VICTORI[illegible] HUERTA RESIGNS AS [illegible]RESIDENT OF MEXICO

Chamber of Deputies Receive Official Word of the Event Last Evening—Cries of "Viva Huerta" from Spectators and Deputies.

Villa in Interview Regrets that He Cannot Get Huerta in His Power—Calls Him "Traitor"—Would Express no Opinion Regarding Resignation or Future Course of the Constitutionalists.

Mexico City, July 15.—At 7:20 o'clock this evening Francisco Cabajal took the oath as the provisional president of Mexico before the assembled deputies and ministers.

The new executive escorted by the presidential guards, went to the national palace. He was cheered by the people.

Mexico City, July 15.—Victoriano Huerta presented his resignation as president of the republic to the chamber of deputies this evening through the department of foreign relations. The resignation was referred to a committee, after it had been read.

The deputies and spectators who field the galleries shouted "Viva Huerta."

The committee will report back to the chamber and the question of whether the resignation will be accepted, will then be decided.

Calls Huerta Traitor.

Juarez, July 15.—"I would much prefer that Huerta had remained in the chair or in Mexico City until we could get our hands on him," General Villa said today in Juarez when he learned of Huerta's reported resignation.

"That is the only comment I care to make on the subject," he added. "I am a soldier of my country and do not care to express my opinion of the traitor's resignation."

A military band played martial airs outside Villa's headquarters as the news of Huerta's resignation was spread around. Villa will remain on the border two or three days, it was said today at his headquarters here. An informal request has been made that he visit El Paso on the American side of the international line, but while neither army nor civil officials have any objection, the matter was dropped.

The sudden, but not unexpected turn of affairs at the national capital led to speculation regarding what troops of the constitutionalist army would be the first to enter the capital. Generals Aguilar and Obregon are the nearest to the goal of Carranza's revolution, but Villa's officials express the belief tonight that troops of all these divisions would be represented in the triumphal entry. Villa's army cannot be moved southward for several weeks.

Huerta to Leave.

Washington, July 15.—Rear Admiral Badger reported to the navy department tonight that reports reaching Vera Cruz said General Huerta and General Blanquet would "leave Mexico City by train under escort." There was no mention of their destination, but officials here think the retired dictator will go to Puerto Mexico to board a foreign man of war for Europe.

EDITORIAL ROW MAY CAUSE TROUBLE

Diplomatic Tension Likely to Ensue Between France and Germany Over Correspondents.

Paris, July 15.—An acrimonious controversy which is going on between Paul and Guy Cassagnac, editors of Tutorite, and I. Fuchs, correspondent of the Berlin Lokal Anzeiger, and Carl Lahn, correspondent of the Ueipsic Tageblatt, appears likely to cause diplomatic tension between France and Germany. Guy Cassagnac recently challenged Fuchs to a duel, which the seconds decided need not take place, because Fuchs had nothing to do personally with an article which was the original cause of the controversy, approving a sentence of one year imprisonment imposed by the Leipsic court on the Alsatian cartoonist, Hanis. Paul Cassagnac challenged Lahn because he did not leave the country in 48 hours as had been demanded by Autorite.

It is understood that the German embassy in Paris is prepared to uphold what it conceives to be the rights of German correspondents.

LOCATORS DECEIVED BY KODAK PICTURE

Federal Trial at Portland Shows up New Scheme in Oregon Land Fraud Cases.

Portland, Ore., July 15.—Kodak pictures of the famous seqoia, or big redwood trees of California, were used as pictures of Oregon timber by W. J. Logan of Tacoma, as one of his arguments in persuading California people to buy "locations" on timber lands within the disputed Oregon and California railroad land grant in Oregon, according to testimony given in the United States district court today by J. D. Stafford, a San Francisco chauffeur, who admitted that he had been an accomplice of Logan.

Stafford's testimony came in the trial of Logan, W. F. Minard of Portland and E. J. Sellers of Tacoma, accused of fraudulent use of the mails in selling "locations" on the railroad land grant, forfeited to the government, the case being now on appeal to the United States supreme court.

Good Boost Pictures.

"Logan took those redwood pictures because they would be good boost pictures," said Stafford. He estimated that during the time he was with Logan more than 100 "locations" were taken at $150 each within a few hundred miles of San Francisco. Stafford said that Logan claimed to be representing different concerns, among them the Oregon Realty company and the Oregon Timber and Land company.

After identifying an advertisement, Stafford said that so far as he knew Logan had no such land for sale as that described in the advertisement, which, he said, was used as a means of getting in touch with prospects.

CIVIC EXCURSION JOYFUL SUCCESS

Eight Hundred Have Delightful Trip to Bellingham, Wash., and Return.

Eight hundred excursionists from New Westminster yesterday enjoyed one of the best outings ever organized by the citizens' excursion committee, the ocean going trip being made to Bellingham, Wash., where several hours were spent, the Princess Sophia arriving back in the city at 10 o'clock last night.

Pulling out from the city dock at 7 o'clock in the morning, beautiful weather was encountered on the trip down the coast, many of the members of the party seeing for the first time the beauties of the Gulf of Georgia and the islands approaching Bellingham. At the American city the visitors were met by a civic committee headed by Mayor DeMattos. Returning from Victoria the night previous Mayor Gray was enabled to make the trip along with several members of the city council and the heads of the various public bodies.

Not an accident marred the day of pleasure.

C. P. R. FINANCES IN EXCELLENT SHAPE

Millions on Hand of Which Only a Small Part Is Required for Contemplated Improvements.

Montreal, July 15.—In order to set at rest rumors about any issue of new stock and other disquieting stories about Canadian Pacific railway affairs, Sir Thomas Shaughnessy today issued the following statement:

"After the payment of all fixed charges and dividends, the company entered upon a new fiscal year, July 1, with $36,000,000 in cash and $14,000,000 in equipment securities, after having spent upwards of $30,000,000 on railway and steamship construction, for which 4 per cent. consolidated debenture stocks have been authorized, but not offered on the market.

"The end has nearly been reached with all the important works of construction and improvement that were in progress and only a comparatively small portion of the money in hand will be required for their completion.

"New works of any magniture were not contemplated at present, and no necessity exists for a new issue of stock.

"It is not unlikely, however, that the directors will at the meeting in October, recommend to the shareholders that the authorized ordinary share capital be made to conform to the amount for which the company has legal warrant, so as to provide for the future capital requirements, as and when they arise."

ONTARIO FARMERS FIGHTING WORMS

Havoc Being Worked in Crops—Damage Done Amounts to Many Thousands.

Woodstock, Ont., July 19.—Farmers of the east end of Oxford county in East Oxford township and the west end of Brant county, in Budford township, are busy today fighting the approach of a force of army worms, which for two days now have been working havoc in the pastures, hay and corn crops. The army numbers in millions. The worms appear to be following a creek westward and for a considerable distance on each side the ground is black with them. The damage done will amount to thousands of dollars. The worms are about two inches long. Farmers are busy digging trenches and spreading molasses and paris green.

G.T.P. RAILWAY IS IN FINE SHAPE

Coast to Coast Service Expected to be in Operation by the First of Next Year.

Ottawa, July 15.—The linking up of all sections of the Grand Trunk Pacific railway is reported by Mr. Collingwood Schreiber, consulting engineer of the Dominion government, who has just returned from an inspection of the line.

"I travelled by rail right through from Winnipeg to Prince Rupert," declared Mr. Schreiber today, "and everything is in fine shape. The road will be ready to open in the fall. There is a one per cent. grade for a distance of twenty miles only. On the rest of the line is only a five-tenths grade."

The laying of steel over the mountain section, together with the completion of the eastern division by the government, means that a train may now run over the transcontinental from Halifax to Prince Rupert save for the gap at the Quebec bridge. The car ferry Leonard, to be used there, will have her official trial trip on the 20th of this month and if satisfactory, will be brought out immediately.

It is fully expected here that the Grand Trunk Pacific will exercise its option, or rather carry out its contract of leasing the eastern section and, by the new year, start the regular operation of the road from coast to coast.

ERA OF PEACE FOR MEXICO

Officials at Washington See Progress and Prosperity for Republic.

Francisco Carbajal to Be Provisional President Until Carranza Arrives at the Capital.

Washington, July 15.—News of General Huerta's resignation as provisional president of Mexico was hailed by official Washington tonight as the first practical step toward a quick solution of the Mexican problem.

Constitutionalists, diplomats and officials of the United States government did not conceal their satisfaction over the fact that General Huerta at last had voluntarily eliminated himself from the situation and pointed the way to an era of peace in his country.

Although the constitutionalists have declared they would not recognize Francisco Carbajal as provisional president any more than they did his predecessor, and the United States government likewise will refuse to recognize him, the understanding here is that the new executive will hold office for but a short time—only until satisfactory arrangements can be made, for the entry of General Carranza, the constitutionalist chief.

General Amnesty Desired

From diplomats in close touch with the situation, it was learned that Mr. Carbajal desired only that a general amnesty be declared conserving the lives and property of those whos supported Huerta. After this is obtained, the peaceful entry into the Mexican capital of constitutionalist troops will be negotiated.

General Huerta's retirement came just as the constitutionalists were preparing their formal answer to the South American mediators rejecting the invitation for formal conferences with representatives of Huerta for the discussion of internal Mexican questions.

While the constitutionalists are averse to holding conferences which

(Continued on Page Four.)

BILL DISLIKED BY ALL PARTIES

Present Home Rule Measure Framed to Prevent Bloodshed.

Attitude of Government to the Change Introduced by Lord Lansdowne Is Uncertain.

London, July 15."Despite the feeling of optimism which is said to prevail as the result of Lord Beauchamp's declaration in favor of a conference on home rule on the lines of Lord Dunraven's amendments, it is difficult," says the Daily News writing on the situation up to last night, "to see how a settlement can be arrived at in the present temper of the parties."

The amending bill is disliked by all parties and is regarded as a device solely to prevent bloodshed. The attitude of the government to the changes introduced by Lord Lansdowne and his colleagues with the object of safeguarding peace is uncertain. The time limit by general consent, gone, the government will resist the deletion of the referendum, but might concede the grouping of the six "plantation" counties as one area to be decided by one poll, thus abandoning the original county option. The fiercest fight, if the amending bill ever goes into committee, will be on the referendum.

Conference Held.

The prime minister had a long conference with the Irish leaders today and it is expected that the whole situation will be discussed at tomorrow's cabinet meeting in the light of new developments in the house of lords. The visit of the king's private secretary, Lord Stamfordham, to the prime minister at the house of commons yesterday and Sir Edward Carson's return to London have set many reports going as to the renewal of conversations. The government, however, has made no approach in that direction. The interview of the king's secretary with Mr. Asquith had no undue significance, while Sir Edward Carson's journey to London was due to the possibility of the government putting down the amending bill for discussion this week in the house of commons. The premier will announce tomorrow the exact date of the introduction and the second reading of the amending bill.

SCOTLAND'S SECRETARY ESCAPES WHIPPING

Intercession of His Butler Prevents Suffragettes Severely Beating Rt. Hon. Thomas Wood.

London, July 15.—Only the intercession of his butler today saved the Rt. Hon. Thomas McKinnon Wood, secretary of state for Scotland, from a horsewhipping at the hands of two suffragettes.

Just as he was leaving his residence a woman rushed up, horsewhip in hand exclaiming: "You Scottish pig, if you don't stop the forcible feeding of women, we shall smash you."

The militant lashed him across the chest but before she could deliver a second cut the butler seized her and threw her to the ground, leaving him free to tackle the second woman who was shouting: "Let me at the Scotch pig."

She made a rush with her whip at the secretary for Scotland and was still struggling with the butler when the police arrived and arrested the women. On one of them was found a decomposed egg, labelled "refreshing fruit."

The women gave their names as Jeannette Wallace and Bertha Wilson. They were fined 20 shillings each, but refused to pay and were sent to jail for 14 days.

CANADIAN NORTHERN CAN FLOAT LOAN

Trust Deed With Government Ratified and Money for Work Can Be Raised.

Ottawa, July 15.—The Canadian Northern trust deed was ratified by order in council at a meeting of the cabinet this afternoon, Hon. W. T. White, minister of finance, having returned to the capital after a long holiday, this morning. With the trust deed executed, the company is now in a position to float the bond guaranteed by the government, according to the agreement last session, and to thereby raise money for the completion of the transcontinental system. The government will also come into possession of $40,000,000 of the common stock of the company.

The National Trust company has been appointed trustee in the transaction.

LORD MERSEY SAILS ON THE CALGARIAN

Ottawa, July 15.—Lord Mersey, who presided over the Empress of Ireland inquiry and who has been a guest at Rideau hall for a couple of days, left this afternoon for Montreal. He sails on the Calgarian tomorrow for home. The recommendations of the officials of the marine department, based on the findings of the commission, have been forwarded to the British board of trade. It is announced that the British government is paying the expenses of Lord Mersey and his associates from the other side of the Atlantic; the rest of the expense being borne by the Dominion government.

FEDERALS KILL EVERY DEFENDER

American Soldiers Witness Rebels Killed to the Last Man at Paloneas.

Garrison Annihilated and Rumor Revives that Counter Revolutions Are to Start in Mexico.

Columbus, New Mexico, July 15.—The annihilation today of the constitutionalist garrison at Palomas, Chihuahua, by federal regulars, broke the peace of Northern Mexico, and revived reports of counter-revolutions in the republic. Three hundred guerrillas under General Roque Gomez attacked the little border town in view of troops of the United States army patrol. Every man of the village garrison was killed, it is reported.

Thirty men under Captain Topete fought desperately from adobe houses in the town, but were overpowered within a few minutes. Seven men of the garrison kept up a fire from one of the houses which was not subdued by the federals until several hours later. It is believed that these seven survivors were captured and executed.

Villa Sends Men.

Gomez announced today that he would leave during the night and it is believed he would make no attempt to defend the town from the advance of troops from Juarez or Casas Grandes. It was learned that 200 men from the Pearson garrison, almost directly to the south, had been sent by General Villa with orders to retake the town.

Roque Gomez was second in command under General Ynez Salazar when the federal commander of former anti-Madero rebels took Palomas in November, 1912. His men are Chihuahuaranchmen who have been in arms since the Madero revolution of 1910. Recently they have been terrorizing residents of the Casas Grandas district.

STATE'S ATTORNEY REFUSES TO LET MRS. CARMAN TESTIFY

Mineola, N.Y., July 15.—When the grand jury investigating the murder of Mrs. Louise Bailey in Freeport June 30, and the alleged complicity of Mrs. Florence Conklin Carman, adjourned today, but three more witnesses remained to be heard.

Whether Mrs. Carman will be brought from the Nassau county jail to tell her story is a problem the grand jurors themselves will solve, probably tomorrow morning.

District Attorney Smith states positively that he would refuse the physician's wife permission to testify, even though she should sign a waiver of immunity. Then her attorney, George M. Levy, and her husband visited her in the jail and had her sign a petition addressed to the grand jury, in which she requested the privilege of appearing before that body, and abandon all rights to immunity.

New Witness Testifies.

The most important witness today was Frank J. Farrell, whose story, as he told it to District Attorney Smith, was that on the night of June 30, being out of a job and hungry, he started for the back door of the Carman home to ask for food. He was rounding one of the rear corners of the house, his story went, when he saw a tall woman dressed either in a long cloak or kimona come from the back door, go directly to a winidow in what he now knows to be the doctor's office and break the glass.

Farrell said he did not know whether the woman had a revolver or not. If she did, he did not see it. Farrell continued that he heard a shot and quickly hurried off.

His story furnishes corroboration for Celia Coleman, a negro maid in the Carman residence, whose amplified story told yesterday was to the effect that her mistress, dressed in a kimona, rushed through the kitchen directly after the shot was fired.

DROP IN VALUES CAUSED LOSSES

Depreciation of Canadian Securities Caused Failure of Chaplin Co.

Creditors Warned that Assets Not Likely to Realize Anything Like Values Placed on Them.

London, July 15.—At a meeting of the creditors of the Chaplin, Milne, Grenfell company today the official receiver gave out a statement of the affairs of the company as submitted by the managing director. This showed a deficiency as regards the creditors of £29,000. The official receiver warned the creditors that in his opinion the assets are not likely to realize anything like the values placed upon them by the directors. It was not probable, he thought, that any surplus would be available for the shareholders.

After dealing very fully with the history of the company and its transactions during the past few years, the official receiver drew attention to the fact that Chaplin, Milne & Co. had been compelled to borrow since the beginning of the year £295,000 through default of the Canadian agency to repay loans. The directors stated that the immediate cause of suspension was the failure of the Canadian agency to repay their loan to the company and the Chaplin company's failure to pay the run for payments of deposits made with them, owing to the fact that other resources of the company had been issued by the Canadian agency.

Deprecation of Securities.

At the end of December last, the Bank of England declinied to discount the company's bills. The insolvency of the company was attributed by the directors to the depreciation in value of securities held for investment and on loan account, which reduced its borrowing powers and practically made it impossible for the company to realize on securities at anything like their ordinary value, or raise further funds thereon.

The time was most unfavorable for realization as all the securities were depreciated to an unprecedented extent. This applied more particularly to securities taken over from the Canadian agency.

Statement of Liabilities.

The statement of affairs submitted by the managing directors showed liabilities of £917,442, and assets of £887,525, the deficiency as regards creditors being £29,917. In view of the fact that many undertakings in which the company was interested were still in the course of development and many securities held by the company had no official quotation, the official receiver thought it right to warn the creditors that in his opinion the assets were not likely in liquidation to realize anything like the values placed upon them by the directors.

Sir William Plender, the special manager, shared the view that the assets were very considerably overestimated.

The meetinig unanimously approved the appointment of Sir William Plender as liquidator.

LABOR FEDERATION FAVORS STRIKE

Extreme Action May Be Taken as a Protest Against Colliery Conditions on Island.

Vancouver, July 15.—Although opposed by many of the prominent labor men of the province, a resolution in favor of a general strike of organized labor in British Columbia as a protest against existing conditions in the Vancouver island colliery districts, was passed at today's session of the B. C. Federation of Labor. The voting was 48 for and 36 against which very clearly showed the lack of unanimity among the delegates and presages the defeat of the proposal when it is submitted to a referendum among the various unions affiliated with the Federation.

At the afternoon session the proposal to select opposition candidates in every constituency in time for the next provincial election was laid over until the next meeting of the federation.

A subscription of $900 was taken up among the delegates within a few minutes time, the sum to be used to carry out the purposes of the federation throughout the province at which the situation on the island will be explained.

"I AM THE MAYOR" SAYS MAYOR MARTIN

Montreal, July 15.—Trouble is brewing between Acting Mayor Blumenthal and Mayor Martin because the former is signing documents and making appointments to the fire brigade during the mayor's absence. Mayor Martin was at Woodstock, Ont., today and was notified there by wire of the acting mayor's doings. His worship wired the city officials as follows:

"I am the mayor; do not submit any documents to the acting mayor for signature."

The New Westminster News

An independent morning paper devoted to the interests of New Westminster and the Fraser Valley. Published every morning except Sunday by the National Printing and Publishing Company, Limited, at 63 McKenzie Street, New Westminster, British Columbia. ROBB SUTHERLAND, Managing Director.

All communications should be addressed to The New Westminster News, and not to individual members of the staff. Cheques, drafts, and money orders should be made payable to The National Printing and Publishing Company, Limited.

ADVERTISING RATES on application.

THURSDAY MORNING, JULY 16, 1914.

SOCIALISTS AND ARMAMENTS.

The recent action of the Social-Democrat party of Berlin, Germany, in adopting a resolution favoring a general strike as a political weapon in Prussia is highly significant.

In the first place the Socialists are considerably stronger in Germany than they are in this country and in the second place the reason for their action is found in the immense increase voted by the German diet for armaments.

The action of the German party is only a forerunner of other similar tactics which will be adopted in many countries if the present mad race in battleship building and army upkeep continues. Every year sees larger sums voted for sea fighters and field equipment by all the great powers and there seems to be no possible end to the frenzy unless the exchequers of the nations give out or the peoples unite to stop the game which is draining the resources of industry to swell the dividends of shipbuilding plants and armament manufacturers.

ANOTHER WORLD'S RECORD.

Once again the Holstein cows at the Colony farm near this city have come into the limelight, this time with a world's record for milk production and the point for British Columbians to be proud over is that they were reared and bred out at the institution which has done so much already to advertise this province.

Besides these Holsteins, which have swept the boards wherever they have been exhibited, the Colony farm also holds some enviable records in Clydesdale and hackney horses, the superiors of which have yet to be located.

A Montana man has a chicken that sings like a bird. It will earn him more money if it can lay like a hen.

That report of a placer strike on the upper Fraser reminds old timers of the golden Cariboo days.

Steamship companies report a falling-off in Chinese immigration. It may be bad news for the steamship lines, but it sounds good to B.C.

Fashion dictates that the latest gowns for women shall button down the back. More fodder for the divorce courts.

The other day Spokane had more rain in one shower than usually falls there during the whole month of July and there are some who opine that at the next election Spokane will go "dry."

Somebody has written a pamphlet defending Dr. Cook, the alleged "discoverer" of the North Pole, which goes to prove that the old saying still holds good: There's one born every minute.

Penticton is raising a roar because, while its hens lay two thousand eggs per day, it has to spend ten thousand dollars every year to supply the local demand. Penticton should be thankful it has the ten thou. to spend.

In Arkansas a jury's verdict has been set aside by the court because the twelve good men and true consumed nine quarts of whiskey in reaching their decision. The wonder is that the jury didn't reach two verdicts after that performance.

Hi Gill, mayor of Seattle, in a recent speech said, "The people rule." Hi ought to know. It was the people who kicked him out of office and it was the people who yanked him back in again. Verily, the people rule, but they do it in a mighty queer way sometimes.

Things we will believe in when we see them for ourselves: That Huerta has resigned; that Roosevelt has retired from public life; that an automobile will run as many miles on a gallon of gasoline as the agent says it will; peace in the South Vancouver council; a drop in the high cost of living; home rule for Ireland; a husband who never stays out at night to sit up with a sick friend; a royal flush; ghosts.

FEWER CHINESE COMING TO B.C.

Falling Off in Oriental Immigration Apparent on All Inbound Steamers.

Since the Dominion order-in-council went into effect prohibiting the immigration of Chinese for a period of six months, a great falling off in Chinese travel is noticeable. The big transportation lines are beginning to feel the pinch of the new regulations. Many of the steamship companies that have hitherto transported large numbers of Chinamen are now using this space for the stowage of freight. The only Chinamen that are coming in at present are those returning from a trip to the native heath, or the merchant or student class. What few return men are making or planinng to make return passages, appear to prefer the larger steamships, and consequently the Canadian Pacific has the monopoly. It is expected that within another month al lthe returning Chinese will have reached these shores. Chinese passengers will then be a rarity on steamships calling at this port from the far side of the Pacific.

According to various agents there are now few Chinese aboard the various vessels now eroute from Hongkong. The Empress of Russia, which sailed from Hongkong on July 8, has only 100 Chinamen aboard against 800 on her maiden voyage. The C. P. R. white liner Empress of Japan had thirty-five Orientals aboard and the liner Monteagle had but twelve Orientals occupying the space that was designed for hundreds. The Osaka Shosen Kaisha liner Mexico Maru and the Nippon Yusen Kaisha steamship Yokohama Maru have no Chinese at all on their respective manifests.

NUBS OF NEWS

Work will be started immediately by the Dominion government on the Mount Revelstoke automobile road and will be pushed to completion.

* * *

St. John Harmsworth, a brother of Lord Northcliffe, is in British Columbia in connection with the operations of a syndicate of London capitalists which intends developing the radium springs near Windermere.

* * *

W. J. Long, the prisoner who escaped from the Fernie jail early Friday morning, was apprehended about 5 o'clock on Saturday morning about eight miles west of the city. Provincial Constable Boardman recaptured the prisoner.

* * *

Hart Munro, Frank Tillman and Jarvis Armstrong on Sunday secured two black bears, a yearling and a three-year-old on the Jordan trail, near Revelstoke, and in an hour with rod and line caught a basket full of speckled trout in Half-Way creek.

* * *

Poultry and poultry products have a marked influence on the meat supply, but less attention is paid by farmers to the breeding of farm poultry and their care than to any of the other animals. With easy possibilities for rapid improvement by the use of pure bred males our farm flocks still remain as a class decidedly underbred. Almost every section of the country can produce chickens. Every farm could maintain a larger and a better flock.

* * *

Westminster Trust company, New Westminster, has been registered under the trust companies act. Armstrong-Okanagan Land Co., Ltd.; H. T. Devine Co., Ltd.; London and Vancouver Investment Co., Ltd., and Sterling Security Co., Ltd., which were all doing a trust company business formerly, have decided to eliminate that feature of their business hereafter.

* * *

O. T. Stone and W. E. Dodder, judges of the rose show held at Kaslo Tuesday, awarded prizes as follows: Frau Karl Druschki, Mrs. P. McGregor; Mrs. Davis exhibited the best display of roses and won the books donated by the provincial government; Gertie Nordquist, Orpha Perry and Frances Caldwell won first, second and third prizes for the best decorated doll's carriage.

* * *

Still another life was added to the toll exacted in the buildinig of a railway, especially such a one as the Kettle Valley, which abounds in difficult and dangerous work. A man named Henry Mathieson, a Swede, was precipitated last Sunday morning from the top of a trestle bridge which spans the canyon near Kamloops and his mangled remains were picked up fifty feet below.

* * *

The ranch of H. G. Garner on the Greely creek road, one and a quarter miles from Revelstoke, is just now well worth a visit. On the ranch are 95 cherry trees laden with fruit that is a credit to the Revelstoke district and a striking demonstration of the fertility of the country and of its advantages for fruit growing. Mr. Garner specializes in the Bing and Royal Anne varieties. He expects to pick over 100 crates of cherries this year.

* * *

Twelve hundred and fifty pounds of Bing cherries has been the yield so far this season from ten trees at the ranch of Dill Bros. at Shoreacres, near Nelson, according to A. J. Dill, who returned from a visit to the ranch. The trees are eight and nine years old and Mr. Dill brought to Nelson with him several sample branches which were laden with the fruit. One ton has already been shipped to the prairies from the ranch. Royal Annes are coming in, states Mr. Dill, who believes that he will also have a record yield of this variety.

* * *

Monday saw the arrival in Nelson of the princesses from five of the cities of the surrounding district. They are residing during the week at the Presbyterian manse on Silica street and are being chaperoned by Mrs. Jones. They are boarding at the Strathcona hotel. The five young ladies who will surround the queen of the carnival, Miss Dora Jordan, on her throne are Miss Clara Leinss of Trail, Miss Clara Stanton of Rossland, Miss Ellen Sloan of Grand Forks, Miss Rene Nash of Fernie and Miss Drummond of Cranbrook.

* * *

The north end of Vancouver island has been the hunting ground lately of an unusual number of cougars. They are seen frequently on the roads and trails and are besides responsible for the death of a number of dogs and small stock. Some few months ago a large member of the species was discovered by a startled visitior in a dog kennel quite near to Mr. Skinner's house at Shushartie. R. F. Warren, of Cape Scott, is a fortunate hunter having within a short space of time accounted for about seven of these feline monsters.

* * *

S. J. Allen arrived at New Hazelton last week after an eight hundred mile trip through the interior. He would be on that trip yet had not someone stolen most of his outfit and left him with but very little food and no means of securing any. He had to beat it back to civilization. Sam has been prospecting in that country for the past fourteen years, and he believes he has secured something good a few miles out from Decker lake. His ore carries big silver values and he has a strong vein which he has traced several thousand feet on the surface. He is awaiting instructions from his partner in Vancouver.

* * *

T. A. McIntyre, of Grand Forks, hardware merchant, disappeared at 10:30 Monday night and has not been seen or heard of since. Mr. McIntyre had just recently moved his family to his ranch, some two miles east of the city. He started home about 10:30, but failed to reach there. His wife communicated with friends in the city by telephone in the morning to ascertain if he had remained in town over night, the road being in poor condition owing to the recent rains. Large numbers of citizens have organized parties and searched the country for miles around, but no trace of the missing man has been found.

VICTORIA CLERGYMAN ON MARRIAGE FAILURES

Some Marry Too Young—Bad Habits Wreck Other Unions—"Blessed Are the Debonnair."

Marriage, said Rev. J.B. Warnicker, a Victoria clergyman, in a recent sermon, was one of the oldest institutions in the world, and would last while the world lasted. The purpose of marriage was a high one, and meant the enrichment and enlargement of the character of each of the parties to it.

The causes of failure were several. Too often people married while too young to shoulder the responsibilities which came with their new estate. There was often on both sides too much tendency to idealization; the dream man and the dream woman were illusions which broke. Reason should have play as much as romance. Bad habits, drink, club life, etc., were also at the root of much domestic unhappiness, while lack of humor was a cause of serious misunderstandings in many homes. The French interpretation of "Blessed are the meek" was "Blessed are the debonnair;" cheerfulness was a very necessary element in the home. Too often the man and woman expected absolute conformity in thought; this was impossible and should not be expected. The sexes were different and would always remain so. The education of the mind and body were almost equally considered in all modern schemes of education; but the education of the heart was neglected. Bravery, faith, pity, and sympathy were all needed in the perfect marriage, and last, but not least, religion. A home without God was never an ideally happy one. Man had a soul as well as a body, mind and heart. It was notable that few divorces took place in truly religious households.

In concluding Mr. Warnicker told his congregation of Clara Butt's statement of the songs she was oftenest asked to sing during her recent tour round the world, "Annie Laurie" and the "Lost Chord" being among the special requests oftenest made. These songs typified the simple elements of life—religion and love—and the happy marriage would be found best where these two ingredients were combined.

WILL HUNT OCEAN FOR HIDDEN PERILS

Stackhouse Has Plans Laid for Cruise That Will Occupy At Least Six Years.

London, July 15.—Six years at sea and a voyage of 210,000 miles to hunt and chart islands, reefs and banks of doubtful location is what the British Antarctic and Oceanographical expedition now proposes to do for the benefit of the world's merchant marine. Originally Sir Ernest Shackleton and J. Foster Stackhouse intended only to survey and chart the coast of the Antarctic continent, looking for such menaces to shipping as might lie on their voyage down and back. But the charts disclose so many points marked D., P. D., and E. D.—doubtful, position doubtful and existence doubtful—that the explorers have added two and a half years to their projected voyage, which starts next December in the Discovery.

The seven seas have never been accurately charted because, says Mr. Stackhouse, being everybody's business it was nobody's business to do it. Even the north Atlantic has its doubtful islands and sunken rocks. Four different mariners, previous to the Titanic disaster, reported seeing rocks near the point where the ship went down, and this is one of the first things to be investigated by the iscovery. Polynesia, Melanesia and Malaysia are notorious for the volcanic and coral obstructions, and the Panama canal will open new routes through these dangerous sea. The South American and African coasts have their doubtful rocks. Mr. Stackhouse considers it just as important to find out that a menace does not exist as that it does.

The new sea charting expedition is financed by public contributions. Its fifteen officers and scientists have given their work for the next six years gratis. The only expenses besides the equipment are those incidental to running the ship and the pay of the crew of nineteen men. The foremost hydrographer of Great Britain, Captain J. A. Rupert-Jones, will have charge of the soundings, and Lieut. Humphreys will do the land surveying. Various other kinds of scientific work are planned, including observations as to the magnetic pole.

Existing charts disclose facts which have a disturbing influence on traffic, such as the presence of shallow surroundings in areas of deep water. Such places will be carefully searched for submerged rocks. All corners of the world will be visited and studied by the expedition.

The Discovery is a wooden ship with steam auxiliary, especially designed for work in icy waters, and she will carry the latest sounding machinery. While the voyage is planned to last six years, the officers and crew are signed on for seven in event of delays.

GREEK SOLDIERS DRIVE ALBANIANS

One Hundred Fugitives Arrive at Avlona in Deplorable Condition —Appeal to Powers.

Rome, July 15.—The mayor of Avlona and the president of the Albanian national committee have sent a message to the Tribune reporting that Greek regulars, disguised as Epirotes are passing over the frontier in large numbers and have driven before them 100,000 Albanians. Some of these fugitives have arrived at Alvona in a deplorable condition.

The message closes with an appeal to the powers to intervene and end an intolerable situation.

COSTS REAL MONEY TO HUG THIS GIRL

Muncie, Ind., July 15.—Miss Ethel Snider, 18 years old, today sued David Matthews, 61, a wealthy farmer of Hamilton township, alleging that on June 27, 1914, Matthews threw his arms around her, hugged her and kissed her, made declarations of love, and otherwise humiliated her. Miss Snider asks for $5,000 damages. The girl says she was working at the home of a relative in Royerton, ten miles north of here, and was in the kitchen when Matthews came in. Miss Snider swore out an affidavit against Matthews, charging him with assault and battery, and the aged man appeared before Justice of the Peace Spence and entered a plea of guilty and was fined $1 and ocsts.

SYNOPSIS OF COAL MINING REGULATIONS.

COAL MINING rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,500 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee will be permitted to purchase whatever available surface right may be considered necessary for the working of the mine at the rate of $10 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

PROVIDES A HOME FOR WILD GEESE

Ontario Farmer Has One Thousand On His Ranch at One Time.

That wild geese are shrewd enough to know friend from foe, and that, if you "throw a handful of feed at them instead of a thimbleful of shot," they will lose their fear of man and make their home within a stone's throw of human habitations, has been clearly demonstrated by the experiments of John T. Miner, of Kingsville, Essex county, Ontario.

The history of the growth of the flock on Mr. Miner's farm furnishes an interesting example of what can be done to tame wild birds. In 1904 Mr. Miner obtained seven wild geese, clipped their wings and placed them on his pond as decoys, but wild geese were so scarce that it was four years before any others joined them. In the spring of 1908 eleven came, the following year 32, and in 1910 as many as 350. Since that time they have been too numerous to give any exact estimate, but probably about 1,000 may be found on the premises at a time. Since 1911 no shooting whatever has been indulged in within the reserve. By moving the feed by degrees the geese have been coaxed to come right up to the house.

Wild ducks also frequent the pond, and some of these have been identified by aluminum bands, bearing Mr. Miner's address. By means of these he has established the fact that they return to his place, or if they fail to return he has been able to learn what has happened to them. One was shot as far away as Paris, Kentucky. Those that return nest in the neighborhood and bring up their young before again migrating.

Mr. Miner's experiments are a striking illustration of how easy it would be to conserve the migrating bird life of this continent if only refuges were provided, where the birds could remain for a short time unmolested, during their seasonal flights to their breeding grounds and back again.

WIFE ON A VISIT HUBBY MARRIES AGAIN

His Better Half Accused Mineapolis Man of Bigamy—Sake of an Old Sweetheart.

Minneapolis, July 15—Declaring her husband had sent her to visit her parents at Annandale, Minn., and less than a fortnight later had eloped with an old sweetheart, Mrs. Bessie Hoffman, 3754 Dupont avenue north, today asked the county attorney to prosecute Clyde M. Hoffman for bigamy.

Nine days after they had arrived in St. Paul from California Mrs. Hoffman says her husband obtained a marriage license in Mineapolis to marry Mrs. Alice Nicholson.

Five days later on June 20 she says the ceremony was performed and the couple left, she believes, for Duluth. She first knew of the marriage, she says, when a friend mailed her a clipping from a newspaper showing the license had been issued.

She says Hoffman left her at Vancouver two and a half years ago and attempted at that time to marry the Nicholson girl, but was prevented by Miss Nicholson's mother.

The Hoffman's married in Minneapolis nine years ago, according to the wife. Four years ago, she says, they went west. Two and a half years ago, while she was ill at Vancouver, her husband came to Minneapolis. That was the first she knew of his infatuation for Miss Nicholson. She says he was prevented from marrying Miss Nicholson at that time when the Vancouver police started a search for him and located him in Minneapolis. Mrs. Hoffman at that time was ill and destitute in Vancouver.

In December, 1913, Mrs. Hoffman began suit for a divorce in California. She was granted preliminary papers and alimony, she says. Hoffman pleaded with her to come back to him. She did so. They lived together, she says, until June, when they returned to Minnesota. When they arrived in St. Paul on June 6, Hoffman, she says, suggested that she visit her parents at Annandale. The marriage and elopement with the Nicholson girl followed, according to Mrs. Hoffman.

Records at the court house show that Clyde H. Hoffman obtained a license to marry Alice E. Nicholson on June 15.

MORE TELEGRAPHS FOR VANCOUVER ISLAND

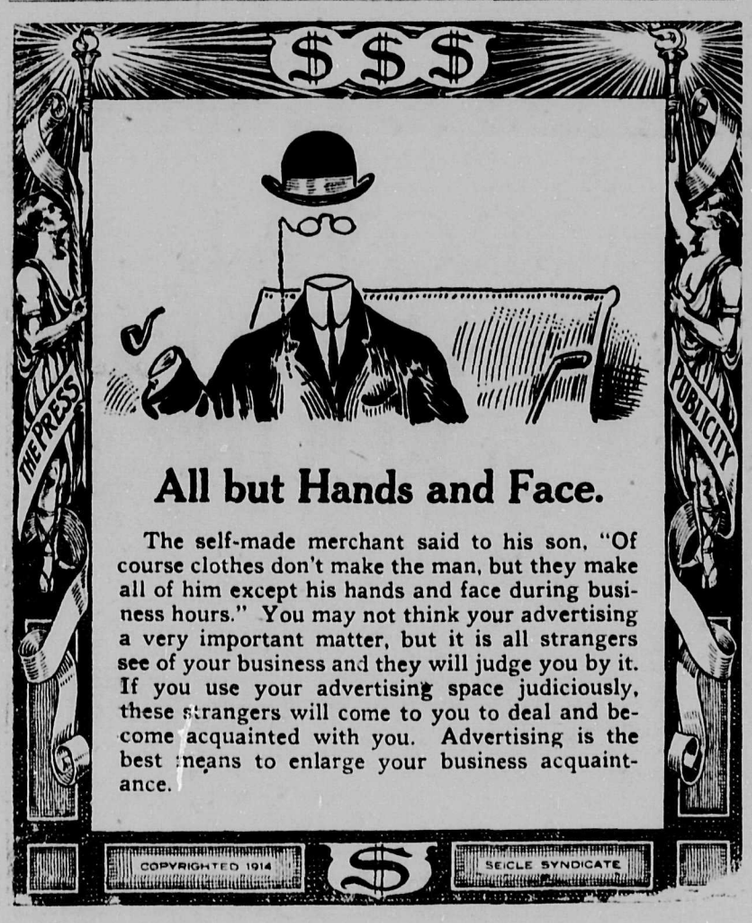
Dominion Government System There to Be Extended at a Cost of $50,000.

Victoria, July 15.—By the end of the year the Dominion telegraph service on Vancouver Island should be as nearly complete as residents of the different districts, no matter how remote their situations, could desire. The supplementary estimates, which received the endorsement of the Dominion parliament at the last session, contain a vote of $75,000, the greatest part of which will be expended in extensions and improvements on the island. The running of a wire almost to the northern extremity of the island will cost $50,000 alone, and there are numerous other works that will exhaust considerable sums.

Operations in connection with the installation of the new wire will commence at an early date in order that the fullest possible use may be made of the summer weather. A start will be made from the present Campbell river station. From there the wire will be run to Hardy bay, thence across the island to Quatsino, and from there it will be taken to Holberg and San Josef bay.

The benefit of furnishing communication to the outlying settlements of the north of the island with all points served with telegraph on the American continent, does not need to be dwelt upon. It will be a boon to those directly affected, removing one of the strong objections to the life of island settlers by putting them in touch with the world. It is also expected to be of marked assistance to the fisheries department in its patrol of Vancouver island's territorial waters, as well as to the provincial government in its fight against the destructive forest fires of the summer in those localities.

Some other important, although comparatively minor, extensions are in hand. One is the stringing of a wire from Clayoquot to Ptmarigan, the latter being a community situated on Bear river. This will serve the mines at Ptmarigan and Kalappa, as well as the Mosquito Harbor Lumber company. Another branch to be installed is from Ganges, Salt Spring Island, by way of Fulford harbor, Isabella point and Pier island to Sidney, thus giving additional outlet to the gulf island system. An exchange also is to be placed at Ganges for the accommodation of a large number of subscribers in that growing centre. Some improvements and repairs are to be undertaken in order that the telephone service between Victoria and William Head may be made thoroughly satisfactory.



All but Hands and Face.

The self-made merchant said to his son, "Of course clothes don't make the man, but they make all of him except his hands and face during business hours." You may not think your advertising a very important matter, but it is all strangers see of your business and they will judge you by it. If you use your advertising space judiciously, these strangers will come to you to deal and become acquainted with you. Advertising is the best means to enlarge your business acquaintance.

CURIOUS SOCIETY IS BEING FORMED

Descendants of Revolutionary Traitors Plan Organization.

Old Blacklist Discovered—Document Contains Names of Men Loyal to King George.

Philadelphia, July 15.—The only society in the world of descendants of traitors is in progress of formation in Philadelphia, the Cradle of Liberty. Prominent people of colonial lineage, whose ancestors were Tories or sympathizers with King George during the revolutionary war, are being urged to join an organization, as yet unnamed which will have for its object the glorification of so-called loyalists, who were accused of high treason against the infant American republic. The fact that their ancestors mixed ground glass with flour sold to Washington's army at Germantown or refused to send provisions to his starving army at Valley Forge does not detract from the enthusiasm evinced by the organizers, some of whom have inherited the spirit of their forefathers and to this day disbelieve in the principles of American government.

Discover Blacklist.

The idea for the formation of the society originated with the recent discovery of an ancient document known as the "Tory Blacklist," published by the attorney general of Pennsylvania after the war. This list contains the names of many prominent men in the affairs of Pennsylvania in those days—men who frowned upon the continental congress, who entertained the British during their occupation of Philadelphia and who openly scoffed at the Declaration of Independence. A movement was started after the war to prosecute them for treason but it never matured. The list made up by the attorney general, however, is still extant and tells of their danger.

Philadelphia for King.

Although the seat of the patriotic government, Philadelphia in revolutionary times was still the hotbed of loyalism. The Quaker element, opposed to war or violence, passively supported the British crown and refused to aid the struggling continentals. The fashionable element of what was then the leading city of the colonies was Tory. No season was ever so brilliant as that of the winter of 1777-78, when the British army occupied the city while Washington's tattered forces froze and starved at Valley Forge, a few miles away. Families, whose descendants are still among the leaders of fashion in the city royally entertained the redcoat invaders.

Take It Seriously.

It is among these social leaders that the society is being formed. They are taking it seriously too. They see no joke in the fact that their organization will be based on a list of men who were about to be prosecuted for the highest crimes. Eligibility to membership in the society in fact will be determined by the blacklist issued by the attorney general. The membership of the organization will not be confined to Philadelphia, but will extend all over the country where the descendants of Tories have drifted, and the number of the latter has reached surprising figures.

The blacklist which is responsible for this extraordinary organization was resurrected from a mass of aged decuments by Dr. Henry Leffman, a well known chemist and collector of historical manuscripts of this city. It was he who suggested the formation of the society in a jocular way to descendants of those whose names appear in the list, and the latter took the matter up seriously. News of the finding of the blacklist spread like wildfire among those whom it affected and in a few days a score or more had expressed their willingness to aid in the organization of the society.

Committee at Work.

A self-appointed committee of ten of these descendants is now engaged in a canvass for other members and in the near future a meeting will be called for the purpose of effecting permanent organization. This will doubtless be accomplished in one of the Quaker meeting houses, the congregations of which contain many descendants of men who are admitted to have hindered the cause of American independence by their allegiance to the English king. Just what influence such an organization will have in the community and nation is a matter of conjecture but no fear of this deters the organizers from their plan.

Their object, they declare is to preserve records of these men, their ancestors, who were maligned by the continentals and whom many persons despise today, and to perpetuate the interest in common formed by their ancestors under trying conditions, when they believed they were doing their duty by God and man in supporting their sovereign, King George of England and opposing war and bloodshed with all its horrors. The present generation of Americans, in this age of progressiveness, they declare, are more apt to recognize the justice of this.

The committe is now delving into genealogical lore to ascertain, if possible, just who the descendants of these loyalists are. They also will advertise in the historical societies and magazines for persons eligible for membership. There will be no attempt, however, to secure a great number of members, as the society will retain a certain exclusiveness in order to afford proper prestige and standing among other hereditary organizations. Not much is expected to be accomplished during the summer months.

COLONY FARM COWS MAKE NEW RECORD

Victoria, July 15.—Hon. Price Ellison, minister of finance and agriculture, stated yesterday that a world's record in milk production had been scored at the Colony Farm at Coquitlam, near New Westminster, where ten Holstein cows are yielding over 100 pounds of milk per day.

"As far as I know, and I have no doubt on the point," said Mr. Ellison, "ten cows yielding over 100 pounds of milk per day is a world's record. They are superb animals, these Holsteins. They were reared and bred at the Colony Farm and have captured all prizes wherever they have been exhibited.

"The Colony Farm has another world's record in respect to horses—Shires, Clydesdales and hackneys. We have animals in these classes which cannot be surpassed, if equalled, anywhere."

It may be added that very shortly the Colony Farm will pass from the province to the control and jurisdiction of the board of governors of the provincial university, a fine asset with which the staff of the agricultural college may begin its labors.

MODERN FIGHTERS CAREFUL OF THEIR SKINS AND CHANCES

London, July 15.—It's a fairly good thing to have all the confidence in the world, but it's much better to have a good punch. And it's still better to have the will to go in and deliver that punch—or go down trying.

Frank Moran lasted twenty rounds with Johnson. There would have been more honor to himself if, instead of merely losing the decision, he had gone down to an early defeat while doing his best to win. What kind of a showing will Carpentier and Gunboat Smith make tonight?

"Come back with your shild—or upon it," said the Spartan mother. That Spartan idea doesn't seem to make much of a hit with the modern title hunter. He'll come back without his shield if necessary, but he doesn't lose sight of the main idea that he wants to come back.

Can you imagine Bob Fitzsimmons, in his fighting days, dwaddling through twenty rounds with Johnson, taking a constant tapping and mauling and never once tossing victory or defeat into the balance and going in to beat down his man or be beaten down himself? Fitzsimomns never went into a fight without taking chances and doing his level best. At Carson, a middleweight fighting a heavyweight for the championship of the world—and the cleverest heavyweight in the world at that—Freckled Bob fought an uphill fight, steadily, doggedly aggressive, until his unceasing attack wore Corbett down and prepared him for the terrific solar plexus blow that gave Fitz the title. He took chances—a hundred of of them.

Never Steped Back.

John L. Sullivan always went in to fight until either the other man dropped or he dropped himself. Jim Jeffries would not take a backward step when he fought. Neither would Tom Sharkey, who fought Jeffries, Fitzsimmons, Corbett and all the rest of the good men in his day in the samer ushing style, never for a second admitting to himself that he was up against a man who could beat him. Real fighters, they went in to win or lose, not to stay the limit.

Frank Moran, from all accounts, was outclased by the black champion. His gymnasium-built strength was the first to give out. Clean living could not offset Johnsen's skill and natural physical power. Johnson's style of fighting, always defensive, waiting and countering while the other man's attack leaves him open, made Moran forget what he knew of boxing and hard hitting. Puzzled, like many others, who have fought Johnson, he felt his own helplessness. Early in the fight he realized that he was outclassed, and from that time on he just "stuck it out." Moran deserves credit for his gameness under punishment. But that sort of gameness, without aggressive fighting courage, doesn't win great fights.

Johnson can keep busy in the near future if he wants to. He can fight Jim Coffey in Dublin, or he can fight Gunboat Smith in Paris.

Gunboat Smith, if he wins tomorrow, has best right to a match. The Gunner has fought his way to the top of the class next to Johnson. He has whipped Langford—a thing no other fighter has ever accomplished. He has beaten Moran, Willard, Morris and many others. He's a cool yet extremely aggressive fighter. If Johnson can beat the Gunboat, providing the latter beats Carpentier, no other fighter will have much of a chance with him at present.

Willard Anxious Also.

Jes Willard is anxious to fight Johnson. Jess fights somewhat in the Johnson style. He stands off and waits, and if he's stung he hits one astonishing wallop before he drops back on the defensive again. Because of his great size and strength, Willard might have a chance.

Carpentier, the Frenchman, will go after Johnson if he succeeds in beating Gunboat Smith. The winner of this match will probably have the next chance to fight for the world's championship.

But that chance may not come for some time, Johnson, broke before the Moran fight, is now rolling in wealth again, and may go back to the easy life until he needs more money. Johnson took nearly all the gate money and all the picture money in Saturday's fight. He practically promoted it himself.

A funny angle of the affair was that for the first time a Frenchman fought for and held a world's championship. Johnson is now a naturalized citizen of France.

ADVERTISING TALKS

By D. Maxwell Merry

Advertisers, at all times, must treat their advertising seriously and live up to their promises in every respect if they wish to succeed. People will, a good deal more easily, go into a store for one cheap thing than be drawn by a general announcement that the goods on sale are low priced.

A bargain offer, if rightly made, is a "GOOD DRAW." The right way to offer a bargain is to give a reason for offering it. People are apt to be suspicious that a cut in prices means some fall in value. It must be made clear to them, when a bargain is offered, that the price is low, not because there is anything the matter with the goods, but because some circumstances have made the storekeeper anxious to dispose, at a sacrifice, of all that he has on hand, or else that they must be taken into his confidence and told how he has acquired the cheap goods.

Bargain advertising need not necessarily be confined to any particular period. A good deal can be done by an alert dealer in many lines of business to clear out his superfluous stock by offering individual lines from week to week.

One plan is to establish a regular bargain day, once a week, once a fortnight or once a month, and on that day to set aside a department of the store for goods sold at reduced prices. If this bargain day is frequent, say weekly, people will begin to watch for the advertising and the store will get an increase of business on that day because, having picked up their bargain, shoppers will drift into other departments. Even the small store can run a bargain offer weekly with success, and the practice has often developed small stores into big ones.

Bargain offers are sometimes made for a specific purpose apart from the direct purpose of selling an increased quantity of certain goods. In one large store it was noticed that, while business was brisk, there was hardly anything doing between 12 and 2. The proprietor therefore instituted a regular bargain time during those hours daily. Thus he relieved the pressure on the store during other hours of the day and avoided having his assistants standing about doing little or nothing for two hours at lunch time.

The same plan could be adopted where one particular day is a slack day. It is a slack day because it does not happen to be convenient to people, but they will make it convenient if they can buy cheaper on that day.

The News is the Morning Paper of New Westminster and the Fraser Valley. See that your business announcements appear in its columns.

A Well Invested Quarter

Wills

There is a period in the life of every man when he thinks about the future welfare of those dependent upon him. Sometimes this does not come until sickness overtakes him. Then he makes a will—but it may be made under, wrong influence.

Had the will been made during good health, the most deserving persons—according to the deceased's wish—would have shared in the distribution of the estate.

Do you not realize that it is your sacred duty to no longer delay making your will?

The advice of the Dominion Trust company in this matter may be of value to you. All such discussions are treated in strict confidence.

Dominion Trust Company.

The Perpetual Trustee.

Soveriegn Will Attend.

The New Westminster Y. M. C. A. will be represented at a conference of employed officers of Y. M. C. A's of the northwest to be held at Dellano Beach, Tacoma, Wash., from August 3 to 10 inclusive. G. I. Soveriegn, physical instructor, is making plans to attend.

For strawberry, raspberry, and all fruit boxes try the British Columbia Manufacturing Co., New Westminster, B.C. (3528)

Will Pay British Orders.

Yesterday morning Postmaster McQuarrie, who resumed his duties following a vacation, received notice from Ottawa to pay British postal orders from now on. This order comes as the result of the New Westminster office being raised to first class rank on a par with Vancouver and Victoria.

Notice of Removal—W. F. Tate, refracting optician, has moved his optical parlor from the Dominion Trust block to Eilers' Jewelry store, opposite the B. C. E. R. depot. (3657)

Burnaby School Meeting.

Some more fireworks are likely to go off at West Burnaby tonight when the regular school board meeting will be held. The proposed transfer of Principal Lowther and his assistant, Professor Knox, from the Edmonds street school to the institution at Kingsway west, will provide material for discussion, a delegation from Edmonds planning to attend and again air their grievances.

The Fraser Ferry Navigation company's ferry No. 1 is open for charter to excursions and picnics. For further information apply to Ed. Falch, telephone 164. (3600)

Good Time at Camp.

The New Westminster boys attending the annual Y. M. C. A. camp at Howe Sound are reporting a splendid time with good weather. The majority of the members in camp hail from Vancouver. On Tuesday several from this city will pay a visit to Howe Sound, the campers arranging a special sports program during the afternoon. H. H. Johnson, boys' secretary, is assisting F. J. McKeller, of Vancouver, in having charge of all operations.

Many Licenses Issued.

Before the sockeye season commences in full earnest the government officials are expecting to issue a record number of licenses, more than 2220 having been handed out at the fisheries office up to yesterday. This is only 270 shy of the figures of last year when the big run was on. The reason for this is the lack of employment among citizens along their different lines and who in turn are seeking a living by engaging in the salmon industry.

Social and Personal

Mr. and Mrs. J. H. Todd left yesterday on an automobile tour of Washington state.

* * *

Miss Jean McPhail and Miss Eleanor Bishop left yesterday morning for Bowen island where they will spend two weeks with the parents of Miss Bishop at their summer home.

* * *

Miss A. Sipprell, of the Royal Columbian hospital, left yesterday for Seattle where she will spend a vacation with her parents.

* * *

Miss Effie Morrison was able to leave the hospital yesterday for the first time following a nine weeks' illness as a result of bloodpoisoning.

* * *

Mrs. Joseph Dorgan left yesterday on a four months' tour of Eastern Canada planning to spend considerable time in Toronto and London, Ont.

* * *

City Electrician P. Bowler has returned from an extended visit to his old home in Montreal. Mr. Bowler found the weather in the east nothing to be compared with that on the coast, a continued dampness holding back the crops. The prairies looked prosperous enough but British Columbia is the one best bet according to the guardian of New Westminster's lighting plant.

* * *

Arrivals at the Hotel Russell yesterday were: F. Johnson, Bellingham; Mr. and Mrs. Woods, Nanaimo; F. Wright, Calgary; E. Bennett, Vancouver; Mr. and Mrs. J. Guichon, Mrs. L. Guichon, Port Guichon.

At the Theatres

THE ROYAL THEATRE.

The first episode of the "Million Dollar Mystery" is all it promised to be, namely, the beginning of the most stupendous motion picture ever conceived! The acting left nothing to be desired. For those unable to see the first episode, "The Airship in the Night," a synopsis of the preceding chapter is: Hargrave, seventeen years before the story opens, left his only child on the doorstep of a girls' school. He is a traitior member of the "Black Hundred," a Russian secret society. He has become a millionaire. The band discovers him and knowing he plans to disappear with his now eighteen year old daughter, Florence and a million dollars he has drawn out of the banks. The million dollars disappears mysteriously. Hargreave, with his house surrounded, is forced to make a desperate escape in a balloon, which, later, is found a wreck floating on the sea.

Episode No. 2, entitled "The False Friend," will be at the Royal theatre this Monday and Tuesday, July 20 and 21, is as follows: Florence arrives in the city to find her father gone, no one knows where. Jones, his butler, discloses a mysterious letter charging her to trust him completely. The conspirators turn their attention to Florence. How the princess wins Florence's confidence, secretly admits members of the band into the house to search for the $1,000,000, and who failing in this, attempt to kidnap Florence, only to be miraculously foiled by Norton, forms one of the most exciting moving pictures ever filmed.

Each week an episode of this stupendous motion picture will be shown at the Royal theatre, each episode an unfolding of thrills, new thrills, greater thrills than ever before attempted.

Ten thousand dollars in cash will be awarded for the best 100 word solution of this mystery. See the pictures at the Royal. Follow the developments each week. Then send in your solution. You have the chance to win $10,000. Enquire at the box office for further particulars.

NEAR BREAKING POINT.

Strike Crisis Approaching Between Trainmen and Railroads.

Chicago, July 15.—Relations between the enginemen of the railroads west of Chicago and the general managers' committee approached the breaking point today when the men's representatives prepared to present an ultimatum on wages and working conditions.

The managers' committee declared yesterday that the demands could not be agreed to.

Several members of the engineers' committee predicted today that a general strike would be called unless the managers modified their attitude.

WRECKED SAILORS ARRIVE AT SEATTLE

Seattle, July 15.—Captain George W. Porter and twenty-nine members of the crew of the whaling bark Gayhead of San Francisco, which was wrecked on Castle Cape reef, Alaska, June 27, arrived here today from the iorth on the steamship Mariposa. They will proceed to their homes in San Francisco. The Gayhead left San Francisco October 4, and after cruising during the winter in the south seas was bound for Rerhing sea when she was caught in a fog and struck the reef. The vessel with her cargo of more than 9000 barrels of oil, was a total loss but all the men reached shore. After camping on the beach two days they went to Chignik where they were picked up by the steamer Dirigo which took them to Seward where they boarded the Mariposa. The loss on the Gayhead was $44,000.

DUKE IS GREETED BY THOUSANDS

St. Johns, Nfd., July 15.—The Duke of Connaught had a busy time today. He landed at ten o'clock this morning in full uniform, from the warship Essex, which thundered a salute as he left for the shore. Hhe was received by the governor, the premier, the chief justice, cabinet ministers, Anglican and Catholic bishops, other church heads, municipal councillors and foreign consuls.

He then drove with the governor through the city streets, which were packed with cheering crowds. The duke stopped at the King George the Fifth institute built last year through Dr. Grenfell's exertions for the use of the colonial fisherfolk. He opened the newly built extension of the home for girls.

NELSON'S BIG SHOW A GRAND SUCCESS

Second Day of Chahko Mika Carnival Scores Record Breaking Attendance—Fine Program.

Nelson, July 15. — Attended by crowds which broke all records in Nelson the second day of Chahko Mika carnival was marked by the flight of a hydro-aeroplane, the crowning of Queen Dora Jordan by Hon. Martin Burrell, minister of agriculture, the winning of the tyro rifle match in the interior of British Columbia Rifle association's annual meet by L. M. Cameron of Trail, of the ladies' match by R. W. Hinton and Alexander Carrie of Nelson, who both scored a possible, and of Headquarters' association cup by F. Hutton of Grand Forks.

Today I. Lehman, veteran shot from Kamloops, will defend the Daily News cup won last year. Big street parades of Dkays from all parts of the province and fraternal orders, including veterans were other features. R. F. Green, M.P., who is attending the old-timers' reunion, accompanied by H. B. Thomson, M.L.A., of Victoria, will crown the Rose Queen, Miss Edna Malone.

DENIES THE STORY.

Hindus Claim Converts Not Being Sought to Teach Sedition.

Vancouver, July 15.—Eohan Lal, a member of the local Hindu colony, denies the truth of the story that volunteers were being invited by the Hindu leaders here to go to India and spread sedition in connection with the failure of the Komagata Maru contingent to land in Canada. Mr. Lal declared that such information as this was doubtless given to the immigration authorities by certain Hindus who told their fellow countrymen one thing and gave another to the officials, just for their own particular ends. Mr. Lal said he knew nothing about the truth or falsity of the statements that various Hindus had been attempting to buy revolvers in Victoria stores.

"All Hindus are not seditionists," he declared. "We simply seek rights of autonomy and we think too that if the British will not let us get into Canada then they should not come to India and refuse to give us franchise rights."

Icebergs Still Endanger.

Boston, Mass., July 15.—Icebergs still endanger the trans-Atlantis liners, two incoming steamers reported today. The Holland liner Soestdijk sighted eight large bergs and a number of growlers 200 miles off St. Johns, Nfld. The Allan liner Numidian reported passing three great bergs Friday.

ERA OF PEACE FOR MEXICO

(Continued From Page One.)

might recognize the legality of Carbajal's position as provisional president, hopes were raised today among South American diplomats, that nevertheless, negotiations might be begun between representatives of Carranza and Carbajal for the speedy transfer of power to the constitutionalists.

It is practically certain that Emilio Rabasa, Augustin Rodriguez and Luis Elguero, who represented Huerta at the Niagara Falls mediation, will be designated by Carbajal to look after his interests in this country. That the mediators now will make another effort to bring the two factions into conference is considered very likely.

Carranza's Chance.

General Carranza, in the opinion of the mediators, would profit greatly by entering into such conferences. By doing so he might guarantee himself immediate recognition by the United States, Argentine, Brazil and Chile. Under the terms of the protocols signed at Niagara Falls, the United States promised to recognize any government set up by agreement between the two Mexican factions without waiting for an election. The agreement between the two principal elements would be taken as tantamount to an expression of the will of the Mexicans.

Should Carranza refuse to parley with the Carbajal government and insist on taking Mexico City by force, setting up a military government, recognition in all likelihood would be deferred until an election was held. Carranza's objections hitherto have been that he could not agree to any compromise provisional president, but must insist on the plan of Guadalupe.

It is believed in some quarters here that Carbajal may make an effort to have Huerta given immunity from arrest if he stays in Mexico City. The Huerta delegates in New York have tried to secure guarantees for him, but even if given, friends of the dictator think he would be safest out of the country. It is not thought he will depart for several days at least, preferring to offer his services to Carbajal in the field if a final rally of federal troops is made against the constitutionalists.

Huerta's resignation marks the culmination of more than a year's active effort on the part of the United States government to force his retirement. John Lind was sent to Mexico last summer in an effort to bring about the withdrawal of Huerta. President Wilson later went to congress and revealed the terms on which Huerta had practically been asked to retire from office. An embargo on arms was placed on both Mexican factions and the Washington government then began its policy of cutting off financial aid for the Huerta government, not only from the United States but also from Europe.

With Huerta's retirement the constitutionalists feel that their revolution has virtually triumphed. They turned against him the moment he overthrew Madero, the constitutional president of Mexico, in February, 1913, and have waged their war with unrelenting vigor ever since.

U. S. Will Remain.

The American forces will not be withdrawn from Vera Cruz until a stable government has been established in Mexico City and recognition has been accorded the new government. The feeling is general, however, that if Carranze gives guarantees to political offenders as well as the people generally recognition will promptly be extended by the United States and the nations of Central and South America.

Incidentally, the resignation of Huerta now places Europe on an equal footing with the United States with respect to the authorities at Mexico City. The powers of Europe had recognized Huerta, but on account of the pronounced attitude of the United States, they are expected to follow the lead of the American government before extending recognition again to Carbajal or his successor.

POLICE WITNESS DARING ROBBERY

Chief Griffiths, Captain Searing and Two Motorcycle Men See Holdup from Headquarters Windows

Seattle, July 15.—While Chief of Police Austin E. Griffiths, one of his captains and two police officers looked on, two young men attempted one of the boldest of recent holdups last night when they stopped a man directly opposite the police headquarters and after beating him up, took away his purse.

Chief Griffiths, Captain ... F. Searing and Motorcycle Patrolmen C. M. Ballard and D. M. Blaine chanced to be looking out of the station at 10:30 o'clock, when they saw two men hold up a third on Yesler Way, between Fourth and Fifth avenues. The victim, they said, was seized by the neck and dragged into an alley.

Instantly two windows went up. Chief Griffiths and Captain Searing darted out of Captain Searing's office, while the motorcycle men, who were in the police telephone operator's room, rushed out from there. The two holdup men, surprised, started to run.

Blaine captured one almost in front of the Yesler Way entrance to the city jail, while Ballard followed the other and, after firing a shot, overtook him at Third avenue and Yesler Way.

Their proposed victim gave his name as Oliver St. Anthony, and his residence as the Gladstone hotel, 408 Terrace street. He was within forty feet of his home when the men seized him. He is 48 years old and foreman for a contracting firm.

The two prisoners gave the names of Joe Allen, 24 years old, teamster, and Thomas Ryan, 27, ironworker.

St. Anthony told the police the men took from him a purse containing $8. The purse was found on Yesler Way near Fourth avenue. The two prisoners are held on an open charge pending further investigation.

CON JONES JUMPS BACK INTO LACROSSE

Former Vancouver Magnate Makes an Offer to New Westminster Players—Mainland vs. Island—Jones Said to Hold Key to Proposed Minto Cup Series with Big Four and N. L. U.

Con Jones is back in lacrosse. The same Con Jones who in years past has led team after team against the Salmon Ballies. The same old warrior who Westminster believed had been battened down in a solid oak chest during the summer of 1913 and safely consigned to Davy Jones. Mr. Conrad Jones came back last night at a meeting held at the Royal Oak hotel, Burnaby, when he unfurled a plan to a majority of the New Westminster players, which while not accepted, will probably be favorably acted upon at a meeting of the Salmon Bellies to be held either today or Friday.

Providing the new plan of action is accepted the British Columbia professional lacrosse situation will resolve itself into a fight for the Minto cup between teams representing the lower mainland and Vancouver island, the games being played in Vancouver and Victoria.

Manager Jones.

Con Jones will be manager of the mainland team which will be comprised of the New Westminster players with perhaps two additions.

Up to Sunday last the professional game looked to be as dead as the proverbial door nail. On that day Con Jones got into telephonic communication with the sporting editor of The News asking how matters stood with the local team and that if the players were willing he would be quite agreeable, perhaps anxious to hold a little confab, say at the Royal Oak hotel on some evening of this week.

Several of the players were found to be away camping and therefore could not attend last night's gathering, but those present went into the close details of the scheme and as before stated, failed to come to any definite understanding.

Jones' arguments in favor of his breaking into the game again at this stage can be summed up as follows, in his own words: "The Nationals of Montreal will not be out in quest of the Minto cup this fall unless I give the say so.

"The agreement entered into with the Big Four last year still holds good. The eastern magnates have given me their word that it will hold good until 1915.

"Len Turnbull, Johnny Howard, Newsy Lalonde, Doughy Spring and Harry Hyland are still the property of the British Columbia league, meaning myself and the New Westminster club.

"Whether I get back in the game this year matters not. I'll be back in the game in 1915 working with the Big Four. You can just bet your life on that.

"Vancouver is of sufficient size, but New Westminster is not large enough to support a professional team when competing against Vancouver. Run the league as the island vs. the mainland and there will be enough interest left and to be worked up to make the pastime a go."

Weekly Salaries.

Condensing the situation as it now stands, the Salmon Bellies would play in Vancouver as representing the lower mainland. The players would be guaranteed a weekly salary with a chance, but no definite promise, of receiving a bonus at the end of the season. If acceptable to the Royals the proposed new league would stage six games ending on Labor Day, after which arrangements could be made to handle any opposition from the east in the shape of the Nationals or Rosedales or both. Con Jones would be manager of the mainland team and would have the absolute say in all matters.

Returning from last night's meeting one of the New Westminster players came through with the dope that the days of split gates and co-operative teams are a thing of the past. That the system worked out in the east during the past two years where the high salaried players received a drop in wages to the $25, $30 or $35 a week limit has at last reached the coast and if the players hope to get anything more out of the game they might as well accept the situation as it now stands. The meeting to be held this week will decide.

JAPS LOSE

Local All-Stars Defeat Meiji University Team 7-4—Record Crowd at Queens Park.

The Meiji university baseball nine from Japan received a severe drubbing at the hands of New Westminster, the final score ending in favor of the locals 7 to 4.

Seventeen hundred fans, the largest that has ever attended a baseball game played at Queens park, attended last night and witnessed a contest which was well fought out from start to finish, with the Japs by no means disgraced. The little brown men played an uphill game from the third inning, when after spotting the visitors one tally in the first, the locals pulled out in the lead from which they were never headed.

Hurley and Huhnke, the New Westminster battery, were the heroes of the struggle from a New Westminster standpoint, the former pitching a heady game when his infield was wobbly, while the star backstop from Fraser Mills was heavy with the stick, getting three hits at five times to bat.

Both teams were very liberal with errors, the varsity allowing eight, while the stars were slightly in the rear with seven. With the exception of Dowd and J. Gay, the Royals played splendid ball, Gay muffing a brace while Dowd was away above his class in attempting to hold down the initial sack.

Featuring for the visitors was Yamamura, the centre fielder, whose ability to pull down difficult flies twice won him the plaudits of the crowd.

The full nine innings was played, Umpire Fred Lynch hustling the teams into position and thus providing the fans with the first fully played evening game of the season.

Score:	R.	H.	E.
Japanese	4	4	8
All-Stars	7	10	7

Batteries: Hurley and Huhnke; Nakamura and Yebizuka.

BIG FIGHT TODAY

Great Interest Being Shown on Gunboat Smith-Carpentier Scrap—Odds Favor Frenchman.

London, July 15.—Boxing experts here show a remarkably even division of opinion as to the chances of Gunboat Smith, American heavyweight, and Georges Carpentier, the French heavyweight champion, in their 20 round match to be fought at Olympia tomorrow night.

The betting odds today were perhaps a shade in favor of the Frenchman, but this was due probably to the enthusiasm of his countrymen, great numbers of whom have crossed the English channel to support their hero. They brought with them a great deal of money to back their compatriot, whom they described as a "fighting boxer," while they call Smith a "boxing fighter," and they contend that science is bound to defeat the trans-Atlantic punch.

Interest in the contest is enormous and the attendance promises to create a record for this country.

CHAMPIONSHIP TENNIS

Eight Remain in Tourney at End of Fourth Round.

Cincinnati, July 15.—With all the matches in the fourth round of the fifth clay court championship tennis tourney completed, four Californians, one Minnesotan and three Ohioans remain tonight to contest for championship honors in the men's singles. E. Fottrell and Clarence Griffin of San Francisco; Nat Browne and C. Wayne of Los Angeles; J. J. Armstrong of St. Paul and R. A. Holden, Jr., Clifford Lockhorn and H. T. Emerson all of Cincinnati, won their way into the fifth round here today.

In the ladies' singles both Miss Mary Browne of Los Angeles, national woman champion, and her sister, Mrs. R. H. Williams of Chicago, won their way into the fourth round as did also the Misses Madelle and Mary Lyons of Louisville.

Johnny Evers Injured.

St. Louis, July 15.—Second Baseman Johnny Evers of the Boston Nationals probably will be out of the game for several days because of an injury received during Monday's game with the local team. In the seventh inning he was spiked by Cruise when the latter slid into second base. He played in Tuesday's contest but today the wound was inflammed and the club trainer advised a lay-off of several days.

MINERS KILLED BY QUICKSAND

Seven Miners Meet Terrible Fate in Michigan Mine—Others Have Narrow Escape.

Iron River, Mich, July 15.—Seven miners were killed in the Balkan mine at the Alpha location near here today when sliding sand caused a cave-in.

The miners were drilling into a roof. The drill hit quick sand and with a shout the men, about 30 in number began a rush for the mouth of the tunnel. Seven of them were overtaken and killed by the quicksand which filled every crevice of the mine.

The rest of the men ran for their lives, pursued by the sand. Two were caught while trying to reach a ladder. One of these was compelled to shed his clothing. He struggled naked from the mine. The other man lost his boots which became engulfed and which he kicked off.

INDIAN GOV'T. SHOULD CONTROL IMMIGRATION

Prohibit Indian Laborers from Moving to Certain Countries—Labor Short in India.

London, July 15.—It is anticipated that the Hindu test case in Vancouver will force the Indian government to find a solution for the problem, instead of allowing matters to drift. An obviously well-informed Indian authority says in the Yorkshire Post:

"The government and representatives of the Indian people will consult their own dignity, if they prohibit emigration in certain cases, instead of endeavoring to obtain concessions, which at best leave the status of the Indian settler one of inferiority."

Labor Short in India.

Mrs. Besant argues that the laboring classes of India are obliged to seek foreign means of subsistence, but the deputy chairman of the Bombay Mill Owners' association complains of deficiency in the supply of labor in that city alone amounting to 100,000 men. The inland revenue department of the Bombay government states that the dominant feature of the year was the shortage of labor in country districts. Except in one or two country districts of the united provinces of Madras the shortage of labor throughout India is seriously affecting the industrial position of the country.

Exclusion Defended.

A Times' editorial strongly supports Canada's attitude. It says that edicts for the exclusion of unsuited immigrants are rightly made and enforced in Canada without regard to the fact of whether the persons excluded are Englishmen or Indians or others. Replying, the Hindus claim that in their case exclusion is directed not against individuals, but against the race, thus amounting to a brand of racial inferiority.

The Times says that the answer lies in the unbridged difference between East and West. "These differences affect the whole fabric of civilization. Things the European believes to be important the Asiatic believes to be less than dust.

"In spheres where the European is engaged in building new communities, where he has to ask himself day by day whether the foundations were well laid and the growing fabric secure in each successive storey of its structure he is compelled to exclude alien influences and the inevitably corrosive action of social materials that resist assimilation.

FALLS THREE FEET; PICKED UP DEAD

Victoria, July 15.—A fall of three feet caused the death of Julius Dahl, a painter who was whitewashing the roof of the city market stables.

According to the account given by the deceased's companions, Dahl appeared at work in his usual good health, but about ten o'clock he was heard to cry out and fall from the low platform on which he was standing, dropping his bucket and brush as he did so. His head came violently in contact with the stone flooring. When his companions reached him he was dead, and a tiny stream of blood from the right ear showed that a fracture at the base of the skull was the cause. Dr. W. Baptie was called and pronounced life extinct. Dahl was subject to fits, and it is presumed that it was a sudden seizure which took him as he worked and caused the fall which resulted in his death, which was apparently instantaneous.

PORTE'S BROTHERS DIED IN ATHLETICS

Trans-Atlantic Airman Has Had Tragedies in His Own Family—One Other Son Left.

London, July 15—Lieutenant Porte's father, the Rev. John Robert Porte, has had three sons sacrificed to athletic prowess, and naturally he views with some apprehension the embarking of a fourth on the perils of the unflown Atlantic. By a sad coincidence each one of the clergyman's sons who died has been carried away as the direct result of a fatal chill contracted while following some form of sport. They were all entering on what promised to be brilliant careers—one in the army, one in the navy, and one in the church. All appeared to have enjoyed robust health previously.

Dr. Porte has aged and saddened under these bereavements, coming as they did close to the death of his wife, to whom he was extremely devoted. There remain now only the lieutenant, his two sisters, and his 13-year-old brother, Edgar, who is in Brighton college.

Edgar is an unusually bright little chap, interested in almost everything, and especially in aeronautics. He has pleaded time and again to be taken up by the lieutenant, but their father forbids the lad's venturing into the air.

Lieutenant Porte's Sisters.

Miss Monaca Porte, the older of the girls, is engaged to Lieutenant Hicks of the British navy. She and Miss Leonie Porte now spend most of their time, when not travelling, at their father's country place in Hertfordshire. Dr. Porte continues at his duties at Denmark Hill, a suburb of London four miles south of Charing Cross, where he has been vicar of St. Matthew's church for twenty-five years.

When Dr. Porte first went to Denmark Hill it was a very pretty, quiet, and secluded district, with fine old houses in spacious grounds, occupied by a wealthy and notable people. Among his parishioners were John Ruskin and Sir Henry Bessemer, but with the advent of the tramcar and the motor omnibus, the building of the new King's college hospital on the Hill, and the opening of Ruskin Manor as a public recreation park, all is changed. Most of the handsome old residences have been turned into boarding houses or been pulled down to make room for more cluttered buildings, and only the memories of the old neighborhood remain. The vicar is attached to the spot. Frequently he may be seen walking alone in the beautiful garden which surrounds the residence, which is on a level with the dome of St. Paul's cathedral. But for his children the vicarage is a place of sad memories and the girls are seldom seen there.

CATTLE BARONS READY TO RAISE BEEF PRICES

Rates Go up at the Chicago Stockyards—Scarcity of Anmials Is Cause of Advance.

Chicago, July 15.—Cattle prices are advancing rapidly at Chicago and all other western primary shipping points, and Chicago dealers were today forecasting $10 and even $12 beef before next winter. At Kansas City yesterday cattle on the hoof reached the highest point in a year. The receipts have fallen off at Chicago, Kansas City, St. Louis and Omaha to a degree unprecedented for this season.

Packers and shippers said today that the scarcity of cattle and the consequent increase in prices are the result of the drought last fall which compelled the raisers to rush their cattle to market even on the falling prices.

Packers say that the consumer, as usual, will pay the increase.

Boycott American Beef.

New York, July 15.—"If beef prices continue to rise abnormally, we will start an American beef boycott. We will preach to the American housewife the use of more Argentine beef, more fish, more vegetables and more eggs."

With this threat, Mrs. Julian Heath, national president of the Housewives' league, today answered the Chicago report that beef is soaring upward in the face of bumper crops.

"There is no reason it seems to me why meat should be going up now that crops are so unusually large," she declared. "But if it does, we will see that Argentine beef is used. It sells for 14 and 15 cents a pound. I use it in my home and find it eminently satisfactory."

TO RENT—FURNISHED HOUSEkeeping rooms, $10 per month, at 224 Seventh street. (3606)

BULL ELEPHANTS HELPED BY COWS

Form First Aid Brigade and Do Patrol Duty as Well—African Explorer Relates Experiences

Washington, July 15.—Carl E. Akeley, African explorer, in a communication to the National Geographic Society, at Washington, D. C., tells of an elephant "first-aid brigade," made up of the female elephants of a herd, which not only attempted to give succor to their wounded sultan, but went on "patrol duty" in an effort to punish his assailant.

While hunting elephants in Uganda, Mr. Akeley came upon a herd in a clearing, rounded up in close formation, conscious of the presence of an unseen enemy. "There were about twenty-five elephants, mostly cows, and just as I was on the point of backing off to a safer distance, thinking there were no big bulls in the lot, a fine pair of tusks appeared on the near side," he says. "A clump of bushes offered cover for a near approach, and I went in quickly to within twenty yards of him, and as his front leg was thrust forward, offering a good opportunity for a heart shot, I fired both barrels of the double rifle in quick succession.

Went to Safe Distance.

"All was commotion as I seized my second rifle, and seeing there was no direct charge, retreated some fifty yards to the top of an ant-hill, from which I could see what was going on. I then witnessed a scene such as I had heard described and which I was keen to verify. A number of cows were clustered about the bull, for he had fallen about thirty yards from where he was shot, and with their tusks and trunks were doing their best to get him upon his feet; the remainder of the cows were doing patrol duty, rushing about in an increasing circle, searching for the source of the trouble. That meant me so I retired to a safe distance and waited for the atmosphere to clear. This bull stood eleven feet and four inches high at the shoulders, and the tusks weighed 95 and 110 lbs. respectively, while the circumference of the front foot at the sole was 67½ inches, the largest recorded I believe.

Bull Has a Reputation.

"It is generally understood that large bull elephants are more frequently to be found apart from the herds, but our experience does not bear this out. Three bulls that we have shot, having tusks each weighing over 100 pounds, have been herd bulls. One splendid old bull, well known in Uganda, who has been seen by many hunters, is so well protected by a large herd of most aggressive cows, who charge at the slightest intimation of danger, that he still survives. These old bulls are very rare, for when one has developed tusks of fifty pounds he becomes the target for every hunter, native or white who sets eyes upon him; thus it is only the more crafty or timid individuals that, seeking the protection of large herds or clinging to the more inaccessible regions, such as dense forests, manage to survive to a ripe old age and develop a full growth of ivory.

Forty Tons of Vengeance.

"At another time I was watching a herd from an ant hill, when from the cows there was a low ominous rumble like distant thunder, which was plain talk and meant trouble. A hasty glance around convinced us that there was but one thing to do, to stand and meet the charge from the elevation where we were, and from where we could see. If we tried to escape to one side or to the forest we could not see them over the high grass before they were upon us. They charged toward us, came half way and stopped. They had lost the wind, but immediately caught it again, and roaring and screaming with redoubled energy, came into view over a slight rise. It was a disconcerting spectacle. Their great ears full spread, trunks thrashing wildly, a roaring screaming mass, forty tons of frantic female elephant vengeance. I remember that I felt homesick. A rifle shot stopped the leader, but encouraged by the others, she came on, only to be knocked down by the second shot. The others crowded around her, sniffed and—bolted. The old cow slowly regained her feet and staggered away, while we, in deep gratitude, returned to camp."

$80,000,000 FOR NEW TERMINALS

What Is Being Spent in Chicago for Railroad Facilities—Will Take Three eYars.

Chicago, July 15.—This year will see some of the greatest developments in railway terminals in the history of Chicago.

More than $80,000,000 will be expended in this class of work. The figures include the cost of terminals completed, those under construction and on which work has started.

The bulk of this tremendous expenditure will be for the new West Side depot and terminal to take the place of the old Union station. On this improvement alone $65,000,000 will be expended.

On the extension of its terminal and factory site improvements the Chicago Belt railway will spend not less than $10,00,000. Added to this must be perhaps an equal amount which will go into factories and wholesale houses that are taking advantage of the Belt terminals in the outlying sections of the city.

Next in importance is the new Soo line freight terminal at Twelfth and Canal streets. This improvement has cost the company, for site and buildings and trackage, in the neighborhood of $8,000,000.

Used by Four Roads.

Four great railway systems will use the new West Side Terminal. They are: The Chicago, Burlington & Quincy, the Chicago, Milwaukee & St. Paul, the Chicago & Alton and the Pennsylvania lines.

On the passenger terminal alone $40,000,000 will be expended. The remaining $25,000,000 will be used in the freight terminals of the four roads.

The ordinances under which these improvements will be made were passed by the city council last March and forecast the largest single development in Chicago and its vicinity since the U. S. Steel Corporation built the town of Gary.

The new passenger station, which is to form the centre of the terminal, will be located in the block bounded by Adams, Canal, Jackson and Clinton streets. A large subway, the full length of the block, will connect the passenger station with the train concourse east of Canal street. From this ten tracks will run to the north and sixteen to the south.

The Pennsylavnia freight house wil lbe located immediately north of Twelfth street and extend to Taylor street and east of Canal street.

The Burlington freight house will be placed between Harrison and Taylor streets and near Canal. The executive offices of the Burlington already have been located in the new building in the district.

Various Improvements Involved.

The magnitude of the improvements to be made, which it is estimated will employ 10,000 men for more than three years, can be seen from the following summary of the ordinances under which they will be carried out:

The straightening of the river. The construction of a connection between Canal street and Orleans street, connecting the north side and west side of the city. The widening of Canal street from 80 to 100 feet from Washington street to Twelfth street. The grading of Canal street to as uniform a level as practicable. The opening of Monroe street as a through street; this includes a bridge and viaduct approaches. The present and future widening of all east and west viaducts from Lake street to Twelfth street, inclusive. The building of the Twelfth street viaduct 113 feet wide. The provision for the viaduct on Congress street across the tracks whenever the city opens that street from Franklin street to the river. The keeping of the level of the river bridges. The opening of Fourteenth street as an east and west street. Teh opening of Sixteenth street as an east and west street. The widening of the viaduct on Eighteenth street. The widening of the viaduct from forty to eighty feet on Polk street. The widening of the viaduct from forty to eighty feet on Taylor street. The providing of space on four sides of the headhouse for the loading and unloading of passengers without encroaching upon the present street areas.

TO DOUBLE-TRACK RIVER.

Steps Being Taken to Prevent Collisions on St. Lawrence.

Montreal, July 14.—In order to minimize the dangers of collision on the narrower reaches of the St. Lawrence river, arrangements are being made now by the department of marine and fisheries to practically double-track the channel from Point Aux Trembles down to the entrance of Lake St. Peter. Already part of this work is completed, and surveys are now being made to carry it on, and by next season it is hoped it will be completed. The work is being done in the way of dredging two separate channels, all the way down to the lake, one to be used by the smaller class of vessels with a draught of less than 15 feet, while the main channel will continiue to be used by the Atlantic liners and other vessels of heavy draught.

YEARLY SNEEZE CHASE IS NOW GOING ON

Hay Fever Sufferers Begin Their Annual Hunt for Cure—Many Quack Remedies.

Philadelphia, July 15.—The annual chase of that sumer will-'o-the-wisp, a cure for hay fever, is on. Leading the chase as usual is the organization of sufferers known as the United States Hay Fever association, willing as ever to try anything to get rid of their sneezes and tears.

This year the members of this association are going about their campaign systematically. Blank forms have been circulated among the members of the association and other known sufferers from hay fever, rose cold or asthma, through the annual report of the association, asking for personal experiences.

Hereafter the hundred and one suggested cures will be judged by answers to one question, "Do they cure?" Sufferers will fill in the blank forms with the names of remedies they have tried and the places they have visited in search of relief. The success obtained through these remedies will be filed with the secretary of the association for reference.

Fifty-five advertised cures were reported upon at the last annual "sneeze fest" of the association, held in Bethlehem, N. H., last summer. The secretary calls the roll of these so-called cures alphabeticaly. Thirty-four of these remedies were discarded as useless.

Col. M. Richards Muckle, of this city, a former president of the association, was introduced as the "King of Hay Feverites."

"I must have spent $4,000 and have tried everything—cold baths, hot baths, sweat baths and quacks," said Col. Muckle, "and after all I have taken I am fortunate to be alive, for I am 88 years old and have had hay fever since I was 18."

But the hay fever association has stopped experimenting. The members have been holding conventions for 40 years. At first they met to joke and sympathize with each other and compare sneezes. A thirty-third degree sufferer in those days was one who used thirty or forty handkerchiefs a day.

Now the association's annual convention discusses remedies and starts agitations in councils and legislatures for the elimination of ragweed. The members are on the track of the hay fever germ and expect some important information from the scientists who are aiding them when they meet in their forty-first annual convention on September 3, at Bethlehem, N. H.

BELIEF IN A SOUL DYING OUT, HE SAYS.

Professor Declares No Fundamental Difference Betweet Minds of Men and Dogs.

Chicago, July 15. Belief in the soul is disappearing and in its stead arises a stronger belief in a kinship between man and the lower animals, according to the view expressed today by Prof. Joseph Peterson, of the University of Utah, in a lecture to University of Chicago students on "Changing Conceptions of Mind and Personality."

"In our day," said the speaker, "a few scientists of the first rank have adhered to the older ideas, but this has been mostly for personal or ethical views, rather than to meet the actual demands of science. They seemed to have failed to convince their scientific brethren of any real function performed by the soul in psychological explanations.

Prof. Peterson declared that there is no fundamental difference between the mind of a dog and the mind of a man.

"It is questioned whether an unbiased student of comparative psychology can find any experimental evidence for a view that the minds of men and animals are different. On the contrary, all mental differences between animals and men are becoming differences of degree, not of kind. It is true that no animal ever told any one of us in so many words that it is conscious, as we are conscious, that it has an inner life of its own. But it is no less true that all such communications between persons is ultimately based on inference from behavior, just as is our knowledge of the animal mind."

CIVIC SHOPS TO CUT HIGH COST OF LIVING

Budapest Invests Million Crowns in Municipal Stores to Help Reduce Expenses.

Budapest, Hungary, July 15.—The municipality of Budapest has probably done more to relieve the distress resulting from the increase in the cost of living during the last few years, than any other city in Europe. Much wisdom and ingenuity has been shown in the practical way in which it has undertaken to reduce this cost, and especially to assist indirectly certain classes of its population, more particularly clerks and small government employees, who, on account of their station in life, cannot be the objects of direct charity.

The municipality has, during the last two years, invested 1,000,000 crowns in municipal shops, where certain meats, poultry, eggs and butter are sold at reasonable prices. These shops are intended to make a profit of from 5 to 6 per cent. in order not to compete unfairly with the retail butchers and dairymen, and this has been a sufficiently small profit to affect prices in general, to a certain extent.

Cost of Necessities Increases.

Nevertheless, during that time there was a reported average increase in the cost of necessities amounting to about 22 per cent. This may, perhaps, be somewhat exaggerated, but it is safe to say that the average increase was well over 20 per cent. Wheat and rye, the two bread-making cereals, increased by 15 and 45 per cent., respectively, in spite of fairly good crops and there have been proportionate increases in the prices of other food products.

The daily output of the municipal bakery which has recently been enlarged, was increased from 28,000 kilograms in 1910, to 56,000 kilograms in 1913, and it is expected that it will be further increased to 125,000 kilograms in 1915. The present output, 56,000 kilograms, is estimated to be about 10 per cent. of the total consumption of Budapest.

Further efforts have been made to keep down the cost of living by the formation of a municipaly controlled company to import meat from Rumania and Servia under the most favorable conditions.

The municipal bakeries have gained an enviable reputation, and the gratitude of the public. As these bakeries are fitted with modern machinery, they can produce large quantities of bread, while at the same time employing a relatively small number of hands, and as the bread can be shipped daily to any remote place in Hungary, strikes of bakers are futile.

In 1913 there was such a strike in Belgrade, and conditions soon became very grave. The city council, therefore, appealed to Budapest, and the mayor of that city immediately ordered the municipal bakeries to send to Belgrade daily as much bread as was required. As a result, the strike was of short duration.

Model Houses Built.

The municipality also continues to combat the high rents by the construction of model houses and tenements for workingmen, and during the three years from 1911 to 1913, a total of 1,979 lodgings were completed. The dearth of servants in Budapest has also caused the city council a certain amount of trouble, and in order to remedy this to some extent, the sum of 765 crowns has been appropriated for the construction of three municipal homes for servants, in connection with which a servant employment bureau will be maintained.

It is also considered that the electric light company has been making the public pay more than was necessary for the current, and incidentally earning bigger profits than was desirable; the municipality has, therefore, decided to purchase the plant for the sum of 20,057,000 crowns, and will operate it itself, to the advantage of the public.

As it was thought that the taxes in Budapest would not be so high if the asphalt sold to the city by the asphalt trust were not so expensive, the municipality duly investigated the matter. It was then found that the asphalt could be manufactured for nine crowns per cubic meter, and as the trust insisted on the municipality paying 12 crowns per cubic meter, a municipal asphalt factory is to be built immediately.

In the meantime the city council has decided that no more asphalt shall be used on the streets until the city can supply it from its own factory. The general public is naturally very grateful for the fatherly way in which it is cared for by the municipality.

Some of the members of the Kamloops Baseball club have in contemplation a scheme both enterprising and interesting, and that is a tour in Japan.

Electric Household Appliances

A cordial invitation is given the ladies of New Westminster to visit the salesrooms of the B. C. Electric, in the company's terminal at Columbia and Eighth, to inspect our complete line of Electric Cooking and Household appliances.

These appliances greatly lessen the labor of the housewife, promoting both her comfort and convenience. They are always ready for service, operating on connection with any household socket. The cost for current is only a few cents per hour of continuous operation.

Electric Cooking Applances just meet your summer demands as they can do all forms of light cooking just as well as the kitchen range. Fully seventy-five per cent of your summer cooking can be done in this manner.

THE APPLIANCES WILL BE DEMONSTRATED FOR YOU AND ALL QUESTIONS ANSWERED. YOU WILL FIND THE VISIT BOTH INTERESTING AND INSTRUCTIVE.

Up-to-the-minute in every Department.

IF YOU STOP TO THINK YOU WILL ALWAYS BUY AT HOME

There's a whole lot of harm done in this old world, just because people will not stop to think.

* * * * *

A man comes round the corner in his auto, forgetting that there's anybody using the streets but himself, and the next minute there's a call for the ambulance.

* * * * *

All because he didn't think.

* * * * *

It's the same in many other things, particularly in business.

* * * * *

No citizen of New Westminster who has the welfare of the city at heart would deliberately go and do something which would hurt the town; but, nevertheless, there are some who are good boosters for this place who are unconsciously doing it an injury almost every day.

* * * * *

They don't stop to think that when they buy something out of town, which they might just as well have purchased here, they are sending money away which belongs to New Westminster and which will not come back.

* * * * *

They forget that money earned in New Westminster is part of New Westminster, part of the capital of the city on which it relies for its growth.

* * * * *

Every cent of that money which is sent away to buy things which could be bought here is doing harm to New Westminster, not so much because it goes to help build up another town, but because it helps build up that other town AT THE EXPENSE OF NEW WESTMINSTER.

* * * * *

So stop to think the next time you are tempted to buy outside New Westminster.

* * * * *

Also, there are some people who talk about the great assortment from which they have to buy elsewhere. They do not appear to realize that the greater the demand in their home stores the greater will be the assortment

* * * * *

I takes many things to make a town, but the greatest ingredients in city building and the most potent factor in winning success for a community is loyalty.

* * * * *

Be loyal to your town and you will not lose by it.

Will You Line Up ?

WILL EXAMINE CHANNEL.

Officials Will See If Dredge Can Be Spared from Sandheads

A visit to the Sandheads will be made by Resident Engineer C. C. Worsfold, Harbor Engineer A. O. Powell, the harbor commissioners and Alderman Annandale, chairman of the harbor committee of the city council, for the purpose of making an exhaustive examination of the new channel in order to ascertain whether the government dredge Fruhling can be spared from its work there to assist in the filling in of the new dockage facilities on Front street.

The dredge is expected to undergo general overhaul within the next few weeks and it is thought that unless it can be secured in the near future it will be several months before filling operations can be carried on at the harbor improvement work on a large scale.

PREMIER REFUSED TO HANDLE FUND

St. John, N.B., July 15.—At the inquiry into the crown land charges made against Premier Flemming of New Brunswick, which was resumed this morning before the royal commission, E. R. Teed told the commission that he had been asked by Premier Flemming to take charge of the campaign fund. He had been asked to receive contributions. He understood that the premier had been informed that the lumbermen were raising a fund for party purposes. The premier had refused to have anything to do with the fund, however, but had offered to nominate a man to take charge of the fund and had accordingly selected the witness, Mr. Teed, for the purpose.

AUTOISTS MEET TONIGHT.

Club to Be Organized at a Gathering This Evening.

W. Gray and assistants.

LASSEN AGAIN ERUPTS.

Eighteenth Discharge During Past Month Tame Affair.

Redding, Cal., July 15.—Black smoke belched a mile high from the crater of Lassen Peak early today and then drifted southward before the wind in a banner ten miles long.

The amount of falling ashes was small compared with the great eruption of June 14, although the volume of the cloud was fully as great and the duration of the disturbance longer. The first violence of the outbreak began to dwindle after two hours, although the mountain still emitted smoke.

The spectacle of Mount Lassen in eruption has become so common that it no longer excites the countryside. Today's is the 18th eruption since May 30.

Large Empress Subscriptions.

Montreal, July 15.—One of the largest subscriptions ever raised under the auspices of the Montreal board of trade is being secured for the Empress of Ireland sufferers. Already the fund is $55,073, and subscriptions are still coming in at the rate of $100 a day. No thought of closing the fund has as yet been entertained and it is hoped that before it is closed between $60,000 and $70,000 will be secured.

Murderer Reprieved.

Regina, July 15.—Austin Drewnick, a prisoner in the jail at Prince Albert, convicted of murder and sentenced to die was today granted a reprieve by Judge Brown in the district court in this city. The execution was to have taken place tomorrow, but is postponed until Aug. 13.

TO CELEBRATE FIRST POPPING OF CORK

France Will Hold 250th Anniversary of Accidental Discovery of Champagne.

Paris, July 15.—Preparations are now going forward in France to celebrate the 250th anniversary of the discovery of champagne. The exact date of the momentous occasion is uncertain, but so are other exact dates that we commemorate, and the people of the wine-growing district of France believe that nothing is better worth celebration than the accidental discovery of that old Benedictine monk when he heard the first of the world's "pops," saw a cork burst from a bottle and the original champagne foam over the cellar floor. The monk was named Dom Perignon, and he was the cellar master of the Abbey of Hautevillers. Dom Perignon was an experienced judge and guardian of wine, and in the cellar under his care were most of the known wines of the age, among them the wine that we now call champagne, excepted that it was as flat as claret. Some time before the day on which his epoch-marking discovery was made he had invented wooden corks for the bottles instead of the flax dipped in oil which had preceded them. Perhaps the wooden corks had something to do with manufacturing the first effervescent wine. It may be that a chance removal of casks to a colder temperature transformed active fermentation into latent fermentation.

The First Drink.

At any rate, the monk was going his rounds with his little silver goblet at his girdle when he was astonished by the popping of a cork. Then there was another and another explosion. He saw that several bottles had burst and were foaming and frothing at the mouth as though suddenly gone mad. He picked up one of them and poured some of the magic contents into the goblet. "He inbreathes the fragant gases," says Sterling Heilig, writing upon the subject of the commemoration; "sniffs down the winged perfumes—aye, to the depths of his lungs, mingling with the oxygen of his life. His lips are not wet, yet Dom Perignon trembles—the sensation is so beautiful. Now he takes his first gulp. Tongue, mouth, palate, dance beneath the 'pick' of the first swallow of sparkling champagne in the world, composed of grace, force, gayety. See, he fears a disillusion. What if the new liquid, so agreeable to the taste, should have a muddy, ugly look. No natureh as united in the miracle all her seductions! The wine is light-colored, clean-cut, clear as crystal! And—astonishment upon astonishment!—a meteor shower of laughing bubbles dance up continually. 'Stars!' exclaims Dom Perignon, 'I'm drinking stars!'

Thanked Gor for Miracle.

"He kneels to thank God for the miracle. It seems, indeed, a miracle to the old monk—the sparkling champagne that made itself by accident. Because, to the already rich perfume of the old, flat wine of kings were added utterly new exhilarations, all superb—which no man in the world before had tasted or dreamed of! Dom Perignon became a great man. Why it popped and fizzed remained a mystery to him, as to all the others, because the conenction between carbonic acid and sugar was undreamed of. Simply, they followed his rule-of-thumb formula, and he repeated, always what he had done by accident, in mixing, shifting, bottling at a certain moment with wooden corks, and so on. Thus they found a wine that would burst from its bottle and overflow the glass, twice as dainty and exhilarating as if it had aged naturally"

The Perfect Wine.

The modern wine indsutry owes much to the old monk. Besides the pop and the wooden cork, he discovered that the best champagne is produced by a judicious mixing of grape juice from two or three districts. For instance, it is said that the perfect wine is made by blending in equal proportions juice from Avize, noted for lightness, freshness and effervescence; juice from Dizy-Magenta, famous for vinousness, mellowness and roundness; juice from Ay for bouquet, "go" and brilliancy; and juice from Verzenay, for both body and delicate perfume. In France there is only one true champagne district, and many may recall a condition that might have led to civil war had the government given the growers of Aube and Upper Marne permission to call their wine champagne. The grower of the true champagne is the Marne district. It is true that the Marne imports millions of gallons of juice from the Upper Marne and elsewhere to mix with its own wines, and it is equally true, no doubt, that this is what most people are drinking now when they order champagne. Just as there is more Scotch whiskey drunk every year than could be distilled if the whole population of Scotland were exclusively engaged in the business, so there is more champagne drunk in a year than France could produce in ten.

Wine-drinking Nations.

Experiments following the monk's first discovery led to the introduction of a little sugar in the wine. In France they like their wine doux or sweet, with about 13 degrees of sugar. In Britain and the United States the favorite is sec (dry) with from four to two degrees of sugar. The original wine (brut) has no sweetening, or very little, and there is no great demand for it anywhere. It is rather significant that there is less champagne drunk in France than in any other wine-drinking country. Russia, leads, followed by the United States, Belgium, England, Germany and South America. The champagne industry is one that France enjoys a monopaly of, and although now she is exporting more than she can produce, she hopes to further increase her exports by a great celebration, when wine will flow as though all France were a fountain.

BRITISH WARSHIPS BUSY ON RESCUE WORK

Victoria, July 15.—Among the passengers who disembarked from the S. S. Governor at this port was Seaman H. Williams, member of the crew of the British sloop of war H. M .S. Algerine, which, together with H. M. S. Shearwater, is now doing patrol duty off the Mexican seaboard. While serving on the Algerine, Williams was taken ill with feevr, and upon recovery was shipped back to Esquimalt from San Diego by the Governor.

Williams says that the Algerine sailed for San Diego on Sunday last for Mazatlan and Salina Cruz, to relieve the Shearwater, which will now return to San Diego, which is the base of operations for the warships. He says that the Algerine and Shearwater have been engaged in transporting refugees from points on the Mexican coast to San Diego. When Williams left San Diego the officers of the Algerine had not been advised when the warship was likely to return to Esquimalt, and the crews were resigned to a lengthy stay in Mexiacn waters.

BODY OF COMMISSIONER REES IS IDENTIFIED

Toronto, July 14.—Col. Gaskin, of the Salvation army, received a message yesterday from Rimouski to the effect that Major Jennings had identified the body of Commissioner Rees. The identification was made by a waterproof that the late Commissioner wore, and also by the initials on his pyjamas. The local officials of the army are making arrangements for a public funeral on Wednesday next.

BULL FLUNG SWORD INTO GRAND STAND

Madrid, July 14.—The bulls carried off the honors in the fighting here yesterday. In the event for amateurs the sword of one of the toreadors was caught by the bull, and tossed into the stand. It struck a spectator in the neck, killing him. Later, a Mexican swordsman, after killing the first bull, was mortally gored by the second. The fighting then stopped for the day.

JAPANESE OIL WELLS WITHOUT PRESSURE

Tokio, Japan, July 15.—The large quantity of oil which suddenly burst from the Kurokawa oil wells recently shows no signs of diminishing. While producing more than twice the volume of all the other wells in the empire combined, it is remarkable in the history of the oil industry the world over, as the oil simply flows in a steady stream and is unattended by the pressure which has always been experienced in similar cases, and has been found difficult to control.

K. Ito, superintendent of the investigation department of the Nippon Oil company, in his report on the subject, says:

"Work was commenced on the new well during the first part of April, this year, with one of the company's up-to-date rotary boring machines. After drilling through ordinary earth and rock to a depth of some 1110 feet, a strata, known to oil experts as 'the shell,' was encountered. At midnight of May 25 the drill pierced through this shell, or crust, at a depth of 1368 feet, into what is apparently the lead bed of an extraordinary deposit.

Old Wells Now Flowing.

"It is from this bed that the present unusual flow continues. That which is most extraordinary is the fact that the other five wells of the company in that district, which heretofore required suction pumps, have also begun flowing of their own accord. But the flow is so steady, and being unattended by any extraordinary force, is easily controlled. Even the flow of the new well can be controlled at any time, as it flows in a steady stream. The new well was sunk with an eight-inch casing, which has been capped with a four-way head, thereby controlling the flow.

The output was, at first, somewhat difficult to handle, as no provision had been made for such an unusual quantity. The sump at the top of the hill which had been constructed to receive the flow was soon filled, and the overflow was conducted down into the upper level paddy fields, where many hands erected a dyke around the outside of several cho, thus forming a very large sump."

OREGON WANTS SQUARE JUDICIARY

Measure to Be Voted on in November Endorsed by Press, Bar, Unions and Clubs.

Portland, Ore., July 15.—As the outgrowth of agitation for a non-partisan judiciary that has been going on in this state for a number of years, a bill now is pending the action of the voters of Oregon to provide the manner of nominating and electing judicial officers, to define the term judicial officer within the meaning of the act, to prohibit the nomination at any primary election of any judicial officer by any political party, association, person or persons, and to provide a penalty for its violation.

The measure is in 13 sections. It is not the sequence to specific alleged abuses by the courts. The plan more nearly represents the desire, so far as possible, to perfect the governmental machinery of the commonwealth, a desire manifest in many innovations that have been adopted by the citizenry with more or less satisfactory results.

In 1913 the legislature defeated a bill containing the same general provisions, framed by a governor's commission appointed to propose a reform of the judicial system, including plans for reform of judicial procedure and court practice. Among the reforms proposed was the non-partisan judiciary.

For the latter, a bill passed the house, but was defeated in the senate by the narrow margin of two votes. Thereafter the Shingle Weavers' union declared for an initiative bill, and the plan was endorsed unanimously by the state federation of women's clubs. The latter indorsement was followed by similar action on the part of the bar association, which named a committee to prepare the bill.

The bar association's proposal was for the bill to go before the legislature, but, distrustful of that body, as a result of the experience of 1913, the committee has obtained signatures and placed the bill on the ballot to be passed upon by the voters in the election next November.

The measure has the backing of most of the press and its adoption is freely predicted.
