPLE involved in this investment we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who who put their money into stocks of these companies, and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest" set aside, and against the interest bought and paid for by the investors.

In this proposition the investors, and all the investors, become promoters. They take the "promotion interest" and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest, and without doubt the richest, mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining-like and careful manner extensive mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in this company.

SUBSIDIARY COMPANIES. — The Larder Lake Exploration and Development company will incorporate a series, not to exceed five, of subsidiary Mining companies upon only the real proven properties acquired.

In each and every Subsidiary Company incorporated, whether Mining, Milling, Smelting, Water Power, or Electric Light, the Exploration Company will take 90 per cent. of the capital stock of each company so incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will never become necessary to sell any of this Treasury Stock.

Out of the total Capital Stock of each Subsidiary Campany, the Exploration Company will retain 50 per cent. as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stock holders in the Exploration Company. This 40 per cent. will be known as "Selling Stock," and as a market is created it will be sold, and the proceeds receied will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the Subsidiary Companies will be listed in the New York Curb and Mining Exchanges of the country, and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES.—Many different mining properties will be acquired and desloped as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties that will be acquired for this purpose will be located in the gold and siler belt, extending from the Montreal river through northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn district, the new Montreal river silver district, Cobalt disthict, and the good districts around Round lake, Larder lake, lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larwer Lake and extending northward to lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors, that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this Mine development. The investors in this Company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizeing The Larder Lake Exploration and Development Company with what we consider sufficient capital ($500,000). We now have options on, and propose to acquire five distinct and separate properties which will be incorporated at $100,000 each (100,000 share—par value $1.00.) The Exploration Company will at all times hold a controlling interest in each of these companies, so that 60 per cent of the dividends earned and declared will be paid into the treasury of the parent company, and the other forty per cent distributed among the stockholders on record. This in our opinion will enable us to pay dividends and large ones in the very near future.

The Board of Directors of the Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line—Mr. Robert Mortan will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their money into over-capitaized mining companies, they have been plunging about wildly in the hope of some day "striking it rich," never stopping to thing for one instance that the greater part of their money neer reaches the ground, as a rule seventy-five per cent of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent on every dollar turned in, he must get his own commission and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly spent in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares in each of the subsidiary companies to be incorporated, making in all 200 share of stock in five separate companies, which, as soon as development work is started and dividends announced, will make the stock of the Lorder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares ($1.00 per value) will probably be largey oversubscribed in a few days.

The next allotment will be put out September 25th, 1907, at 75c per share or higher.

This price (15c) will positively be withdrawn August 10, 1907. If this allotment is oversubscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the Company representing the shares purchased will be used and delivered as soon as allotment can be made, after the 10th of August, to all subscribers who purchase at the first underwriting price prior to that date.

Don't wait! Be wise! Act NOW! NOW IS THE TIME! Here is an opportunity that excels that which you had two or three years ago at Cobalt. Perhaps you will say as you did then, "How do we know they have got any silver up there?" Perhaps you say now: "How do you know there is any gold at Larder Lake"

Men's Shoes for Street Wear

With Welted Soles That Ensure Comfort

KEEP THOSE FEET COMFORTABLE

By wearing a pair of Walk-Overs, Oak Tan Shoes. They are heavy but flexible, thus conforming to the shape of the foot. They wear much better than ordinary leather, because they are better tanned, and every part of Walk-Over Shoes is as good as its sole.

Quality, a step forward. Cost, a step backward. We are painstaking in shoe fitting.

$6.00

NELSON NEWS OF THE DAY

Born, at Winlaw, July 29 to the wife of Joseph Deacon, a son.

G. Mortimer leaves this morning for an extended trip to eastern cities.

A substation of the dominion meteorological bureau has been established at Crawford bay.

F. C. Moffatt of The Daily News staff left last night for Vancouver on a well earned vacation.

The C.P.R. has issued orders to all coal merchants to move their coal warehouses to the team side of the track.

A colored woman was asked to leave the city yesterday morning for riotous conduct last Saturday night.

Joe, an Indian, was yesterday sentenced to one month's imprisonment, under the Indian act, for being constantly inebriated.

An aftermath of the "Not Guilty" parade last night was the dancing of Scotch reels to the strains of the bagpipes on the public thoroughfares.

A flash of lightning during yesterday afternoon's thunder storm caused trouble at the local telephone office and temporarily put it out of business.

Elfer's "King of the Cattle Ring" company will exhibit in Nelson one night—the date, Monday, Aug. 5—under canvas. This company numbers some 30 people, including a good concert band and orchestra. Only the evening performance will be given. However, there will be a street parade and band concert at noon the day of the show.

A transformer was burned out at the Bonnington plant yesterday afternoon and since 4 o'clock in the afternoon the city plant has been carrying the Hall Mines smelter.

At a meeting of the ratepayers last evening in Fairview, Harry Houston was elected school trustee in place of E. A. Crease to whom a vote of thanks was passed for his long and faithful services.

There was a meeting last evening of the building committee of St. Saviour's church with G. D. Curtis of Vancouver, diocesan architect, in attendance. The object of the meeting was a discussion of the plans of the proposed addition to the church.

R. G. Fuller, who is partner with captain Paddon on a ranch at Crawford bay, leaves this morning for Cincinnati in preparation for his coming wedding. Mr. Fuller will be absent on his honeymoon trip until next June, but will then return as he thinks there is no country like the Kootenay.

There were a large number of union men and sympathizers who joined in the "Not Guilty" parade last night, over 250 being in the line. The parade was accompanied by the city band, and the town piper and went down to the recreation ground where the numbers were swelled by quite as many more, the grand stand being quite filled. Speech making was the order of the evening, the speeches being temperate but distinctly rejoicing in the acquittal of secretary Haywood at Boise. The speakers were C. M. O'Brien and J. Osborne. Mayor Gillett was invited to speak but was engaged at the city council.

Although Nelson has not a senior baseball team, some of the "old timers" retain sufficient interest in the game to turn out and fan the atmosphere occasionally. Every Thursday afternoon holiday has seen an attempt at reviving interest in the game. Last week the Foresters and the I.W.W. tried conclusions and next Thursday the East ward will tackle the West ward. The players of the East ward include some of Nelson's old time players and if the West ward can line up as strong a combination, an exciting game will be the result. The East ward players are as follows: A. Bishop, pitcher; Harry Houston, catcher, H. Bishop 3rd; Bud. Stevens, 1st; Belrose, center; H. Manhart, 2nd; E. Boyce, left; H. Avery, right; W. Sturgeon, short. The players for the West ward could not be ascertained last night, but Capt. Loring will no doubt have a strong aggregation.

G. C. Hodge is still at the coast and now proposes staying at Vancouver and taking part in the cricket tournament with the Nelson contingent next month.

Miss Quin of Victoria, on her way home from a two months' visit to New York, is spending a few days in town, visiting friends.

The grand officers and officers elect of Queen City Rebekah lodge are requested to meet at the lodge room at 8 o'clock this evening for practice.

Daniel McDougall, provincial constable at Clayoquot, has secured the appointment of chief of Fernie's fire brigade in succession to W. J. Phillips, formerly of this city. McDougall served for ten years under chief Deasy in the Victoria fire brigade and is a thoroughly trustworthy official.

For ten days Madame Kathleen, the famous hairdresser and manicurist; scalp treatment a specialty, will be at the Hume hotel Aug. 5. Do not miss seeing the Madame and be convinced of her wonderful work.

GENERAL BOOTH'S SUCCESSOR.

Future Administration of Salvation Army Carefully Provided for.

London, July 29.—General William Booth, head of the Salvation Army, who is engaged in a motor tour of Great Britain, announced on Sunday in Blackburn that the same electric flash that told the news of his death would publish the name of the new general for the army. It is learned that general Booth has left minute directions for the army's administration in a sealed envelope with his solicitors. No one else knows who his successor will be, but it is believed that it will be Bramwell Booth, with commissioner Howard and commissioner Booth Tucker as alternates in case of Bramwell Booth's death and that the army will continue under the guidance of one man and not a committee or a board.

TO BE SETTLED BY COURTS

Halifax, July 29—J. H. Plummer, president of the Dominion Iron and Steel company, stated that there was no change in the situation and nothing whatever has been done in the direction of settlement of the disputes with the Dominion Coal company. The case is set down for trial on Tuesday at Sydney where a great array of legal talent is assembled.
