Kootenays To Get First Steel Smelter in Western Canada

Sommers Seeks to Quash Conviction

By ARCH MacKENZIE
Canadian Press Staff Writer

OTTAWA (CP)—An appeal was launched Tuesday in the Supreme Court of Canada against the conviction of former cabinet minister Robert Sommers of British Columbia on bribery and conspiracy charges.

The appeal is based on the same two points of law rejected earlier this year by the B. C. Court of Appeals in a 2 to 1 judgment.

Counsel for Sommers began his arguments intended to show that the bribery charges were laid too late and that Sommers could not be described as an "official" of the government under the pertinent section of the former Criminal Code of Canada.

J. R. Nicholson of Vancouver, Sommers' counsel, submitted on Tuesday that Parliament in framing Section 158 of the old Criminal Code drew a distinction between an "official" and a minister of the Crown. There was a "lack of uniformity" in the expressions used but, he suggested, all referred to persons of the civil service class rather than ministers.

PLAINLY SET OUT

In the new code itself—which became effective in April, 1955—it appeared to be plainly set out that it was an offence to bribe a minister but it was no offence for a minister to accept such a bribe.

Mr. Nicholson said a most exhaustive search had failed to spot a case where a minister had been prosecuted before the courts for accepting a bribe. All available records pointed to ministers being impeached instead.

The second basis of the Sommers appeal is a provision in the old Criminal Code that bribery charges cannot be prosecuted two years after the alleged offence.

GRAY ALSO APPEALING

Also appealing is H. Wilson Gray, who with Sommers was convicted of similar offences during 1953 and 1954 when Sommers was Lands and forests minister. Sommers, 48, and Gray, 46, a Vancouver timber executive, were given five-year sentences which they have begun to serve.

The Supreme Court hearing is expected to conclude today.

Parliament Tuesday

The Progressive Conservatives lost their first Senate vote since assuming office in 1957, the Liberal majority carrying 40 to 14 a motion for committee study of the "threat" of inflation.

The Conservative majority in the Commons defeated 163 to 37 a Liberal motion of non-confidence in the government charging mishandling of the country's finances.

Douglas Fisher (CCF-Port Arthur), with support from two Conservatives, called for higher pay for Commons members.

Finance Minister Fleming reported an extraordinary demand for bank loans since Jan. 1, terming it a striking example of the economy's recovery and expansion.

DOLLAR UP

NEW YORK (CP) — Canadian dollar was up 3-32 at $1.04 1-16 in terms of U.S. funds. Week ago, $1.03 29-32.

Pound sterling was unchanged at $2.81 11-16.

Firemen's Strike Averted

By JOHN LeBLANC
Canadian Press Staff Writer

OTTAWA (CP) — The firemen's May 1 strike against the CNR was called off Tuesday night, with some yielding by both sides.

The firemen's union gave up on its demand that firemen must be continued in employment on yard and freight diesel locomotives indefinitely.

The CNR yielded some money—amount unspecified—in wages on so-called "arbitraries," a sticking point in the late stages of negotiation.

Both sides professed themselves happy with the outcome, stage-managed by Labor Minister Starr, and Canadian chief W. E. Gamble of the union said he is calling off the scheduled walkout immediately.

The strike of 3750 firemen had been set for 12:01 a.m. Friday local time across the country.

On the major issue that precipitated the strike—dropping firemen from freight and yard diesels over a period of years—CNR president Donald Gordon said to reporters that this will be carried out in line with the recommendations of a federal conciliation board that the company accepted.

This means no more firemen will be hired, and they will be erased progressively from diesels in freight and yard service through promotions, retirements and deaths. It has been estimated this would take about 15 years.

Mutual Life Head H. L. Guy Dies

WATERLOO, Ont. (CP)—Harry L. Guy, 55, president of the Mutual Life Assurance Company of Canada, died Tuesday at his home here.

Born in Oshawa, Ont., he joined the Mutual Life actuarial staff here in 1927.

Mr. Guy was named commander of the Order of the British Empire in 1946 in recognition of his war services as assistant chairman and member of the executive committee of the national war finance committee.

Kamloops Girl Dies in Cave-In

KAMLOOPS (CP) — A seven-year-old girl was fatally injured when the sides of a ditch caved in while she and two other children were playing.

Roberta Cole, daughter of Mr. and Mrs. Hershel Cole of suburban Brocklehurst, died in hospital Monday a few hours after being pulled from under about 18 inches of heavy soil.

Author, Pioneer, Edwards Passes

BANFF, Alta. (CP) — Ralph E. W. Edwards, author and well-known Rocky Mountain pioneer, died Tuesday. He was 90.

BRIDGE START IN '66

VANCOUVER (CP)—The Province says 1966 has been set as a target date for starting construction of a second crossing of Burrard Inlet at First Narrows.

W. S. KIRKPATRICK
. . . production in '61.

Coast Markets Seen for Kimberley Steel

VICTORIA (CP) — Government announcement of a $20,000,000 iron and steel industry for the Kimberley area was greeted enthusiastically Tuesday by Harold Husband, president of the shipbuilding firm of Victoria Machinery Depot.

He believed VMD foundry might have a use for the steel ingot the smelter will produce, but pointed out the new mill will not immediately be capable of supplying the steel plates used in quantity by VMD in its shipbuilding and other work.

Western Steel Mills on Twigg Island near Vancouver, which now produces bar stock, angles reinforcing rods and other steel building products, is a likely market for steel ingots products at Kimberley where production is slated to start in 1961.

VICTORIA (CP) — Mines Minister Kiernan said Tuesday the new steel smelter to be built at Kimberley will have no effect on Vancouver Island or other iron ore.

"It wouldn't be feasible to move Vancouver Island ore to the Interior," the Minister said. "It would be prohibitive from an economic standpoint."

He said Vancouver Island ore likely will continue to be sent to Japan.

But he believed steel produced at the Kimberley operation—which is to use iron ore tailings from the Sullivan Mine there—would be competitive in price to steel from Japan.

New Cominco Industry To Be In Operation in '61

The Kootenays came under a nation-wide spotlight Tuesday with announcement that Western Canada's first iron and steel smelter will be started immediately at Kimberley by the Consolidated Mining and Smelting Company of Canada, Limited.

The smelter will be the first stage in an integrated iron and steel operation costing in excess of $20,000,000 which will produce ingots and rolled steel products, to serve rapidly growing markets in Western Canada. It will employ 200 men, and planned capacity will be in excess of 100,000 tons a year.

The announcement was instantly hailed as hastening a new era of industrial expansion for this region.

(See story Page 3).

The smelter will be located adjacent to Cominco's fertilizer plants in Kimberley. It will use tailings from the Sullivan mine.

The announcement was made simultaneously Tuesday morning by Premier Bennett in Victoria and W. S. Kirkpatrick, president of the Consolidated Mining and Smelting Company, in Montreal.

In his announcement, the premier said: "This is one of the most important developments in the industrial history of our province. For many years British Columbia has sought a steel industry without success; now we have that industry."

Mr. Kirkpatrick said the first stage of the integrated development will consist of "sintering" and furnace feed facilities for a capacity of 100,000 tons of steel a year.

Sintering is a process for reduction of a mass, through application of heat to a condition where its particles cling together but are not yet melted.

Mr. Kirkpatrick said the first phase will also include an electric furnace with a design capacity of 36,500 tons of pig iron a year.

Production is scheduled to start early in 1961.

SECOND FURNACE LATER

The addition of a second, larger furnace and oxygen-blown converters for the production of steel ingots, together with fabricating facilities, will follow shortly.

Cominco's reserves of iron tailings from the Sullivan mine at Kimberley have been described as one of the main sources of raw materials for a primary iron smelter in Western Canada.

Reserves equivalent to more than 15,000,000 tons of recoverable iron has accumulated over the years. Current mine production increases the reserves by more than 350,000 tons of iron a year.

This raw material will be made available to the new project in the form of a high-grade iron oxide containing more than 60 per cent iron.

The iron reserves, combined with the company's hydro-electric power reserves on the Kootenay and Pend d'Oreille rivers and the proximity of coal, coke and limestone in the Crowsnest Pass area, "constitute a unique combination of materials needed for the electro-thermic production of iron and steel," the announcement said.

Later at a press conference, Premier Bennett told reporters that negotiations have been going on for some two years with Cominco for establishment of the iron-steel smelter.

He indicated his government also has negotiations now under way for bringing other industry to B.C., but declined to give details.

SUBSIDY ASSURED

Mr. Bennett said Cominco's iron production at the new plant will get a subsidy of $3 a ton per year for pig iron or its equivalent under legislation endorsed by the legislature in 1957. The act provides for the subsidy up to a maximum of 100,000 tons a year to an aggregate of 1,000,000 tons. When 1,000,000 tons have been produced, the subsidy stops. There is also a 10-year limit.

"This is a bright day for British Columbia," the premier declared. "This will make British Columbia a manufacturing province which will rival and in time surpass Quebec and Ontario."

For Premier Bennett, it was the second piece of good news he has been able to give the Kootenays this year.

At the end of February he announced that Celgar Limited would build a $50,000,000 kraft pulp mill at Castlegar. Construction here is going ahead at a fast pace.

STOCK SOARS

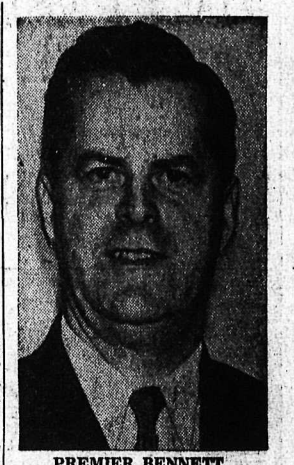
Within an hour of Tuesday's announcement, Consolidated Mining and Smelting Company stock had jumped more than $1.25 a share on the Toronto stock exchange. At closing, it was up $2.25 at $22.25.

Hon. W. D. Black, MLA for Nelson-Creston, whose office was in communication with The Daily News when the announcement was made, was also reported to be elated at the arrival in the Kootenays of the new industry.

Actually, it had been known for at least two years that Cominco was planning iron and steel production. It was disclosed by R. E. Stavert when president in his address to shareholders at the annual meeting in Montreal in 1957. At that time Cominco was hopeful of starting the plant late that year or early in 1958.

At the end of 1957 Cominco announced that it was spending $100,000 investigating the proposed production.

"The announcement today of the steel industry development in Kimberley is welcomed by the entire Kootenay community," Mayor T. S. Shorthouse of Nelson said Tuesday night.



PREMIER BENNETT
. . . "industrial history".

"Because of its geographic position, Nelson will undoubtedly benefit from this industry to the east and the Celgar pulp industry to the west."

The Mayor assumed that there would be increased traffic in communications and transport, and that a general economic upsurge could be expected.

"We congratulate Kimberley on having been chosen as the site for this first steel mill in Western Canada, and the Consolidated Mining and Smelting Company on its foresight and initiative, and express our best wishes for a successful operation."

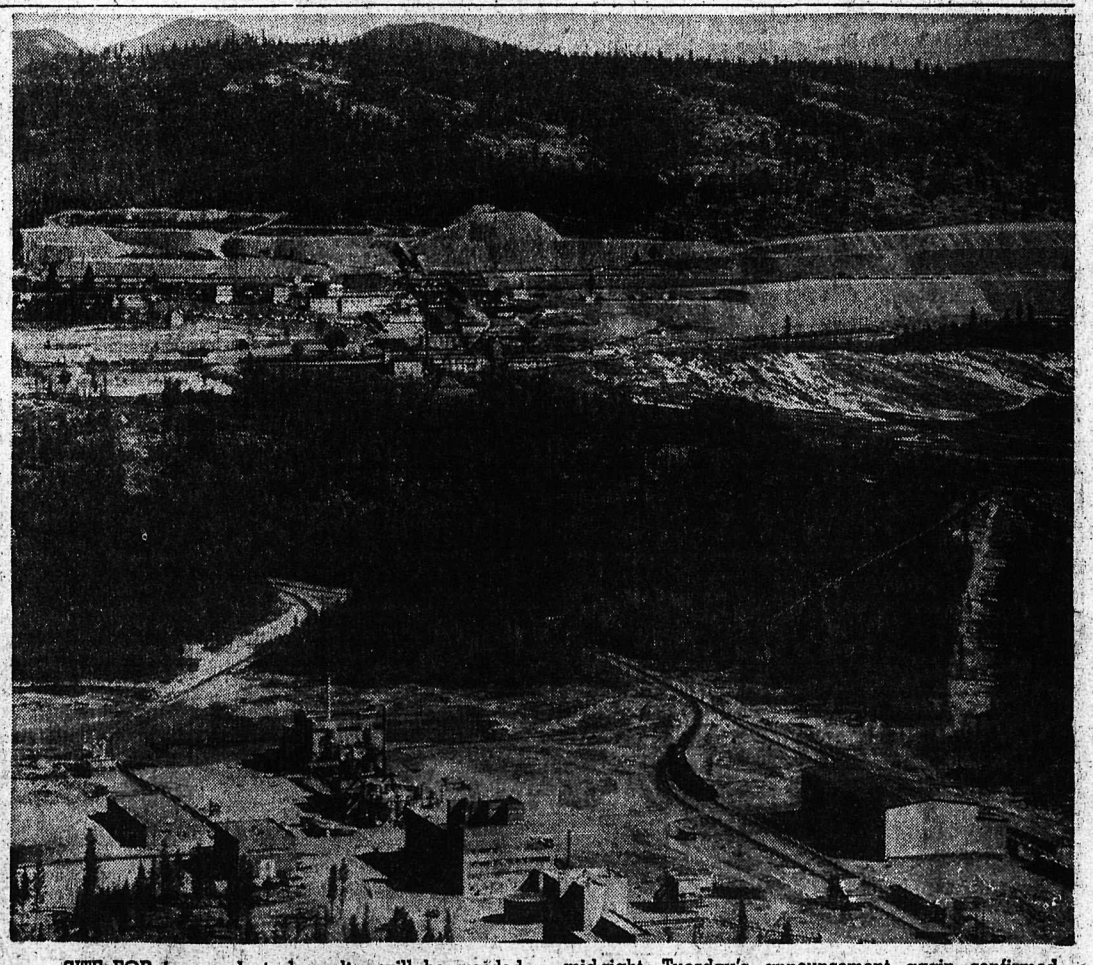
Former B.C.-MLA Dies, Aged 64

VICTORIA (CP)—Herbert John Welch, 64, former Coalitionist member of the legislature for Comox, died here Monday night.

Born in New Westminster and educated there and in Victoria, Mr. Welch was a lieutenant in the Royal Naval Air Service and later became a captain in the RAF during the First World War.

He was elected to the legislature in 1945 as a coalitionist and again in 1949.

SOURCE OF raw material for iron smelter of Consolidated Mining and Smelting Company at Kimberley will be reserves equivalent to more than 15,000,000 tons of recoverable iron accumulated over the years plus supplies from current mine production. This picture shows Sullivan concentrator and vast store of iron tailings stretching over a square mile to a depth of between 30 and 40 feet.



SITE FOR iron and steel smelter will be wooded land close to the centre of this picture, bordering on Cominco chemical fertilizer plants. The Sullivan concentrator is shown in background, and tailings store at mid-right. Tuesday's announcement again confirmed the Sullivan mine's stature as one of the great mines of the world, bringing into being yet another industry.

Travel Counsellors Touring Kootenays

A charming duo from the Vancouver branch of the B.C. Automobile Association enjoyed their first look at scenic Kootenay-Boundary Tuesday.

Miss Della Glendemming and Miss Lois Hembly, travel counsellors, travelled from Grand Forks to Nelson and today are bound for East Kootenay.

At Nelson they were entertained at a reception at the Lord Nelson dining room presided over by Chamber of Commerce president C. W. Ramsden and Mayor T. S. Shorthouse.

The girls, on a familiarization tour, were met at Grand Forks Monday night by Grand Forks Board of Trade members Stanley Orris and Alex Labron, and Rossland president Harry Lefevre.

They came on to Rossland over the summit to spend the night in Canada's second highest city. In the morning they were met by their escort, H. D. Harrison, chairman of a special committee of the Associated Boards and Chambers of Southeastern B.C., to drive to Trail to meet Trail chamber representatives, then to the Waneta dam. They also drove along eight miles of the Kinnaird-Christina Lake cut-off highway, then attended lunch with Castlegar chamber president D. W. Brookes, other members of the executive and their wives, at the Castlegar hotel.

Later they saw the confluence of the Kootenay and Columbia Rivers, Peter Verigin's tomb and the Brilliant dam site. The journey continued to New Denver, where they were met by Slocan and district board of trade president J. A. Clarkson, vice-president Kenneth Smith and past-president L. R. Campbell. The party toured the dormitory school and other points of interest in the New Denver area before leaving for Nelson.

They continue to Creston today for lunch, and on to the Windermere valley and other East Kootenay points, and return in time for dinner at Kaslo Thursday. They will stop at Nelson Thursday night before returning to Vancouver.

Fast Action Saves Woman's Life

Prompt action by the fire department's inhalator squad and Dr. R. B. Shaw were credited Tuesday night with saving the life of Mrs. Evelyn Warnock.

Mrs. Warnock collapsed at dinner with friends in the Savoy Hotel, apparently from the effects of sleeping pills she had taken earlier.

She was given oxygen and taken to Kootenay Lake General Hospital where doctors said she appeared to be out of danger.

Mrs. Warnock, about 43, had been a resident here for some time, previously being in New Denver. Her husband is believed to be living in Toronto.

Man Walks Through Glass This Time

It's getting to be a habit.

A woman visiting Kootenay Lake General Hospital two weeks ago mistook a glass panel for an open door, and walked into it, with resulting minor injury to her chin, and major damage to the panel.

Tuesday another visitor, a man this time, in his haste to catch a bus tried to leave by the outer main door without first opening it.

Result—broken glass but the human missile came off unscathed.

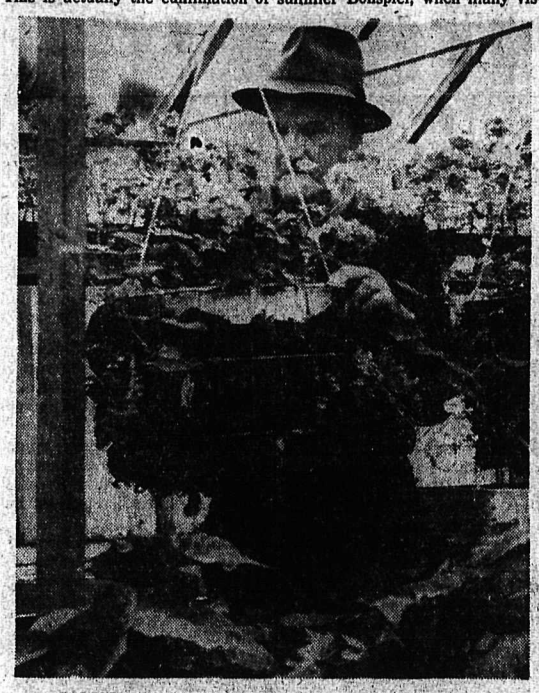
Aluminum bars ordered after the first mishap have not arrived, but will be installed across all glass openings.

City's Greenhouse Holds Promise of Riotous Color

At the city's greenhouse at Lakeside Park, 32,000 flower plants are waiting patiently for the weather to turn a bit warmer. And city gardener Frank Holt is waiting, not quite so patiently, with his fingers crossed in the hope that he can start planting them by May 15.

The job of setting out all these colorful floral decorations on city streets and in the parks will take Mr. Holt from two to three weeks. This is actually the culmination of a year-long program of planting and raising from seed the right types to provide the city with blooms from the start of the season to the end.

Part of Mr. Holt's problem is to schedule his planting program to be able to provide blooms for special occasions such as Christmas. Right now he is carefully bringing along 400 begonias and a number of other plants timed for the Mid-summer Bonspiel, when many visitors to the city admire the greenhouse display.



NOVEL DECORATION for Nelson's Vernon Street will be hanging flower baskets, one of which is being arranged here by city gardener Frank Holt. A few other cities in Canada, including Victoria, have similar displays.—*Daily News photo by Cam Hooper.*

Hanging ready now are 12 wire baskets planted with ivy geraniums, schizianthus, nasturtiums, petunias and hanging lobelia, which will be suspended from lamp standards on Vernon Street in the two blocks near the post office. Mr. Holt describes this "as sort of an experiment". If it is successful there is little doubt there will be demand to expand the plan in future.

BARBERRY BUSHES

Women with nylon stockings are warned by Mr. Holt they should go around, not through, the narrow centre boulevards on Vernon Street. Planted there now to produce a crop of red berries at the winter festive season are barberry bushes, which bear thorns with an affinity for stockings, the genial plant man says.

Besides the Vernon Street decorations, other points in the city which will soon be showing new color and blooms are Lakeside Park, the old street car loop east of the bridge, the old bandstand site, the firehall, the Nelson Hostel for Aged Men, the cemetery, and parts of the boulevard on Vernon Street.

Already being brought along for use in the spring are tulip bulbs, which the Girl Guides will use to construct a floral Guide emblem on Vernon next spring. For this year Mr. Holt intends to plant viola there.

The greenhouse these days is only a promise of things to come. Flowering geraniums around the four walls give indication of the myriad colors the city will enjoy when the 30 or more varieties now in the budding stage produce their blossoms.

Amateur gardeners who groan at the amount of labor involved in their efforts will sympathize with Mr. Holt when they contemplate the 2000 geraniums, 500 canna lilies, 2000 gladioli, and equally large numbers of each of the other varieties. They probably wouldn't like washing 10,000 flower pots, either, but to Mr. Holt, who has spent 19 years at the job for the city, it's all in the day's work.

Health Centre Remarks Draw Criticism

Comments on the $70,000 Trail Kinsmen Club Health Centre made at the Nelson City Council meeting Monday night drew fire from Trail club officials Tuesday.

They took exception to description of the Trail centre as "too small and of cheap construction," that the clinic and board rooms were too small and that with the building already taxed beyond capacity there was no room for expansion.

The comments were made during presentation by Denis C. Horobin, chairman of the Nelson Kinsmen Health Centre committee, and Dr. J. M. O'Keefe, director of the Selkirk Health Unit, of request for a grant to the Nelson building.

Mr. Horobin said Tuesday that no reflection on the Trail building had been intended. The delegation was emphisizing to council that the building proposed by Nelson would be larger than Trail's and of more substantial type of construction.

He said information that Trail had plans for future expansion, but this was because the fact had been overlooked as the discussion proceeded along various paths.

Trail Kinsmen president Don Longden telephoned The Daily News to protest the comments and explained that some sections of the building were not being used at present so that it could not be called overtaxed. Property was available for purchase when it was required for future expansion.

He was reported by a Trail newspaper to have said that :

"I'd like to know just who made the remark. It's not attributed to anyone and it's not even in quotes. It looks as if the reporter who was covering the meeting just added that part in himself. I call that poor reporting and certainly uncalled for."

(Editors note: The Daily News council reporter covering the meeting has established a fine reputation for accurate reporting of council meetings. Mr. Longden's suggestion is a serious reflection on a newspaper which for a century has had as one of its aims, fair and accurate presentation of the news. In this instance, comments were made by three people, making it difficult to quote any speaker directly.)

LIONS HONOR SHOW DIRECTOR

Nelson Lions Club paid its tribute to E. J. Leveque for his direction of the Minstrel Show staged by the service club by presenting him with a certificate of appreciation at its dinner meeting in the Hume Hotel Tuesday night.

The presentation was made by J. G. James, who complimented Mr. Leveque on having produced a highly entertaining and successful show.

This was the first time such an award had been made by the local Lions Club.

Joe Niehaus was named chairman of a May 23 "come as you are" dance. Co-chairman will be G. E. MacNeill.

Robert Coventry spoke on the florist business and in particular the trend toward sending flowers by wire. He told the Lions florists must maintain high standards to keep membership in their association and that frequent checks were made on shops to ensure this.

The Rocky Mountain highway between Banff and Jasper is 7000 feet above sea level in some places.

Council Jottings

City's 1959 Budget Given Final Approval

Nelson's 1959 budget was finally passed by City Council Monday night.

The $1,169,305 budget was brought down by finance chairman A. K. McAdams and the bylaw was given three readings at a special meeting last week. The budget raised the tax rate one mill to 46 mills.

* * *

Permission to post signs at the three city entrances and on lamp standards within the city during a three-day convention was granted the Kinsmen Club. Directional signs pointing the way to convention headquarters will be put up just prior to the May 16 to 18 provincial meeting.

* * *

Request from the Kootenay Valley Car Association for property at the west end of Carbonate Street opposite the fish hatchery on the west bank of Cottonwood Creek, was referred to city engineer E. E. Olson for an estimate on the cost of services. The association wants the property as a site for a garage.

Two bus loops to the Canadian Pacific Railway station will be discontinued. The city engineer told Council the CPR side-trips made by the 7:40 a.m. bus from Fairview and the 5:05 p.m. bus to Fairview were not being used. The two uphill buses that make the loop will not be stopped. Council also decided to make student passes available on a year-round basis.

* * *

Mayor T. S. Shorthouse, Ald. Edith Van Maarion, Ald. B. C. Affleck, and city clerk C. W. R. Harper will go to Cranbrook May 9 to attend the spring convention of the Association of Kootenay Municipalities.

* * *

An addition of $247,073 to the school district budget as the assessed value of federal buildings within the city brought the final total to $11,595,418. The addition was noted in a letter from the board.

* * *

The traffic engineer of the highways department in Victoria has been advised of the city's desire for a cross-walk to the war memorial on Vernon Street, Council learned in a letter from A. L. Freebairn, district engineer. The traffic engineer is being consulted as to whether the installation of the cross-walk would contravene existing regulations.

* * *

Three recommendations of the Little League and Babe Ruth League concerning Queen Elizabeth Park were turned over to the parks committee for a report. Recommended were the installation of a two-inch line from the main to the valve, the building of two fences, one along the right foul line and one along the left foul line, and that the sidehill be bulldozed and landscaped.

Eddy President Here Today for Meet

L. M. Crandall of Pembroke, Ont., president of Eddy Match Company, is due here today for the quarterly directors' meeting of the company's wholly-owned subsidiary, Kootenay Forest Products Ltd. He will preside at today's meeting as chairman of the board.

Also attending will be directors James L. Hickey of Deer Park, Wash., R. W. Underhill of Vancouver, W. J. Shukin, formerly of Nelson, now of Cloverdale, H. B. Horton, E. L. Vance, president and Laurie Lefeaux, secretary.

Bill 43 High on Labor Meet Agenda

Delegates and members from every labor union group in the Kootenays are expected to attend a public meeting in Nelson Saturday when ramifications of the controversial Bill 43, passed by the provincial legislature will be explained.

The meeting is being arranged by the International Woodworkers of America West Kootenay representative, Ernie Boulet, and invitations to attend have gone out to every union in the district, both those affiliated with the Canadian Labor Congress and those not affiliated. Mr. Boulet is also acting as president of Nelson and Trail District Labor Council.

Purpose is to obtain a clear understanding of the effects of Bill 43 and the legal position of unions under the new law.

Mr. Boulet says unions have in the past been placed in "unhappy" positions more through ignorance of how a law applies than through infraction of the laws.

"To acquaint members of unions with both sides of the picture," said Mr. Boulet, "we are inviting Hon. Wesley Black, MLA, for Nelson-Creston; Hon. Lyle Wicks, minister of labor, Donald Brothers, MLA, for Rossland-Trail; CCF party chief, Robert Strachan, and MLAs Randolph Harding and Leo Nimsick." While acceptance had not been received from all of them by Tuesday, Mr. Boulet was certain there would be enough speakers to give "a fair view" of the situation.

More than 20 unions have been invited to the meeting, irrespective of their affiliations. They represent more than 10,000 workers in the East and West Kootenay districts.

An evening meeting of union members from those affiliated with the Canadian Labor Congress will be held to discuss Bill 43. If it is felt a definite union stand should be taken on the matter a later meeting will be called with officially-appointed delegates from all member unions of the congress.

J. H. CHAPMAN FUNERAL HELD

Rev. H. R. Whitmore of Fairview United Church officiated at the funeral service Tuesday at the Thompson Funeral Home for John Henry Chapman, 83, widely-known Nelson oldtimer who died Sunday.

Legionaires and Legion Auxiliary members were in attendance at the rites for the veteran of the First World War. Graveside services were conducted by Nelson branch, Canadian Legion, under the direction of W. H. Burns.

Mrs. W. A. Manson was organist for the chapel service.

Pallbearers were C. H. Robinson, Ald. J. W. McClelland, A. Speirs, Grant Hall, W. Simpson and J. J. Boyd.

Mr. Chapman is survived by one daughter, Frances, Mrs. Charles Barrett of Nelson; a sister, Miss Mary Chapman in England; and by a granddaughter in Ireland.

Interment was in the Masonic plot, Memorial Park.

Accident Rate Down

Car accidents reported to the RCMP Subdivision with headquarters at Nelson dropped to the lowest point of the year with eight recorded in the past week. The previous week there were 15. Prosecutions decreased from six to two.

CKLN OFF AIR SEVERAL HOURS

Radio station CKLN is expected to be off the air for at least several hours today.

A high voltage condenser burned out at the Rosemont transmitter site Tuesday night and the station was forced to shut down at 8:48 p.m. A new condenser was ordered from Vancouver and is expected to arrive by air on the morning CPA flight from the Coast.

Driver Fined For Obstruction

A. A. Pomrenke of Nelson was fined $25 and $3 costs and had his driver's licence endorsed Tuesday when he was found guilty of obstructing passage of an emergency vehicle.

Evidence heard by Magistrate R. S. Nelson showed that the defendant's car failed to yield the right-of-way to a city police car Saturday. The latter vehicle was travelling with its siren and red light turned on. Pomrenke pleaded not guilty, stating that he was travelling under 15 miles an hour, and that he felt that the police car had sufficient room to pass.

Oldest Resident, 101, Mrs. DeGirolamo Dies

Nelson lost its oldest resident with the death Monday in Mount St. Francis infirmary of Mrs. Carmen (Filamina) DeGirolamo. She was 101 years of age on April 13.

Alert and interested in everything about her, Mrs. DeGirolamo was the recipient of congratulations upon reaching the century mark in 1958 from both the Vatican and Queen Elizabeth. The Nelson Centennial Committee and Mayor T. S. Shorthouse also took the occasion to present the best wishes of the local community.

Born in Orsova, Italy, Mrs. DeGirolamo migrated with her family to Brazil in 1893. After 14 years there they returned to spend the next 13 years in their homeland.

Her sons, Gaetano (Mike) and Guiseppe (Joe) had meanwhile moved to Canada and settled in Nelson. In 1921 the sons brought their parents to the Queen City. By 1931 "Concetta's gardens", a nickname for Mrs. DeGirolamo's beautiful floral display, was a point on most sightseeing tours of Nelson.

Mr. DeGirolamo died in 1934. Mrs. DeGirolamo continued her interest in gardening until her 80th year.

Her sons predeceased her, Mike in 1949 and Joe in 1954. Mrs. Mike DeGirolamo and Mrs. Joe DeGirolamo continue to live in Nelson.

Surviving are one daughter, Mrs. M. DeLucrezio of Nelson; five grandsons, George DeGirolamo, John DeGirolamo, Joe DeLucrezio, all of Nelson; C. DeGirolamo of Trail, Raymond DeGirolamo, north of Edmonton; and eight granddaughters, Miss Georgina DeGirolamo, Mrs. S. Bragagnolo and Mrs. H. May, all of Nelson, and Mrs. I. Buchignani and Mrs. A. Orlando of Trail, and Mrs. Jim Cameron of Wartime, Sask., and Mrs. Earl Finter and Miss Jean DeLucrezio, both of Seattle.

Rembrandt, the Dutch painter who died in 1669, left 600 paintings, 300 etchings and 2000 drawings.

HEADING newly-formed Nelson Stamp Club as president is Walter W. Wait, above. Club boasts an initial membership of 15 philatelists.

Council Meets Power Company

An informal meeting was held Tuesday in Trail by members of Nelson City Council and officials of West Kootenay Power and Light Company headed by R. G. Anderson, president. The city's North Shore power line was under discussion.

Going from Nelson were Mayor T. S. Shorthouse, Aldermen A. K. McAdams, Edith Van Maarion, B. C. Affleck and J. H. MacMillan, city electrical superintendent A. C. VanSacker and city clerk C. W. R. Harper.

Radio Station Manager Resigns

CRANBROOK (CP)—The resignation of Robert A. Reagh as manager of Cranbrook radio station CKEK was announced Tuesday. Mr. Reagh was one of the organizers of the station and had served as manager since CKEK went on the air in October, 1957.

Assistant manager Tom Davidson has taken over as station manager.

THE WEATHER

Nelson	38	52	.11
Spokane	42	62	—

Truck Mail Service Featured in Magazine

Nelson and the Kootenays' unique truck mail service, which took over when the Kettle Valley dropped its daily train schedule to twice a week, achieved nation-wide publicity in the April edition of the Post Office Department's "Postmark" magazine.

The story, highlighted by a Nelson Daily News photo of a line-up of OK Valley Freight trucks at the local post office, recounts some of the many difficulties inherent in operating over mountain roads in all types of weather.

Since the beginning of the service in September, 1957, the freight line has set up teletype facilities at six points along the route to expedite matters in the case of trouble. Trucks and trailers have been equipped with special equipment to make handling of mail easier and faster.

BUSINESS, LABOR UNANIMOUS IN WELCOMING STEEL SMELTER

By CAM HOOPER

There was a spirit of elation throughout the Kootenays Tuesday after Premier W. A. C. Bennett's announcement that a $20,000,000 steel smelter will be built by the Consolidated Mining and Smelting Company at Kimberley.

Business and labor leaders were unanimous in accepting the news as another step toward a new era of development in the economy of the region. They not only foresaw growth in Kimberley and its environs, but also were in agreement that this was only the first stage in the creation of an integrated iron and steel indusrty in the area.

In Kimberley, where the new development will have its greatest impact, a rising tide of confidence in the stability of the town and district was evident from the remarks of trade, community groups and labor spokesmen.

Mayor Clifford Swan of Kimberley hit the keynote of the district's feelings when he said: "This will be a great thing for every part of the Kootenays, even for cities as far away from the new project as Nelson. It will mean new industries and a greater stability for the entire area."

Comments of other community leaders ranged from congratulating Cominco for its daring in entering into an untried field to: "This is the finest news in the world, it's just wonderful." Their remarks, as given to The Daily News, follow:

Mayor Clifford Swan, Kimberley: "It's something we have been hoping for and now it's a dream come true. This will give the people of Kimberley a lot more confidence in Kimberley and the whole East Kootenay. The greater stability in employment it promises will encourage building of homes and business establishments in a more permanent form.

NO CROWDING PROBLEM

"This will not only affect Kimberley—it is sure to make a difference to the whole district. As far as the city is concerned, we have plenty of room for expansion to take care of housing an increased population of 1500 or 2000. This will be no problem to the city.

"There is a very happy feeling around town today. People are saying, 'We'll have a town here yet.'

"The city should be able to absorb the growth without too much trouble. More revenue from more homes and businesses should meet any increased costs in administration, although it is true that we might have some problems during the construction period when there will naturally be a large transient labor force here.

"We have heard, without official announcement, that Cominco will likely put in a rolling mill in addition to the smelter. This could well furnish the basis for a good many other secondary industries in this district."

J. E. McMynn, vice-president of Kimberley Chamber of Commerce: "It's a wonderful thing for Kimberley. It will give the town a lot more permanency.

"You can't spend $20 millions without affecting things, but housing growth should be gradual with the amount of housing now available.

"I can see more business for the commercial section of the town. This will probably mean more building, but we have the room for it.

"With a present population of 7000 in the Kimberley area, the 200 new jobs will likely mean a growth of at least 700 to 900 which can be taken care of nicely within the city limits without much expense for additional services."

BOOSTS CRANBROOK

Mayor R. E. Sang, Cranbrook: "This is the finest news in the world. It's just wonderful. With 200 Kimberley workmen now making their homes in Cranbrook we naturally expect that our town will get some of the increase when the new smelter gets into production.

"We have the facilities and the room, as well, for the secondary industries which will follow the smelter and rolling mill.

"The whole town is talking about it today. Cranbrook has doubled in size in the past ten years, but this is the biggest single boost we have had.

"Cranbrook is ready and waiting for things to start. We have a new subdivision already planned which will double the territory of the city and with our convenient rail facilities on the mainline we feel we are going to gain a lot from this new development."

"WONDERFUL NEWS"

G. L. Phillips, Kootenay division superintendent, Canadian Pacific Railway, Nelson: "We will require additional employees in the running trades, yard crews and terminal employees. Our Nelson shops are more than adequately staffed to handle any additional maintenance work this may cause.

"This is wonderful news for the Kootenays. It is a big step forward and just a start on what is coming in years ahead. With plenty of power and steel available there will be a heavy demand in the whole area from Castlegar to Nelson for sites for light industry along the waterfront."

E. Salvador of Creston, second vice-president of the Associated Boards of Trade and Chambers of Commerce of Southeastern British Columbia. "This is certainly going to do a lot for the economy of East and West Kootenay. It should encourage a secondary industry.

"The news that Cominco's decision to proceed with the smelter was partially because of the $3 per ton subsidy the B.C. government has offered is a sure sign that the provincial government is taking an active interest in business affairs.

"I feel Cominco should be congratulated on its initiative in taking a chance in this new field, and I feel the company should have the backing of all of us."

UNION HAPPY

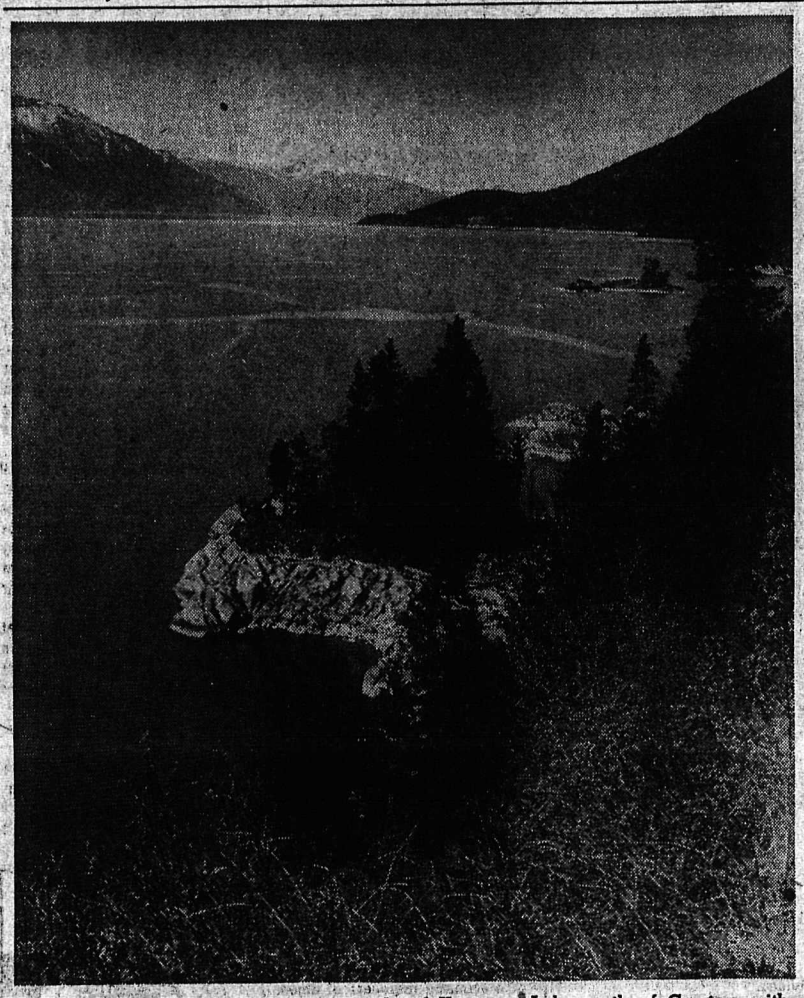
Jim (Red) Patterson, business manager of the Mine-Mill Union at Kimberley: "We are so happy about this news. It has been a long time coming. The district has been in what you might call a 'moratorium' up until now and we had almost given up hope.

"The Mine Mill Union expects to organize, the workers at the smelter when it gets going. It will mean a lot to our union to gain additional strength of numbers.

"Unless there are many men brought in from outside with Steelworkers Union affiliation we don't expect any trouble from them. And we are led to believe the company will give preference to local men. They followed that pattern in the fertilizer plant and we see no reason why they should do differently here. There are enough on the unemployment rolls here and in Fernie and Michel to fill up all the new job openings."

The Daily News was unable to contact officials of the Crows Nest Pass Coal Company but Robert Lilley of the United Mine Workers Union at Fernie expressed the hope the new smelter would mean a greater demand for coke from Michel. He had no idea how big a volume of this vital part of the smelting process would be required, but did think Michel's location would give that area an advantage in bidding for the supply of it to Kimberley. At the same time Mr. Lilley was cautious in calculating the number of men this might involve.

"Modern mining methods used here these days," he said, "could supply a pretty big tonnage without making very many new jobs.



SCENIC SHORELINE of the east side of Kootenay Lake north of Creston, with its coves and rocky promonitories, is much admired by travellers on the Southern transprovincial highway. Not far from here is "glass house" at Sanca, already being visited this season by numbers of tourists.—*Daily News photo by Leslie Holmes.*

EVENT OF MAY 16 and 17...

Even Fruit Trees Co-Operate For Creston Blossom Festival

CRESTON — Creston people and the fruits of their labor—the orchards and farms of this productive region, are about to put on their big show of the year.

The annual Lions Blossom Festival is more than a crowd-catching celebration: it is Creston's way of spreading word about its agricultural riches.

This year's festival May 15 and 16 should be one of the showiest yet.

According to Dr. Jack Wilks, one of the organizers, the fruit trees will be in full blossom to set a colorful scene for the 1959 Festival. And coming from him, that should be an accurate prognostication, because his role here with the federal department of agriculture is that of district plant pathologist.

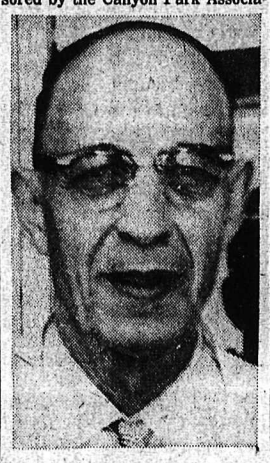
THOUSANDS COME

"We estimate that about 3000 people from other parts of the Kootenay and the United States come here during Festival time," he and community booster Alex Carruthers told The Daily News.

Cliff Carr, Lions president, is chairman of all preparations, and assisting is the total membership of about 30 men.

Invitations have gone out to government and municipal leaders such as Hon. W. D. Black, MLA for Nelson-Creston; Murray McFarlane, MP for Kootenay East; Mayor R. E. Sang of Cranbrook, a perennial Festival-comer; Mayor Clifford Swan of Kimberley, and Mayor T. S. Shorthouse of Nelson.

Four pretty girls are seeking to reign as blossom festival queen. They are Wilma Hawkey, sponsored by the Junior Chamber of Commerce; Leslie Bishop, sponsored by the Millrods; Bette Davis, sponsored by the Canyon Park Association, and Kathy Trevelyan, sponsored by the Minor Hockey Association and Creston Valley Advance.



CLIFF CARR
. . . festival chairman.

The winner is decided both on ticket sales and her personality. Each is required to make a two-minute speech, give a talent demonstration, and appear in an evening gown and sportswear. Judges from Bonner's Ferry will select this year's queen, who will be crowned by her predecessor, Joanne Brown.

The contest and queen ball with a 14-piece orchestra from Sandpoint, Idaho, will get the Festival under way May 15.

The afternoon of May 16 will be led off with a giant parade of floats and no fewer than six bands—from Sandpoint, Bonner's Ferry, Creston, Kimberley and Cranbrook.

K.B.D. Shows of Calgary have been engaged for the afternoon, bringing seven acts including ventriloquism, vocal selections, trapeze work and a five-piece orchestra.

A major attraction at night will be a concert by Sandpoint high school band and choir, much in demand at festivals in the Pacific Northwest.

Folk dancing, with entries from all parts of the Kootenays, is also scheduled for May 16.

Slocan Minister To Retire Soon

SLOCAN CITY — Many attended a service at the Presbyterian Church to hear Rev. D. A. McKellar deliver his last sermon in Slocan City.

The New Denver Presbyterian junior choir sang hymns and Emily Lowenberg of Slocan City gave a few selections on the accordion.

In his farewell talk, Mr. McKellar expressed appreciation of all that his friends had done for him and said that the "many fine friendships" which he had formed here would always be remembered.

After the service, tea was served, and a cake in the form of an open Bible, with an inscription, was cut. Before the guests left, they joined hands and sang "For He's a Jolly Good Fellow."

Mr. McKellar will be holding a farewell service in New Denver soon.

He will leave for Bradner, B.C., where he has a home and will live in retirement.

SAYS FRASER DIKES IN BEST CONDITION

CHILLIWACK (CP) — Labor Minister Wicks said here Fraser Valley dikes have "never been in such good condition." He said he and Agriculture Minister Steacy had made two inspections of the dikes in the last week and believed "real progress has been made in the past few days."

Cranbrook Man, Harry Hern Dies

CRANBROOK — Bricklayer and cement worker in Cranbrook district since 1915, Harry Hern died suddenly Sunday at his home on 14th Avenue. He was 71.

Born in Berkshire, England, he was a gamekeeper before coming to Canada and Winnipeg in 1912. He worked with a brother at construction there for three years, then bought a farm in Kootenay Orchard which he operated while working at his building trade. He worked for ten years at the Sullivan concentrator at Kimberley as a bricklayer and operator, but more recently had worked in Cranbrook. He was serving his fifth consecutive term as president of Senior Citizens' Association Council 11, Cranbrook.

Surviving him are his wife, Mary Ann, at their home; two sons, Frank at Willow River, B.C., and Arthur in Cranbrook; one daughter, Mrs. Charles Pippe, Cranbrook; 11 grandchildren, six brothers, James in Spokane and Percy in St. Catharine's, Ont., and four in England, and two sisters in England.

CPR Employee, H. Bradley Dies

CRANBROOK — A longtime resident, Herbert Arthur Bradley died in Lethbridge Saturday after a long illness.

He was born in Leicester, England, 57 years ago. His parents, Mr. and Mrs. William Bradley brought their family to Cranbrook in 1908. He grew up here and enlisted in the Canadian Army for service in the First World War. After demobilization he began his work as a railway trainman with the CPR, which he continued out of Cranbrook until he was transferred to Nelson seven years ago. For the past four years he had worked out of Lethbridge. He was a member of the Brotherhood of Railway Trainmen and for many years a member of the Cranbrook Liberal Association.

Surviving him are his wife, Margaret of Lethbridge, a daughter, Mrs. Ron Merkley of Vancouver, two grandchildren, one brother, Fred in Vancouver and two sisters, Mrs. Florence Smith of Vancouver and Mrs. Gertrude Wood of Cranbrook.

Forest Service Employee Names Newly-Created Lake

INVERMERE—Rogun Lake will be the name of the new 30-acre lake created on Salter Creek by Windermere District Rod and Gun Club.

The name, a contraction of rod and gun, was selected from 170 entries submitted in a lake-naming contest sponsored by the club. The winner is Neil McIntyre of the B.C. Forest Service staff of Invermere.

Clearing of the dam site, which has been under way for some time, is almost completed and work on the dam will begin shortly. Site of the new lake is eight miles from Invermere. It is planned as a recreational centre and will be stocked by the fish and game branch.

B.C. POWER Commission's new manager for the Nakusp power district is Jack Davies, above, who comes from Alert Bay where he also held a managerial position with the publicly-owned utility.

RETIRED MINER N. P. NIELSEN DIES, AGED 86

CRANBROOK—Niels Peter Nielsen, resident of a rest home here the past two years, died Sunday at St. Eugene Hospital at the age of 86 years. He settled in Kimberley in 1920 where he was a miner at the Sullivan mine for 20 years until retirement. He continued his home there until 1957.

He was born at Randers, Denmark, and was trained as baker before coming to Canada. He had homesteaded at Granum, Alta., before settling in Kimberley.

He is survived by three sons, N. P. Nielsen at Flint, Mich., John at New Westminster and Helmer at Marysville; two daughters, Mrs. Eva Ross at Bowser, B.C., and Mrs. Merritt Leask, Cranbrook; 22 grandchildren and 40 great-grandchildren.

Rev. Frank McPhee officiated at the funeral Tuesday at McPherson Funeral Chapel at Kimberley and burial was in Kimberley cemetery.

Scaling Classes Get Under Way

CRANBROOK — Twenty-three woods workers have enrolled for a series of weekly classes under way Mondays at Central School here under B. C. Forest Service sponsorship, in licensed scaling, with inspector of licences for Nelson Forest District, Frank Hill, as instructor.

The course will continue to late May and registrations are still being accepted. Basic requisition is a sound knowledge of arithmetic and some basic algebra. Registration in Cranbrook is lower than for the course last year.

Enrolment in Fernie at 43 men is more than double the number who took the classes there last year. They are held Tuesdays at the Fernie elementary high school and candidates are also being accepted there.

The course is preparatory to the annual examinations in late summer in which successful candidates qualify for licensing for this specialized woods work.

Tourist Group Named At Nakusp

NAKUSP — A tourist promotion committee headed by A. H. Kegel and Robert Roder was appointed at the last meeting of the Nakusp Chamber of Commerce.

Its first objective will be raising of funds for participation in issuing of a regional tourist folder, a project of the Associated Boards of Trade and Chambers of Commerce of Southeastern B.C.

H. A. Shannon of Trail, chairman of the Associated Boards' tourist and publicity committee, was guest speaker, talking on the potential of the region as an attraction for tourists. He was introduced by Harry Yolland.

Steel Comes to Kimberley

Today, all Kootenay, if not all of British Columbia, is elated by the long awaited announcement of the start of construction in this area of an iron and steel smelter. To the city of Kimberley and its neighboring villages of Marysville and Chapman Camp it must be tremendously welcome news. The good wishes of all the Kootenays to these communities and their residents will come from all quarters.

It is impossible to estimate the full force this new industry will exert upon the development of not only the Kootenays and British Columbia but also Western Canada. It has been the speculation of years and the hope of thousands of business people in the west, that steel production would be achieved in the west. It is now announced and is to be accomplished in 1961. Premier W. A. C. Bennett stated yesterday: Steel is basic. Steel is THE major metal of industry and from its production in this area we can rightly expect developments in secondary manufacturing industries.

British Columbia and Alberta are growing at a rate that will mean in a decade or two a market of size for manufactured goods. So the location of the iron and steel mills along with power, coal, limestone and coke of the Kootenay is a natural development which Premier Bennett predicts will be of tremendous importance to the industrial life of the province.

For the Kootenays the picture could not look brighter. Already highly industrialized, this area has seen, in a matter of weeks, the start of construction of a huge pulp mill and the announcement now of an iron and steel smelter at Kimberley. There is not a community in the Kootenays that will not benefit.

Much negotiation by the provincial government on this development has been indicated in the early announcements and congratulations are due to those negotiators who have brought about a satisfactory conclusion to the transactions. Undoubtedly, the Consolidated Mining and Smelting Company Ltd. has spent tremendous amounts of money, time and effort to develop the processes. Congratulations are in order for Cominco in this progressive move into a new field of industry. Congratulations too, to the communities of Kootenay, to the two hundred new employees who will be working at Kimberley and to the hundreds of new complementary employees in stores, trades and railways who will find jobs as a result of the new Kootenay industries.

Interpreting the News

By GEORGE KITCHEN
Canadian Press Staff Writer

With his own fellow-countrymen and the rest of the world looking on, Christian A. Herter this week meets the first great test of his abilities as secretary of state — the American foreign minister.

Now firmly established in the job once held by ailing John Foster Dulles, he arrives in Paris by air today and to try to co-ordinate with the foreign ministers of Britain and France Allied strategy for the forthcoming East-West talks on Berlin and the future of Germany.

His first task will be to help hammer out some acceptable degree of unity among the Western big three—Britain, France and the United States—before they meet with the Eastern ministers in Geneva May 11 in critical talks that may lead to a summer summit meeting.

The degree of success the West hopes to achieve at Geneva may well depend upon how well Herter and his British and French allies do their job at Paris.

In seeking a united front they will have to take into account the insistent views of the West German government, which stands fast on a firm policy of no concessions to Moscow in seeking a solution to the muddled problem of German reunification and European security.

While there is no real clash in Western viewpoints, major differences of opinion do exist.

Britain, for example, apparently feels there is a real chance of reaching a practical agreement with the Soviet Union—if both sides are willing to make concessions. France and West Germany seem to be holding out for firmness and rigidity. The U.S. is reported to lean towards rigidity, though willing to attempt to reach some meeting of minds with the Russians.

It will be up to Herter, representing the senior partner in the Western alliances, to attempt to reconcile those differences and bring the Allies as close to a common front as possible.

Whether or not he is successful, Herter will bear the brunt, again as the representative of the major Western power, of the west's presentation when the big four meet around the conference table in Geneva.

In the Paris talks, Britain's Foreign Secretary Selwyn Lloyd and France's Foreign Minister Maurice Couve de Murville may find the new U.S. secretary somewhat more fexible than his predecessor.

Herter long has opposed the sort of isolationism that governed American foreign policy between the two world wars and preached, instead, the doctrine of interdependence of the free world. He is said to feel that U.S. foreign policy, while it must necessarily be formed in Washington, should take into account Allied interests as well as American national interests.

Dulles, too, talked a great deal of interdependence but, in the pinches and in the practice of his own peculiar style of one-man diplomacy, he seemed often to disregard Allied views and chart his own course.

Gems of Thought

ART

Real art is illumination. . . . It adds stature to life.—Brooks Atkinson.

* * *

Art is like a border of flowers along the course of civilization.—Lincoln Steffens.

* * *

The object of art is to crystallize emotion into thought, and then fix it in form. —Francois Delsarte.

* * *

I would no more quarrel with a man because of his religion than I would because of his art.—Mary Baker Eddy.

* * *

Art is nothing more than the shadow of humanity.—Henry James.

F. B. Pearce. . . ...Writes

They say in the candy manufacturing plants in England that the newcomers are allowed to eat all they want, but eventually they grow tired of sweets and seldom touch them. That must be the policy of our educationists too.

The day my article on grammar was published I went down to the library and there were two of my former pupils doing their English. They had a book with at least 500 pages of fairly close print and when I asked them what they were doing they made faces and said, "Grammar." Then, in response to something I said, they complained that they had nouns and adjectives from grade six upwards.

Grammar to me is a simple thing and should not take more than two years to master, but our grammarians have created a nightmare for students by excessive repetition and elaboration. That seems to be the fashion in education—to leave nothing to the pupil and the individual. You find the same thing with the curriculum, a tedious and repetitious over-elaboration of simple things.

I am all in favor of teaching grammar in the schools, but not to the extent of making it an unpopular subject. Grammar is useful, but we can communicate with others without learning it, and a great many people do, though the quality of their English often leaves much to be desired.

But essentially English is not built on grammar and grammatical forms do not rule it as happens with other languages. It is because of this that English has so much beauty and so much accuracy and though it seems to be a language of great difficulty it is surprising how many people who were not born to it have made use of it successfully in writing.

Grammarians have done their best to keep everyone within what they consider the limits of good English, but without much success. New words and expressions are always creeping in. If they really enrich the language they stay; if not they perish, for English is too vital to put up with them.

There are many ways of expressing the same idea and when one of my former pupils said I should not say that I am getting deafer but that I am becoming more deaf, he may be right but that is not the way I would put it. I could have said I did not hear as well as I used to and then he could have criticized my use of the dangling preposition —if he knows what I mean, which I very much doubt.

The truth is that a great many things we learn in school are not worth remembering. Grammar serves its purpose if the student remembers that languages have rules. They won't break them very often in any case, unless they become writers, when accuracy in grammar is desirable, if not essential.

One of the reasons why schoolmen make much of grammar is their contention that no one can learn a modern language without learning its grammar so if you know English grammar you can learn to speak French, which isn't by any means true, because by the time you have mastered the grammar you no longer want to know French.

No one has ever paid any attention to what pupils like or dislike in school on the excellent theory that adults always know better than young people, but a good psychologist ought to be able to find better ways of teaching purely by a study of the dislikes of pupils.

After looking at the prescribed English book for high schools I can well understand that there is reason for their dislike.

Library Books

New books at the Nelson Municipal Library are as follows:

NON-FICTION

The Gold of Troy by Robert Payne; Elizabeth the Great, by Elizabeth Jenkins; The Complete Book of Knitting, by Elizabeth L. Mathieson; Instructions to Young Tennis Players, by Susan Noel; America's Garden Book, by James and Louise Bush-Brown.

FICTION

Victoria, by Evelyn Anthony; Lady L., by Romain Gary; The Crown and the Cross, by Frank Slaughter; The Captive and the Free, by Joyce Gary; Crescendo, by Phyllis Bently; The House Above the River, by Josephine Bell; Bonnie Jean, by James Barke; Cone of Silence, by David Beaty; One of the Crowd, by Philip Gibbs; The Bespoken Mile, by March Cost; Dear and Glorious Physician, by Taylor Caldwell.

It's Been Said

No disguise can long conceal love where it is, nor feign it where it is not.—Duc de la Rochefoucauld, French moralist.

Award $600,000 Contract For Nuclear Power Plant

BY JOHN E. BIRD
Canadian Press Staff Writer

OTTAWA (CP) — Atomic Energy of Canada Limited has awarded a $600,000 contract to Canadian General Electric Company Limited for the design study and development of a new-type nuclear power station suitable for use in the Canadian Arctic.

The Crown - owned company which operates Canada's atomic establishment at Chalk River, Ont., 135 miles northeast of Ottawa, said the new reactor will be known by the code name OCDRE—Organic-Cooled, Deuterium-moderated Reactor Experiment.

The announcement means that Canada is using two types of approaches in an attempt to develop atomic power plants which will produce electricity as cheaply as coal-burning terhamal stations.

Up to now the Chalk River establishment has been concentrating on what is known as a natural uranium-heavy water reactor. In the new approach an organic liquid, rather than heavy water, will be used to transfer heat from the uranium fuel to the steam generators.

URANIUM AS FUEL

However, heavy water still will be used as the moderator or control agent and the fuel will be natural uranium, of which Canada has abundant supplies. The moderator makes the atomic fission process possible.

"There has been a growing interest in the use of organic liquids as reactor coolants as they cost about 40 cents a pound, compared with $28 a pound for heavy water," the company said.

"A nuclear power station using an organic coolant might not only prove to be economic for Canadian nuclear power stations in general but also may prove to be particularly attractive in small and medium size stations in the more remote areas including some Arctic centres."

The company said that before an organic-cooled plant could be considered for installation in such locations, much work must be done in investigating new design problems and studying new materials and fuel costs.

The decision to proceed with the design study resulted from talks among members of the staffs of the northern affairs department, the Crown - owned Northern Canada Power Commission and Atomic Energy of Canada.

The northern affairs department is responsible for establishment and administration of government centres in the Arctic and is promoting the development of northern natural resources. Cheap electric power available in large quantities speed northern development.

RUNS POWER PLANT

The power commission constructs and operates conventional power plants at various centres in the Northwest Territories and the Yukon Territory.

The organic liquid proposed for OCDRE is a mixture of oil-like substances called polyphenyls. They consist of hydrogen and carbon atoms linked together.

Use of organic cooling for power reactors has for some time been a subject of study by the civilian atomic power department of General Electric at Peterborough, Ont. The company presented a description of a preliminary design for such a system at the second international conference on peaceful uses of atomic energy in Geneva last September.

Some features of organic cooling systems have been tested at Chalk River in the famed NRX reactor.

Fuel costs of atomic power stations are low compared with fuel costs for coal and oil - burning stations, but the capital costs of nuclear stations are higher.

"Organic coolants appear to offer means of reducing these capital costs," the company said. "Not only is there the saving in the cost of the heavy water coolant but also, because the organic liquid has a high boiling point, a low pressure system could be used in the reactor, thus saving the expense associated with the higher pressure system required for water-cooled reactors."

MAY RUN — Atoll, owned by Elkcam Stables, may run in Kentucky Derby. He recently won in the Swift and Gotham stakes but placed sixth in the Wood Memorial.

Lord Tweedsmuir Urges More U.K.-Canadian Trade

By DAVE OANCIA
Canadian Press Staff Writer

LONDON (CP) — Arctic fur trader says a distinctive Canadian taste is developing.

"To meet it is a challenge for British industry," Lord Tweedsmuir said Tuesday in an address to a luncheon meeting in honor of a 36-man business and goodwill mission sponsored by the Winnipeg Chamber of Commerce.

"It's different from our taste in Britain and different from tastes in the United States," said the son of one of Canada's governors-general.

Lord Tweedsmuir lived in Winnipeg for roughly six months in 1938 before he was posted to a trading post at Cape Dorset, Baffin Land, by the Hudson's Bay Company.

LOTS OF OPPORTUNITY

He told the gathering of about 300 there are plenty of opportunities for British exporters to sell much more to Canada at present without harming Canadian manufacturers.

He suggested Britain should make a greater effort to get a bigger share of the Canadian market now being supplied by United States exporters.

He urged British manufacturers to make a great effort to stage a show in either 1960 or 1961 in connection with the Canadian Exhibition in Toronto to make their goods known. This would provide an opportunity to small firms that cannot afford high promotional costs individually.

In addition, trade representatives should be sent to Canada and steps should be taken to make it possible for more Britons to obtain adequate funds to visit Canada.

RAPS CONTROLS

"Anything which prevents the free movement in the Commonwealth, particularly between Britain and Canada, is an extremely bad thing and I hope it will be removed," he said.

He was referring to stringent foreign exchange controls which make travel in dollar areas difficult for residents of the sterling area.

In introducing the speaker, J. S. Rodgerson, president of the Canadian Chamber of Commerce in Britain, hailed the visit of the Winnipeg mission.

"Visits such as this can do nothing but a great deal of good on both sides of the Atlantic."

W. Scott Nail, president of the Winnipeg Chamber of Commerce, said his group came "to see and listen and not to talk."

A tour of leading British factories has been arranged for the Winnipeg group, which arrived Monday. The mission includes representatives of the engineering, publishing, power, railway, banking, distilling and furniture industries.

Tape-Recorder Evidence Given In B.C. Court

VICTORIA (CP)—A conversation recorded secretly by police on a tape-recorder was admitted into evidence in an assize court trial Monday for the first time in British Columbia legal history.

The 45 - minute recording on on three tapes was entered in the court record after Mr. Justice Thomas Brown ruled it admissable based on a Manitoba court decision.

The dramatic decision Monday —believed the second such ruling in Canadian law — came during the trial of Reginal Simpson Everett of Vancouver on six counts of fraud and attempted fraud involving some $8,000.

Everett is accused of obtaining money from several persons who answered his newspaper advertisement seeking investors into a nut machine scheme.

Mr. Justice Brown heard only one of the tapes Monday. The other two were to be heard Tuesday.

Request to introduce the tapes by prosecutor Alan Bigelow was hotely contested by defence counsel Robert Harvey on the grounds that "obviously they do not represent the entire conversation, and there are portions inaudible."

Mr. Justice Brown said that "while I do not claim to have a clear knowledge of the law regarding this situation," he felt the recording would be valuable and should be heard.

Two Mayors To Open Coast Safety Week

VANCOUVER (CP)—Two mayors will open safety week in the forest industry next Monday by arriving at a breakfast meeting in a helicopter at the Workmen's Compensation Board building here. They are Mayor Tom Alsbury and New Westminster's Beth Wood. Both will fly over Fraser River mill operations before landing here.

U.K. Ministry Considers Nylon Busbies

LONDON (CP)—The ministry of supply is looking into the possibility of equipping Britain's guards regiments with nylon headgear, the House of Commons was told Monday.

W. J. Taylor, parliamentary secretary to the ministry, told a questioning member of Parliament investigators are seeking a suitable type of nylon fur to replace the celebrated bearskins worn by the guards on ceremonial occasions. But the researchers had run into difficult manufacturing problems.

Taylor's statement arose from questions asked in the House regarding the projeted bear hunt, led by the mayor of Timmins, Ont., to replenish the guards' stock of bearskins.

Arthur Moyle, a Labor MP, asked: "Will the minister (of supply) consult the officer commanding the guards and inform him that the Worcesters and the Royal Welch have achieved the highest degree of military fame without even the aid of a rabbit skin?"

Refused Sedation . . .

Died "Very Brave Man" Says Lawyer of Mantha

VANCOUVER (CP) — Tugboat worker Leo Anthony Mantha, 31, walked calmly past death row in nearby Oakalla prison early Tuesday and died on the gallows for the knife - slaying of seaman Aaron Jenkins, 23, of the Royal Canadian Navy.

Warden Hugh Christie said the trap was sprung at 12:08 a.m. (PDT) and Mantha was pronounced dead officially 11 minutes later.

The warden said Mantha did not request any sedation.

"BRAVE" DEATH

He died "a very brave man," said his lawyer, George Gregory of Victoria, who was in the death cell with him until 15 minutes before the execution.

Mantha was the second man to be hanged in British Columbia since July 16, 1957, when Gerald Eaton, 52, was executed for the brutal slaying of eight- year -old Carolynne Moore at Langley, B.C.

Mantha, whose last hope for a reprieve faded Monday by the arrival of a telegram from the office of Solicitor-General Leon Balcer at Ottawa, was convicted last Dec. 17 of fatally stabbing Jenkins in his barracks at HMCS Naden near Victoria.

Hope rose that his death sentence would be commuted when the death penalty imposed on Robert Chapman, 19, of Rosedale, B.C., who was to have hanged beside him, was commuted last Friday. Chapman was convicted of shooting his brother last October following a quarrel on the family farm.

Mantha's execution was originally scheduled for March 17 but a stay was granted when an appeal was heard. The appeal judges, however, unanimously rejected the appeal without leaving the bench.

Witnesses at his trial testified that Mantha, a native of Montreal, and Jenkins, who came from Codys, N.B., were homosexuals and were "going together." Jenkins had wanted to break off the relationship to marry a girl friend.

Other witnesses said the two men fought outside a Victoria Hotel on the night of the slaying last September. The prosecution said both went home but later Mantha drove to the navy barracks at Esquimalt, near Victoria, and stabbed his friend.

A psychiatrist told the court that Mantha had above average intelligence but because of an unhappy childhood "he was like a good car being driven with the brakes on."

Court Witness

VERNON (CP) — Mr. Justice J. O. Wilson Monday ordered a crown witness held in contempt of court after the witness was discovered to be intoxicated.

James Morrison was ordered to be held until Tuesday after two officers testified the witness was unsteady, had liquor on his breath and in their opinion "was under the influence of liquor."

Morrison had difficulty in answering questions, was incoherent and at times appeared unable to understand questions.

He was giving evidence in the trial of Joseph Basil Moran, charged with raping a mother of five children at nearby Lavington, B.C., May, 1956. The trial was adjourned.

Your Individual HOROSCOPE

By Frances Drake

Look in the section in which your birthday comes and find what your outlook is, according to the stars.

For Thursday, April 30, 1959

MARCH 21 to APRIL 20 (Aries) — There should be no barriers between you and accomplishment now, but avoid needless delays and inconsistencies. Start determinedly and keep up the good effort even if you encounter opposition.

APRIL 21 to MAY 21 (Taurus)— Sensibly aggressive action favored on all business and home and active fronts. But do be systematic! Artistic pursuits also favored by good Venus rays.

MAY 22 to JUNE 21 (Gemini)— With steady-going, ambitious effort you can gain more than you can by scattering your energies. The steady effort is the difference that matters. A good day for trying!

JUNE 22 to JULY 23 (Cancer)— If true to your innate characteristics, you can produce top results now. Use clever maneuvers but also adhere to honesty, and make this one big fine day in every way.

JULY 24 to AUGUST 23 (Leo)— Encouraging rays! The proper use of your God-given gifts will bring true achievement and happy hours. Romance, marriage, social affairs all favored if thoughtfully managed.

AUGUST 24 to SEPTEMBER 23 (Virgo) — Your planetary aspects indicate that, with a little extra effort and precision, things will be most satisfying. Enthusiasm will help to garner results.

SEPTEMBER 24 to OCTOBER 23 (Libra) — Some new fields may divert your attention. Don't neglect your duties, obligations, however. Digest what is before you, make plans carefully; then move promptly and accurately.

OCTOBER 24 to NOVEMBER 22 (Scorpio) — Exercise your intellectual facilities without strain; don't waste time on non-essentials. You can achieve more now than you think. The devices and means you employ will determine the extent of your success. Curb emotion.

NOVEMBER 23 to DECEMBER 21 (Sagittarius) — Several exhilarating and beneficial possibilities. A day for taking advantage of good things quickly. Some obstacles could retard progress but smart handling can eliminate them.

DECEMBER 22 to JANUARY 20 (Capricorn) — As colloquially said, "it's a breeze" for you practical and alert folk. Using your natural caution and economical instincts properly, you can make this a record good day.

JANUARY 21 to FEBRUARY 19 (Aquarius) — Directness in purpose, thoroughness and understanding will carry you far. Don't scatter efforts nor be hesitant about putting forward good plans or ideas. Pitch in!

FEBRUARY 20 to MARCH 20 (Pisces) — Don't just think it over; philosophize. Act, and act NOW. Concentrate on the issues at hand and, with foresight, eliminate errors, waste motion. Good influences!

YOU BORN TODAY have retentive memories, are studious, practical-minded, loyal, dependable. You can accomplish in a big way, depending upon your own initiative and ambition. You have unusual talents and ability; can create or improve upon others' creations or work; are a natural builder, can do very well with the soil and handling animals; are a good provider for family, and make devoted and loyal lifemates and parents. You may be too fond of luxuries and pleasures. Control these tendencies lest they defeat the success and happiness you can enjoy. Birthdate: Sir John Lubbock, English archeologist, scientist, author.

TODAY'S BIBLE THOUGHT

"The Spirit of Him that raised up Christ Jesus dwelleth in you." —Rom. viii. 2.

The faith of Jesus has become the faith of millions and millions of men. From this torch has sprung a vast conflagration.—Amiel.

Aunt Het

I can always tell when Pa is readin' a book to improve his mind. He starts noddin' on the second page.

About the Town

Barrie Huxtable, who attends University of British Columbia, is visiting her mother, Mrs. R. McIndoe, 205 Victoria Street. Miss Huxtable is a student teacher at Central School for three weeks' practical training.

* * *

Well-known in Nelson, Mr. and Mrs. Ted Youngberg of Lulu Island, near Vancouver, were recent guests of Mrs. Youngberg's brother and sister-in-law, Mr. and Mrs. George R. Scott, 823 Nelson Avenue, and parents, Mr. and Mrs. George Scott of Longbeach. Mr. and Mrs. Youngberg have now left for England, flying to Montreal by TCA and from there to Manchester, England. They will return after two months' visit.

Mr. and Mrs. Scott have also had as weekend guests Mr. Scott's brother and sister-in-law, Mr. and Mrs. Verdun Scott of Kimberley.

* * *

Mr. and Mrs. W. E. Rusnack of the North Shore have as guest their son Ronald of Victoria College, who is taking a class at South Nelson School to complete his practical teachers' training.

* * *

W. M. (Monty) Montgomery of Langruth, Manitoba, has returned after spending a week in Nelson visiting Mrs. Montgomery at the Lakeside Auto Court.

For Those Who Still Have Apples on Hand

Two recipes for those lucky enough to still have a supply of apples on hand are these for applesauce date loaf and apple crisp.

Some unsung cook had a wonderful idea when she borrowed the crumbly topping from an old-fashioned German coffee cake and sprinkled it over apples to make what is now Canada's favorite baked dessert. The Germans called it Kuchen, but we know it best as apple crisp.

APPLE CRISP:

6 Winesap apples
½ cup sugar
½ teaspoon cinnamon
¼ teaspoon cloves
2 teaspoons lemon juice
½ cup brown sugar
¾ cup flour
⅛ teaspoon salt
6 tablespoons butter
¼ cup chopped nuts

Slice peeled apples into bowl. Add sugar, spices and lemon juice. Mix lightly and turn into greased baking dish. Combine remaining ingredients to a crumbly consistency, sprinkle over apples. Bake in moderate oven 350 F. about 45 minutes or until apples are tender and crust is lightly browned.

Whether in a jellied or tossed salad, fresh Winesap apples are the fruit that give sparkle to spring meals. Remember, Winesaps store better than any known variety, so use these apples plentifully with assurance their flavor is still orchard fresh, their flesh unmarred by winter storage ills.

One of the many easy ways to use apples in salad is this delicious spring tonic. Serve it with a soup and salad luncheon, or with cold meat slices.

APPLESAUCE DATE LOAF:

1 cup chopped dates
½ cup chopped walnuts
2 cups sifted all-purpose flour
1 teaspoon baking soda
1¼ teaspoons baking powder
1¼ teaspoons cinnamon
½ teaspoon cloves
½ teaspoon salt
½ cup shortening
1 cup sugar
1 teaspoon vanilla
2 eggs
2 cups homemade applesauce

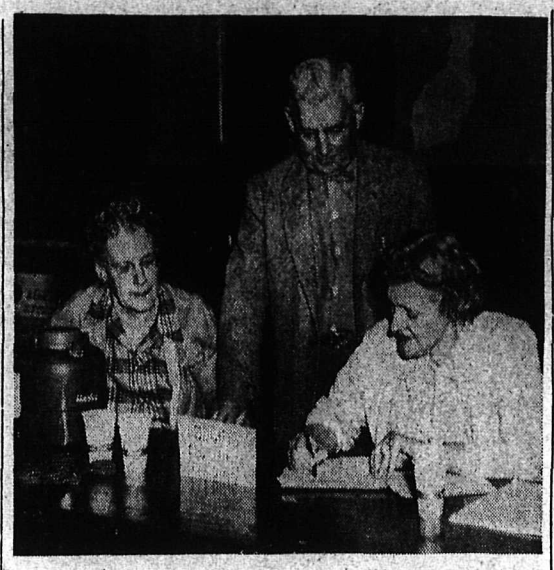
Sift dry ingredients. Sprinkle 3 tablespoons through dates and nuts. Cream shortening, add sugar gradually, beating until light and fluffy. Add vanilla and beaten eggs. Stir about one-third of the flour mixture into batter, add half the applesauce. Repeat, ending with flour. Add date mixture. Then spread evenly in greased 9 x 5-inch loaf pan. Bake in moderate oven (350 F) about 70 minutes.

TORNADO LIFTS ROOFS

CLINTON, Ark. (AP)—A tornado passed over Clinton Monday night blowing roofs off several homes and causing widespread minor damage. Electric power and telephone lines were knocked out. No injuries were reported.

Marriage Announcement

Mrs. Pauline Miller, 711 Stanley Street, Nelson, B.C., announces the marriage of her daughter Jane, to Norman W. R. Macleod, son of Mrs. Norman S. Macleod, and the late Mr. Norman S. Macleod, Calgary, Alta., formerly of this city.



CIVIL DEFENCE EXERCISES in the welfare section of the Nelson Civil Defence organization Friday were carried out by Mrs. E. H. Edgar, left, and Mrs. A. L. Stevens, right. Looking on is J. A. Wilson, Civil Defence coordinator for the West Kootenay. Mrs. Edgar and Mrs. Stevens theoretically listed welfare supplies for evacuees in "Exercise Co-operation Three", a national test exercise.—*Daily News photo by Gerry Stevens.*

Successful Tea Held In Sacred Heart Hall

A successful spring tea was held Monday afternoon in the Sacred Heart parish hall, sponsored by members of the Ukrainian Catholic Women's League of the parish.

Guests were received at the door by president Mrs. D. Bachynski.

Spring flowers in vases resembling daffodil blooms centred the tea tables, which were arranged throughout the hall.

Mrs. J. Ludwig, convener of the tea, was assisted by serviteurs Mrs. E. Kashluba, Mrs. R. Mills, and Mrs. D. Malinowski. Sewing table sales were in charge of Mrs. J. Nagy and Mrs. P. Babiy. The home-cooking counter was looked after by Mrs. R. Bachynski, assisted by Mrs. F. Apostoliuk, who also conducted a cake contest.

Kitchen duties — preparing tea, filling plates and handling dishes —were directed by Mrs. A. Lobay, assisted by Mrs. N. Caruk.

Mrs. M. Hnatiuk was in charge of the tea tickets and contest.

Royalty Co-Operates With Photographer

By LES HOLROYD
Canadian Press Staff Writer

TORONTO (CP) — The amusing story of how Queen Elizabeth had her picture taken in her stocking feet was told Tuesday by Toronto photographer Donald McKague.

Mr. McKague, 37, did a series of photographs of the Queen and Prince Philip before last Christmas under a commission from the Canadian government.

One of the pictures, with the Queen and Prince Philip back to back, was among those Mr. McKague suggested in a number of sketches he submitted for their approval.

HEIGHT PROBLEM

When he came to shoot the picture during the sitting at Buckingham Palace he discovered that the difference in heights between the royal couple was too great. So the Queen stood on a low platform while Prince Philip stood on the floor. This made the prince lower than the Queen."

So the Prince and Mr. McKague looked around the palace and found a two-by-four piece of lumber which had been left behind by workmen who had been building sets for some of the other photographs. The prince stood on this but he was still too low.

The Queen volunteered to remove her shoes. The problem was solved as Prince Philip's head came just above the Queen's.

Mr. McKague said he suggested the back-to-back shot because he wanted to get both of them in profile. He said in an interview that he thought it might be of some future use for a coin or plaque.

CAUSED MOST TALK

The shot was among those accepted by the Queen. Mr. McKague said he believed there were others she liked better but she accepted both the color and black and white versions of the picture. And "it caused the most talk" in palace circles.

Mr. McKague said his four-day stay in the palace was a "delightful" experience and he met with no stiff restrictions or awkward moments.

He had 1½ hours in which to take his pictures and had carefully chosen the locations and poses beforehand. All arrangements for lights were also made in advance.

Mr. McKague said there was no question from the royal couple about the poses or locations he picked.

A list of between 25 and 30 suggestions he made to the Queen as to choice of dress and jewelry was fully complied with. In fact, the Queen asked him to help her select the dress she wore in an informal pose.

PRINCE COMPLIED

A similar list submitted to Prince Philip was returned to him with the word "certainly" written across it in the prince's handwriting.

A photographer for 10 years since being discharged from the Canadian Army, Mr. McKague was chosen from a list of Canadian photographers by the federal government. He said he believed he was picked on the basis of some of his other portraits and on the recommendation of magazine and newspaper editors he has worked for.

The sketches of suggested poses came easy to him for he studied portrait painting before making the switch to photography. He said he always uses sketches before taking an important portrait.

Class Adds $20 To Junior Red Cross Funds

Junior Red Cross activities of just one class in Central School have added the sum of $20 to Junior Red Cross funds which in the past year have been used for purchase of equipment for a ward in the Kootenay Lake General Hospital, among other things.

Pupils of Division 7 provided homemade candy for sale and displays of planes, cars, boats, horses, dogs and dolls — all models. The various areas of interest were visited by customers from other rooms. Candy sales were conducted from boxes carried around by Red Cross presonnel, who had also made the receptacles.

President of the Division 7 organization is Ken McBride, vice president is Ian King and second vice president is Janet Hart. Secretary is Ricky Wallin, treasurer is Carole Stewart, and converers are Ronald Holgerson, Shelly Cox and Louise Towler. Miss Greta Curwin is teacher of Division 7.

Nelson Couple Feted On 40th Anniversary

Forty years of married life were marked by Mr. and Mrs. Louis Coletti Sunday when 30 friends and family members honored them at an anniversay dinner party held at their home, 917 Fourth Street.

Bouquets of flowers and an anniversay cake in the shape of a wedding bell emphisized the festive occasion. A special guest was Mrs. N. Maglio, Mrs. Coletti's mother who left her home for the first time in months to celebrate the event with her son-in-law and daughter.

During the evening, family members presented Mr. and Mrs. Coletti with a coffee table and a pair of lamps.

Mr. and Mrs. Coletti were married in the Cathedral of Mary Immaculate in April, 1919 by Rev. John Althoff. They lived on Vancouver Island for a few years following their marriage and returned to Nelson in 1926, making their home at 1814 Ward Street until moving to their present home last year

They have one son and four daughters — George Coletti, who lives with his family across the street from his parents; Mrs. Eric (Louise) Thast and Mrs. J. E. (Rita) McGovern, both of Nelson; Mrs. Thomas (Marie) Murphy of Riondel and Loretta (Sister M. Lucina) of Seattle.

Out of town guests at the anniversary festivity were Mr. and Mrs. Thomas Murphy of Riondel and Mrs. Thomas Murphy, Sr., of Kimberley; Mr. and Mrs. Roland Buchignani and Carol, Mr. and Mrs. Charles Catalano and Mrs. V. Poscente, all of Trail. Mrs. Buchignani and Mrs. Catalano are Mrs. Coletti's sisters and Mrs. Poscente is Mrs. Coletti's niece.

Dress Up With Marian Martin

Printed Pattern

WEEK'S SEWING BUY

Slimming as a diet! The simple lines, graceful gored skirt are so-o flattering to the larger figure. For breezy days, add smart, scalloped bolero.

Printed Pattern 9058: Women's Sizes 36, 38, 40, 42, 44, 46, 48. Size 36 dress takes 4½ yards 35-inch fabric; jacket 1⅝ yards.

Printed directions on each pattern part. Easier, accurate.

Send FIFTY CENTS (50 cents) in coins (stamps cannot be accepted) for this pattern. Please print plainly SIZE, NAME, ADDRESS, STYLE NUMBER.

Send your order to MARIAN MARTIN, NDN, 60 Front St., W., Toronto. Ont.

Slocan City

SLOCAN CITY — Mrs. Howard Parker, Sr., and her daughter, Mrs. William Newton, of Langley, B.C., have returned for a short stay.

Mr. and Mrs. H. M. Parker of Enderby have returned after visiting friends and relatives here. Mr. Parker, on the teaching staff of an Enderby school, was a former high school teacher here. Mrs. Smedbol accompanied them on their return to Enderby where she will spend a few months. En route Mrs. Smedbol will visit Mr. and Mrs. R. Anderson, formerly of Slocan City, at Grand Forks.

INVENTED INCUBATOR

CLEVELAND (AP) — Gordon Armstrong, 69, inventor of the first incubator for prematurely-born babies, died of a heart attack Monday.

GRADUATION NIGHT for night school square dance classes was held for "Gingham Swinghams" in the Junior High School auditorium Friday night complete with "mortar boards" and dunce caps. Dance clubs from all over the Kootenay district attended the graduation night. Shown in the picture are, left to right, Mrs. G. F. Hartridge, Mr. Hartridge, B. B. Crawford, who presented the "caps", Mrs. J. G. James and Mr. James, instructors of the group, while in front are A. F. Russell and R. A. Rutherglen, who need a corner in which to sit.

WI Arts and Crafts Group to Learn Copper Tooling

HARROP — The Women's Institute arts and crafts group will learn copper tooling under direction of Mrs. Neil C. McLeod of Procter, it was learned at a meeting of the Harrop and District Institute at the home of Mrs. Joan McNown.

The card party held in March was a success, it was learned during committee reports. A donation will be sent to the Nelson branch of the B. C. Division of the Canadian Cancer Society.

Interest was shown in attending the WI convention to be held in Nelson in May. The annual plant sale will also be held in May at Miss Grant's cabin.

The general fund was added to from proceeds of the "Bring and Buy" table.

SAYING GOODBYE after a weekend of social activity in Nelson, Spokane Bethel No. 60, Job's Daughters, were accompanied to the bus by their hostesses, Nelson Bethel No. 10. The event marked the first social visit of the Spokane group to Nelson. Pictured at the bus are: Marshal Sue Hendricks of Spokane Bethel 60, Honored Queen Alma Calbick of Nelson Bethel 10 and Honored Queen Joanne Hughes of Spokane.

Now that spring has arrived and summer is just around the corner you will be thinking in terms of a new hat. A hat is essential to be well dressed and fancy straws combined with fabrics are popular this year. For the new bouffant hairdos the white strawcloth and black grosgrain ribbon is very becoming. A hat that can go anywhere is the smart featherweight turban, with satin and strawcloth dots strewn about the veiling.

Get this "Trusty Crusty" PIE CRUST MAKER

Yours for ONLY 50¢ and one Quaker Flour Guarantee Certificate

- Makes perfect size crust for 9 or 9½ inch pans!
- No rolling pin to wash . . . dough will not stick to rolling pin.
- No pastry cloth necessary!
- Economical! No dough is wasted . . . no mess or fuss.
- Use with all pie dough recipes!
- Speeds baking! No ragged edges to trim . . . no re-rolling of dough necessary!

It's easy to use!

Place your pie dough inside the zippered plastic bag and roll until the dough evenly reaches the edges of the bag. You'll get a perfect pie crust every time!

Send 50¢ and a guarantee certificate from any package of Quaker Flour to The Quaker Oats Company of Canada Limited, Peterborough, Ontario.

Silent World at Relay Posts Yet They're Message-Laden

Have you ever stood in a room where 360 people were carrying on 180 two-way conversations and at the same time had the TV tuned in to the Stanley Cup hockey broadcast from Maple Leaf Gardens in Toronto?

Bedlam, you say?

There are 13 such rooms in B.C., and if you entered one at such a time, the loudest thing you'd hear would be the gentle hum of a heating fan.

And you wouldn't be deaf, either.

You'd be entering a world of electronics and radio, of microwaves and amplifiers, and you'd be in a radio relay station of the Trans-Canada microwave system.

Most likely you'd be perched on a mountain top somewhere in southern British Columbia, but in the winter-time, the "southern" part of the description would do you little good as far as warmth is concerned, because most of the relay stations are more than a mile high. Inside you'd be fine, but outside it could be 40 degrees below.

What's it like in one of these mystic "mazes" where technicians deal with conversations they can't hear and TV programs they can't see?

Before you can see what it's like inside the building, you have to get to it, and this can be something of a problem. All stations have a common problem — isolation. In winter, isolation is compounded by snow — in summer, by dust, and in between by mud.

Take the stations which are under the supervision of the "alarm center" in Nelson.

Starting at Anarchist Mountain, 17 miles up and out of Oliver, the signal jumps to a relay station at Phoenix, which is quite accessible, being only a few hundred yards from the rejuvenated mining town.

Then comes the mile-high Santa Rosa station, located on the "Cascades" first summit out of Grand Forks. Moving east, the 7050 foot Salmo site is the "grand-daddy" of all access problems (a slight misnomer because it's 18 tough miles from Salmo). After Salmo comes Creston, a mere 6790 feet up, at the Thompson Lookout. The Moyie site is next, 6700 feet above the lake, again near a forestry lookout. The last B.C. site is on Morrissey Ridge, a 7000 foot razor-back that required 13 miles of tortuous mountain road construction from Fernie.

The three eastern sites, Fernie, Moyie and Creston, are served from the adjoining towns by regular maintenance men who go to work by four-wheel drive truck, and during snow-time, in a peculiar vehicle known as a Sno-Cat.

LIKE RIDING DC-3

Roland Robinson, the Creston maintenance man, says that riding in a Sno-Cat is like riding in a DC-3, because of the peculiar motion to which a driver must become accustomed.

The Sno-Cat is a four-pontooned vehicle, each pontoon consisting of a continuous track-type tread, with more than 500 little ice and snow cutting grips. The vehicle will climb or move across an icy slope of 30 or 40 degrees, or pass over deep, powdery snow without trouble. Although the reliability of the vehicle has been proven, with Robinson and his fellow maintenance men as living proof, one's first ride in a Sno-Cat is, to say the least, a disconcerting experience.

The cab, suspended on a fore-and-aft axis, emphasises every tilt of the pontoons. If the pontoons are on a 15 degree slope, the cab leans over about 30. On an open mountainside, with nothing (except window glass) between himself and a seemingly clear run to the bottom of the mountain, the passenger would be forgiven a queasy stomach.

But the maintenance men make the trip nearly every day, in sunshine (rare), snow-storms (frequent) or misty clouds (nearly always).

But Salmo, as mentioned earlier, is the grand-daddy of access problems. Upon leaving the Salmo-Nelway highway at the new Salmo-Creston cutoff, the unwary visitor finds himself on a nicely graded but unpaved bit of new highway.

This is a snare and a delusion.

Scarcely four miles in to the bush, the highway builders stopped, and the cat-drivers took over. Bob Rotter of Salmo pushed a tote-road through to Creston during the war, and for 12 long miles the microwave visitor follows the winding trail of a bull-dozer. Even this is "good road" compared to what follows.

At the summit of the tote-road, near the head of Stag Leap Creek, stands a small camp building, a woodshed and a garage. This is a transfer point. In winter, this is as far as a four-wheel drive truck will go, even following the bull-dozer snow-plough.

Three and a half miles, innumerable switch-backs and 2500 feet in altitude now separate the visitor (and, of course, the maintenance crews) from the microwave station.

2 MILES AN HOUR

To this "lower camp," the trip takes the snow-plough operator a paltry six or seven hours. He's covered 12 miles from the highway at an average speed of under two miles an hour.

The next three and a half miles will take at least 18 hours (and has taken as much as 38 hours) of continuous backing and shoving, clearing and scraping by a 32-ton D-8 Caterpillar, operating on the edge of sheer 500 foot cliffs.

Needless to say, the road is not kept open all the time. It is ploughed only twice a month, to allow the maintenance shift to change. As the roar of the caterpillar leaving the station is muffled by the expanses of cloud and white snow, the newly-arrived maintenance man and his helper know they're there for at least two weeks.

Their only contact with the outside is by means of a radio system which carries telephone circuits and alarms to the control center in the Nelson telephone building. The microwave system which it is their job to care for is simply an enclosed highway for long distance calls, and television programs which they know are there, but which they can't see or hear.

This is the room where 180 telephone conversations and something like the Stanley Cup hockey finals make less noise than a small heating fan.

The actual maintenance work performed by the technicians — once they reach the station — is carefully cordinated right across the province, so that a man at each site is performing the same function at the same time.

Some tasks are performed weekly, some monthly, and some on a quarterly basis.

For example, each Monday, pilot cells are checked in each bank of batteries, which are constantly kept up to charge by commercial power or diesel generators and rectifiers. Specific gravity and voltage checks of these pilot cells give an accurate picture of the batteries' performance, but every three months each and every cell is checked individually.

WEEKLY TEST

Every Friday, the station is switched over deliberately onto emergency power, and the diesel generator is run under full load conditions for one hour.

Other "routines" are performed monthly. One week of the month is set aside to check each of the microwave radio equipment bays. Tube tests, alignments checks and other intricate routines are gone through on each of six channels. The "routining" of one channel takes two to three hours, and since it must be done before the network programming begins, the work-day is somewhat limited on this phase of the maintenance.

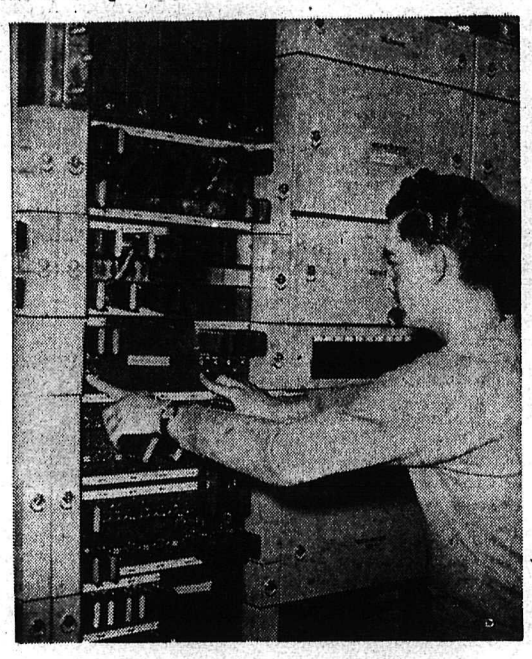
Local conditions account for some variations to the systematic maintenance. For example, the men who have Sno-Cats must spend some time each week greasing, checking and otherwise making sure that their vehicles are in top operating condition. This is all important, because quite literally their lives depend on the dependability of their machines. One night stranded on an open mountainside in 30 below temperatures is unpleasant, to say the least.

During the summer, supervision of road maintenance is equally important. Culverts washed out by spring runoff must be replaced, new ones built. Ditches must be cleaned to make sure that there is a road at all, for, given the chance, nature will soon rid the mountainsides of roads through slides and cave-ins.

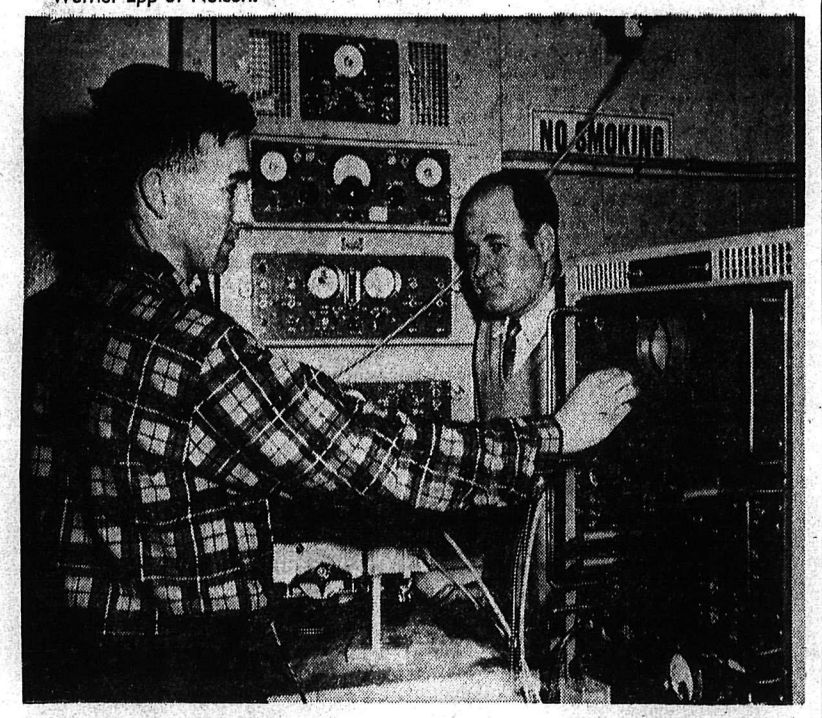
Another feature of the maintenance man's job is to read the power meter on the side of the building, so the power company can bill the telephone company. It would be a long, precarious hike for a meter reader to visit the station, and he relies on the honesty of the maintenance man.

One feature writer, at the time of the opening of the system in July, 1958, started his story with the lead "The three-year battle between man and nature, has been won — by man . . ."

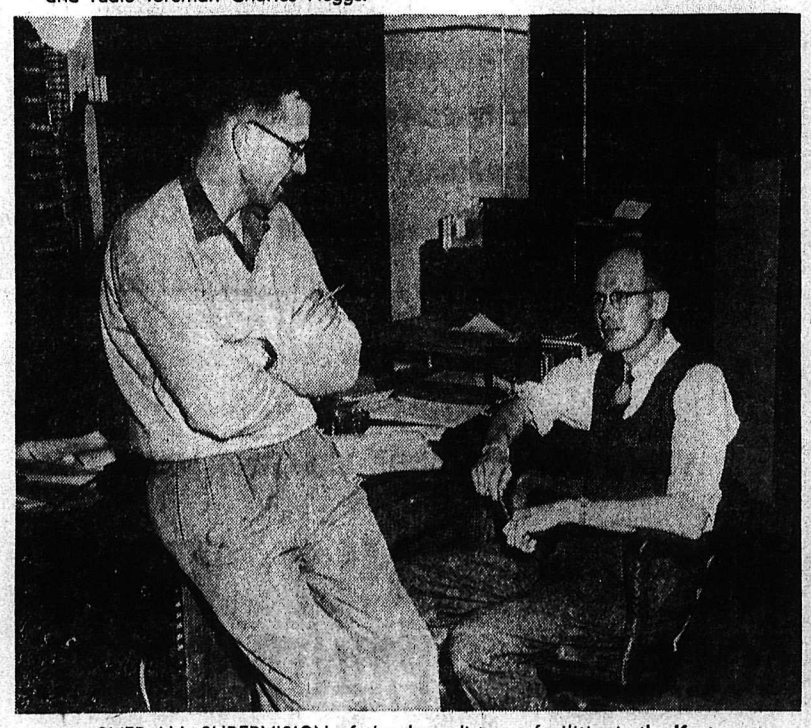
This is to assure him that, after just one winter of experience, the maintenance crews think the battle is far from won. It's still going on.



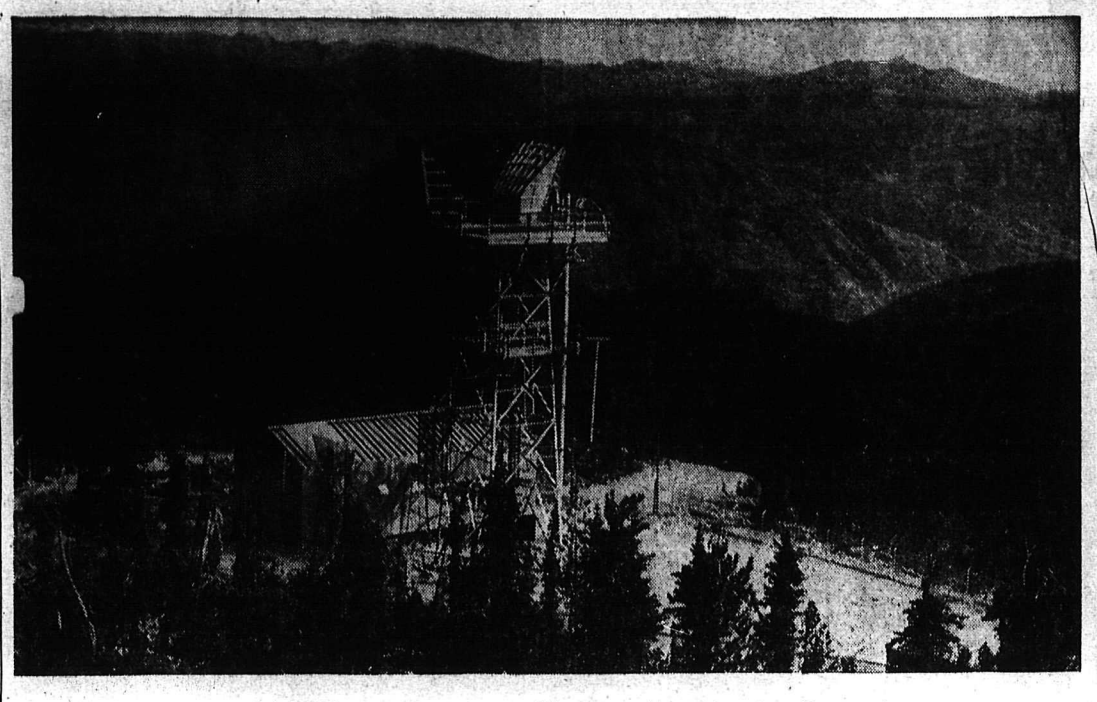
ONE OF MEN who put in two-week stint on maintenance at the Salmo microwave site is Werner Epp of Nelson.



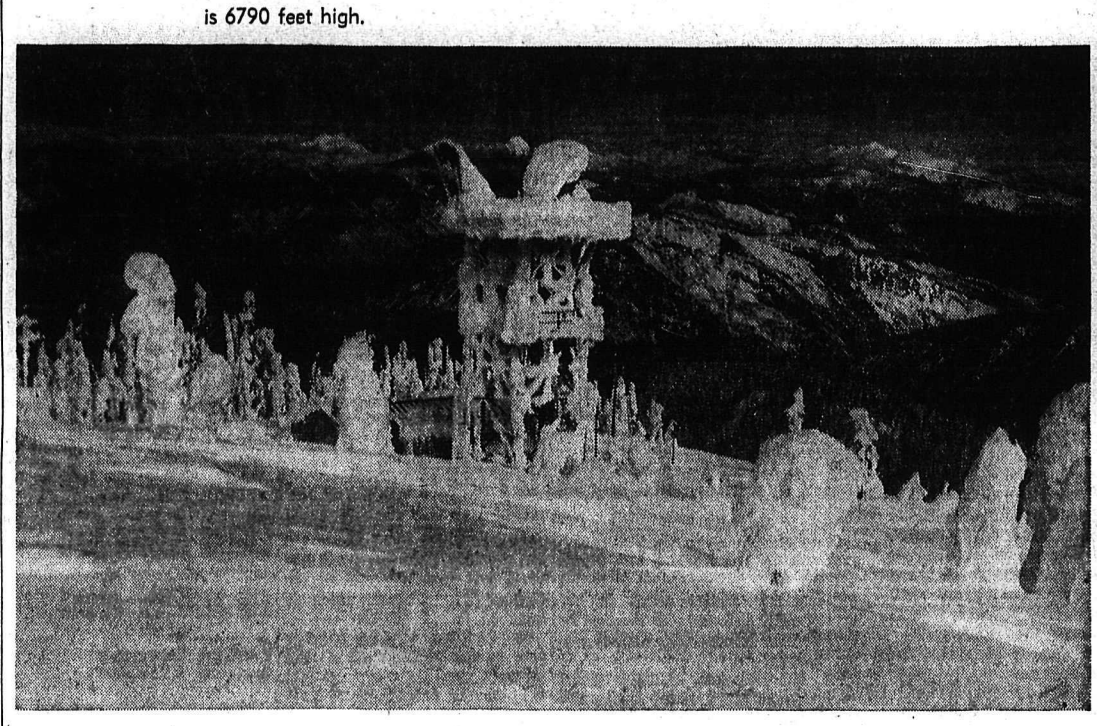
IN EASTERN PORTION of the B.C. microwave system, two of the men responsible for operation of the equipment are technician Gordon Caldwell and radio foreman Charles Heggs.



OVER-ALL SUPERVISION of the long distance facilities in the Kootenays is responsibility of Alan (Slim) Kemp, right, talking to Bud Whitfield who is in charge of the toll test board. Both are of Nelson.



LOFTY microwave site on Thompson Mountain near Creston is pictured here in summer. This isolated radio relay station, one in a chain, is 6790 feet high.



DRAMATIC under this mantle of snow, this is the same microwave site near Creston in winter. Stations are served at this time of year by maintenance men travelling in peculiar vehicles known as Sno-Cats.

Johansson Figures London Has No Chance

NEW YORK (AP) — Ingemar Johansson of Sweden, surrounded by his family and advisers, stretched out in his plush midtown hotel suite and said he'd like to have one thing understood.

"If I didn't think I had a chance of beating Floyd Patterson for the heavyweight championship, I wouldn't be here now.

"I have a good right hand and a good left one, too. It could be I might beat Patterson with either."

Johansson, European heavyweight champion from Sweden, was talking Monday of his fight with Patterson for the title June 25 at Yankee Stadium. Patterson must first dispose of Brian London of England in Indianapolis Friday. Johansson doesn't think London has a chance.

BROTHERS CONFIDENT

Johansson was backed up by his two brothers, Henry and Al.

"I am not too impressed by Patterson," observed Henry. He doesn't look like any superman to me."

Sniffed Al: "I saw movies of Patterson's fight with Pete Rademacher. I think Ingy hits harder than he. Furthermore, Ingy can hit just as hard in the last round as the first. From what I saw in the movie, Patterson can be hit."

Sitting close by was Johansson's fiancee, Birgit Lundgren. She serves as his secretary.

A fighter with a secretary?

Well, Johansson is more than a fighter. He has a fishing boat business and owns four bulldozers, a couple of caterpillars and two trucks that are being used to build an athletic field in his native Goteborg.

Pay TV "Nearer Than You Think"

TORONTO (CP) — President Clarence Campbell of the National Hockey League has advised sports fans to relax and enjoy those sports spectacles on television because "pay TV may be closer than you think."

Campbell, in an address Monday to the Toronto Metropolitan Home Builders' Association, said increasing production costs in the televising of sport might well lead to susbscription viewing in the near future.

"Closed - circuit television may be the final answer to the problem of costs which neither the sponsor nor the Canadian taxpayer is willing to pay," he said.

The amount the sponsors are able to pay was reaching its limit.

On sports trends in general, Campbell praised the NHL policy of what he called trying to maintain an even balance of skill between teams. Uncertainty as to the result of games would produce a greater interest in the skill of the teams rather than victory at all costs.

"Today, most advance publicity is devoted not to the skill of the participants, but to the prospects of victory. Reports of games are concerned not with what happened but with why it happened. If the home team loses, the coach must explain why he failed to produce the victory promised by the promoters."

Braves Whip Petes 5-2 To Lead Cup Series 2-1

WINNIPEG (CP) — Winnipeg Braves blew a 2-0 lead early in the third period Tuesday night then came back for a 5-2 victory over Peterborough Petes in the third game of the Memorial Cup hockey final. Braves now lead the best of seven series 2-1.

The hard-checking Braves took a 2-0 lead in the first period, nursed it through the scoreless second, then rebounded for three straight counters after the desperate Petes, showing their first signs of life, had tied the score.

Laurie Langrell and Captain Wayne Larkin paced the Braves with two goals apiece. It was the third consecutive game in which Langrell had scored twice. Al LeBlanc got the other Winnipeg goal on the nicest piece of stick-handling in the series so far.

Bob Rivard and Wayne Boddy were the Peterborough marksmen.

A crowd of 7,939 watched the Braves score their second straight 5-2 win after dropping the first contest here last Friday night. Fourth game will be played at the Winnipeg Arena tonight, with the fifth contest at Brandon Friday night.

TEMPERS FLARED

Tempers flared early in the game as the players continued feuds from the second match. Four majors and a minor were handed out in the skirmish at 7:46 of the first period. Braves' Larkin and Don Atamanchuk and Petes' Barclay Plager and Wayne Connelly took five minutes apiece, while Chuck Hamilton of the Petes was assessed a minor. After that the teams stuck to hockey and only four minors resulted in the last two periods.

Braves looked like easy winners for the first 40 minutes as the forwards checked hard both ways, the defence controlled the play back of their blueline, and goalkeeper Ernie Wakely took care of the rest.

Petes looked like a different team at the start of the third period as they skated the Braves into the ice, and capitalized on two fast goals. Their drive was shortlived as Braves took only 18 seconds to regain the lead and then drove home two more goals past Dennis DeJordy, who stopped a total of 27 shots to Wakely's 26.

OPENED SCORING

Langrell opened the scoring at 5:27 of the first period after poor clearing behind the Petes' net. Centre Bobby Leiter shoved the puck out to the unprotected Langrell, who backhanded it past DeJordy.

No scoring resulted while the teams were playing three men a side after the five-man outbreak, but Braves went in front 2-0 at 14:32 on Larkin's screened shot along the ice.

The goalies were the standouts in the ragged, scoreless second period as both teams checked closely.

Petes got back in the game at 1:16 of the third when Rivard drilled the puck to the short side after bad clearing by the Winnipeg defence.

They kept plugging and came up with the equalizer at 7:54 with Boddy's shot deflecting off defenceman Gary Bergman past Wakely. Boddy had picked up the puck from a faceoff in the Winnipeg zone.

Their lead gone, Braves came back at 8:09, with Larkin beating DeJordy on a 15-foot screened shot. LeBlanc put them two up again at 9:44 as he took Bergman's pass up the middle, twice flicked the puck through defenceman Hamilton's feet, before shooting.

Langrell completed the route at 17:12 on a breakaway.

Agar Confident His Canadians Can Do It

TORONTO (CP)—Coach George Agar of Vernon Canadians talked with new confidence Tuesday on the evening a fifth game of the Allan Cup hockey final series.

"The team finally clicked," he said in an interview. "There is no reason in the world why we should click again Wednesday."

Agar wasn't talking like that before his British Columbia club took the ice against Whitby Dunlops last Saturday night in the fourth game of the best-of-seven set.

But Vernon's 3-0 victory, coming after being walloped 5-2, 5-2 and 6-2 in consecutive games, gave him a lift.

If they don't, it's curtains for the western club and another cup and title added to the honors Whitby has been gathering since they won the Allan Cup in 1957 and took the world championship the following year.

REBOUND VICTORY

Agar recalled that in 1956 Vernon dropped the first game of its Allan Cup final against Chatham Maroons, then bounced back to take the following four and the title.

Agar hasn't decided whether he'll play or direct the team from the bench.

The colorful manager - coach-player has collected more than 1,500 points during his hockey career but benched himself Saturday night and is thinking of doing the same thing for tonight's game at Maple Leaf Gardens.

While Agar breezed confidence, opposing coach Wren Blair was reported to be worried over the performance of Bobby Attersley, his most reliable scorer.

A perennial scoring leader in the Ontario Hockey Association's eastern senior A group, he hasn't found the target against Canadians.

Agar is counting on Vernon netminder Hal Gordon to rack up his second shutout of the series and fifth of the season.

"Hal has been terrific in this series," he said. "He is reliable in league games but in playoff hockey he is superb."

Sunday Sport Ruled Provincial Matter

By JOHN E. BIRD
Canadian Press Staff Writer

OTTAWA (CP) — Provincial governments may regulate commercial Sunday sport within their own boundaries under the Federal Lord's Day Act, the Supreme Court of Canada ruled Tuesday.

The court in a unanimous decision dismissed an appeal by the Lord's Day Alliance of Canada contesting legislation passed in British Columbia last year empowering the city of Vancouver to allow commercial sport on Sunday between 1:30 and 6 p. m.

Chief Justice Patrick Kerwin rejected the alliance's argument that regulation of Sunday sport, for which admission is charged and performers are paid, is a matter wholly within federal jurisdiction because it involved criminal law.

He also said that the B. C. legislation "governs the conduct of people on Sunday and does not create an offence against the criminal law." The legislation was "within the power of the provincial legislature."

DOES NOT APPLY

Chief Justice Kerwin said that Section 6 of the Lord's Day Act "provides that if a provincial legislature chooses to permit a certain occurrence, then that section does not apply to the particular province."

Mr. Justice I. C. Rand said that Section 6 declares that in the presence of a provincial enactment the scope of Section 6 automatically ceases to extend to the provincial area covered by that enactment.

Mr. Justice C. H. Locke said "in my opinion the legislation is intra vires in its entirety."

The reasons for judgment referred to numerous other court decisions in support of the ruling that the legislation is within the powers o. the B. C. legislature. The case was heard by the Supreme Court Feb. 23-24.

During the two-day hearing Toronto lawyer F. A. Brewin, counsel for the alliance, argued that commercial Sunday sport since Confederation had been within the "domain" of criminal law and thus was beyond provincial jurisdiction.

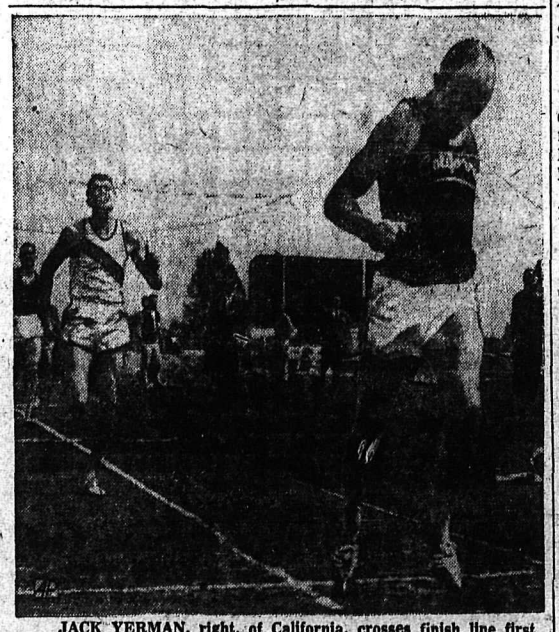
NOT RECOGNIZED

Mr. Justice Rand said "no such 'domain' is recognized by our law."

At the court hearing W. R. Jackett, federal deputy justice minister, said "there is no such thing" as a criminal law domain as a principle of law. He said only a law prohibiting some action and providing consequences for committing that action could be construed as criminal law.

The Supreme Court last Jan. 27 freed the CBC of any limitation being placed on its Sunday broadcasting activities by terms of the Lord's Day Act.

At that time the court upheld the publicly - owned corporation's appeal against Ontario court decisions that the CBC could be prosecuted for breach of the act, passed by Parliament more than 50 years ago to ensure observance of Sundays.



JACK YERMAN, right, of California, crosses finish line first in 440-yard dash of dual track meet with Washington at Seattle, but was disqualified for using his elbows in a turn, and Terry Tobacco of Washington, next behind, was declared the winner. Tobacco's winning time was 48.5 seconds. In spite of the setback, California won the meet, 72 to 59.—AP Wirephoto.

Surrey 238 for 5 declared; Cambridge University 152 for 7. Draw.

Somerset 169 for 7 declared; Glamorgan 160 for 8. Draw.

Stickland 'Doing The Right Things'

CLEVELAND (AP) — What transforms a lifetime .222 hitter into a slugger with a .360 batting average.

The changed man is George Stickland, 33-year-old Cleveland Indians shortstop. His reply to the question: "I must be doing the right things."

Two years ago, he quit baseball after nine major league seasons. He had a reputation as an outstanding infielder but wasn't hitting.

Discouraged, he went home to New Orleans where he worked in a sporting goods store and a race-track mutuel window.

However, he decided to try another season. When the Indians started training this year Stickland was there battling the rookies for a place on the roster.

He was at shortstop opening day — for defensive purposes, manager Joe Gordon explained.

In 14 games he has hit safely 18 times in 50 times at bat. He has two homers and 12 runs batted in.

In his best season, 1953, he hit .284 and drove in 47 runs in 123 games with the Indians.

Anthony, Cotton Meet June 30

CALGARY (CP) — Tony Anthony and Eddie Cotton, two top-ranking light heavyweights, will meet in a 10-round match in Calgary, June 30, it was announced Tuesday.

Promoter Nick Zubray said both fighters are expected to sign contracts in a couple of days.

Anthony, rated by the NBA as number one contender for Archie Moore's crown, has been guaranteed $2500 and expenses. Cotton, a Seattle boxer rated number 7, gets 20 per cent of the gate.

The fight will be staged in the 8000-seat Calgary Corral and it marks the return to Calgary of professional boxing after an absence of more than two years.

Zubray said both fighters will arrive in Alberta two weeks in advance of the match and may train in Edmonton or Lethbridge.

Probable Pitchers

NEW YORK (AP) — Probable pitchers in today's major league baseball games (won-lost records in parentheses):

National League

Los Angeles at Philadelphia (N) — Podres (2-1) vs Roberts (1-1)

San Francisco at Pittsburgh (N)—Antonelli (3-0) vs Kline (0-1)

Chicago at Cincinnati (N)—Hillman (1-1) vs Nuxhall (1-0)

St. Louis at Milwaukee (N)—Jackson (0-2) vs Rush (0-0)

American League

New York at Chicago—Turley (1-2) vs Moore (0-1)

Washington at Kansas City—Ramos (3-1) vs Terry (1-2)

Baltimore at Detroit—Walker (1-0) vs Foytack (0-2)

Boston at Cleveland (N)—Brewer (1-1) vs Score (1-1)

Champ's Earnings Near Million Mark

INDIANAPOLIS (AP) — Floyd Patterson has been called the "unknown champion" often of late. When he hears about it he must laugh to himself. He probably would laugh out loud if he were the type.

For with his title defence against England's Brian London this Friday night, the heavyweight king's earnings in less than seven years of pro fighting will go over the $1,000,000 mark.

From that Sept. 12 night in 1952 when he collected $75 for his first pro fight right through his last effort on Aug. 18, 1958, when he stopped Roy Harris, the quiet, mannerly Patterson has earned $904,000 in the ring.

Of course Uncle Sam and manager Cus D'Amato got their cuts but it still left a good chunk for the once-retarded youth.

This city is doing its share to help the bundles - for - Patterson movement. The 24-year-old champion figures to earn in the neighborhood of $200,000 including the television fee, against the lowly-regarded Briton.

In less than two weeks close to $80,000 has been taken in at the box office. The fight may draw $125,000, which would put in the black.

London, a cliff-jawed 24-year-old husky, has looked fair in his workouts. He displayed fast hands if nothing much else in his drills with Dusty Rhodes. The latter, interestingly enough, used to be Patterson's sparmate.

Both London and Patterson expect to wind up their boxing with today's workout. Patterson floored sparmate Ike Thomas in the first round with a leaping right hand to the jaw followed by a sizzling left-right combination to the head Monday.

PHILLIES GET EYES CHECKED

PHILADELPHIA (AP) — Do Philadelphia Phillies need glasses? They'll soon know.

The management Monday began a vision check program for all players to test visual sharpness, ability to judge depth and for normal eye muscle balance.

Strikes 'n' Spares

Ten-pin bowling Tuesday night saw the following points racked up: Lucky Strikes 1, Oldtimers 3, Four Lads 1, IOOF 3, South Slocan Hydros 2, Roly Polys 2.

High single went to Jack Henton was 203, high aggregate to Chuck Symmonds with 601. Team high single was taken by Lucky Strikes with 846, and team high aggregate by Oldtimers with 2455.

Other top high single scores were Chuck Symmonds with 202 and 201, J. Dowes, 201. Dowes also rang up an aggregate of 560. Other high aggregates were J. Henton 540, Jim Harvie 538 and Steve Chamut 513.

Next week the roll-off for the finals will see Oldtimers, SS Hydros and IOOF meeting, with the consolation round seeing Four Lads, Roly Polys and Lucky Strikes battling it out.

MONDAY NIGHT

Hume Hotel put together scores of 948, 1054, 1082, 999, 1058, with a handicap of 730, for a total score of 5871 to win the Mixed Commercial League finals Saturday night.

Queens Hotel total score was 5502 for the runnerup position.

Hume won the Empire Cleaners trophy and Queens the 111th Battery trophy.

Monday night in the men's commercial league, semi-finals and consolations were bowled. Consolation winners were TPC with 1206, 1091, 1108, handicap 729, total 4134. In the semis, B. C. Telephone rolled 912, 972, 1056, handicap 864, total 3804, to win a narrow decision over Wood, Vallance with 3,781. This gave B. C. Telephone the right to meet B and L in the finals to be bowled at 7 p.m. Wednesday night.

Men's high single and aggregate, John Lilley, 314 and 801; team high single and aggregate, TPC, 1206 and 3405.

Other top scores, Bruce Malcolm 764, Joe DeLucrezio 755; Bob Fields 747, Keith Loewen 697, Gary Rosling 661, Brian Hughes 659, John Wolkin 646, Cyril Saviskoff 639, Clyde Mills 627, George McDougall 617, George Seabrook 607, G. Lane 602.

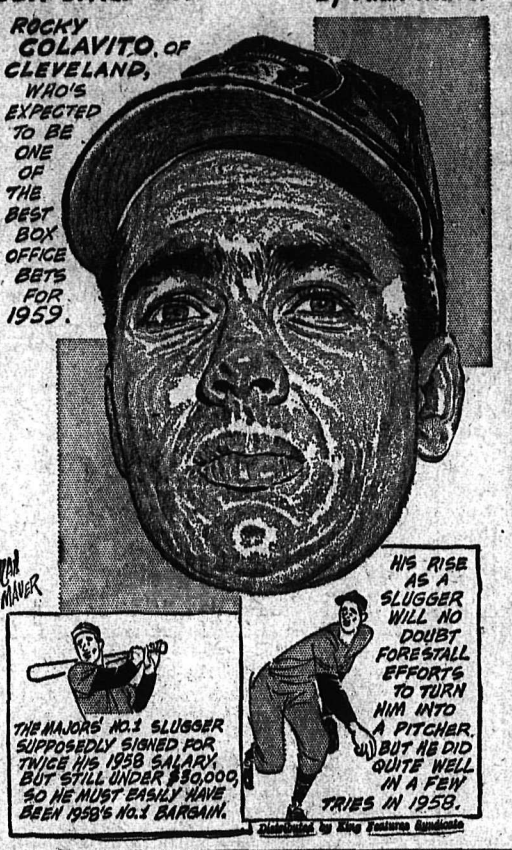
FIRST ERROR SINCE 1957

SACRAMENTO (AP) — After 161 baseball games, Sacramento Solons centre fielder Al Heist, finally booted one, his first error since Sept. 6, 1957.

In a Pacific Coast League game Monday night, a ball hit by Portland's Nini Tornay bounced from Heist's glove.

He handled 472 chances without an error. Both in games and in chances, he set PCL records for outfielders.

BOX OFFICE BET? - - - By Alan Maver



Big Golf Tourneys Out If Rule Accepted

NEW YORK (AP)—A proposal before the U.S. Golf Association may strike a death blow to big golf tournaments with Calcutta pools, such as the Tournament of Champions last weekend at Las Vegas, Nev.

Joey Dey, executive director of the USGA, said Tuesday the suggestion has been made that players who compete in such events be barred from the national open championship.

"I don't know what action will be taken at our meeting next January," Dey added. "It's a matter for the executive committee. But golf is strongly opposed to any tournaments having the slightest connection with organized gambling."

If such a ban were in effect now, most of the game's top professionals would be affected. The field in the Los Vegas event, consisting of men who have won a sanctioned Professional Golfers Association tournament during the year, read like a who's who in golf. Stan Leonard of Vancouver competed.

TOOK FIRST PRIZE

Mike Souchak took the first prize purse of $10,000. A syndicate, which bought him for $14,000 in the Calcutta pool, collected $122,300.

The normal procedure is that the player be cut in for 10 per cent of the Calcutta winnings. This means Souchak should have picked up an extra $12,230. Gambling is legal in Nevada.

Dey said:

"We are presented with a situation in which a golfer might collect more money by throwing a match than by winning it. I don't say this will happen but it could. And it is dangerous.

The USGA has no jurisdiction over professionals except relating to their participation in the USGA's blue ribbon event, the Open. The pros answer to the PGA, which has taken no action against events such as the Tournament of Champions.

SOUR'N SUNK SO LIFE LOOKS PUNK?

Then wake up your liver bile and find life worth living again.

If your liver doesn't pour up to two pints of liver bile into your system every day your food may not digest . . . you suffer from constipation and life hardly seems worth living! That's when you need Carter's Little Liver Pills. These mild and gentle vegetable pills stimulate the flow of bile. Your system starts working naturally and the world looks good. Remember, if life's not worth living it may be the liver. Keep Carter's Little Liver Pills on hand. Only 43c.

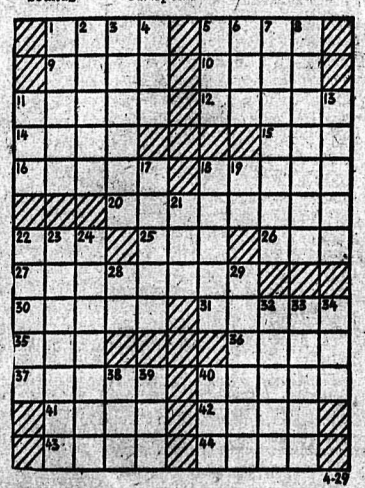
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. each day the code letters are different.

A Cryptogram Quotation

WGJP NYL JDVJNW LIWGKLR UQW WGJKS MYUIQS AIS WGJKS VYKLT —NJSEYLWJT.

Yesterday's Cryptoquote: HE LISTENS WELL WHO NOTES IT—DANTE.

PUBLIC NOTICES

NOTICE TO CONTRACTORS

Sealed tenders addressed to the undersigned and endorsed "Tender for the installation of Meadowbrook Water Supply System," will be received at Mac-Beth Service Station, Meadowbrook, B.C. until 7 p.m. (M.S.T.), Wednesday, May 20th, 1959.

Plans and Specifications and Forms of Tender can be seen and obtained at the residence of Mr. G. A. Decosse, (Secretary) Box 933, Kimberley, B.C. or from Mr. A. L. Jones (Engineer) Box 1449, Cranbrook, B.C. A deposit of $25.00 payable to the Meadowbrook Waterworks District is required for each set of plans and documents. This deposit is forfeited if the complete set of documents is not returned in good order on or before the fourteenth day following contract award.

Each tender must be accompanied by a deposit either in the form of cash or an accepted bank check on a chartered bank of Canada, made payable to the Meadowbrook Waterworks District for 10% of the Contract tender, which sum shall be forfeited to the Meadowbrook Waterworks District if the party tendering declines to enter into a contract satisfactory to the Meadowbrook Waterworks District within seven days of being notified to do so by the Secretary of the District.

Subject to the foregoing the deposits of unsuccessful tenderers will be returned to them when the contract has been awarded.

Tenders are to be submitted on the form provided with all blanks filled in.

The lowest or any tender not necessarily accepted.

G. A. Decosse,
Secretary, Meadowbrook Waterworks District,
Box 933,
Kimberley, B.C.

Pilots Against White Airplanes

WINNIPEG (CP) — Air force and transport department officials agree that an airplane painted white will be in trouble if it gets lost in the snowy northland of Canada.

Sqdn. Ldr. H. J. Galen of Winnipeg, officer commanding 111 Composite Squadron, which includes the RCAF search and rescue flight, said the pilot of a white-painted aircraft "hasn't got a hope" of being found in winter time, except by sheer luck.

The answer is fluorescent markings.

"If I were flying my own plane I would paint it yellow or, preferably, all-red," he said. "The more fluorescent the better. Fluorescent paint stands out against the terrain in winter and summer, and on all-night sweeps the paint is caught in the lights. But white is absolutely horrible, it blends with snow and water."

During last winter, the RCAF conducted 14 searches for missing planes.

LUCKY DISCOVERY

Of the most recent search to date, a transport department official said air force and RCMP aircraft passed over the downed machine several times. It was not spotted because of its white coloring.

"It was only sheer luck it was discovered at all," he said.

Several private airplanes in Manitoba are painted white, the official said, others are just left in a metallic color "which is just as bad—or worse — than plain white."

"If the private owner just painted his wingtips and engines with fluorescent paint, it would b a tremendous help to searchers," the official said.

Sqdn. Ldr. Galen suggested many owner-pilots use white paint because they think its cooler.

"You don't need a cool plane when you're sitting in the snow waiting for someone to find you."

CHILD SUFFOCATES

NEW YORK (AP)—Two-year-old Lorrainee Alverson slipped a small plastic bag over her head and suffocated Monday while her mother was away from their Manhattan apartment on a 10-minute shopping trip.

Sifton Firm Buys Ottawa Journal Majority Ownership

OTTAWA (CP) —Majority ownership of the Ottawa Journal has been sold to Winnipeg publisher Victor Sifton and his associates, it was announced Tuesday.

Complete and exclusive direction of The Journal's editorial policies will remain with the present publishers, M. Grattan O'Leary, president, and I. Norman Smith, vice-president.

Mr. Sifton said in a statement that The Journal shall continue as an Independent Conservative newspaper.

Mr. Sifton, publisher of the Winnipeg Free Press, and his associates paid $30 a share for a majority of the 100,000 shares of The Journal. He said the same price of $30 a share will be offered to all shareholders up to and including Oct. 15, 1959. Shareholders will be told shortly where to present their shares for sale.

Mr. Sifton named L. A. Lalonde, The Journal's present general manager, as executive vice-president and general manager. He indicated there will be no changes in staff.

The Journal, one of Ottawa's two English-speaking daily newspapers, first started operations 74 years ago. It was amalgamated with the old Ottawa Free Press in 1917.

Mr. Sifton, member of one of Canada's leading newspaper families, said in a statement that Mr. O'Leary will continue as Journal president and Mr. Smith as vice-president (editorial).

"These two as associate editors will have exclusive control and direction of The Journal's editorial course and its news columns will be maintained in their tradition of accuracy and fairness.

"Upon Mr. O'Leary's eventual retirement (he is 71) which we hope will not occur for some years, the control and direction of The Journal's editorial policies will pass to I. Norman Smith as the paper's editor in chief.

"Thus in the foreseeable future, our policy will be to maintain The Journal as an independent newspaper, serving in the nation's capital the principles and values for which it has gained recognition from all parties and persons."

Mr. O'Leary and Mr. Smith said in a statement:

"We see in the new association with Mr. Sifton not an ending of The Journal's career, but an assurance of the continuing of it. The possession of large reserves and resources will guarantee that The Journal's independence is preserved and its standards maintained into the long-term future."

In announcing the shift in ownership, Mr. Sifton said also in regard to employees that considerably increased and paid-up pension benefits would be purchased immediately by the new owners for Journal employees, an arrangement which was worked out in consultation with Mr. O'Leary and Mr. Smith.

"The Journal will also continue under the same local management, with L. A. Lalonde, present general manager, becoming executive vice-president and general manager."

Announcement to employees Of paid-up Pension

Announcement of the sale was made to the entire staff Tuesday morning by Mr. O'Leary and Mr. Smith, and the following statement was given to the staff by Mr. Sifton:

"My associates and myself look forward to a period of steady growth and increasing reputation for The Journal as a responsible vigorous independent newspaper in our capital city. You will, I know, be happy to learn that the paper will continue under the existing local management and editorial direction. Of importance in the years ahead will be the full hearted and royal support of all members on the staff.

"I have pleasure in announcing that one of the first items of business to be placed before your new board of directors will be the purchase of certain additional past service benefits in the employees pension plan at a cost of approximately $300,000. This benefit has been worked out in consultation with Mr. O'Leary and Mr. Smith."

The same Price To all Shareholders

Mr. Sifton also announced that the same price of $30 per share will be offered to all shareholders up to and including Oct. 15, 1959. *Announcement to shareholders of* where to present their shares will be made shortly.

On the Toronto stock exchange Journal stock rose swiftly following announcement of Mr. Sifton's offer. Before the announcement 100 shares were sold at $17 a share. *Minutes later investors* bid $22 a share, but no stock was offered.

Early Library Provided Baths

FORT WILLIAM, Ont. (CP)—Persons who like to read in the bathtub would have been well off in early days here. Town historians say the first library boasted public baths as well as a smoking and "literary room."

The library was established in 1885 in a Canadian Pacific Railway roundhouse. There was a small lobby with two doors, one leading to the public baths and the other to the reading room.

A historian notes that the bathing section had "two fine copper with silver plate in decorated rooms." One document praised "the ingenious invention of A. F. Priest which supplies hot, cold or lukewarm water at the wish of the bather."

Shrum Commission Told Blyth Resigned for Personal Reasons

VICTORIA (CP) — Personal reasons, not government interference, led to the sudden, mysterious resignation of J. D. W. Blyth from the B.C. Power Commission five years ago, the Shrum royal commission was told Tuesday.

T. H. Crosby, former commission chairman, said he was "absolutely sure" his former commission colleague quit his post three weeks after he was named to it for personal reasons only.

Mr. Blyth never gave any reason for his resignation.

Mr. Crosby and Dr. H. J. MacLeod, appointed with Mr. Blyth, were asked to testify on the reasons they thought were responsible for Mr. Blyth's move.

Royal commission counsel Ernest Alexander read two letters sent to Mr. Blyth, inviting him to testify. Mr. Alexander said he wanted the letters read into the record since it was alleged Mr. Blyth had "useful information" for the commission.

Commission chairman Dr. Gordon Shrum said he considered the Blyth affair as "unfinished business since he didn't answer my letter nor Mr. Alexander's."

"I almost begged him to come forward. I think we have done all we could. Since he is living in the United States we have no authority to subpoena him to appear."

Mr. Blyth is an executive of a brewery in Cleveland.

Canada Expects U.S. To Lift Curb on Oil Imports

OTTAWA (CP) — The United States likely will lift import restrictions against Canadian oil in a few days, qualified informants said Tuesday.

They said that within a day or two Trade Minister Churchill will inform the Commons as to the procedure the U.S. plans to follow in connection with changes in American oil import policy.

The understanding here is that the American policy change will affect only Canada. Shipments of oil from other countries will still be restricted in the U.S.

Informants said that Canada will welcome lifting of the oil curbs mainly because it may encourage greater investment in Canadian oil exploration and development.

However, elimination of restrictions may not lead to any major rise in Canadian oil shipments to the U.S.

Because of price and other factors, Canadian exporters have not been able to fill all of their current quotas under the American restrictions made mandatory earlier this year.

Macmillan Says Little Danger Of 90-Strontium

LONDON (Reuters) — Prime Minister Macmillan Tuesday offered an assurance that the danger to humans of radioactive waste "is unlikely to approach the level which . . . would require immediate consideration."

Macmillan was questioned in the House of Commons about the peril of nuclear fallout and particularly of strontium - 90, the most dangerous form of radioactive waste which can cause cancer of the bone.

Demands for a statement in Parliament followed reports from the United States of evidence showing radioactive material in the atmosphere may descend to earth more rapidly than once was believed.

Provincial Gov'ts "Conscripting" Municipal Revenues

VANCOUVER (CP) — Provincial governments are conscripting municipal revenues to pay for services that are the responsibility and under the control of provinces, Maj.-Gen. C. A. P. Murison told the annual meeting of the B.C. Chamber of Commerce here Monday.

Gen. Murison, reeve of North Cowichan and president of the Union of B.C. Municipalities, said general services such as social welfare, hospitals and education should be paid for by everyone.

Since ability taxes are the prerogative of the senior governments, these services should be their responsibility, he said. Property taxes should be related to local services.

Release Suspects On $5000 Bail Each

NORTH VANCOUVER (CP)—Lorne Wenn and William Chamberlain, both of Vancouver, were released from jail on $5,000 bail each pending trial May 1 on a charge of possession of housebreaking tools. They were arrested after police recovered $3,000 in stolen goods here.

ADDED ATTRACTION
The drawing power of a horseshoe-shaped magnet can be increased by adding a bar of soft steel.

Boxing Champion Held In Serious Attack Charge

TORONTO (CP)—George Chuvalo, Canadian heavyweight boxing champion, was arrested early Tuesday and charged with the rape of an 18-year-old mother.

Chuvalo, 21, hasn't fought since he lost a main bout in New York last October against Jim McMurtry. Until then he was ranked ninth among world heavyweights.

The boxer was arrested on west-end Dundas Street by two constables shortly after a girl ran into a police station and reported she had been raped by two men who picked her up at a downtown intersection and offered to drive her home from her job in a downtown restaurant.

Police said the girl told them the men had warned her that she "might never see her baby again." She is the mother of a 15-month-old child.

Chuvalo was married here three weeks ago.

Ontario's A-G To Investigate Student Activity

AJAX, Ont. (CP) — Attorney-General Roberts of Ontario will be asked to investigate reports that Toronto students were hired to collect names on a petition to force a liquor vote in this Oshawa-district town.

Reeve John Mills said a formal complaint will be laid with the attorney-general's department by the town council, which Monday night threw out a petition containing 1,022 names urging cocktail bars and beverage rooms.

The petition was rejected because 198 of the names were deleted for irregularities. The remaining 824 names formed less than the necessary 25 per cent of the previous voters' list.

Reeve Mills said the students—some under 21—were from Ryerson Institute of Technology. They had invaded the town during a two-night period and collected the names.

The petition asked for cocktail bars, beverage rooms and dining room liquor licences. The town now has a liquor store and beer store.

Cedar Mill Fined In Anti-Smoke Law

NORTH VANCOUVER (CP)—Horne Brothers cedar mill here was fined $25 Monday for violating the city's anti-smoke bylaw. The company told court it had ordered equipment costing some $30,000 to cut down the smoke volume.

Always Something . . .

VANCOUVER (CP) — Motorcycle policeman Les Kidd had a new kind of chase Monday. He chased a set of heavy truck wheels in a wild two-block race. The wheels had dropped from a trailer truck. They hit four parked cars, causing damage of $400 before coming to a halt.

PAT WILLIAMS, 18 - year - old secretarial student, defeated nine white finalists in Sacramento, Calif., Thursday night to become the first Miss Sacramento of her race. "I don't feel a thing—I'm numb," she said after the crowning. She will represent the city at Santa Cruz in the state competition preliminary to the Miss America Pageant. Pat stands 5-6 and measures 36-24½-37. She sang a torchy version of "Lover Come Back to Me" to win the talent competition.

Eccles Admits Pulling Boner

LONDON (Reuters) — Trade Minister Sir David Eccles admitted Tuesday he pulled a boner during a speech Sunday in Hanover, West Germany.

He told a group of German industrialists that the British people bought newspapers only for sports news and did not take editorial views seriously. He also boasted of the German blood of the Royal Family.

In a statement issued Tuesday, the president of the board of trade said he was trying to make a "serious 'point"—namely that the Germans were paying too much attention to anti-German articles in British newspapers.

Cassandra, columnist for the 4,750,000-circulation Daily Mirror, dismissed Eccles as "a pompous ass" and "the best-dressed fop in the House of Commons."

The Liberal News Chronicle says there was general agreement among politicians that Eccles' career is fast drawing to a close."

Says Lord Beaverbrook's Daily Express: "In this country it seems that we are second-class citizens unless we have some German blood in our veins. Sir David at large is a risk no Briton can run."

In his speech at a luncheon in Hanover to celebrate the German Industries Fair, Eccles said no one in Britain bought newspapers except to see how his favorite soccer team was doing or how the horses were running.

He also said: "We in England are monarchists and we would not have as good a monarchy if we did not have Hanoverian blood in our Royal Family."

Consternation and Rejoicing Mixed in Lower Great Lakes

By THE CANADIAN PRESS

The "salties" are pouring through the St. Lawrence Seaway, easing congestion at Montreal and causing a mixture of consternation and rejoicing in the lower Great Lakes.

Some three ships an hour were pouring into the 185-mile, $470,000,000 seaway opened Saturday at Montreal. Sixty or more ocean ships—called "salties" by lake seamen—and inland ships were expected to be in transit Tuesday.

In Toronto officials expected some congestion by the end of the week. Harbor authorities said the city had 12 miles of docks, almost all suitable for ocean ships, but expressed anxiety over the crush of ships for the first week. They said the harbor lost some goodwill because of slow handling two years ago and they would have to be careful that it does not happen again.

ONE PORT MAY SUFFER

Fears were also expressed at Port Colborne at the Lake Erie end of the Welland Canal that the seaway may have an adverse effect on the national harbors board grain elevator there. Before the seaway, lake ships would discharge grain there for transshipment to smaller canal boats. Ships bypassing the elevators now are headed for ports from Kingston to Quebec City.

Authorities say it will take two weeks before traffic is normal. Twenty - one ocean ships were waiting at the seaway anchorage at Lanoraie for a chance to enter the seaway.

All has not been easy on the seaway itself. The Grace Line's Santa Regina scraped the concrete walls of the seaway entrance Monday and lost some paint.

A jammed fender used to raise and lower a protective fence in front of the lock gate at Beauharnois caused a one-hour delay.

The seaway makes the Great Lakes accessible to all but the largest ocean ships, a fact which was reported Monday as the reason for union trouble on the West Coast.

Dennis McKeown, business agent for the National Association of Marine Engineers (CLC), said the fact that foreign-registered ships can enter the canal will mean that the Seafarers' International Union (CLC) will lose much of its membership. Members will lose jobs because Canadian lake ships will be laid up for lack of cargoes.

As a result the SIU was "raising other unions to make up their numbers and keep the SIU in the style to which they have been accustomed. "The marine engineers was one of those unions.

B.C. Section of Trans-Canada To Be Ready in '60—Gaglardi

VANCOUVER (CP) — Highways Minister Gaglardi told the annual meeting of the B.C. Chamber of Commerce here Monday that the B.C. section of the Trans-Canada Highway will be completed in 1960.

He said that if the route wasn't completed by then construction crews would be close to the target.

In a resume of the province's highways program, the minister said the $6,000,000 Prince Rupert-Prince George highway would be completed by 1960.

He said it was planned to pave the Hart Highway, linking Prince George and Dawson Creek, in 1960 also.

He said these were not promises but target dates.

The minister predicted the province's tourist industry — now valued at $100,000,000 annually — will grow into a $400,000,000 business within five years.

He added that the Yellowhead Pass will eventually become a commercial highway route across the province.

The minister lamented town planning groups sometimes let information about provincial highway routes leak and allowed insiders to make real estate profits.

The highways department often found a real estate man just ahead of it buying up land, and he added often town planners made money on such dealings.

The minister said the first contracts for a new four-lane highway between Port Mann and Chilliwack will be let in a few days.

When added to the present two-lane route it would provide a six-lane highway between the lower mainland communities.

Godfrey Dreads Surgery Result

NEW YORK (AP) — Arthur Godfrey says he has a "cold, clammy, clutching fear" over "the thing" in his chest.

The TV radio star wrote the report in Columbia Presbyterian Medical Center, which he entered Monday to undergo an operation Thursday for a tumor. The Columbia Broadcasting System distributed the report to the press today.

Godfrey said that when reporters asked him how he felt, he told them he felt fine "and physically I do."

"Mentally, however, I'm a mess," he wrote. "You've heard of mixed emotions? Man, this is rough. No pain anywhere—look good—feel good — but some of the best brains in the medical profession have discovered a 'thing' in my left lung. . . .

"It must be removed. If it's a benign tumor of some sort, hurray for our side—no more seat. If the damn thing is malignant —cancerous — then there's real trouble. Maybe have to take the whole lung out."

Godfrey, 55, said he wouldn't mind one bit "just so long as it doesn't cripple me up so that I can't ride or swim or fly."

Business Spotlight . . .

Vending Machines Popular in Canada

MONTREAL (CP)—Canadians fed more than $15,000,000 into vending machines during 1957 for food, refreshments and cigarets.

The figures — latest available for a full year—were supplied by the Canadian Automatic Merchandising Association, which is concerned primarily with merchandise and services and not with music, amusement and chance.

The association says that self-serve distribution through coin-operated machines has expanded rapidly in Canada during the last decade and is "a logical extension of the self-serve principle in merchandising."

CIGARETS MAIN ITEM

Cigarets ranked highest in products sold—$8,114,193 of the $15,193,026 total.

Soft drinks in paper cups were next, $2,378,847. Then came coffee, tea and hot chocolate, gum, peanuts, sandwiches, hot foods and soup. Ice cream, at the bottom of the list except for unspecified "other" classifications, accounted for $28,064.

Industrial plants and business offices provided the greatest number of locations for vending machines—6,212 of a total of 17,737. Next highest were restaurants, 4,034; gasoline service stations, 3,190; hotels and motels, 1,022. Other classifications included theatres, department stores, military bases, railway stations, schools and hospitals.

The association said its membership is made up of "a large number" of 200 or more Canadian enterprises that sell merchandise or service through vending machines. It has represented these businesses and suppliers since 1953.

"Automatic merchandising is largely a service provided by small businesses. The average Canadian operating firm owns and services fewer than 100 vending machines."

Investment per machine ranges from $10 for a simple bulk gum-vender to $3,000 or more for automatic catering and drink machines which require permanent plumbing and electrical connections.

The association said success in vending depends on quality of product and service to customers and on location. A product can be made available around vthe clock, "a convenience that standard retailing methods do not supply."

CONVENIENT SERVICE

Products can be made available in buildings where volume would not warrant some other marketing setup. Cigaret machines in restaurants supply "a convenient service which is otherwise usually unprofitable to the restaurant operator."

The association said it has not yet been possible to produce detailed operating statistics on Canadian business but a recent report for the United States showed this distribution of vending receipts:

Cost of sales, 58.13 per cent; operating expenses, 29.46 per cent; operating profit, 2.41 per cent.

Continue Priority On Tough Grain

OTTAWA (CP) — Priority will continue to be given to movement of tough and damp grain from northeastern Saskatchewan to the Lakehead for marketing, Trade Minister Churchill said Tuesday in a Commons reply to Stanley Korchinski (PC—Mackenzie).

He said farmers are expected to be able to market this grain within a few weeks.

Hazen Argue, CCF House leader, asked whether special quotas might be given to make sure the grain is moved before it spoils.

Mr. Churchill said consideration would be given to this if any of the grain were still undelivered in two weeks.
