OLSHEVIK FORCES GATHER STRENGTH FOR OFFENSIVE TAKE BREST-LITOVSK FORT

...ched Cavalry Corps Will Have to Cut Way Through ...olish Lines; Poles Take Prisoners; Conference Pre- ...minary to Peace Negotiations Is Under Way; Poland ...eceives United States Note on Frontiers.

...NDON, Aug. 30.—Bolshevik for- ...ave captured a fort a mile and ...lf from Brest Litovsk, says ...spatch to the Daily Herald ... Minsk, dated Saturday. The ...ge declared that the Reds are ...ring strength fora new of- ...e.

...sheviki Plan Five Operations

...RIS, Aug. 29.—The Bolsheviki ...not remain idle, although de- ..., the Warsaw correspondent ...'Information quotes Gen. Rose ...wski, President Pilsudski's ... of staff, as saying Saturday. ... the 70 divisions they gathered ...st Poland, there remains barely ...en Rose Wadowski continued. ... they are organizing new ar- ... at this moment. They are ...ding fire and blood in East- ...Galicia, and arming bands of ...nts. Our information justifies ... affirming that the Bolsheviki ...preparing a great offensive in ...rn Galicia with 15 new divis- ... and five military operations will ...begin.

Prepares Conference

...ARSAW, Aug. 29.—(By Associ- ... Press)—Prince Sapieha, Polish ...gn minister, has left for Brest- ...sk to confer with M. Dombski, ... of the Polish delegation at .... Word reached the foreign ... today that he had passed the ...evik lines and had been received ...e Poles. According to word re- ...d here the Polish delegates at ... are virtually prisoners and ...ooked on as spies.

... addition to not getting enough ...t, it is declared the food does ...uit their taste. However, their ... complaint is the lack of com- ...cation. This has interfered ... negotiations, from the Polish ...point, since the beginning. Wire- ...messages take from two to five ...in reaching Warsaw by way of ...ow. In addition the Poles say ... are experiencing repeated set- ...s with the courier service be- ...n Warsaw and Minsk. The date ... place for the continuance of the ...erence will be announced with- ... few days or soon after the ...e's return from Brest-Litovsk. ...e Brest-Litovsk conference will ... to do with the progress of the ...k negotiations.

The American note to Poland relating to the American views concerning any Polish advance beyond the ethnological frontier has been received. In diplomatic circles it is considered in line with the American policy as set forth in Secretary Colby's note to Italy.

In diplomatic circles here confidence is expressed that the negotiations will not be broken off through disagreement regarding the place where the delegates could continue their peace talk.

WARSAW, Aug. 29.—Part of the third societ Russian cavalry corps and a detachment of infantry, according to news from the northern front, are still west of Kolno, near the East Prussian border, trying to fight their way through the Poles. Near Miawa the Poles took 3000 prisoners and captured three guns.

The pursuing armies have retaken Ossowiec and Grapevo and are continuing east. East of Brest-Litovsk the Poles captured 1200 Russian reenforcements.

Around Lumberg the Poles reached the outskirts of Krasne and occupied Prezehyslany.

Polish artillery has decimated the principal column of retreating soviet forces on the northwestern front, says an official statement. More than 200 men, including two general staff officers and 11 line officers, have been captured. Among the killed was the commander of the 57th bolshevik division and his chief of staff.

Detachments of the third Polish legion division fighting east of the Bug river near Brest-Litovsk have become engaged in an energetic defensive action in anticipation of a soviet attack against that city.

Repeated bolshevik attacks in the region of Lemberg have been repulsed. The situation on the northern front is without change.

LONDON, Aug. 29.—The bodies of 10 Germans with their heads blown off have been found in the wood near Beauthen, Upper Silesia, says a dispatch from Oppel in the London Times. It is feared, adds the report, that when news of this discovery spreads through Upper Silesia, where fighting has taken place between German and Polish factions, the former will make reprisals.

...FUL DEATHS AT RACE MEET

...Men Burn to Death Un- ...ler Their Car; Child ...Killed Also.

...NTA ROSA, Cal., Aug. 29.—Two ... racers, Arlo Beattie, aged 26, ..., and Delbert Walker, aged 24, ...hanician, were burned to death ...ath their car, and a seven-year- ...spectator, Clarence Pregge, was ...ntly killed, when a light car, ...red in the Sonoma county fair ..., today left the track and ...ed into a tree. The boy was ...y decapitated.

...RK MAYOR NOW ...AT DEATH'S DOOR

...y Die Any Moment Doc- ...ors Think—Says Will Be ...Released.

...NDON, Aug. 29.—The condi- ... of Terence MacSweeney, lord ...r of London, who is in Brixton ... on a hunger strike, was of- ...ly stated to be unchanged to- ... His sister, who visited him ...morning, said he passed a rest- ... night and was sinking, and ...doctors thought he might die ...any moment. Mayor Mac- ...ney was still conscious, how- ... and told her: "I am con- ...d I will be released. It will ...etter for my country if I am

King May Intervene

...e report that Sir Hamar Green- ..., chief secretary for Ireland, had ...ght an ultimatum from the Irish ...nistration, is declared untrue.

...ME, Aug. 28.—M. Ramadana, ... chief of the district of Mes- ...a, Tripoli, has been defeated ... a dispatch from Tripoli. Two ... and followers also were killed ...aptured.

SASKATCHEWAN IS AFTER DRUGGISTS

Twenty-seven Lose Licenses for Abusing Liquor Selling Privileges.

REGINA, Aug. 29.—Druggists in the province who are breaking the liquor laws are feling the influence of the newly created Saskatchewan liquor commission. The commission announced today that last week liquor dealing privileges in 27 drug stores had been cancelled. No names were given.

LINERS NOW EQUAL TO ALL DEMANDS

NEW YORK, Aug. 29.—Trans-Atlantic passenger travel, which up to a short time ago taxed ships to capacity, has suddenly fallen off, large steamship lines report. Indicating this slump, two of the largest liners, Olympic and Aquitania, sailed yesterday with available accommodations in all classes, for the first time since the ships were restored to passenger service.

The slump, steamship agents said, is caused by various reasons, including ending of summer vacation periods, unsettled condition of the world's markets and a hiatus between summer and fall travel.

NEW DESTROYER RUNS OVER LAUNCH

SAN FRANCISCO, Aug. 29.—Two men in a launch were run down and killed yesterday by the destroyer Kennedy as it backed out of its slip at a local shipyard preparatory to taking its last trial trip before being turned over to the government. The two were J. E. Porter of Oakland and D. A. Newman of San Francisco.

HAMILTON AGENT TRIES PONZI PLAN

HAMILTON, Ont., Aug. 29.—J. Goodman, a local steamship agent, yesterday announced that every person who deposited $1 with him would, on Sept. 4 receive $2. It is estimated 1500 took advantage of the offer. "The scheme is fair and above board," was his reply to inquiries as to how he was going to finance it.

KING WOULD RALLY ALL DEMOCRATS

Liberal Chieftain Makes Bid for Farmer and Labor Support.

PAYS TRIBUTE TO SPIRIT OF QUEBEC

Speaks of Service Rendered by French-Canadians in the War.

BROCKVILLE, Ont., Aug. 29.—Addressing an open-air meeting under the auspices of the Leeds and Brockville Liberal association Saturday afternoon, Hon. W. L. MacKenzie King, leader of the Liberal opposition in the federal house, made a strong bid for the rallying of farmers and labor to the ranks of the Liberal party, on the plea that it would be better for democratic forces of all classes and shades of opinion to unite against what he termed reactionary Toryism.

In laying down the Liberal platform, Mr. King stressed his claim that the Liberal party alone stands for the right of the people to govern themselves. He contended that at the present time there is neither a representative parliament nor a responsible ministry.

Other speakers included Hon. Jacques Bureau, who made strong protestations against the supposed cleavage between Quebec and other provinces and sought to correct what he held to be misrepresentations of the oldest province. Hon. G. P. Graham and H. J. Logan, ex-M.P. of Amherst, N. S., also spoke. The meeting was attended by 1500 persons.

Speaking for about an hour and a quarter, Hon MacKenzie King opened with an allusion to tradition, in which his name had been mentioned by the chairman, James McGlade, and said:

"We may have new parties spring up here and there, but, after all, the forces that are going to count in the long run are not the new forces that have just come into being, but the old forces that have come with might through the centuries, replenished, renewed and revived by new springs of influence and power which come with changing times and seasons."

Referring to the presence of Hon. Jacques Bureau on the platform, the speaker spoke of the help he had lately received from Quebec members in his campaign, and added that he had heard there was to be a society formed for the better understanding of the two provinces.

A Better Understanding

"What better understanding can you have between Hon. Jacques Bureau and myself?" he asked. "What we want is not to talk about better understanding, but to come and know each other, and then there will be no necessity to talk about a better understanding."

Mr. King went on to speak of the war service that had been rendered by French-Canadians, members, and Liberal members, or their sons, mentioning several by name, explaining as he did so, because some of them, who read the perorations of Premier Meighen, might think that the Union government alone had saved the country.

"In my opinion, it is the worst of taste in any man, especially the one who calls himself the first citizen of this country, to try to monopolize the honor of having saved the country in the war. The Liberal party seeks to see that these sacrifices are not all in vain."

CONGRESSMAN HAS A FRESH VERSION

Now Says Money Given By Britain Through Commercial Agencies.

CHICAGO, Aug. 29.—Congressman Fred Britton of Illinois declared that when he charged $87,500 appropriated by Great Britain for entertainment purposes at the Washington embassy had "found its way into the Democratic national committee," he was not accusing Auckland Geddes, ambassador, of any act not in keeping with his office. In fact I do not believe this money actually found its way to the British embassy" he said in a statement. "I do not think it ever was handled by Sir Auckland Geddes.

"If the senate committee will follow the leads I will give, I think it will find a much larger amount is being spent in America through British commercial agencies in support of the British league of nations which the president brought back."

FRANCE HAS NEED OF BREAD STUFFS

PARIS, Aug. 29.—Andre Liesse, editor of the financial journal Economiste, declared in an article today that France will be obliged to import 4,409,240,000 pounds of breadstuffs, and that the United States has the largest available quantity for that purpose. He remarks France will be able to profit by the fall in the Chicago wheat market this week.

ELECTRIC PLANTS ARE ENCIRCLED

Broad Fireguard Dug; Rains in Lake Winnipeg District.

WINNIPEG, Aug. 29.—Bush fires are burning in the Lac du Bonnet district, but though the hydro-electric power plants of the city and the Winnipeg Electric Railway company are practicaly encircled by flames, they are in no danger, it was authoritatively reported tonight.

In the case of the city's plant, the fire that occurred four years ago destroyed the timber in the immediate neighborhood, and it has been kept clear of brush since. An additional precaution in the shape of a broad fire guard has been dug. Officials of the city light and power department and the Winnipeg Electric Railway company have big gangs of fire fighters out on the watch.

No damage to farm property in the Lac du Bonnet district has been reported.

Heavy showers of rain which fell in the Lake Winnipeg district this afternoon extinguished the fire which had threatened Mnhal, and neighboring resorts. The fires in this district had pretty well burned themselves out by Saturday afternoon, and today's rain, which fell for about two hours, prevented any chance of glowing embers starting another blaze.

PRESS PARTY IS CHEERED AT VICTORIA

Make Eloquent Speeches Before Canadian Club at Banquet.

BURNHAM FAVORS EMPIRE COUNCIL

Take Fifty - Mile Motor Trip; Start for East Today.

VICTORIA, Aug. 29.—"Canada is destined to become the core and kernel of the empire. More than any other part of the great British commonwealth, not excepting, the motherland itself. Canada stands to gain by holding the empire together. Standing between the old worlds worlds of the east and the west, in itself a vast and wealthy empire, Canada will necessarily become the seat and center of the world-embracing Anglo-Saxon federation that is to come."

This declaration, made with characteristic Celtic sincerity by David Davies, representative of Swansea, Wales at the dinner given last night to the delegates of the Imperial Press Conference by the Victoria Canadian club, drew prolonged applause from the 500 members of the club who were present.

Favors Empire Council

Viscount Burnham also spoke asserting that the solidification of the empire witnessed during the past few years was not so much the result of the war, its common trials and sacrifices, as it was a consequence natural course of events. It was now recognized, he said, that the press had become a vital part of the machinery of government.

He declared himself in favor of the establishment of an Imperial privy council truly representing all sections of the empire.

This gathering was the concluding function of the conferences' visit to the west.

During the afternoon, after luncheon at Duncan, the party visited the Cowichan district, taking a 50 mile auto drive through delightful scenery, and then, separated into some 20 groups, being entertained to tea by local residents among the many beauty spots. The cordial informality of these gatherings proved very welcome after the weighter engagements of the last six weeks. Today the delegates returned to Vancouver.

Embark on Train

VANCOUVER Aug. 29—After a delightful visit to the British Columbia capital, the delegates to the Imperial Press conference returned today. They are spending tonight on the train, preparatory to leaving at an early hour tomorrow morning on their return journey east.

RAINFALL NEARLY FULL HALF-INCH

Up to 5 o'clock yesterday afternoon, the rainfall in Nelson during the present wet period which started Friday morning, was .46 inch. In the 24 hours ending at 5 o'clock yesterday, .15 inch fell.

Dry plates have been in use less than half a century.

CONTROL OF WHEAT ENDS TOMORROW

Farmers Who Were Against Board Now Would Like It Retained.

HAS BEEN BOON FOR GROWERS

Government Considers It Not Required As High Joint Purchases Over.

OTTAWA, Aug. 29.—(Canadian Press)—With the going out of existence of the wheat control board on Tuesday of this week, the business of buying and selling Canada's most important agricultural product will once more become the business of private firms and individuals. With the passing of the board there will also come to an end the fixing of prices for flour and wheat, and there is considerable discussion as to what the immediate effect of the restoration of the old order of things, with prices based upon market conditions, will be.

The government's decision to do away with the wheat board, which handled the 1919 wheat crop on the basis of a fixed initial price, plus what the market would bring, has been taken in the fact of considerable objection. Curiously enough, much of this has come from wheat growers who were strongly opposed to government control last autumn. The explanation of this peculiar situation doubtless lies in the fact that wheat control worked out much more successfully, and realized for the farmers more for the grain than they thought it would, with the result that this autumn they have, in many cases, expressed a preference for its continuance.

The attitude of the government is that, under existing conditions, when the allied governments are not purchasing immense quantities jointly, it is not advisable that control should be maintained. It has been pointed out, however, that at the last session of parliament power was taken to re-constitute the wheat board and take control of the handling of the 1920 crop should it be deemed necessary to do so.

An interesting feature of the situation in Great Britain is that the board subsidies are paid by the government have been removed, but bread prices will not, it is expected, be increased. It is predicted that prdices obtained for wheat in the British market this year would be approximately the same as were paid for the 1919 crop.

THRESHING ON IN SASKATCHEWAN

Wheat Cutting is Almost Completed; Yield Exceeds Estimate.

REGINA, Aug. 29.—Wheat cutting is now almost completed in the southern Saskatchewan district, and the cut in most cases is expected to be greater than in the government estimate. Threshing has strated in most centers, and is expected to be general by the end of the week. The cutting of coarse grains is well advanced. There is no scarcity of harvest help.

STATESMAN FROM AUSTRALIA COMING

VICTORIA, Aug. 29.—Right Hon. W. A. Watt, acting prime minister of Australia during the war period when Premier Hughes remained in England to handle the war business of his country, is on his way here, according to word received Saturday by Premier Oliver. Hon. Mr. Watt will arrive in Vancouver early next month, and remain in Vancouver and Victoria for 10 days. He will leave in Sept. 15 for Australia. Mrs. Watt is accompanying him.

SOLDIER DIES FROM APOPLEXY

ST. JOHN, N.B., Aug. 29.—A message from Dalhousie, on the north shore of the province, reports the sudden death of Lieut.-Col. Bruce Caldwell there last night. He was visiting there apparently in the best of health, when stricken with apoplexy. Lieut.-Col. Caldwell was one of the best known men in Canada. Early in the war he volunteered for service and went overseas with the Canadian forces, where he became an officer commanding the Canadian Postal corps. His work won for him the Order of the British Empire. He was prominent in sport in his younger days, and had rowed in Winnipeg and Toronto crews.

Messrs. H. Braham E. Bloch and L. Bloch report to the French Academy of Sciences that they have developed a machine that takes moving pictures at a speed of more than 20,000 a second.

FORTY WOUNDED AND SIX KILLED IN BLOODY FIGHT IN STREETS OF BELFAST

Armored Cars and Squads of Police and Soldiers Pour Volleys into Crowd; Sinn Feiners Make Organized Raid on Unionist Quarter, Firing Into Houses; Are Eventually Driven back; Many of Injured Are in Serious Condition; Quiet Last Night.

BELFAST, Aug. 29.—Belfast's Saturday night was the worst since what is popularly known as the Battle of Kashmire Road. Six persons were killed, and nearly 40 wounded, many of them seriously. All the killed were young men, the victims of gunshot wounds.

Ballymacarrett, a suburb of Belfast, responded to the lord mayor's appeal, and remained fairly quiet, but Saturday afternoon Cullingtree road, abutting Grosvenor road, the Unionist district, and from where side streets radiate to the falls, became the storm centre.

Later in the evening the battle shifted to the northern part of the city by way of Townsend street, a long thoroughfare extending from the falls to Old Lodge road, Sinn Feiners in this neighborhood made an organized descent on Unionists in Crumlin road, smashing windows and firing into the houses. Failure by the police to hold them back led to the summoning of the military.

Several armored cars were in action, with squads of police and soldiers, and volleys were poured into the crowd.

After two hours of stiff fighting, the Sinn Feiners were driven back into their own quarters, but sniping into the Unionist quarters continued far into Sunday morning.

BELFAST, Aug. 30.—Quiet prevailed in Belfast at midnight last night, furnishing a strong contrast to Saturday night's fighting.

Irish Volunteers Busy

WATERFORD, Ireland, Aug. 29.—A clash occurred Friday night between unarmed members of the military forces and civilians, some of the latter being Irish volunteers. There were several casualties. The armed military restored order.

NEW YORK DOWN ON CANAL SCHEME

Fears Deepening of St. Lawrence Would Injure City As a Port.

NEW YORK, Aug. 29.—(By Canadian Press)—While the attitude of the people of New York City and state towards the proposed St. Lawrence deep water ship canal project continues to be one of histility, due largely to the fear that the new highway to the sea would in some way interfere with the natural prerogatives of New York harbor, there appears at the present time to be a tendency to accept the inevitable, and to regard the St. Lawrence project as one certain to be carried to realization.

This point of view was expressed in a recent editorial in the Sun and New York Herald. The newspaper said:

"Plans for the development of the upper St. Lawrence to provide for an open wateryay from the Great Lakes to the ocean are maturing rapidly. With all Canada backing the great scheme and with strong support from the grain growing western states of the Union, it seems not improbable that it will soon be pushed through to completion. Before another half decade has passed ocean-going vessels may be sailing from Chicago or Duluth directly to London or Rio de Janiero or Sydney.

"The advantages of cutting away the barriers between America's inland seas and the Atlantic are visible. To do so obviates the necessity for overland transportation. The grain and meat of the northwst may be shipped at nearby lake ports and carried without interruption to foreign markets in all parts of the world.

"On the other hand many objections present themselves. New York state has expended first and last $230,000,000 on her own system of inland waterways. Many of her people look with disfavor upon the appropriation by the United States of large sums for a purpose which they believe can but divert commerce along other channels and injure not only the barge canal but the port of New York City.

"It is contended also that it would be unwise to develop an outlet for American goods through foreign territory and thus create for the United States a situation similar to that in Belgium, where the commerce of the principal seaport, Antwerp, has agress to the ocean only through Dutch waters, the estuary of the Scheldt. No matter how friendly the relations between this country and Canada it would be unwise, they say, to plan deliberately to thrust through her territory a vast artery of American trade.

"Still other opponents of the plan contend that it will result only in a waste of money. They point out that the St. Lawrence is ice choked for several months of the year, making winter commerce impossible; that the long delays of a journey through locks and the narrow, circuitous channel of the river would be expensive and troublesome; that the ocean passage from the mouth of the St. Lawrence to Europe is endangered with icebergs.

"So far, however, this opposition has been ineffectual in blocking the scheme, and it now bids fair to become a reality in the near future. It will then be possible to test the prophecies both of its friends and opponents. Of one thing, however, we may even now be sure. The new project will not injure with finality the port of New York. The prosperity and greatness of this city and harbor are the result not only of geographical advantages, but of centuries of business foresight and energy. No new scheme of transportation, no new outlet for the west, can seriously impair its supremacy.

ENGLISH PRINTERS TIE UP JOURNALS

Manchester and Liverpool Evening Papers Suspend; Others Today.

LONDON, Aug. 29.—Canadian Associated Press.)—Revival of the compositors' dispute stopped all the evening papers at Manchester and Liverpool on Saturday, and it is expected that the morning papers will be stopped on Monday morning. Efforts were made on Saturday to supply the football results by printed slips, which boys sold, or charged customers for inspection.

BURNS WAX FROM FLATHEAD VALLEY

Prospector Takes Sample from Oil Well to Show Premier.

VICTORIA, Aug. 29.—A tremendously rich oil field in the Flathead country in Kootenay near the international boundary line is predicted by John Watt, pioneer prospector of the interior who arrived in Victoria Saturday to confer with Premier Oliver. Samples of oil that he has discovered in the Flathead Mr. Watt has brought down with him. From indications he declared that the oil field there will turn out to be one of the richest in the world.

The feature of the discovery of the Flathead field is a heavy wax which has apparently been formed during the ages by drippings from petroleum. This is hard and clear. Mr. Watt brought samples of it to Victoria to show the premier. He whittles the wax with a knife just as he would a stick, and then lights the shavings. They burn with an intense heat with a flame like that of petroleum.

FILTH AND DISEASE ARE GENERAL IN RUSSIA SAYS NOTED SURGEON

By Boris. Brasol,
Chairman of the association "Unity of Russia," Composed of Persons of Russian Origin in This Country.

At present, when Lenin and Trotzky are at the climax of their "glory" it seems proper to reveal the reverse side of the Communist medal and give a better idea of the blessings of Bolshevist rule in Russia.

There is but little in the fact that the Red Army was able to inflict heavy losses upon the Poles and that Polish resistance has practically been crushed in so short a time. On the one hand, it was certainly a colossal error on the part of Poland to explain her frontier not only up to but even beyond the boundaries of 1772; while, on the other hand, any military enterprise of this kind had to be carried out with a force which would be at least equal to that of Soviet Russia. Obviously, Poland was not in a position to develop her military strength to such an extent. But military victories alone, especially over a weeker enemy, neither prove the real strength of the victor nor explain the nature of a government which happened to be victorious in a military conflict. Internal conditions are always more indicative of the nature of a political regime than the results of a warfare which sometimes may be, and indeed are, in striking contradiction to the cultural level of a nation.

That the economic situation in Soviet Russia is hopeless is a thing which is well known by the general public, both in this country and in Europe. That the situation is growing from bad to worse is something which is not yet generally realized by civilized nations. Bolshevist and pro-Bolshevist propaganda, which has been spread all over the world, endeavors to convince public opinion that, while the economic situation is sad, it is gradually improving and that the very sorrows of the food conditions in Soviet Russia are to be attributed exclusively to the so-called "allied blockade," which, by the way, was never effective. The outside world, which is always more or less optimistic as to conditions with which it is not familiar, is inclined to believe that "everything will work out all right," and that it will only "take time" to bring Russia back upon her feet.

Unfortunately, however, this optimistic viewpoint is by no means justified by facts and conditions actually prevailing in the Soviet Paradise. Recently a Russian pamphlet, giving a detailed account of sanitary conditions prevailing in Petrograd, has reached these shores. The pamphlet was written early in 1920 by Professor Zeidler, one of the famous Russian surgeons, who at present is in charge of Russian Red Cross work in Viborg, Finland. In the introductory statement of this phamlet, which is addressed to the Red Cross committees in all countries, Professor Zeidler states:

"It is impossible not to be horrified by the scenes in the bitter every day life of the unfortunate inhabitants of Petrograd. It is impossible not to be moved by their struggle with hunger and cold therein reigning, by the tons of thousands of deaths occurring every month and which threaten the speedy dying off of the remainder of the population of the former Russian capital, who are victims of spotted, abdominal and intermittent typhus, dysentery, Spanish influenza, smallpox, heavy pulmonary diseases and hunger exhaustion.

"Nor is it possible to realize, without being touched, that these horrors are not a myth but a sad realty which is being confirmed by physician-refugees who have escaped from Russia, and which, moreover, is not being denied in statical data published by the rulers of the perishing people themselves."

Petrograd Registers General Condition

The great value of Professor Zeidler's pamphlet consists in that it is not propaganda. It merely describes certain conditions existing in Petrograd and they are indicative of conditions prevailing through Soviet Russia in general. In fact, Professor Zeidler's statement is based upon his personal knowledge of the medical and technical situation in Petrograd, as well as upon reports received by the Viborg section of the Russian Red Cross from physicians, architects and engineers.

Is it possible for a civilized mind to conceive of a city which before the outbreak of the revolu- had a population of more than 2,000,000 left without electricity, gas, fuel a water system and canalization ? Is it further possible to picture the immediate results of such a deplorable lack of indispensable technical equipment? To this, Professor Zeidler, who is neither anti nor pro-Bolshevist, gives an accurate acount which may be summarized as follows:

In the first place, dwellings are in a state of complete decay, not only because of the colossal prices materials and wages, but also because of the fact that house porters ("dvorniki") were abolished, partly as a "bourgeois project" partly because the Bolsheviki intended to use the house porters for cutting wood.

"At present the houses are administered by 'beggars' 'committee,' he says, "which are composed either of Communists, who are busy with spy work, or by laboring people who have no time to devote to the management of their dwellings."

All the woodyards where, in previous times, fuel was purchased were nationalized by Soviet officials, and it is practically impossible to obtain fuel for house use.

"One of the woodyards is confined in its work to the manufacture of coffins, the production of which reached the mark of 30,000 coffins per month, which quantity proves insufficient," Professor Zeidler explains.

Fuel is so scarce that wooden houses are being torn down. Barges which were used for carrying wood have been demolished and wood pavements torn up, to furnish fuel for the inhabitants of Petrograd. The municipal transportation system has completely broken down, since all the horses were requisitioned for food and various other purposes. Even horses used by the Excavation Division were requisitioned by Bolshevist officals. It became impossible therefore, to remove the dirt from the streets, which is being dumped in vacant places almost in the center of Petrograd.

Filth Disgusts Beggars

In December, 1919, a peculiar convention of Beggar's Committee Deputies was held in Petrograd. During this convention the question of the deplorable condition of the city was discussed in detail. At that time it was pointed out that the water pipes in nearly all houses had frozen and burst, the lodgings having been flooded with filthy fluids coming from toilets, while the "dust-holes" (garbage receptacles) could not be cleaned.

In answer to these reports the Soviet Commissioner, Evdokimoff, who presided at the convention, did not find anything better to propose than the worn out Bolshevist decree compelling "all tenants between the ages of 17 and 60, under threat of being fined and arrested to proceed immediately with the cleaning of yards and streets and to restore the houses to a sanitary condition."

It should be borne in mind that conditions as above described not only prevail in private houses, but also in governmental buildings. In this connection the following report is of the utmost significance:

"At 11 Chernishoff street one can visit an institution bearing the ambitious title 'Commission of Sanitary Welfare of City of Petrograd.' In this building the central heating is out of operation in spite of every endeavor to put it in order. With the aid of all the means and knowledge of the municipal administration, but few rooms are being heated with small iron stoves, with pipes going through the windows. In the same institsution one can escertain that the water system and toilets are out of operation."

Similar, if not worse, is the situation in schools and other so-called educational institutions managed by the Bolsheviki. In professor Ziedler's report the following: statement will certainly be read with surprise by those "intellectuals" of the parlor-Bolshevist type, who think that Soviet Russia is furnishing a wonderful social experiment" to the outside world.

"Generally speaking," says Dr. N. N., one of Professor Zeidler's informants, "the whole school life has been converted into a continuous caricature. If one should attempt to visit a school at 9 a. m., then, due to the absence of light, it would be possible to walk through the schoolroom only by groping along. In the classes one should notice small shadows grouped around one big shadow—those are children wrapped up in their Winter clothes, and the school teacher, also wrapped up from head to foot, to protect herself from the cold, performing her pedagogical duties."

Much worse, if possible, is the condition of hospitals and other medical institutions. The horrors in sanitary trains are appaling. At one time there were approximately 10,000 sick soldiers kept in railroad cars near Petrograd because it was impossible to accept such a large number of diseased in the Petrograd hospitals, which are always overcrowded.

Pitiable State of the Sick

Professor Zeidler gives the following details of the situation referred to:

"The sanitary condition of the sick in railroad cars in the vicinity of Petrograd is beyond description. Even if a train had medical personnel, all the members of the medical staff fell sick. * * *There was nobody to hand them water or moisten their dry tongues, which cracked and bled. People froze their hands and legs and froze to death, due to the severe cold, and in addition to the main disease, they always contracted pneumonia. Both the diseased from the front and those from Petrograd garrison were taken to the hospitals hungry, dirty, all covered with cooties, and having skin diseases. * * * Without exaggeration it can be ascertained that a majority of the patients who were sick with spotted or intermittent typhus were taken into the sickroom covered with cooties, thus infecting each other with spotted typhus, and also spreading the disease among the medical personnel and their assistants.

"The hospital inventory is in a chaotic state. People steal linen, nightgowns and blankets. The belongings of the patients are stolen from the lockers. Nurses steal wood and take it home. Both the patients and the lower personnel are engaged in wholesale stealing. * * *

"Medical supplies are very scarce and there is a complete absence of some of the most common and indispensable remedies. Bicarbonate of soda is not allowed; neither are castor oil, pyramidon, phenacetin, &c.; quinine and camphor oil are given in minimum doses. * * * Operations are performed under most difficult conditions. The temperature in the operating room varies from 3 to 6 degrees, R. The patients freeze and the hands of the surgeon freeze, too. Almost all operations result in complications, such as pnuemonia and ulcers.

"Water pipes burst and the fixtures in toilets are out of order. Toilets are in a filthy state. Laundries and fumigating plants work very inaccurately, due partly, to the decay of the pipes and partly as a result of the lack of fuel. In the morgues of the anatomical sections there accumulates an enormous number of corpses, and there are no coffins and no materials for bandages. * * * Physicians are overtired and exhausted in the extreme. Every physician has from 150 to 200 patients. * * * Scientific life has stopped entirely. There is no gas. Wood fuel is very scarce. So are alcohol and kerosene. It is impossible to obtain many chemicals, medicines and medical implements. Nor is it possible to keep or procure animals for experimental research."

No Fuel and No Water

Due to the absence of fuel, combined with considerable frosts which prevailed in January and February, 1920, private apartments and public buildings in Petrograd were brought to a dreadful condition.

"The water system decayed," the report runs. "Bathtubs and toilets were put out of order. All the filth from the pipes has risen to the surface, while the tenants in the apartments heap up dirt to the last degree. Dirt, rubbish and waste water are thrown out anywhere, on staircases, in yards, and even through windows into the streets. All this is not being removed. Dirt accumulates, converting houses into filthy places. * * * The temperature in many apartments is below zero. The inhabitants no longer undress. They keep on their fur coats. * * * They sleep with their clothes on, covered with endless sweaters and scarfs. They do not wash for several months. They do not change their underwear, and of course become infested with vermin. The slightest illness leads to most serious complications. Due to the effect of hunger and cold, in the skin on the hands and feet, especially among elderly men and children, there appear peculiar knots, smaller or larger in size, which have a tendency of being converted into ulcers, which practically cannot be healed."

BOY EX-EMPEROR PATHETIC FIGURE

A pathetic boyish figure is hidden from all curious eyes in the mysterious fastnesses of the Forbidden City. He is the deposed boy emperor of the old China.

His Majesty Pu-Yi (or Hsuan-Tung), the last "son of heaven," came to the throne a baby of two years in 1906, when the aged empress dowager died, or, as the Chinese say, "ascended on the dragon to be a guest on high." With the revolution in 1911 the boy became virtually a prisoner in the central palace. He has never moved out since.

This boy emperor is now a bright little fellow of 14. Only one Englishman has ever seen him since 1911, Mr. R. F. Johnson, who in 1918 administered the government of Wei-Hai-Wei, and has recently been appointed Pu-Yi's tutor. The emperor is a strong and well built boy, very keen on the lessons given him by Mr. Johnson, the first Englishman to go right into the heart of the Forbidden City, to which he now has access.

Pu-Yi is very diligent at his English lessons, at which he gets two hours a day. He writes a boyish letter in beautiful English handwriting. Although not permitted to pass outside the Forbidden City, where he is looked after by imperial eunuchs and old women, the lad is very much interested in the great outer world. He is a very pathetic figure. He would probably love to travel. He is always asking questions on geography, the people and customs of other lands, and also about the world's prominent men.

The republic of China has undertaken responsibility for him and his upbringing. They feel it a duty. The first thing Yuan Shih-kai did when the monarchy was overthrown was to provide for the imperial family. Quite friendly relations are maintained between the republic and the palace.

There are movements in favor of restoring the monarchy, but the boy emperor has never given them any countenance. He is understood to be engaged to the daughter of the president of the republic, Hsu Shih-chang.

Where but in flowery land could happen such a romance? The deposed monarch to marry his republican successor's daughter! The latter is being educated in the United States. It is believed the boy has never seen her. That is the Chinese old style of arranging marriages between children.

SUDDENLY FAMOUS

Major Hugh Thomas, O.B.E., the Englishman who recently bought the complete town of Milford Haven for a quarter of a million sterling, had probably never been heard of by the man in the street before. Another incident in which a "surprise millionaire" figured occurred some years back when China wanted a loan of $50,000,000. A lender turned up in Mr. Birch Crisp, of whom practically no one had ever heard, but who soon became famous when seven great powers, including Great Britain, took immediate steps to prevent him advancing the money.

Printed Butter Wrappers

Either With Your Name or With the Words

Dairy Butter

According to the Dominion government regulations all farmers who sell butter either to stores or privately are required to have it properly covered in a wrapper on which MUST appear in prominent letters the words

"DAIRY BUTTER"

The fact is also emphasized that all butter in such packages must be of the full net weight of sixteen ounces and in default of same a fine of from $10 to $30 for each offense is imposed. Whey butter must be so labelled even when mixed with dairy butter and dairy butter retains its label even though it be mixed with the creamery product.

If you have your own name or brand on your wrappers you gain valuable advertising for your butter. It causes people to ask for the same brand again.

WATER NOTICE

Diversion and Use

Take notice that the Nakusp Development District, whose address is akusp, B.C., will apply for a license take and use 20 c.f.s. of water out Grouse Creek and Seven Mile Creek, hich flows southerly and drains into akusp Creek Grouse Creek on Sub ot 9, Lot 328 and Seven Mile Creek Lot 7904.

The water will be diverted from the eam at a point on Grouse Creek out 750 feet N. 45 deg. E. from S.W. r. Lot 8513, and on Seven Mile eek about 1200 feet N.S.S.E. from W. Cor. Lot 9322, and will be used r Water Works purposes upon the nd described as parts of Lots 397, 8 and 4274, Kootenay District.

The water will be used for Water orks purposes within the limits own as the Nakusp Development istrict.

The petition for the approval of e undertaking as per Sec. 22 of the ater Act will be heard in the office the Board of Investigation at a te to be fixed by the Comptroller. y person interested may file an jection thereto in the office of the mptroller or the said Water Reorder.

This notice was posted on the ground the 20th day of August, 1920.

A copy of this notice and an apication pursuant thereto and to the Water Act, 1914," will be filed in e office of the Water Recorder at elson, B.C.

Objections to the application may filed with the said Water Reorder or with the Comptroller of ater Rights, Parliament Buildings, ictoria, B.C., within thirty days after e first appearance of this notice in local newspaper.

THE NAKUSP DEVELOPMENT DISTRICT, Applicant.

The date of the first publication of is notice is Aug. 30, 1920. (9529)

NEW IRRIGATION PLANT A SUCCESS

Creston Farmers Will Extend System of Erickson Water Users' Community.

So complete has been the success of the recently constructed Erickson water users' commounliy irrigation system, into which the water was turned a few days ago by A. L. McCulloch, designer of the system and consulting engineer to the Erickson community, that Creston farmers have already taken steps to secure an extension of the system.

Thirteen land owners comprise the Erickson community of users, which proposes to put under irrigation about 200 acres of land. Water is being supplied from Sullivan creek, which drains from the south, to Hood river, at the Hood river canyon, down which the water is taken by syphoning. The syphon system, it is stated, was the only serious obstacle in the construction of the system. The water is then conducted to the land of all the owners through pipes under sufficient pressure to operate a Skinner overhead system. The main supply pipe is eight inches in diameter, and the distributing pipes six, and four inches, there being a total of over three miles of piping.

Residents of the district are watching the experiment with considerable interest, and already an additional 20 owners have organized themselves into the East Creston water users' community. They have arranged with the Erickson community for a joint use of the pipe system to Sullivan creek, and are extending the system with about two miles of six and four inch pipe. The Creston community will get a domestic supply and a right for each man to irrigate five acres, making an additional 100 acres under irrigation.

SMELTER SMOKE INQUIRY RESUMES

Examinations of Claimants for Discovery Will Open Today at Rossland.

After a recess of a month, the inquiry in the smelter smoke arbitration, in which 52 claimants and the Consolidated Mining & Smelting company are the interested parties, will be resumed this morning, at Rossland, with the holding of examinations for discovery. Five examinations will be held today and five tomorrow, in which R. C. Crowe, counsel for the company, will examine that number of claimants. C. W. Tyler, court reporter, left for Rossland last night, to take the examinations, but will be back in Nelson for the opening of the Nelson Business college on Wednesday.

On Friday Judge J. A. Forin, the arbitrator, and the counsel, experts and parties to the case will hold a re-inspection of some ranches to view alleged damage claimed to have occurred since the original inspection.

TRAPSHOOT DRAWS OUT SEVEN GUNS

Seven gun artists of the Nelson and District Rod and Gun club took a hand in the trapshoot at the C.P.R. flat on Saturday afternoon, among them being a tyro, J. Stout. The shoot was held under good weather conditions, and 50 birds were released. Jim Brassfield was high man, with 43 birds. Howard Bush was second high with 39.

The score was:

J. Choquette	16	15
J. Stout	14	11
Howard Bush	20	19
C. D. Blackwood	22	..
J. Brassfield	22	21
E. Kinahan	18	18
W. Thornton	17	17

The Rocky mountains of Central America form an absolute barrier to the trade winds which blow over the Gulf of Mexico.

William IV, king of England, served for ten years in the British Navy, starting as a midshipman when fourteen years old.

BLOCK OUT ORE IN YANKEE GIRL

Raises Through Stoping Ground Make Progress; Shaw Going East.

Substantial progress is being made in the Texas-Yankee Girl mine at Ymir, in the blocking out of ore, and the operations underground are being carried on steadily, with 50 men on the payroll, John W. Shaw, superintendent at the property, stated at the Hume last night.

Mr. Shaw is going to Toronto to make a report to the head office of the Mining corporation of Canada. In his absence, A. W. Newberry, the New York engineer who first reported on the property for the corporation and laid out the scheme of work, will direct operations. Mr. Shaw will leave Nelson tonight, going by the Arrow Lakes route.

Development is proceeding upward from the No. 3 level in the mine, by means of two raises, about 300 feet, and each up now a distant of about 300 feet on the dip vein, both being in ore. There is still about 400 feet to go before No. 2 level, the next one in the vein, is reached. Exploration of the ore body has also been carried on on No. 2 level. At the present time four hammer drills and two piston drills are being used.

HAZEL FLEENER SINGS AT NELSON SATURDAY

Miss Hazel Fleener who with Mr. and Mrs. Treby Heale is giving a recital at the Nelson Opera House on Saturday 4 Sept. is the possessor of a beautiful rich contralto voice and was solist for two seasons with the Minneapolis Symphony Players on their extended tous each of which comprised no less than 18 concerts.

Miss Fleener has had the distinction of having Miss Katherine Hoffman as her accompanist for many years. Miss Katherine Hoffman being accompanist to Madame Schuman Heinck for a number of years is now accompanying that gifted artiste on her world tour.

INDIAN PONIES ARE ASSURED FOR FAIR

East Kootenay Indian ponies and riders will provide a portion of the race program for the Nelson fall fair, according to the plans of the fair board.

Dr. J. W. Rutledge, president of the Cranbrook Agricultural association, who is in close touch with Indians, has accepted the job of producing the Indians and ponies when required, and accordingly the success of this feature is assured.

All phases of the entertainment program are progressing well, and those features that have to be prepared locally are well advanced.

BAPTISTS HAVE CAMPFIRE PARTY

The Young People of the Baptist church held a bonfire party at the Summer camp of Mr. and Mrs. Walton, Saturday evening. Cornpopping story, telling, singing, and reciting. Late in the evening refreshments were served, which had been provided by some of the young folk. The young people returned to town by the last car, after having spent a most enjoyable evening.

EVEN OR ODD

We are pleased to term thirteen an unlucky number, but in Japan the unlucky number is four, and in Burmah even numbers are all considered less lucky than odd ones. Our lucky numbers, or what are generally considered so by superstitious folk, are three and seven. If you ask the reason you are told that God is Three in One, and that God made holy the seventh day. As for seven, this number is supposed to be lucky by itself or in its multiples. As an old writer says, a boy sheds his teeth at seven years old; at fourteen he becomes a youth; at twenty-one a man; while he reaches his grand climacteric at nine times seven—that is sixty-three. The figure three is extraordinarily prominent in the Bible. Noah had three sons, and Job three friends. There were three patriarchs. Daniel's three companions were thrown into the fiery furnace, and he himself was three days in the lions' den.

SELF SOWN KANSAS WHEAT DEVELOPS SUDDEN WEALTH FOR LUCKY FARMERS

TOPEKA, Kansas, Aug. 29.—Stories of sudden wealth in the Kansas wheat belt are numerous this year, due to the unusual acreage of "Volunteer wheat" a crop grown from seeds which fall in the previous harvesting. Officially estimated there was 1,500,000 acres of volunteer wheat in Kansas this year, or about a sixth of the total harvested areage. This wheat yielded probably 40,000,000 bushels or representing monetary value of about $100,000,000. The total Kansas crop of wheat is estimated officially at 15,000,000 bushels.

Repents Last Years Failure

The large acreage of volunteer wheat is due to the fact that a great deal of this acreage was deserted as wheat land by the owners, after last year's none to bountiful crop had been harvested. The 1919 acreage was in excess of 11,000,000, by far the record for any state in the union. A wet fall caused the kernels of wheat which had fallen to the ground during the harvesting, to germinate.

Finding the "volunteer" crop making a stand, farmers did not disturb the growth and, with ideal wheat growing weather this spring the volunteer wheat made yields fully as bountiful as the rest of the crop.

Wealth Stories Are Frequent

Innumerable stories of "deserted acreages," producing $5,000 to $25,000 worth of wheat come from western Kansas where the bulk of the volunteer wheat was grown. Others tell of farmers who purchased farms this year and paid for them with the returns of this year's wheat harvest. Illustrating the "sudden wealth" general throughout the western Kansas counties, where land has been cheap and favorable seasons few and far between, a recent canvas of wheat yields in the vicinity of Oakley, a small town 60 miles east of the Colorado line, in Logan County, showed at least 50 farmers whose wheat crops this year are worth more than $50,000 each; at least 25 have more than $75,000 of wheat each and every farmer has a good crop. Thirteen counties, most of them of northwest Kansas, this year are yielding 43,701,637 bushels of wheat, according to the latest official estimate by the state board of agriculture.

The one big drawback to the Kansas wheat growers' prosperity this year is the lack of facilities in which to transport his wheat to the market centers. Cars still are scarce, especially in the central and western parts of the state but the situation is not as desperate as it was two months ago, grain dealers report.

Favorable summer rains have practically assured a big corn crop in Kansas this season. The crop has been officially estimated at 140,000,000 bushels and the official forecasters now assert that the corn yield will mount still higher. The Kansas weather bureau here reported that it is the first year in its 23 years existence that Kansas had "bumper" wheat and corn crops the same year. A banker who has lived in Kansas 52 years is authority for the statement that in that time, such a favorable crop condition never before occurred.

Similar conditions prevail with the oats and barley crops which have been harvested. The state raised 20,000,000 bushels of barley—four times the average annual yield of the last 20 years.

Alfalfa and grain sorghums, to which millions of acres are devoted in Kansas, likewise are producing bountiful crops. Kaw valley potato growers report one of the best crops ever grown. As one editor of western Kansas puts it: "The horn of plenty appears to have been dumped right into the lap of Kansas this year."

WILL SEND DRY SILVER TO FAIR

Meteor Superintendent Has Fine Piece; Prospectors Selecting Samples.

That the good old dry silver belt of the Slocan City mining division will be out as usual to capture honors for dry silver or at the Nelson fall fair, is the word sent in from Slocan City, by George Long, superintendent of the Meteor mine. Mr. Long has got a huge piece of fine looking ore set away in the vault, he figures it will make a bid for the diploma.

This has been a good season with the prospectors, and the wise ones, who have their eyes open to the value of publicity for the real goods, are setting aside the nice looking chunks of rock, to enter in the class for 1920 prospector's discovery A box of powder, donated by the Sabulite, people, is the prize for this class.

There are classes for gold ore, silver ore, copper sulphides, lead ore, zinc ore, the best ore from a shipping mine, and the best exhibit of rare mineral.

The district with the best collection of ores will, as usual, be awarded a silver cup.

As in former years, Fred A. Starkey is director of the mineral section of the fair, and ore may be brought in or sent in to his office.

Shark skin is so hard that after exposure to the air it can be ground to powder and used in place of diamond dust for polishing diamonds.

Early widows in England were covered with stretched hide.

Asia has the greatest average elevation of all the continents.

TRIP TO OLD COUNTRY USELESS, SHE SAYS

Returning Home Sick and Miserable She Found Relief by Taking Tanlac; Gains Nine Pounds.

"After what Tanlac has done for me I feel that the very least I can do to show my gratitude is to allow a statement of my case to be made public for it has completely restored my health," said Mrs. May Dawson, of 1031 Ponder St., East, Vancouver, B.C.

"For fully two years I had been unable to eat anything without being troubled with indigestion. My food would sour and form gas, and my heart would palpitate so that I became alarmed. I suffered from terrible pains in the pit of my stomach and would feel like I was choking. At times I felt so weak and dizzy that I could not stand without holding to something.

"I also had severe pains across the small of my back that hurt terribly whenever I attempted to stoop over. I became so weak that I could scarcely do a thing, and my nerves were so unstrung that the children playing or any unusual noise would almost drive me frantic. As the treatments and medicines did me any good, a little over a year ago I went back to England, hoping the change would do me good, but I failed to find any relief over there either.

"About two months ago I returned to Vancouver, still feeling very sick and miserable. A friend got me to try Tanlac, and after taking three bottles you would never think there was ever anything the matter with me.

"I now have a splendid appetite and I am never troubled with sourness or gas, nor suffer from palpitation or shortness of breath. The pain in my back is gone and I haven't an ache of any kind. My nerves are calm and steady—I sleep like a child and get up feeling rested and full of life. I have gained nine pounds and feel as strong and healthy as I ever did in my life. My daughter, Gladys, also suffered with indigestion, so she took Tanlac and it completely relieved her trouble."

Tanlac is sold in Nelson by Canada Drug & Book Store, and by the leading druggist in every town. Advt.

LITERARY GENIUS' HANDWRITING

It has been said that ninety persons out of each hundred have literary ambitions. If you are of the ninety, then your ambitions may be realized, if your handwriting is naturally very small! It is extraordinary, and seems to be something more than a mere coincidence, that literary geniuses—practically all of them—write exceeding small. Thackerary's writing was extremely neat, but so small that it could hardly be read. Dickens' penmanship was of the minute order, too. That, and his predilection for writing with blue ink on blue paper, with much interlining, made his "copy" a trial to decipher. Captain Marryat's handwriting was so fine that it was said that when the compositor rested from his work he was obliged to stick a pin where he left off in order to be able to find the place again. Charlotte Bronte's writing was so fine that it appeared to have been traced with a needle! The same "small" rule obtains among the majority of present-day writers. Thomas Hardy and Kipling are instances. The moral seems to be that he who writes "small" has it in him to write "big" stuff. Incidently, it may be noted that poets, from Byrch onwards, scrawl! The born poet, it is claimed, could not write small or straight, if he tried!

RED, WHITE AND BLUE FLOWERS

At Hulloch and Loos something has happened which no one will ever be able to explain, writes J. E. B., in an English paper. White marguerites and blue cornflowers have sprung up among the poppies, and the shell-holes and trenches are covered by a mass of red, white and blue! I am sure that if those sleepers of the 9th and 15th Scottish divisions could see, they would be glad. So if by chance any of those who lost someone "out there" should read this, and have feared to go and place a wreath or bunch of flowers on his grave, take courage and go. The Land of Crosses is also the Land of Poppies. It is a tragic land, and a pathetic one, but it is sweet with memories and peopled with the spirits of the best men we ever knew.

Sparrows have lived to be 40 years old. A horse does not live much more than twenty-seven years. Cats get to be about 13 years old. The tortoise is supposed to live to be between 300 and 400 years old. Some persons say toads can live forever, but, of course, that has not been proved, though certainly they live to be an exceedingly great age. Both an eagle and crow have been known to live to be 100, but the wren lives only about three years. An elephant's lifetime is about 100 years, but he isn't regarded as grown up until he is about 25 years old.

Another Menace to Bird Life

The foundation at Santa Barbara, California, of a "World Museum of Birds' Eggs" must excite misgivings in the minds of bird lovers. These will not be dispelled by the recently issued journal of the new institution, points out the London Times. The museum proposes to secure a complete collection of the eggs of the birds of the world, together with "as many nests and skins as are necessary to enable the eggs to tell their full story." There are some birds whose eggs are invariable in color, and in these cases the museum is to be content with a dozen sets of each. But when the colors, or markings, or shapes vary, as happens with very large numbers of species, as many as 80 sets of each are aimed at. Collectors in all parts of the world are to be encouraged, and the managers are ready to beg eggs, to exchange for them, or to buy them. Birds have many enemies. The encroachment of civilization is limiting their range. The plumage trade is taking a heavy toll. The farmer and the gardener, who do not know their friends, continue to slaughter them. There is no need to discuss the relative demerits of these three agencies of destruction. But the collector, acting either in the supposed interest of science, or from the lust of acquisitiveness, deserves a special word. He is alert, well informed, and insatiable. If a bird be rare or hitherto unknown in a locality, if a species be nearly extinct, the collector recognizes a valuable prey and hastens to secure it. A just indignation has been aroused against plume-hunters, who, in quest of gain, have plundered breeding-grounds and attacked their guardians. But it should be remembered that when lovers of birds are trying to protect the nests of rare breeders, they have to keep watch and guard against the emissaries of collectors of eggs.

The creation of a new demand, with wide ambitions and ample funds, may well be disastrous. The authorities of the museum claim that their object is scientific. They assert that no avian structure is more significant than the egg, and by "egg" they mean "egg-shell," for they give the usual instructions as to the removal of the contents. They propose to discover the phylogeny of birds from study of the shells. They claim that the laws they will ascertain will throw "a flood of light on the whence and the whither of life itself." If these pretensions were just, eggs would indeed be golden, and there would be additional reason for not helping to kill the birds that lay them. But already many great museums with collections of eggs exist. Already many highly-skilled observers have worked on a rich material, and have reached a well-founded and almost unanimous verdict that few structures have less phylogenetic significance than the eggs of birds.

The Tariff Argument

At the present time, when so much attention is being paid to the tariff question in Canada, it is interesting to note the opinion of the Winnipeg Free Press on the policy outlined by Hon. Arthur Meighen. It takes the attitude that there is no essential difference between the two main parties on the tariff qustion, and that "the attractiveness of the (Meighen) policy to many electors, especially in the west, arises from the fact that it is a re-statement, for these times, of the old Liberal tariff policy." In this connection the Free Press seems to ignore the free trade wing of the Liberal party, but its views are nevertheless interesting to students of the present political situation in the Dominion. The Winnipeg paper says:

"Mr. Meighen's references at Truro to the tariff were interesting and to the point. He declared—and most people will, we think, agree that he proved his point—that the Liberal pronouncements upon tariff policy, by Mr. Fielding, by Dr. Beland and by Mr. King himself, were in general agreement with his own exposition of the tariff policy to which the National Liberal and Conservative party is committed. The difference between the Liberal tariff policy as expounded in parliament and elsewhere by the recognized leaders of the party and the tariff policy, outlined by Mr. Meighen at Stirling and Truro, is the difference betwixt twedledum and tweedledee. Both provide for a tariff that will supply revenue and at the same time furnish protection for manufacturers. This virtual agreement between the two warring Eastern parties upon a main feature of national policy may easily become one of the governing factors of the Canadian political situation, although at present there is a sort of conspiracy to ignore the fact in order that the bloodless but far from wordless war about nothing may go on. Mr. Meighen said further that the tariff policy of the National Progressive party was, in effect, the old Liberal tariff policy, as defined in 1893 and abandoned, or at least very greatly modified in 1897, when Mr. Fielding made his first tariff. In this, too, Mr. Meighen is substantially right. The attractiveness of the policy to many electors, especially in the West, arises from the fact that it is a re-statement, for these times, of the old Liberal tariff policy."

EDITORIAL NOTES

Reports state that Ponzi, the Boston financial "wizard," keeps his hands in his pockets while on trial in court. If those approached by get-rich-quick artists would adopt the same plan they'd save a lot of money.

* * *

Belleville, Ont., is considering establishing a municipal merry-go-round and hopes to make enough money out of it to pay for a park. Nelson might tell a tale in this connection.

* * *

The splendid crop reports from all over the continent seem to have dispelled those vague fears of a financial panic.

* * *

This is how Prof. Thomas Nixon of Harvard deals with the often discussed question as to whether an extravagant person does good by "keeping money in circulation": "There is a widespread fallacy that extravagance gives employment to labor. This is probably due to the opinion that thrift consists of hoarding. To keep money out of use is a very thriftless thing. The thrifty person is one who spends money wisely; for durable things instead of transient things; for things which increase his strength physically, mentally, morally and financially. Therefore the thrifty man spends more money than the unthrifty one, for he has more to spend, and a thrifty community will be one in which more money is spent than in the thriftless community."

STYLES

By LENORE

Latest Solutions of the Clothes Problem

There is much variety of design shown in the recent dresses. They are as little committed to any one particular type this season as they were last year. Straight narrow skirts are shown along with paneled, draped and tunic effects.

The style of the bodice shows equal latitude. With equal assurance of smartness, one may choose the basque, a perfectly conventional waist, or the Moyen Age line, which is illustrated in this gown of cordivan duvetyn in a rich citron shade. A supple effect must be retained with such a bodice, or its charm is lost.

If the feature of the skirt which emphasizes the hips is not desired, the fulness may be gathered instead, but confined to the sides only so as to maintain a flat effect in the back and front. The embroidery is in dark blue silk floss.

COLD STORAGE

Mrs. Pomery is an expert on loans. Her long suit is "Well, I do declare; if I haven't come away from home and left my purse behind. You pay it this time and I'll pay it the next time."

Elderly Suitor—"Don't you think you could learn to love me?" Elderly Matron—"No; I don't think so." Elderly Suitor—"Well, perhaps you are too old to learn."

"Farewell! Thou art too dear for my possessing," sighed Jones, quoting from Shakespeare, as he left his automobile with the second-hand dealer.—Boston Transcript.

Markets and Finance

BEARS RAID BUT STOCKS REBOUND

NEW YORK, Aug. 28.—Bears tried to take advantage today of the absence of a large number of traders by raiding some of the more volatile stocks especially those comprising steel equipment, oil and other popular issues.

Their efforts were successful for a time, Replole Steel being the center of their objective at a precipitate decline of about eight points. Related shares were depressed one to three points, but rallied briskly in the late dealings. Receipts making o;p3 o½. dealings, Replogle making virtually full recovery.

Elsewhere in the list trading was light and perfunctory, although rails, notably the dividend payers, retained all of their recent firmness with some of the more stable industrials. A steady tone ruled at the close with sales of 175,000 shares.

News of the day had little relation to the movement of stocks. The clearing house statement fulfilled general expectations in that actual reserves made up the greater part of last week's up heavy loss, although actual loans and discounts expanded by slightly more than $41,000,000.

Trading in bonds was fairly active but featureless, a better tone ruling for most domestic issues, including the liberty group, with steadiness to foreign flotations. Total sales amounted to $3,925,090. Old United States 2's were ¼ per cent higher on call for the week. Others were unchanged.

Liberty bond closing prices were: 3½'s 98.82; first fours 84.70 bid; second 4's 84.32; first 4¼'s, 85; second 4¼'s 84.50; third 4¼'s 87.88; fourth 4¼'s 84.88; victory 3¾'s 95.40; Victory 4¾'s 95.42.

CHICAGO LIVESTOCK

CHICAGO, Aug. 29.—Cattle receipts 2500; compared with 1700 week ago. Choice and prime steers, 25 to 75 cents higher good and fet choice, 50 to 75 cent shighter; medium, to best grades, 25 to 50 cents higher; common to fair grassers; steady to strong good cows and heifers, 50 to 75 cents higher; common and fat kinds, steady to strong; bulls, steady. 20 to 25 cents lower; calves, $2 to $2.25 higher; stockers and feeders, steady.

A soap lather and a sunny day are the two things necessary for the cleansing of a soiled jumper. Immerse the garment and gently rub the grimy parts. Rinse and spread in a clean sheet of paper in the garden. Do not hang up the garment; such treatment will stretch it and detract from its smart appearance.

CANADA BONDS

MONTREAL, Aug. 29.—The following were the bid prices for bonds at the close of the market today:

War loans—1925, 93⅞; 1932, 91¾; 1937, 95½.

Victory loans—1925, 93⅞; 1927, 98½; 1937, 100; 1923, 98; 1933, 98½; 1924, 97; 1934, 95.

FOREIGN EXCHANGE

NEW YORK, Aug. 29.—Bar silver domestic 99½; foreign 97⅛.

Canada dollar 88.50.

STERLING EXCHANGE

NEW YORK, Aug. 29.—Sterling exchange irregular at $3.52¾ for 60 day bills; and at $3.56 for demand.

NELSON, Aug. 29.—$4.02½.

MINNEAPOLIS GRAIN

MINNEAPOLIS, Aug. 29.—Wheat, receipts, 475 cars, compared with 600 cars a year ago; cash, No. 1 northern, $2.45 to 2.47½; corn, No. 3 yellow, 1.53 to 1.54; oats, No. 3 white, 64¼; barley, 84 cents to 1.05; rye, No. 2, 194½ to 1.95½; flax, No. 3, 3.12 to 3.14; flour, unchanged to 20 cents higher; in carload lots family patents quoted at $13.00 to $13.40 a barrel, in 98 pound cotton sacks; shipments, 45,363 barrels; bran $42.00.

MINNEAPOLIS, Aug. 28.—Flour unchanged to 20 higher in carload lots, family patents quoted at 13.00 to 14.00 a barrel in 98 pound cotton sacsk; shipments 45,000 barrels. Bran 42.00; Corn No. 3 yellow 1.53 to 1.54; oats No. 3 white 64¼ to 65. Flax No. 1 3.12 to 3.14. Wheat cash No. 1 northern 1.24 to 1.27½. No. 1 dark 2.37 to 2.52½; No. 2 dark northern 242½ to 2.47½. No. 2 northern 2.42½ to 2.42½. No. 3 dark northern 2.35 to 2.45½. No. 3 northern 2.33 to 2.37½.

CHICAGO PROVISIONS

CHICAGO, Aug. 29.—Trading today was very light, the markets being practically without a feature. At the finish wheat was up ¼ to 2⅛ cents above the previous close with December 236¾ to 237 and March 232⅜. Corn advanced 1/5 to ⅝ cents. Oats were ⅛ lower to ¾ higher.

Provisions ranged from five cents lower to 5 cents higher. The market closed firm on the best grades. The export demand continues. Supplies in Great Britain are running on a fairly level basis.

Toronto firm, specials jobbing 72; extras 66 to 38; firsts 60 to 62; seconds 50 to 53.

Montreal strong, specials jobbing 72 to 75, retailing 85 to 90. Western unchanged.

Chicago currents firsts 47½ to 49; refrigerator firsts 47 3-5.

New York currents firsts 47½ to 49; refrigerators fancy 53½ to 54; firsts 50 to 53. Poultry best fowl and broilers in good demand; fowl 32 to 39; broilers 32 to 42.

THINK OF THE TIME AND LABOR!

When next you see a one-carat diamond (and that is considerably smaller than the end of an ordinary lead pencil), just consider that no less than 80 tons of rock had to be brought up from a depth of over half a mile for it, and that three years of time and labor were spent in its preparation.

But if the gem is a first-grade one—like a Birks'—you will concede that it was well worth it.

TRAIL LABOR DAY PLANS PROGRESS

Ten Committees Work on Program for a Big Day of Sport.

TRAIL, Aug. 29.—A meeting of the general Labor Day committee was held in the Veterans' hall on Friday evening, at which reports of the several committees were received, all showing progress in the preparations for a good celebration on Sept. 6.

The finance committee reported collections of $682 up to date, with more still to come in, which would bring the amount available for the committees quite equal to that of last year.

H. Jackson, for the sports committee, reported that a good programm had been arranged, and that the prize list was ready for the finance committee. He also reported, for the music and dance committee, that the Nelson Kilties had been communicated with and terms of engagement received. The meeting decided that the Kilties' band should be engaged for the day, and instructed the music committee to that effect.

J. Young, for the entertainment committee, reported that progress had been made towards providing entertainment for the children.

J. Keating reported that from information received from Al. Morris, the B.O.K.K.s intended to feature a parade at 6:30 in the evening of that day.

It was decided that, should the weather prove to be unfavorable for the children's sports on Labor Day, the other sports would be carried on as per program, and abt the children's sports would be held on the first fine day following.

It was also arranged that a tent is to be provided for a rest room for ladies, and a committee of ladies was appointed to take charge thereof.

The printing committee was instructed to have suitable notices inserted in the Rossland and Nelson papers in order to give a wide circulation to the event.

An application for the compiling and printing of the sports program, with advertisements thereon, was refused, as was also an application for concessions on the recreation grounds, it being decided that plain programs without any advertisements would better suit the purpose, and also that no concessions whatever would be granted other than those for the use of the committees.

Bicycle Races

W. Murray reported that prizes donated by the Canada Cycle & Motor company for bicycle races would be turned over to the sports committee for bicycle competitions, and this offer was accepted with thanks. He also reported that valuable assistance had been given him by P. Brown in the matter of transportation arrangements.

A transportation and hotel committee was appointed consisting of W. Murray, G. Kinnis, R. Goodwin, F. Brown and Al. Morris.

P. Lennon reported that he had received a communication from the Nelson football team stating that they would like to have a league game on Labor Day, but, this meeting with the hearty approval of the meeting.

The sports committee asked to arrange some open events so that the visitors from other places would be able to compete.

W. Emtin head brought up the matter of decorating the town for the occasion, and a committee for that purpose was appointed, consisting of E. Ellison, C. Dodimead, N. E. Read, James Williamson, Mayor F. E. Dockerill and William Thompson.

H. Jackson suggested that some of the races should be timed so as to enable the men employed on the afternoon shift at the smelter to compete, this being agreed to.

On th request of J. Young, chairman of the entertainment committee, Miss Johnston, Miss Gavrilik and Miss Williams were added to this committee.

The secretary was instructed to invite the cooperation and assistance of all the clergy of the city in the day's activities.

Resolutions were adopted accepting the prizes offered by the Fair association, and thanking them for the same, and also thanking Frank Brown for his assistance in the matter of transportation.

The meeting was adjourned to meet again next Wednesday.

NAKUSP RESIDENT IS FOUND DEAD

NAKUSP, Aug. 28.—Mr. Logan, the aged father of Mrs. J. W. Wood, died suddenly on Thursday night or early Friday morning at his daughter's residence at Glenbank. His body was found in the kitchen by members of the family on Friday morning. It is assumed that he had got up for a drink of water and collapsed, without any of the family knowing of the affair until they got up at the usual hour. Dr. McLean, the district coroner, went up to Glenbank Friday morning to investigate the cause of death. The deceased had been in the district for the past four years, and was highly respected.

The Misses Philpot of Glenbank left for Nelson on Friday on business.

Charles Lindmark of the Pingston creek mill was in town on Thursday.

Mrs. F. L. Morton of East Demara drove up to town on Friday.

Mrs. Howell, mother of Mrs. F. W. Jordan, has returned from a lengthened trip through California, and left Nakusp the same day for Edgewood on a visit to her daughter.

The Lenland hotel was sold by auction under the terms of a mortgage on Wednesday afternoon at the government office. There being no bidders the property was bought in by the mortgagee, James Sneddon, through his agent, S. Jackson. L. J. Edwards conducted the sale.

SLOCAN CITY NOTES

SLOCAN CITY, Aug. 28.—Rev. G. Bathurst Hall and bride, of Kaslo, are spending the week-end here, and are the guests of Mrs. R. L. Reynolds.

Mrs. M. P. Reid and daughter Bernice, are the guests of Mr. and Mrs. E. S. Wegenast of Silverton for a few days.

Rev. H. W. Stevenson of New Denver is exchanging pulpits with H. R. Cavinson for the Sunday services.

Mrs. W. F. Lingle and daughter, Nettie, of Rossland, and their friend, Miss Gladys Bolton of Vancouver are visiting friends here. Mr. Lingle is interested in the Goat creek lumber mills.

CASTLEGAR CLUBS HAVE GOOD SHOOTS

CASTLEGAR, Aug. 28.—A very enjoyable shoot was held by the Gun club on its beautiful ground on the flats on Wednesday, when in spite of a cross wind some good scores were made, the score sheet reading:

W. Murray, 87; F. Dodge, 90; Dr. MacNaughton, 97; C. Dodimead, 96; S. Thorpe, 92.

The Women's Rifle club held a weekly shoot on Thursday, nine shooters taking part, and high scores were recorded, Miss B. MacGauley taking the prize after a tie with Mrs. Bastin.

Mrs. Newall and daughter have been visitors at Castlegar for the past few days.

Mrs. Traves, Mrs. Goodwin and Mrs. Campbell have been visiting Mrs. Thorpe.

A very successful dance was held in the hall on Wednesday, about 56 being present. The music was supplied by G. Right and T. May.

Fishing in the district is very good at the present time, good baskets rewarding all the local anglers.

Grouse and deer are very scarce this year, in fact the former are nearly extinct.

The ferry has been painted and looks very smart, and is as clean as a man-of-war, thanks to the careful attention of the ferryman.

NEW DENVER HAS PLEASANT SOCIAL

NEW DENVER, Aug. 28.—The New Denver Women's institute gave a social evening at the Bosun hall on Wednesday. An excellent concert under the direction of Mrs. E. E. L. Dewdney was given. The soloists were Miss Jewitt, Mr. Day and L. Sells, and the New Denver Glee club gave a fine rendering of "Ye Banks and Braes o' Bonnie Doon," also taking the parts in the choruses of the soloists. Mrs. Day and the Misses Molly Colegrave, Kitty Tingle, Gertrude Smith, Olive Jewitt gave a rainbow dance which was very effective and much applauded.

Miss R. Clever's recitation was well received and encored. Mrs. Levy was the pianist. Mrs. Harris was in charge of the refreshment part of the program. Proceeds from the social are for the prizes at the forthcoming fruit fair flower show section which is being taken care of by the Women's Institute.

Born—Thursday, at the Slocan hospital, a daughter to Mr. and Mrs. Graham Trickett.

The whole of the crew fighting fire on the opposite side of the lake to New Denver was withdrawn Thursday. The recent rain has considerably improved the fire situation.

Rev. B. Hall and Mrs. Hall returned to Kaslo Friday, after a week spent in New Denver.

Miss. Colegrave and Miss Trickett have gone from New Denver on vacation to Edgewood, the guests of Mrs. Colegrave.

Mr. and Mrs. J. McPhee of Rosebery have gone to Edgewood, taking their son with them.

SALMO NOTES

SALMO, Aug. 28.—Rev. and Mrs. J. Herdman and infant son, of Trail, were visiting Salmo this week.

Mrs. W. Wagstaff of Trail was a visitor in Salmo Tuesday.

DEFENDS CANADA'S EMBARGO ON PULP

Laurentide Company's Forester Declares Position Misrepresented in States.

NEW LONDON, N. H., Aug. 29.—(By Canadian Press).—A strong defense of Canada's policy in limiting the exportation of pulpwood to the United States was made under today by Ellwood Wilson, chief forester of The Laurentide company of Grand' Mere, Que., before the forestry convention which is being held here under the auspices of th society for the Protection of New Hempshire forests. Mr. Wilson declared that the interests which were raising an agitation in the United States in the hope of coercing Canada into withdrawing or modifying her pulpwood embargo have misrepresented the situation and "have deliberately tried to stir up trouble between the two countries." He pointed out that the state of New York had forbid any cutting whatever on state timber lands and declared that if that were permissible in the United States surely the Canadian provinces were within their rights in regulating the cutting and manufacture of wood from their own crown lands.

Approves Quebec Policy

After summarizing the timber regulations of the Dominion, Mr. Wilson paid a tribute to the provincial governments, and particularly to that of Quebec, for their policy regarding the conversation of the country's forestry resources.

"As a very large part of the Province of Quebec is non-agricultural land and can never be used for anything except forests," he said, "it is a very wise move on the part of the government to make every effort to conserve its raw material and to build up an industry based on the great natural resources of the forests. In doing so the government is entirely within its rights and should, by all means, be commended and encouraged in such a policy. It would be very foolish indeed for the Quebec government, or any of the Canadian governments, to allow unmanfactured wood to cross the border only to biuld up mills, at a great distance from the forests, greatly to the department of the local population.

Was Not Opposed at the Time

"Americans and other foreigners have from time to time purchased timber licenses, and have never been disturbed in the excercise of their rights. At the time the law was amended, requiring the manufacture of timber in Canada, there was practically no opposition whatever on the part of license holders, either ntaive or foreign, and several mills were built with outside capital.

"Free hold lands, that is, lands which have been granted outright to settlers or others, are not subject to the manufacturing clause restrictions, and wood cut on these lands can be exported or handled in any way in which the owner see fit. It is certainly entirely within the rights of the government to say what shall be done with the timber cut on its own lands and it is not in any way over-reaching its powers when it requires it to be manufactured on the Canadian side of the line.

"Several American firms, who purchased timber licenses, did so with an eye to the future, looking forward to the time when they would either have exhausted their own supplies or when it would be more convenient or profitable for them to manufacture nearer their source of supply in Canada. Some of these companies, without any protest whatever, came up here and decided to build mills so as to be near their supply of raw matrial and cheap water power, and have been manufacturing very successfully and sharing in the prosperity of the pulp and paper industry.

Have Misrepresented Situation

"Most of the agitation for bringing out crown lands wood to the United States has come from one company which has been manufacturing lumber for a number of years from their Canadian timber licenses, and who, before they started the agitation, made plans and commenced to build a mill in Canada. The small group of Americans which have agitated for the free export of crown lands wood have entirely misrepresented the situation and have made statements which they must have known were not matters of fact. They have deliberately tried to stir up trouble between the two countries and they will find that, as always, such methods will react unfavorably to their users.

"A situation analogous to that in the eastern provinces of Canada exists in the state of New York, where the state has bought more than a million acres of timber land and, much of it carrying valuable pulpwood timber, and has shut it up altogether against exploitation of any sort or kind. Tracts of land have been condemned by the state and their owners compelled to sell them. Only recently the very company carrying on the strongest agitation for Quebec wood has sold a tract of pulpwood to the state of New York and now no timber can be cut from it.

Should Begin on New York Forests

"It would seem much more reasonable for this company and others in New York state to carry on an agitation compelling the state of New York to allow them to put out timber in the forest reserves before they begin to agitate for the removal of the manufacturing clause from the Quebec law.

"If New York has the right to take up timber land and forbid any cutting whatever on it, the province of Quebec certainly has the right to say what timber shall be cut and how it shall be manufactured on its own land.

"Until the United States takes some steps to adopt forestry methods in the utilization of its timber and to frame some national and state policies for the proper coservation and exploitation of its resources it seems hardly right that, having wasted its own birthright it should now attempt to utilize Canadian forests in the same way."

WHALES OF THE FALKLANDS

The whale industry of the Falkland Islands has recently been made the subject of a careful study by the Royal Geographical society of England, and a report has been presented to parliament urging the fitting out of a research expedition with the object of facilitating the whaling and other industries in that distant section south and southeast of Cape Horn. The dependencies of the Falkland Islands include a sector of the Antarctic land, and the whaling field there is of greater importance than in any other part of the world. Some idea of its worth may be seen from the fact that the value of the oil obtained there during the nine years from 1909 to 1917 aggregated more than 55 million dollars. The whales found in the Falkland Island region are the humpback, the finwhale and the blue whale. In 1910 more humpback whales were captured than any other species, being 5,472, but in 1917 the number declined to 2,664. As this type declined the catch of the finwhales increased, but in the last two years more blue whales have been taken. The humpback is the smallest, seldom exceeding fifty feet in length, the finwhale is rarely more than eighty-five feet long, while the blue whale often attains a length of more than one hundred feet.

SIR OLIVER LODGE TALKS ON RADIUM

Sir great is the power of radium, that, according to Sir Oliver Lodge, "the power emitted during the disappearance of a grain would be enough to raise the temperature of a ton of water from the freezing to the boiling point. But this would take about a year." He also says "once an hour one out of 30,000,000 atoms goes off with violence," and the speed of this is so great that a particle could travel 3,000 miles in one-quarter of a second.

If we could utilize all the energy that is inherent in radium there would probably be no more use for coal, electricity, or any of the other heaters or energizers used in this world.

Pure radium is a silvery metal, but it is usually extracted in the form of radium bromide of chloride, which is a white salt. Twenty tons of the richest pitchblende would yield a small thimbleful of radium. This, the rarest element in the world, is rapidly becoming an article of ordinary household use. It is the most valuable metal in the world—one gram, which is one-twenty-eighth of an ounce, costing $120,000—yet it is used on more than four million watches and on innumerable indicating tacks. Yet despite its power and value, children soon will play with its by-products as toys, while their elders use it in a hundred different ways. There is more than one youngster already who will not go to sleep at night without having his pet bear with radium eyes beside him.

But it is the ordinary householder, perhaps, who will find the greatest happiness in conveniences made possible by more common use of the most valuable substance in the world. A minute particle of radium used in a tubful of solution will make thousands of articles visible in the dark. Predictions as to the future usage of radium border on the fairy tale, for in spite of the fact that it costs more than $3,000,000 an ounce and there is said to be less than sixteen ounces of it in the world, the marvellous property of radium makes this small quantity stretch limitlessly in usefulness. For not only is the radium itself used, but the radium emanations possess all the radium activities of radium although without its permanence.

A School of Scientific Tire Mending

Goodyear Repairmen's School Trains Experts Who Add More Miles to the Life of Tires Which Have Reached the Apparent Limit.

Most motorists would be satisfied with the generous tire mileage resulting from Goodyear quality plus Goodyear Service.

But we know that many tires which have given most generous mileage, still can be squeezed for more miles—a still lower cost-per-mile—if put in the hands of an *expert* repairman.

Hence the Goodyear Repairmen's School.

From this school every month goes a class of trained men—trained free by Goodyear—to preach and practise the basic Goodyear policy—making tires go farther and so cost less.

For the hundreds of tire repairmen who cannot attend our school, we have published a very complete Tire Repair Manual—a correspondence course.

So the Goodyear Repairman is working hand-in-hand with the Goodyear Service Station Dealer and the Goodyear Tire Conservation Course to make Goodyear Tires go so far that their cost-per-mile will be much below that of any tire which sacrifices quality or service to achieve a lower price or "special discount."

WANTED

Listings of IMPROVED Farm Property

I have completed arrangements with the largest farmers' organization in the Prairie Provinces to act as their Agent for the purpose of getting listings of Improved Ranches that are for sale in this district.

On your advising me that your property is for sale, I will forward you a listing form which you will fill in, giving the required information.

I will (when possible) make a personal inspection of the property.

From the information I have, it would appear that there are a number of farmers in the Prairie Provinces who would settle in here if they can get property that is suitable to them, and I believe that where this information can be placed before them by their own organization, that better results can be obtained than by any other method.

If you wish to list your property, advise me, and I will forward you a listing form for particulars.

YANKEES CAPTURE SWIMMING RELAY

ANTWERP, Aug. 29.—The United States swimming team won the final of the 800 meter swimming relay race here today, creating a new Olympic record of 10 minutes 42 1-5 seconds. The team was composed of Duke Kahnomoku, Honolulu; Norman Ross, Illinois A. C.; Perry McGuillivray, Illinois A. C.; and P. Kealoha, Honolulu.

The Australian team finished second, and the English team third.

The Old Olympic record 11 minutes 11 and 1-5 seconds, was made by the Australian team in the Stockholm Olympic of 1912.

The final heat of the 400 meter relay Olympic swimming race for women was won by the United States team. This team hung up a new Olympic record for the event.

DAILY NEWS RECIPE

Paste this in your cook book.

FROTH ICING
By Mrs. L. V. Jones

1 cup granulated sugar,
½ cup milk,
White of two eggs (beaten stiff),
1 teaspoon vanilla,
¼ cup finely chopped walnuts.

Place sugar and milk in pan and cook until it forms a soft ball, when a few drops are let fall into a cup of cold water. Then take off fire, add white of egg, walnuts and vanilla; beat well and spread over cake.

A VILLAGE SLEEPING IN SHIFTS

So acute is the housing shortage in Hamilton, Scotland, and other parts of Lanarkshire that families are using beds in double shifts. As a result Labor and Socialist agitators have drawn attention to the untenanted condition of Hamilton Palace and there has been a popular clamor that the Duke of Hamilton should be invited to sell the historic building and its adjoining offices to relieve the home shortage. Since the sale at the palace some months ago, the state rooms have been stripped of their costly panelings of oak and their gildings, and experts agree that with little expense the palace could accomodate scores of homeless families. It is stated that the provost of Hamiton has made an offer for the purchase of the palace. In the stables alone nearly one hundred people could be comfortably housed.

NOVEL BLOTTER PAD

To save the time wasted by pen users in picking up and laying down ordinary blotters, a western inventor has devised a means of attaching the absorbent paper to the wrist, where it is available for instant use, but does not interfere with the movements of the writer's hand. The contrivance includes a curved leather holder into which a small blotter con be fitted, and a strap for fastening the device in place.

The phoebe bird always winters north of the frost line.

YOUNGSTERS OF ST. PAUL'S HAPPY

Sunday School Picnic at Lakeside Park Said to Be Best Yet.

"Hands up, those who enjoyed themselves!" Up went a forest of arms, demonstration sufficient that St. Paul's Sunday school picnic on Saturday at Lakeside park passed off successfully.

The merry-go-round, free to scholars, was the center of attraction. A full house everytime, with a long waiting list, was the order of the day. The park officials, in spite of being kept fully occupied, voted it "the best day yet." The Kilties' band never failed of an audience, and responded to the applause again and again.

The races competed with the merry-go-round in the children's interests, and a good program was run off. The prizes were awarded at the close of each race, Jack Morris holding the sack of coppers. The Pied Piper of Hamdin had nothing on Mr. Morris for followers whenever he started.

The subscribers to the picnic fund were J. H. Argyle, J. Will, W. T. Choate, R. Smillie, F. R. Jelfs, D. C. McMorris, A. J. Dill, D. McDougall, Rev. D. T. McClintock, Miss E. Ross, W. G. Stewart, J. R. Hunter, J. A. Stobo, G. W. McBride, A. Leith, Mrs. Peebles, K. Campbell, M. Campbell and J. Allen.

CADETS ON DRIVE TO GET UNIFORMS

Will Not Ask for Contributions; Promotions Announced.

On account of the activity of the Nelson Cadets, several new promotions have recently been made, and the new N.C.O.'s took their positions for the first time after drill on Saturday.

New committees for the new Cadet year were also elected, and it was decided to put through a strong and straight-to-the-point drive for the new uniforms, the drive starting with the Players' concert, Tuesday. It was also decided to ask for no contributions, but to give a series of teas, socials and entertainments with the aid of the recently formed Girls' auxiliary.

After the drill hour Saturday, at which several visitors were present, the boys adjourned to the N.C.O.'s room and enjoyed a feast of ice cream and peanuts, and told and listened to stories for half an hour.

The promotions are announced as follows: Ernie Hopwood, adjutant; to leader, Ian MacDonald; quarter-master, Carl Johnson; sergeant, "A" company, Kenny Campbell; sergeant, "B" company, Cameron St. Denis; rifle corporal, Arthur Stringer; corporals, "A" company, F. Hodge, A. Stewart; corporal, "B" company, L. Nelson. Sports committee: A. Ionian, J. Hopwood, F. Gallagher; general welfare committee, Whitney Genest, Ted McVicar, Orrin St. Denis, E. Riley and Clifford Burns.

MORRIS GETS NEW TRAINING IDEAS

Passes Examination at Lake Couchiching; Starts to Outline Work.

Bristling with new ideas on gymnastic stunts, and with a better insight into the human physical make-up, as the result of a month's hard training at the Y. M. C. A., physical instructors training camp, at Geneva Park, Lake Couhcing, near Orillia, Ont., Griffiths Morris, physical instructor at the local Y. M. C. A., has returned to the city to resume his duties at the gymnasium, and is now outlining the fall program of character building exercises for the classes that will recommence about Sept. 15. Mr. Morris arrived home Friday night.

While at the training camp, which was attended by about 240 other Y. M. C. A., universities in the United States.

Special features are to be made of wrestling, boxing, and life saving throughout the Y. M. C. A., organization this year as a result of conferences on policy at the camp, Mr. Morris states, and towards the end of the term, local, provincial, interprovincial and international competions will be staged.

A special course of training for business men will also be put on at the local "Y".

Social and Personal

S. E. Mills of Ainsworth is registered at the Strathcona.

C. E. Severns, the Slocan City lumberman, arrived in Nelson Saturday to meet Mrs. Severns, who returns today from Sjokane.

F. V. Carroh of Creston was among arrivals last evening.

James McGregor of Rossland was in the city on Saturday.

Ansel F. Lundberg of Erie arrived in the city on Saturday.

Mr. and Mrs. J. Walligan of Trail are registered at the Hume.

William Perkins of Cranbrook was among arrivals on Saturday.

Mr. and Mrs. R. S. Warner of Slocan City are registered at the Hume.

J. A. Nowell of St. Paul, Minn., owner of the Salmo Rapids townsite, is a city visitor.

Harry Wassick spent the week-end at Ymir, returning last evening, and returns to Hall today.

William Pascoe of this city is building a residence for Rev. A. P. McDiarmid, D.D., at East Robson.

Among those who sent flowers to the late Mrs. Henderson's funeral were Mr. and Mrs. J. H. Soans.

C. I. Archibald, the Salmon valley lumberman, returned Saturday night from a trip to the coast.

Miss Eva Horswill, registered nurse, left Saturday for Athabasca Landing, Alta., to take charge of the hospital of the Victorian order at that point.

J. A. Kelly of Blairmore, Alta., is spending the week in the city on a holiday trip and is securing many interesting snaps of the picturesque scenery about here.

Mrs. T. L. Bloomer returned to the city from Calgary, where she accompanied her daughter, Miss Clara Bloomer, who has taken a position as teacher in a school at Gleichen.

Miss Ruby Glasser, daughter of Mr. and Mrs. G. Glasser, leaves today for Grahams Landing, near Burton City, to take charge of the school there, which reopens on Wednesday.

Dr. R. J. Collins, medical superintendent of the Balfour sanatorium, acknowledges receipt, for the benefit of the patients, of a bundle of magazines from Mrs. C. H. Swannell of Rosemont, this city.

WEDDINGS

BLENKIN-MAGILO

A pretty wedding was solemnized yesterday afternoon at the Church of Mary Immaculate, when Josephine Blenkin, daughter of Mr. and Mrs. Johnathan Blenkin of Robson street, was married to Thomas Maglio, son of Charles Maglio of Abbling county, Italy. Rev. Father J. A. Althoff, V.G., officiated.

The bride, looking charming in a white silk dress trimmed with all-over lace, wearing a bridal veil trimmed with orange blossoms and carrying a bouquet of white roses, was given away by her father. She was assisted by Mrs. F. Johnson of Meadows, the matron of honor, who wore a becoming sand colored georgette costume trimmed with roses, and a picture hat to match. She carried a bouquet of red roses.

F. Johnson, of Meadows, assisted the groom in the capacity of best man.

Two little flower girls, dressed in white and carrying baskets of sweet peas, attended the wedding couple.

After the ceremony the bridal party retired to the residence of Charles Maglio, Robson street, where with the house decorated with bunches, clusters and arches of tiger lilies and golden rod, a dainty wedding breakfast was served.

Mr. and Mrs. Maglio left last evening for the coast to spend a two weeks' honeymoon at Vancouver, Victoria and Seattle before returning to the city to take up their residence in Robson street.

ALLEGED BOGUS AGENT ARRESTED

On a charge of obtaining subscriptions for periodicals on false pretenses, S. Freeman, who it is alleged has been in the district for two or three months, was arrested last evening on Ward street and lodged in the provincial jail by A. M. Pearman, provincial constable, of Nakusp, who is staying in the city.

It is stated that the prisoner has taken a number of subscriptions for magazines and periodicals by representing himself as a canvassing agent. The non-arrivals of periodicals paid for led to information being laid with the police, and the subsequent arrest of the supposed agent.

NO ACCOUNTING FOF TASTE

An adult Eskimo is capable of consuming twenty pounds of flesh and oil daily. A Yakut will wash down this quantity of flesh with a quart or two of train-oil, and take as desert a dozen tallow candles. A famous naturalist, who cooked part of a boaconstrictor, declared that it tasted very much like vegl. On another occasion he tested crocodile and pronounced the flesh excellent. Frobisher and Settle both commented on the way the inhabitants around Hudson's Bay used to eat grass. "Such grass," says Settle, "as the country produceth, they pluck up and eat, not daintily or salad-wise, but like brute beasts." Humboldt tells of men living on the banks of the Orinoco who eat earth. They knead the earth into balls of from four to six inches in diameter, and bake them before a slow fire.

The Phoenicians were on especially friendly terms with the Israelites during the reigns of Solomon and David.

Personally we are strong for woman suffrage, but we still love the kind of girl who would rather be a debutante than a delegate—Dallas News.

Nelson News of the Day

Warner Smith, F.Gld.O., has resumed teaching. (9274)

A general meeting of the Nelson Improvement association will be held Tuesday, Aug. 31, at 7:45 p.m. in the council chambers. A full attendance is desired. (9531)
