PROROGATION POSTPONED

Speaker Eberts Wanted Time to Decide on Point of Order.

Opposition Continued Attack on Land Act Amendments—With Result That House Must Sit Again Today.

(Special to The Daily News)

Press Gallery, Legislative Assembly, Victoria, April 25.—(1.45 p.m.)—The decision to prorogue was upset by the opposition tonight. All arrangements were made for prorogation and the lieutenant governor was in waiting in the buildings.

The opposition raised successive points against the Land Act amendment. Oliver began by moving that the order for the third reading be discharged and the bill referred to a select committee of the house to inquire into all the terms and conditions upon which the lands at Point Grey and Hastings townsite were sold.

This was defeated after discussion.

Oliver then in succession took two points of order, one was declared to be not well taken. The second one, that the amendment relative to the lands above referred to, which was introduced by a private member, Mackay, went beyond the scope of the bill introduced by message and conveyed crown lands away. This was debated at length and the decision of the speaker, earlier in the session quoted in support of it. The speaker asked after midnight, time to consider the point and the house was forced to adjourn until tomorrow.

KILLED ON WEDDING EVE

A FORMER SWEETHEART SHOOTS T. S. ROSS THREE TIMES.

GIRL THEN SHOOTS HERSELF THROUGH THE HEART.

Oil City, Pa., April 24.—Thaddeus Stevens Ross, of this city, was shot three times and instantly killed here today by Miss Belle Stroup.

The woman then shot herself through the heart.

The tragedy occurred in the office of Dr. George W. Maree, while the doctor was at lunch. Both victims are of good family. Ross was to have been married tonight to Miss Drussila Samella, of this city.

There were no witnesses to the shooting. The murderess and suicide was a former sweetheart of the dead man.

Ross was dining at home with the family, discussing his coming wedding, when the telephone rang. His father answered the call, and a woman's voice made inquiry for "Thad."

Mr. Ross called his son and the young man answering, picked up his hat and informed his family he had to go to the doctor's office for a few minutes, but would return as soon as he could. This was the last his parents saw of him alive.

WATER RIGHTS DECIDED.

W. H. Covert Finally Wins His Suit Against the Granby Company.

(Special to The Daily News)

Victoria, April 24.—Judgment was given today in the long fought case of W. H. Covert and the Eastern Townships company versus Vaughan and the Granby company, the plaintiffs winning with costs. The case was tried a year ago in Grand Forks and was over the ownership of some important water rights, the defendants claiming them against the prior location of the plaintiffs. In the trial in the Boundary the defendants won and thereupon the other side appealed. Chief justice Hunter and Messrs. justices Martin and Clements have allowed the appeal. S. S. Taylor and H. C. Hannington appeared for the plaintiffs and E. P. Davis and D. Whiteside for the defendants.

WORK TEMPORARILY DELAYED

U. S. Government Call off Construction of St. Mary's Reclamation Canal

Lethbridge, April 24—A. Caseler, of Caseler Bros., of Cardston, who on Thursday signed a $3,000,000 contract for the St. Mary's reclamation canal in Montana, says the firm his been notified by the United States government that the work will be called off for the present owing to lack of funds, the reclamation service being supported by the sale of arid lands. The suspension is only temporary. Caseler estimates that the work will take two years. Two million yards of earth are to be removed.

LAWSON PLANS COPPER CORNER.

New York, April 24.—Thomas W. Lawson has gone to Europe to run a corner in copper metal, according to a report in circulation in the office of the Copper Trust. Independents were inclined to believe this report was circulated to impair the credit of the New York Metal Exchange, where copper is being offered a cent a pound cheaper than by the trust. Circumstantial evidence is in favor of the corner theory. London is the speculative market for copper and most of the gambling contracts have been made in that center. Just before his departure for Europe Lawson spent about $100,000 advertising his belief in a boom in copper stocks. At the same time H. H. Rogers organized a pool to put Amalgamated copper to 120. Copper stocks have done nothing but decline ever since and the metal has weakened under sales by consumers who have been over supplied, and by speculators for a decline. According to the report, Lawson will appear in London in a few days as an open buyer of thousands of tons of copper metal. It is expected that the shorts will take fright and advance copper to the equivalent of 30 cents a pound with a corresponding advance in the price of Amalgamated and other stocks in producing companies.

JOHN MITCHELL'S CONDITION

Chicago, April 24.—John Mitchell, president of the United Mine Workers of America, is ill with a severe cold here. It is learned that the cold has aggravated an old trouble from which Mr. Mitchell has been suffering and that an operation is necessary.

WANT MILLS' SCALP

Socialists Claim That he is a Traitor in The Camp

Vancouver, April 24 — Walter Thomas Mills, who came out here to reform the socialist party, and who is well known to Vancouver socialists, will have to face trial next Sunday in Seattle for heresy. That is not exactly what the socialists call it, but it amounts to the same thing.

Mills has been preaching fusion and has been accused of supporting candidates other than those named on the socialist tickets.

Mills wanted to win an election while the Seattle socialists have been plodding along making a noise like a political party, but boasting of no serious opportunity to win out in a vote gathering contest. Each time the socialist leaders sit down and figure out their gains in percentages and compute the time needed to win if the ratio of gain is continued. In the meantime they have kept clear of other entanglements and the Mills program is unsatisfactory.

The dominion executive committee of the socialist party of Canada has preferred charges against Mills, accusing him of supporting three union labor candidates in a recent Victoria election. Mills must be tried before the Seattle branch of the party and every socialist member of the Seattle branch who is in good standing is permitted to sit around and listen to the testimony and vote on Mills' degree of culpability. If the Seattle branch is against him, Mills has his appeal to the executive committee of the state.

OLDEST MAN IN THE WORLD

A Negro of Santiago de Cuba Died Yesterday, aged 150 Years

New York, April 24—A despatch from Santiago de Cuba says: Antoine Infante, a negro, is dead, at the age of 150 years. Despite his great age, the greatest recorded in modern times, he retained all his faculties unimpaired to the end. He was born in 1757, 19 years before the beginning of the American revolution.

LORD HALIBURTON DEAD

London, April 24 — Lord Haliburton, G.C.B., J.P., D.L., is dead, aged 70 years.

Arthur Lawrence Haliburton, youngest son of the late justice Haliburton, was born at Windsor, Nova Scotia, in 1872; educated at King's college, Windsor. He was called to the Nova Scotia bar in 1855. During that year he went to the Crimea and served on the commissariat of the army there, in Canada and in London until 1870, when he was transferred to the civil service as assistant director of supplies and transport; he became director in 1878 and assistant secretary of war in 1888 and permanent under secretary, 1895-97. In 1877 he married the widow of Sir William R. Clay. Deceased was knighted G.C.B. in 1897 and created first baron Haliburton the year following.

DEATH OF A PIONEER

New Westminster, April 24—Word has been received here of the death at Chilliwack of Reuben Nowell, one of the oldest and best known pioneers of the Fraser valley. The deceased was in his usual health on Saturday but complained slightly, on Sunday, death coming to him suddenly at 9 o'clock yesterday morning.

The late Mr. Nowell was 80 years of age and had resided in the Fraser valley since 1858, having come here during the famous gold excitement of that year. He settled in Chilliwack soon afterwards and the town is built on the property he took up.

The deceased leaves a wife and five children, two daughters and three sons. The family is all well provided for. He also leaves a brother in Arizona.

HAVE A WORLD BEATER

Nanaimo, April 24—Much interest is being taken in the match talked of between Billiter, the world's champion wrestler at 130 pounds and Sandy Swanson of this city. The Nanaimo men are willing to back their man, though it is against a world's champion. Bob Swanson is prepared to place $500 on his brother and other men are prepared to place other wagers.

WAITERS AND BAKERS ON STRIKE

Paris, April 24—A justice of the peace has been appointed to conduct negotiations looking to an end of the waiters' strike. There was rioting today in the bakers' strike.

SETTLEMENT MAY BE REACHED TODAY

Prospect for Early Resumption of Work in the Coal Fields Now Very Favorable ---Men Have Submitted Proposal Which Operators Will Likely Accept--- Decision Should Be Known by Noon Today.

(Special to The Daily News)

Fernie, April 24.—(6.30 p.m.)—The joint conference adjourned again at about 4.30. The operators had a hurried meeting. No official statement will be given out until late this evening, but a prominent operator admitted that the miners have made a proposition to them which is practically accepted. But a private meeting of the operators will be held to finally discuss the same, at 5.45, followed by an official joint conference at 7.30.

Fernie, April 24.—(10.30 p.m.)—The situation here has taken a decided turn for the better. The conference that was to have been held tonight at 7.30 was postponed until tomorrow morning at 9 at the request of the operators.

Everybody connected with the trouble is confident the end has been reached.

Seen tonight vice president Lewis of the miners, said: "The prospects of finding a solution of the present difficulty this week are more favorable than they have been any time since the beginning of negotiations. We have submitted a propostion and the operators will tomorrow morning present a counter proposition to us and we do not know whether it will be acceptable or not. Any other representation of the position is likely to leave a wrong impression. The officers of the union are hopeful. The critical stage has arrived and the slightest thing may jeopardize the whole situation."

Deputy minister of labor Mackenzie King is also of the opinion that the end is not far off. In an interview he said that the situation at the present time is brighter than on any occasion since the Calgary conference.

"I was hopeful last night," he said tonight, "I am very hopeful now. The country has no reason to be alarmed. I am satisfied with the progress of events. It is much better to have a delay of a few days, while the disputants come together than to force a third party into the dispute. If I see the parties meeting together in joint conference and believe they are getting near to a settlement there is no need of government intervention, but if I came here and found them not trying to solve the difficulty I would take a different course. A voluntary settlement is preferable to what might take place by the intervention of the new law and is much more likely to be permanent. As it was said when the bill was first introduced, it was not the number of investigations that would be held under it that would justify its enactment, but the number of investigations it would obviate the necessity of holding. If the public had been getting ill-treated in any way and there were not prospects of a settlement, some tactics would have been followed that would have put a stop to the dispute in short order. The new law is acting just as it was designed to do."

President Sherman, of the miners' union also says there is a probability of a settlement at Thursday morning's conference, and an agreement made then which will give the men an advance in wages in some of the mines in Alberta and British Columbia. The miners and operators will both give way to preserve peace.

Those in a position to know estimate that it will take about two days after the contract is agreed upon for the men to get back to work. They say there is no probability of the investigation committee having to act in any way. The miners also state that for the first time in the history of their organization they have had three lawyers representing different coal companies and point out that all the trouble raised was over legal technicalities, and are strongly of the opinion that had the lawyers kept out the trouble would have been settled long ago. They consider Mackenzie King an able man, with no equal as a conciliator in labor disputes and had requested the government to make him chairman of the investigation committee.

President Sherman states that the miners are well pleased with the stand taken by the government at Ottawa so far, in trying to get the dispute settled.

The conference tomorrow should be over by noon and a mass meeting of the men will be held here in the afternoon and in Michel the next day.

Vice president Lewis will address the men in both places and explain the situation and the proposed agreement. The new contract is said to be already drawn up, but will have to receive a few slight modifications.

WHY INCREASE IS DEMANDED

Fernie, April 24.—Asked why the miners were now demanding increased pay, vice president Lewis said: "The reason the men believe they are entitled to an increase of wages is that they have figures to show that one of the largest companies earned, during the past year, on its output, a profit of 50 cents per ton after paying all expenses. Those who are conversant with the coal business can judge whether or not this is a large profit. As long as the operators are asking the price for coal that they are, a share of these large profits belongs to the miners, and the miners are willing to have the entire question thoroughly investigated to determine whether they are right or wrong in their contentions. The union knows that there are some men working in the mines who are earning high wages, in a few instances as high as $6 or even $7 per day. These are what are known as contract miners, who receive from the company so much per ton for all the coal they mine, but they employ from three to six men under them. These laborers, as they are called, receive from $2.25 to $2.50, and in a few instances $2.75. The contract miner in these cases earns from 50 cents to $1.00 per day from the labor of each of these three or half a dozen men employed by him. The wages of these men are used by the operators to make the public believe that the miners are earning very high wages. The union wants to abolish this contract system and let each man have an equal share of the earnings when mining coal, but the operators are opposed to its abolition."

Asked if he favored the sliding scale of wages, Mr. Lewis said he had no objections to it, provided there is a minimum wage, which, in his judgment, should not be less than $3 per day. If there is no such limitation the selling price of coal may be manipulated so the men will always be at a disadvantage without the coal consuming public benefitting. Even the operating companies could fix the price of coal at the mine at so much per ton, and sell the coal to agents, who would be themselves under another name. Those agents would fix the price to the public to suit the wishes of the operators as they would be controlled by them, and it would be the operators who would receive the profits.

Kamloops, April 24.—Vice-president Whyte states that some weeks ago when asked if there was a likelihood of an interruption in the coal mining operations in Alberta and British Columbia, the C. P. R. made arrangements to import a large tonnage of coal to protect their train movements and to relieve the situation, and that this coal is now coming to hand in quantities to meet all requirements.

Medicine Hat, April 24.—No matter what phase the coal strike assumes or to what proportions it grows, Medicine Hat can only be adversely affected thereby insofar as the inconvenience which may be caused in the event of a tie-up on the C. P. R. However, that is considerable of an improbability as the local officials report that there is plenty of coal on hand to serve both the passenger and freight service until such time as relief is assured.

Last winter when the whole of the great northwest was famine stricken for coal and it was a hard struggle to keep the icy grasp of the frost king from entering the house, Medicine Hat revelled in the luxury of gas at 15 cents a thousand feet and at the present, time with the industrial life of many of the prairie cities crippled for months through the miners' strike, Medicine Hat manufacturers are not bothered about the power question as gas to them comes at five cents a thousand feet.

The Rockford mines here, which fell into gradual disuse as the gas system was installed and extended, are again reopening and today the management made arrangements to supply the C. P. R. with 30 tons of coal a day providing teams can be secured to haul it in from the mines, a distance of about four miles. The railway authorities are preparing estimates with a view of ascertaining the cost of running a spur line into the shaft, but the existence of a number of deep coulees will make this an expensive undertaking. In the event of the strike continuing the Southern Alberta Navigation company will undertake to build barges for transportation by which several train loads of coal could be easily procured each week as the workings are on the river bank. Experiments still continue with the gas in the local C. P. R. shops. Locomotive No. 144 has been jacked up so that her drivers run in a set of wheels placed beneath, and shed tests with most satisfactory results have been announced, although the details are reserved for submission to official headquarters before being made public. Mr. L. Roberts locomotive and fuel inspector, who was in charge of the illuminating experiments on the Crow line trains last year, has been making the recent tests and is highly gratified by the demonstrations. He states that it is now only a question of storage and with this solved, Medicine Hat will be the motive power center on this division, at least, of the C. P. R.

George J. Bury, assistant general manager of the western division of the Canadian Pacific railway, and F. F. Busteed, general superintendent of the Pacific division of the same line, both arrived yesterday in Nelson and are leaving this morning for a trip through the Boundary country. Both officials are here on the usual annual visit of inspection, Mr. Busteed timing his arrival to meet Mr. Bury. Both gentlemen were interviewed on their arrival by a representative of The Daily News, and interrogated as to the situation regarding the handling of freight. Mr. Bury declared that he had not known of any extraordinary delay of freight and that although there had been locally an order for the suspension of freight traffic that order had been cancelled. He had himself arrived yesterday afternoon on a freight train from Procter. Superintendent Lawrence, who was present, declared that he was taking shipments for any point ordered and neither the Victoria nor the La Plata mines would be held back for the shipment of their ores. Enquiry at the local office of the Victoria mine elicited the fact that there had never been, so far, any refusal to handle the ore from that mine.

Mr. Bury said he was not conversant with the local situation and could say little until he had completed his inspection of the mining districts. Still the C. P. R. are taking shipments of ore for the various smelters in the country and there would be no tie up as far as he knew in the Boundary country. This Mr. Lawrence confirmed.

Mr. Busteed, who arrived later in the evening from the coast said that he had come to this city for the purpose of joining Mr. Bury in his inspection. It is his first visit here since being called to his present position, recently vacated by Mr. Marpole. On the coast Mr. Busteed said there have been no cessation in freight shipments nor had such been the case upon the main line.

With regard to the situation of the C. P. R. as affected by the conditions now prevailing in the coal districts, neither of the C. P. R. officials had anything to say beyond that it might become serious at any moment. There were some supplies of coal obtainable at the coast and also elsewhere but as to its extent neither gentleman cared to speak definitely.

PEACE CONCLUDED.

Washington, April 24.—The United States state department has been informed of the successful conclusion of the peace negotiations at Amapala. A cablegram received here today from captain Doyle of the U. S. ship Chicago, dated yesterday, says: "Peace conference agreed to treaty at 11 a.m."

doors ripped from the hinges, and counters and stock scattered in great confusion all over the premises. Mr. Baird, who was assorting goods was hurled through the window and landed uninjured on the sidewalk. An Indian woman, named Annie Green, who was passing, was cut by plate glass, her hair singed and her arm broken. David Jacobs, another Indian, had his hair singed. Holt was seriously burned, while Spedding had a remarkable experience. He had lowered the upper part of his window, and when the explosion came he was hurled bodily through the upper opening and landed head foremost in an ash barrel in the adjacent yard escaping uninjured. His plant is badly shattered. The loss may be $2000.

CHICAGO EXPRESS WRECKED

Collides With Freight—Pullman Passenger Badly Shaken Up—No Fatalities.

Pittsburg, Pa., April 24.—The Chicago express on the Baltimore & Onio railroad, which left this city for New York at 10.45 p.m. was wrecked tonight near Bennett station on the west Pennsylvania division of the Pennsylvania railway, shortly after 11 o'clock. Bennett station is ten miles east of here. The express collided with a freight train. Several persons are reported injured. The passenger engine and caboose of the freight train were demolished.

A misunderstanding of signals, it is said, caused the wreck. The Pennsylvania freight train was proceeding slowly east on the main track. The Baltimore & Ohio express for Chicago followed on the same track at considerable speed. The passenger train overtook the freight about a mile east of Bennett station. The engineer and fireman of the express saw a collision was inevitable and jumped. Both landed safely. Before abandoning the train, however, the engineer set the air brakes bringing the the train to a sudden stop. Most of the passengers in the Pullman sleepers were thrown from their berths and bruised, but none were seriously injured. Had the express left the rails and plunged into the river many lives would have been lost.

THE TERMS OF PEACE

San Salvador, Republic of Salvador, April 24—A treaty of peace between Salvador and Nicaragua was signed last night at Amapala by the ministers representing each country. The terms of the treaty are honorable to both countries. The conditions proposed by Salvador were accepted, as well as the demands by president Zelaya of Nicaragua for reparation for Salvador's part in the recent war between Nicaragua and Honduras, and that there be free interchange of commodities between Nicaragua and Salvador at an early date.

AFRAID OF MONKEYS

Honolulu, April 24—The people in Honolulu have been living in mortal terror of a recurrence of the horrible scene described in the "Murders in the Rue Morgue," by Poe, where two women were murdered by an escaped ape. Two large monkeys that were formerly kept in the local zoo have escaped. They killed two dogs the other day and it is feared that they may attack some children. The Hawaiians are especially alarmed over the danger. The monkeys are not so large as the murderous ape of Poe's horrible story was represented to be.

BIG PACKING PLANT BURNED

Pittsburg, April 24. — The Seeller Packing Co., occupying two acres of ground in Allegheny, was totally destroyed by fire tonight, causing an estimated loss of about $300,000. The origin of the fire has not been ascertained. It burned rapidly and for a while the adjacent property was threatened. Considerable live stock narrowly escaped cremation and thounds of dollars worth of cattle killed yesterday were destroyed.

COMPROMISE ON IRISH BILL

London, April 24—The spirit of compromise is having effect on the prospects of the Irish council bill and today its supporters are more hopeful of reconciling the differences regarding the measure. The outlook has so far improved that Mr. Birrell, chief secretary of Ireland, was able to announce in the house of commons this afternoon that he hoped to be able to introduce the bill by May 7.

QUEEN VICTORIA'S CONDITION

Madrid, April 24—The doctors today reported that the condition of queen Victoria who is expected this week to present king Alfonso with an heir to the throne, was in every respect satisfactory. Her majesty drove out this morning accompanied by princess Beatrice. This afternoon she attended a concert at the residence of the Infanta Isabella, after which she paid a number of calls.

SYNOD OF ALBERTA.

Calgary, April 24.—The first meeting of the Presbyterian synod of Alberta, convened here today. Rev. Dr. Herdman, superintendent of missions, was elected first moderator.

TOULON'S COSTLY BLAZE

Toulon, April 24—The authorities estimate the damage done to the arsenal by yesterday's fire at $300,000.

FIRST CLASS IMMIGRANTS

Late Arrivals in Canada Exceptionally Fine Class of People.

Hon. Wm. Fielding and Hon. Sidney Fisher to Join Sir Wilfrid Laurier—Juvenile Delinquents Bill.

(Special to The Daily News)

Ottawa, April 24.—Hon. W. S. Fielding will leave to join Laurier in England as soon as the session is over. Fisher will also go, and later will accompany Laurier to Paris and Rome.

The immigration department reports that the class of immigrants coming into Canada this spring is unusually satisfactory. The instructions sent out to the agricultural department's agents across the Atlantic, and to the steamship booking agents with respect to taking strict precautions that no physically or morally unfit persons should be sent to Canada, seem to be well observed.

This spring fewer undesirable immigrants have been turned back at the ports of entry than in previous years. An Antwerp steamer, which recently arrived at Halifax with over 2000 European immigrants, had on board only 16 persons who failed to pass the government's medical and immigration officials. Last spring the same steamer brought 1600 immigrants from the same sources and 65 of them were found to be unfit to make good Canadian citizens.

Senator Ellis brought up in the senate today the question of the increased postage to the United States. The minimum rate on a Canadian newspaper to the United States was one cent a package. The good which the circulation of Canadian newspapers did in the United States was to be seen each year by the number of Canadians from the United States who took part in the "home comings" held in the towns and cities throughout the dominion each year.

Under the new postal rates the country weekly costs $1 would have to pay 52 cents a year postage and the semi-weekly $1.04, and the result would be a falling off in the papers going to the United States. He questioned the increase being in the best interests of the country.

The senate today decided to print in pamphlet form the speeches delivered on old age pensions.

Resuming the debate on the Juvenile Delinquent bill, senator Loughead in the senate, said it was criminal law, and therefore within the jurisdiction of the federal partliament. The law was desired. It was needed. He was therefore surprised that the government should have taken the responsibility of offering the measure to parliament and finding it was needed, saying it should not go through and bacome law. Canada was far behind the age in the matter of criminal law, particularly with relation to juveniles. Canada was apparently more interested in material things. There were experts attached to most of the departments of the Canadian government to study improvements. There was, however, no expert attached to the justice department working out great sociological problems which had to do with criminals and crime. Canada had taken up the question of industrial development which meant the creation of great centres of population. Canada was spending millions on irrigation. One of the subsidary consequences of these movements was an increase in crime. Yet that was being overlooked by the government, which was bending all its energies in other directions. If the government did not put through the bill this session it should the next one.

GREAT MISSIONARY CONFERENCE

Shanghai, April 24—A great Protestant missionary conference in commemoration of the memory of the landing of Robert Mortizon, the English missionary, in Canton, will begin tomorrow. Seven hundred deelgates have already arrived, including twelve bishops, representing the Anglican, American Episcopal and Methodist churches and also missionaries from every province in China and Korea and many ontables from the Britihs isles and the United States. A new hall erected in memory of the missionaries and others who lost their lives in the Boxer uprising will be inaugurated during the conference. Subsdiary conferences will extend the proceedings for about three weeks.

BRANDON ELECTION PETITION

Brandon, Man., April 24.—The famous Brandon election petition came to a close today when the petition against Hon. Clifford Sifton, and the cross petition against R. L. Richardson were both dismissed without costs. The hearing was before judges Richards and Perdue. The proceedings were merely formal, no evidence being offered in the case and the whole affair only lasted 20 minutes.

STROMBOLI IN ERUPTION

Catania, Sicily, April 24.—The Stromboli volcano was in eruption today. There were a series of loud explosions like artillery and an enormous quantity of incandescent stones were thrown out of the crater. After this activity, the volcano resumed its normal state.

DEATH OF NEIL BRODIE

WELL KNOWN MONTREAL CHARACTER.

DIED IN SQUALOR THOUGH WORTH QUARTER OF A MILLION.

Montreal, April 24.—Neil Brodie, for many years well known in financial circles in this city, and who had the record of being the dirtiest man in the country, died today in absolute squalor though worth upwards of a quarter of a million dollars.

Brodie came to Canada from Scotland in order to escape taxation. By profession he was a minister. He was a large owner of stocks and bonds in the C. P. R. and owned numerous cheap properties throughout the poorest districts in connection with which he was time and again arrested and fined for not complying with the health resolutions.

TO CENSURE ROOSEVELT

JOINT ACTION OF UNIONS OF UNITED STATES PROPOSED

SOME DAY IN MAY TO BE SET ASIDE FOR THE PURPOSE

Milwaukee, April 24—A movement to set aside a Moyer-Haywood-Pettibone day in May, on which day every union in the United States is to protest against the action of president eRoosevelt in denouncing the western miners before they had been tried, was started today in Milwaukee. The plan is to have labor leaders in every city in the country agree on a day on which demonstrations shall be arranged and to have the president taken to task, not only for his utterances in his recent letter, but more especially in his communication to Honor Jackson of Chicago, in which he reiterated his criticism.

NATURAL GAS EXPLOSION

WRECKS STORE ON DALHOUSIE ST., BRANTFORD, ONT.

ONE MAN BLOWN OUT OF WINDOW LANDS SAFELY IN ASH BARREL

Brantford, Ont., April 24—A store recently built by J. B. Holt on Dalhousie street, was partially wrecked by an explosion of natural gas today. The store was a two rstoey brick structure, the ground floor being occupied by Holt for hardware and the upper floor by D. Baird, a commercial ratveller. In the rear of the building R. Spedding had a job printing department. Discovering that natural gas was escaping from the basement, Mr. Holt went down stairs to investigate and struck a match, as he reached the foot of the stairs. This action was followed by a terrific explosion which was heard for blocks. The entire front of the lower store was demolished. Three sides of the building were bulged. The plaster was torn from the walls,

Prospectors', Lumbermen's, Miners' and all Campers' Supplies

TENTS in all sizes and weights.
RUBBERS and OIL SKIN CLOTHING.
OVERALLS and JUMPERS.
UNDERWEAR at all prices.

NOT TO BE TAKEN SERIOUSLY

A. H. B. Macgowan, one of the five supporters of the McBride government elected from the city of Vancouver, has returned home in avowed disgust with the unbusiness-like methods of the government he was elected to support, and is giving vent to his feelings through the medium of interviews with newspaper correspondents.

Mr. Macgowan should not be taken seriously. He does not mean to give effect to his words by actions. He is and always has been since elected to the legislature, a slavish supporter of the government. He has gained certain notoriety by pretended independence, but whenever his vote was necessary to protect the government, he was always on hand to cast it, even in direct opposition to his public professions. A notable instance of this double dealing, was his vote in favor of the Columbia-Western land deal. It was known that several supporters of the government had agreed with Price Ellison to vote against the bill, that they had even gone to the length of signing a letter, addressed to the premier, to that effect. Macgowan did not sign this letter, but a few moments before the vote on the second reading was called, he sent a note to Prive Ellison promising to vote against the bill and asking him to so notify the premier. A few minutes later the division bell rang and Macgowan's hand went up in favor of the bill.

Macgowan finds the Vancouver electors easy marks. He makes a pretense of independence, votes always with the government at critical moments, and indulges in interviews which are greedily accepted by his constituents as evidence of his whole hearted devotion to the city he represents. There is no man in the legislature today who is less worthy of confidence than the same A. H. B. Macgowan. "Billy" Bowser, despite of his bitter partisanship and proved incapacity to rise above the level of gutter politics, is infinitely more worthy of the confidence of his party and of the country at large.

FOR SALE **T. G. PROCTER** FOR SALE

30 Acres on Kootenay Outlet, opposite Procter, nice river front. 10 Acres under fence and in orchard; seeded down to clover—ground well fertilized. 600 3-year old trees in first class shape. Balance of land mostly cleared, ready for plough. PRICE $4000. REASONABLE TERMS. Steamboat connections—two boats each way daily. Post office and telegraph station within 1-4 mile. Apply

EDITORIAL NOTES.

The Vancouver News-Advertiser intimates that the government will at the next session of the legislature increase the royalty on timber to $1 per thousand and give an undertaking that there shall *be no further increase during the life* of the present parliament. Of course this proposal will be subject to the approval of Mr. Charles Lindmark, of Revelstoke.

WARRING AGAINST TUBERCULOSIS

Story of the Fight That is Being Made by the Typographical Union

Victims of tuberculosis outnumber the casualty list in modern warfare. Means of the limitation of the spread of the dread disease and the best methods for its cure are occupying the attention of the medical profession and filling pages in magazines, newspapers and periodicals. All the people are interested for the reason that all the people are liable to infection. Tuberculosis sanitariums, "farms" and "camps" are numerous and increasing in number. Any intelligent effort at the prevention of tuberculosis is certain to meet with general approval.

Among the wage earners tuberculosis is prevalent, especially with tradesmen or clerks in sedentary occupations. No mechanic is more liable to this disease than the printer. For years tuberculosis has been prevalent in this trade and the printers have always been alert to ascertain and adopt scientific methods for the warding off and curing of the disease. Union *printers conduct a home at Colorado* Springs and there is attached to this home a tuberculosis sanitarium. At present there are nearly 50 patients in this hospital. The superintendent of the Union Printers' home in all of his reports dwells upon the number of cures that result *through the scientific treatment and mo*dern methods for the treatment of tuberculosis in use at the Union Printers' home. Hundreds of young men afflicted with the dread disease have gone to Colorado Springs, taken the course of treatment prescribed and are now at work at the printers' trade, sound in body and fulfilling their mission as useful citizens. A few years ago the officials of the Union Printers' home decided to establish a tent colony, and this experiment has proven a great success. The Union Printers' home is supported by the members of the International Typographical union, each member contributing 15 cents a month to the fund. The International Typographical union has promoted many measures for the benefit and welfare of its membership but none more praiseworthy or productive of more substantial results than the Union Printers' home, and its hospital annex.

The Union Printers' home is managed by a board of trustees consisting of seven members. At present two members of the board are located on the Pacific coast; one in Michigan; one in New York state; one in Colorado, and two—James M. Lynch the president, and J. W. Bramwood, the secretary—at the headquarters of the International Typographical union at Indianapolis. These gentlemen are also president and secretary of the international body.

I consider MINARD'S LINIMENT the BEST liniment in use.
I got my foot badly jammed lately. I bathed it well with MINARD'S LINIMENT and it was as well as ever next day. Yours very truly. T. G. McMULLEN.

ONE OF THE LAMBS

Dr. Hall has introduced a bill, the purport of which is to make the Master and Servant act applicable to cities of less than 3000 population, the existing act only applies to cities of less than 3000, and, as the doctor pointed out, in most cases the mines and other industries affected were *outside cities*, consequently the act was non-effective. It is obviously the intention of the government to kill the bill. When Dr. Hall moved the second reading, W. R. Ross moved the adjournment of the debate.

Dr. Hall asked that adjournment should not be pressed. He said that he had never got a chance to get the bill forward before today as the house adjourned before it was reached. If it did not come up today it might not get before the house. The motion to adjourn the debate carried, all the government supporters voting for it in opposition to the solid liberal vote and that of the socialists. The division was as follows:

Yeas—Messrs. Tatlow, Fulton, Bowser, Ross Thomson, Gifford, Cotton, Young, Taylor, Hunter, Grant, Behnsen, Manson, Garden, Hayward, Mackay, Parson, Davey, Schofield—19.

Nays—Messrs King, Hall, agEselon, Kergin, Oliver, Munro, Jardine, Brewster, Williams, Hawthornthwaite, McInnis—11.

Pairs—Messrs. McBride and Naden, McPhillips and Yorston, McGuire and Jones.

NELSON'S NEWS OF THE DAY

The anniversary At Home of Nelson Encampment No. 7, I.O.O.F., has been postponed.

The officers and members of Kootenay lodge, No. 16, I.O.O.F. are requested to meet this evening at 8 o'clock sharp for rehearsal.

Brigadier A. Smeaton, provincial commander of the Salvation army work in what is known as the Pacific province, is expected here tonight in time to conduct the public services in the Salvation army citadel on Victoria street, commencing at 8 o'clock. Everybody cordially invited.

C. E. Key and H. James are over from Phoenix in the interests of the New Scale Williams' piano, for which Mr. Janes is the Phoenix agent. This afternoon Messrs Key and Janes are skilled musicians and Mr. Curtis, will give a musical entertainment at D. J. Robertson's store, at which *the merits of the New Scale Williams'* piano will be thoroughly tested. Messrs. Key and Janes ore skilled musicians and their entertainment will be an excellent one.

CONTEST FOR LIBRARY

Churchmen's Club Still Leads—Knights of Pythias Have Large Vote

The eighth return of the library contest leaves the Churchmen's club in the lead by over 5000 votes although the Knights of Pythias polled a very heavy vote. The high school and Knights of Pythias have both advanced a place at the expense of the Salvation army. The returns of the past fortnight are as follows: Knights of Pythias, 10,730; Churchmen's club, 7381; high school, 5031; Presbyterian Sunday school, 1650; Methodist Sunday school, 125; Hume school, 60; Anglican Sunday school, 10; public school, 2.

The standing of the competitors is now as follows:

Churchmen's club	25,622
High school	20,598
Knights of Pythias	17402
Salvation army	16050
Presbyterian S.S.	4696
Hume school	1,976
F.O.E.	1,850
Rebekahs	590
Masons	356
Baptist	356
St. Joseph's school	202
K. L. G. H.	190
I. O. O. F.	160
Methodist S.S.	125
Anglican S S.	142
Public school	3

SEAMAN'S HEAVY SENTENCE

Must Serve 25 Years for Killing Superior Officer

Washington, April 23—Twenty-five years imprisonment, twenty of which shall be at hard labor, is the sentence of the court martial which recently tried Maurice Burke, the seaman attached to the cruiser Tennessee, for murdering James A. Douglass, chief master at arms, and assaulting and attempting to kill William McCool, master at arms of that vessel. The sentence was approved by secretary Metcalfe today and the state prison at Wethersfield, Conn., has been selected as the place of confinement. Burke's crime was committed on the night of Feb. 19, when the Tennessee was lying at the League navy yard, Philadelphia. He returned intoxicated, after having been given shore leave and when summoned before his superiors drew a revolver, killing Douglass and wounding McCool.

SOO PULP MILL DESTROYED

Loss Estimated at $200,000—Will be Immediately Reconstructed

Soo. Ont., April 24—Pulp mill No. 1 of the Sault Ste. Marie Pulp and Ppaer company, was destroyed this morning by fire. The fire originated in the screening room *from a hot journal, which ignited the oil* and the whole room burst into flames. Benjamin Scuraytz, an employee of the mill, went on the roof to assist firemen and was struck by a stream of water and knocked to the lower roof, receiving injuries which caused his death.

The loss is estimated at $200,000, with $100,000 insurance. The walls of the building are in fairly good shape, but the machinery is a total loss. Mr. Millinton of the pulp mill, says the work of reconstruction will be begun at once.

Minard's Liniment Relieves Neuralgia

CURED OF RHEUMATISM

Mr. Wm. Henry of Chattanooga, Tenn., had rheumatism in his left arm. "The strength seemed to have gone out of the muscles so that it was useless for work," he says. "I applied Chamberlain's Pain Balm and warpped the arm in flannel at night, and to my relief I found that the pain gradually left me and the strength returned. In three weeks the rheumatism disappeared and has not since returned." *If troubled with rheumatism try a few ap*plications of Pain Balm. You are certain to be pleased with the relief which it affords. For sale by all druggists and dealers.

FIRE WAS ACCIDENTAL

Montreal, April 24—"The origin of the fire was accidental and not due to negligence or carelessness" was the verdict of the coroner's jury this morning in the case of the conflagration in the Canada Steam laundry on Thursday last, which led to the death of three employees, two men and a woman, and the maiming and burning of seven others.

WANTED

SECRETARY FOR 20,000 CLUB OF NELSON, B. C.

Salary $100 per month until end of year. Applications must be sent in by May 1.

Address: President, 20,000 CLUB, Nelson, B. C.

NOTICE

As agent for Mrs. Wattie I am asked to request those having accounts against the late A. K. Wattie to present said accounts, certified, to the undersigned promptly.

STAR vs. WHITE APPEAL

(Special Correspondence)

Victoria, April, 19.—E. V. Bodwell, K.C., occupied the centre of the stage in the Star vs. White hearing before the full court all this, the tenth day, and had not finished his address on behalf of the defendants, the B. N. White Co., when the court adjourned this afternoon until Monday.

Mr. Bodwell unquestionably scored heavily today on at least two main aspects of the case; the controvery, as shown in the evidence, between the chief justice, and expert Sizer for the plaintiffs, resulting in the judge turning away from the experts summary, he, the expert, failing to show in the workings when the two experts and the judge visited them, what he said in court could plainly be seen there. This was contrasted with what Elmendorf for the defendants, did demonstrate to the judge at the mine workings. The second point was the undisputed fact that the plaintiffs, throughout all their presentation of the case kept their observations practically confined to the lower level, and could not be coaxed to lay before the court the conditions as shown on the surface and on the upper mine workings, a review of which were essentially necessary to grasp properly the whole situation. In addition Mr. Bodwell critically analysed a large portion of the evidence touching on the important parts of all the workings and arguing that the new work had made nothing clear that was not known and clear before the work was done.

Continuing his address to the court on behalf of the defendants, commenced yesterday, Mr. Bodwell cleared up some minor matters in connection with the position of the superincumbent mass of porphyry as shown by some of the stopes in the southern turn. Here, in the upper levels at one point where a small corner of ore had been left and where Mr. Sizer declared the wall of the black fissure was seen, the footwall being seen, Oscar White swore that after the first trial he caused this black fissure to be drilled into, and in place of the black fissure, porphyry was encountered as far as drilled in—four feet. The attention of the chief justice was particularly called to this instance of Mr. Sizer's mistaken views on the existence of the black fissure, when as a matter of fact, four feet of porphyry was bored into, the porphyry continuing apparently across the whole face of the drift. Sizer had controverted all this evidence and so Mr. Bodwell, pointer in hand, went over numerous sketches and plans arrayed on the map stand and read all the conflicting testimony bearing on the point, and argued in favor of its proving Mr. Sizer clearly wrong in his contention. Mr. Elmendorf had stated at the first trial that if the little corner of ore seen standing in this stope were taken down and the work continued the ore would be found continuing on. This work was done and the ore found exactly as Mr. Elmendorf said it would be. Further, Elmendorf's evidence on this point was exactly in line with Mr. Bochmer's testimony given to the full court. The crack or crevice shown at this point in the turn is a branch fissure from the main Slocan Star vein which continues on its way north. All the new work done here merely shows the existence of this branch fissure, something never denied by the defendants, but shows no continuation of the black fissure as claimed by the plaintiffs. "A fissure," said counsel, "ends just as far as you can see it. All the experts agree as to this; it may extend further even that shown or it may pinch out a few feet further on, in any event it is merely a branch fissure from the main fissure, the former is just where it might be expected; the latter, the main fissure clearly on its course to the north and then to its turn to the west.

Coming to the surface showing, Mr. Bodwell said that Sizer, Elmendorf and the chief justice visited the point where an 8 foot excavation shows the Star vein turning around to the west. They got into this excavation and walked around the curve or bend "on the vein," when the chief justice asked Sizer what vein this was he, Sizer, said it must be the Silversmith vein. The chief justice then asked Sizer to show the surface indications of the black fissure but Sizer was unable to point out evidences of his contention of what occurred underground. Counsel laid very great stress on this condition of affairs in the history of the litigation and referred to many extracts from the evidence to substantiate every statement made. Mr. Bodwell read the judgment of the chief justice on this point wherein the learned judge declares Sizer admitted the vein turning around the bend and continuing west along the surface, claimed that the outcrop of the black fissure was to be found to the east but was utterly unable to substantiate his view or to point to any evidence of outcrop of the black fissure. The conditions on the surface, continued counsel, clearly disproving the plaintiffs' contention that faulting occurred, that the black fissure is a fault fissure, and that at the south turn the vein to the west of the black fissure has been thrown 700 feet to the north. There is absolutely no evidence of displacement to be seen on the surface, the apex of the Star vein can be traced readily through the many surface pits referred to in the evidence, extending from the east end of the Slocan Star claim to the west end of the Silversmith claim. Mr. Bodwell devoted some little time to discussing the term "black fissure." It was a misnomer, a name originated to assist in describing a geological condition of affairs that could not be found to exist. The plaintiffs must prove a dislocation of the Star vein and this they have not done, nor can they do so by any evidence adduced in this action.

The evidence of Bruce White was read to show that no other vein has been found along the surface extending to the north and attention was directed to the fact that the plaintiffs had not offered any evidence on this point though they declare the black fissure is found on level 5 extending to the north as shown up in the new work.

Elmendorf's analysis of what is shown by the surface showing was gone into very fully, Mr. Bodwell directing the court's attention sarcastically to the fact that the plaintiffs had said practically nothing about the surface showings in the presentation of their case to the court, either to the chief justice, or to the full court. While Mr. Bodwell read long extracts from the evidence, Mr. Lennie stationed himself at the plan and traced with a pointer the points touched upon by Mr. Bodwell, and in this way rapid progress was made. If a fault existed then the throw is from the Star vein to the Silversmith vein, a distance of 700 feet. The defendants did not admit a fault but if a fault does exist there is no doubt from the plaintiffs' evidence that the Silversmith vein is the continuation westward of the Slocan Star vein; Sizer and Fowler were equally clear on this point. All conditions in the two veins as shown up are identical. Admitting this to be so that is, admitting a throw, the west end of the Slocan Star vein filling on to the eastern end of the Silversmith vein, then the plaintiffs are out of court on their own showing and counsel gave a list of cases fitting into what the evidence shows in this case, giving the defendants extra lateral rights under existing conditions. Mr. Bodwell argued the faulting theory on the express condition that in doing so he did not agree to it, but took it up on the plaintiffs' own presentation of the case. The apex was admittedly uninterrupted on the surface, and that being so, all that need be traced underground was the identity of the vein. That where the otherwise trespasser wants to go follows down from his apex line on the surface. The defendants have always protested against all the attention being given to what is shown on the lower or 5th level, the plaintiffs have carefully kept away from most of the upper workings and altogether away from the surface. If there is anything in plaintiffs contention at all it would only show displacement on the lower level, leaving the apex line absolutely undisturbed, and leaving the defendants' extra lateral rights intact in consequence. The policy of the plaintiffs on this point was an attempt to play with the intelligence of the court, but it destroyed the plaintiffs' own contention.

After the midday adjournment Mr. Bodwell proceeded with comparisons of the identity of the Slocan Star and the Silversmith vein as made in the evidence by both sets of mining experts and by practical miners.

Counsel then dealt with the conditions at the second bend of the Star vein where it is shown going on to the west in Silversmith grounds. The miners knew they were following on the vein, the crosscuts done there were for the purpose of obtaining evidence for this trial not for the purpose as suggested by Mr. Taylor, of finding out where the vein was. The evidence on the new work going on to the north, shows only a crevice narrowing down and probably dying out a little further down. The new work here in no way shows the continuation of what the plaintiffs call the black fissure, and the defendants' the main Star vein. Counsel denied at length all the inuendoes thrown out by plaintiffs' counsel all through the case, that they, the defendants, had lagged up any sections of the workings to conceal what might be found there; on the contrary the defendants had sought to expose on the workings all the disputed points so that a fair inspection could be had, both by the chief justice and by all the experts. When Mr. Sizer went through he was accompanied by a miner, instructed to give him all necessary assistance in finding anything he wanted and when the chief justice was at the mine both Sizer and Elimendorf were present, and in a position to point out the observed facts, and it must be presumed they both did so.

As to Fowler's testimonw of what is found in the new work to the south, it had been demonstrated beyond question that the ore there was ore in place and under no conceivable circumstances could be described as drag ore as stated by Mr. Fowler. As to the bent up ends of the slates where the plaintiffs' claim cutoff of Star vein is seen, the slates bending or turning up as the so called black fissure is met, the whole evidence showed that while this is so, further inspection shows just the reverse position of the slates a little further on, the slates really going along in a waving formation up here, down there, and so on. This said Mr. Bodwell was a fair instance of the incomplete statements made by Sizer, just a portion of the truth given to fit in with the expert's contention, a contention which vanishes when the whole truth is brought out. This was seen and noted by the chief justice on the occasion of his visit to the mine.

Fowler's description of drag ore can only hold if a fault is allowed; it does not prove a fault; it is evidence of motion within the vein, and on the contrary the experts clearly swear to the ore in the first turn being clearly ore in place having all the necessary indications and conditions. All that is opposed to this is the flat statement of Fowler and Sizer that they say this is drag ore. The plaintiffs first denied ore continuing round the turn at the first bending point; they declared emphatically that the ore was ended here by the black fissure, cutoff sharply as one wallof a room sharply cuts off or terminates another wall. When brought face to face by the ore being shown actually turning at the bend, the plaintiffs fell back on the drag ore theory as the only possible means out of an impossible condition, now the defendants were equally in a position to prove that it was ore in place, the vein itself being seen actually bending around the turn and disposing of the cutoff theory most effectually. The comment of the chief justice on this section of the evidence was fully made clear to the court. The ore found going on was 280 feet long, continuous and in place. Then Mr. Sizer submits another alternative theory.

Mr. Atwater's inability to tell the difference between quartzite and porphyry was noted by counsel, who said it accounted for the plaintiffs not laying much stress on Mr. Atwater's testimony.

Taking up the claimed difference between Bochmer and Elmendorf, Mr. Bodwell said the difference if any was not in anyway inconsistent with the one theory advanced by both. Bochmer said his theory was merely a possible explanation of the branch spurs or fissures going out, on the course of the main Star vein he is clearly in line with Elmendorf. It was a good sample of Mr. Bochmer's absolute honesty as a witness, his sincerity not being appreciated by Mr. Davis, who could only understand cast-iron experts of the Sizer kind.

The position of the porphyry mass

TO WORKINGMEN

NOTICE

Whereas, at the Last Chance and Surprise mines, Chinese kitchen help is at present employed, to the exclusion of White labor.

Therefore, be it resolved that this organization, Sandon Miners' union No. 81, of the W. F. of M. reaffirming its opposition to the employment of Orientals within its jurisdiction, strongly condemns the position taken by the management of the properties in question, and counsels workingmen everywhere and those favorably disposed toward organized labor to be governed by this action.

SANDON MINERS' UNION

A. SHILLAND, Secretary.

NOTICE

NOTICE is hereby given that the International Coal and Coke Company, Limited, will, upon May 1, 1907, pay a dividend of one per cent on its issued and outstanding capital stock. Said dividend will be paid to registered shareholders only, and the transfer books of the company will be closed from April 15, 1907, to May 2, 1907, both days inclusive. All unregistered shareholders should send their stock before the first mentioned date to the secretary at the office of the company, Fernwell building, Spokane, Washington.

Dated at Spokane, Washington, March 30, 1907.

Synopsis of Canadian Homestead Regulations

ANY available Dominion lands within the Railway belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 an acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2,000 pounds shall be collected on the gross output.

Deputy of the Minister of the Interior N.B.—Unauthorized publication of this advertisement will not be paid for.

STAR vs. WHITE APPEAL

(Continued from Third Page)

exactly accounts for the twisted and turned line of the Star vein as shown. The twists and turns laughed at by the plaintiffs, is exactly what would be expected under the observed geological conditions as shown in the evidence.

Professor Parks' plans of the different mine workings, showing the veins throughout, and particularly at the turns, where they could be seen today and had been seen by the chief justice, were dwelt on at length as doing away with Mr. Davis' contention that only the ore with an apparent turn was found at the bend. Mr. Bodwell said he would stand on Elmendorf's description of what could be seen at the mine, would stand on this testimony on Elmendorf's veracity and ability, as being an absolutely correct statement of fact. If Mr. Elmendorf's veracity was conceded there was an end of what the plaintiffs' contended for, an end of "ingenuity born of despair," as the chief justice says in his judgment. Counsel then read many extracts from the evidence showing that the Star vein could be traced on its bended course as shown on the main plan. Many other references were also given, nearly an hour being taken up in giving the pages of the evidence where testimony on certain points could be found. The long barren stretch on No. 5 level some 1200 feet, was accounted for in various ways by counsel. On the surface this space was reduced to 400 feet. In the intermediate levels between No. 5 and the surface the 1200 feet was also greatly reduced. As a matter of fact, the ore runs in pockets, sometimes found on one level but not above, sometimes above and not below, so that the actual barren stretch in the vein, at all levels, is not 1200 feet, but much less, no more than about 400 feet.

The more or less sharp discussion which took place at the first trial between Mr. Sizer and the chief justice, after the visit of inspection to the mine, and the cross-examination of counsel, which followed, were gone into at length by Mr. Bodwell, who declared it proved the anihilation of Mr. Sizer and all his evidence. This last evidence was all on what happens in the first bend in the vein, where the chief justice became convinced that the ore did bend around and that the plaintiffs' theory was "ingenuity born of despair."

Mr. Bodwell then stated that he would be unable to conclude his remarks at the present session and the court adjourned at 5 o'clock until Monday morning.

In view of the references made in the argument to the extra lateral rights law of 1901, now repealed, but which governs this case, the claims in dispute being recored under the old law, the two principal sections of the statute are given in extenso.

Section 31 provides: The lawful holder of a mineral claim shall have the exclusive right and possession of all the surface included within the lines of his location and of all veins and lodes throughout their entire depth; the top or apex of which lies inside such surface lines extended downward vertically, although such veins or lodes may so far depart from a perpendicular in their course downward as to extend outside the sertical side lines of such surface location; but his rights of possession to such outside part of such veins or lodes shall be confined to such portions thereof as lie between vertical planes drawn downward as described above, though the end lines of his location so contained in their own direction that such planes will interesect such exterior parts of such veins or lodes; and nothing in this section shall authorize the locator or possessor of a vein or lode which extends in its downward course beyond the vertical lines of his claim to enter upon the surface of a claim owned or possessed by another; provided always, that a prior location on the dip of a vein or lode shall have priority over a subsequent location on the same vein or lode though such subsequent location may be upon the apex of the vein or lode; and provided always, that in cases where the land in which such claim is situate is lawfully owned or occupied for other than mining purposes, the above section shall be read subject to the rights and interests of such owner or occupied. And it is hereby expressly declared that a location laid crosswise of a vein or lode so that its centre line crosses the same, instead of following the course thereof, will secure only so much of the vein or lode as it actually crosses at the surface and the side lines thereof for the purpose of defining the rights of the owners. A location shall be deemed to have been laid crosswise when the smallest angle made by the centre line falling in the general course of the vein or lode is greater than 45 degrees.

Section 32 provides: When two or more veins or lodes intersect or cross each other on their downward dip, priority of title shall govern and the prior location shall be entitled to all ore or mineral contained within the space of intersection. Provided, however, that the subsequent location shall have the right of way through the said space of intersection for the purpose of the convenient working of the said subsequetn location and, provided also, that where two or more veins or lodes unite on their downward dip, the oldest or prior location shall take the vein or lode below the point of union, including all the spaces of intersection.

PEND d'OREILLE VALLEY

Coming Fruit Growing and Farming Section of the Interior.

(Special to The Daily News)

Waneta, April 24.—Among the less known districts tributary to Nelson, none is more likely to come rapidly to the front for its fruit growing and general farming possibilities than the beautiful Pend d'Oreille valley. Before the big mining boom this valley of open bunch grass range and abundance of wild fruits, was a paradise for deer and bear. Then the prospectors, quickly appreciating its possibilities, turned loose their numerous cayuses in the valley to rustle for their winter's living. Later cattle took the place of deer and cayuse, but with the advent of new settlers a more intensive system of farming has become necessary and the benches and bottom lands are being fenced in for fruit growing purposes, dairying and the raising of pigs and poultry. First class prices are obtained for all produce and those planting orchards can, while awaiting the bearing stage, make a good living by shipping out butter, eggs, pork, beef, small fruits and vegetables. The soil on the bench lands is principally a light loam very free from coarse sand, gravel and boulders. The climate also is exceptionally well adapted to fruit farming. As yet unaffected by the boom in widely advertised districts, prices in the valley, both for improved and unimproved land appear to be very moderate.

Waneta, on the N. & F. S. railway, is the gateway for the district and from here a good wagon road runs up the river for about 15 miles.

SUCCESSFUL EXPERIMENT

IN ASH BURNING AT THE TORONTO GLOBE OFFICE

WHOLE CITY EXCITED OVER NEW DISCOVERY

The day of heavy coal bills is passing—is passed, in fact. It has been successfully demonstrated that ashes will burn and the secret of it is every man's, says the Toronto Globe. Moisten with either salt water or salt water containing oxalic acid in solution a mixture containing one part coal and three parts ashes, place it in your furnace or in your range, and as you shut the door you will have visions—visions that are of true prophecy—of your coal bill shrinking, losing its ciphers and in the end, if you save enough ashes, vanishing altogether. The kettle on the range will sing a new song with martial vigor, while the heat waves from your radiator will zig-zag upward in never ending procession. It is true this statement that ashes will burn. The people of Toronto doubt no longer. They have tried it many of them, and there begins already to haunt their malevolent minds the picture of a lean, gaunt, hollow eyed figure shrinking in his clothes, the coal dealer trying to get a corner on the ash market.

After he had carefully read the Altoona despatch in yesterday morning's Globe, showing how ashes could be burned, Mr. Charles Kinsey, the Globe's day engineer, decided to try the experiment. His first trial was crowned with success and now economy in coal consumption is the favorite theme in the boiler room down near the big presses. Charlie confessed that it wsa curiosity that tempted him to follow the example of the Altoona cobbler. He felt rather skeptical as to the truth of the statements in the paper. In other words he was a doubting Thomas. However a conference was held with Robert Grey, another employee in the boiler room and the experiment was tried behind locked doors.

Four bushels of ashes which were ready for hoisting to the garbage wagon were emptied on the floor. About 31 pounds of coal were piled on top of that and the entire heap mixed thoroughly. Two handsful of salt were borrowed from a grocery next door and this was dissolved in a pail of water. The ashes and coal were dampened with the brine and the new fuel was ready. Still convinced that the papers were telling untruths when the statement was made that ashes would burn, the engineer shovelled the mixture into the furnaces. He and his assistant sat down where they could watch the steam gauges. Pretty soon the hand on the guage began to waver. Then by degrees it went round to figures higher than Charlie had ever seen it before.

"I guess we can unlock the door now, Bob; ashes will burn," concluded the engineer as the boiler room became uncomfortably warm.

When seen three hours later the engineer said he had added no more fuel, whereas on other days he had to throw in more coal every half hour. No mathematical calculations had been used in measuring the mixture, neither had they added any oxalic acid.

"It is a pity we did not know about this last fall instead of finding it all out in the spring," added the engineer, and he told the garbage man the Globe would burn its ashes after this.

This discovery that coal may be made perfectly combustible is a serious thing. For many years the British admiralty has conducted experiments which show that coal immersed for long periods of time in the ocean burns better and leaves less residue. The chemical explanations of this phenomenon and the Altoona cobbler's process are without doubt analogous. The cobbler, who far long years had striven to solve the problem and who succeeded at last, might have become a millionaire but some one opened the bag and the cat is out. All the world burns ashes now—or soon will.

It was yesterday that Toronto found out and commenced the experiment. The street cars that should have been crowded at 9:20 and 9:30 in the morning went down town half filled. The office boy in the inmost recesses of his brain was figuring dimly what excuse to make for being late, as down in the chilly cellar he shovelled and mixed and mixed and shovelled the new fuel. The shabby, time worn old bookkeeper in the dry goods house grew reckless with a passion for scientific research and took the kitchen scale and a shovel and a dishpan and some water and the salt dish and experimented.

It is even darkly hinted in certain circles that the general manager of a certain large electrical concern went to a shareholders' meeting—late—with ashes on his coat tails and that he was absent minded all through the meeting and is known to have asked a grocer next door how much salt was per barrel—cash. But aside from the humorous, the office boy and he bookkeeper and the general manager were each successful when the formula was followed.

The Globe was in receipt yesterday of a postcard, signed "A Puzzled One." It reads: "If I burn one part of coal to two parts of ashes and it forms a good fire and burns to a powder, where will the ashes eventually come from" This question was submitted to the Globe's mathematician, who went down to the Globe's coal pile and figured. His final solution was that the public should burn ashes and coal one day and pure coal the next, and then—when the coal operators had starved to death—buy the mines cheap and dig out enough to last another little while.

Problems innumerable present themselves. What is to become of the scavengers, three-fourths of whose winter work is the removal of ashes? How shall the city council get material to fill in the bay front. What will the surplus coal miners do? The railways will lose a large part of the coal carrying trade. Then, again, what now will be the early morning occupation of the newly married husband? How sadly will he lay away the old gloves he used to wear and the ash sifter. What end awaits the husband of the boarding house keeper? The willing odd jobs man about his wife's house? He must spend his days in sad idleness or mixing the ashes in the back cellar by aid of the machine which some genius is now trying to invent.

CAN'T WASH THEM OUT

No other method of home dyeing ever devised gives colors one half so fast, brilliant and handsome as DAIMOND DYES.

Each of the 50 colors of DIAMOND DYES give full, bright and fashionable shades that strong sunlight will not fade nor soapsuds wash out, two things that are not true of he adulterated dyes sold by some merchants for the sake of large profits.

When buying dyes for home coloring work, see that your merchant hands you the DIAMOND DYES. If he recommends other dyes he does so for his own profit.

If your merchant is out of any special color of DIAMOND DYES, write to us for them, stating what material you wish to color — all wool, silk, cotton or mixed goods. Price for colors of DIAMOND DYES, ten cents each.

This month the Wells and Richardson Co., Limited, Montreal, Que., will send free to any address new Diamond Dye Booklet and pretty souvenir card to baby. You should have them.

Minard's Liniment Cures Burns, Etc.

HELD A GOOD AUDIENCE

PRODUCTION OF THE MAY QUEEN CANTATA LAST NIGHT.

WAGNERIAN MUSIC WAS WELL RENDERED AND RECEIVED

There was a well filled house last night to greet the third production of the Nelson Choral society since its inception and there was to be noted a distinct advance in the accuracy of the singers and the absence of raggedness of the chorus. The attack, usually the failure which marks the amateur, a fault which in the past has been the one thing that the conductor, R. M. Macdonald has devoted the greater part of his attention in looking after in the concerted singing, was excellent and there was scarcely a blemish in this direction throughout the evening. The orchestra also showed marked improvement. It lent very sufficient support to the choruses especially in that from Tannhauser, "Hail, Bright Abode."

The concert was in two parts, the first taking up three choruses from Wagner, Hail, Bright Abode, the spinning chorus from the Flying Dutchman, and the well known bridal chorus from Lohengrin. Of these three certainly the best received, possibly because of its greater brightness, was the first named, although the ladies did extremely well in the spinning chorus, which they, of course, had all to themselves. Included in the first part was a welcome solo from Mrs. Briggs who has never done herself more justice here than in her effective rendering of Schubert's masterpiece, the "Erl King." Indeed the audience marked their appreciation by an unmistakable encore to which she responded with another song by Schubert "The Wanderer."

But the music of the evening, with apologies to worshippers of Bayreuth, was Sterndale Bennett's "May Queen," where the principal roles were taken by Mrs. Shanks, soprano; Mrs. Hannington, alto; G. Brown, tenor, and S. A. Wye, bass. The cantata is a work more remarkable for fluent melody and tuneful phrasing than for dramatic effect and in this respect was not received as well as "Rose Maiden." The brightest chorus of the evening was "With a Laugh as We Go Round," which received a very well merited encore, to which the conductor reluctantly yielded. The encore was doubly due. This chorus was better balanced and better sung than any other in the cantata and it had the extremely effective aid of Mrs. Shanks in the solo parts. This is Mrs. Shanks first appearance in the opera house and it may safely be prophesied that it will not be her last and that whenever she chooses to appear she will draw a large audience. She is a finished singer, with good articulation, a rare virtue, and withal possesses a voice of exceptional sweetness.

Mrs. Hannington took a difficult role as the Queen at the last minute, Mrs. Goepel, who was to have taken the part being indisposed. In spite of practically having had no rehearsal she took up a solo of unusual range and sang it with great credit. Mr. Brown's work shows a marked advance on his previous efforts, his voice has developed and he sings with greater confidence. It is gratifying to those interested to note this as the aim of the Choral society has been to foster local talent and Mr. Brown's connection with the society has proved of great benefit to him. Mr. Wye had only one opportunity as a soloist of which he took every advantage. One of the gems of the work is a trio "The Hawthorn in the Glade," in which the three solo voices blended with charming effect.

There is only one criticism to be offered to Mr. Macdonald to think over and that is that one cannot have too much of a good thing and the Choral society would do well to get to work at once on a cantata for the Fruit Fair. Mr. Macdonald has been unsparing of his efforts and the success of the whole production is due to him and to the accompanist, H. S. Bodmer, in whom the chorus and the soloists ever reckoned with confidence for careful and accurate support.

Minard's Liniment Relieves Neuralgia

A WOMAN TELLS HOW TO RELIEVE RHEUMATIC PAINS

I have been a sufferer from the dreadful disease, rheumatism, for a number of years. I have tried many medicines but never got much relief from any of them until two years ago, when I bought a bottle of Chamberlain's Pain Balm. I found relief before I had used all of one bottle, but kept on applying it and soon felt like a different woman. Through my advice many of my friends have tried it and can tell you how wonderfully it has worked.—Mrs. Sarah A. Cole, 140 S. New St., Dover, Del. Chamberlain's Pain Balm is a liniment. The relief from pain which it affords is alone worth many times its cost. It makes sleep possible. For sale by all druggists and dealers.

THREE WOMEN KILLED

Milleville, N.J., April 24—Three young women, employed at a glass factory, here were killed today by the collapse of a smoke stack which crashed through a room in which they were working.

FOR OLD AGE ANNUITIES

SIR RICHARD CARTWRIGHT AGAIN OUTLINES HIS PLAN

BELIEVES IT WOULD ENCOURAGE THRIFT AND INDEPENDENCE

Ottawa, April 24.—Sir Richard Cartwright has again outlined his proposals as to annuities in a speech in the senate. After a speech by senator Sullivan in favor of the principle of the proposals, the minister of trade and commerce said he had received a good many communications in regard to his annuity bill and a great deal had been said about it in the press. He now thought it would be well to make a statement on what his suggested bill proposed to do and to what it did not propose to do. In the first place the bill proposed to give the government power to sell annuities. It proposed that the annuities should be inalienable; there should be no forfeiture. Everything a man paid in should go back to him in some form. If he died before reaching the age at which he should receive annuity his heirs would get what he had paid.

The bill did not propose to authorize the government to grant old age pensions. It did not propose to interfere with insurance or the operations of insurance companies. It did not propose to make any provision for families except the repayment of sums contributed by men who died before reaching the annuity age of 60 years.

Sir Richard said that he wanted to make it clear that the plan he proposed was for annuity and not a pension. An annuity was a purchase and a pension a gift. They had no points of resemblance. There had been a good deal of criticism of this scheme. There were some who objected to the plan because it was not a provision for old age pensions, other because they claimed that it was an old-age pension scheme in disguise; some objected to the plan as going too fare and others thought it did not go far enough; some held that it would be a burden on the state and others objected to it because the state would make a great deal of money out of it; some held that there was no need for the plan and some saw in it a sinister political design; some objected to it because they thought that it would interfere with work that should be left to the insurance companies and others objected to it because it did not provide for insurance.

Those who claimed that there was no need or demand for such a plan in Canada made a serious mistake, sir Richard thought. Of course there was no demand for the article he offered because it was not on the Canadian or any other market. Once on the market the demand would appear. Persons who claimed that there was no need for it were unfamiliar with the bank statements and government reports. These showed that there were in Canada between five and six hundred thousand persons who had money which they were not able to invest at a higher rate than the three per cent paid by banks on deposits. The savings accounts of Canadians amounted to between a hundred and fifty and two hundred million dollars. A great deal of this was provision for old age. Men deposited in banks and took the low rate of interes because they desired absolute security and were not willing to attempt to get more value for their money by risking it in enterprises which they regarded as at all dubious. To this class sir Richard said his scheme offered an opportunity to make provision for old age. He thought it the duty of the state to adopt this plan and make it thoroughly known to the people. The purchase of an annuity tended to strengthen a man and encourage both thrift and independence, while a pension would tend to debase and demoralize him. It was the chief duty of the government to help men help themselves. The plan would not seriously interfere with the field of insurance companies because it was not proposed to sell an annuity of more than $400 a year to any one person. Those who wanted more would be left to the companies. Then most persons who purchased annuities wanted them to begin at once. His plan was for a deferred annuity—deferred to the age of sixty.

There was some confusion as to what his scheme would do. Figuring interest at three and a half to three and three-quarters per cent a man who has begun payments at the age of 20, paying 25 cents a week until he was 60 years old, could receive an annuity for the remainder of his life of $120 a year, and if he were willing to defer receiving then nnuity until he was 65 with no payments between 60 and 65, he could be given $200 a year, practically without cost to the state. A man who begins making payments at the age of 25 years could receive the same annuities by making payments of 30 cents a week; beginning at 30 years the same results could be obtained by payments of 35 cents a week; beginning at 35 years these results could be obtained by payments of 50 cents a week; beginning at 40 years these results could be obtained by payments of 70 cents a week. Sir Richard thought there were a large number of wage earners in Canada who could afford to make these payments and who would be glad of the opportunity of doing so. The cost of management would be borne by the state and would be very small if handled by the machinery of the government savings banks. The state might have to make a small grant for the beginning of the scheme. The old age pensions of Germany or Australia furnished no comparison for this plan.

The present time was singularly favorable in Canada for the inauguration of the scheme proposed. The dominion was entering on a season of great industrial development and for a long time wages and interest would continue at a high rate. Though there might be occasional temporary setbacks until the west filled up Canada was bound to be very prosperous, as the United States had been from 1840 to 1860, which was admitted the most prosperous period of American expansion. This was checked by a devastating war and a devastating tariff. The adoption of this scheme would tend to lessen the industrial evils which had developed in the United States. He thought the scheme was suited to the temper of the Canadian people. It might be said there was no precedent for it, but Canada could make a precedent in this case as it had successfully made precedents before. Canada was fortunate in having no submerged tenth of population and he hoped it would have none for many a day. This plan would be an aid in this direction.

Referring to pensions, sir Richard said he had small sympathy with philanthropists who would aid the idle at the expense of the industrial. It was good doctrine that if a man would not work neither should he eat. This was no charitable plan. The state supplied the machinery and the citizens would do the rest. Both would benefit and the cost would be inconsiderable. He figured the initial cost would be about equal to that of a field gun in a fie'd battery at the latest price Canada had had to pay. At the least and lowest estimate the adoption of the plan would involve no loss and it ought to be given a chance. If it failed Canada would be no poorer. If it succeeded Canada would be richer in more than money—in thrift and independence.

Senator Robertson suggested that the speeches delivered on this plan should be printed and distributed.

Senator Cloran pointed out that under the plan a man with a family might draw his annuity for five years, dying at the age of 65, and his family would get no more, while the man without a family might continue to live and draw annuity for 30 years after the age of 65. These were unequal results, which would be criticized.

Senator Ellis supported the motion that the speeches be printed. The motion for the papers carried and the debaate was ended.

March 27, 1907.

NOTICE is hereby given that 60 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for permission to purchase the following described land, situated on the west side of Kootenay river, and covering all of A. L. Stewart's abandoned pre-emption No. 759 ,and about one-eighth of a mile north of Angus Curry's pre-emption: Commencing at a post marked "Sidney J. Cummings' southeast corner post," thence north 40 chains; thence west 60 chains; thence south 40 chains; thence east 60 chains, to place of commencement, containing 240 acres more or less.

Dated this 28th day of February, 1907.
SIDNEY J. CUMMINGS.

NOTICE is hereby given that sixty days after date I intend to apply to the Hon. the chief commissioner of Lands and Works for permission to purchase the following described lands, situate in West Kootenay district: Commencing at a post marked by name "Gerald Rees' N.E. corner post," at the northwest corner of the purchase claim staked April 20th, 1906, by D. A. Boyd and F. J. Sammons, thence 20 chains west along the C.P.R. right of way; thence 20 chains south; thence 20 chains east; thence 20 chains north, to post of commencement containing 40 acres more or less.

Nelson, B. C., April 1, 1907.
G. S REES

NOTICE is hereby given that 60 days after date I intend to apply to the Hon. the chief commissioner of lands and works for a special license to cut and carry away timber from the following described land, situated in West Kootenay district:

Commencing at a post planted on the west side of Lardo river, opposite S. W. corner of lot 827, marked A. E. Fowler's N. E. corner, thence south 40 chains, thence west 40 chains, thence north 80 chains, thence, east 80 chains along west side of Lardo river to point of commencement.

Dated this 6th day of March, 1907.

NELSON'S NEWS OF THE DAY

Tomorrow is the anniversary of the Odd Fellows.

There was a meeting of the lacrosse club last night.

A successful At Home was held by the ladies of the Maccabees last night.

A. Sharp, the well known mining man, came in from Orient, Wash., last night.

Today being the festival of St. Mark there will be a celebration of holy communion at St. Saviour's church at 10:30 a.m.

The fire department has received another consignment of hose, but in the meantime have unearthed unsuspected hose which has been lying in store.

F. J. Sammons came in yesterday from Procter and reports that there is every prospect of a good crop of berries this season along the west arm of the lake.

Captain Coppen of the local cricket club announces the accession of several new members to the club who are likely to prove acquisitions to the team.

A certificate of work was issued yesterday to H. Reichart on the Prince Arthur and the location recorded of the Washington on Kootenay river near Nelson, by Margaret Clark.

Yesterday was chillier than the average of the past week, the thermometer sinking to freezing point early yesterday morning and not rising above 55 degrees all day, although sunny.

Three more cases have been added to the list for the supreme court sittings here next week. These are Genelle vs. Genelle, in re Yale-Columbia sawmill, Taylor and O'Shea for plaintiff and W. A. Macdonald and Hall for *defendant; Majorsen vs. Granby*, for personal damages, Taylor and O'Shea for plaintiff and J. A. Macdonald and D. Whiteside for defendant; Campbell vs. Wall and Creelman, damages for personal injury, Taylor and O'Shea for plaintiff and Lennie and Wragge for defendants.

NELSON'S NEWS OF THE DAY

A Sikh walked yesterday into one of the local banks and demanded one $100 bill in lieu of his time checks. Not having a note of the amount required, the cashier proffered gold and counted out ten $10 pieces. The Sikh mistook them for the gold mohur of his own country and naturally said "mohur," "mohur." The cashier mistaking his utterance for "more," "more," there was instant trouble between the distant Aryan cousins.

At the residence of the mother of the bride, Mrs. John Campbell, of Water street, John Macdonald was married last evening to Miss Marion Campbell by Rev. J. T. Ferguson, John Campbell officiating as groomsman and Miss Mary Campbell, the sister of the bride, as bridesmaid. After the wedding there was a merry reunion of the relatives of the bride and groom at the home of the former, the happy couple leaving this morning for Edmonton where they will in future make their home.

MOTORS OUST HANSOMS

London, April 24—Just as Paris is rejoicing in her new toy, the woman cabdrivers, London is vastly pleased with her taximeter motor cabs, which are in several ways a vast improvement on the old hansoms. They are smrt looking machines, pinted crimson like, with chauffeur in a bright blue livery. Looking something like private landaus, they glide about the streets safer and quicker than the horse cab, while the fare is automatically shown on a dial which prevents the classic dispute between the cabman and his fare.
